eMAGIN CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Summary of Significant Accounting Policies

eMagin Corporation (the “Company”) designs, develops, manufactures, and markets OLED (organic light emitting diode) on silicon microdisplays and virtual imaging products which utilize OLED microdisplays. The Company’s products are sold mainly in North America, Asia, and Europe.

Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements of eMagin Corporation and its subsidiary reflect all adjustments, including normal recurring accruals, necessary for a fair presentation. All significant intercompany balances and transactions have been eliminated in consolidation. Certain information and footnote disclosure normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the Securities and Exchange Commission. The Company believes that the disclosures provided herein are adequate to make the information presented not misleading when these unaudited condensed consolidated financial statements are read in conjunction with the audited consolidated financial statements contained in the Company’s Annual Report on Form 10-K for the year ended December 31, 2011. The results of operations for the period ended March 31, 2012 are not necessarily indicative of the results to be expected for the full year. The consolidated condensed financial statements of December 31, 2011 are derived from audited financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2011.

In accordance with accounting principles generally accepted in the United States of America, management utilizes certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments related to, among others, allowance for doubtful accounts, warranty reserves, inventory reserves, stock-based compensation expense, deferred tax asset valuation allowances, litigation and other loss contingencies. Management bases its estimates and judgments on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Recently Issued Accounting Pronouncements

In May 2011, the FASB issued an accounting standard update related to fair value measurements and disclosures to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with United States GAAP and International Financial Reporting Standards. This guidance includes amendments that clarify the intent about the application of existing fair value measurement requirements, while other amendments change a principle or requirement for measuring fair value or for disclosing information about fair value measurements. Specifically, the guidance requires additional disclosures for fair value measurements that are based on significant unobservable inputs. On January 1, 2012, the Company adopted this guidance on a prospective basis and there was no impact on the Company's condensed consolidated financial statements.

Net Loss per Common Share

Basic loss per share is computed using the weighted average number of common shares outstanding during the period, and excludes any dilutive effects of common stock equivalent shares, such as stock options, warrants, and convertible preferred stock. Diluted loss per share is computed using the weighted average number of common shares outstanding and potentially dilutive common stock equivalent shares outstanding during the period. Common stock equivalent shares are excluded from the computation if their effect is anti-dilutive.

The Company's Series B Convertible Preferred stock ("Preferred Stock – Series B") is considered a participating security as the preferred stock participates in dividends with the common stock, which requires the use of the two-class method when computing basic and diluted earnings per share. The Preferred Stock – Series B is not required to absorb any net loss.

For all periods presented, the Company has reported a net loss and as a result, basic and diluted net loss per common share are the same. Therefore, in calculating net loss per share amounts, shares underlying the following potentially dilutive common stock equivalents were excluded from the calculation of diluted net income per common share because their effect was anti-dilutive for each of the periods presented.

	Three Months Ended March 31,	
	2012	2011
Options	4,628,749	4,418,374
Warrants	1,000,000	2,205,001
Convertible preferred stock	7,545,333	7,572,000
Total	13,174,082	14,195,375

Note 2: Accounts Receivable

The majority of the Company's commercial accounts receivable are due from Original Equipment Manufacturers ("OEM's"). Credit is extended based on an evaluation of a customer's financial condition and, generally, collateral is not required.

Accounts receivable consisted of the following (in thousands):

	March 31, 2012 (unaudited)	December 31, 2011
Accounts receivable	\$ 4,912	\$ 5,844
Less allowance for doubtful accounts	(268)	(268)
Accounts receivable, net	\$ 4,644	\$ 5,576

Note 3: Inventories, Net

The components of inventories are as follows (in thousands):

	March 31, 2012 (unaudited)	December 31, 2011
Raw materials	\$ 1,268	\$ 1,092
Work in process	526	985
Finished goods	1,015	689
	2,809	2,766
Less inventory reserve	(9)	(6)
Total inventories, net	\$ 2,800	\$ 2,760

Note 4: Line of credit

At March 31, 2012, the Company had available a credit facility with Access Business Finance, LLC ("Access") under which the Company may borrow up to a maximum of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The terms of the line of credit are: the minimum monthly interest payment is \$1,000; the interest rate is Prime plus 5% but not less than 8.25%; and the early termination fee is \$6,000. The renewal date is September 1, 2012. The Company's obligations under the agreement are secured by its assets. As of March 31, 2012, the Company had not borrowed on its line of credit.

Note 5: Stock-based Compensation

The Company uses the fair value method of accounting for share-based compensation arrangements. The fair value of stock options is estimated at the date of grant using the Black-Scholes option valuation model. Stock-based compensation expense is reduced for estimated forfeitures and is amortized over the vesting period using the straight-line method of attribution.

The following table summarizes the allocation of non-cash stock-based compensation to our expense categories for the three month periods ended March 31, 2012 and 2011 (in thousands):

	Three Months Ended March 31, (unaudited)	
	2012	2011
Cost of goods sold	\$ 64	\$ 25
Research and development	141	19
Selling, general and administrative	544	812
Total stock-based compensation expense	\$ 749	\$ 856

At March 31, 2012, total unrecognized compensation costs related to stock options was approximately \$4.0 million, net of estimated forfeitures and is expected to be recognized over a weighted average period of approximately 2.3 years.

The key assumptions used in the Black-Scholes option pricing model to determine the fair value of stock options granted and the weighted average grant date fair value per share are as follows:

	Three Months Ended March 31, (unaudited)	
	2012	2011
Dividend yield	0 %	0 %
Risk free interest rates	0.51 to 0.87 %	1.04 to 2.37 %
Expected volatility	71.8 to 81.2 %	67.1 to 85.7 %
Expected term (in years)	3.5 to 5.5	3.5 to 5.5
Weighted average grant date fair value per share	\$ 2.25	\$ 3.92

The Company has not declared or paid any dividends and does not expect to do so in the near future. The risk-free interest rate used in the Black-Scholes option pricing model is based on the implied yield currently available on U.S. Treasury securities with an equivalent term. Expected volatility is based on the weighted average historical volatility of the Company's common stock for the most recent five year period. The expected term of options represents the period that our stock-based awards are expected to be outstanding and was determined based on historical experience and vesting schedules of similar awards.

A summary of the Company's stock option activity for the three months ended March 31, 2012 is presented in the following tables:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2011	4,242,251	\$ 3.93		

Edgar Filing: EMAGIN CORP - Form 10-Q

Options granted	410,500		3.88		
Options exercised	(24,000)		1.20		
Options forfeited	—		—		
Options cancelled	—		—		
Outstanding at March 31, 2012	4,628,751	\$	3.94	5.93	\$ 3,676,255
Vested or expected to vest at March 31, 2012 (1)	4,555,187	\$	3.91	5.94	\$ 3,673,636
Exercisable at March 31, 2012	3,157,477	\$	3.03	6.14	\$ 3,623,865

(1) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumptions to total unvested options.

The aggregate intrinsic value in the table above represents the difference between the exercise price of the underlying options and the quoted price of the Company's common stock. During the three months ended March 31, 2012, the aggregate intrinsic value of options exercised was \$62 thousand. The Company issues new shares of common stock upon exercise of stock options.

Note 6: Shareholders' Equity

Preferred Stock - Series B Convertible Preferred Stock ("the Preferred Stock – Series B")

As of March 31, 2012, there were 5,659 shares of Preferred Stock – Series B issued and outstanding.

Common Stock

For the three months ended March 31, 2012, the Company received approximately \$29 thousand for 24,000 stock options exercised. For the three months ended March 31, 2011, the Company received approximately \$22 thousand for 23,250 stock options exercised. For the three months ended March 31, 2011, there were 380,511 warrants exercised on a cashless basis resulting in 310,897 shares of common stock issued. In addition, the Company received proceeds of approximately \$81 thousand from the exercise of warrants and issued 72,116 shares of common stock in the three months ended March 31, 2011.

Note 7: Income Taxes

The Company's effective tax rates for the three months ended March 31, 2012 and 2011 was 37.1% and 36%, respectively. The differences between the effective tax rate of 37.1% and the U.S. federal statutory rate of 34% for the three months ended March 31, 2012 were primarily due to the impact of state income taxes and alternative minimum tax. For the three months ended March 31, 2011, the difference between the effective tax rate of 36% and the U.S. federal statutory rate of 34% was alternative minimum tax.

Due to the Company's operating loss carryforwards, all tax years remain open to examination by the major taxing jurisdictions to which the Company is subject. In the event that the Company is assessed interest or penalties at some point in the future, it will be classified in the financial statements as tax expense.

Note 8: Commitments and Contingencies

Royalty Payments

The Company signed a license agreement on March 29, 1999 with Eastman Kodak ("Kodak"), under which it is obligated to make royalty payments. Under this agreement, the Company must pay to Kodak a minimum royalty plus a certain percentage of net sales with respect to certain products, which percentages are defined in the agreement. The percentages are on a sliding scale depending on the amount of sales generated. Any minimum royalties paid will be credited against the amounts due based on the percentage of sales. The royalty agreement terminates upon the expiration of the issued patent which is the last to expire. The Company was notified that Kodak sold substantially all rights and obligations under the Company's license agreement to Global OLED Technology ("GOT") as of December 30, 2009.

In late 2008, the Company began evaluating the status of its manufacturing process and the use of the intellectual property ("IP") associated with its license agreement. After this analysis and after making a few changes to its manufacturing process, by the end of 2008 the Company had stopped using the IP covered under the license agreement. The last royalty payment under the license agreement was made in November 2009. The Company determined that it is no longer required to pay the minimum royalty payment and as such has not paid or accrued this amount.

In April 2011, the Company received a request for royalty payments from a representative of GOT. The Company responded stating that the licenses were no longer in force and that the request for royalties was untimely. Although

GOT does not agree, both parties have expressed an interest in resolving the disagreement amicably. Communications to date have been preliminary regarding its resolution. The Company estimates that the range of loss contingency is between \$0 and \$250 thousand.

Operating Leases

The Company leases office facilities and office, lab and factory equipment under operating leases. Certain leases provide for payments of monthly operating expenses. The Company currently has lease commitments for space in Hopewell Junction, New York, Bellevue, Washington, and Santa Clara, California.

The Company's manufacturing facilities are leased from IBM in Hopewell Junction, New York. eMagin leases approximately 37,000 square feet to house its equipment for OLED microdisplay fabrication and for research and development, an assembly area and administrative offices. The lease expires May 31, 2014 with the option of extending the lease for five years. The corporate headquarters are located in Bellevue, Washington where eMagin leases approximately 6,300 square feet. The lease expires on August 31, 2014. In addition, the Company leases approximately 2,400 square feet of office space for design and product development in Santa Clara, California and the lease expires on October 31, 2012.

For the three months ended March 31, 2012 and 2011, rent expense was approximately \$302 thousand and \$289 thousand, respectively.

Equipment Purchase Commitments

The Company has committed to equipment purchases of \$1.7 million at March 31, 2012.

Note 9: Concentrations

For the three months ended March 31, 2012, approximately 52% of the company's net revenues were derived from customers in the United States and approximately 48% of the Company's net revenues were derived from international customers. For the three months ended March 31, 2011, approximately 74% of the company's net revenues were derived from customers in the United States and approximately 26% of the Company's net revenues were derived from international customers.

The following is a schedule of revenue by geographic location (in thousands):

	Three Months Ended March 31, (unaudited)	
	2012	2011
North America	\$ 3,375	\$ 4,095
Europe, Middle East and Africa	2,042	814
Asia	720	532
Total	\$ 6,137	\$ 5,441

The Company purchases principally all of its silicon wafers from a single supplier located in Taiwan.

Note 10: Subsequent Events

On May 8, 2012, the Company entered into a new employment agreement with Paul Campbell under which he will continue serving as the Company's Chief Financial Officer and Treasurer. The agreement will expire on December 31, 2013. Mr. Campbell will be paid an annual salary of \$318,000 and receive stock options valued at \$82,400 on May 8, 2012. The agreement provides that he will receive equity in the form of stock options or restricted stock valued at \$123,600 on December 31, 2012.

Pursuant to the employment agreement, Mr. Campbell's employment may be terminated by the Company with or without cause and he may terminate his employment for Good Reason (as defined in the agreement), among other reasons. If Mr. Campbell's employment is terminated without cause or if he terminates it for Good Reason, then Mr. Campbell, at the Company's sole discretion, shall be entitled to the lesser of (i) the total amount of his base salary that remains unpaid under the employment agreement, which shall be paid monthly or (ii) monthly salary payments for twelve (12) months, based on his monthly rate of base salary at the date of such termination. Mr. Campbell shall also be entitled to receive (i) payment for accrued and unpaid vacation pay and (ii) all bonuses that have accrued during the term, but have not been paid. Additionally, any non-vested options held by Mr. Campbell shall vest immediately. If the agreement is terminated with cause or if Mr. Campbell terminates it without Good Reason then Mr. Campbell shall cease to accrue salary, personal time off, benefits and other compensation on the date of such termination. If Mr. Campbell's employment is terminated or his position significantly changed or salary decreased as a result of the acquisition of the Company, Mr. Campbell shall be entitled to severance equal to the amount he would have been due

if he had been terminated without cause.

The foregoing descriptions of the employment agreement does not purport to be complete and is qualified in their entirety by reference to this agreement which is attached as an exhibit to this 10-Q and is incorporated into this Item by reference.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Statement of Forward-Looking Information

In this quarterly report, references to "eMagin Corporation," "eMagin," "Virtual Vision," "the Company," "we," "us," and "our" refer to eMagin Corporation and its wholly owned subsidiary, Virtual Vision, Inc.

Except for the historical information contained herein, some of the statements in this Report contain forward-looking statements that involve risks and uncertainties. These statements are found in the sections entitled "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operation," and "Risk Factors." They include statements concerning: our business strategy; expectations of market and customer response; liquidity and capital expenditures; future sources of revenues; expansion of our proposed product line; and trends in industry activity generally. In some cases, you can identify forward-looking statements by words such as "may," "will," "should," "expect," "plan," "could," "anticipate," "intend," "believe," "estimate," "predict," "potential," "goal," or "continue" or similar terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including, but not limited to, the risks outlined under "Risk Factors," that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. For example, assumptions that could cause actual results to vary materially from future results include, but are not limited to: our ability to successfully develop and market our products to customers; our ability to generate customer demand for our products in our target markets; the development of our target markets and market opportunities; our ability to manufacture suitable products at competitive cost; market pricing for our products and for competing products; the extent of increasing competition; technological developments in our target markets and the development of alternate, competing technologies in them; and sales of shares by existing shareholders. Although we believe that the expectations reflected in the forward looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Unless we are required to do so under federal securities laws or other applicable laws, we do not intend to update or revise any forward-looking statements.

Overview

We design and manufacture miniature displays, which we refer to as OLED-on-silicon-microdisplays, and microdisplay modules for virtual imaging, primarily for incorporation into the products of other manufacturers. Microdisplays are typically smaller than many postage stamps, but when viewed through a magnifier they can contain all of the information appearing on a high-resolution personal computer screen. Our microdisplays use organic light emitting diodes, or OLEDs, which emit light themselves when a current is passed through the device. Our technology permits OLEDs to be coated onto silicon chips to produce high resolution OLED-on-silicon microdisplays.

We believe that our OLED-on-silicon microdisplays offer a number of advantages in near to the eye applications over other current microdisplay technologies, including lower power requirements, less weight, fast video speed without flicker, and wider viewing angles. In addition, many computer and video electronic system functions can be built directly into the OLED-on-silicon microdisplay, resulting in compact systems with lower expected overall system costs relative to alternate microdisplay technologies.

We have developed a strong intellectual property portfolio that includes patents, manufacturing know-how and unique proprietary technologies to create high performance OLED-on-silicon microdisplays and related optical systems. We believe our technology, intellectual property portfolio and position in the marketplace, gives us a leadership position in OLED and OLED-on-silicon microdisplay technology. We are one of only a few companies in the world to market and produce significant quantities of high resolution full-color small molecule OLED-on-silicon microdisplays.

At March 31, 2012, we had a total of 94 full-time and part-time employees, equivalent to the headcount at December 31, 2011.

A detailed discussion of our business may be found in Part I, “Business,” of our 2011 Annual Report on Form 10-K for the year ended December 31, 2011.

CRITICAL ACCOUNTING POLICIES

Our critical accounting policies, as described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, relate to revenue and cost recognition, product warranty, use of estimates, fair value of financial instruments, stock-based compensation and accounting for income taxes.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 1 of the Condensed Consolidated Financial Statements in Item 1 for a description of recent account pronouncements, including the expected dates of adoption and estimated effects on results of operations and financial condition.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2012 COMPARED TO THREE MONTHS ENDED MARCH 31, 2011

Revenues

Revenues for the three months ended March 31, 2012 were approximately \$6.1 million, as compared to approximately \$5.4 million for the three months ended March 31, 2011, an increase of approximately 13%. Revenue was higher for the three month period as there was an increase in volume of units sold offset by a decrease in contract revenue.

Product revenue is comprised of sales of displays, Z800 systems, and other hardware. For the three months ended March 31, 2012, product revenue increased approximately \$1.5 million or 35% as compared to the three months ended March 31, 2011. The increase was driven by an increase in volume of displays sold coupled with a slightly higher average sales price per display than the first quarter of 2011 and an increase in display production which allowed more units to be sold.

Contract revenue is comprised of revenue from research and development or non-recurring engineering ("NRE") contracts. For the three months ended March 31, 2012, contract revenue decreased approximately \$0.8 million or 73% as compared to the first quarter of 2011. We had fewer active contracts in the first quarter of 2012 as compared to the first quarter of 2011. There were 5 active contracts during the first quarter 2012 compared to 8 in the first quarter 2011. The dollar value, the amount of activity and the timing of the milestones generally combined for more revenue generation in first quarter 2011. We expect contract revenue to increase in the coming quarters from the amount generated in Q1 12 due to new contracts and more activity on the existing contracts.

Cost of Goods Sold

Cost of goods sold is comprised of costs of product revenue and contract revenue. Cost of product revenue includes materials, labor and manufacturing overhead related to our products. Cost of contract revenue includes direct and allocated indirect costs associated with performance of contracts. Cost of goods sold for the three months ended March 31, 2012 was approximately \$3.5 million as compared to approximately \$3.2 million for the three months ended March 31, 2011, an increase of approximately \$0.3 million. Cost of goods sold as a percentage of revenues was 56% for the three months ended March 31, 2012 as compared to 59% for the three months ended March 31, 2011. The improvement in the cost of goods sold percentage of revenues was primarily due to the increased production of displays and to the increase in average sales price.

The following table outlines product, contract and total gross profit and related gross margins for the three months ended March 31, 2012 and 2011 (dollars in thousands):

	Three months ended March 31, 2012 2011 (unaudited)	
Product revenue gross profit	\$ 2,528	\$ 1,701
Product revenue gross margin	43%	39%
Contract revenue gross profit	\$ 153	\$ 545
Contract revenue gross margin	50%	48%
Total gross profit	\$ 2,681	\$ 2,246
Total gross margin	44%	41%

The gross profit for the three months ended March 31, 2012 was approximately \$2.7 million as compared to approximately \$2.2 million for the three months ended March 31, 2011, an increase of \$0.5 million. Gross margin was 44% for the three months ended March 31, 2012 up from 41% for the three months ended March 31, 2011.

The product gross profit for the three months ended March 31, 2012 was approximately \$2.5 million as compared to approximately \$1.7 million for the three months ended March 31, 2011, an increase of \$0.8 million. Product gross margin was 43% for the three months ended March 31, 2012 up from 39% for the three months ended March 31, 2011. The gross margin was favorably impacted by the higher revenue volume and higher average selling price per display and offset by an increase in cost of goods sold which primarily related to an increase in labor costs. In the latter half of March 2011, we added additional production shifts as compared to the quarter ended March 31, 2012 where the additional production shifts operated the entire quarter.

Changes in product gross margin are primarily a function of units produced and average price per unit. An increase in units produced lowers the cost per unit, thereby increasing the margin. Even though the margin for the first quarter of 2012 exceeded that of the first quarter of 2011, we believe the 43% product revenue gross margin will increase in the coming quarters due to increased production volume and lower costs of production.

The contract gross profit for the three months ended March 31, 2012 was approximately \$0.2 million as compared to approximately \$0.5 million for the three months ended March 31, 2011, a decrease of \$0.3 million. Contract gross margin was 50% for the three months ended March 31, 2012 up from 48% for the three months ended March 31, 2011. The contract gross margin is dependent upon the mix of costs, internal versus external third party costs, with external third party costs causing a lower gross margin and reducing the contract gross profit.

Operating Expenses

Research and Development. Research and development expenses include salaries, development materials and other costs specifically allocated to the development of new microdisplay products, OLED materials and subsystems. They do not, however, include research and development costs associated with the fulfillment of research and development contracts as these are contract cost of goods sold even though they are often also costs associated with development of new products. Research and development expenses for the three months ended March 31, 2012 were approximately \$1.1 million as compared to \$0.5 million for the three months ended March 31, 2011, an increase of approximately \$0.6 million related to internal research and development of new products.

Selling, General and Administrative. Selling, general and administrative expenses consist principally of salaries and fees for professional services, legal fees incurred in connection with patent filings and related matters, as well as other marketing and administrative expenses. Selling, general and administrative expenses for the three months ended March 31, 2012 were approximately \$2.3 million as compared to approximately \$2.1 million for the three months ended March 31, 2011, a slight increase of \$0.2 million related to personnel costs.

Other Income (Expense), net. Other income (expense), net consists primarily of interest income earned on investments, interest expense related to the secured debt, and income from the licensing of intangible assets.

For the three months ended March 31, 2012, interest expense was approximately \$3 thousand as compared to \$29 thousand for the three months ended March 31, 2011. These amounts are fees to keep our line of credit open. We have no debt upon which we are incurring interest expense. For the three months ended March 31, 2012, interest expense associated with debt was \$11 thousand offset by the capitalization of interest of \$8 thousand. For the three months ended March 31, 2011, the interest expense associated with debt was \$22 thousand and the accrued interest on liquidated damages was \$7 thousand.

Other income for the three months ended March 31, 2012 was approximately \$7 thousand as compared to \$16 thousand for the three months ended March 31, 2011. The other income for the three months ended March 31, 2012 was interest income of approximately \$6 thousand and \$1 thousand from equipment salvage. The other income for the three months ended March 31, 2011 was interest income of approximately \$4 thousand and \$12 thousand from equipment salvage.

Liquidity and Capital Resources

As of March 31, 2012, we had approximately \$14.1 million of cash, cash equivalents, and investments in certificates of deposit ("CDs") as compared to \$14.3 million at December 31, 2011. Of the \$14.1 million in cash, approximately \$8.2 million was invested in CDs.

Cash flow provided by operating activities during the three months ended March 31, 2012 was approximately \$0.3 million, approximately \$0.8 million was from net non-cash expenses offset by the net loss of \$0.5 million. Cash flow provided by operating activities during the three months ended March 31, 2011 was approximately \$0.8 million, approximately \$0.5 million was from the change in operating assets and liabilities and net non-cash expenses of \$3.6

million offset by the net loss of \$3.3 million.

Cash used in investing activities during the three months ended March 31, 2012 was approximately \$2.1 million of which \$1.5 million purchased CDs and approximately \$0.6 million for equipment purchases primarily for upgrading our production line. Cash used in investing activities during the three months ended March 31, 2011 was approximately \$0.9 million of which \$0.6 million purchased CDs and approximately \$0.3 million for equipment purchases primarily for upgrading our production line.

Cash provided by financing activities during the three months ended March 31, 2012 was approximately was \$29 thousand, representing proceeds from the exercise of stock options. Cash provided by financing activities during the three months ended March 31, 2011 was approximately was \$104 thousand, representing proceeds from the exercise of stock options and warrants.

Credit Facility

At March 31, 2012, we had a credit facility with Access Business Finance, LLC (“Access”) that provides for up to a maximum amount of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The interest on the credit facility is equal to the Prime Rate plus 5% but may not be less than 8.25% with a minimum monthly interest payment of \$1 thousand. The credit facility will automatically renew on September 1, 2012 for a one year term unless written notice is provided. We did not draw on our credit facility during the quarter ended March 31, 2012, there is no outstanding balance, and there have been no draws on the line of credit since its inception in September 2010.

The credit facility contains the customary representations and warranties as well as affirmative and negative covenants. We were in compliance with all debt covenants as of March 31, 2012.

We expect our business to experience revenue growth which may result in higher accounts receivable levels and may require increased production and/or higher inventory levels. We anticipate that our cash needs to fund these requirements as well as other operating or investing cash requirements over the next twelve months will be less than our current cash on hand, investments and the cash we anticipate generating from operations. We anticipate that we will not require additional funds over the next twelve months other than perhaps for discretionary capital spending. If unanticipated events arise during the next twelve months, we believe we can raise sufficient funds. However, if we are unable to obtain sufficient funds, we may have to reduce the size of our organization and/or be forced to reduce and/or curtail our production and operations, all of which could have a material adverse impact on our business prospects.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Market rate risk

We are exposed to market risk related to changes in interest rates.

Interest rate risk

We hold our cash in cash and cash equivalents and certificates of deposits. We do not hold derivative financial instruments or equity securities. At March 31, 2012, we have not withdrawn any funds under our revolving line of credit and therefore do not have any related interest rate risk. A change in interest rates would not have had a material effect on our consolidated financial position, results of operations, or cash flows in the three months ended March 31, 2012.

Foreign currency exchange rate risk

We do not have any material foreign currency exchange rate risk.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934 (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report on Form 10-Q. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Limitations on the Effectiveness of Internal Controls.

Our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the objectives of our disclosure control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Our Chief Executive Officer and Chief Financial Officer have concluded, based on their evaluation as of the end of the period covered by this report, that our disclosure controls and procedures were sufficiently effective to provide reasonable assurance that the objectives of our disclosure control system were met.

Changes in Internal Controls.

There were no changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. Legal Proceedings

None.

ITEM 1A. Risk Factors

In addition to other information set forth in this Report, you should carefully consider the risk factors previously disclosed in “Item 1A to Part 1” of our Annual Report on Form 10-K for the year ended December 31, 2011. There were no material changes from the risk factors during the three months ended March 31, 2012.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Mine Safety Disclosures

None.

ITEM 5. Other Information

None.

ITEM 6. Exhibits
