Net income	<b>919</b>	1,910	1,457	(52)	(37)

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Group return on equity	<b>9.8%</b>	20.6%	16.6%
Basic earnings per share (in CHF)	<b>0.82</b>	1.64	1.26
BIS tier 1 ratio	<b>10.9%</b>	12.1%	

Zurich, August 3, 2005 **☐ Credit Suisse Group today reported net income of CHF 919 million for the second quarter of 2005, compared to CHF 1,910 million in the previous quarter and CHF 1,457 million in the second quarter of 2004. The result for the second quarter of 2005 includes a charge for litigation provisions in Institutional Securities in the amount of CHF 624 million after tax.**

Table of Contents

**Credit Suisse Group's return on equity for the second quarter was 9.8%, with a return on equity of 9.1% for the banking business and 11.3% for Winterthur. Basic earnings per share were CHF 0.82.**

**The Group's net income for the first half of 2005 amounted to CHF 2,829 million, compared to CHF 3,318 million for the corresponding period of 2004.**

Oswald J. Grübel, CEO of Credit Suisse Group, said, "Following a strong start to 2005, the second quarter was impacted by the anticipated slowdown in market activity and our banking businesses experienced low levels of client activity in April and May. Benefiting from significant improvements in June, the Group generated a respectable second-quarter result, driven by good net revenues and effective cost management."

He added, "Our half-year results demonstrate that we are making good progress in advancing our business but still have some way to go before we deliver the full potential of Credit Suisse Group. We therefore remain committed to further improving on this performance as part of our efforts to build a powerful integrated banking organization. With that, I am convinced we will create compelling new opportunities for revenue growth and improved efficiency."

**Banking Segments****Credit Suisse Group Banking Segment Results**

in CHF million		2Q2005	1Q2005	2Q2004	Change in % vs 1Q2005	Change in % vs 2Q2004
<b>Private Banking</b>	Net revenues	<b>1,810</b>	1,912	1,869	(5)	(3)
	Total op. expenses	<b>1,084</b>	1,060	1,083	2	0

	Net income	<b>245</b>	135	301	81	(19)

Private Banking reported net income of CHF 581 million in the second quarter of 2005, reflecting stable lending, deposit and commission income. Compared to the strong first quarter of 2005, net income declined 15%, due primarily to a reduction in overall trading revenues as a result of lower income from trading execution. The 13% decrease in net income versus the second quarter of last year was mainly attributable to small losses during the quarter in the fair value of interest rate derivatives used for risk management purposes which did not qualify for hedge accounting, compared to large gains in the second quarter of 2004. The gross margin was 125.6 basis points for the second quarter and 131.5 basis points for the first half of 2005, achieving the segment's mid-term target of 130 basis points. The cost/income ratio was 59.9% for the second quarter, up 4.5 percentage points versus the prior quarter and up 2.0 percentage points versus the second quarter of 2004. This reflects seasonally higher expenses compared to the first quarter of 2005, strategic investments in key growth markets and lower net revenues.

Table of Contents

Corporate & Retail Banking generated net income of CHF 277 million for the second quarter of 2005, up slightly versus the previous quarter and up 8% compared to the second quarter of 2004. Strong revenue generation and a net release of provisions for credit losses were the main drivers of this result. The cost/income ratio of 63.9% in the second quarter of 2005 was up 2.4 percentage points from the prior quarter, which was characterized by seasonally lower expenses, and up 5.7 percentage points from the second quarter of 2004, which benefited from positive changes in the fair value of interest rate derivatives used for risk management purposes which did not qualify for hedge accounting. The segment achieved a strong return on average allocated capital of 21.4% in the second quarter.

Institutional Securities recorded a CHF 960 million charge before tax, CHF 624 million after tax, in the second quarter of 2005 to increase the reserve for private litigation involving Enron, certain IPO allocation practices, research analyst independence and other related litigation. The charge was in addition to the reserve for these private litigation matters of CHF 702 million (USD 450 million) before tax originally established in 2002 and brings the total reserve for these private litigation matters to CHF 1.4 billion (USD 1.1 billion) after deductions for settlements that have since taken place. We believe that with this measure, the litigation reserves of Credit Suisse Group adequately reflect our current assessment of the probable and reasonably estimable litigation exposure.

For the second quarter of 2005, Institutional Securities reported a net loss of CHF 408 million, including the above-mentioned charge for litigation provisions. Excluding this charge, Institutional Securities would have reported net income of CHF 216 million in the second quarter, an increase of 67% compared to the same period of last year, reflecting higher revenues and lower compensation and benefits. Compared to the first quarter of 2005, net income decreased from CHF 540 million, reflecting higher other expenses due to the litigation charge as well as a decline in net revenues resulting from the considerable slowdown in market activity in April and May. Trading revenues, particularly in fixed income, compared favorably to the second quarter of 2004 but were down from the first quarter of this year. Investment banking net revenues rose significantly versus the first quarter of 2005, with improved performances in advisory fees versus both prior periods and in debt and equity underwriting versus the first quarter of 2005. Total operating expenses increased compared to the previous quarter and the same period of 2004 due to the litigation charge. Compensation and benefits decreased slightly versus both prior periods.

Table of Contents

Wealth & Asset Management reported net income of CHF 245 million for the second quarter of 2005, up 81% from the previous quarter and down 19% from the second quarter of 2004, which included particularly high levels of investment-related gains in Alternative Capital. Second-quarter 2005 net revenues benefited from investment gains from private equity realizations. Total operating expenses rose 4% compared to the previous quarter and were slightly lower compared to the same period of last year.

**Insurance Segments****Credit Suisse Group Insurance Segment Results**

in CHF million		<b>2Q2005</b>	1Q2005	2Q2004	Change in % vs 1Q2005	Change in % vs 2Q2004
<b>Life &amp; Pensions</b>	Net revenues	<b>3,714</b>	6,610	3,466	(44)	7
	Total op. expenses	<b>428</b>	427	481	0	(11)
	Net income	<b>116</b>	126	67	(8)	73
<b>Non-Life</b>	Net revenues	<b>2,979</b>	3,049	2,977	(2)	0
	Total op. expenses	<b>713</b>	698	783	2	(9)
	Net income	<b>137</b>	125	82	10	67

Life & Pensions' net income rose substantially to CHF 116 million in the second quarter of 2005, an increase of 73% compared to the same period of 2004. Year-to-date, net income totaled CHF 242 million, up CHF 36 million, or 17%, from the first half of 2004. The main drivers behind this result were the focus on productivity and selected areas of growth and, to a lesser extent, the slightly higher net investment income on investments backing traditional life policies. Total business volume grew by 2% compared to the second quarter of 2004 and was up 5% year-to-date. This encompasses deposits from investment-type products as well as gross premiums written from traditional insurance policies. The net investment return backing traditional life policies amounted to 4.7%, compared to 4.6% in the corresponding quarter of the previous year. Insurance underwriting and acquisition expenses decreased 5% and administration expenses were down 8% compared to the second quarter of 2004, reflecting further benefits from the ongoing implementation of cost control measures. The expense ratio consequently improved by 1.0 percentage points to 10.9%.

Table of Contents

Non-Life reported second-quarter 2005 net income of CHF 137 million, up 67% compared to the second quarter of 2004. For the first half of 2005, net income amounted to CHF 262 million, representing an increase of CHF 77 million, or 42%, compared to the same period of 2004. This progress was achieved despite a challenging underwriting environment, the adverse impacts of foreign exchange rates and lower net investment income. Net premiums earned decreased slightly to CHF 2,643 million versus the same period of last year. Net investment return in the second quarter was 4.2%, compared to 4.5% in the second quarter of 2004. Net current investment return increased slightly to 3.7% from 3.6%, and net realized gains decreased by 0.4 percentage points to 0.5% versus the second quarter of 2004. The combined ratio decreased by a further 2.6 percentage points to 95.1% in the second quarter of 2005 compared to the same period of 2004, and it was down by 1.8 percentage points to 97.3% for the first half of 2005. The claims ratio improved by 0.9 percentage points to 70.4% from the second quarter of 2004 due to a low level of large-scale losses and improvements in claims management. The expense ratio decreased by 1.7 percentage points to 24.7%. Administration expenses decreased 15% to CHF 273 million and insurance underwriting and acquisition expenses remained relatively stable, decreasing 1% to CHF 379 million in line with net premiums earned.

**Net New Assets****Net New Assets and Assets under Management (AuM)**

<sup>1)</sup> Excluding assets managed on behalf of other entities within Credit Suisse Group n/ a: not applicable

Private Banking generated CHF 12.8 billion of net new assets in the second quarter of 2005. The segment reported a net new asset growth rate of 7.3% for the first half of the year, with strong asset inflows from strategic key markets. Wealth & Asset Management recorded CHF 4.2 billion of net new assets, driven primarily by new fund commitments in Alternative Capital. Overall, Credit Suisse Group reported CHF 16.2 billion of net new assets in the second quarter. The Group's total assets under management stood at CHF 1,341.2 billion as of June 30, 2005, up 5.5% from March 31, 2005.

Table of Contents

**Outlook**

We expect the recovery in client activity in the banking business, which started in June, to continue. We believe that equity markets will improve in the second half of the year after a short-term correction of the recent uptrend. Interest rates will most likely move in a narrow range. Credit Suisse Group is well positioned to benefit from this economic environment.

**Credit Suisse Group**

Credit Suisse Group is a leading global financial services company headquartered in Zurich. It provides private clients and small and medium-sized companies with private banking and financial advisory services, and pension and insurance solutions from Winterthur. In the area of investment banking, it serves global institutional, corporate, government and individual clients in its role as a financial intermediary. Credit Suisse Group's registered shares (CSGN) are listed in Switzerland and in the form of American Depositary Shares (CSR) in New York. The Group employs around 60,000 staff worldwide. As of June 30, 2005, it reported assets under management of CHF 1,341.2 billion.

**Cautionary Statement Regarding Forward-Looking Information**

This press release contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to our plans, objectives or goals; our future economic performance or prospects; the potential effect on our future performance of certain contingencies; and assumptions underlying any such statements. Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include (i) market and interest rate fluctuations; (ii) the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations in particular; (iii) the ability of counterparties to meet their obligations to us; (iv) the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations; (v) political and social developments, including war, civil unrest or terrorist activity; (vi) the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations; (vii) the ability to maintain sufficient liquidity and access capital markets; (viii) operational factors such as systems failure, human error, or the failure to properly implement procedures; (ix) actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations; (x) the effects of changes in laws, regulations or accounting policies or practices; (xi) competition in geographic and business areas in which we conduct our operations; (xii) the ability to retain and recruit qualified personnel; (xiii) the ability to maintain our reputation and promote our brands; (xiv) the ability to increase market share and control expenses; (xv) technological changes; (xvi) the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users; (xvii) acquisitions, including the ability to integrate successfully acquired businesses; (xviii) the adverse resolution of litigation and other contingencies; and (xix) our success at managing the risks involved in the foregoing. We caution you that the foregoing list of important factors is not exclusive; when evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the risks identified in our most recently filed Form 20-F and reports on Form 6-K furnished to the US Securities and Exchange Commission.

Letter to Shareholders 2005 Q2

Dear shareholders

During the second quarter of 2005, we made good progress in improving the operating performance of Credit Suisse Group and took important steps towards the implementation of our strategy to build an integrated global bank.

Our One Bank strategy

Our industry is increasingly influenced by globalization and technological change. As a result, our clients' requirements are growing more complex each day and the way we operate as a bank is changing fundamentally. We need to respond to these developments and, above all, to our clients' changing needs. In order to remain at the forefront of our industry, we must strive to continuously improve our products and services and we must place our clients at the center of all that we do. This can only be achieved if we make the best possible use of the skills and expertise of our people as well as our global presence. Over the coming months, we will therefore continue to build an integrated global bank focusing on investment banking, private banking and asset management.

During the second quarter, we took important steps towards the realization of this goal. In May 2005, we completed the merger of our two legal entities in Switzerland: Credit Suisse and Credit Suisse First Boston. The creation of a single legal entity was the prerequisite for the integration of our banking businesses. In late June, the Board of Directors appointed the members of the new Executive Board for the bank. We were able to put together an excellent team with experienced executives from across our banking businesses. The new management team will lead the bank as of January 1, 2006, when the new organization will become operational.

In June, we also announced that we will move to one Credit Suisse brand. We believe that by uniting our businesses under one brand, we will create a clearer and more consistent presence in the market. We will thus be more visible to

our stakeholders and we will be able to communicate more effectively with one voice in all our markets around the world.

We are pleased with the progress we have made over the past few months. Our strategy has been well received by shareholders, clients and employees and its implementation is well on track.

The Board of Directors and the management team are convinced that combining our banking businesses will provide us with the necessary foundation for the future growth of our bank. From our experience in the financial services industry, we believe that the steps we are taking to build an integrated global bank will create synergies for revenue growth, improve efficiency and ultimately increase shareholder value.

#### Result for the second quarter of 2005

While we were preparing Credit Suisse Group for future growth, we were also mindful of our daily commitment to providing our clients with advice, services and products, and we remained focused on improving our operating performance.

For the second quarter of 2005, we reported net income of CHF 919 million, including a charge for litigation provisions in Institutional Securities in the amount of CHF 624 million after tax. For the first half of the year, our net income was CHF 2,829 million. Credit Suisse Group's return on equity for the second quarter was 9.8% and basic earnings per share were CHF 0.82.

Our operating environment in the second quarter was characterized by an anticipated slowdown in market activity. As a result, client activity in our banking business was significantly lower in April and May than in previous months. Although we saw a market rebound in June and were well positioned to benefit from the exceptionally strong levels of client activity during that month, this did not entirely compensate for the weak net revenues in April and May. Equally, our continued and effective cost management was only partially able to offset the negative impact of lower net revenues on our net income in the second quarter.

**Private Banking** provides high-net-worth individuals in Switzerland and in numerous other markets around the world with wealth management products and services.

Private Banking delivered net income of CHF 581 million in the second quarter. This result was lower than the strong levels achieved in both the first quarter of 2005 and the same quarter of last year.

Although we continued to invest in key growth markets in Asia, the Middle East and Europe, total operating expenses remained virtually unchanged compared with the second quarter of the previous year.

Private Banking recorded strong asset inflows from strategic key markets. They contributed to net new assets – a key measure of our operating performance – of CHF 12.8 billion in the second quarter, compared with CHF 7.0 billion in the first quarter. This represents an annualized year-to-date growth rate of 7.3%, exceeding our mid-term target of 5% growth. Combined with a positive market performance, our strong asset inflows resulted in assets under management of over CHF 600 billion.

During the second quarter, Private Banking continued to expand its presence in key growth markets. We opened a representative office in Guangzhou, providing access to southern China. We also opened a representative office in St. Petersburg, serving clients in the rapidly developing northern Russian region.

**Corporate & Retail Banking** offers banking products and services to corporate and retail clients in Switzerland.

## Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

The segment reported net income of CHF 277 million for the second quarter. Strong revenue generation and the release of provisions due to the ongoing favorable credit environment were the main drivers behind this result.

Total operating expenses were virtually unchanged from the same period of last year but increased compared with the seasonally low levels experienced in the first quarter of this year.

The strategic objective of Corporate & Retail Banking is to gain market share in the high-end retail business, particularly with investment products. With this in mind, Credit Suisse launched a new investment product – Credit Suisse Triamant – in the second quarter. This product offers actively managed asset allocation, broad diversification and transparent reporting and combines the advantages of professional asset management with those of an investment fund.

**Institutional Securities** provides securities and investment banking services to institutional, corporate and government clients worldwide.

Institutional Securities reported a net loss of CHF 408 million for the second quarter, including the above-mentioned charge for litigation provisions in the amount of CHF 624 million after tax. In addition to the impact of this charge, the result was negatively affected by the slowdown in market and client activity in April and May referred to previously.

Investment banking net revenues increased significantly versus the first quarter of 2005. Advisory fees, which include fees from mergers and acquisitions, increased compared to both the second quarter of 2004 and first quarter of 2005. Notable M&A transactions in Europe and the Americas that were announced during the quarter include the acquisition of Allied Domecq by Fortune Brands and Pernod Ricard; the BASF AG and Shell International Ltd. sale of their joint venture Basell NV; and the acquisition of Neiman Marcus Group Inc by Texas Pacific Group and Warburg Pincus LLC.

Debt and equity underwriting increased compared to the first quarter of 2005. In equity underwriting, Institutional Securities ranked third in global IPO market share and first in Americas IPO market share for the second quarter of 2005. Key transactions for the quarter reflected the geographic and industrial breadth of the equity franchise and included IPOs for Deerfield Triarc Capital Corp. (a US real estate-related specialty finance company); Pyaterochka Holding (a Russian grocery retailer); Shanghai Electric Group Company Ltd. (the largest non-Japan Asia IPO in 2005 to date); and Lojas Renner (a Brazilian department store) for JC Penney.

Trading revenues, particularly in fixed income, compared favorably to the second quarter of 2004. In comparison with the first quarter of 2005, however, trading revenues declined.

Total operating expenses at Institutional Securities increased compared to the previous quarter and the same period of 2004 due to the charge for litigation provisions.

**Wealth & Asset Management** offers international asset management services – including a broad range of investment funds – to institutional and private investors, as well as providing financial advisory services to wealthy individuals and corporate clients.

Wealth & Asset Management recorded net income of CHF 245 million in the second quarter. This is a good result and represents a strong increase compared to the first quarter of this year. However, while operating expenses were slightly lower than in the second quarter of last year, net income was below the exceptional level recorded in this period, when the Alternative Capital division reported particularly high gains from private equity investments.

Net revenues benefited from a high level of investment gains from private equity in the second quarter of 2005. Furthermore, Alternative Capital recorded a solid increase in placement fees compared to the second quarter of last

year. This positive effect was offset by lower fee income at Credit Suisse Asset Management, our institutional business, and at Private Client Services, our North American business serving private clients.

Net new asset inflows amounted to CHF 2.8 billion for the quarter. Assets under management stood at CHF 529.3 billion as of June 30, 2005.

In the second quarter, Wealth & Asset Management launched two initiatives aimed at advancing its international growth. In May 2005, we announced the creation of a strategic partnership, China Renaissance Capital Investment Inc. This partnership will focus on private equity investment opportunities in China. In addition, in July 2005, Credit Suisse Asset Management acquired a 25% interest in a fund management joint venture in China with Industrial and Commercial Bank of China and China Ocean Shipping Group Company Ltd.

**Winterthur**, Credit Suisse Group's insurance unit, comprises two business lines. The **Life & Pensions** business line is a leading provider of life insurance and pension solutions for private and corporate clients. The **Non-Life** business line provides insurance products for private clients and small and medium-sized corporate clients.

In the second quarter Winterthur further improved its result. Net income for Life & Pensions was CHF 116 million. Non-Life reported net income of CHF 137 million for the period. Overall, our insurance business is now benefiting from the efficiency measures we have implemented over the last two years. These measures have led to improvements in insurance underwriting and acquisition expenses and lower administration expenses at Life & Pensions and to an improved combined ratio at Non-Life.

#### Strong capitalization basis for share buyback

Credit Suisse Group remains among the best-capitalized financial services providers worldwide. This is underscored by the fact that as of June 30, 2005, our BIS tier 1 ratio was 10.9%. In view of our strong capitalization, the Board of Directors proposed the approval of a share buyback program in the amount of up to CHF 6 billion to the Annual General Meeting on April 29, 2005. Following shareholder approval, we launched our share buyback program on May 9, 2005. As of August 3, 2005, we had repurchased 14.9 million shares with an aggregate value of CHF 742 million via a second trading line on virt-x.

We believe that our overall performance in the second quarter and first half of 2005 reflects the fundamental strength of our core businesses. Our results also show that we need to further drive our profitable growth and improve on our financial performance. Our goal is to build a global integrated bank to enable us to realize our full potential and to create the foundation for the future growth of Credit Suisse Group.

On behalf of the Board of Directors and the management team, we would like to take this opportunity to thank our shareholders for the trust they have placed in us. We also wish to thank all our employees for their relentless hard work and commitment.

Yours sincerely

Walter B. Kielholz Oswald J. Grübel  
Chairman of the Board of Directors Chief Executive Officer

#### Cover photograph

The renowned Swiss photographic artist Beat Streuli (born 1957) captured images of Credit Suisse Group employees at various international locations during January and February 2005. The Group's financial publications for 2005 are illustrated with the work that resulted from this project.

#### Message from the Chief Executive Officer

Oswald J. Grübel  
Chief Executive Officer  
Credit Suisse Group

Dear shareholders, clients and colleagues

For the second quarter of 2005, Credit Suisse Group reported net income of CHF 919 million. This includes a charge for provisions for certain litigation in Institutional Securities in the amount of CHF 624 million after tax. For the first half of 2005, net income was CHF 2,829 million.

Private Banking delivered net income of CHF 581 million in the second quarter, which was lower than the strong levels achieved in both the first quarter of 2005 and the second quarter of last year. Private Banking's second quarter 2005 result reflects stable income from lending, deposits and commissions. Total operating expenses remained virtually unchanged compared to the previous year despite continued investments in key growth markets in Asia, the Middle East and Europe. Strong asset inflows from strategic key markets contributed to net new assets of CHF 12.8 billion in the second quarter, compared to CHF 7.0 billion in the first quarter.

Corporate & Retail Banking reported net income of CHF 277 million as it benefited from strong revenue generation and from the net release of provisions for credit losses due to the ongoing favorable credit environment. Total operating expenses were virtually unchanged from the same period of last year, but increased compared to the

seasonally low levels experienced in the first quarter of this year.

Institutional Securities reported a net loss of CHF 408 million for the second quarter. This result reflects the above-mentioned charge for provisions for certain litigation in the amount of CHF 624 million after tax. In addition to the impact of this charge, net income was negatively affected by the anticipated slowdown in market and client activity in April and May. Trading revenues, particularly in fixed income, compared favorably to the second quarter of 2004 but were down from the first quarter of 2005, reflecting the weaker markets. Investment banking net revenues rose significantly versus the first quarter of 2005, with improved performances in advisory fees versus both prior periods and in debt and equity underwriting versus the first quarter of 2005.

Wealth & Asset Management delivered good results, with net income of CHF 245 million. This represents a strong increase compared to the first quarter of this year, although net income was below the exceptional level recorded in the second quarter of 2004. Net revenues benefited from a high level of investment gains from private equity realizations. Net new asset inflows amounted to CHF 2.8 billion.

Winterthur delivered an improved performance in the second quarter of 2005. Net income for Life & Pensions was CHF 116 million, with progress in insurance underwriting and acquisition expenses as well as lower administration expenses. Non-Life reported net income of CHF 137 million for the second quarter, reflecting an improved combined ratio.

On May 9, 2005, following approval by the Annual General Meeting, Credit Suisse Group launched its share buyback program in the amount of up to CHF 6 billion. As at August 3, shares with an aggregate value of CHF 742 million had been repurchased via a second trading line on Virt-x.

In the second quarter of 2005, we took significant steps towards building an integrated bank offering investment banking, private banking and asset management services on a global basis. In May, we completed the merger of the two bank legal entities in Switzerland, and in late June, the members of our new bank Executive Board were appointed. In addition, we announced that our integrated bank will operate under the new Credit Suisse brand from the beginning of next year.

My management team and I are convinced that the measures we are introducing to enhance cooperation between our banking businesses will capture synergies for revenue growth, improve efficiency and ultimately benefit our clients, shareholders and employees.

#### Outlook

We expect the recovery in client activity in the banking business, which started in June, to continue. We believe that equity markets will improve in the second half of the year after a short-term correction of the recent uptrend. Interest rates will most likely move in a narrow range. Credit Suisse Group is well positioned to benefit from this economic environment.

Yours sincerely

Oswald J. Grübel  
August 2005

Credit Suisse Group

**Credit Suisse Group recorded net income of CHF 919 million in the second quarter of 2005 versus CHF 1,457 million in the second quarter of 2004, a decrease of CHF 538 million, or 37%. In the first half of 2005, net income amounted to CHF 2,829 million compared to CHF 3,318 million in the first half of 2004, a decrease of CHF 489 million, or 15%. Net income in the second quarter was impacted by a charge of CHF 624 million after tax (CHF 960 million before tax) in Institutional Securities to increase the reserve for certain private litigation. Second quarter results included increased net income in Corporate & Retail Banking and the insurance segments, offset in part by lower results in Institutional Securities, Private Banking and Wealth & Asset Management, compared to the second quarter of 2004.**

#### Factors affecting results of operations

Across all segments, the second quarter business environment was generally challenging, with client activity in April and May substantially below the levels seen in the first quarter, but with marked improvements as the quarter came to a close.

The broad US equity markets showed minor increases during the second quarter, major European markets, including Switzerland, saw greater advances than the US, and Asian markets continued their mixed performance. Most markets globally peaked at the end of the second quarter and closed slightly below their quarterly highs. Investors found market conditions challenging due to concerns about inflation, the pace of short-term interest rate hikes by the US Federal Reserve Board, uncertainty regarding central bank target rates in Europe and significant volatility in oil prices.

The European Central Bank and Bank of England continued to hold their benchmark rates steady at 2% and 4.75%, respectively. The US Federal Reserve raised interest rates by 50 basis points for the second quarter in a row, while the price of 10-year US treasury notes increased, lowering long-term bond yields. This flattening of the yield curve provided a challenging environment in both the banking and insurance segments. In the US, negative developments in the auto, airline and insurance sectors led to risk aversion and the widening of credit spreads in the first part of the quarter. Credit spreads then narrowed beginning in mid-May, although not fully returning to previous levels, resulting in a more positive environment by the end of the quarter. Prompted by an interest rate differential between the US and Europe, the US dollar surged, closing more than 7% higher at the end of the period against both the Swiss Franc and the Euro than at the beginning of the second quarter.

The global credit environment remained positive with low default rates and an increased number of upgrades and a reduced number of downgrades by rating agencies, although the gap between upgrades and downgrades showed some signs of narrowing. This continued to have a favorable impact on the Group's provision for credit losses.

Industry-wide announced mergers and acquisitions activity increased compared to the second quarter of 2004 and the prior quarter. Industry-wide volumes for investment grade debt increased, volumes for high-yield debt declined and volumes for equity issuances were flat compared to the second quarter of 2004.

#### Summary of segment results

**Private Banking** reported net income of CHF 581 million in the second quarter of 2005, a decrease of CHF 84 million, or 13%, compared to the second quarter of 2004. Lending, deposit and commission income remained stable, however this was offset by a decrease in the fair value of interest rate derivatives used for risk management purposes that do not qualify for hedge accounting, with a small loss being recorded in the second quarter of 2005 versus a large gain in the same period of 2004. During the second quarter of 2005, Private Banking continued to expand its presence in key growth markets, with the opening of representative offices in Guangzhou, China and St. Petersburg, Russia.

**Corporate & Retail Banking** reported net income of CHF 277 million in the second quarter of 2005, an increase of CHF 21 million, or 8%, compared to the second quarter of 2004. Strong revenue contribution and a net release of credit provisions contributed to this result. To support its strategic aim of gaining market share in high-end retail business, particularly in investment products, a new innovative investment product for retail clients was launched in the second quarter.

**Institutional Securities** had a net loss of CHF 408 million in the second quarter of 2005, compared to net income of CHF 129 million in the second quarter of 2004, driven by a charge of CHF 624 million after tax (CHF 960 million before tax) to increase the reserve for certain private litigation, partially offset by higher revenues and lower compensation and benefits.

**Wealth & Asset Management** reported net income of CHF 245 million in the second quarter of 2005, a decrease of CHF 56 million, or 19%, compared to the strong second quarter of 2004, which included an exceptionally high level of private equity investment-related gains in the Alternative Capital business.

Both Institutional Securities and Wealth & Asset Management maintained a disciplined approach to compensation expenses, with the compensation to revenue ratio for the combined segments (excluding minority interest revenues) at 51.9% in the second quarter of 2005 compared to 53.2% in the second quarter of 2004.

**Life & Pensions** reported net income of CHF 116 million in the second quarter of 2005, an increase of CHF 49 million, or 73%, compared to the second quarter of 2004. The main drivers were a focus on productivity and selected areas of growth and, to a lesser extent, slightly higher net investment income on investments backing traditional life policies.

**Non-Life** reported net income of CHF 137 million in the second quarter of 2005, an increase of CHF 55 million, or 67%, compared to the second quarter of 2004. Non-Life's net income rose primarily due to improved underwriting results and reduced charges for discontinued operations and restructuring.

#### Credit Suisse Group consolidated results

##### Net revenues

The Group reported net revenues of CHF 14,101 million, an increase of CHF 368 million, or 3%, compared to the second quarter of 2004.

Net interest income remained largely unchanged at CHF 3,302 million. Private Banking reported a decrease of CHF 135 million with stable lending and deposit income, offset by lower dividends received on the own equity trading portfolio in the second quarter of 2005 compared to the second quarter of 2004. In 2004 most dividends were received in the second quarter, whereas during 2005 receipt of dividends was spread evenly over the first two quarters. The

decrease in Private Banking was partially offset by increases in both insurance segments due to an increased asset base and higher dividend income from equity securities.

Commissions and fees remained flat at CHF 3,483 million with all segments largely unchanged compared to the second quarter of 2004.

Trading revenues increased CHF 203 million, or 29%, to CHF 915 million, driven mainly by an increase in fixed income trading revenues in Institutional Securities as well as market appreciation of investment securities backing unit-linked policies in Life & Pensions. This was partially offset by lower results in Corporate & Retail Banking which were due to large gains in the second quarter of 2004 from positive changes in the fair value of interest rate derivatives used for risk management purposes that did not qualify for hedge accounting, compared to a small loss in the second quarter of 2005.

Net realized gains/(losses) from investment securities increased by CHF 243 million, or 123%, to CHF 441 million, due mainly to an increase in Life & Pensions as a result of an increase in the net investment return on investments backing traditional life policies.

Insurance net premiums earned decreased CHF 318 million, or 7%, to CHF 4,373 million, compared to the second quarter of 2004, primarily driven by lower premiums for vested benefits within the Swiss group life business, which was partially offset by growth in Germany and Japan.

Other revenues were CHF 1,587 million compared to CHF 1,354 million in the second quarter of 2004. Wealth & Asset Management reported an increase of CHF 143 million resulting mainly from minority interests arising on consolidated investments, as discussed under Minority interests below. Additionally, Life & Pensions recorded an increase of CHF 87 million, related largely to higher net realized gains on other invested assets, which was partially offset by a decrease in Institutional Securities due to decreased gains on private equity-related investments.

#### Total benefits, claims and credit losses

The Group reported a net release in provisions for credit losses of CHF 29 million in the second quarter of 2005, compared to a net expense of CHF 133 million in the second quarter of 2004, largely reflecting an ongoing favorable credit environment.

Compared to the second quarter of 2004, policyholder benefits, claims and dividends increased by CHF 254 million, or 5%, to CHF 5,111 million. Life & Pensions reported a decrease of CHF 313 million in policyholder claims and benefits mainly reflecting lower costs for disability coverage. This was partially offset by an increase in dividends to policyholders of CHF 172 million, reflecting improved performance, which in most major markets is legally required to be passed on to policyholders. Investment income credited to policyholder account balances, reported by Life & Pensions, increased by CHF 420 million, or 174%, to CHF 661 million, due mainly to stronger market appreciation of investments backing unit-linked policies in the general account and, to a lesser extent, traditional life policies.

#### Total operating expenses

The Group reported total operating expenses of CHF 7,178 million in the second quarter of 2005, an increase of CHF 924 million, or 15%, compared to the second quarter of 2004, reflecting a significant increase in litigation provisions in the amount of CHF 960 million.

Insurance underwriting, acquisition and administration expenses were CHF 1,038 million, a decrease of CHF 73 million, or 7%, compared to the second quarter of 2004 reflecting improvements in most market units within both

insurance segments.

Banking compensation and benefits remained essentially flat at CHF 3,098 million. A modest increase was recorded in Private Banking in connection with its strategic investments in international markets, which was partially offset by generally lower performance-related compensation within most segments.

Other expenses amounted to CHF 3,041 million, an increase of CHF 1,045 million, or 52%, primarily reflecting a significant increase in litigation provisions, as discussed below under Loss contingencies, as well as higher commission expenses and professional fees in Institutional Securities.

#### Loss contingencies

Based upon the applicable accounting standards and the most recent information available, the Group recorded a charge of CHF 960 million (USD 750 million) before tax, CHF 624 million after tax, in the second quarter of 2005 in Institutional Securities to increase the current reserve for private litigation involving Enron, certain IPO allocation practices, research analyst independence and other related litigation. The charge was in addition to the reserve of CHF 702 million (USD 450 million) before tax originally established in 2002 and brings the total reserve for these private litigation matters to CHF 1.4 billion (USD 1.1 billion), after deductions for settlements that have since taken place. On the basis of facts known, Credit Suisse Group believes that the currently recorded provision is adequate to cover the probable and reasonably estimable contingencies related to these matters. However, estimates are, by their nature, based on subjective judgments, and additional provisions, or releases of such provisions, may be required in the future based on a variety of factors, including, among other things, developments in or settlements of such litigation.

#### Income tax expense

The Group recorded income tax expense of CHF 213 million compared to CHF 441 million in the second quarter of 2004, a decrease of CHF 228 million, or 52%. Institutional Securities recorded an income tax benefit of CHF 239 million compared to an expense of CHF 14 million due mainly to the impact of the significant charge relating to private litigation in the second quarter of 2005. This was partially offset by an increase of CHF 92 million in Non-Life which was driven by higher pre-tax profits in most markets as well as taxes on dividends from consolidated participations.

The Group tax expense is not impacted by investments that are required to be consolidated under the relevant accounting rules as income from these investments is non-taxable. The amount of non-taxable income relating to these investments varies from one period to the next and in the second quarter of 2005 amounted to CHF 714 million. Due mainly to this effect, the Group's effective tax rate in the second quarter of 2005 was 12% compared to the Swiss statutory rate of 22%.

#### Minority interests

Credit Suisse Group's net revenues and operating expenses include the consolidation of certain entities and private equity funds primarily under Financial Accounting Standards Board Interpretation No. 46 Revised (FIN 46R). Consolidation of these entities does not impact net income as the amounts recorded in net revenues and expenses are offset by equivalent amounts recorded in minority interests.

Minority interests of CHF 708 million were reported in the second quarter 2005, an increase of CHF 160 million, or 29%, compared to the second quarter of 2004, due to significant investment-related gains in the current quarter. This also resulted in an increase of CHF 407 million, or 135%, compared to the previous quarter.

### Equity capital

Credit Suisse Group's consolidated BIS tier 1 ratio was 10.9% as of June 30, 2005, down from 12.1% as of March 31, 2005. Following approval by the Annual General Meeting, the Group launched a share buyback program and during the second quarter own shares in the amount of CHF 523 million was repurchased. While tier 1 capital remained stable, risk weighted assets increased by approximately 10%, due largely to generally increased activity and was evenly impacted by balance sheet and off-balance sheet positions. In addition, approximately one quarter of the increase was related to fluctuations in the US dollar. The Group's shareholders' equity as of June 30, 2005 decreased slightly to CHF 38.2 billion from CHF 38.5 billion as of March 31, 2005.

Compared to March 31, 2005 Winterthur continued to improve its capital position, reporting shareholders' equity of CHF 9.4 billion, an increase of CHF 0.9 billion.

### Net new assets

The Group reported net new assets of CHF 16.2 billion in the second quarter of 2005, an increase of CHF 0.8 billion compared to the first quarter of 2005.

Private Banking reported strong net new asset inflow of CHF 12.8 billion for the second quarter of 2005, with key markets in Asia and Europe continuing to report strong growth rates. Wealth & Asset Management recorded net new assets of CHF 4.2 billion, driven mainly by new fund commitments in Alternative Capital.

As of June 30, 2005, the Group's total assets under management amounted to CHF 1,341.2 billion, an increase of 5.5% compared to March 31, 2005, benefiting from strong asset inflow, higher market performance and the strengthening of the US dollar.

### Credit Suisse Group structure

Credit Suisse Group comprises three divisions with six reporting segments: Credit Suisse, including the segments Private Banking and Corporate & Retail Banking; Credit Suisse First Boston, including the segments Institutional Securities and Wealth & Asset Management; and Winterthur, including the segments Life & Pensions and Non-Life.

The organizational chart presented below reflects the legal entity, division and segment structure that are operational since May 16, 2005. The Bank is comprised of former Credit Suisse First Boston and former Credit Suisse, which were merged on May 13, 2005. The merger of these Swiss legal entities constitutes the first step towards the creation of an integrated organization.

It is planned that the merged bank will combine the Credit Suisse and Credit Suisse First Boston divisions in 2006 in order to better address client needs in a rapidly changing market environment. The objective of the new integrated bank is to operate more efficiently and provide enhanced advisory services and products with a sharper focus on client needs. The new integrated bank will be structured along three lines of business. Private Banking will include international and Swiss wealth management as well as services for private clients and large, small and medium-sized corporate clients including pension funds in Switzerland. Corporate & Investment Banking will include the products and services provided to corporate and investment banking clients. Asset Management will include asset management products and services.

The following table sets forth an overview of segment results:

2Q2005, in CHF m	Private Banking	Corporate & Retail Banking	Institutional Securities	Wealth & Asset Management	Life & Pensions	Non-Life	Corporate Center	Credit Suisse Group

As of January 1, 2004, Credit Suisse Group bases its capital adequacy calculations on US GAAP, which is in accordance with the Swiss Federal Banking Commission (SFBC) newsletter 32 (dated December 18, 2003). The SFBC has advised Credit Suisse Group that it may continue to include as Tier 1 capital CHF 2.1 bn (March 31, 2005 and December 31, 2004: CHF 2.1 bn) of equity from special purpose entities, which are deconsolidated under FIN 46R.

The following table sets forth details of assets under management and client assets:

## Risk Management

**Credit Suisse Group's overall position risk, measured on the basis of Economic Risk Capital (ERC), increased 11% in the second quarter of 2005 compared with the previous quarter. The increase was mainly due to higher risk levels at Credit Suisse First Boston as well as the strengthening of the US dollar. The more narrowly defined average Value-at-Risk (VaR) in US dollar terms for the Group's trading books decreased by 6% during the second quarter of 2005 due to a reduction in the VaR for mortgage exposures following a reduction in the market volatility observed over the last two years. The loan portfolios across the Group continued to benefit from a favorable credit environment, resulting in a net release of credit provisions of CHF 29 million for the second quarter of 2005.**

## Economic Risk Capital trends

Credit Suisse Group assesses risk and economic capital adequacy using its Economic Risk Capital (ERC) model. ERC is designed to measure all quantifiable risks associated with the Group's activities on a consistent and comprehensive basis. Credit Suisse Group assigns ERC for position risk, operational risk and business risk. Position risk measures the potential annual economic loss associated with market, credit and insurance exposures that is exceeded with a given, small probability (1% for risk management purposes; 0.03% for capital management purposes). It is not a measure of the potential impact on reported earnings, since non-trading activities generally are not marked to market through earnings.

Over the course of the second quarter of 2005, Credit Suisse Group's 1-year, 99% position risk ERC increased by 11%, mainly due to higher risk levels at Credit Suisse First Boston as well as the strengthening of the US dollar.

## Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

At the end of the second quarter of 2005, 52% of the Group's position risk ERC was with Credit Suisse First Boston, 33% with Winterthur, 13% with Credit Suisse and 2% with the Corporate Center.

### Trading risks

Credit Suisse Group assumes trading risks through the trading activities of the Institutional Securities segment and – to a lesser extent – the trading activities of the Private Banking and Corporate & Retail Banking segments. The other segments do not engage in trading activities. Trading risks are measured using VaR as one of a range of risk measurement tools. VaR is the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon and for a specified confidence level. In order to show the aggregate market risk in the Group's trading books, the table below shows the trading-related market risk on a consolidated basis, as measured by a 10-day VaR scaled to a 1-day holding period and based on a 99% confidence level. This means that there is a one in 100 chance of incurring a daily mark-to-market trading loss that is at least as large as the reported VaR.

Credit Suisse Group's average 1-day, 99% VaR in the second quarter of 2005 was CHF 65 million, compared to CHF 67 million during the first quarter of 2005. In US dollar terms, Credit Suisse Group's average 1-day, 99% VaR was USD 53 million during the second quarter 2005, compared to USD 57 million during the first quarter of 2005. The decrease in average VaR was due to a reduction in the VaR for mortgage exposures as a consequence of the reduction in the market volatility observed over the last two years (first quarter 2003 data replaced by more benign first quarter 2005 data in the rolling two-year underlying data set used to compute VaR).

The segments with trading portfolios use backtesting to assess the accuracy of the VaR model. Daily backtesting profit and loss is compared to VaR with a one-day holding period. Backtesting profit and loss is a subset of actual trading revenue and includes only the profit and loss effects due to movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions. It is appropriate to compare this measure with VaR for backtesting purposes, since VaR assesses only the potential change in position value due to overnight movements in financial market variables. On average, an accurate one-day, 99% VaR model should have no more than four backtesting exceptions per year. A backtesting exception occurs when the daily loss exceeds the daily VaR estimate.

Credit Suisse Group had no backtesting exceptions during the second quarter of 2005 (and no backtesting exceptions in the last twelve months). The histogram entitled "Frequency of trading revenue" compares the distribution of daily backtesting profit and loss during the second quarter of 2005 with the distribution of actual trading revenues, which includes fees, commissions, provisions and the profit and loss effects associated with any trading subsequent to the previous night's positions.

### Loan exposure

Credit Suisse Group's total loan exposure grew 3% as of June 30, 2005 compared to March 31, 2005, with the increase concentrated at Credit Suisse.

Compared to March 31, 2005 non-performing loans increased slightly while total impaired loans at Credit Suisse Group declined 3% as of June 30, 2005. Non-performing loans increased 11% and total impaired loans at Credit Suisse First Boston increased by 10% in the second quarter of 2005, with much of the increase relating to the impact of foreign exchange translation into Swiss francs. Credit Suisse reported a small reduction in total non-performing loans and a 6% decline in total impaired loans, while Winterthur reported small reductions in both categories.

During the second quarter of 2005, the Group recorded a net release of provisions for credit losses amounting to CHF 29 million, compared to a net release of CHF 36 million recorded in the first quarter. Presented in the accompanying

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

tables are the additions, releases and recoveries included in determining the allowance for loan losses.

Coverage of total impaired loans by valuation allowances at Credit Suisse Group and Credit Suisse was virtually unchanged at the end of the second quarter of 2005 compared to the end of the first quarter, while coverage deteriorated at Credit Suisse First Boston.

The following table sets forth the Group's risk profile, using ERC as the common risk denominator:

in CHF m	Change in % from			Change Analysis: Brief Summary 30.06.05 vs 31.03.05
	30.06.05	31.03.05	30.06.04	
Interest Rate ERC, Credit Spread ERC & Foreign Exchange Rate ERC	<b>4,663</b>	3	7	Higher foreign exchange rate and credit spread risks at Winterthur
Equity Investment ERC	<b>3,855</b>	11	27	Higher equity trading risk at Credit Suisse First Boston plus higher equity exposures at Winterthur
Swiss & Retail Lending ERC	<b>1,667</b>	(1)	(5)	No material change
International Lending ERC & Counterparty ERC	<b>2,707</b>	23	1	Higher lending risks at Credit Suisse First Boston due to syndications plus higher US dollar exchange rate
Emerging Markets ERC	<b>2,191</b>	16	9	Higher exposures at Credit Suisse First Boston plus higher US dollar exchange rate
Real Estate ERC & Structured Asset ERC <sup>1)</sup>	<b>4,537</b>	13	32	Higher residential and commercial real estate exposures at Credit Suisse First Boston plus higher US dollar exchange rate
Insurance Underwriting ERC	<b>827</b>	(2)	24	No change
<b>Simple sum across risk categories</b>	<b>20,447</b>	10	14	
Diversification benefit	<b>(6,392)</b>	7	22	
<b>Total Position Risk ERC</b>	<b>14,055</b>	11	10	

1-year, 99% position risk ERC, excluding foreign exchange translation risk. For an assessment of the total risk profile, operational risk ERC and business risk ERC have to be considered. For a more detailed description of the Group's ERC model, please refer to Credit Suisse Group's Annual Report 2004, which is available on the website: [www.credit-suisse.com/annualreport2004](http://www.credit-suisse.com/annualreport2004). Prior period balances have been restated for methodology changes in order to maintain consistency over time.

<sup>1)</sup> This category comprises the real estate investments of Winterthur, Credit Suisse First Boston's commercial real estate exposures, Credit Suisse First Boston's residential real estate exposures, Credit Suisse First Boston's asset-backed securities exposure as well as the real estate acquired at auction and real estate for own use in Switzerland.

The following table sets forth the trading-related market risk exposure for Credit Suisse Group on a consolidated basis, as measured by scaled one-day, 99% VaR:

in CHF m	2Q2005			1Q2005 <sup>1)</sup>			Average 31.03.05

Provision for credit losses disclosed in the Credit Suisse Group consolidated statements of income also includes provisions for lending-related exposure of CHF -4 million, CHF 4 million and CHF -5 million for 2Q2005, 1Q2005 and 2Q2004, respectively.

Private Banking

**Private Banking provides high-net-worth individuals in Switzerland and in numerous other markets around the world with wealth management products and services.**

During the second quarter, Private Banking continued to expand its presence in international growth markets. A representative office was opened in Guangzhou, providing access to southern China. In St. Petersburg, Russia, Private Banking opened a representative office, serving clients in the rapidly developing northern Russian region.

Private Banking reported net income of CHF 581 million in the second quarter of 2005, driven by good net revenues, as a result of stable lending, deposit and commission income. Net income decreased by CHF 84 million, or 13%, compared to the second quarter of 2004 and by CHF 104 million, or 15%, compared to the previous quarter. Strong net new asset inflows of CHF 12.8 billion for the second quarter of 2005 combined with positive market performance resulted in an increase in assets under management which exceeded CHF 600 billion at the end of the second quarter.

Net revenues of CHF 1,810 million in the second quarter of 2005 were CHF 59 million, or 3%, below the second quarter of 2004. This decrease in net revenues is caused by large gains in the second quarter 2004 of CHF 57 million from changes in the fair value of interest rate derivatives used for risk management purposes that do not qualify for hedge accounting, compared to a small loss in the second quarter of 2005. The significant decline in net interest income, down CHF 135 million, or 21%, resulted from lower dividends received on Private Banking's trading portfolio in the second quarter of 2005 compared to the second quarter of 2004 with an offsetting effect in trading revenues. In 2004 most dividends were received in the second quarter, whereas during 2005 the dividend income was spread evenly over the first two quarters. Compared to the first quarter of 2005, lower income from trading execution resulted in an anticipated decrease of overall trading revenues by 50% to CHF 85 million. In the second quarter, Private Banking generated stable net interest income and strong commission income, which was virtually unchanged compared to both the second quarter of 2004 and the first quarter of 2005. The ongoing high level of commission income reflects Private Banking's leading position in product innovation.

Total operating expenses amounted to CHF 1,084 million in the second quarter of 2005, virtually unchanged compared to the same period of last year but increased by CHF 24 million, or 2%, compared to the seasonally low previous quarter. Slightly higher compensation and benefits compared to the second quarter of 2004 were related to Private Banking's ongoing strategic investment in international growth markets in Asia, the Middle East and Eastern Europe. This effect was partially offset by lower performance-related compensation accruals.

The cost/income ratio stood at 59.9% in the second quarter of 2005, 2.0 percentage points above the corresponding period in 2004 and 4.5 percentage points above the previous quarter. This reflects seasonally higher expenses compared to the first quarter of 2005, the strategic investments in new international growth markets and lower net revenues.

The gross margin for the first half of 2005 amounted to 131.5 basis points, achieving the mid-term target of 130 basis points. The reduction in Private Banking's gross margin in the second quarter of 2005 to 125.6 basis points reflected the lower net revenues as well as the increase of the asset base towards the quarter-end, for which revenues were not fully recognized in the second quarter of this year.

Private Banking reported strong net new asset inflow of CHF 12.8 billion for the second quarter of 2005. The growth rate in net new assets for the first half of 2005 was 7.3%, which is well above our mid-term target of 5%. Strategic key markets in Asia and Europe continued to report strong growth rates.

Assets under management stood at CHF 602.3 billion at the end of the second quarter of 2005, up CHF 38.0 billion, or 6.7%, compared to the end of the previous quarter and up CHF 63.2 billion, or 11.7%, compared to year-end 2004. Strong asset inflows, higher equity markets as well as the strengthening of the US dollar contributed to this high level of assets under management.

## Corporate & Retail Banking

### **Corporate & Retail Banking offers banking products and services to corporate and retail clients in Switzerland.**

Corporate & Retail Banking again reported a record result in the second quarter of 2005 and a corresponding high return on average allocated capital.

In line with the strategic aim of gaining market share in high-end retail business, particularly in investment products, Credit Suisse launched a new investment product in the second quarter: Credit Suisse Triamant. This new product combines the advantages of professional asset management with those of an investment fund by providing actively managed asset allocation, broad diversification, and transparent reporting and underscores Corporate & Retail Banking's strategy to provide more innovative investment products to retail clients.

Corporate & Retail Banking recorded net income of CHF 277 million in the second quarter of 2005. This result represents an increase of CHF 21 million, or 8%, compared to the corresponding period of last year and was slightly above the previous quarter. Strong revenue generation and net releases of provisions for credit losses were the main drivers of this favorable result.

Net revenues in the second quarter of 2005 amounted to CHF 858 million, down CHF 92 million, or 10%, compared to the corresponding period of 2004. This decrease was related to large gains in the second quarter of 2004 of CHF 136 million from changes in the fair value of interest rate derivatives used for risk management purposes that did not qualify for hedge accounting in the second quarter of 2004, compared to a small loss in the second quarter of 2005. Provisions for credit losses in the second quarter of 2005 resulted in a net release of CHF 44 million, compared to net provisions of CHF 60 million in the corresponding period of last year and a net release of CHF 19 million in the previous quarter. The net release in the second quarter of 2005 reflects releases of provisions and a low level of new provisions as a result of the ongoing favorable credit environment. Total impaired loans declined from CHF 3.2 billion at the end of March 2005 to CHF 3.0 billion at the end of June 2005.

Total operating expenses amounted to CHF 548 million in the second quarter of 2005 and were virtually unchanged compared to the same period of the previous year. The increase of total operating expenses by CHF 19 million, or 4%, compared to the previous quarter was primarily related to expected higher other expenses mainly based on higher IT project costs and marketing expenses compared to the seasonally low first quarter of 2005. These higher other expenses were partially offset by lower compensation and benefits.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Corporate & Retail Banking achieved a strong return on average allocated capital of 21.8% during the first half year of 2005, an improvement of 4.1 percentage points compared to the same period in 2004. The return on average allocated capital stood well above Corporate & Retail Banking's mid-term target of 15%.

The segment's cost/income ratio stood at 63.9% for the second quarter of 2005, 5.7 percentage points above the same period of last year, due to the above-mentioned positive changes in the fair value of interest rate derivatives in the second quarter of 2004. Compared to the previous quarter, the cost/income ratio increased by 2.4 percentage points, reflecting seasonally low expenses in the first quarter.

The following table presents the results of the Corporate & Retail Banking segment:

#### Institutional Securities

**Institutional Securities provides financial advisory, lending and capital raising services, as well as sales and trading for global users and suppliers.**

Institutional Securities had a second quarter 2005 net loss of CHF 408 million compared with net income of CHF 129 million in the second quarter of 2004. The primary reason for this result was a CHF 960 million before tax (CHF 624 million after tax) charge to increase the reserve for private litigation involving Enron, certain IPO allocation practices, research analyst independence and other related litigation. Excluding this litigation charge, Institutional Securities would have reported net income of CHF 216 million in the second quarter of 2005, an increase of CHF 87 million, or 67%, compared with the second quarter of 2004.

Net revenues for the quarter were CHF 3,335 million, an increase of 6% when compared with the second quarter of 2004. Excluding minority interest revenues, net revenues increased by 5%.

Compared to the first quarter of 2005, net income decreased from CHF 540 million to a net loss of CHF 408 million, reflecting higher other expenses due to the charge for certain private litigation and a decrease in net revenues.

Provision for credit losses amounted to a net release of CHF 1 million reflecting the favorable credit environment for lenders during the second quarter of 2005. This compares to CHF 80 million of provisions in the second quarter of 2004 and a net release of CHF 19 million in the first quarter of 2005. Compared to March 31, 2005, total impaired loans increased CHF 70 million to CHF 757 million, and valuation allowances as a percentage of total impaired loans decreased 5.3 percentage points to 73.7% as of June 30, 2005.

Total operating expenses of CHF 3,891 million were CHF 1,033 million, or 36%, higher compared to the second quarter of 2004. Compensation and benefits decreased slightly, reflecting lower severance and performance-related compensation costs. Other expenses increased by CHF 1,052 million, or 112%, primarily reflecting a CHF 960 million before tax (CHF 624 million after tax) charge to increase the reserve for private litigation involving Enron,

certain IPO allocation practices, research analyst independence and other related litigation. The charge was in addition to the reserve of CHF 702 million before tax for these private litigation matters, which was originally established in 2002. This brings the total reserve for these private litigation matters to CHF 1.4 billion after deductions for settlements that have since taken place. Other expenses also reflected higher commission expenses due to increased business activity and higher professional fees, compared to the second quarter of 2004. Excluding the charge for these private litigation matters, total operating expenses would have been 3% higher compared to the second quarter of 2004. Compared to the first quarter of 2005, total operating expenses increased by 29%, due to the litigation charge and higher other expenses offset in part by lower compensation and benefits.

Total investment banking revenues include debt underwriting, equity underwriting and advisory and other fees. Second quarter 2005 investment banking revenues of CHF 948 million increased by 5% compared to the second quarter of 2004 due to increases in advisory fees. Underwriting results remained flat when compared with the second quarter of 2004. When compared with the prior quarter, investment banking revenues increased 51%, with significantly higher revenues from advisory fees and debt and equity underwriting.

Debt underwriting revenues of CHF 465 million remained flat compared to the second quarter of 2004, primarily reflecting lower results in leverage finance from a strong second quarter of 2004 and higher results in asset-backed securities and residential structured products. Debt underwriting revenues increased 52% from the first quarter of 2005, driven by higher results in leverage finance and investment grade capital markets. Strong leverage finance results were achieved primarily due to higher revenues in the syndicated loan business, reflecting an industry-wide increase in global syndicated loan volume in the second quarter of 2005 and an improvement in Institutional Securities' global syndicated loan market share. Leverage finance revenues from high-yield underwriting were down significantly in the quarter reflecting lower levels of issuance, commensurate with an industry-wide decline in global high-yield new issuance. However, for the second quarter of 2005, Institutional Securities improved its ranking to second in global high-yield new issuance, up from number three at the end of the first quarter. Investment grade capital markets revenue increased from a year ago and the prior quarter, reflecting a greater focus on more profitable transactions. As a result, Institutional Securities ranked eleventh in global investment grade new issuance for the second quarter of 2005, up from number thirteen in the first quarter but down from third for the full year 2004.

Equity underwriting revenues of CHF 185 million in the second quarter of 2005 remained flat compared to the second quarter of 2004, consistent with industry-wide issuance volumes, and increased 34% compared to the first quarter of 2005 despite a 15% decline in the volume of industry-wide new equity issuance versus the first quarter of 2005. Institutional Securities ranked third in global IPO market share and first in Americas IPO market share for the second quarter of 2005. Key transactions for the quarter reflected the geographic and industry breadth of the equity franchise and included IPOs for Deerfield Triarc Capital Corp. (US real estate-related specialty finance company), Pyaterochka Holding (Russian grocery retailer), Shanghai Electric Group Company Ltd. (the largest non-Japan Asia IPO in 2005 to date), and Lojas Renner (Brazilian department store) for JC Penney.

Advisory and other fees of CHF 298 million increased 24% compared to the second quarter of 2004 and 63% compared to the first quarter of 2005. The increase in revenues in the second quarter of 2005 was primarily a result of increased industry-wide activity, as well as Institutional Securities' increase in global announced mergers and acquisitions market share in the prior quarter. The increase in advisory revenues was a result of our focus on leading companies in several consolidating industries. Through the second quarter of 2005, Institutional Securities improved its ranking to number seven in global announced mergers and acquisitions (up from number eleven for the full year 2004) and number five in global completed mergers and acquisitions (up from number nine for the full year 2004). Notable transactions in Europe and the Americas that were announced in the quarter include the Fortune Brands and Pernod Ricard acquisition of Allied Domecq, the BASF AG and Shell International Ltd. sale of their joint venture Basell NV, and the Texas Pacific Group and Warburg Pincus LLC acquisition of Neiman Marcus Group Inc.

Total trading revenues include results from fixed income and equity sales and trading. Total trading revenues for the second quarter of 2005 of CHF 2,028 million increased by CHF 173 million, or 9%, compared to the second quarter of

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

2004. Total trading revenues declined by 29% compared to the particularly strong first quarter of 2005, reflecting a more challenging environment for both fixed income and equity trading. Institutional Securities' second quarter 2005 average daily Value-at-Risk (VaR) was CHF 62 million, down from CHF 68 million in the second quarter of 2004 and down modestly from CHF 63 million in the first quarter of 2005, reflecting declines in interest rate and foreign exchange risk levels, offset in part by increases in equity and commodity risk levels.

Fixed income trading generated revenues of CHF 1,194 million in the second quarter of 2005, an increase of 18% from the second quarter of 2004. Credit markets were challenging during the quarter with increased volatility as credit spreads first widened then retracted during the quarter. Interest rate markets were also challenging as the yield curve flattened during the quarter. The increase in revenues primarily reflected improved results in risk taking and positioning, leverage finance, commercial structured products and emerging markets, partially offset by weaker results in interest rate products, asset-backed securities and residential structured products. The overall residential mortgage business performed well in the quarter but was down when compared to the strong second quarter of 2004. The second quarter of 2004 also included losses on certain derivatives used for risk management purposes that did not qualify for hedge accounting. Compared to a very strong first quarter of 2005, fixed income trading decreased by 38% due to a much more challenging market environment resulting in weaker performances across most fixed income products, except for Latin America trading and risk taking and positioning. The first quarter of 2005 included a CHF 125 million positive adjustment to the valuation of over-the-counter (OTC) derivatives in connection with enhancements to bring Institutional Securities' estimates of fair value closer to how the dealer market prices such derivatives.

Equity trading revenues remained stable at CHF 834 million in the second quarter of 2005 compared to the second quarter of 2004. Higher revenues in prime services and the global cash businesses were offset by weaker revenues in the convertibles and derivatives businesses. The prime services business had a strong quarter with significant revenue growth over prior periods, due to growth in client balances and higher short-term interest rates. Alternative execution services continued to experience strong growth. Institutional Securities was ranked number one in 2004 in program trading, an integral part of the alternative execution suite of products, by top clients according to *Institutional Investor*, joining our algorithmic trading platform as an award-winner. The convertibles business was impacted by challenging market conditions with weaker valuations, poor liquidity, wider credit spreads and lower volatility. The derivatives business was hindered by a dramatic reduction in implied volatility levels during the quarter resulting in lower revenues. Equity trading revenues decreased by CHF 92 million, or 10%, compared to the first quarter of 2005, primarily due to weaker revenues in risk taking and positioning, convertibles, equity derivatives and the global cash business, partially offset by improvements in the prime services business.

Other (including loan portfolio) revenues of CHF 359 million in the second quarter of 2005 decreased by 5% from the second quarter of 2004 due to lower gains on private equity-related investments not managed as part of Alternative Capital, offset by higher minority interest-related revenues and a valuation adjustment relating to the sale of a financing transaction. The second quarter of 2004 included a significant gain on the sale of the TradeWeb investment.

The following table presents the results of the Institutional Securities segment:

## Wealth & Asset Management

**Wealth & Asset Management offers international asset management services to institutional, mutual fund and private investors, provides advisory services for, and invests in, alternative investment vehicles including private equity funds, and provides financial advisory services to high-net-worth individuals and corporate investors.**

The Wealth & Asset Management segment is comprised of Credit Suisse Asset Management, Alternative Capital, Private Client Services and Other.

Wealth & Asset Management reported net income of CHF 245 million for the second quarter of 2005, a decrease of 19% compared to the strong second quarter of 2004, which included a particularly high level of investment-related

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

gains in Alternative Capital. Net income increased CHF 110 million, or 81%, compared to the first quarter of 2005.

Wealth & Asset Management's second quarter 2005 net revenues were CHF 1,570 million, a 5% increase from the second quarter of 2004. Net revenues (excluding minority interest revenues) were down 9% primarily as a result of lower investment-related gains. Revenues before investment-related gains of CHF 663 million were flat compared to the second quarter of 2004 due primarily to higher placement fees in the private funds business of Alternative Capital offset by lower management fees in Credit Suisse Asset Management. When compared with the first quarter of 2005, revenues before investment-related gains were flat.

Second quarter 2005 investment-related gains decreased 26% to CHF 282 million compared to the second quarter of 2004, which was due to an exceptionally high level of private equity gains in Alternative Capital in the second quarter of 2004. Investment-related gains increased 169% compared to the first quarter of 2005 due to an increase in private equity realized gains. Investment-related gains for the second quarter of 2005 included gains related to the partial sale of Nycomed Holdings, the sale of American Ref-Fuel Holdings Corporation, the merger between Seabulk International, Inc. and Seacor Holdings Inc., and the valuation impact relating to the proposed sale of Mueller Water Products, Inc.

In the second quarter of 2005, minority interest revenues, arising from the consolidation of certain private equity funds primarily under FIN 46R, increased by CHF 163 million compared to the second quarter of 2004 to CHF 625 million, primarily due to significant investment-related gains.

Compared with the second quarter of 2004, total operating expenses were slightly down to CHF 623 million, reflecting lower other expenses driven by a decrease in commission and distribution expenses.

Wealth & Asset Management had an inflow of net new assets of CHF 2.8 billion during the quarter due to inflows of CHF 2.8 billion in Alternative Capital primarily due to new fund commitments and inflows of CHF 0.2 billion in Private Client Services, partially offset by an outflow in Credit Suisse Asset Management of CHF 0.2 billion. Assets under management as of June 30, 2005 of CHF 529.3 billion increased by 5.4% compared to March 31, 2005, due to market performance, foreign currency exchange rate movements and net new asset inflows, partially offset by the spin-out of the Credit Opportunities Fund in Alternative Capital, consistent with Wealth & Asset Management's strategy announced in December 2004.

In the second quarter of 2005, Alternative Capital completed its investment period for DLJ Merchant Banking Partners III Fund and completed its fundraising for CSFB Strategic Partners III with a final closing amount of USD 2.4 billion. In May 2005, Credit Suisse First Boston announced the creation of a strategic partnership, China Renaissance Capital Investment Inc., which will focus on private equity investment opportunities in China. This initiative is consistent with Alternative Capital's strategy of expanding the private equity business geographically. In addition, in July 2005 Credit Suisse Asset Management acquired a 25% interest in a fund management joint venture in China with Industrial and Commercial Bank of China and China Ocean Shipping Group Company Limited.

## Life &amp; Pensions

**Life & Pensions is a leading provider of life insurance and pension solutions to private and corporate clients. It serves its home market Switzerland and a focused portfolio of international markets in Europe and Asia through multiple distribution channels.**

The second quarter 2005 saw a further improvement of the technical result for traditional products and the generation of additional business volume through unit-linked business. Net income rose substantially to CHF 116 million, up 73% compared to the second quarter of 2004. Year-to-date, net income reached CHF 242 million, up CHF 36 million, or 17% from the same period in 2004. The main drivers were the focus on productivity and selected areas of growth, as well as, to a lesser extent, the slightly higher net investment income backing traditional life policies.

Total business volume grew by 2% compared to the second quarter of 2004 and by 5% year-to-date. This encompasses deposits from investment-type products as well as gross premiums written from traditional business. Overall, business growth reflected the disciplined underwriting of traditional products in a challenging low interest rate environment and proactive diversification through unit-linked business.

Gross premiums written in the second quarter of 2005 decreased by 9% to CHF 1.9 billion when compared to the same quarter last year. This resulted from the reduction of the premiums for vested benefits within the stable portfolio of Swiss group life contracts. Year-to-date, gross premiums written grew by 2% compared to last year.

Other revenues including fees, net revenues from deposit business general and separate account, increased to CHF 129 million, up 25% from the second quarter of 2004. In the same period in 2005, the deposit business increased by 17% to CHF 1.7 billion from the same quarter last year and by 11% year-to-date. This was due to a significant increase in unit-linked business primarily in the United Kingdom and Poland.

Total net investment income increased by 31% in the second quarter to CHF 1,747 million. The major part of the additional net investment income originated from unit-linked business and was credited to policyholders. The net investment return backing traditional life policies amounted to 4.7%, compared to 4.6% in the corresponding quarter in the previous year. Net current investment return decreased slightly to 3.8% from the second quarter of 2004 but net realized gains increased by 0.3 percentage points to 0.9%.

Policyholder benefits incurred decreased by 13% from the second quarter of 2004, at a higher rate than the reduction in gross premiums written in the same period. This mainly reflects lower costs for disability coverage.

Dividends to policyholders incurred increased by 67% as a result of the improved performance in the second quarter of 2005, which in most markets is legally required to be passed on to policyholders.

Insurance underwriting and acquisition expenses decreased by 5% and administration expenses decreased by 8% compared to the second quarter of 2004, reflecting further benefits from the ongoing implementation of expense and cost control measures. The expense ratio consequently improved by 1.0 percentage point to 10.9%.

Non-Life

**Non-Life provides insurance products to private clients and small and medium-sized corporate clients. It is the leading provider in the Swiss market and is established in key markets in North America and Europe.**

The second quarter 2005 saw a continued improvement in operational performance. A favorable claims environment, disciplined underwriting, continued strict cost management and reduced charges for discontinued operations contributed to a substantial increase in net income. Compared to the second quarter of 2004, net income increased by 67% to CHF 137 million. For the first half year of 2005, net income amounted to CHF 262 million, representing an increase of CHF 77 million, or 42%. This progress was achieved despite a challenging underwriting environment, the adverse impacts of foreign exchange rates and lower net investment income.

Growing price pressure in some markets confirmed the importance of a selective and controlled underwriting policy. Consequently, net premiums earned in the second quarter decreased slightly to CHF 2,643 million compared to the same period of last year. Lower premiums earned in the United States and Germany were partially offset by premium growth in Switzerland and Spain due to tariff increases.

Net investment return in the second quarter of 2005 was 4.2%, compared to 4.5% in the same period of 2004. Net current investment return increased slightly to 3.7% up from 3.6%, and net realized gains decreased by 0.4 percentage points to 0.5% compared to the second quarter of 2004.

The combined ratio in the second quarter of 2005 decreased by 2.6 percentage points to 95.1% compared to the same quarter of 2004 and by 1.8 percentage points to 97.3% for the first half of 2005. These improvements occurred in almost all market units. The claims ratio improved by 0.9 percentage points to 70.4% from the second quarter of 2004, due to a low level of large-scale losses and improvements in claims management. The expense ratio decreased by 1.7 percentage points to 24.7%. Administration expenses decreased by 15% to CHF 273 million compared to the second quarter of 2004, mainly in Switzerland and Germany, and insurance underwriting and acquisition expenses remained relatively stable, decreasing by 1% to CHF 379 million in line with net premiums earned.

The improved profitability of the Non-Life operations in most markets combined with dividends from consolidated participations led to an increased income tax expense of CHF 125 million, up CHF 92 million from the same quarter in 2004.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

## Investments for Life &amp; Pensions and Non-Life

Winterthur's investment portfolios are managed according to a defined process and set of guidelines in order to meet the diversification, credit quality, yield and liquidity requirements of policy liabilities.

Investments include debt instruments such as government and corporate bonds, loans, and mortgage loans, real estate, equities and alternative assets.

The following table illustrates the investment portfolio of Life & Pensions and Non-Life by investment type:

in CHF m	30.06.05		31.12.04	
	Book value	Fair value	Book value	Fair value
Debt securities - held-to-maturity	<b>10,096</b>	<b>10,643</b>	10,141	10,336
Debt securities - available-for-sale	<b>78,750</b>	<b>78,750</b>	70,937	70,937
Equity securities - available-for-sale	<b>8,438</b>	<b>8,438</b>	5,950	5,950
Debt securities - trading	<b>1,877</b>	<b>1,877</b>	1,771	1,771
Equity securities - trading	<b>12,865</b>	<b>12,865</b>	10,818	10,818

#### NEW ACCOUNTING PRONOUNCEMENTS

In December 2004, the FASB issued SFAS No. 123 (Revised 2004), Share-Based Payment (SFAS 123R). SFAS 123R is effective for annual reporting periods beginning after June 15, 2005. The Group had previously adopted the recognition provisions of SFAS 123, as discussed above. Under SFAS 123R, a company that has previously adopted the recognition provisions of SFAS 123 must adopt the revised standard using the modified prospective method, and may also choose to apply the modified retrospective method to previous reporting periods. The Group has early adopted the new standard as of January 1, 2005, applying the modified prospective method.

The most significant accounting implications of the adoption of SFAS 123R for the Group were as follows: (i) Inclusion of forfeitures in the estimate of compensation expense determined at the grant date rather than as they occur. The Group recorded a cumulative adjustment of approximately CHF 14 million during the first quarter of 2005, to reverse the expense previously recognized on all outstanding unvested awards expected to be forfeited. For new grants after January 1, 2005, forfeitures will be included in the initial estimation of the compensation expense at the grant date; (ii) Recognition of compensation cost for all outstanding unvested awards as of January 1, 2005, that were previously accounted for under APB 25 and for which no expense was previously recognized, based on the original grant-date fair value of each award over the remaining requisite service period of the respective award. The recognition of this expense was not material; and (iii) Adoption of changes to the presentation of the statement of cash flows in accordance with the revised standard.

In December 2003, the AICPA issued Statement of Position (SOP) 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3). SOP 03-3 provides guidance on the accounting for differences between contractual and expected cash flows from the purchaser's initial investment in loans or debt securities acquired in a transfer, if those differences are attributable, at least in part, to credit quality. Among other things, SOP 03-3: (1) prohibits the recognition of the excess of contractual cash flows as an adjustment of yield, loss accrual or valuation allowance at the time of purchase; (2) requires that subsequent increases in expected cash flows be recognized prospectively through an adjustment of yield; and (3) requires that subsequent decreases in expected cash flows be

recognized as an impairment. In addition, SOP 03-3 prohibits the creation or carrying over of a valuation allowance in the initial accounting of all loans and debt securities within its scope that are acquired in a transfer. SOP 03-3 becomes effective for loans or debt securities acquired in fiscal years beginning after December 15, 2004. The adoption of SOP 03-3 did not have a material impact on the Group's financial position, results of operations or cash flows.

In May 2005, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 154, "Accounting Changes and Error Corrections, a replacement of Accounting Principles Board (APB) Opinion No. 20 and FASB Statement No. 3" (SFAS 154). SFAS 154 requires retrospective application, unless impracticable, to prior periods' financial statements for voluntary changes in accounting principles and changes required by an accounting pronouncement in the unusual circumstances in which the pronouncement does not include specific transition provisions. The statement also requires that a change in depreciation, amortization, or depletion method for long-lived, non-financial assets should be accounted for as a change in accounting estimate effected by a change in accounting principle. The guidance for reporting the correction of an error in previously issued financial statements and the change of an accounting estimate will not change from APB No. 20. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. There will be no immediate impact on the Group's financial condition, results of operations or cash flows upon adoption of SFAS 154.

In June 2005, the FASB ratified Emerging Issues Task Force (EITF) 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights" (EITF 04-5). EITF 04-5 provides a framework for evaluating whether a general partner or a group of general partners controls a limited partnership and therefore should consolidate it. EITF 04-5 states that the presumption of general-partner control would be overcome only when the limited partners have substantive "kick-out rights" or "participating rights." These rights would allow the limited partners to dissolve or liquidate the partnership or otherwise remove the general partner "without cause" and to effectively participate in significant decisions made in the ordinary course of the partnership business. EITF 04-5 is effective immediately for all newly formed limited partnerships and for existing limited partnership agreements that are modified. The guidance will be effective for existing unmodified partnership agreements that are not modified no later than the beginning of the first reporting period in fiscal years beginning after December 15, 2005. The Group is currently evaluating the impact of adopting EITF 04-5.

As a result of the ratification of EITF 04-5, EITF Issue No. 96-16, "Investor's Accounting for an Investee When the Investor Has a Majority of the Voting Interest but the Minority Shareholder or Shareholders Have Certain Approval or Veto Rights," (EITF 96-16) was updated and FASB Staff Position (FSP) No. 78-9-1, "Interaction of AICPA Statement of Position 78-9, Accounting for Investments in Real Estate Ventures, and EITF Issue No. 04-5, Investor's Accounting for an Investment in a Limited Partnership When the Investor Is the Sole General Partner and the Limited Partners Have Certain Rights" (FSP 78-9-1) was issued. The guidance is effective for general partners of all new partnerships formed and for existing partnership agreements modified after June 29, 2005. The Group is currently evaluating the impact of FSP 78-9-1 and the impact of the changes to EITF 96-16.

In June 2005, the FASB cleared its guidance on SFAS 133 in Derivatives Implementation Group (DIG) Issues B38, "Embedded Derivatives: Evaluation of Net Settlement with Respect to the Settlement of a Debt Instrument through Exercise of an Embedded Put Option or Call Option" (DIG B38), and DIG Issue B39, "Embedded Derivatives: Application of Paragraph 13(b) to Call Options That Are Exercisable Only by the Debtor" (DIG B39). The implementation guidance in DIG B38 clarifies that the potential settlement of an obligation upon exercise of a put option or call option meets the net settlement criterion of a derivative. Further, the guidance in DIG B39 clarifies that a right to accelerate the settlement of an obligation in and of itself is considered clearly and closely related to the debt host contract if the respective embedded call option can be exercised only by the issuer or borrower. Both implementation guides will be effective for the fiscal quarter beginning after December 15, 2005. The Group is currently evaluating the impact of adopting DIG B38 and DIG B39.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

In June 2005, the FASB ratified EITF Issue 05-2 “The Meaning of ‘Conventional Convertible Debt Instrument’ in EITF Issue 00-19 ‘Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company’s Own Stock’”, which retains the exception in paragraph 4 of EITF Issue No. 00-19 for conventional convertible debt instruments. Those instruments in which the holder has an option to convert the instrument into a fixed number of shares (or a corresponding amount of cash at the issuer’s discretion) and its ability to exercise the option is based on either (a) the passage of time or (b) a contingent event, should be considered “conventional” for purposes of applying that exception. The consensus should be applied on a prospective basis for new or modified instruments starting from the third quarter of 2005. The Group is currently evaluating the impact of adopting EITF 05-2.

### Earnings per share

The following table sets forth details of the calculation of earnings per share:

in CHF m	2Q2005	1Q2005	2Q2004	6 months	
				2005	2004
Income from continuing operations before cumulative effect of accounting changes	<b>920</b>	1,916	1,500	<b>2,836</b>	3,431
Income/(loss) from discontinued operations, net of tax	<b>(1)</b>	(20)	(43)	<b>(21)</b>	(107)
Cumulative effect of accounting changes, net of tax	<b>0</b>	14	0	<b>14</b>	(6)
<b>Net income – as reported</b>	<b>919</b>	1,910	1,457	<b>2,829</b>	3,318
<b>Net income available for common shares for basic EPS <sup>1)</sup></b>	<b>919</b>	1,864	1,426	<b>2,819</b>	3,224
<b>Net income available for common shares for diluted EPS <sup>2)</sup></b>	<b>945</b>	1,948	1,484	<b>2,893</b>	3,369
<b>Weighted-average common shares outstanding for basic EPS (in m)</b>	<b>1,127.6</b>	1,134.9	1,133.4	<b>1,130.8</b>	1,143.9
Effect of dilutive securities					
Convertible securities	<b>40.4</b>	40.4	40.4	<b>40.4</b>	40.4
Share options and warrants	<b>8.9</b>	8.2	8.5	<b>8.5</b>	9.2
Share awards	<b>21.6</b>	14.4	30.6	<b>18.0</b>	27.0
<b>Adjusted weighted-average common shares for diluted EPS</b>	<b>1,198.5</b>	1,197.9	1,212.9	<b>1,197.7</b>	1,220.5
<b>Basic earnings per share, in CHF</b>					
Income from continuing operations before cumulative effect of accounting changes	<b>0.82</b>	1.65	1.30	<b>2.50</b>	2.92
Income/(loss) from discontinued operations, net of tax	<b>0.00</b>	(0.02)	(0.04)	<b>(0.02)</b>	(0.09)
Cumulative effect of accounting changes, net of tax	<b>0.00</b>	0.01	0.00	<b>0.01</b>	(0.01)
<b>Net income available for common shares</b>	<b>0.82</b>	1.64	1.26	<b>2.49</b>	2.82

<b>Diluted earnings per share, in CHF</b>					
Income from continuing operations before cumulative effect of accounting changes	<b>0.79</b>	1.63	1.26	<b>2.42</b>	2.85
Income/(loss) from discontinued operations, net of tax	<b>0.00</b>	(0.01)	(0.04)	<b>(0.02)</b>	(0.09)
Cumulative effect of accounting changes, net of tax	<b>0.00</b>	0.01	0.00	<b>0.01</b>	0.00
<b>Net income available for common shares</b>	<b>0.79</b>	1.63	1.22	<b>2.41</b>	2.76

1) In accordance with EITF 03-6, the basic earnings per share calculation considers the effect of participating securities. Specifically, the allocation of undistributed income related to the mandatory convertible securities is a reduction to the net income available to common shareholders for the purposes of the calculation. Undistributed earnings are not allocated to the mandatorily convertible security holders if the distributions made to shareholders during the period exceed the net income for the period.

2) Under the if-converted method for calculating diluted EPS, the interest on the mandatory convertible securities is included when the effect is dilutive.

## Pension

The following table sets forth details of the net periodic pension cost for the Swiss and international defined benefit pension and other post-retirement defined benefit plans:

in CHF m	2Q2005	1Q2005	2Q2004	6 months	
				2005	2004
Service costs on benefit obligation	<b>102</b>	100	106	<b>202</b>	225
Interest costs on benefit obligation	<b>186</b>	184	180	<b>370</b>	361
Expected return on plan assets	<b>(226)</b>	(224)	(236)	<b>(450)</b>	(471)
Amortization of					
Unrecognized transition obligation/(asset)	<b>(1)</b>	0	(1)	<b>(1)</b>	(2)
Prior service cost	<b>9</b>	10	9	<b>19</b>	18
Unrecognized (gains)/losses	<b>13</b>	13	11	<b>26</b>	21
<b>Net periodic pension costs</b>	<b>83</b>	83	69	<b>166</b>	152
Settlement (gains)/losses	<b>0</b>	0	2	<b>0</b>	2
Curtailment (gains)/losses	<b>0</b>	(1)	1	<b>(1)</b>	6
Termination losses	<b>3</b>	6	2	<b>9</b>	7
<b>Total pension costs</b>	<b>86</b>	88	74	<b>174</b>	167

Credit Suisse Group previously disclosed in its financial statements for the year ended December 31, 2004, that it expected to contribute CHF 618 million to the pension plans in 2005. As of June 30, 2005, CHF 272 million of

contributions have been made. Credit Suisse Group presently anticipates contributing an additional CHF 222 million to fund its pension plan in 2005 for a total of CHF 494 million. The calculation of the expected contributions for 2005 was subsequently revised to reflect the current funding status, resulting in a decrease in anticipated contributions.

## Guarantees and commitments

### Guarantees

The following tables set forth details of contingent liabilities associated with guarantees:

As of June 30, 2005, in CHF m	Total gross amount	Total net amount <sup>1)</sup>	Carrying value	Collateral received
Credit guarantees and similar instruments	10,700	8,840	22	5,077
Performance guarantees and similar instruments	7,296	6,399	163	3,589
Securities lending indemnifications	34,117	34,117	0	34,117
Derivatives	369,309	369,309	4,567	361
Other guarantees <sup>2)</sup>	9,572	9,572	25	6,326
<b>Total guarantees</b>	<b>430,994</b>	<b>428,237</b>	<b>4,777</b>	<b>49,470</b>

As of December 31, 2004, in CHF m	Total gross amount	Total net amount <sup>1)</sup>	Carrying value	Collateral received
Credit guarantees and similar instruments	10,425	8,907	12	3,992
Performance guarantees and similar instruments	6,386	5,694	112	3,552
Securities lending indemnifications	24,808	24,808	0	24,808
Derivatives	247,454	247,454	2,482	186
Other guarantees <sup>2)</sup>	3,112	3,112	25	1,348
<b>Total guarantees</b>	<b>292,185</b>	<b>289,975</b>	<b>2,631</b>	<b>33,886</b>

<sup>1)</sup> Total net amount relates to gross amount less any participations.

<sup>2)</sup> Contingent considerations in business combinations, residual value guarantees and other indemnifications.

Guarantees provided by the Group are broadly classified as follows: Credit guarantees and similar instruments, Performance guarantees and similar instruments, Securities lending indemnifications, Derivatives and Other guarantees. Readers are referred to note 37 "Guarantees and commitments" in the Credit Suisse Group Annual Report 2004 for a further description of Guarantees.

In accordance with the terms of the Sale and Purchase Agreement (SPA) between XL Insurance (Bermuda) Limited (XL or the purchaser) and Winterthur Swiss Insurance (Winterthur) for Winterthur International, Winterthur is required to participate with the purchaser in a review for any adverse development of loss and unearned premium reserves during a three-year post-completion seasoning period, which expired on June 30, 2004. This seasoning process will result in a balancing payment being due to the purchaser.

The provision recorded by Winterthur at June 30, 2005 for this sale-related contingency, net of pre-payments to and risks retained by XL amounted to CHF 704 million (USD 550 million). The provision, which reflects the adverse development of CHF 833 million (USD 651 million) included in Winterthur's submitted Seasoned Net Reserves Amount (SNRA), is based on an extensive analysis of data provided by XL. Winterthur utilized leading third-party claims, actuarial and legal specialists to assist in estimating the reserves required for this liability. On the basis of facts known, Credit Suisse Group believes that the currently recorded provision is adequate to cover the contingencies related to this transaction.

The amount payable to XL for the SNRA is ultimately subject to an assessment by the Independent Actuary designated in the SPA, who will determine which of the estimates submitted by the two parties is closest to the amount which the Independent Actuary believes to be the correct amount, and that estimate will be conclusively deemed to be the relevant SNRA. This process is ongoing and, consequently, the ultimate resolution of this matter could result in a further significant increase in the required provision for the Winterthur International sale-related contingencies. Winterthur and XL submitted in February 2005 their respective determinations of the SNRA to the Independent Actuary, who was officially engaged on April 13, 2005. The difference between the two positions under review by the Independent Actuary is CHF 1,164 million (USD 909 million).

In addition to the SPA, Winterthur has other agreements, including retrocession agreements with XL, which could result in payments to XL. Furthermore, XL submitted in the fourth quarter of 2004, and the second and third quarters of 2005, the details of its claims relating to alleged breach of warranties in connection with the 2001 sale. With the assistance of outside counsel, Winterthur continues to evaluate these claims and on the basis of facts known, believes that the currently recorded provisions are adequate to cover the contingencies related to this litigation and any other agreements with XL.

The Group provides indemnifications to certain counterparties in connection with its normal operating activities. The Group has determined that it is not possible to estimate the maximum amount it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses, and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

#### Other commitments

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

The following table sets forth details of other commitments:

As of June 30, 2005, in CHF m	Total gross amount	Total net amount	Collateral received
Irrevocable commitments under documentary credits	4,860	4,624	1,975
Loan commitments	165,903	165,764	94,998
Forward reverse repurchase agreements	11,251	11,251	11,251
Other	6,011	6,011	560
<b>Total other commitments</b>	<b>188,025</b>	<b>187,650</b>	<b>108,784</b>

As of December 31, 2004, in CHF m	Total gross amount	Total net amount	Collateral received
Irrevocable commitments under documentary credits	4,390	4,076	1,577
Loan commitments	149,607	149,607	83,209
Forward reverse repurchase agreements	15,326	15,326	15,326
Other	2,625	2,625	567
<b>Total other commitments</b>	<b>171,948</b>	<b>171,634</b>	<b>100,679</b>

Other commitments of the Group are broadly classified as follows: Irrevocable commitments under documentary credits, Loan commitments, Forward reverse repurchase agreements and Other. Readers are referred to note 37 “Guarantees and commitments” of the Credit Suisse Group Annual Report 2004 for a further description of Other off-balance sheet commitments.

#### Variable interest entities

FIN 46R “Consolidation of Variable Interest Entities – An Interpretation of ARB No. 51”, requires the Group to consolidate all variable interest entities (VIEs) for which it is the primary beneficiary, defined as the entity that will absorb a majority of expected losses, receive a majority of the expected residual returns, or both. The Group consolidates all VIEs for which it is the primary beneficiary.

As a normal part of its business, the Group engages in transactions with entities that are considered VIEs. These transactions include selling or purchasing assets, acting as a counterparty in derivatives transactions and providing liquidity, credit or other support. Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investment opportunities, and as part of these activities, the Group may retain interests in VIEs. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors or where the Group is the counterparty to a derivative transaction involving VIEs.

The Group’s involvement with VIEs may be broadly grouped into three primary categories: Collateralized debt obligations (CDOs), Commercial paper conduits and Financial intermediation. Readers are referred to note 1 “Summary of significant accounting policies”, note 2 “Recently issued accounting standards” and note 39 “Variable interest

entities” on pages 117, 133 and 197, respectively, of Credit Suisse Group’s Annual Report 2004 for a further description of the Group’s policy on consolidation of VIEs and a description of the nature of the Group’s involvement with these entities.

The following table summarizes the estimated total assets by category related to non-consolidated VIEs:

in CHF m	Carrying value of VIEs' total assets	
	30.06.05	31.12.04
Collateralized debt obligations	<b>19,627</b>	57,517
Commercial paper conduits	<b>5,285</b>	4,456
Financial intermediation	<b>68,958</b>	67,326
<b>Total</b>	<b>93,870</b>	129,299

The following table summarizes the total assets, by category, related to VIEs consolidated as a result of the Group being the primary beneficiary:

in CHF m	VIEs' total assets	
	30.06.05	31.12.04
Collateralized debt obligations	<b>2,399</b>	1,398
Commercial paper conduits	<b>2</b>	3
Financial intermediation	<b>10,922</b>	11,119
<b>Total assets consolidated pursuant to FIN 46R</b>	<b>13,323</b>	12,520

#### Collateralized debt obligations

As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization.

The Group has consolidated all CDO VIEs for which it is the primary beneficiary resulting in the inclusion by the Group of approximately CHF 2.4 billion of assets and liabilities of these VIEs. The beneficial interests issued by these VIEs are payable solely from the cash flows of the related collateral, and the creditors of these VIEs do not have recourse to the Group in the event of default.

The Group also retains certain debt and equity interests in open CDO VIEs that are not consolidated because the Group is not the primary beneficiary. The Group’s exposure in these CDO transactions typically consists of the interests retained in connection with its underwriting or market-making activities. The Group’s maximum loss exposure is equal to the carrying value of these retained interests, which are reported as trading assets and carried at fair value and totaled CHF 1.5 billion as of June 30, 2005.

## Commercial paper conduits

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for several commercial paper conduit vehicles (CP conduits). The Group does not sell assets to the CP conduits and does not have any ownership interest in the CP conduits.

The Group's commitments to CP conduits consist of obligations under liquidity and credit enhancement agreements.

As of June 30, 2005, the Group's maximum loss exposure to non-consolidated CP conduits was CHF 9.5 billion, which consisted of CHF 5.3 billion of funded assets and the CP conduits' commitments to purchase CHF 4.2 billion of additional assets.

The Group believes that the likelihood of incurring a loss equal to this maximum exposure is remote because the assets held by the CP conduits, after giving effect to related asset-specific credit enhancements primarily provided by the clients, must be classified as investment grade when acquired by the CP conduits.

## Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The investors typically retain the risk of loss on such transactions but the Group may provide principal protection on the securities to limit the investors' exposure to downside risk.

As a financial intermediary, the Group may administer or sponsor the VIE, transfer assets to the VIE, provide collateralized financing, act as a derivatives counterparty, advise on the transaction, act as investment advisor or investment manager, act as underwriter or placement agent or provide credit enhancement, liquidity or other support to the VIE. The Group also owns securities issued by the VIEs structured to provide clients with investment opportunities, for market-making purposes and as investments. The Group's maximum loss exposure to VIEs related to financial intermediation activities is estimated to be CHF 12.4 billion as of June 30, 2005, which represents the notional amount of any guarantees and the fair value of all other interests held. Further, the Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including hedging strategies and the risk of loss that is retained by investors.

## Litigation

In accordance with SFAS No. 5, "Accounting for Contingencies", the Group recorded in the second quarter of 2005 a CHF 960 million (USD 750 million) charge before tax CHF 624 million after tax, in Institutional Securities, to increase the reserve for private litigation involving Enron, certain IPO allocation practices, research analyst independence and other related litigation. The charge was in addition to the reserve for these private litigation matters of CHF 702 million (USD 450 million) before tax originally established in 2002 and brings the total reserve for these private litigation matters to CHF 1.4 billion (USD 1.1 billion) after deductions for settlements that have since taken place. It is inherently difficult to predict the outcome of many of these matters. In presenting the condensed consolidated financial statements, management makes estimates regarding the outcome of these matters and records a reserve and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Estimates, by their nature, are based on judgment and currently available information and involve a variety

of factors, including, but not limited to, the type and nature of the litigation, claim or proceeding, the progress of the matter, the advice of legal counsel, the Group's defenses and its experience in similar cases or proceedings as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Further charges or releases of litigation reserves may be necessary in the future as developments in such cases or proceedings warrant. The Group is involved in a number of other judicial, regulatory and arbitration proceedings concerning the matters arising in connection with the conduct of its businesses. These actions have been brought on behalf of various classes of claimants and, unless specific, seek damages of material and/or indeterminate amounts. The Group believes, based on currently available information and advice of counsel, that the results of such proceedings, in the aggregate, are not likely to have a material adverse effect on its financial condition but might be material to operating results for any particular period, depending, in part, upon the operating results for such period.

#### Cautionary statement regarding forward-looking information

This Quarterly Report contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to our plans, objectives or goals; our future economic performance or prospects; the potential effect on our future performance of certain contingencies; and assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include (i) market and interest rate fluctuations; (ii) the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations in particular; (iii) the ability of counterparties to meet their obligations to us; (iv) the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations; (v) political and social developments, including war, civil unrest or terrorist activity; (vi) the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations; (vii) the ability to maintain sufficient liquidity and access capital markets; (viii) operational factors such as systems failure, human error, or the failure to properly implement procedures; (ix) actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations; (x) the effects of changes in laws, regulations or accounting policies or practices; (xi) competition in geographic and business areas in which we conduct our operations; (xii) the ability to retain and recruit qualified personnel; (xiii) the ability to maintain our reputation and promote our brands; (xiv) the ability to increase market share and control expenses; (xv) technological changes; (xvi) the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users; (xvii) acquisitions, including the ability to integrate successfully acquired businesses; (xviii) the adverse resolution of litigation and other contingencies; and (xix) our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive; when evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the risks identified in our most recently filed Form 20-F and reports on Form 6-K furnished to the US Securities and Exchange Commission.

DISCLAIMER

**Cautionary statement regarding forward-looking information**

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2004 filed with the US Securities and Exchange Commission, and in other public filings and press releases.

We do not intend to update these forward-looking statements except as may be required by applicable laws.
