If you attend the General Meeting in person, please present the enclosed voting form to the receptionist at the General Meeting.

Table of Contents

Reference Document Pertaining to Exercise of Voting Rights

1. Total number of voting rights held by all shareholders:

10,035,816 voting rights

2. Items of Business and Matters for Reference:

First Item of Business: Approval of Proposed Appropriation of Retained Earnings for the 11th Fiscal Year

The proposal for appropriation of retained earnings of the Company for this fiscal year is as stated in the Report for the 11th Fiscal Year (page 33) attached hereto.

It is proposed to dispose of a part of the general reserve because the Company recorded a net loss for this fiscal year due to the impairment loss of shares of affiliates with respect to, among others, foreign companies in which the Company invested.

As the Company will see the 10th anniversary of commencement of business in July 2002, it is proposed to declare a memorial dividend of ¥500 in addition to the ordinary dividend of ¥500 to show appreciation for the support of shareholders; therefore, the aggregate amount of the year-end dividend will be ¥1,000 per share.

As a result, the aggregate amount of the annual dividends for this fiscal year will be ¥1,500 per share, including the interim dividend paid in November 2001.

Second Item of Business: Reduction of Additional Paid-in Capital

Pursuant to the provisions of Paragraph 2 of Article 289 of the Commercial Code of Japan, it is proposed to reduce the amount of the additional paid-in capital by ¥1 trillion out of the current amount of ¥1,292,385,011,245 for the purpose of repurchase of shares stated in the third item of business of flexible development of capital policy in the future and of security of source available for dividend payouts.

Third Item of Business: Repurchase of Shares

In connection with the stock-for-stock exchanges between the Company and each of the eight regional DoCoMo subsidiaries to make preparation for possible adoption of the consolidated tax returns system and to improve the overall group value by unifying development of its business and financing strategies, it is proposed to repurchase up to 1,000,000 shares of common stock of the Company and up to an aggregate repurchase price of ¥500,000 million, during the term between the close of this Ordinary General Meeting of Shareholders and the close of the next following Ordinary General Meeting of Shareholders pursuant to the provisions of Article 210 of the Commercial Code of Japan in order to transfer treasury shares, in lieu of issuing new shares, to the respective shareholders of the regional DoCoMo subsidiaries, which shall become wholly-owned subsidiaries of the Company.

This item of business is on the condition that the second item of business, Reduction of Additional Paid-in Capital is approved and passed.

Table of Contents

Fourth Item of Business: Partial Amendment to the Articles of Incorporation

1. Reasons for Amendments

- (1) As the Law Concerning Partial Amendments, Etc. of the Commercial Code, Etc. of Japan (Law No.79 of 2001) became effective on October 1, 2001, amendments such as abolition of par value shares, organization of rights of holders of fractional shares were made. In line with these amendments, it is proposed to delete the provisions related to par value shares and the provisions related to holders of fractional shares and to make amendments to the provisions related to the quorum for election of Directors and Corporate Auditors.
- (2) As the Law Concerning Partial Amendments to the Commercial Code, Etc. of Japan (Law No.128 of 2001) became effective on April 1, 2002, preparation of corporate documents in electronic format has been permitted; the stock acquisition right system was established and necessary arrangements were made to the provisions related to convertible bonds which were in effect before such amendments to the Commercial Code of Japan. In line with these amendments, it is proposed to make arrangements for provisions which enable the Company to prepare the minutes of general meetings of shareholders, the shareholders register and the ledger of fractional shares in electronic formats and to delete the provisions related to dividends for shares issued upon conversion of convertible bonds under the Commercial Code of Japan which were in effect before the amendment.
- (3) As the Law Concerning the Partial Amendments to the Commercial Code and the Law Concerning Special Exceptions to the Commercial Code Related to Audit, Etc. of Joint Stock Corporation (*Kabushiki Kaisha*) (Law No.149 of 2001) became effective on May 1, 2002, the term of office of Corporate Auditors has been extended to four (4) years. In line with this amendment, it is proposed to make arrangement to the provision related to the term of office of Corporate Auditors.

Seventh Item of Business: Award of Retirement Benefits Payment to Retiring Directors and Corporate Auditors

It is proposed that retirement benefits payment to be awarded to 12 persons, namely Mr. Norioki Morinaga, former Senior Executive Vice President and Representative Director, who passed away on October 10, 2001; and Mr. Kouji Ohboshi, Chairman and Representative Director, Mr. Ryuji Murase, Senior Executive Vice President and Representative Director, Mr. Yoshinori Uda, Senior Executive Vice President and Representative Director, Mr. Hideki Nomura, Executive Vice President, Mr. Nobuharu Ono, Executive Vice President, Mr. Itsuki Tomioka, Executive Vice President, Mr. Eisuke Sugiyama, Senior Vice President, Mr. Kenichi Aoki, Senior Vice President and Mr. Yoshihiro Yoshioka, Senior Vice President, all of who will retire at the close of this Ordinary General Meeting of Shareholders due to expiration of the full term of office; and Mr. Ken-ichi Matsumura, Corporate Auditor, and Hiroyuki Moriyama, Corporate Auditor who will resign at the close of this Ordinary General Meeting of Shareholders, in order to compensate for their services during the term of office, within a reasonable range in amount to be determined in accordance with the prescribed standard of the Company.

The determination of, among other things, amounts, payment date and methods is proposed to be entrusted to the Board of Directors with regard to the retiring Directors and to the Board of Corporate Auditors with regard to the retiring Corporate Auditors.

The Company has the prescribed internal standard concerning retirement benefits for Directors and Corporate Auditors, by which the amount of retirement benefits may be clearly calculated, and which is available for inspection to shareholders.

The personal history of each of the retiring Directors and Corporate Auditors is as follows:

<u>Name</u>	<u>History</u>
Kouji Ohboshi	Kouji Ohboshi became the President and Chief Executive Officer in 1992. He has served as the Chairman since 1998 and a Representative Director of our company since 1992.

Dear shareholders:

We are pleased to inform you of our business results for the 11th fiscal term (from April 1, 2001 to March 31, 2002).

During this term, as the mobile communications market entered a transition phase from rapid expansion to stable growth, the Company steadily implemented new services at the forefront of mobile technology, including the launch of FOMA, the world's first commercial third-generation mobile communications system, while reinforcing its core businesses and promoting mobile multimedia services.

As a consequence of these efforts, the total cellular subscriber count of NTT DoCoMo and its regional subsidiaries exceeded 40 million, among which the number of i-mode subscribers reached over 32 million, which lead to gains in both operating revenues and recurring income. However, net income was limited to ¥800 million as special losses of ¥812.8 billion were incurred due to drops in the enterprise values of the Company's overseas investee affiliates.

While we regret any concern caused to our shareholders, we believe that our global expansion efforts have shown concrete progress towards our original goals. Following the launch of i-mode in Germany and the Netherlands through our investee affiliate earlier this year, the introduction of i-mode service in Belgium is planned for this summer. If we continue to facilitate our collaboration with our partners in this manner and smoothly expand i-mode and third-generation systems overseas, we believe our overseas investments will generate sufficient value over the mid-to-long term.

Going forward, we plan to reflect changes in the mobile communications market by shifting our management focus from revenues to profitability. At the same time, we are committed to maximizing our enterprise value by making utmost efforts to expand our business domain and strengthen our financial position while pursuing our three growth strategies of multimedia, ubiquity and globalization. We greatly appreciate your continued support.

May 2002

Table of Contents**BUSINESS REPORT** For the year from April 1, 2001 to March 31, 2002

The term "FY" hereinafter stands for "fiscal year"

I. Business Overview

1. Developments and Results of Operations

(1) General Business Conditions

Severe business conditions persisted in Japan throughout the fiscal year ended March 31, 2002 (hereinafter referred to as "Fiscal 2001"), with a deteriorating unemployment rate, falling income, continued weakness in personal spending, and substantial reductions in corporate earnings and capital investments.

Despite the overall sluggishness, the wireless communications market continued to expand, driven by the popularity of wireless Internet access services, including DoCoMo's i-mode service. The national aggregate number of cellular and PHS subscriptions in Japan exceeded 74.81 million at the end of March 2002, or a penetration rate (subscriptions per population) of 58%. The number of net additional subscribers during this period, however, was limited to only about 80% of the number of additional subscribers in the previous year, demonstrating that the market has entered a transition phase from rapid expansion to stable growth. In the meantime, competition among wireless carriers has intensified as foreign capital entered the Japanese market, and each carrier continuously introduced various services and tariff packages.

Number of Cellular and PHS Subscribers over the Past Four Fiscal Years

	8th fiscal term (FY1998)	9th fiscal term (FY1999)	10th fiscal term (FY2000)	11th fiscal term (FY2001)
				(unit: thousand subscribers)
NTT DoCoMo Group subscribers	25,245	30,797	37,838	42,705
Total subscribers in Japan *	47,310	56,849	66,785	74,819

* Source: The Telecommunications Carriers Association

To quickly respond to these changes in the market, in addition to reinforcing its core businesses, DoCoMo endeavored to expand its business domain by steadily implementing new businesses centered on its three major growth strategies: its multimedia strategy focused on moving from voice to non-voice, its ubiquity strategy focused on incorporating anything mobile, and its globalization strategy focused on expanding from domestic to international markets.

To further promote mobile multimedia, DoCoMo undertook measures to enrich its i-mode services. At the same time, as part of its efforts to cultivate new businesses, DoCoMo introduced a new location information service for corporations, DLP service, which takes advantage of Global Positioning System (GPS) signals. DoCoMo's solutions business for corporate customers was strengthened in collaboration with a wide range of business partners, and a new automobile multimedia service was also developed.

DoCoMo started the world's first IMT-2000, or 3G, mobile communications system, using W-CDMA

Table of Contents

technology, on an introductory basis on May 30, 2001, and on a fully commercialized basis in the Tokyo area from October 1, 2001. DoCoMo has gradually expanded the coverage of its 3G network since then.

To facilitate globalization, DoCoMo has transferred technical and business know-how pertaining to i-mode services and IMT-2000 to its overseas investee affiliates. As a consequence, E-Plus Mobilfunk GmbH & Co. KG (E-Plus) of Germany, a subsidiary of KPN Mobile N.V. (KPN Mobile) of the Netherlands, launched i-mode services in Germany on March 16, 2002.

In January 2002, the Company's board of directors resolved to conduct a five-for-one stock split through the issuance of new shares on May 15, 2002, as well as to apply to list its shares on the New York Stock Exchange and London Stock Exchange in order to enhance share liquidity, improve the convenience of investors, and increase its options for fund raising. The Company's shares were listed on the two exchanges on March 1, 2002.

Recognizing environmental issues as one of its most immediate and ongoing managerial concerns, DoCoMo has undertaken a number of measures to alleviate the burdens it imposes on the environment, including, among others, collection and recycling of used cellular phones, use of an e-billing service through which customers are informed of the amount of their bill on home pages or via e-mail instead of paper, as well as construction of environment-friendly buildings. In February 2002, DoCoMo received ISO14001 certification at all levels of its organization, including its branch offices. It also received an extremely high ranking in eco-efficiency from Innovest Strategic Value Advisors, Inc., a New York-based international investment research firm, in its rating of the world's top telecommunications companies in June 2001.

As a result of the foregoing, consumer use of i-mode services expanded significantly and the number of cellular phone subscribers increased, which led to gains in both operating revenues and recurring profit. However, after an appraisal of the fair value of the shares of its investee affiliates in accordance with accounting standards for financial instruments, DoCoMo decided to recognize impairment losses from its investments in companies such as AT&T Wireless Services, Inc. of the United States (AT&T Wireless), KPN Mobile, KG Telecommunications Co., Ltd., of Taiwan (KG Telecom), and Hutchison 3G UK Holdings Limited of the United Kingdom (H3G UK). The impairment losses were recorded in the financial statements as special losses of ¥947.4 billion on a non-consolidated basis and ¥812.8 billion on a consolidated basis (write-down of investment in affiliated companies). As a consequence, DoCoMo recorded net losses of ¥310.7 billion on a non-consolidated basis and net income of ¥0.8 billion on a consolidated basis for the year ended March 31, 2002.

(2) Segment Information

Mobile Phone Business

In addition to its mova 211i series and i-appli -compatible mova 503iS series, DoCoMo increased its product variety by releasing a new model especially tailored for use by senior customers, mova F671i (Raku Raku Phone II), in a bid to disseminate i-mode services to a broader range of age groups. At the same time, DoCoMo started its DoCoMo Point Service as part of its efforts to improve customer services. It also reduced its tariffs to further stimulate demand for data communications by increasing bundled free-call minutes included in monthly plan charges and by allowing a number of telephone discount packages to be used for packet charges.

As part of the measures to respond to customers' diverse needs for mobile multimedia, DoCoMo introduced a new Window® CE-compatible handheld PC sigmarion II , and launched infogate , a portal service for PDAs.

DoCoMo's third-generation mobile communications service, FOMA, was commenced on a fully commercialized basis on October 1, 2001, in the areas within 30 kilometers from the center of Tokyo, after a test phase starting from May 30, 2001. Upon the launch of the fully commercialized service, three different terminal devices were offered simultaneously: the standard type FOMA N2001 , a visual handset supporting video phone capabilities, FOMA P2101V , and a data card FOMA P2401 . In November 2001, the Company launched iMotion service , which enables the transmission and replay of video and sound data taking advantage of FOMA's fast packet speed of up to 384Kbps downlink, and a new handset carrying this capability FOMA N2002 was released at the same time. In March 2002, another iMotion -compatible visual type handset FOMA D2101V was introduced. Meanwhile, in an effort to disseminate FOMA services among businesses, DoCoMo has reinforced solution sales to create new demand, proposing construction site support systems that utilize video communications and marketing support systems leveraging FOMA's high-speed, large-volume data transmission capabilities. The Company has expanded its FOMA service areas aggressively, covering approximately 92% of the populated areas in the Kanto-Koshinestu region around Tokyo by the end of March 2002. FOMA service was commenced in the Tokai and Kansai areas around Nagoya and Osaka in December 2001, at which point about 50% of the

Table of Contents

populated areas in Japan were covered.

As for i-mode, DoCoMo has taken measures to improve customer convenience by providing services such as AOLi, which links the mail services of i-mode and AOL, and iArea, a service that enables users to easily retrieve information pertaining to the neighborhood of the customer's location. At the same time, content offerings on i-appli, and DoCoMo's other i-mode services were further enriched in order to boost usage. Other new services were also developed jointly with other companies, including Cmode service, which allows i-mode to interact with vending machines to offer cash-free shopping.

Meanwhile, DoCoMo has made utmost efforts to prevent unsolicited bulk emails, sent in massive numbers to unidentified addresses via the Internet, from bothering its customers. Such efforts include, among other things, requesting customers to change default i-mode mail addresses into alpha-numeric addresses, blocking the reception of mails sent en masse to unknown addresses and adding functions to handsets to allow mail reception only from designated domains. At the same time, the Company has taken legal action against pernicious unsolicited bulk e-mail senders.

With regard to satellite communications services, the Company started an in-flight telephone service and a credit phone service to further improve customer convenience and provide a stable means of communications in mountainous areas or in the event of an emergency.

As a result of foregoing, the number of subscribers to DoCoMo's principal mobile phone services, and revenues at the end of Fiscal 2001 were as follows:

[Number of subscribers for Main Services as of March 31, 2002]

	Non-consolidated (changes from March. 31, 2001)	Consolidated (changes from March. 31, 2001)
		(unit: ¥ 100 million)
Cellular services	16,649 (up 11.9%)	40,694 (up 13.0%)
FOMA services	81 ()	89 ()
i-mode service*	12,814 (up 57.2%)	32,156 (up 48.2%)
Satellite mobile communications services		28 (2.1%)

* The number of i-mode subscribers is the aggregate of PDC i-mode subscribers (non-consolidated: 12,740,000 subscribers, consolidated: 32,075,000 subscribers) and FOMA i-mode subscribers (non-consolidated: 73,000 subscribers, consolidated: 81,000 subscribers).

11th fiscal term (FY2001)	4,411	10,675

* Data for the 8th , 9th and 10th fiscal terms present only the losses on a consolidated basis.

PHS Business

In a bid to promote PHS service, DoCoMo released various new products including P-in m@ster , a data card capable of handling both PHS and 9600bps cellular connections, P-in memory , a data card with a built-in memory of 16MB, Picwalk SH712m , a handset for the music distribution service M-stage music that can also support voice communications, and Paldio 633S , a PHS handset compatible with Bluetooth 1.1 (a technical standard for short distance radio connections for PCs and mobile phones, etc). At the same time, DoCoMo started a new tariff discount service for data communications P-p@c , and increased the availability of content for music/video distribution services on PHS in order to facilitate the use of data services, while making further efforts to slash costs by utilizing its facilities more efficiently.

(*) Bluetooth is a trademark owned by its proprietor and used by NTT DoCoMo, Inc. under license.

As a consequence of the foregoing, PHS subscriber count and revenues for Fiscal 2001 amounted to the following:

[Number of PHS subscribers as at March 31, 2002]

	<u>Non-consolidated</u> (changes from March. 31, 2001)	<u>Consolidated</u> (changes from March. 31, 2001)
		(unit: thousand subscribers)
PHS service	919 (up 7.3%)	1,922 (up 6.0%)

[Results for the fiscal year ended March. 31, 2002]

11th fiscal term (FY2001)	(184)	(587)

(Notes)

- Losses for the eighth fiscal term represent the amount subsequent to the transfer of PHS business from nine NTT Personal Group companies (such as NTT Central Personal Communications Network, Inc.) on Dec. 1, 1998.
- Data for the 8th, 9th and 10th fiscal terms present only the losses on a consolidated basis.

Quickcast Business

Despite attempts to boost system sales to corporate users and municipal governments by emphasizing Quickcast's multicast feature and information distribution capability, and to slash costs by streamlining its operations, the Quickcast business suffered from a constant decline in subscriptions as the market for pager services in Japan continued to shrink. The number of subscribers and results of operations for the Quickcast business as of the end of Fiscal 2001 are summarized below:

[Number of Quickcast subscribers as at March 31, 2002]

	<u>Non-consolidated</u> (changes from March. 31, 2001)	<u>Consolidated</u> (changes from March. 31, 2001)
		(unit: thousand subscribers)

11th fiscal term (FY2001)	(15)	(63)

(Note) Data for the 8th , 9th and 10th fiscal terms present only the losses on a consolidated basis.

Miscellaneous Business

Thanks to measures to promote DoCoMo's World Call service, an international dialing service from cellular phones, the World Call subscriber base rose 58.9% year on year to 433,000 at the end of March 2002. Leveraging their own technologies and know-how, the Company's subsidiaries have expanded into new business areas, including the development of various systems and provision of new services. The results of Miscellaneous business are summarized in the table below:

Table of Contents

[Results for the fiscal year ended March. 31, 200]

	Non-consolidated (changes from previous year)	Consolidated (changes from previous year)
Miscellaneous business revenues	¥7.1 billion (up 36.0%)	¥23.9 billion (down 1.9%)
Income (Loss) from Miscellaneous business	(¥1.0 billion) (down 3.0%)	¥0.3 billion (down 57.9%)

The principal new services and products launched by DoCoMo in Fiscal 2001 are listed in the table below:

Principal New Services Launched in Fiscal 2001

<u>Service name</u>	<u>Overview</u>
iArea (Launched in July 2001)	A service that enables users to easily retrieve information related to the neighborhood of the user's current location from iArea-compatible sites.
iMotion (Launched in November 2001)	A service enabling users to download and replay image and sound data from sites using an iMotion-compatible handset.
DLP service (Launched in November 2001)	A location information service for corporations that use GPS (Global Positioning System) signals.
infogate (Launched in March 2002)	A portal service for PDAs which allows users to browse and use various content and applications on several mobile communications networks (cellular phone, FOMA, PHS, DoPa).

Table of Contents**Principal New Products Launched in Fiscal 2001**

<u>Product name</u>	<u>Overview</u>
mova 210i (Launched in April 2001)	An i-mode -compatible cellular phone
Picwalk SH712m (Launched in April 2001)	A PHS phone supporting both M-stage music service and voice communications
mova 503iS (Launched in May 2001)	An i-appli -compatible cellular phone
P-in m@ster (Launched in July 2001)	A data-card capable of supporting both 64K data communications on PHS and 9600bps cellular data connections
mova F671i (Raku Raku Phone II) (Launched in September 2001)	An i-mode -compatible phone with functions designed for use by a wide range of age groups.
FOMA N2001 (Launched in October 2001)	A standard type FOMA handset with high-quality voice communications and fast-speed, large-volume data transmission capabilities.
FOMA P2101V (Launched in October 2001)	A FOMA handset with a built-in camera for video-phone service, supporting high-quality voice and fast-speed, large-volume data transmission.
FOMA P2401 (Launched in October 2001)	A FOMA data card for PCs designed for fast-speed, large-volume data transmission.
mova 211i (Launched in November 2001)	An i-mode -compatible cellular phone
FOMA N2002 (Launched in November 2001)	A FOMA handset capable of connecting to iMotion sites and download and replay image and sound data.
Paldio 633S (Launched in December 2001)	A PHS handset supporting Bluetooth Ver 1.1 .
FOMA D2101V (Launched in March 2002)	A FOMA handset with a built-in camera for video-phone service supporting iMotion capabilities.

Table of Contents

The operating revenues and operating income/losses from each business for the year ended March 31, 2002 were as described below:

[Non-consolidated]

Business	FY2000		FY2001		% change
	(¥ Billion)				
Operating revenues

(3) Capital Expenditures

Total capital expenditures for the fiscal year ended March 31, 2002 amounted to ¥576.8 billion on a non-consolidated basis (¥1,032.2 billion on a consolidated basis), and were used mainly to add capacity to accommodate increased demand for communications, improve network reliability, provide new services, and start and expand FOMA services.

The capital expenditures for cellular/automobile phone services were primarily allocated for installing base stations, switches and transmission lines for the purpose of maintaining and improving communications quality and expanding coverage in underground areas or inside buildings. Investments were also made to provide sufficient capacity for accommodating the rapidly increasing number of i-mode subscribers as well as to implement technical solutions to counter the unsolicited bulk e-mail problem.

As for FOMA, network facilities and base stations were installed so as to ensure a smooth service launch and a gradual coverage expansion thereafter.

Network facilities and base station allotment for the PHS business were reviewed to further improve its equipment utilization efficiency.

In addition, to cope with rising communications demand, new buildings for telecommunications equipment were constructed.

Principal equipment and facilities completed during Fiscal 2001 include the following:

[Principal Facilities Completed in Fiscal 2001]

<u>Item</u>	<u>Non-consolidated</u>	<u>Consolidated</u>
Mobile Phone*		
Newly installed base stations	2,087 stations	4,056 stations
Local switches	30 units	76 units
Packet local switches	29 units	87 units
Long distance transmission lines	15 sections	52 sections
PHS		
Newly installed base stations	10,080 stations	24,742 stations
Buildings for telecommunications facilities	1 site	4 sites

* Inclusive of facilities for FOMA services.

Trends in Capital Expenditure over the Past Four Fiscal Years

	<u>Non-consolidated</u>	<u>Consolidated</u>
		(unit: ¥ 100 million)
8th fiscal term (FY1998)	4,581	8,458
9th fiscal term (FY1999)	4,505	8,760
10th fiscal term (FY2000)	5,856	10,127
11th fiscal term (FY2001)	5,768(1)	10,322(2)

(Notes)

(1) The non-consolidated amount is composed of capital expenditures in the following businesses:

Cellular phone business: 57.5%, PHS business: 1.0%, Quickcast business: 0.0%, Common (Buildings for telecommunications facilities, etc.): 41.5%.

(2) The consolidated amount is composed of capital expenditures in the following businesses:

Cellular phone business: 68.8%, PHS business: 1.2%, Quickcast business: 0.0%, Common (Buildings for telecommunications facilities, etc.): 30.0%.

(4) Financing Activities

During the fiscal year ended March 31, 2002, the Company raised ¥420 billion through the issuance of corporate bonds and ¥267 billion through long-term borrowings in order to pay down debts.

(5) R&D Activities

The Company carried out research and development for the following purposes during the year ended March 31, 2002: launch of FOMA service; provision of various advanced services by capacity expansion and cost reduction of existing networks; and basic research on technologies for future advancement of mobile communications.

Total R&D expenditure in Fiscal 2001 was ¥100.1 billion. Details of significant research projects are described below:

As for FOMA services, research was performed on W-CDMA radio access equipment, ATM network technology, compact size standard/visual type handsets and dedicated data cards, and various other equipment required for the provision of multimedia services, while conducting various system tests in preparation for the launch of commercial services. To enhance the service offerings and facilitate the global deployment of FOMA in the future, the Company initiated the development of video mail and international roaming services as well. Furthermore, the Company participated in international standardization activities for WAP and other technologies.

In addition, developments for capacity expansion and system stabilization for existing networks were also performed to cope with the increasing demand for i-mode services. In addition, new functionalities were developed to counter the unsolicited bulk e-mail problem, such as a selective receiving function from designated domains and the capability to block the reception of a large number of unsolicited bulk e-mails sent to unidentified addresses. Meanwhile, development of interface equipment for allowing open access to

Table of Contents

i-mode service was started.

With regard to future technologies, the Company conducted research on network transport technologies and fast-speed radio access schemes to enable voice/data transmissions on IP core networks to realize a flexible and inexpensive communications network. At the same time, basic research on technologies that can be applied to fourth-generation mobile networks or other future systems was performed with the goal to further advance services.

(Note) NTT DoCoMo also has an ownership interest of 20% in Hutchison 3G (UK).

2. Challenges to be Tackled by the Company

The mobile communications market in Japan is currently facing a major transition to a period of stable growth, with a rising penetration rate and rapidly increasing demand for data communications services. Against this backdrop, DoCoMo has decided to attach greater emphasis on profits rather than revenues. While reinforcing its existing core businesses, it will continue to expand its business by pursuing the three major strategies of multimedia, ubiquity, and globalization under the slogan "creating a new world of communications culture".

In order to strengthen its core businesses, DoCoMo plans to continue maintaining and enhancing its network quality and to offer diversified tariff packages. New services and products catering to customer needs, including handsets with built-in cameras or infrared communications capability, are also planned for release to acquire more new customers, decrease customer turn-over and encourage usage by customers. As for i-mode, DoCoMo intends to stimulate further usage by offering handsets supporting faster downlink packet speeds and greater i-mode content size, which will enable the distribution of large-volume content. As part of the offerings for ubiquitous services, the group intends to provide electronic commerce services that will realize cash-free shopping on mobile phones as well as services to remotely control intelligent home appliances, and thereby expand usage in person-to-machine and machine-to-machine communications. On the other hand, DoCoMo will disclose the interface conditions with its packet communications network so that Internet service providers can provide services similar to DoCoMo's i-mode, which is intended to further develop the mobile multimedia market.

As for FOMA, all major cities nationwide were included in DoCoMo's FOMA service areas from April 2002. DoCoMo plans to expand FOMA coverage to 90% of the populated areas in Japan by the end of March 2003. More advanced services are planned to be started on FOMA this fiscal year, including video distribution service, video mail service, and dual network service which allows users to use both FOMA and

Table of Contents

PDC phones with the same telephone number. In the meantime, further efforts will be made to bring down the size, weight and power consumption of handsets. Also, the group will reinforce solution marketing activities targeted at corporate customers to facilitate the use of FOMA services among this segment.

The Japanese Diet recently passed relevant legislation to deal with the unsolicited bulk e-mail problem. As a carrier, DoCoMo intends to further develop other prevention mechanisms such as selective receiving functions.

As part of the Company's efforts to accelerate mobile multimedia on a global scale, i-mode is planned for launch this fiscal year in Germany, followed by the Netherlands, Belgium and Taiwan. In addition, preparations for the introduction of IMT-2000 will be continued, transferring the know-how obtained through the deployment of FOMA services in Japan to overseas investee affiliates. Going forward, the Company plans to explore investment opportunities primarily in the Asia region, and also flexibly look into other options including alliances that do not involve equity participation, depending on the circumstances. The goal of the group's international strategy is to enhance the enterprise value of its investee partners by developing their businesses over the mid-to-long term.

With regard to PHS, Quickcast, satellite phones, and other loss-making services, DoCoMo will continue its efforts to reduce costs and improve their financial performance by boosting efficiency. At the same time, these existing businesses will be reviewed taking into account the changes in the business environment.

Furthermore, to swiftly respond to changes in the business environment and intensified competition, DoCoMo will require each board member and employee to promote a business culture emphasizing innovation, speed, efficiency and compliance with relevant laws and ethics. Specifically, DoCoMo will endeavor to speed up its corporate decision making process by fully utilizing the new corporate information system introduced on April 1, 2002, solidifying its group management structure with regional DoCoMo companies, and facilitating the efficient management of the group by integrating and transferring some operations, e.g., maintenance and customer acceptance, to subsidiaries. In other words, DoCoMo plans to thoroughly select and concentrate its managerial resources through this process.

In July 2002, DoCoMo will celebrate the 10th anniversary of the launch of its business. Seizing this opportunity, DoCoMo would like to renew its determination to challenge the mobile frontier by developing new businesses and services, and thereby maximize the enterprise value of the entire group.

3. Historical Data on Non-Consolidated Financial Results and Assets

<u>Item</u>	<u>8th Fiscal Term (FY1998)</u>	<u>9th Fiscal Term (FY1999)</u>	<u>10th Fiscal Term (FY2000)</u>	<u>11th Fiscal Term (FY2001)</u>
Operating revenues (¥ million)	1,485,728	1,735,064	2,142,353	2,355,760
Recurring profit (¥ million)	171,330	232,736	292,938	406,471
Net income (losses) (¥ million)	92,434	128,573	173,005	(310,720)
Net income (losses) per share (¥)	53,355	13,426	17,978	(30,960)
Total assets (¥ million)	2,419,035	2,649,350	4,460,718	4,252,097
Net assets (¥ million)	1,477,370	1,611,818	2,728,774	2,405,426

(Notes)

- The net income (losses) per share are calculated using the average number of outstanding shares in each fiscal term. The decline in net income per share in the 9th fiscal term is due to the impact of the share split carried out during this term. In calculating the net income per share, it is assumed that the share split was conducted at the beginning of the fiscal term.
- In the 8th fiscal term, various new services were developed and provided, and diversified tariff packages were introduced. On the other hand, as a result of incurring special losses of ¥24,945 million due to the transfer of PHS business from NTT Central Personal Communications Network, Inc., operating revenues for this term were ¥1,485,728 million, recurring profits ¥171,330 million, and net income ¥92,434 million.
- In the 9th fiscal term, efforts to stimulate usage through the provision of high-quality service and diversified tariff packages and discounts were undertaken. The i-mode service was introduced to stimulate and expand demand for mobile multimedia. On the other hand, special losses of ¥13,331 million were incurred due to the write-down of Quickcast-related facilities. The Company achieved operating revenues of ¥1,735,064 million, recurring profit of ¥232,736 million, and net income of ¥128,573 million.
- In the 10th fiscal term, the Company endeavored to reinforce its core businesses through network quality enhancements and tariff reductions, among other things. At the same time, various new services and products, including i-appli, were launched as a step toward the full-scale deployment of mobile multimedia. As a consequence, operating revenues rose to ¥2,142,353 million, while recurring profit and net income amounted to ¥292,938 million and ¥173,005 million, respectively. The increase in total assets during this fiscal term was due primarily to the equity participation in overseas carriers (totaling ¥1,795.8 billion), while the rise in net assets was due largely to the increase in capital and capital reserve as a result of a public offering of new shares (¥950.3 billion).
- Developments in the 11th fiscal term are described in Developments and Results of Operations.

Table of Contents

II. Corporate Overview (as at March 31, 2002)

1. Principal Businesses

The Company's primary businesses, operating a mobile phone business, PHS business, and Quickcast business, consist of the services listed below:

Principal services	
<u>Business</u>	<u>Content of business</u>
Mobile Phone Business	Cellular services, FOMA services, packet communications services, satellite mobile communications services, in-flight telephone service, and equipment sales for each service
PHS Business	PHS service and PHS equipment sales
Quickcast Business	Quickcast service and Quickcast equipment sales (formerly paging service and paging equipment sales)
Miscellaneous Business	International dialing service and other miscellaneous business

2. Principal offices, etc.

Headquarters: 11-1, Nagatacho 2-chome, Chiyoda-ku, Tokyo, Japan

Branches: Marunouchi Branch, Shinjuku Branch, Shibuya Branch, Tama Branch, Kanagawa Branch, Chiba Branch, Saitama Branch, Ibaraki Branch, Tochigi Branch, Gunma Branch, Yamanashi Branch, Nagano Branch, and Niigata Branch

- (Notes)
1. Ueno Branch, Ikebukuro Branch, and Toranomom Branch, which were included in the Business Report for Fiscal 2000, were reorganized and integrated into Marunouchi, Shinjuku, and Shibuya Branches, respectively, on July 1, 2001.
 2. Tokyo Equipment Service Center, which was described as an office for collection operations, was abolished on July 1, 2001 because the Company decided to outsource its equipment maintenance operations.

Table of Contents

3. Employees

<u>No. of employees (change from March 31, 2001)</u>	<u>Average age</u>	<u>Average length of service</u>
5,794 (increased by 460)	35.4 years old	12.9 years

- (Notes)
1. The number of employees includes 152 seconded from other companies.
 2. In calculating the average length of service for the employees who were transferred from Nippon Telegraph and Telephone Corporation (NTT) or other companies in the NTT Group or former NTT Personal Central Personal Communications Network, Inc., their years of service at their respective previous companies are included in the calculation.

4. Shares of the Company

(1) Total number of authorized shares: 38,300,000 shares

(Note) Increase after the end of Fiscal 2001

The Board of Directors of the Company at its meeting held on January 25, 2002 resolved to partly amend the Articles of Incorporation to increase the number of authorized shares in proportion to the stock split by 153,200,000 to a total of 191,500,000 shares. This took effect on May 15, 2002.

(2) Total number of outstanding shares: 10,036,000 shares

(Note) Increase after the end of Fiscal 2001

Based on the resolution by the Board of Directors of the Company on January 25, 2002, each share of common stock held by a shareholder or registered beneficial shareholder on record on March 31, 2002 were divided into five shares on May 15, 2002. As a consequence, the total number of outstanding shares was increased by 40,144,000 to 50,180,000.

(3) Number of shareholders: 215,784

(3) Consolidated Results

An overview of the Company's consolidated financial results are provided below:

Item	Previous Term (FY2000)	This Fiscal Term (FY2001)	% change
	¥ million	¥ million	
Consolidated operating revenues	4,686,004	5,171,546	up 10.4
Consolidated operating income	777,162	1,002,852	up 29.0
Consolidated net income	365,505	862	down 99.8

(Note)

There were 34 consolidated subsidiaries and 38 companies accounted for using the equity method for the year ended March 31, 2002.

(4) Developments in the Corporate Group

Major developments including investments during the year ended March 31, 2002 are summarized below:

In May 2001, the Company acquired an additional 6.37% stake in Hutchison Telephone Company Limited (HTCL) of Hong Kong through a wholly owned subsidiary of the Company on the occasion of the withdrawal of a major shareholder in HTCL. In July, the Company, through its wholly owned subsidiary, acquired 25.37% of the outstanding shares of Hutchison 3G HK Holdings Limited (H3GHK), a Hong Kong-based holding company that owns an operator of third-generation mobile communications services, and H3GHK became an affiliate of the Company accounted for using the equity method.

In July 2001, the Company, through its wholly owned subsidiary, purchased additional shares in KG Telecommunications Co. Ltd. of Taiwan on the occasion of its issuance of new shares. The

Table of Contents

Company's ownership rose to 21.4% as a consequence.

In July 2001, when AT&T Wireless Services, Inc. was spun off from AT&T Corporation, the preferred tracking stock of AT&T Corporation acquired by the Company in the previous fiscal year were converted into common stock of AT&T Wireless. Accordingly, AT&T Wireless became an affiliate accounted for using the equity method. In addition, as AT&T Wireless conducted an equity swap through a new share issuance for the purpose of acquiring a separate company, the Company exercised its rights to purchase some of the newly issued shares through a wholly owned subsidiary. As a result, the Company's ownership of AT&T Wireless rose to 16.01%.

6. Principal Liabilities

Creditors	Outstanding loan balance	No. of DoCoMo shares and voting rights held by creditors

Table of Contents

Company, as set forth in Article 18-1 of the law related to special exemptions for audit on stock corporations.

3. Reshuffling of Directors/Auditors in Fiscal 2001:

(1) Appointed

At the 10th regular general assembly of shareholders on June 26, 2001, Messrs. Yasuhiro Kadowaki, Yoshiaki Aigami, Takanori Utano, Kiyoyuki Tsujimura were newly elected and appointed as Directors, and Mr. Kiyoto Uehara was newly elected and appointed as a Corporate Auditor.

(2) Retired

Directors Shuichi Shindo (Executive Vice President), Kazushige Sako, Hideaki Nakashima, Hideki Ishikawa (Senior Vice President), and Corporate Auditor Mr. Kinji Hoshino retired on the closure of the 10th regular general assembly of shareholders on June 26, 2001.

Mr. Norioki Morinaga, Senior Executive Vice President, died on Oct. 10, 2001.

III. Important Facts that Occurred after Fiscal 2001 Settlement

The Company issued five-year domestic unsecured straight corporate bonds totaling ¥100 billion in accordance with a resolution passed at a board of directors meeting held on March 26, 2002, which authorized financing up to ¥300 billion during the period from April to June 2002 through measures such as the issuance of domestic bonds, foreign currency-denominated bonds and long-term borrowings.

Amounts used throughout this report are truncated to nearest unit of presentation.

Table of Contents

Significant accounting policies

1. Depreciation of fixed assets

(1) Property, plant and equipment

Depreciation of property and equipment is computed by the declining balance method with the exception of buildings, which are depreciated on the straight-line method.

(2) Intangible fixed assets

Intangible fixed assets are amortized using the straight-line method.

Computer software for internal use is amortized on the straight-line method over the estimated useful life.

2. Valuation of securities

a. Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving-average method.

b. Available-for-sale securities whose fair value is readily determinable are stated at fair value as of the end of the fiscal year with unrealized gains and losses, net of applicable deferred tax assets/liabilities, not reflected in earnings, but directly reported as a separate component of shareholders' equity. The cost of securities sold is determined by the moving-average method. Available-for-sale securities whose fair value is not readily determinable are stated primarily at moving-average cost except for debt securities, which are stated at amortized cost.

3. Valuation of inventories

Inventories are stated at cost. The cost of telecommunications equipment to be sold is determined by the first-in, first-out method. The cost of other inventories is determined by the specific identification method.

4. Deferred assets

Bond issuance costs are expensed at the time of payment.

5. Foreign currency translation

Foreign currency monetary assets and liabilities are translated into Japanese yen at the current spot rate at the end of the fiscal year and the resulting translation gains or losses are included in current earnings.

6. Allowance for doubtful accounts, Liability for employees' severance payments and reserve for point loyalty programs

(1) Allowance for doubtful accounts

The Company provides for doubtful accounts principally at an amount computed based on the historical bad debt ratio during a certain reference period plus the estimated uncollectable amount based on the analysis of certain individual accounts, including claims in bankruptcy.

(2) Liability for employees' severance payments

In order to provide for the employees' retirement benefits, the Company accrues the liability as of the end of the fiscal year in an amount calculated based on the estimated projected benefit obligation and plan assets at the end of the fiscal year.

Actuarial losses are expensed as incurred.

Prior service cost is amortized on the straight-line method over the average remaining service periods of the employees at the time of recognition.

(3) Reserve for point loyalty programs

The costs of awards under the point loyalty programs called DoCoMo Point Service and Club DoCoMo that are reasonably estimated to be redeemed by its customers in the following fiscal years based on historical data are accounted for as reserve for point loyalty programs.

7. Consumption tax

Consumption tax is separately accounted for by excluding it from each transaction amount.

Table of Contents**Notes to Non-consolidated Balance Sheet**

1. Fixed assets for telecommunications businesses include those used in General Type II Telecommunications Carrier business, Special Type II Telecommunications Carrier business and supplementary businesses, because these amounts were not significant.

2. Accumulated depreciation of property, plant and equipment was ¥927,804 million.

3. Investments in subsidiaries included in the amount of investments in affiliated companies were as follows:

Investments in equity shares of subsidiaries	¥	1,229,695 million
Investments in capital of subsidiaries	¥	781 million

4. Monetary assets and liabilities due from or to subsidiaries and the controlling shareholder were as follows:

(1) Subsidiaries:

Long-term monetary assets	¥	16,000 million
Short-term monetary assets	¥	231,512 million
Short-term monetary liabilities	¥	100,345 million

(2) Controlling shareholder:

Short-term monetary assets	¥	1 million
Short-term monetary liabilities	¥	1,274 million

5. Assets or liabilities due from or to subsidiaries and affiliates, the amount of which exceeded one percent of total assets or total liabilities and shareholders' equity of the Company, were as follows:

Accounts receivable, trade	¥	116,386 million
Accounts receivable-other	¥	114,442 million
Accounts payable-other	¥	57,276 million

6. The Company's guarantee (contingent liability) was ¥39 million (2,269 thousand Hong Kong dollars).

7. As financial institutions in Japan were closed on March 31, 2002, amounts that would normally be settled on that day were collected or paid on or after the following business day, April 1, 2002. The effects of the settlements on or after the following business day instead of the end of reporting period were as follows:

Cash and bank deposits	Approximately	¥	(234) billion
Accounts receivable, trade	Approximately	¥	127 billion
Accounts payable-other	Approximately	¥	20 billion
Deposits received	Approximately	¥	(127) billion

The deposits received were related to intercompany funds transfer with eight regional subsidiaries (such as NTT DoCoMo Kansai, Inc.).

8. Net loss per share was ¥30,960.55.

9. Net assets as stipulated in Article 290 Clause1-6 of the Commercial Code of Japan was ¥848 million.

Table of Contents**Notes to Non-consolidated Statement of Income**

1. Operating revenues and operating expenses from transactions with subsidiaries were ¥220,669 million and ¥158,926 million, respectively.

Non-operating transactions with subsidiaries were ¥63,567 million.

2. Operating revenues and operating expenses from transactions with the controlling shareholder were ¥1 million and ¥13,752 million, respectively. Non-operating transactions with the controlling shareholder were ¥5,211 million.
3. Revenues and expenses related to General Type II Telecommunications Carrier business and Special Type II Telecommunications Carrier business were included in supplementary businesses, because these amounts were not significant.
4. Non-operating revenue of which revenue from subsidiaries and affiliates exceeded 10 percent of the total non-operating revenues was as follows:

Dividend income:	¥1,722 million
------------------	----------------

5. Write-down of investment in affiliated companies mainly relates to the impairment charges recognized on the investments in the following subsidiaries that have overseas investments in affiliated companies.

DCM Capital USA (UK) Limited [Ultimate investee: AT&T Wireless Services, Inc.]	¥591,726 million
---	------------------

DCM Capital NL (UK) Limited [Ultimate investee: KPN Mobile N.V.]	¥300,883 million
---	------------------

DCM Capital TWN (UK) Limited [Ultimate investee: KG Telecommunications Co., Ltd.]	¥32,467 million
--	-----------------

DCM Capital LDN (UK) Limited [Ultimate investee: Hutchison 3G UK Holdings Limited]	¥20,494 million
---	-----------------

6. Gain on sale of investment securities (¥537 million for the year ended March 31, 2001), which had been included in miscellaneous income in non-operating revenues for the fiscal year ended March 31, 2001, was separately reported for the fiscal year ended March 31, 2002, because the amount became significant

7. Introduction of end-to-end rate system for cellular services among wireless carriers:

For interconnected calls between two cellular operators in the previous years, each operator set its own end-user rate for the part of the cellular service it provided. Effective April 1, 2001, an end-to-end rate system was introduced and the operator serving the caller sets the end-user rate for the entire call, including the part of the call serviced by the other operator's network.

Consequently, after the introduction of the new rate system, the total charge for the entire call is accounted for as voice transmission service revenue and an access charge is expensed as a communication network charge.

The introduction of the new rate system increased both operating revenues from telecommunication businesses (voice transmission service revenue) and operating expenses from telecommunication businesses (communication network charges) by ¥67,385 million for the fiscal year ended March 31, 2002 in comparison with those under the previous call rate setting system.

Table of Contents**PROPOSAL FOR APPROPRIATION OF RETAINED EARNINGS**

	Amount
	(yen)
Unappropriated retained deficit	(304,585,701,631)
Reversal of general reserve	340,000,000,000
Sub-total	35,414,298,369

The above shall be appropriated as follows:

Cash dividends (¥1,000 per share)	10,036,000,000
Year-end dividend of ¥500	
Special commemorative dividend of ¥500	
Retained earnings carried forward	25,378,298,369

Note: The Company paid ¥5,018 million (¥500 per share) as interim cash dividends on November 21, 2001.

We have audited the non-consolidated balance sheet as of March 31, 2002, and the non-consolidated statement of operations, the business report (limited to accounting matters), the proposal for appropriation of retained earnings, and the supporting schedules (limited to accounting matters) of NTT DoCoMo, Inc. (the Company) for the 11th fiscal year ended March 31, 2002, pursuant to the provisions of Article 2 of the Law for Special Exceptions to the Commercial Code of Japan concerning Concerning Audit, etc., of Kabushiki Kaisha. The accounting matters in the business report and the supporting schedules which are subject to audit are derived from the accounting books and records of the Company.

Our audit was made in accordance with generally accepted auditing standards in Japan and all relevant auditing procedures were carried out as are normally required. The auditing procedures include those carried out as to the Company's subsidiaries where we considered necessary in the circumstances.

As a result of the audit, our opinion is as follows:

- (1) The non-consolidated balance sheet and the non-consolidated statement of income operations present fairly the non-consolidated financial position of the Company and the non-consolidated results of its operations in compliance with the provisions of the applicable laws, regulations and the Articles of Incorporation of the Company.
- (2) The business report (limited to accounting matters) presents fairly the status of the Company in compliance with the provisions of the applicable laws, regulations and the Articles of Incorporation of the Company.
- (3) The proposal for appropriation of retained earnings is in conformity with the provisions of the applicable laws, regulations and the Articles of Incorporation of the Company.
- (4) With respect to the supporting schedules (limited to accounting matters) there are no items to be noted that are not in conformity with the provisions of the Commercial Code of Japan.

As is presented in the section III, "Important Facts that Occurred after Fiscal 2001 Settlements", of the business report, the company Company issued five-year domestic unsecured straight corporate bonds totaling ¥100 billion in accordance with a resolution passed at a board of directors meeting held on March 26, 2002, which authorized financing up to ¥300 billion during the period from April to June 2002 through measures such as the issuance of domestic bonds, foreign currency-denominated bonds and long-term borrowings.

No conflicts of interest as defined by the provisions of the Certified Public Accountants Law exists between the Company and our firm or the engagement partners.

Report of Corporate Auditors

We, the Board of Corporate Auditors of NTT DoCoMo, Inc.(the Company), following a review and discussion of the individual reports of the audit method and the results of the audit regarding the performance by Directors of their duties in the 11th fiscal year ended March 31, 2002 from each Corporate Auditor, prepared this Report of Corporate Auditors and report as follows:

1. Summary of Corporate Auditor s Auditing Method

In accordance with the auditing plan determined by the Board of Corporate Auditors, each Corporate Auditor attended the meetings of the Board of Directors and other significant meetings; obtained reports on business operations from the directors and others; reviewed documents which approve material matters; conducted investigations regarding the status of the business operations and properties of the head office and other major offices; received reports and explanations from the independent auditor; and reviewed the financial statements and attachments thereto.

When necessary, each Corporate Auditor requested business reports from subsidiaries and conducted investigations regarding the status of the business operations and properties of subsidiaries.

In addition to the above auditing methods, each Corporate Auditor, to the extent necessary, requested reports from Directors and others, to review the status of the following kinds of transactions: director transactions in competition with the Company; any conflict of interest dealings between directors and the Company; any dealings in which the Company provided benefits without compensation; unusual dealings between the Company and subsidiaries or shareholders; and repurchase or disposal of the Company s shares.

2. Results of the Audit

We are of the opinion that:

- (1) The auditing methods and results by the independent auditor, Asahi & Co., are reasonable and satisfactory;
- (2) The business report presents fairly the conditions of the company in accordance with the laws and regulations and the Articles of Incorporation;
- (3) There are no matters which we must point out, in light of the financial condition of the company and other factors, regarding the agenda of appropriation of retained earnings;
- (4) The annexed specification states all matters which should be described therein and there are no matters which we must point out; and
- (5) Regarding the performance of duties by directors, including their duties for subsidiaries, there are no misconduct or material matters which are in violation of the Articles of Incorporation.

We did not find any violations of the duties of Directors regarding dealings in competition with the Company, conflict of interest dealings between Directors and the Company, dealings in which the Company provided benefits without compensation, unusual dealings between subsidiaries or shareholders or repurchase or disposal of the Company s shares.

3. Material Events occurring subsequent to the End of the Fiscal Year

The matters reported by the Board of Directors on May 8, 2002 are as follows:

The Company and the eight regional subsidiaries including NTT DoCoMo Kansai, Inc., entered into a memorandum of understanding which provide that the regional subsidiaries shall become wholly-owned subsidiaries of the Company by way of share exchanges on May 8, 2002, in order to prepare for the possible adoption of consolidated tax reporting upon enactment of the Consolidated Tax System, which is expected in the current fiscal year. In addition, as the mobile communications industry enters a more

Table of Contents

challenging market environment, the Company believes that its overall group value can be increased by making its regional subsidiaries wholly-owned and unifying its business and financing strategies.

The following is the schedule for the share exchange:

- (1) Date of Share Exchanges: November 1, 2002
- (2) Share Exchange Ratio: See below

<u>Company</u>	<u>Share Exchange Ratio</u>
NTT DoCoMo, Inc.	1
NTT DoCoMo Hokkaido, Inc.	16.51
NTT DoCoMo Tohoku, Inc.	37.02
NTT DoCoMo Tokai, Inc.	27.80
NTT DoCoMo Hokuriku, Inc.	19.44
NTT DoCoMo Kansai, Inc.	33.53
NTT DoCoMo Chugoku, Inc.	26.71
NTT DoCoMo Shikoku, Inc.	19.12
NTT DoCoMo Kyushu, Inc.	47.72

Note: Share Exchange Ratio

One share of each of the regional subsidiaries will be allotted according to the share exchange ratio above. However, shares of the Company will not be allotted to the shares of the regional subsidiaries held by the Company itself.

Date: May 13, 2002

Board of Corporate Auditors of NTT DoCoMo, Inc.

Ken-ichi Matsumura, Full-time Corporate Auditor	seal
Keisuke Nakasaki, Full-time Corporate Auditor	seal
Hiroyuki Moriyama, Full-time Corporate Auditor	seal
Kiyoto Uehara, Corporate Auditor	seal

Note: Full-time Corporate Auditor Keisuke Nakahara, and Corporate Auditor Kiyoto Uehara, are outside auditors in accordance with the provisions under paragraph 1 of Article 18 of the Law For Special Exceptions to the Commercial Code Concerning Audit, etc. of Joint Stock Corporation (*Kabushiki Kaisha*) .

Recurring Profit Margin	11.2%	13.5%	14.7%	16.5%
Return on Equity (ROE) (*2)	21.3%	13.9%	13.9%	0.0%
EBITDA (100 millions of yen)	9,995	11,580	14,287	16,820
EBITDA Margin	32.1%	31.1%	30.5%	32.5%

*1 Per Share amounts have been adjusted to reflect five-for-one stock splits that took effect in August 1998 and September 1999.

*2 Because the numbers for the eighth fiscal term include those prior to the listing on the Tokyo Stock Exchange, a simple comparison with other fiscal terms may not be appropriate.
