PATHFINDER BANCORP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Pathfinder Bancorp, Inc. and its wholly owned subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes necessary for a complete presentation of consolidated financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. In the opinion of management, all adjustments, consisting of normal recurring accruals, considered necessary for a fair presentation have been included.

The following material under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" is written with the presumption that the users of the interim financial statements have read, or have access to, the Company's latest audited financial statements and notes thereto, together with Management's Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2007 and for the two year period then ended. Therefore, only material changes in financial condition and results of operations are discussed in the remainder of Part 1.

Operating results for the three and nine months ended September 30, 2008, are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

(2) Earnings (Loss) per Share

Basic earnings per share have been computed by dividing net income (loss) by the weighted average number of common shares outstanding throughout the three months and nine months ended September 30, 2008 and 2007, using 2,484,364 and 2,483,532 weighted average common shares outstanding for the three month period and 2,483,944 and 2,482,886 for the nine months ended, respectively. Diluted earnings per share for the three months and nine months ended September 30, 2008 and 2007 have been computed using 2,484,364 and 2,487,732 for the three month period and 2,483,944 and 2,489,292 for the nine months ended, respectively. Diluted earnings per share gives effect to weighted average shares that would be outstanding assuming the exercise of issued stock options using the treasury stock method. There was no dilutive effect during the three and nine months ended September 30, 2008 since the Company was in a loss position. The number of dilutive options excluded from the diluted earnings per share calculations were 1,062 and 2,892 for the three and nine months ended September 30, 2008.

(3) Pension and Postretirement Benefits

On January 1, 2008, the Company recorded a \$48,000 charge to retained earnings, representing the cumulative effect adjustment upon adopting the measurement date transition rule for the Company's pension plan and postretirement benefit plan. In accordance with SFAS 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, measurement date provisions, plan assets and obligations are to be measured as of the employer's balance sheet date. The Company previously measured its pension and postretirement plans as of October 1 of each year. As a result of the measurement date provisions, the Company decreased its retirement plan assets with a corresponding charge to retained earnings, representing the net periodic benefit cost for the period between the October 1, 2007 measurement date and January 1, 2008.

The composition of net periodic pension plan costs for the three months and nine months ended September 30, is as follows:

	For the three months ended September 30,		For the the nine months ended September 30,	
(In thousands)	2008	2007	2008	2007
Service cost	\$ 54	\$ 49	\$ 162	\$ 147
Interest cost	79	68	237	204
Expected return on plan assets	(112)	(98)	(335)	(294)
Amortization of net losses	16	22	49	66
Net periodic benefit cost	\$ 37	\$ 41	\$ 113	\$ 123

The composition of net periodic postretirement plan costs for the three months and nine months ended September 30, is as follows:

	For the the three months ended September 30,		For the nine months ended September 30,	
(In thousands)	2008	2007	2008	2007
Service cost	\$ 1	\$ 1	\$ 2	\$ 2
Interest cost	5	5	16	16
Amortization of transition obligation	5	5	14	14
Net periodic benefit cost	\$ 11	\$ 11	\$ 32	\$ 32

The Company previously disclosed in its consolidated financial statements for the year ended December 31, 2007, that it expects to contribute \$233,000 to its plans in 2008. As of September 30, 2008, \$135,000 has been contributed to the plans.

(4) Comprehensive Income (Loss)

Accounting principles generally accepted in the United States of America, require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, and gains and losses, prior service costs and transition assets or obligations for defined benefit pension and postretirement plans are reported as a separate component of the shareholders' equity section of the consolidated statements of condition, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income (loss) and related tax effects for the three and nine months ended September 30, are as follows:

	For the three months ended September 30,		For the nine months ended September 30,	
(In thousands)	2008	2007	2008	2007
Unrealized holding gains (losses) on securities available for sale:				

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Unrealized holding (losses) gains arising during the period	\$	(952)	\$	516	\$	(2,678)	\$	206
Reclassification adjustment for losses (gains) included in net income		1,808		(111)		2,150		(108)
Net unrealized gains (losses) on securities available for sale		856		405		(528)		98
Defined benefit pension and postretirement plans:								
Reclassification adjustment for amortization of benefit plans'

Other comprehensive income (loss)	\$	527	\$	243	\$	(279)	\$	59

- 9 -

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

The components of other comprehensive income, net of related tax effects, at September 30, 2008 and December 31, 2007 are as follows:

(In thousands)	September 30, 2008	December 31, 2007
Unrealized losses on securities available for sale (net of tax benefit 2008 - \$653; 2007 - \$441)	\$ (978)	\$ (662)
Net pension losses and past service liability (net of tax benefit 2008 - \$468; 2007 - \$495)	(703)	(742)
Net postretirement losses and past service liability (net of tax benefit 2008 - \$29; 2007 - \$36)	(43)	(54)
	\$ (1,724)	\$ (1,458)

(5) Guarantees

The Company does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit written are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Company generally holds collateral and/or personal guarantees supporting these commitments. The Company had \$1.8 million of standby letters of credit as of September 30, 2008. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The current amount of the liability as of September 30, 2008, for guarantees under standby letters of credit issued is not material.

(6) Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, ("SFAS 157") which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. SFAS 157 applies to other accounting pronouncements that require or permit fair value measurements. SFAS 157 establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard became effective for the Company January 1, 2008, including interim periods. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-2, "Effective Date of FASB Statement No. 157." This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to January 1, 2009. This delay relates to non-financial assets and liabilities that are not measured at fair value on an ongoing basis, but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

In October 2008, the FASB issued FSP SFAS No. 157-3, "Determining the Fair Value of a Financial Asset When the Market for that Asset is Not Active" (FSP 157-3), to clarify the application of the provisions of SFAS 157 in an inactive market and how an entity would determine fair value in an inactive market. FSP 157-3 is effective immediately and applies to our September 30, 2008 consolidated financial statements. The application of the provisions of FSP 157-3 did not materially affect the results of operations or financial condition as of and for the period ended September 30, 2008.

SFAS 157 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while

unobservable inputs reflect our market assumptions. In accordance with SFAS 157, these two types of inputs have created the following fair value hierarchy:

- Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets, that the entity has the ability to access as of the measurement date.

- 10 -

Table of Contents

- Level 2 – Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable.

The Company used the following methods and significant assumptions to estimate fair value:

Investment securities: The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1) or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for specific securities but rather by relying on the securities relationship to other benchmark quoted securities (Level 2).

Impaired loans: Impaired loans are those that are accounted for under SFAS 114, Accounting by Creditors for Impairment of a Loan, in which the Company has measured impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third party appraisals of the properties, or discounted cash flows based upon expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. The fair value consists of loan balances less their valuation allowances as determined under SFAS 114.

Assets and liabilities measured at fair value on a recurring basis, are summarized below:

		Fair Value Measurements, Using		
		Quoted Prices In Active Markets For Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
(In thousands)	September 30, 2008	(Level 1)	(Level 2)	(Level 3)
Assets:				
Investment securities available for sale:	\$75,080	\$ -	\$75,080	\$ -

Changes in the fair value of available-for-sale securities are recorded on the balance sheet under accumulated-other-comprehensive loss, while gains and losses from sales and impairment losses are recognized in income.

From time to time, certain assets may be recorded at fair value on a non-recurring basis. These non-recurring fair value adjustments typically are a result of the application of lower of cost or market accounting or a write-down occurring during the period.

Assets and liabilities measured at fair value on a nonrecurring basis, are summarized below:

		Fair Value Measurements, Using		
		Quoted Prices In Active Markets For Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
(In thousands)	September 30, 2008	(Level 1)	(Level 2)	(Level 3)
Assets:				
Impaired loans:	\$2,774	\$ -	\$ -	\$2,774

Impaired loans, which are measured for impairment using the fair value of the collateral for collateral dependent loans, are recorded net of a valuation allowance of \$145,000. There was no additional provision for loan losses resulting from loan impairment during the nine months ended September 30, 2008.

(7) New Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115 (SFAS 159). This standard permits an entity with an option to choose to measure selected financial assets and liabilities at fair value. Most of the provisions in SFAS 159 are elective; however, the amendment to SFAS 115, Accounting for Certain Investments in Debt and Equity Securities, applies to all entities with available-for-sale and trading securities. The FASB's stated objective in issuing this standard is as follows: "to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions." The fair value option established by SFAS 159 permits all entities to choose to measure eligible items at fair value at specified election dates. SFAS 159 is effective for the Company as of January 1, 2008. The Company did not elect the fair value option for any financial assets or financial liabilities as of January 1, 2008.

In December 2007, the FASB issued Statement No. 141 (R), Business Combinations (SFAS 141R). This Statement establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The Statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance will become effective for the Company January 1, 2009. This pronouncement will impact the Company's accounting for business combinations completed beginning January 1, 2009.

In December 2007, the FASB issued Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51. This Statement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The guidance will become effective for the Company January 1, 2009. The Company does not expect the adoption of SFAS No. 160 to have a material impact on its consolidated financial statements.

Staff Accounting Bulletin No. 109 (SAB 109), "Written Loan Commitments Recorded at Fair Value Through Earnings" expresses the views of the staff regarding written loan commitments that are accounted for at fair value through earnings under generally accepted accounting principles. To make the staff's views consistent with current authoritative accounting guidance, the SAB revises and rescinds portions of SAB No. 105, "Application of Accounting Principles to Loan Commitments." Specifically, the SAB revises the SEC staff's views on incorporating expected net future cash flows related to loan servicing activities in the fair value measurement of a written loan commitment. The SAB retains the staff's views on incorporating expected net future cash flows related to internally-developed intangible assets in the fair value measurement of a written loan commitment. The staff expects registrants to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The adoption of SAB 109 did not have a material impact on the Company's financial statements.

In February 2008, the FASB issued a FASB Staff Position (FSP) FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions." This FSP addresses the issue of whether or not these transactions should be viewed as two separate transactions or as one "linked" transaction. The FSP includes a "rebuttable presumption" that presumes linkage of the two transactions unless the presumption can be overcome by meeting certain criteria. The FSP will be effective for fiscal years beginning after November 15, 2008 and will apply only to original transfers made after that date; early adoption will not be allowed. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In March 2008, the FASB issued Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contained within derivatives. SFAS 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 have been applied, and the impact that hedges have on an entity's financial position, financial performance, and cash flows. SFAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

Table of Contents

In May 2008, the FASB issued SFAS No. 162 “The Hierarchy of Generally Accepted Accounting Principles”, (SFAS 162). The purpose of SFAS 162 is to improve financial reporting by providing a consistent framework for determining what accounting principles should be applied when preparing GAAP financial statements. The FASB believes that issuing the GAAP hierarchy as a FASB standard, recategorizing the existing GAAP hierarchy into two levels of accounting literature (authoritative and non-authoritative), and elevating the conceptual framework within the GAAP hierarchy are key objectives of achieving the FASB’s goal of improving the quality of accounting standards and the standard-setting process. SFAS 162 is effective 60 days following the SEC’s approval of Public Company Accounting Oversight Board (“PCAOB”) amendment to AU Section 411. The Company’s adoption of SFAS 162 is not expected to have a material impact on its consolidated financial condition or results of operations.

In April 2008, the FASB issued FSP FAS 142-3, “Determination of the Useful Life of Intangible Assets.” This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, Goodwill and Other Intangible Assets (SFAS 142). The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141R, and other GAAP. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is prohibited. The Company does not expect this pronouncement will have a material impact on its consolidated financial statements.

In May 2008, the FASB issued FSP APB 14-1, “Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)” which clarifies the accounting for convertible debt instruments that may be settled in cash (including partial cash settlement) upon conversion. The FSP requires issuers to account separately for the liability and equity components of certain convertible debt instruments in a manner that reflects the issuer’s nonconvertible debt borrowing rate when interest cost is recognized. The FSP requires bifurcation of a component of the debt, classification of that component in equity and the accretion of the resulting discount on the debt to be recognized as part of interest expense. The FSP requires retrospective application to the terms of instruments as they existed for all periods presented. The FSP is effective for fiscal years beginning after December 15, 2008, and interim periods within those years. Early adoption is not permitted. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, “Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities.” This FSP clarifies that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders. Awards of this nature are considered participating securities and the two-class method of computing basic and diluted earnings per share must be applied. This FSP is effective for fiscal years beginning after December 15, 2008. The Company does not expect this pronouncement will have a material impact on its consolidated financial statements.

In June 2008, the FASB ratified EITF Issue No. 07-5, “Determining Whether an Instrument (or an Embedded Feature) Is Indexed to an Entity’s Own Stock” (EITF 07-5). EITF 07-5 provides that an entity should use a two step approach to evaluate whether an entity-linked financial instrument (or embedded feature) is indexed to its own stock, including evaluating the instrument’s contingent exercise and settlement provisions. It also clarifies the impact of foreign currency denominated strike prices and market-based employee stock option valuation instruments on the evaluation. EITF 07-5 is effective for fiscal years beginning after December 15, 2008. The Company does not expect this pronouncement will have a material impact on its consolidated financial statements.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

General

Throughout Management's Discussion and Analysis ("MD&A") the term "the Company", refers to the consolidated entity of Pathfinder Bancorp, Inc. Pathfinder Bank and Pathfinder Statutory Trust I are wholly owned subsidiaries of Pathfinder Bancorp, Inc., however, Pathfinder Statutory Trust I is not consolidated for reporting purposes. Pathfinder Commercial Bank, Pathfinder REIT, Inc. and Whispering Oaks Development Corp. represent wholly owned subsidiaries of Pathfinder Bank. At September 30, 2008, Pathfinder Bancorp, M.H.C, the Company's mutual holding company parent, whose activities are not included in the MD&A, held 63.7% of the Company's outstanding common stock and the public held 36.3%.

The following discussion reviews the Company's financial condition at September 30, 2008 and the results of operations for the three months and nine months ended September 30, 2008.

Statement Regarding Forward-Looking Statements

This Quarterly Report contains certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties, including, among other things, changes in economic conditions in the Company's market area, changes in policies by regulatory agencies, fluctuations in interest rates, demand for loans in the Company's market areas and competition, that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company wishes to advise readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements.

The Company does not undertake, and specifically declines any obligation, to publicly release the results of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Statement Regarding Non-GAAP Financial Measures

This release contains supplemental financial information determined by methods other than in accordance with Accounting Principles Generally Accepted in the United States of America ("GAAP"). The Company's management believes that such non-GAAP financial measures are useful to management and investors as it enhances their ability to evaluate and compare the Company's operating results from period to period in a meaningful manner, as operating results excluding other than temporary impairment charges on its investment security holdings are essential in understanding the financial performance of the Company, and is more representative of the basis that management utilizes to monitor financial performance. Readers are cautioned that non-GAAP measures should not be considered as an alternative to any measure of performance as promulgated under GAAP, and should consider the impairment charges recorded during 2008 in assessing the Company's performance. Non-GAAP measures have limitations as analytical tools, and investors should not consider them in isolation or as a substitute for analyzing the Company's performance under GAAP, nor are they necessarily comparable to non-GAAP measures presented by other companies.

Application of Critical Accounting Policies

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and follow practices within the banking industry. Application of these

principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and information used to record valuation adjustments for certain assets and liabilities are based on quoted market prices or are provided by other third-party sources, when available. When third party information is not available, valuation adjustments are estimated in good faith by management.

Table of Contents

The most significant accounting policies followed by the Company are presented in Note 1 to the consolidated financial statements included in the 2007 Annual Report on Form 10-K ("the Consolidated Financial Statements"). Beginning with its 2007 Annual Report, the Company has elected to file its Exchange Act reports under the rules and regulations applicable to smaller reporting companies.

These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the consolidated financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan losses, the evaluation of investment securities for other than temporary impairment, and accounting for deferred income taxes to be the accounting areas that require the most subjective and complex judgments, and, as such, could be the most subject to revision as new information becomes available.

The allowance for loan losses represents management's estimate of probable loan losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on the consolidated statement of condition. Note 1 to the Consolidated Financial Statements describes the methodology used to determine the allowance for loan losses, and a discussion of the factors driving changes in the amount of the allowance for loan losses is included in this report.

The Company carries all of its investments at fair value with any unrealized gains or losses reported net of tax as an adjustment to shareholders' equity, except for security impairment losses, which are charged to earnings. The Company's ability to fully realize the value of its investments in various securities, including corporate debt securities, is dependent on the underlying creditworthiness of the issuing organization. In evaluating the security portfolio for other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Based on management's assessments during the nine months ended September 30, 2008, the Company held positions in a bond and two mutual funds whose fair value declines were expected to be other than temporary. As a result of these determinations, other-than-temporary impairment charges of \$2,176,000 relating to the Company's holdings in these securities were recorded. These charges relate to Company holdings in a senior unsecured bond issued by Lehman Brothers Holdings, Inc., a position in the AMF Large Cap Equity Fund and its holdings in the AMF Ultra Short Mortgage Fund. The securities' value declines are the result of a corporate bankruptcy filing by the bond issuer, weakness in the trading market of the underlying securities and a deterioration in the credit quality of a portion of one mutual fund's underlying private label mortgage-backed security holdings.

Deferred income tax assets and liabilities are determined using the liability method. Under this method, the net deferred tax asset or liability is recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as net operating and capital losses carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period that includes the enactment date. To the extent that current available evidence about the future raises doubt about the likelihood of a deferred tax asset being realized, a valuation allowance is established. The judgment about the level of future taxable income, including that which is considered capital, is inherently subjective and is reviewed on a continual basis as regulatory and business factors change. A valuation allowance of \$212,000 was established during the three and nine months ended September 30, 2008, as management believes it may not generate sufficient

capital gains to offset its capital loss carry forward. The Company's effective tax rate differs from the statutory rate due to non-taxable investment securities, bank owned life insurance offset by the valuation allowance established on the capital loss carry forwards.

- 15 -

Table of Contents

Overview

The Company's net income is primarily dependent on its net interest income, which is the difference between interest income earned on its investments in mortgage loans, investment securities and other loans, and its cost of funds consisting of interest accrued on deposits and borrowed funds. The Company's net income is also affected by its provision for loan losses, as well as by the amount of other income, including income from fees and service charges on deposit accounts, net gains and losses on sales and the impairment of securities, loans and foreclosed real estate, and other expenses such as salaries and employee benefits, building occupancy and equipment costs, data processing and income taxes. Earnings of the Company also are affected significantly by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory authorities, which events are beyond the control of the Company. In particular, the general level of market interest rates which tend to be highly cyclical have a significant impact on our earnings.

The Company reported a net loss of \$838,000, or \$0.34 per basic and diluted share, for the three months ended September 30, 2008, as compared to net income of \$306,000, or \$0.12 per basic and diluted share, for the same period in 2007. For the nine months ended September 30, 2008, the Company reported a net loss of \$206,000, or \$0.08 per basic and diluted share as compared to net income of \$637,000, or \$0.26 per basic and diluted share for the same period in 2007. The 2008 losses were the result of the Company recording impairment charges on investment security holdings totaling \$1.3 million, net of the related tax benefits of \$522,000, during the third quarter of 2008. In addition, during the second quarter of 2008, the Company recorded an investment security impairment charge of \$205,000, net of tax benefits of \$137,000. Core earnings, which represent earnings exclusive of investment portfolio other-than-temporary impairment losses, resulted in net income of \$474,000 or \$0.19 per diluted share for the three months ended September 30, 2008 and \$1.3 million, or \$0.53 per diluted share for the nine months ended September 30, 2008.

The following table reconciles the Company's net loss to core earnings, including per share figures, for the periods presented.

	For the three months ended September 30, 2008	For the nine months ended September 30, 2008
Net Loss	\$ (838,000)	\$ (206,000)
Other than temporary impairment charge - investments	1,834,000	2,176,000
Related tax benefit	(522,000) *	(659,000) *
Core earnings	\$ 474,000	\$ 1,311,000
Diluted (loss) earnings per share	\$ (0.34)	\$ (0.08)
Other than temporary impairment charge, net of tax	0.53	0.61
Core earnings, diluted earnings per share	\$ 0.19	\$ 0.53

*Net of a deferred tax asset valuation reserve of \$212,000 for the three month and nine month period, respectively.

Table of Contents

Results of Operations

The return on average assets and return on average shareholders' equity were (0.97)% and (15.65)%, respectively, for the three months ended September 30, 2008, compared with 0.39% and 5.80%, respectively, for the three months ended September 30, 2007. During the third quarter of 2008, when compared to the third quarter of 2007, net interest income increased \$628,000, and noninterest income before (losses) gains on sales and impairment of assets increased \$48,000. The increase in net interest income was offset by an increased provision for loan losses of \$115,000. Total noninterest income was negatively impacted by impairment charges of \$1,834,000 on available-for-sale securities. Noninterest expenses increased \$50,000.

Net Interest Income

Net interest income is the Company's primary source of operating income for payment of operating expenses and providing for loan losses. It is the amount by which interest earned on loans, interest-earning deposits and investment securities, exceeds the interest paid on deposits and other interest-bearing liabilities. Changes in net interest income and net interest margin result from the interaction between the volume and composition of interest-earning assets, interest-bearing liabilities, related yields and associated funding costs. The Company benefited from a steepening of the yield curve during 2008. This was in contrast to the flat and inverted yield curve that characterized the interest rate environment for most of 2007.

Net interest income, on a tax-equivalent basis, increased to \$2.8 million for the three months ended September 30, 2008, from \$2.2 million for the three months ended September 30, 2007. The Company's net interest margin for the third quarter of 2008 increased to 3.50% from 3.10% when compared to the same quarter in 2007. Recent actions by the Federal Reserve to reduce short-term interest rates have resulted in a positively sloped yield curve. Consequently, the Company's cost of funds in 2008 were lower than in 2007. This, combined with efforts to maintain the current levels of earning asset yields, has resulted in an expansion of the Company's net interest margin. The increase in net interest income reflects a decrease of 73 basis points in the average cost of interest bearing liabilities, which was partially offset by a decrease of 29 basis points in the average yield earned on earning assets for the three-month period ended September 30, 2008 as compared to the same period in 2007. Average interest-earning assets increased 14% to \$321.4 million for the three months ended September 30, 2008, as compared to \$282.5 million for the three months ended September 30, 2007. The increase in average earning assets is primarily attributable to a \$26.5 million increase in loans receivable, an \$11.5 million increase in average investment securities and an \$890,000 increase in interest earning deposits. Average interest-bearing liabilities increased \$33.9 million to \$294.5 million from \$260.6 million for the three months ended September 30, 2007. The increase in the average balance of interest-bearing liabilities resulted primarily from a \$26.8 million increase in borrowings and a \$7.1 million increase in average deposits. The increase in borrowings is primarily comprised of short and mid-term advances from the Federal Home Loan Bank of New York.

For the nine months ended September 30, 2008, net interest income, on a tax-equivalent basis, increased to \$7.9 million from \$6.5 million for the nine months ended September 30, 2007. Net interest margin increased 34 basis points, to 3.38% for the nine months ended September 30, 2008 from 3.04% for the nine months ended September 30, 2007. Average interest-earning assets increased 10% to \$313.2 million for the nine months ended September 30, 2008 as compared to \$284.6 million for the nine months ended September 30, 2007, and the yield on interest-earning assets decreased 22 basis points to 5.86% from 6.08% for the comparable period. The increase in average interest-earning assets was primarily attributable to a \$22.7 million increase in loans receivable and a \$7.0 million increase in investment securities, partially offset by a \$1.2 million decrease in interest earning deposits. Average interest-bearing liabilities increased \$24.7 million, but the cost of funds decreased 59 basis points to 2.70% for the nine months ended September 30, 2008, from 3.29% for the same period in 2007. The increase in the average balance of interest-bearing liabilities resulted primarily from a \$16.6 million, or 54.0%, increase in borrowings and an \$8.0 million, or 3.5%,

increase in average deposits.

Interest Income

Total interest income, on a tax-equivalent basis, for the quarter ended September 30, 2008, increased \$366,000, or 8.5%, to \$4.7 million from \$4.3 million for the quarter ended September 30, 2007.

- 17 -

Table of Contents

The average balance of loans increased \$26.5 million to \$237.4 million, with average yields decreasing 40 basis points to 6.35% during the third quarter of 2008. Average residential real estate loans increased \$13.7 million, or 11.5%, and experienced a decrease in the average yield to 5.70% from 5.82% in the comparable quarter of 2007. Average commercial real estate loans increased \$4.3 million, while the average yield on those loans decreased to 7.37% from 7.64% from the period a year earlier. Average commercial loans increased \$6.4 million and experienced a decrease in the average yield of 175 basis points, to 6.72% for the quarter ended September 30, 2008, from 8.47%, in the quarter ended September 30, 2007. The decrease in the average yield on commercial loans was the result of new commercial loan origination activity taking place at lower yields, variable rate loans pricing downwards, and the reversal of interest due on nonperforming commercial loans during the third quarter of 2008. Average consumer loans increased \$2.6 million, or 10.7%, while the average yield decreased by 86 basis points. The Company's municipal loan portfolio decreased \$545,000, or 17.2%, when comparing the third quarter of 2008 to the same period in 2007. The average tax-equivalent yield on the municipal loan portfolio decreased to 5.63% in the third quarter of 2008 from 6.55% for the same period in 2007.

Average investment securities (taxable and tax-exempt) for the quarter ended September 30, 2008, increased by \$11.5 million, with an increase in tax-equivalent interest income from investments of \$159,000, or 20.8%, when compared to the third quarter of 2007. The average tax-equivalent yield of the portfolio increased 17 basis points, to 4.46% from 4.29%. The increase in average investment securities was primarily due to the purchase of \$16.1 million of mortgage-backed securities that were acquired with excess liquidity resulting from retail deposit growth outpacing loan portfolio growth during the first six months of the year. The security activity was also a result of a pre-funding strategy whereby securities were acquired in advance of significant scheduled maturity activity anticipated over the next 9 to 12 months. These purchases were offset by the scheduled maturity of short-term investments that were acquired during the first quarter of 2007 in connection with the collateralization of increasing municipal deposit levels. In addition, the Company entered into a \$5 million leverage transaction whereby investment securities were purchased and used as collateral associated with a new borrowing arrangement with a third party. Thus, \$5 million of new long-term borrowings were used to fund the acquisition of \$5 million in security purchases.

Total interest income, on a tax-equivalent basis, for the nine months ended September 30, 2008 increased \$786,000, or 6%, when compared to the nine months ended September 30, 2007.

Average loans increased \$22.7 million, with average yields decreasing 35 basis points to 6.39% from 6.74% for the nine-month period ended September 30, 2008 when compared with the same period in 2007. Average residential real estate loans increased \$11.3 million, or 9.5%, and experienced a slight decrease in the average yield of 5 basis points from the comparable nine-month period ended September 30, 2007. Average commercial real estate loans increased \$4.8 million, while the average yield on those loans decreased to 7.38% from 7.71% from the period a year earlier. Average commercial loans increased \$3.3 million and experienced a decrease in the average yield of 173 basis points, to 6.75% for the nine months ended September 30, 2008, from 8.48%, for the nine months ended September 30, 2007. The decrease in the average yield on commercial loans was the result of new commercial loan origination activity taking place at lower yields, variable rate loans pricing downwards, and the reversal of interest due on nonperforming commercial loans during the second quarter of 2008. Average consumer loans increased \$3.6 million, or 16.3%, while the average yield decreased by 86 basis points. The Company's municipal loan portfolio decreased \$324,000 when comparing the first three quarters of 2008 to the same period in 2007. The average tax equivalent yield on the municipal loan portfolio increased to 6.49%, for the first three quarters of 2008, from 6.36% for the same period in 2007.

For the nine months ended September 30, 2008, tax-equivalent interest income from investment securities increased \$369,000, or 15.6%, compared to the same period in 2007. The average tax-equivalent yield of the portfolio increased 23 basis points, to 4.53% from 4.30%. Moreover, there was a \$7.0 million increase in the average balance of investment securities, reflecting the purchase of mortgage-backed securities previously mentioned.

Interest Expense

Total interest expense decreased \$269,000 for the three months ended September 30, 2008, compared to the same quarter in 2007, as the average cost of funds decreased 73 basis points to 2.55% in 2008 from 3.28% in 2007. Average money management accounts decreased \$327,000, combined with a 41 basis point reduction in the cost of funds. Average balances of savings accounts decreased \$1.5 million and the cost of these funds decreased 25 basis points. These decreases were offset by the increases noted in other deposit

types. The average balance of NOW accounts increased \$2.5 million and the average cost of such deposits decreased by 13 basis points compared with the same three-month period in 2007. Additionally, the average balance of money market demand accounts, for the three months ended September 30, 2008, increased \$6.2 million from the three-month average at September 30, 2007. The average cost of these funds decreased to 1.70% for the three months ended September 30, 2008 from 3.93% for the three months ended September 30, 2007. Average time deposits increased by \$251,000 while the average cost of time deposits decreased to 3.69% from 4.58% in 2007.

Interest expense on borrowings increased by 35.4%, from the prior three-month period as a result of \$26.8 million in additional borrowings used to fund loan growth not covered by slower deposit growth. The increase in the average balance of borrowings was partially offset by the reduction in its average cost of funds to 3.95% from 5.53% in 2007.

Total interest expense decreased \$669,000 for the nine months ended September 30, 2008, compared to the same period in 2007, as the average cost of funds decreased 59 basis points to 2.70% in 2008 from 3.29% in 2007. Average money management accounts decreased \$974,000, combined with a 30 basis point reduction in the average cost of funds. Average savings deposits also decreased by \$713,000 for the nine-month period. These decreases were offset by the increases noted in other deposit types. The average balance of NOW accounts increased \$1.7 million and the resulting increase in interest expense was offset by a 10 basis point reduction in the average cost of funds from the nine-month period in 2007. Additionally, the average balance of money market demand accounts, for the nine months ended September 30, 2008, increased \$6.0 million from the same period average at September 30, 2007. The average cost of money market demand accounts decreased to 2.06% from 4.09%. Average time deposits increased \$2.1 million from the average balance for the nine months ended September 30, 2007. The average cost of time deposits decreased to 3.9% from 4.51% in 2007.

Interest expense on borrowings increased 16.7% from the prior nine-month period. The reduction in the average cost of borrowings to 4.23% from 5.58% in 2007, was offset by an increase in average borrowings of \$16.6 million.

Provision for Loan Losses

Provision for loan losses increased \$115,000 and \$270,000 for the three-month and nine-month periods ended September 30, 2008 when compared to the same periods in 2007, respectively. The increased provision is reflective of a growing loan portfolio and one more heavily weighted to commercial term and commercial real estate, which have higher inherent risk characteristics than a traditional consumer real estate portfolio, as well as a general weakening in economic conditions. The Company's ratio of allowance for loan losses to period-end loans increased to 0.92% at September 30, 2008, as compared to 0.76% at December 31, 2007. Nonperforming loans to period end loans increased to 1.10% at September 30, 2008 from 0.71% at December 31, 2007. General delinquencies have risen above the lows experienced in recent years. While these current levels are not outside of the Bank's historic delinquency trends, the generally weak economic conditions nationally and the strain on consumer discretionary income, have caused management to carefully monitor and react to these trends by increasing the provision for loan losses, adhering to strict underwriting standards and carefully monitoring the performance of the loan portfolio. The increase in nonperforming loans is primarily comprised of a number of smaller commercial lending relationships. Management believes the financial strength of the individual borrowers, combined with the related value of any underlying collateral, will not result in any recorded loss beyond currently established reserves.

Noninterest Income

The Company's noninterest income is primarily comprised of fees on deposit account balances and transactions, loan servicing, commissions, and net gains (losses) on securities, loans and foreclosed real estate. The following table sets forth certain information on noninterest income for the periods indicated:

(In thousands)	Three Months Ended September 30,			
	2008	2007	Change	
Service charges on deposit accounts	\$ 397	\$ 366	\$ 31	8.5%
Earnings on bank owned life insurance	56	56	-	0.0%
Loan servicing fees	67	72	(5)	-6.9%
Debit card interchange fees	71	62	9	14.5%
Other charges, commissions and fees	127	114	13	11.4%
Noninterest income before (losses) gains on sales and impairment of assets	718	670	48	7.2%
Net (losses) gains on sales and impairment of investment securities	(1,808)	111	(1,919)	-100.0%
Net (losses) gains on sales of loans and foreclosed real estate	(85)	11	(96)	-100.0%
Total noninterest (loss) income	\$ (1,175)	\$ 792	\$ (1,967)	-248.4%

(In thousands)	Nine Months Ended September 30,			
	2008	2007	Change	
Service charges on deposit accounts	\$ 1,131	\$ 1,060	\$ 71	6.7%
Earnings on bank owned life insurance	179	169	10	5.9%
Loan servicing fees	218	186	32	17.2%
Debit card interchange fees	207	178	29	16.3%
Other charges, commissions and fees	334	317	17	5.4%
Noninterest income before (losses) gains on sales and impairment of assets	2,069	1,910	159	8.3%
Net (losses) gains on sales and impairment of investment securities	(2,150)	108	(2,258)	-100.0%
Net (losses) gains on sales of loans and foreclosed real estate	(79)	42	(121)	100.0%
Total noninterest (loss) income	\$ (160)	\$ 2,060	\$ (2,220)	-107.8%

For the three months ended September 30, 2008, noninterest income before (losses) gains on sales and impairment of assets increased \$48,000, or 7.2%, when compared with the three months ended September 30, 2007. The increase in service charges on deposit accounts was primarily attributable to an increase in both ATM fees and other miscellaneous fees charged to depositor accounts. The increase in other charges, commissions and fees was primarily due to an increase in fees associated with ATM surcharges and interchange income. The increase in net securities losses is a result of recording other-than-temporary impairment charges of \$1.8 million, as previously discussed. The increase in net losses on the sale of loans and foreclosed real estate is the result of selling three foreclosed properties at losses and the write down in value of two additional properties.

For the nine months ended September 30, 2008, noninterest income before (losses) gains on sales and impairment of assets increased \$159,000, or 8.3%, when compared with the nine months ended September 30, 2007. The majority of the increase in noninterest income before (losses) gains on sales and impairment of assets was comprised of an increase in service charges on deposit accounts, loan servicing fees and an increase in debit card interchange fees. The overall increase in service charges on deposit accounts was primarily attributable to an increase in the overall number of deposit accounts. The increase in loan servicing fees was from new loan charges for the discharge of collateral and forfeited rate-lock fees, which were implemented in late 2007 and early 2008. The increase in debit card interchange fees was due to an increase in issued Visa debit cards and an increase in their usage. The change in

losses on securities is attributable to the other-than-temporary impairment charges on available-for-sale securities, as previously discussed.

Noninterest Expense

The following table sets forth certain information on noninterest expense for the periods indicated:

(In thousands)	Three Months Ended September 30,			
	2008	2007	Change	
Salaries and employee benefits	\$ 1,284	\$ 1,263	\$ 21	1.7%
Building occupancy	331	305	26	8.5%
Data processing	335	339	(4)	-1.2%
Professional and other services	158	130	28	21.5%
Amortization of intangible assets	-	55	(55)	-100.0%
Other operating	354	320	34	10.6%
Total noninterest expense	\$ 2,462	\$ 2,412	\$ 50	2.1%

(In thousands)	Nine Months Ended September 30,			
	2008	2007	Change	
Salaries and employee benefits	\$ 3,863	\$ 3,764	\$ 99	2.6%
Building occupancy	1,009	935	74	7.9%
Data processing	974	1,033	(59)	-5.7%
Professional and other services	580	593	(13)	-2.2%
Amortization of intangible assets	-	166	(166)	-100.0%
Other operating	982	906	76	8.4%
Total noninterest expense	\$ 7,408	\$ 7,397	\$ 11	0.1%

Total noninterest expense increased \$50,000 for the three months ended September 30, 2008 when compared to the same period for 2007. An increase in salaries and employee benefits of \$21,000 was primarily due to merit based wage adjustments. Building occupancy expenses were \$26,000 higher than the comparable quarter of 2007 as a result of increases in both depreciation and equipment maintenance expenses. Professional and other services expense increased \$28,000 primarily from an increased number of advertising campaigns and investment management fees. Other operating expenses increased \$34,000 due to expenses related to other real estate owned and office supplies. These increases were offset by decreases in information technology and amortization expenses. Amortization expense decreased \$55,000 as core deposit intangibles, from a 2002 branch acquisition, became fully amortized in October 2007. Information technology expenses were \$4,000 lower than the comparable quarter of 2007 as a result of decreased depreciation.

Total noninterest expense increased \$11,000 for the nine months ended September 30, 2008 when compared to the same period for 2007. The increase in salaries and employee benefits was the result of normal merit increases and increased employee benefit costs. The \$74,000 increase in building occupancy expenses was primarily due to increases in property taxes, depreciation and equipment maintenance. Data processing expenses were \$59,000 lower than the comparable period in 2007 as a result of decreases in both depreciation and check processing charges. Professional and other services expense decreased \$13,000 primarily from the elimination of consulting fees related to the Sarbanes Oxley 404 review process, which were incurred in 2007, offset by new consulting relationships relating to product pricing and compensation evaluation. Amortization expense decreased \$166,000 as the previously mentioned core deposit intangibles became fully amortized in October 2007. The increase in other expenses was primarily the result of higher costs associated with foreclosed real estate properties.

During 2009, we anticipate that our noninterest expense will increase significantly as a result of higher FDIC deposit insurance premiums being assessed.

Income Tax Expense

The Company realized a \$288,000 and \$82,000 tax benefit for the three and nine months ended September 30, 2008, respectively. Income taxes decreased \$360,000 for the quarter ended September 30, 2008, as compared to the same period in 2007. For the nine-month period ended September 30, 2008 income taxes decreased \$230,000. The effective tax rate was

- 21 -

Table of Contents

28.5% (benefit) and 18.9% (expense) for the nine months ended September 30, 2008 and September 30, 2007, respectively. The decrease in income tax expense and the effective tax rate in 2008 compared to 2007, resulted from significant losses from investment impairment charges. The Company has reduced its tax rate from the statutory rate of 34% primarily through the ownership of tax-exempt investment securities, bank owned life insurance and other tax saving strategies, offset by a valuation allowance established on deferred tax assets relating to capital losses generated by the impairment charges.

As of September 30, 2008, management evaluated its deferred tax assets to determine if the benefit of the temporary differences would more likely than not be realized. Based on this evaluation, management concluded that a portion of the capital loss generated by the impairment charges on the mutual funds would most likely not be realized, as there were not sufficient capital gains to absorb the capital losses. Accordingly, the income tax benefit recorded for the three and nine months ended September 30, 2008 was reduced by \$212,000 to account for the valuation allowance recorded.

Changes in Financial Condition

Assets

Total assets increased approximately \$32.2 million, or 10%, to \$352.9 million at September 30, 2008, from \$320.7 million at December 31, 2007. The increase in total assets was primarily the result of an increase of \$10.1 million, or 15.5%, in investment securities, a \$19.9 million increase in net loans receivable and a \$1.5 million increase in cash and cash equivalents. Investment securities portfolio growth is the result of purchases of mortgage-backed securities, corporate bonds and a \$2.0 million certificate of deposit invested with a large money center financial institution. The loan portfolio increase primarily reflects small business commercial loan and residential real estate loan originations. The Company continues to transform its traditional thrift balance sheet toward that of a community bank with a more diverse mix of residential, consumer and commercial loans. The increase in cash and cash equivalents was primarily the result of higher month-end Federal Reserve check processing activity.

Based on management's assessment, at September 30, 2008, the Company held securities in which management determined that its decline in fair value was expected to be other-than-temporary. As a result of this determination, an other-than-temporary impairment charge of \$875,000 relating to the Company's \$1,000,000 holdings in a senior unsecured bond issued by Lehman Brothers Holdings Inc., which filed a Chapter 11 Bankruptcy petition on September 15, 2008, was recorded. In addition to this charge, the Company also recorded an other-than-temporary impairment charge of \$690,000 relating to its holdings in the AMF Large Cap Equity Fund and \$269,000 relating to its holdings in the AMF Ultra Short Mortgage Fund. At September 30, 2008, the total carrying value of the Company's remaining investment in the AMF Large Cap Equity Fund was approximately \$2,192,000. The carrying value of the AMF Ultra Short Mortgage Fund at September 30, 2008 was approximately \$2,804,000. It is possible that the Company will have to recognize future losses on these investments, absent improvement in the real estate and mortgage securities markets.

Management has reviewed the remainder of its loan and mortgage-backed securities portfolios and determined that, to the best of its knowledge, little or no exposure exists to sub-prime or other high-risk residential mortgages. The Company is not in the practice of investing in, or originating these types of investments or loans.

Liabilities

Total liabilities increased \$33.2 million, or 11.1%, to \$332.2 million at September 30, 2008, from \$299.0 million at December 31, 2007. Deposits increased \$13.7 million, or 5.4%, long-term borrowings increased \$15.4 million, and short-term borrowings increased \$3.4 million. The increase in deposits was the result of an increase of \$5.5 million in

municipal customer deposits, combined with an \$8.2 million increase in retail deposits. The municipal deposit increase was driven by the receipt of tax revenues by our municipal customers. The increase in retail deposits was primarily the result of increased business demand deposit and MMDA accounts.

Table of Contents

Loan and Asset Quality and Allowance for Loan Losses

The following table represents information concerning the aggregate amount of nonperforming assets:

(In thousands)	September 30, 2008	December 31, 2007	September 30, 2007
Nonaccrual loans:			
Commercial real estate and commercial	\$ 1,665	\$ 521	\$ 1,001
Consumer	43	150	143
Real estate - Mortgage	969	920	894
Total nonaccrual loans	2,677	1,591	2,038
Total non-performing loans	2,677	1,591	2,038
Foreclosed real estate	253	865	310
Total non-performing assets	\$ 2,930	\$ 2,456	\$ 2,348
Non-performing loans to total loans	1.10%	0.71%	0.94%
Non-performing assets to total assets	0.85%	0.77%	0.75%

Total non-performing loans increased 68% at September 30, 2008, when compared to December 31, 2007. The increase in total non-performing loans is primarily the result of deteriorating national and regional general economic conditions; the increase is comprised of a number of smaller commercial lending relationships, which are being actively monitored. Management believes that the underlying collateral and associated guarantees, combined with the existing reserves provided, are adequate to cover potential losses that may occur from the remediation process.

The allowance for loan losses at September 30, 2008 and December 31, 2007 was \$2.2 million and \$1.7 million, or 0.92% and 0.76% of period end loans, respectively.

Capital

Shareholders' equity at September 30, 2008, was \$20.7 million as compared to \$21.7 million at December 31, 2007. The Company's retained earnings were reduced as the result of a net loss for the nine months ended September 30, 2008 of \$206,000, which was primarily due to the impact of impairment charges taken in the third quarter. Retained earnings were also reduced by cash dividends declared of \$602,000. Total capital was further reduced by unrealized holding losses, net of tax, on securities of \$210,000. The cumulative effect adjustment to reflect the change in measurement date under SFAS 158 and the amortization of the pension plan net losses and prior service liability and postretirement transition obligation netted to increase capital by \$3,000.

Risk-based capital provides the basis for which all banks are evaluated in terms of capital adequacy. Capital adequacy is evaluated primarily by the use of ratios which measure capital against total assets, as well as against total assets that are weighted based on defined risk characteristics. The Company's goal is to maintain a strong capital position, consistent with the risk profile of its subsidiary banks, which supports growth and expansion activities while at the same time exceeding regulatory standards. At September 30, 2008, Pathfinder Bank exceeded all regulatory required minimum capital ratios and continues to meet the regulatory definition of a "well-capitalized" institution, i.e. a leverage capital ratio exceeding 5%, a Tier 1 risk-based capital ratio exceeding 6% and a total risk-based capital ratio exceeding 10%.

The Bank's actual capital amounts and ratios as of September 30, 2008 and December 31, 2007 are presented in the following table.

Table of Contents

(Dollars in thousands)	Actual		Minimum For Capital Adequacy Purposes		Minimum To Be "Well Capitalized" Under Prompt Corrective Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of September 30, 2008:						
Total Core Capital (to Risk-Weighted Assets)	\$ 25,439	10.9%	\$ 18,598	8.0%	\$ 23,247	10.0%
Tier 1 Capital (to Risk-Weighted Assets)	\$ 23,197	10.0%	\$ 9,299	4.0%	\$ 13,948	6.0%
Tier 1 Capital (to Average Assets)	\$ 23,197	6.8%	\$ 13,702	4.0%	\$ 17,127	5.0%
As of December 31, 2007:						
Total Core Capital (to Risk-Weighted Assets)	\$ 25,447	12.2%	\$ 16,648	8.0%	\$ 20,810	10.0%
Tier 1 Capital (to Risk-Weighted Assets)	\$ 23,744	11.4%	\$ 8,324	4.0%	\$ 12,486	6.0%
Tier 1 Capital (to Average Assets)	\$ 23,744	7.7%	\$ 12,437	4.0%	\$ 15,548	5.0%

The board of directors and management are presently analyzing the potential merits of participating in the Capital Purchase Program (CPP) of the Treasury Department's Troubled Asset Relief Program (TARP). It is the general view of the board and management that in the present national economic risk environment, enhancing the Bank's capital ratios is both prudent, given the current climate, and potentially opportunistic as we move into the next business cycle. Additionally, any increase to capital will continue to support the bank's lending activities to individuals, families, and businesses in our community.

Liquidity

Liquidity management involves the Company's ability to generate cash or otherwise obtain funds at reasonable rates to support asset growth, meet deposit withdrawals, maintain reserve requirements, and otherwise operate the Company on an ongoing basis. The Company's primary sources of funds are deposits, borrowed funds, amortization and prepayment of loans and maturities of investment securities and other short-term investments, and earnings and funds provided from operations. While scheduled principal repayments on loans are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company manages the pricing of deposits to maintain a desired deposit balance. In addition, the Company invests excess funds in short-term interest-earning and other assets, which provide liquidity to meet lending requirements.

The Company's liquidity has been enhanced by its membership in the Federal Home Loan Bank of New York, whose competitive advance programs and lines of credit provide the Company with a safe, reliable and convenient source of funds. A significant decrease in deposits in the future could result in the Company having to seek other sources of funds for liquidity purposes. Such sources could include, but are not limited to, additional borrowings, trust preferred security offerings, brokered deposits, negotiated time deposits, the sale of "available-for-sale" investment securities, the sale of securitized loans, or the sale of whole loans. Such actions could result in higher interest expense costs and/or losses on the sale of securities or loans.

The Company has a number of existing credit facilities available to it. The combined aggregate amount of credit available in connection with its existing facilities is approximately \$75.0 million at September 30, 2008.

The Asset Liability Management Committee of the Company is responsible for implementing the policies and guidelines for the maintenance of prudent levels of liquidity. As of September 30, 2008, management reported to the Board of Directors that the Company is in compliance with its liquidity policy guidelines.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

A smaller reporting company is not required to provide the information relating to this item.

Item 4T - Controls and Procedures

Under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. There has been no change in the Company's internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonable likely to materially affect, the Company's internal control over financial reporting.
