### EXPLANATORY NOTE

This Amendment No. 2 on Form 10-K/A for the fiscal year ended December 31, 2002 is being filed to include revised financial statements of Four Star Oil & Gas Company and ISAB Energy S.r.l., equity affiliates of Edison Mission Energy, included in Part IV, Item 15 of Edison Mission Energy's annual report on Form 10-K for the fiscal year ended December 31, 2002 filed on March 28, 2003 and Edison Mission Energy's annual report on Form 10-K/A Amendment No. 1 filed on June 30, 2003, respectively.

The financial statements with respect to Four Star Oil & Gas Company are being filed solely for the purpose of revising the "Future production and development costs," which are included in the standardized measure information in Note 11 to the financial statements.

The financial statements with respect to ISAB Energy S.r.l. are being filed for the purpose of revising the reconciliation of net income (loss) and net equity (deficit) for each of the three years ended December 31, 2002 included in Note 9 "Reconciliation to Generally Accepted Accounting Principles in the United States" to the financial statements, which provides for a reconciliation of net income (loss) and net equity (deficit) from Italian generally accepted accounting principles to United States generally accepted accounting principles. The revision in the reconciliation is the result of a clerical error in the computation of the net deferred tax asset at the end of each year for the three years ended December 31, 2002.

This Amendment No 2 does not update any other disclosures to reflect developments since the original date of filing.

The aforementioned revisions to the financial statements of Four Star Oil & Gas Company and ISAB Energy S.r.l. had no impact on Edison Mission Energy's consolidated financial statements included in Part II, Item 8 of Edison Mission Energy's annual report on Form 10-K for the fiscal year ended December 31, 2002 filed with the Securities and Exchange Commission on March 28, 2003. Unaffected items, including Edison Mission Energy's consolidated financial statements, have not been repeated in this Amendment No 2.

### PART IV

#### ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

- (a)  
(2) List of Financial Statement Schedules

The following items are filed as a part of this report pursuant to Item 14(d) of Form 10-K:

Page

---

Investment in Unconsolidated Affiliates Financial Statements:

Four Star Oil & Gas Company Consolidated Financial Statements as of December 31, 2002, 2001 and 2000	4
ISAB Energy S.r.l. Financial Statements as of December 31, 2002, 2001 and 2000	19

(d) Financial Statement Schedules

The financial statements referred to in (a)(2) above represent the entities that are Investments in Unconsolidated Affiliates, which were 50% or less owned by Edison Mission Energy and met the requirements of Rule 3-09 of Regulation S-X. The statements with respect to ISAB Energy S.r.l. are prepared in accordance with generally accepted accounting principles in Italy which differ from generally accepted accounting principles in the United States. See Note 9 to the financial statements on page 64.

**REPORT OF INDEPENDENT ACCOUNTANTS**

To the Stockholders of  
Four Star Oil & Gas Company

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, stockholders' equity and cash flows present fairly, in all material respects, the financial position of Four Star Oil & Gas Company (the Company) and its subsidiary at December 31, 2002 and 2001 and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion. The financial statements of the Company as of December 31, 2000 and for the year then ended were audited by other independent accountants who have ceased operations. Those independent accountants expressed an unqualified opinion on those statements in their report dated March 2, 2001.

As described in Note 3 to the financial statements, the Company has significant transactions with affiliated companies. Because of these relationships, it is possible that the terms of these transactions are not the same as those that would result from transactions among wholly-unrelated parties.

**FOUR STAR OIL & GAS COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**DECEMBER 31, 2002 AND 2001**

**1. Basis of Presentation and Description of the Company**

Four Star Oil and Gas Company is a subsidiary of ChevronTexaco that explores for and produces crude oil, natural gas and natural gas liquids. The use in this report of the term "Texaco" refers solely to Texaco Inc., a Delaware corporation, and its consolidated subsidiaries or to subsidiaries and affiliates either individually or collectively.

In 1984, Texaco acquired all of the outstanding common stock of Four Star Oil & Gas Company (Four Star or the Company) for \$10.2 billion. At the time of acquisition, Four Star was an integrated petroleum and natural gas company involved in the exploration for and production, transportation, refining and marketing of crude oil and petroleum products. The acquisition was accounted for as a purchase, and the Four Star assets and liabilities were recorded at fair market value. In 1989, Texaco sold 20 percent of its interest in Four Star to Edison Mission Energy (Mission Energy). Four Star was an 80 percent owned subsidiary of Texaco from December 31, 1989 through December 31, 1991. As a result of a series of stock transactions occurring between January 1, 1992 and December 31, 2002, Texaco's ownership interest in Four Star was

reduced to 71%.

In October 2001, the merger between Texaco and Chevron Corporation was approved and ChevronTexaco Corporation (ChevronTexaco) became the ultimate parent of Texaco Inc. Texaco Inc.'s investment in Four Star was transferred to ChevronTexaco Global Energy Inc. as part of a restructuring agreement dated November 1, 2001. Texaco Exploration and Production Inc. (TEPI), a wholly-owned subsidiary of Texaco Inc., was absorbed into Chevron U.S.A. (CUSA), a wholly-owned subsidiary of ChevronTexaco, as part of a legal restructuring in May 2002. CUSA operates and manages the majority of Four Star's operations under the terms of a service agreement.

As of December 31, 2002 and 2001, the ownership interests in Four Star were as follows:

	<u>2002</u>	<u>2001</u>
Chevron U.S.A. (CUSA)	36.6%	36.6%
ChevronTexaco Global Energy Inc. (CTGEI)	24.3%	24.3%
Edison Mission Energy (Mission Energy)	19.0%	19.0%
Four Star Oil & Gas Holdings Company (owned jointly by CTGEI and Mission Energy)	20.1%	20.1%
	<u>100.0%</u>	<u>100.0%</u>

## 2. Significant Accounting Policies

### Principles of Consolidation

The consolidated financial statements include the accounts of Four Star Oil & Gas Company (Four Star or the Company) and Mission Energy Methane, a wholly-owned subsidiary of Four Star. All significant intercompany accounts and transactions have been eliminated in consolidation.

### Revenue Recognition

Revenues associated with sales of crude oil, natural gas and other sources are recorded when title passes to the customer, net of royalties, discounts and allowances, as applicable. Revenues from natural gas production from properties in which ChevronTexaco has an interest with other producers are generally recognized on the basis of delivery (sales method).

### Cash and Cash Equivalents

Highly liquid investments with a maturity of three months or less when purchased are generally considered to be cash equivalents.

### Properties, Plant and Equipment and Depreciation, Depletion and Amortization

The Company follows the successful efforts method of accounting for its oil and gas exploration and production operations.

Lease acquisition costs related to properties held for oil and gas production are capitalized when incurred. Unproved properties with acquisition costs which are individually significant are assessed on a property-by-property basis, and a loss is recognized, by provision of a valuation allowance, when the assessment indicates an impairment in value. Unproved properties with acquisition costs which are not individually significant are generally aggregated, and the portion of such costs estimated to be nonproductive, based on historical experience, is amortized on an average holding period basis.

Exploratory costs, excluding the costs of exploratory wells, are charged to expense as incurred. Costs of drilling exploratory wells, including stratigraphic test wells, are capitalized pending determination of whether the wells have found proved reserves which justify commercial development. If such reserves are not found, the drilling costs are charged to exploratory expenses. Intangible drilling costs applicable to productive wells and to development dry holes, as well as tangible equipment costs related to the development of oil and gas reserves, are capitalized.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The costs of productive leaseholds and other capitalized costs related to production activities, including tangible and intangible costs, are amortized principally by field on the unit-of-production basis by applying the ratio of produced oil and gas to estimated recoverable total proved oil and gas reserves. Estimated future restoration and abandonment costs are taken into account in determining amortization and depreciation rates.

Depreciation of properties, plant and equipment related to operations other than production is provided using the straight-line method, with depreciation rates based upon estimated useful lives applied to the cost of each class of property. The useful lives of such assets range from 3 to 20 years.

Normal maintenance and repairs of properties, plant and equipment are charged to expense as incurred. Renewals, betterments and major repairs that materially extend the life of properties are capitalized, and the assets replaced, if any, are retired.

When fixed capital assets representing complete units of property are disposed of, any profit or loss after accumulated depreciation and amortization is credited or charged to income.

Long-lived assets, including proved oil and gas properties, are assessed for possible impairment by comparing their carrying values with the undiscounted future net before-tax cash flows. Events which can trigger assessments for possible impairments include write-downs of proved reserves based on field performance, significant decreases in the market value of an asset, and significant change in an asset. Impaired assets are written down to their estimated fair values, generally their discounted future net before-tax cash flows. As a result, the Company recorded impairment charges of \$7 million, \$7 million and \$25 million in 2002, 2001 and 2000, respectively, due to downward reserve revisions.

### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant estimates pertain to proved oil, NGL and gas reserve volumes and plug and abandonment costs as well as estimates relating to the calculation of impairments under SFAS No. 144. Actual results could differ from those estimates.

10

---

### Reclassifications

Certain previously reported amounts have been reclassified to conform to current-year presentation. Such reclassification had no effect on reported net income or shareholders' equity.

### Income Taxes

Deferred taxes result from temporary differences in the recognition of revenues and expenses for tax and financial reporting purposes and are calculated based upon cumulative book and tax differences in the balance sheet.

### Derivatives

The adoption of SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," did not have a material effect on the Company's financial position as the Company has no derivatives as of December 31, 2002 and 2001, except for its physical sale contracts, which qualify as normal sales. The Company adopted SFAS 133 as of January 1, 2001.

### New Accounting Pronouncements

In June 2001, the FASB issued Statement No. 143, "Accounting for Asset Retirement obligations" (SFAS 143). This new standard was adopted effective January 1, 2003, and applies to legal obligations associated with the retirement of tangible long-lived assets. Adoption of SFAS 143 primarily affects the Company's accounting for oil and gas producing assets. SFAS 143 differs in several significant respects from current accounting under SFAS 19, "Financial Accounting and Reporting by Oil and Gas Producing Companies." Adoption of SFAS 143 affects future accounting and reporting of the assets, liabilities and expenses related to these obligations. In the first quarter 2003, the Company will report an after-tax loss of approximately \$9.2 million for the cumulative effect of this change in accounting principle. The effect of adoption will also include an increase of total assets and total liabilities of \$16.8 million and \$26 million, respectively. Besides the cumulative-effect

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

adjustment, the effect of the new accounting standard on net income in 2003 is not expected to be materially different from what the result would have been under SFAS 19 accounting.

In April 2002, the FASB issued SFAS No. 145, *Recession of FASB Statement No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. Application of the statement will be required in 2003. The Company does not expect adoption of SFAS No. 145 to have a significant impact on its financial statements.

In July 2002, the FASB issued SFAS No. 146, *Accounting for Exit or Disposal Activities*. SFAS No. 146 address the recognition, measurement and reporting costs associated with exit and disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002.

In December 2002, the FASB issued Interpretation No. 45 (FIN No. 45), *Guarantor's Accounting and Disclosure Requirements*. FIN No. 45 expands required disclosures for certain types of guarantees and recognition of a liability at fair value of such guarantees at the time of issuance. The disclosure requirements are effective for the Company's December 31, 2002 financial statements, while the fair value accounting requirements apply prospectively to guarantees issued or modified after December 31, 2002. The Company does not expect FIN No. 45 to have a significant effect on its financial statements.

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities" (FIN No. 46). FIN No. 46 amended ARB 51, "Consolidated Financial Statements," and established standards for determining under what circumstances a variable interest entity (VIE) should be consolidated with its primary beneficiary. FIN No. 46 also requires disclosures about VIEs that the Company is not required to consolidate but in which it has a significant variable interest. The Company

11

---

does not expect that adoption of FIN No. 46 will have a significant impact on the results of operations, financial position or liquidity.

### Reclassifications

Certain prior year amounts have been reclassified to conform with current year presentation.

### 3. Related Party Transactions

Four Star has various business transactions with ChevronTexaco and other ChevronTexaco subsidiaries and affiliates. These transactions principally involve sales by Four Star of crude oil, natural gas and natural gas liquids. In addition, ChevronTexaco charges Four Star for management, professional, technical and administrative services, as well as direct charges for exploration and production-related activities.

Effective December 1, 1999, Four Star entered into a service agreement with TEPI for management, administrative, professional and technical services through November 1, 2004. During 2001, Four Star paid TEPI a monthly fixed fee of \$579,785 through November 30, 2001. Four Star paid TEPI a monthly fixed fee of \$597,634 from December 1, 2001 through April 30, 2002, and CUSA a monthly fixed fee of \$597,634 from May 1, 2002 through November 30, 2002. Beginning December 1, 2002, the rate was adjusted to \$603,034 and this rate will remain in effect until November 30, 2003. An aggregate amount of \$7.2 million, \$7.0 million and \$6.8 million in service fees was included as a component of general and administrative and other operating expenses in the accompanying consolidated statement of income for the years ended December 31, 2002, 2001 and 2000, respectively.

In addition, Four Star paid TEPI a monthly unit fee of \$645,015 during the period from December 1, 2000 to November 30, 2001. On December 1, 2001, Four Star commenced payment of a monthly unit fee of \$607,041. On May 1, 2002, TEPI was absorbed into CUSA as part of a legal restructuring agreement dated May 1, 2002. Total unit fees of \$6.8 million, \$7.7 million and \$7.3 million are included as a component of general and administrative and other operating expenses in the accompanying consolidated statements of income for the years ended December 31, 2002, 2001 and 2000, respectively. The unit fee is adjusted to actual production within 90 days after contract period ending November 30, 2002.

Pursuant to the contractual agreement described in Note 10, certain tax benefits and liabilities are assumed by ChevronTexaco.

The following table summarizes sales to affiliates during 2002, 2001 and 2000. The Company makes no purchases from its affiliates.

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	2002	2001	2000
	(in millions)		
Dynergy	\$ 87.6	\$	\$
Texaco Natural Gas Inc.	70.6	252.2	214.7
CUSA	39.6		.8
Bridgeline LLC Texaco Pipeline			.5
Equilon Enterprises LLC(1)		46.3	70.7
<b>Total</b>	<b>\$ 197.8</b>	<b>\$ 298.5</b>	<b>\$ 286.7</b>

(1) Equilon Enterprise LLC was no longer considered as a related party to Four Star effective October 19, 2001.

12

#### 4. Properties, Plant and Equipment

In 2000, Four Star sold \$5.9 million of its properties for \$6.3 million, resulting in an approximate \$400,000 pretax gain on the sale. In 2002, Four Star purchased the San Juan LLC 1999 property for \$11.6 million.

#### 5. Note Payable to Affiliate

In September 1999, Four Star retired its loan facility with Chase Bank of Texas, N.A. and entered into a loan agreement with Texaco Inc. The outstanding balance on the loan agreement was \$169 million and \$239 million at December 31, 2002 and 2001. The loan bears interest at LIBOR plus one percent and matures on December 31, 2005. The interest rate was 2.4%, 3.4% and 7.0% at December 31, 2002, 2001 and 2000, respectively. Interest expense during 2002, 2001 and 1999, was \$7 million, \$13 million and \$18 million, respectively. Four Star pays Texaco Inc. an annual facility fee and administrative fee of \$50,000.

The Company's borrowing base is redetermined annually each September 30 as set forth in the Four Star Oil & Gas Credit Agreement dated September 30, 1999. If the outstanding aggregate principal amount of the loan, excluding the amount of any debt permitted by the loan agreement, exceeds the amount of the revised borrowing base, Four Star must repay such excess to Texaco Inc. in four equal quarterly installments. Throughout 2002 and 2001, Four Star's borrowing base exceeded the outstanding loan balance, thus no principal payments were due. As of December 31, 2002, the Company's borrowing base under the agreement was \$268 million.

Four Star elected to pre-pay \$70 million of the note on December 31, 2002. Four Star has the right, subject to certain conditions, to prepay the note in whole or in part prior to the maturity date.

#### 6. Concentration of Credit Risk

Substantially all of the Company's accounts receivable at December 31, 2002, result from sales to the Company's three largest customers, all of which are ChevronTexaco affiliates, as discussed in Note 3. The Company's credit policy and relatively short duration of receivables mitigate the risk of uncollected receivables. During each of the three years in the period ended December 31, 2002, the Company did not incur any credit losses on receivables.

#### 7. Income Taxes

The Company accounts for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes". Under SFAS No. 109, deferred income taxes are determined utilizing a liability approach. This method gives consideration to the future tax consequences associated with utilization of energy tax credits and differences between financial accounting and tax bases of assets and liabilities. Such differences relate mainly to depreciable and depletable properties, intangible drilling costs and nonproductive leases.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The composition of deferred tax assets and liabilities and the related tax effects at December 31, 2002, 2001 and 2000, were as follows (in millions):

	2002	2001	2000
Deferred tax assets related to energy tax credits	\$	\$	\$ 4
Deferred tax liabilities related to oil and gas properties	(54)	(57)	(58)
	\$	\$	\$
Net deferred tax liability	(54)	(57)	(54)
	\$	\$	\$

There are differences between income taxes computed using the statutory rate of 35 percent and the Company's effective income tax rates (29 percent in 2002, 29 percent in 2001 and 31 percent in

13

2000), primarily as a result of certain tax credits available to the Company. Reconciliations of income taxes computed using the statutory rate to the Company's effective tax rates are as follows (in millions):

	2002	2001	2000
Income taxes computed at the statutory rate	\$ 36	\$ 64	\$ 64
Section 29 tax credits	(7)	(7)	(8)
Other, net	2	(3)	
	\$	\$	\$
Provision for income taxes	31	54	56
	\$	\$	\$

### 8. Stockholders' Equity

In 1995, Four Star created four additional classes of stock: Class A common (voting), Class B common (voting), Class C common (nonvoting) and preferred (Class A preferred and Class B preferred).

In 1999, Texaco, TEPI, and Mission Energy entered into an agreement granting Mission Energy the option to purchase shares of Class A common stock or Class B common stock of Four Star (class determined by ChevronTexaco), provided that ChevronTexaco's aggregate ownership interest in the common stock at time of purchase shall not be reduced to less than 51 percent of all common stock outstanding at the time of purchase. The option expires on December 23, 2006. In 2001, the agreement was amended to replace Texaco with CTGEI. In 2002, TEPI was replaced by CUSA as part of a legal restructure agreement. As of December 31, 2002 and 2001, Mission Energy owned 23 percent of all voting common stock outstanding. Four Star Oil and Gas Holdings Company (owned jointly by CTGEI and Mission Energy) owned 26 percent of all voting common stock in the Company as of December 31, 2002.

Each share of Class A preferred stock is entitled to receive cumulative cash dividends of \$5,112 per share per annum, payable semiannually. Each share of Class B preferred stock is entitled to receive cumulative cash dividends of \$2,250 per annum, payable semiannually.

### 9. Fair Value of Financial Instruments

The Company's financial instruments consist of cash and cash equivalents, short-term receivables and payables and long-term debt. The carrying amounts of such instruments approximate their fair market values due to the highly liquid nature of the short-term instruments and the floating interest rates associated with the long-term debt, which reflect market rates.

### 10. Commitments and Contingencies

ChevronTexaco has assumed any and all liabilities of Four Star incurred or attributable to periods prior to January 1, 1990, for state and federal income, windfall profit ad valorem or franchise taxes, and legal proceedings. In addition, ChevronTexaco has assumed certain of the tax liabilities of Four Star arising from January 1, 1990, to March 1, 1990, attributable to Four Star's status as a member of the Texaco tax consolidated group.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

In the opinion of the Company, while it is impossible to ascertain the ultimate legal and financial liability with respect to the above or other contingent liabilities, including lawsuits, claims, guarantees, federal taxes and federal regulations, the aggregate amount of any such liability is not anticipated to be material in relation to the financial position, cash flows or results of operations of the Company.

### 11. Supplemental Information on Oil and Gas Producing Activities (Unaudited) Revised

The following unaudited information has been revised to correct the "Future production and development costs" included in Table VI-Standardized measure of discounted future cash flows related

14

to proved oil and gas reserves. The correction results in a change from the previously reported value of \$97 million, to the revised value of \$743 million. The revision also impacts the "Net changes in prices, development and production costs" included in Table VII-Changes in standardized measure of discounted future net cash flows from proved reserves.

In accordance with Statement of Financial Accounting Standards No. 69, "Disclosures About Oil and Gas Producing Activities" (FAS 69), this section provides supplemental information on oil and gas exploration and producing activities of the Company in seven separate tables. Tables I through IV provide historical cost information pertaining to costs incurred in exploration, property acquisitions and development; capitalized costs; and results of operations. Tables V through VII present information on the Company's estimated net proved reserve quantities, standardized measure of estimated discounted future net cash flows related to proved reserves, and changes in estimated discounted future net cash flows.

**Table I Costs incurred in exploration, property acquisitions and development(1)**

	2002	2001
	(millions of dollars)	
Exploration	\$ 2	\$
Property acquisitions	12	
Development	13	42
	\$ 27	\$ 42

(1) Includes cost incurred whether capitalized or expensed. Excludes support equipment expenditures.

**Table II Capitalized costs related to oil and gas producing activities**

	2002	2001
	(millions of dollars)	
Unproved properties	\$ 1	\$ 1
Proved properties and related producing assets	939	906
Other uncompleted projects	15	27
	955	934
Unproved properties valuation		1
Proved producing properties	662	618
Future abandonment and restoration	11	10

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>2002</u>	<u>2001</u>
Accumulated provisions	673	629
Net capitalized costs	\$ 282	\$ 305

15

**Table III Results of operations for oil and gas producing activities**

The Company's results of operations from oil and gas producing activities for the years 2002 and 2001 are shown in the following table. In accordance with FAS No. 69, income taxes in Table III are based on statutory tax rates, reflecting allowable deductions and tax credits. Interest income and expense are excluded from the results reported in Table III.

	<u>2002</u>	<u>2001</u>
	(millions of dollars)	
Revenues from net production:		
Sales	\$ 203	\$ 304
Total	203	304
Production expenses	(75)	(48)
Proved producing properties: depreciation, depletion and abandonment provision	(44)	(38)
Other income (expense)	20	(10)
Results before income taxes	104	208
Income tax expense	(31)	(61)
Results of producing operations	\$ 73	\$ 147

**Table IV Results of operations for oil and gas producing activities unit prices and costs**

	<u>2002</u>	<u>2001</u>
Average sales prices:		
Liquids, per barrel	\$ 19.72	\$ 21.61
Natural gas, per thousand cubic feet	2.43	3.59
Average production costs, per barrel	5.93	3.31

**Table V Reserve quantity information**

The Company's estimated net proved underground oil and gas reserves and changes thereto for the years 2002 and 2001 are shown in the following table. Proved reserves are estimated by Company asset teams composed of earth scientists and reservoir engineers. These proved reserve estimates are reviewed annually by the Company's Reserves Advisory Committee to ensure that rigorous professional standards and the reserves definitions prescribed by the U.S. Securities and Exchange Commission are consistently applied throughout the Company.

Proved reserves are the estimated quantities that geologic and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Due to the inherent uncertainties and the limited nature of reservoir data, estimates of underground reserves are subject to change as additional information becomes available.

Proved reserves do not include additional quantities recoverable beyond the term of the lease or concession agreement or that may result from extensions of currently proved areas or from applying secondary or tertiary recovery processes not yet tested and determined to be economic.

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

Proved developed reserves are the quantities expected to be recovered through existing wells with existing equipment and operating methods.

16

"Net" reserves exclude royalties and interests owned by others and reflect contractual arrangements and royalty obligations in effect at the time of the estimate.

	Net proved reserves of crude oil condensate and natural gas liquids(1)	Net proved reserves of natural gas(1)
	(millions of barrels)	(millions of cubic feet)
<b>Reserves at December 31, 2000</b>	28	503,855
Changes attributable to:		
Revisions	(3)	51,827
Extensions and discoveries		17,320
Sales		(21)
Production	(3)	(61,611)
<b>Reserves at December 31, 2001</b>	22	511,370
Changes attributable to:		
Revisions	3	5,772
Extensions and discoveries		2,756
Sales		
Purchases		24,072
Production	(4)	(56,057)
<b>Reserves at December 31, 2002</b>	21	487,913

(1) Proved reserves of oil condensate, natural gas liquids and natural gas are located entirely within the United States.

**Table VI Standardized measure of discounted future net cash flows related to proved oil and gas reserves**

The standardized measure of discounted future net cash flows, related to the preceding proved oil and gas reserves, is calculated in accordance with the requirements of FAS No. 69. Estimated future cash inflows from production are computed by applying year-end prices for oil and gas to year-end quantities of estimated net proved reserves. Future price changes are limited to those provided by contractual arrangements in existence at the end of each reporting year. Future development and production costs are those estimated future expenditures necessary to develop and produce year-end estimated proved reserves based on year-end cost indices, assuming continuation of year-end economic conditions. Estimated future income taxes are calculated by applying appropriate year-end statutory tax rates. These rates reflect allowable deductions and tax credits and are applied to estimated future pretax net cash flows, less the tax basis of related assets. Discounted future net cash flows are calculated using ten percent midperiod discount factors. Discounting requires a year-by-year estimate of when future expenditures will be incurred and when reserves will be produced.

The information provided does not represent management's estimate of the Company's expected future cash flows or value of proved oil and gas reserves. Estimates of proved reserve quantities are imprecise and change over time as new information becomes available. Moreover, probable and possible reserves, which may become proved in the future, are excluded from the calculations. The arbitrary valuation prescribed

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

under FAS No. 69 requires assumptions as to the timing and amount of future development and production costs. The calculations are made as of December 31 each year and

17

should not be relied upon as an indication of the Company's future cash flows or value of its oil and gas reserves.

	<u>2002</u>	<u>2001</u>
	(millions of dollars)	
Future cash inflows from production	\$ 2,088	\$ 1,454
Future production and development costs	(743)	(655)
Future income taxes	(463)	(273)
	<u>882</u>	<u>526</u>
Undiscounted future net cash flows	882	526
Ten percent midyear annual discount for timing of estimated cash flows	(332)	(190)
	<u>550</u>	<u>336</u>
<b>Standardized measure of discounted future net cash flows</b>	<b>\$ 550</b>	<b>\$ 336</b>

**Table VII Changes in the standardized measure of discounted future net cash flows from proved reserves**

	<u>2002</u>	<u>2001</u>
	(millions of dollars)	
<b>Present value at January 1</b>	<b>\$ 336</b>	<b>\$ 1,679</b>
Sales and transfers of oil and gas produced, net of production costs	(130)	(256)
Development costs incurred	13	42
Purchases of reserves	20	
Extensions, discoveries and improved recovery, less related costs	4	9
Revisions of previous quantity estimates	45	27
Net changes in prices, development and production costs	344	(2,147)
Accretion of discount	45	257
Net change in income tax	(127)	725
	<u>214</u>	<u>(1,343)</u>
Net change for the year	214	(1,343)
	<u>550</u>	<u>336</u>
<b>Present value at December 31</b>	<b>\$ 550</b>	<b>\$ 336</b>

The changes in present values between years, which can be significant, reflect changes in estimated proved reserve quantities and prices and assumptions used in forecasting production volumes and costs. Changes in the timing of production are included with "Revisions of previous quantity estimates."

### ISAB Energy Structure

ISAB Energy is 51% owned by ERG Petroli S.p.A. and 49% owned by MEC Priolo B.V. (a wholly-owned subsidiary of Edison Mission Energy). It is the proprietor of the Gasification and Cogeneration plant at Priolo Gargallo (Syracuse), located near to the ISAB refinery owned by ERG Raffinerie Mediterranee.

The plant has a guaranteed net capacity of 507 MW and in 2002 net electricity production was 4,197 GWh.

20

### Main economic and financial data

The currency used for the following figures is the Euro; the sum of figures that have been rounded to the nearest million may differ from the actual total displayed.

	<u>2002</u>	<u>2001</u>	<u>2000</u>
	(million Euro)		
Total revenues	444	396	295

21

## Report on Operations

Financing for the construction of the plant was in the form of non-recourse Project Financing for the sum of Euro 971 million.

ISAB Energy produces electrical power generated by the gasification of heavy residues resulting from crude oil processing at the nearby ISAB refinery. The electrical power produced is sold to the "Gestore della Rete di Trasmissione Nazionale", or "GRTN" (National Grid) at the CIP/6 tariff. (The rights and obligations regarding the purchase of energy from national third party companies were transferred from ENEL S.p.A. to the GRTN as from January 1<sup>st</sup> 2001, in accordance with the Bersani Decree (legislative decree of March 16<sup>th</sup> 1999) enforced by the Ministry for Industry).

## Comments on the results for the year

### Economic and financial results

The financial statements for 2002 show a profit of Euro 107.0 million (compared to Euro 57.0 million in 2001), after depreciation and amortisation amounting to Euro 45.7 million (Euro 45.2 million in 2001).

This result is a reflection of the plant's remarkable reliability over the year, which saw it operating at 94% of its potential.

These financial statements have been audited by Reconta Ernst & Young S.p.A.

## Major events during the year

The major events of 2002 were:

net production amounted to 4,197 GWh, 94% of which was produced from the gasification of refining residues, an improvement on the previous year as a result of the plant's improved reliability and the subsequently fewer start-up and shutdown situations. In 2001 net production was 3,621 GWh and 89% of it was produced from refining residues.

the electricity was sold at a provisional price of 102.3€/MWh (CIP 6/92 tariff), except for a small part (0.51%) sold as surplus. On the basis of the trend of methane prices, which are expected to drop by 11.4% in 2002 (compared to 2001), the definitive value for 2002 of the CIP 6/92 tariff is 97.2€/MWh (5% less than the provisional price). It should nevertheless be reminded that the definitive value will be published by the "Cassa Conguaglio per il Settore Elettrico" at the end of April 2003;

the GRTN failed to collect an equivalent number of 385 hours. The power restrictions without doubt led to a reduction in production, which was partly offset by the compensation (approximately Euro 1.9 million) paid as a result of the annual

allowance (320 hours) being exceeded, and partly by the fact that it overlapped with maintenance interventions to the plant;

the plant's improved efficiency and the higher number of operational hours meant that during the year ISAB Energy was able to collect a larger amount of raw materials compared to the guaranteed minimum and there were therefore no "Purchaser Shortfall" expenses;

Given the company's declaration and the supply of the proper documentation to the GRTN, the Antitrust Authority for Electricity and Gas, on the basis of production in 2001, recognised the ISAB Energy plant as being "cogenerative," according to resolution 42/02.

the company is therefore not subject to the purchase of 'green certificates', according to the Bersani Decree;

22

---

With regard to the arbitration procedures between ISAB Energy and the plant construction consortium, on December 30<sup>th</sup> 2002 an agreement was reached which compensated ISAB Energy with a sum of Euro 21 million;

as far as financial matters are concerned, during the year the company agreed on a short-term loan of Euro 4.5 million in favour of ISAB Energy Services, due to mature in November 2003, to be repaid at the ECB intervention rate plus 1%. This loan became necessary after the Financing blocked the subordinated payments to ISAB Energy Services by ISAB Energy;

the decreasing trend in interest rates recorded during the year brought about for the company a third-party capital cost at an average rate, including Margin, Additional Margin, Additional Margin and Guarantee Fee, of 4.7%. This positive effect was in part counterbalanced by the higher Interest Rate Swap expenses;

following the revenue inspection carried out by the competent Revenue Authority in 2001, in 2002 assessment notices were presented for the years 1998 and 1999. As far as 1998 is concerned the preliminary stage has been defined and the relevant procedure completed;

following the transfer of the company division made up of the ISAB refinery from ERG Petroli to ERG Raffinerie Mediterranee, during the year the supply contracts for raw materials and services between ISAB Energy and the group companies were transferred. In particular, the following contracts were transferred from ERG Petroli to ERG Raffinerie Mediterranee: feedstock supply, minor products and several industrial and general services such as: Health Care, Personnel Administration, Fire-fighting/prevention Services and Internal Mail. The service contracts regarding Public Relations and I.T. services were transferred from ERG Petroli to ERG S.p.A..

### **Relations with the financing institutions**

As previously mentioned, during 2002 there were events of significant economic/financial impact both in terms of the present and the future. They are summarised below:

Settlement of the litigation with the Snam Progetti Foster Wheeler Energy consortium, whose positive economic effect was more than Euro 21 million.

Exemption from the purchase of Green Certificates

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

Excess availability of more than Euro 6 million, which was made available by the financing institutions when construction of the plant was finished, to cover any unexpected investments necessary to guarantee the regular running of the plant, and was not used.

The renewal of the insurance policies for direct and indirect damage was significantly more expensive than the estimated cost, yet the insurance cover was still not in line with the Project Financing contract requirements.

In order to be able to evaluate the future effects that the above-mentioned events will have and enable the banks to carry out a more precise check of the risk profile accepted under the new insurance cover, a comparison of information is underway between the company and the banks themselves, which, with the support of the pluriennial economic/financial model that is currently being updated, will allow for the evaluation of the possible steps to be taken to ensure the economic and financial optimisation of the company. Amongst the hypotheses considered there is that of a re-elaboration of the plan to amortise the debt with the advance repayment of capital shares.

Whilst waiting for the most appropriate decisions to be reached, due within the next few months, the financing institutions have asked the company to refrain from distributing dividends.

23

---

### **Agreements with the Snam Progetti Foster-Wheeler Energy consortium and with Texaco Development Corporation**

The agreement reached on December 30<sup>th</sup> 2002 between ISAB Energy and the Snam Progetti Foster-Wheeler Energy consortium as a whole provides for:

The definitive end to all the requests presented by each party and the "Final Acceptance" of the plant according to the LSTK contract;

The payment on behalf of the Consortium to ISAB Energy of the sum of more than Euro 21 million, of which:

Euro 15 million via direct payment, already carried out;

Approximately Euro 6 million via the transfer to ISAB Energy by the consortium of all receivables, which were in turn transferred to Texaco Development Corporation, against the royalties due on the basis of the License Agreement of June 1<sup>st</sup> 1992 between ISAB Energy and Texaco;

The reciprocal statement of discharge between ISAB Energy and Texaco regarding any dispute, damage and responsibility up until December 30<sup>th</sup> 2002; the guarantee made by Texaco regarding the patent does however remain in force, as laid down in the Licence Agreement between ISAB Energy and Texaco ("Patent Indemnity" art. 9).

The notification to the Arbitration Tribunal to settle the arbitration.

### **Contract management**

#### **Vanadium Concentrate**

The agreement with GfE has been formalised, completely settling the existing dispute. According to the agreement ISAB Energy may annul the contract in force, with the payment of a penalty of 263 thousand Dollars.

The financing institutions gave their approval in January 2003, the payment was made and the contract therefore annulled.

#### **Oxygen**

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The dispute has been settled regarding the interpretation of the commercial conditions to be applied in the case of operational arrangements during which one or two trains of the oxygen plant are kept on standby.

As compensation for the events recorded up until December 31st 2001, a lump-sum payment of Euro 170 thousand was agreed upon (against a request of Euro 2.1 million); for 2002 the cost of missing collections of oxygen, for reasons attributable to ISAB Energy is, on the basis of the agreement reached, Euro 100 thousand.

### **Electrical energy**

In 2001 the entry into the "free market" had allowed significant savings to be achieved, thanks not only to the price of so-called modulation energy (at more advantageous economic conditions compared to the "restricted market") but also thanks to purchases of the "take or pay" type.

In 2002, the contract regarding the purchase of so-called modulation energy was settled at a price, in a similar scenario, lower than that of 2001, but the higher level of participation in the requests to allocate bands did not allow the purchase of imported energy to reach the levels of 2001.

24

---

### **Insurance**

The renewal of the insurance policy "All Risks Property Damage and Business Interruption" brought about a considerable increase in premiums and a worsening of the insurance conditions (increase in excess franchises and exclusion of the risk of terrorism).

The reasons for this can be traced to the particular context of a tighter insurance market as a result of both the sharp losses recorded in the Energy sector and the international economic and political situation.

The scarce availability of insurance cover has reduced the negotiating power, as far as premiums are concerned, to a minimum.

### **Information and Telecommunications Systems**

During 2002 further SAP modules were implemented, as part of the policy to cover the majority of company procedures. They included:

Quality Management (QM), for the management of materials testing;

Internet Transaction Server (ITS), for the management of the online purchase of the services carried out by the plant maintenance company;

WEB-doc, for the drafting and approval of the corporate procedures of ISAB Energy Services;

Management Information System (MIS) WEB, for access to the production information system via the Internet;

Business Warehouse (BW), to have reports of studies into plant maintenance costs and central warehouse movements.

Furthermore, the CED was relocated to more suitable premises, and a DECT cordless telephone network was set up for the plant operators, ensuring that they are always immediately available.

25

---

**Staff**

The company staff is made up of 19 people, as the company avails itself of ISAB Energy Services for the actual management of the plant, according to the "Operation & Maintenance" contract signed between the two companies.

**Summary of financial information****Income Statement**

	2002	2001	2000
	(thousand Euro)		
<b>Revenues from ordinary operations</b>	<b>421,319</b>	<b>377,207</b>	<b>229,416</b>

<b>Net financial income (expenses)</b>	<b>(47,232)</b>	<b>(52,826)</b>	<b>(36,934)</b>
<b>Net income (expenses) from equity investments</b>			
Revenues from ordinary operations	114,713	62,272	(15,979)
<b>Net extraordinary income (expenses)</b>	<b>(391)</b>	<b>(161)</b>	<b>2,025</b>
Income before taxes	114,321	62,111	(13,954)
<b>Income taxes</b>	<b>(7,362)</b>	<b>(5,152)</b>	<b>2,437</b>
Income (loss) for the year	106,959	56,959	(11,517)

When comparing figures for previous years it should be noted that the figures for the year 2000 reflect values which were produced during the plant construction and technical trial stages. The income statement only took on the typical characteristics of an active company (without the capitalisation of financial expenses relating to the Project Financing, with the recording of revenues from ordinary operations and the beginning of the depreciation of the plant) after April 18<sup>th</sup> 2000, the date when the construction consortium handed over the plant to ISAB Energy.

**Revenues from ordinary operations**

These revenues consist of the sale of electrical power to the GRTN (Euro 409 million) and the sale of minor products and utilities (around Euro 12 million).

**Other revenues and income**

The other revenues and income include the Euro 21 million compensation from the Snamprogetti Foster Wheeler Energy consortium (following the settlement of the litigation arising from the delayed handing over of the IGCC plant and the subsequent loss of profit), rents receivable and ordinary surpluses.

**Purchase expenses**

Purchase expenses relate mainly to supplies of feedstock, diesel, other fuel oils, oxygen and nitrogen.

**Services and other operating expenses**

The services received were maintenance services, insurance, commercial, technical and general services and consultancy services.

**Amortisation and depreciation**

This item includes the economic and technical amortisation and depreciation of tangible fixed assets (Euro 37 million) and intangible fixed assets (Euro 9 million).

The average useful life of the plants was estimated in 23.4 years from April 18<sup>th</sup> 2000.

**Net financial income (expenses)**

The financial expenses incurred during 2002 consist mainly of interest payable on the financing of Euro 31 million and additional bank charges and brokerage margins for Euro 6 million.

The financial income refers to current account deposits, which earn an average rate of 2.1%.

**Income taxes**

The taxes for 2002 do not include current IRPEG taxation since the company was given 10-year exemption from IRPEG, which will expire in October 2003. The figures refer mainly to IRAP taxation, both as the tax expense of the year and as the net effect of the deferred tax assets.

27

**Balance Sheet**

The following table shows reclassified balance sheet figures for 2002 and 2001.

	<b>31.12.02</b>	<b>31.12.01</b>
	<b>(thousand Euro)</b>	
<b>Fixed assets</b>	<b>766,565</b>	<b>800,421</b>
<b>Net working capital</b>	<b>50,361</b>	<b>17,965</b>
<b>Staff leaving indemnities</b>	<b>(161)</b>	<b>(144)</b>
<b>Other assets</b>	<b>37,154</b>	<b>31,222</b>
<b>Other liabilities</b>	<b>(17,897)</b>	<b>(8,353)</b>
<b>NET INVESTED CAPITAL</b>	<b>836,022</b>	<b>841,111</b>
<b>Shareholders' equity</b>	<b>144,083</b>	<b>70,657</b>
<b>Medium/long-term financial debt</b>	<b>657,618</b>	<b>742,658</b>
<b>Short-term financial debt</b>	<b>34,322</b>	<b>27,796</b>
<b>SHAREHOLDERS' EQUITY AND FINANCIAL DEBT</b>	<b>836,022</b>	<b>841,111</b>

At December 31<sup>st</sup> 2002 the net invested capital amounted to approximately Euro 836 million, a decrease of around Euro 5 million.

The most significant variations between the situation at December 31<sup>st</sup> 2001 and December 31<sup>st</sup> 2002 are analysed below.

**Fixed assets**

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	31.12.02	31.12.01
	(thousand Euro)	
<b>Intangible fixed assets</b>	56,331	64,858
<b>Tangible fixed assets</b>	710,225	735,554
<b>Investments and other financial assets</b>	9	9
Total	766,565	800,421
<b>Net working capital</b>		

	31.12.02	31.12.01
	(thousand Euro)	
<b>Leftovers</b>	15,615	14,636
<b>Trade receivables</b>	76,528	52,890
<b>Trade payables</b>	(41,783)	(49,561)
Total	50,361	17,965

Trade receivables increased largely as a result of the higher quantity of electricity sold to the GRTN.

Trade payables decreased due to the lower amount of services and supplies received.

28

**Other assets**

	31.12.02	31.12.01
	(thousand Euro)	
<b>Short-term tax receivables</b>	5,950	819
<b>Other short-term receivables</b>	17,955	19,304
<b>Short-term pre-paid expenses and accrued income</b>	3,989	2,086
<b>Receivables from tax authorities long/medium-term</b>	3,231	9,013
<b>Other medium/long-term receivables</b>	6,030	
Total	37,154	31,222
<b>Other liabilities</b>		

	31.12.02	31.12.01
	(thousand Euro)	
<b>Short-term tax payables</b>	(2,497)	(3,720)
<b>Other short-term payables</b>	(4,790)	(427)
<b>Short-term deferred income and accrued expenses</b>	(543)	(479)
<b>Other provisions for risks and charges</b>	(10,068)	(3,727)
Total	(17,897)	(8,353)

The other provisions include the provision for the plant maintenance cycles for Euro 10 million.

**Net financial debt**

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The table below outlines the medium/long-term financial debt for ISAB Energy S.r.l.

	<u>31.12.02</u>	<u>31.12.01</u>
	(thousand Euro)	
<b>Medium/long-term bank borrowings</b>	<b>700,142</b>	<b>783,234</b>

**Equity investments**

ISAB Energy S.r.l. does not own shares in the parent companies nor in the associated company ISAB Energy Services S.r.l.; it holds a share of 5% of the share capital of the company Industria Acqua Siracusana S.p.A., a co-operative company managing industrial waste water.

**Relations with parent companies, associated companies and other related parties**

ISAB Energy S.r.l. purchases the main raw materials necessary for production from ERG Raffinerie Mediterranee. At the same time it sells some raw materials and auxiliary services to ERG Raffinerie Mediterranee. Relations between the two companies also entail several contracts regarding the supply of industrial and general services, such as:

Health care;

Personnel administration;

Internal mail;

Fire-fighting/prevention.

ISAB Energy also receives other general services from ERG S.p.A.:

Public relations service;

I.T. services.

The amounts paid for these services are detailed in the Notes to the financial statements.

The company has, furthermore, contracts for services supplied by Edison Mission Italia and Erg S.p.A. as part of the "Sponsor Support Agreements."

The relationship which links ISAB Energy with ISAB Energy Services is regulated by the Operation and Maintenance contract, which assigns to ISAB Energy Services the role of plant operation and maintenance.

As far as relations with related parties are concerned, as defined by the CONSOB recommendation dated February 20th 1997, recalled by the CONSOB recommendation dated February 27th 1998, there are not any relations which come under that definition and which have significant operations as their subject.

**Subsequent events**

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

During February the Financing Institutions gave their approval to cancel the line of credit of Euro 57.3 million made available to ISAB Energy to cover any compensation should the arbitration tribunal have given judgement against the company in the litigation with the plant construction consortium. They have, furthermore, "de-subordinated" for the period 2002-2004 several components of the payment relating to the "Operation and Maintenance" contract made from ISAB Energy to ISAB Energy Services, binding them however to check the financial ratios, calculated on a six-monthly basis, which must be in line with those indicated in the Project Credit Facility Agreement.

On March 5<sup>th</sup> 2003, following the settlement with the consortium, meetings were held by the Executive Committee and the Board of Directors, during which it was decided that the corporate organisation would be altered. Such an amendment would be decreed during an extraordinary shareholders' meeting called to alter the company Statute. The annulment of the Executive Committee is expected, together with the nomination of a Chief Executive Officer or General Manager.

### Operations expectations

For 2003 the company expects a trend similar to that of 2002, with a slightly lower economic result due to the carrying out of the general shutdown for an equivalent of 28 days, which will affect train 2 and the parts in common. The general shutdown planned for the fourth quarter 2002 will in fact take place starting from March 29<sup>th</sup> 2003, in the light of the results of the inspection analysis carried out in June, which allowed the maintenance cycle to be revised. The complete maintenance cycle will now last 8 years rather than the current 6 years. This revision was decided after checks and technical were studies carried out, together with the licensees Ansaldo and Texaco.

In October 2003 the ten-year exemption from IRPEG taxation, from which the company has benefited, will end.

Regarding the revenue inspection for 1999 it is believed that within the first half of the current year the assessment will be concluded, as occurred for 1998.

For 2003 the company has planned investments to improve plant reliability amounting to Euro 2 million, and investments amounting to Euro 5 million for Health, Safety and Environment.

Furthermore, investments are planned to automate several company procedures and boost the I.T. infrastructures.

Of particular importance are: the creation of software in the safety at work area; the improvement of internal communication and work permit processes; a revision of the Plant Management (PM) SAP maintenance module for managing statistics and preventive/predictive activities; the replacement of all Personal Computers, as they need to be technologically updated or are obsolete, and a large part of the servers, with a strengthening of the plant network.

### Board of Directors' Proposal

Shareholders,

We close this report by inviting you to:

approve the financial statements of your company as at December 31<sup>st</sup> 2002;

to allocate the net income for the year of Euro 106,959,145.72

Taking into account the limitations previously mentioned in the paragraph "Relations with the Financing Institutions" contained in the present report.

Rome, March 27<sup>th</sup> 2003

On behalf of the Board of Directors

The Chairman

Domenico D'Arpizio

32

---

**Independent Auditor's Report**

To the Shareholders' of  
Isab Energy S.r.l.

We have audited the accompanying balance sheets of Isab Energy S.r.l. as of December 31, 2002 and 2001, and the related statements of income for the each of the three years in the period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Isab Energy S.r.l. at December 31, 2002 and 2001, and the results of its operations for each of the three years in the period December 31, 2002, in conformity with accounting principles generally accepted in Italy.

Accounting principles generally accepted in Italy vary in certain significant respects from accounting principles generally accepted the United States of America. The application of the latter, after the restatement referred to in Note 9, would have affected the determination of net income (loss) and shareholders' equity (deficit) for each of the three years in the period ended December 31, 2002, to the extent summarized in Note 9.

Reconta Ernst & Young S.p.A.

Genoa, Italy  
May 5, 2003, except for Note 9,  
as to which the date is August 5, 2003

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

Isab Energy is the owner of the industrial gasification and cogeneration complex denominated "IGCC Integrated Gasification Combined Cycle", situated in Priolo Gargallo, Sicily, designed for the production of electrical power.

The plant, which became operational on April 18<sup>th</sup> 2000 following the "provisional acceptance" issued to the plant construction consortium Snamprogetti Foster Wheeler Energy (the "Consortium"), on December 30<sup>th</sup> 2002 completed the guarantee period with regard to regular functioning and productive capacity, leading to the definitive and conclusive declaration of "final acceptance".

### **2. Criteria for the preparation of the financial statements**

The financial statements have been prepared in compliance with the laws which govern their preparation, interpreted and integrated using the accounting principles issued by the "Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri"

The financial statements include the Balance Sheets, Income Statement and the Notes to the financial statements.

Every item on the Balance Sheets is accompanied by the corresponding financial statement amounts for 2001 and 2002, while in the Income Statements the figures for 2000, 2001 and 2002 are provided.

For the sake of clarity the figures in the Notes to the financial statements have been rounded to the nearest thousand Euro, in line with past practices; as a result some of the total amounts may vary slightly from the sum of their components.

### **3. Accounting policies and evaluation criteria**

The accounting policies and evaluation criteria adopted are set out below. They conform entirely to articles 2423 bis and 2426 of the Italian Civil Code.

The evaluation criteria adopted for the drawing up of the financial statements at December 31<sup>st</sup> 2002 are the same as those adopted the previous year.

#### **3.1 Intangible fixed assets**

Intangible fixed assets are recorded at their purchase price or production cost, including related capitalization interest, incurred at the date of completion, and are amortised on a straight line basis, according to their useful life, also considering their residual value.

More specifically, the figures result from the application of the following criteria:

plant and improvement expenses are amortised in five years;

the industrial process licenses in relation to the contractual duration agreed with the licensee;

licensed software in three years;

the contribution to ENEL for the period of use of the power lines connected to the IGCC plant, indicated in the contract of the sale of electricity;

the expenses linked to the project financing for the duration of the financing obtained from the banks.

#### **3.2 Tangible fixed assets**

Tangible fixed assets are recorded at purchase or production price and are displayed net of amortisation and depreciation provisions.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The figures shown have not undergone any revaluation.

The cost of assets includes capitalization interest incurred during the period of construction.

Improvement, modernisation, transformation and maintenance costs are capital in nature and are thus capitalised and depreciated in relation to the useful life of the asset they relate to.

Non-capital maintenance and repair costs are expensed in the periods in which they are incurred.

The depreciation rates, determined on a prudent basis, which are the same as those used in prior years and follow a depreciation schedule which takes account of the estimated residual value of each asset, are listed below according to the type of asset in question:

	%	Degree of depreciation at 31.12.02
Industrial buildings	3-4	10%
Light buildings	10	24%
IGCC complex buildings	3.5-7.5	12%
Industrial equipment	10	25%
Office equipment and furniture	12	40%
Sundry and minor equipment	10	36%
Electronic equipment	20	53%
Vehicles	25	89%

With regard to the IGCC plant, the rates shown refer exclusively to the values arising from an independent survey on the single technical units of the plant.

### 3.3 Equity investments

Shareholdings are recorded at their purchase price or subscription price and adjusted if there has been a permanent loss of value.

### 3.4 Inventories

Raw materials are accounted for at the lower of cost, using the LIFO (Last In First Out) method on an annual basis, and the current market value.

Finished products are accounted for on the basis of the current market value.

Inventories of ancillary and consumer goods are accounted for at the lower of their weighted average cost and the current market value.

### 3.5 Receivables and payables

Receivables and payables are recorded at their nominal value reduced where necessary by a provision for doubtful accounts.

Transactions in foreign currency during the year are converted into Euro at the exchange rate on the day of the transaction and the difference between this value and the amount actually paid or received is recorded in the income statement under financial income and expenses.

---

The foreign exchange differences, resulting from the conversion of foreign exchange receivables and payables at the year-end are included in the income statement.

### 3.6 Current and deferred income taxes

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The current income taxes have been accrued to cover estimated tax charges. Deferred tax liabilities and assets are accrued to reflect the timing differences between the financial reporting basis and tax basis of assets and liabilities and tax losses carried forward.

The deferred tax assets are included in the statements only if there is a reasonable chance of recovering them; deferred taxes are not accounted for if the liability is considered remote. These taxes have been calculated on the basis of estimated tax rates expected for the periods in which the taxable timing differences will be concentrated.

### **3.7 Accruals and payables**

Accrued income and liabilities and deferred income and expenses are accounted for on an accrual basis, with reference to the provisions of article 2424 bis of the Italian Civil Code.

### **3.8 Provisions for risks and charges**

The provisions for risks and charges cover specific, definite or possible liabilities, but whose amount or date of payment is not certain at the end of the year.

### **3.9 Maintenance cycles**

The provision for the extraordinary periodical maintenance is carried out pro rata temporis for each financial year on the basis of the estimate of costs to be sustained and the multi-year maintenance cycle programmes of the IGCC plant.

### **3.10 Provision for staff leaving indemnities**

This item represents all the liabilities to personnel, calculated according to current legislation and collective labour contracts in force at the close of the year.

### **3.11 Memorandum accounts**

Memorandum accounts are accounted for at the value of the commitment taken or received and the potential value of the risk objectively estimated.

In relation to the accounting principle number 22 issued by the "Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri", the guarantees issued against the payables recorded in the balance sheet are not recorded amongst the memorandum accounts but are shown in the Notes to the financial statements, where necessary, in the comments to the relevant payable items.

### **3.12 Financial expenses**

The interest payable and the financial expenses incurred by the financing obtained from the parent company and subsequently by the financing received from the Project financing, until the date the plant started operations (April 18<sup>th</sup> 2000), have been capitalised amongst the various asset items.

The interest payable and financial expenses subsequent to that date contributed to the formation of the economic result.

### **3.13 Income Statement**

Income and expenses are accounted for in the income statement on an accrual basis.

Up until the date when the plant was accepted, the costs pertaining to technical studies, legal and financial services, permits and licenses, internal work, directly or indirectly attributable to the start-up and development of the project and the building of the plant, as well as its trial run, were capitalised amongst the fixed assets, whereas the expenses not directly pertaining to the project's progress and its implementation were recorded in the financial year.

### 3.14 Extraordinary income and expenses

This item consists exclusively of the effects resulting from changes in the application of accounting principles, from extraordinary events not in any way connected to ordinary operations, taxes pertaining to previous years and litigation underway with the tax authorities.

### 4. Related party transactions

The company engages in commercial relations and service-linked and financial relations both with its direct parent companies and with the companies of the same Groups, regulated by contracts fixed at market conditions, with the exception of financing, which is paid back at zero rate in 10 years and matures in 2010.

During 2002, most of the activity previously done with ERG Petroli were transferred to ERG Raffinerie Mediterranee S.r.l.

The most significant are:

the supplies of "feedstock", the raw material for the IGCC plant, in relation to the "Feedstock Supply Agreement" of June 20<sup>th</sup> 1996. This material comes from the processing residues from the ISAB refinery, which until September 30<sup>th</sup> 2002 was owned by the parent company ERG Petroli and since October 1<sup>st</sup> 2002 is under the ownership of the associated company ERG Raffinerie Mediterranee;

the reciprocal supplies of minor products between the companies, ERG Petroli until September 30<sup>th</sup> 2002, and subsequently ERG Raffinerie Mediterranee, by virtue of the "Minor Products Agreement" of April 5<sup>th</sup> 1996. These supplies include, but are not limited to, supplies of diesel, gas, fuel oil, steam and heat;

the allotment of two loans linked to the Project financing operation and denominated "sub-debt", on the basis of the agreements drawn up between the financing banks and the sponsors ERG Petroli and MEC Priolo B.V.;

the services carried out by the associated company ISAB Energy Services S.r.l., under the "Operation & Maintenance" contract of April 5<sup>th</sup> 1996, concerning the running and maintenance of the IGCC plant.

Isab Energy Services S.r.l. belongs to the same groups of the associated companies ERG Petroli and MEC Priolo.

ERG S.p.A. performs other services with regard to legal, corporate, tax and administrative assistance and public relations. ERG Petroli, up until September 30<sup>th</sup> 2002, performed certain public relations, personnel administration, organisation and management of human resources. As of October 1<sup>st</sup> 2002, ERG Raffinerie Mediterranee began performing certain services related to personnel administration, organisation and management of human resources. Mission Energy Italia S.r.l. and Edison Mission Energy Ltd. provide services by staff at headquarters and advice in the financing, insurance and commercial sectors.

The figures regarding inter-group operations are detailed further on in these Notes.

### 5. Project financing

Supplied below is a general outline of the guarantees and relations arising from the Project financing operation which was concluded in 1996 with the signing of the Contract of Project Credit, which was subjected to its last change on September 15<sup>th</sup>, 2000 as a conclusion to the re-financing operation:

the setting up of a first mortgage in favour of San Paolo IMI S.p.A. as a security for the payment of amounts and the satisfying of all obligations laid down in the Contract of Project Credit. The mortgage relates to the land and entire I.G.C.C. plant at Priolo Gargallo;

the setting up of a special lien in favour of San Paolo IMI S.p.A. as a security for the payment of amounts and the satisfying of all obligations resulting from the Contract of Project Credit. The lien relates to plants, machinery, capital goods, raw materials, goods in progress, finished products, warehouse reserves and receivables resulting from the sale of the above goods;

the transfer of all rights of a financial nature and sums received or to be received in relation to those rights according to or in relation to the Project Contracts as detailed in the introduction to the deed of assignment in favour of San Paolo IMI S.p.A. The transfer is a security for all the obligations assumed according to or in relation to the Contract of Project Credit;

the transfer to San Paolo IMI S.p.A. of all the insurance reimbursements to be paid or received in relation to the insurance as laid down in the Contract of Project Credit (with the exception of the reimbursements pertaining to the accidents of employees or the compensation of third-party civil liability damages).

The duration of the obligations after the re-financing operation was extended from eight to fourteen years from the payment of the first instalment, which occurred on December 15<sup>th</sup> 2000, and therefore until December 15<sup>th</sup> 2014.

Furthermore, the financial management of the Company, in particular its cash flow, is monitored very closely by the banks.

43

## 6. Notes to Balance Sheet

### Assets

#### Fixed assets (Euro 766,565 thousand)

##### 6.1 Intangible fixed assets

	Start-up and expansion expenses	Licenses and trademarks	Assets under construction & advances	Other intangible fixed assets	Total

<b>Balance at 31.12.02</b>	<b>12,017</b>	<b>5,490</b>	<b>111</b>	<b>38,714</b>	<b>56,331</b>

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The start-up and expansion expenses include the cost of forming the company, amounting to Euro 5 thousand, and Euro 12,012 thousand of start-up expenses, valued as recoupable and directly attributed to the start-up of operations. They include financial expenses amounting to Euro 872 thousand consisting of:

Euro 8,987 thousand, from the services carried out by the associated company ISAB Energy Services S.r.l., on our behalf and in our interest, aimed at the training and organisation of the qualified personnel.

Euro 3,026 thousand, from the technical and legal advice and services necessary to develop the project.

The licenses and trademarks and similar rights include Euro 5,221 thousand pertaining to the cost of the licenses to use the "Texaco" gasification processes and the "Lurgi" sulphur recovery processes. The amortisation applied amounts to Euro 1,709 thousand.

The assets under construction amounting to Euro 111 thousand relate to the development of software (Euro 42 thousand) and to advances to suppliers (Euro 69 thousand).

The other intangible fixed assets include the contribution paid to Enel for the connection of the I.G.C.C. plant to the National power grid for a total of Euro 22,405 thousand, and the deferred financing expenses (Euro 16,308 thousand). These amounts are shown after amortisation amounting to Euro 3,576 thousand and Euro 3,471 respectively.

44

### 6.2 Tangible fixed assets

	Land and Buildings	Plant and machinery	Indust and Comm. equipment	Other Assets	Fixed assets under constr. Advances	Total
<b>Historical cost</b>	17,031	771,046	211	1,516	7,111	796,915

Write-downs						
<b>Historical cost</b>	17,988	780,208	260	1,707	8,370	808,532
Revaluations						
	<b>17,988</b>	<b>780,208</b>	<b>260</b>	<b>1,707</b>	<b>8,370</b>	<b>808,532</b>
Depreciation	(1,722)	(95,656)	(64)	(865)		(98,307)
Excess amortisation						
Write-downs						
<b>Balance at 31.12.02</b>	<b>16,266</b>	<b>684,552</b>	<b>196</b>	<b>843</b>	<b>8,370</b>	<b>710,225</b>

The tangible fixed assets include the capitalized interest expenses incurred during the construction period that remained capitalised to the individual assets. The figure at December 31<sup>st</sup> 2002 was Euro 100,794 thousand.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

All of the buildings destined for industrial use, for Euro 13,541 thousand, include the set of buildings made up of the entrance and porter's lodge, the offices, the canteen, the warehouse, the control room, the laboratory, the cabins and roads, parking lots and the other respective infrastructures. The item includes Euro 505 thousand relating to light constructions.

The depreciation for Euro 1,722 thousand relates to buildings for Euro 1,561 thousand, and to light constructions for Euro 161 thousand.

The item plant and machinery refers to the I.G.C.C. industrial gasification and cogeneration plant. The sum of Euro 780,208 thousand refers to the plants making up the electrical power plant for Euro 717,101 thousand, the transformer substations for Euro 57.188 thousand and Euro 5,919 thousand for the auxiliary treatment and purification stations.

The depreciation amounting to Euro 95,656 thousand was applied with exclusive reference to the economic and technical life valued in a weighted average residual time of 21 years. The increases in the year are due to the capitalisation on the electrical power plant (Euro 9,209 thousand Euro 4,586 thousand of which is for new investments in strategic reserves), new metallurgical developments, adapting to safety regulations and other improvements and the coming on stream of a plant component called the "turbo expander" (Euro 4,623 thousand). The "turbo expander" could not be activated on April 18<sup>th</sup> 2000, when the IGCC plant was accepted, because of design alterations which needed to be made. This technical unit increases the electrical power production capacity by around 6 MWh.

45

The item "fixed assets under construction and advances" refers to investments not yet concluded (Euro 8,230 thousand), and advances to suppliers (Euro 140 thousand).

### 6.3 Financial fixed assets

The value of equity investments in other companies relates to the purchase cost at the nominal value of 100 shares, equal to 5% of the share capital, of the company Industria Acqua Siracusana S.p.A., with registered headquarters in Syracuse, Sicily.

### Current Assets (Euro 214,936 thousand)

#### 6.4 Inventories

	31.12.02	31.12.01
Raw materials	3,417	3,702
Ancillary and consumable materials	11,953	10,456
Finished products and goods	113	250
Advances	132	228
	15,615	14,636
<b>TOTAL</b>	<b>15,615</b>	<b>14,636</b>

Inventories of raw materials fell due to the lower quantities of diesel in stock at the end of the year.

The increase in the inventory value of ancillary and consumable goods can be attributed to the higher level of spare reserves, whose effect amounted to Euro 1,455 thousand.

The inventories of products refer to the quantities of sulphur and vanadium concentrate.

The advances refer to receivables for advances to suppliers on purchase orders for spare parts and consumable goods, which are due to be delivered in the first few months of the following year.

#### 6.5 Receivables

	31.12.02	31.12.01
Trade receivables	66,084	49,897
Receivables from parent companies	8,284	3,777

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>31.12.02</u>	<u>31.12.01</u>
Receivables from associated companies	6,686	242
Other receivables	33,165	28,110
<b>TOTAL</b>	<b>114,219</b>	<b>82,026</b>

Trade receivables

	<u>31.12.02</u>	<u>31.12.01</u>
Receivables due form the sale of electrical power	65,698	49,336
Sundry trade receivables	386	561
<b>TOTAL</b>	<b>66,084</b>	<b>49,897</b>

The receivables refer mainly to the sale of electricity in the months of November and December 2002. The figure shown at the end of the year is higher than that of the previous year due to greater electricity production in the last two months of the year.

46

The receivables for the sale of electrical power were collected in the months of January and February 2003.

**Receivables from parent companies**

	<u>31.12.02</u>	<u>31.12.01</u>
<b>Trade receivables:</b>		
ERG Petroli S.p.A.	8,284	2,751
ERG S.p.A.		1,026
<b>TOTAL</b>	<b>8,284</b>	<b>3,777</b>

These receivables relate only to ERG Petroli and arose mainly from the sale of minor products and valuation adjustments to feedstock supplies in 2002.

**Receivables from associated companies**

	<u>31.12.02</u>	<u>31.12.01</u>
<b>Trade receivables:</b>		
ERG Raffinerie Mediterranee S.r.l.	2,053	
ISAB Energy Services S.r.l.	107	242
	<b>2,160</b>	<b>242</b>
<b>Financial receivables:</b>		
ISAB Energy Services S.r.l.	4,526	
<b>TOTAL</b>	<b>6,686</b>	<b>242</b>

Receivables from ERG Raffinerie Mediterranee refer to the sale of minor products in the months of November and December 2002.

Receivables from ISAB Energy Services relate to charges for general service.

**Other receivables**

	<u>31.12.02</u>	<u>31.12.01</u>
Receivables due from Tax Authorities		494

	<u>31.12.02</u>	<u>31.12.01</u>
Receivables due from public bodies		2
Receivables from employees	11	5
Receivables for damage compensation	21,030	
Receivables for insurance reimbursements	2,421	16,941
Receivables for advance taxes	9,180	9,338
Sundry receivables	134	1,289
Advances to suppliers	389	42
<b>TOTAL</b>	<b>33,165</b>	<b>28,111</b>

The sum of Euro 21,030 thousand relates to the settlement of the litigation with the Consortium signed on December 30th 2002, according to which the company is to be compensated for the breaches of the construction contract (Turnkey Construction Contract of June 21<sup>st</sup> 1996) pertaining to the industrial IGCC plant.

The agreement provides for the payment of the compensation in the following way: Euro 15 million by February 2003 and Euro 6 million in the following periods for waived royalty expenses.

47

The item "Receivables for insurance reimbursements", already recorded in 2001 following the damage incurred during the construction of the IGCC plant and during its operation, was reduced by Euro 14,469 thousand following the settlement and payment of the damages; there is a sum of Euro 2,421 thousand outstanding, which should be collected during 2003.

The tax credit for advance taxes relates for Euro 5,603 thousand to IRPEG taxation and Euro 3,577 thousand to IRAP taxation.

The IRPEG taxation reflects the effect of lower taxation from losses carried forward to the end of ten-year exemption period (October 2003).

The IRAP taxation refers for Euro 3,133 thousand to the payments made during the previous tax periods on the capitalised expenses up until the moment the plant became operational, and which will be absorbed in future years in relation and proportion to the depreciation of the costs which generated it and for Euro 444 thousand to the timing differences generated in 2000, 2001 and 2002, which will arise in the coming years.

The recording of deferred taxes was carried out in compliance with the accounting principle number 25 issued by the "Consigli nazionali dei dottori commercialisti e dei ragionieri".

The receivables collectable beyond twelve months relate mainly to IRAP calculated on capitalised expenses and the receivable from the Consortium.

## 6.6 Cash and cash equivalents

	<u>31.12.02</u>	<u>31.12.01</u>
<b>Bank and postal deposits:</b>		
ordinary current accounts	42	13
Project Financing	85,057	58,304
	85,099	58,318
<b>Cash on hand</b>	<b>2</b>	<b>3</b>
<b>TOTAL</b>	<b>85,101</b>	<b>58,321</b>

The item is generated by the existing availability at the end of the year of cash in hand and in bank accounts.

48

**6.7 Accrued income and pre-paid expenses****Pre-paid expenses**

	<u>31.12.02</u>	<u>31.12.01</u>
Premiums for sureties	178	385
Fees for services and other fees	390	442
Insurance	3,420	1,259
<b>TOTAL</b>	<b>3,989</b>	<b>2,086</b>

The premiums for sureties refer to amounts paid to the banks as securities issued for the VAT credit for the years 1998 and 1999.

The insurance deferrals relate to premiums on policies to cover property and civil responsibility risks, which expire after the year in question.

The other deferrals arose mainly from the payments for diagnostic activities to the turbines for Euro 214 thousand made to the parent company ERG Petroli.

The following table shows the receivables, accrued income, and pre-paid expenses broken down by maturity:

	<u>within 12 months</u>	<u>within 5 years</u>	<u>beyond 5 years</u>	<u>Total</u>
<b>Receivables included as financial assets</b>				
from others		4		4
<b>Receivables included as current assets</b>				
advances to suppliers (inventories)	132			132
from customers	66,084			66,084
from parent companies	8,284			8,284
from associated companies	6,686			6,686
from others	23,905	5,674	3,586	33,165
	<u>105,091</u>	<u>5,674</u>	<u>3,586</u>	<u>114,351</u>
<b>Accrued income and pre-paid expenses</b>				
pre-paid expenses	3,980	9		3,989
<b>TOTAL</b>	<b>109,071</b>	<b>5,687</b>	<b>3,586</b>	<b>118,344</b>
<b>Liabilities and Equity</b>				

**6.8 Shareholders' Equity****Share capital**

The fully paid-up share capital is as follows:

	<u>Share of capital</u>	<u>%</u>
ERG Petroli S.p.A. Siracusa	2,634,150	51
MEC Priolo BV Olanda	2,530,850	49
<b>TOTAL</b>	<b>5,165,000</b>	<b>100</b>

Although ERG Petroli S.p.A. possesses the majority share, these statements show both shareholders to be the parent companies, in consideration of the fact that the Shareholders agreements define the joint control of the company by both shareholders.

#### Legal reserve (Euro 1,033 thousand)

The legal reserve corresponds to one fifth of the share capital.

#### Income (Loss) carried forward (Euro 30,926 thousand)

The item refers to the share carried forward of the income for 2001.

#### Changes in Shareholders' Equity

	Share Capital	Share Premium Reserve	Legal Reserve	other Reserve	Retained earnings (loss)	Income (Loss) for the year	Total Shareholders Equity
<b>Balance at 31.12.2000</b>	<b>5,165</b>			<b>15,494</b>		<b>(6,960)</b>	<b>13,699</b>
Loss for 2000 brought forward					(6,960)	6,960	
Result for 2001						56,959	56,959
<b>Balance at 31.12.2001</b>	<b>5,165</b>			<b>15,493</b>	<b>(6,960)</b>	<b>56,959</b>	<b>70,657</b>
Cover of losses for 1999 and 2000				(6,960)	6,960		
Appropriation of residual reserve in capital account to financial payable				(8,533)			(8,533)
Appropriation of income for 2001			1,033		30,926	(31,959)	
Distribution of income for 2002						(25,000)	(25,000)
Result for 2002						106,959	106,959
<b>Balance at 31.12.2002</b>	<b>5,165</b>		<b>1,033</b>		<b>30,926</b>	<b>106,959</b>	<b>144,083</b>

#### 6.9 Provisions for risks and charges

	31.12.02	31.12.01	Changes	
			Increases	Decreases
Provision for back taxes	305		305	
Provision for maintenance cycles	9,716	3,304	6,412	
Provision for finished product expenses	47	424	47	(424)
<b>TOTAL</b>	<b>10,067</b>	<b>3,727</b>	<b>6,764</b>	<b>(424)</b>

The provision for back taxes was made in anticipation of higher tax charges for the years 1998 and 1999, after the presentation of notices of assessment and adjustment for direct taxes and VAT.

Following these notices the company has presented assessment petitions, which will be defined in the first few months 2003.

The maintenance cycle provision has been adjusted with the competent share for the year of the shutdown of plants for extraordinary maintenance which, originally planned for 2002, was re-scheduled for the first six months of 2003 following the revision of the maintenance plan to four-year cycles for each train and bi-annual for the parts in common.

The provision is stated net of the costs incurred to that end during the year.

The expenses provision for finished products has been utilized within the limits of the provision set up in 2001 to cover both the costs arising from the conclusion of the sales negotiations for the sale of off-specification vanadium concentrate and those incurred against the quantities of vanadium concentrate in stock at December 31<sup>st</sup> 2001, sold in the first few months of 2002.

#### 6.10 Staff leaving indemnities

	31.12.02	31.12.01	Changes	
			Increases	Decreases
Staff leaving indemnities	161	144	34	(16)

This fund fully covers the leaving indemnities of all the employees up to December 31<sup>st</sup> 2002, in compliance with current legal and contractual requirements.

The decrease is largely due to the resignation of some employees.

#### 6.11 Payables

	31.12.02	31.12.01
Bank borrowings	700,142	783,234
Trade payables	24,429	30,629
Payables to parent companies	78,767	57,693
Payables to associated companies	24,400	6,779
Due to tax authorities	2,497	3,720
Due to social security institutions	83	65
Other payables	317	362
<b>TOTAL</b>	<b>830,635</b>	<b>882,482</b>
<b>Bank borrowings</b>		
	<b>31.12.02</b>	<b>31.12.01</b>
<b>Loans and financing:</b>		
Project financing San Paolo IMI S.p.A.	700,142	783,234
<b>TOTAL</b>	<b>700,142</b>	<b>783,234</b>

The bank borrowings related to the Project financing operation, which was accompanied by special liens and a mortgage on the land, as previously mentioned in the introduction to this document.

The financing agreed with the company via the "Project Credit Facility Agreement" contract, dated April 5<sup>th</sup> 1996, was re-negotiated on September 15<sup>th</sup> 2000 with a "Refinancing" operation whose main outcome was the extension of the expiry terms to December 15<sup>th</sup> 2014.

At the date of this report, several of the conditions (insurance cover and projected financial and economic ratios), which were laid out in the Project Financing contract, have not been fulfilled; for this reason the financing banks, exercising their contractual right, did not authorise either the payments of the subordinate debts to the shareholders and their subsidiaries or the payment of the 2001 profits as decreed.

The financing is of the "non recourse" type, is to be repaid in 29 instalments (the first on December 15<sup>th</sup> 2000), at variable rates linked to the Euribor at six months on tranche "B" and to the EIB at three months BEI on tranche "C".

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

At December 31<sup>st</sup> 2002, given the current debt, hedging operations on the interest rate (Interest Rate Swap) were in existence, for notional values equal to Euro 567 million, fixing the effective interest rate at 4.925%.

During 2002, the debt was reduced through 4 payments for Euro 48,389 thousand on tranche "B" and Euro 34,473 thousand on tranche "C".

The residual capital of the various tranches is displayed below and includes the interest payable accrued at December 31<sup>st</sup> 2002:

	31.12.02	31.12.01
Tranche "B"	384,264	432,653
Tranche "C"	314,522	348,996
Interest payable on financing	1,356	1,586
	<b>700,142</b>	<b>783,234</b>

According to year-end commitments, to the changes being defined with the financing banks regarding the structure of the debt, to the subsequent expected re-formation of the depreciation plan and to the advance reimbursement contractually provided for regarding a share of the compensation to be paid by the construction consortium as part of the litigation settlement, the expiry dates for repayment per year are estimated thus:

2003	97,598
2004	75,211
2005	78,630
2006	88,886
2007	91,450
beyond 2008	268,367
	<b>700,142</b>

### Payables due to suppliers

	31.12.02	31.12.01
Italian suppliers	19,976	28,417
E.U. suppliers	1,001	1,087
Suppliers outside E.U.	3,451	1,125
	<b>24,429</b>	<b>30,630</b>

The payables due to suppliers were lower than in 2001 because of the fewer services and supplies received at the end of the year.

### Payables due to parent companies

	31.12.02	31.12.01
<b>Trade payables:</b>		
ERG S.p.A.	87	2
ERG Petroli S.p.A.	74	12,151
	<b>161</b>	<b>12,153</b>
<b>Financial payables:</b>		
ERG Petroli S.p.A.	37,851	26,978
Edison Mission Energy (USA)	19,744	18,562
MEC Priolo B.V. (Olanda)	16,623	

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>31.12.02</u>	<u>31.12.01</u>
	74,218	45,540
<b>Other payables:</b>		
ERG S.p.A.	4,389	
	<u>4,389</u>	
<b>TOTAL</b>	<b>78,767</b>	<b>57,693</b>

The trade payables due to ERG S.p.A. relate to services received, while the other payables relate to the payment of VAT for the month of December 2002, transferred to the Group's centralised account.

The financial payables due to ERG Petroli S.p.A. refer to the subordinated loan (sub-debt) and the Project financing loan amounting to Euro 23,281 thousand, as well as the interest accrued for Euro 1,820 thousand and the income for 2001 determined at Euro 12,750 thousand, suspended and awaiting payment after the approval from the financing banks.

The repayment plan and the conditions of the disbursement of the subordinated loan provide for 34 semi-annual instalments of the same amount, starting from the moment in which the settlement of the litigation with the Consortium was effective. There was an increase of Euro 4,352 thousand on this debt during 2002, arising from the partial use of the capital account reserve to be reimbursed to the Shareholders.

Comparisons with the previous year highlight the transfer of the financing arising from the "Loan agreement" of April 5<sup>th</sup> 1996 (Euro 7,207 thousand) to the company ERG Raffinerie Mediterranee.

The financial payables due to Edison Mission Energy represent the subordinate loan (sub-debt) and the Project financing loan, which was raised in the interest of the parent company MEC Priolo B.V. for Euro 18,186 thousand. The figure shown in the balance sheet includes accrued interest for Euro 1,558 thousand.

The conditions of collectability and repayment are the same as those of the same debt due to ERG Petroli.

The financing for Euro 4,181 thousand from MEC Priolo B.V. also consists of the subordinate loan and Project financing loan. It is recorded following the destination of the capital account reserve and is shown in the balance sheet inclusive of the accrued interest payable for Euro 191 thousand.

With regard to the conditions of collectability and repayment, the same clauses of the same above-mentioned debts are valid.

The amount includes for Euro 12,250 thousand the income from 2001, awaiting payment after approval from the financing banks.

**Payables due to associate companies**

	<u>31.12.02</u>	<u>31.12.01</u>
<b>Trade payables:</b>		
ERG Raffinerie Mediterranee S.r.l.	6,308	
ISAB Energy Services S.r.l.	10,780	6,628
Mission Energy Italia S.r.l.	20	106
Edison Mission Energy Ltd. (UK)	85	45
	<b>17,193</b>	<b>6,779</b>
<b>Financial payables:</b>		
ERG Raffinerie Mediterranee S.r.l.	7,207	
<b>TOTAL</b>	<b>24,400</b>	<b>6,779</b>

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The payables due to ERG Raffinerie Mediterranee relate to business relations for supplies for December and services carried out in the final quarter, for a value of Euro 6,308 thousand, and the financing subordinate to the "Loan agreement" contract of April 5<sup>th</sup> 1996 for Euro 7,207 thousand. This debt, without accrued interest, is repaid at six-monthly rates of the same amount and expires on April 1<sup>st</sup> 2010.

As far as ISAB Energy Services S.r.l. is concerned, the figure shown relates to services received on the basis of the previously mentioned "Operation & Maintenance" contract.

Trade payables due to the companies Mission Energy Italia S.r.l. and Edison Mission Energy Limited consist of consultancy expenses, services and emoluments for directors' social appointments.

### Due to tax authorities

	31.12.02	31.12.01
Income tax for the year	2,300	3,570
Due to tax authorities for deductions	73	60
Other tax payables	123	91
	<b>2,497</b>	<b>3,720</b>

**TOTAL** The item is due for Euro 2,300 thousand to IRAP taxation for the year, net of the advances paid during the year as well as the deductions from the income of employees and independent workers and the taxes on emissions and waste disposal.

During the year, the company was still exempt from IRPEG taxation, an exemption which will expire in October 2003.

### Due to Social Security Institutions (Euro 83 thousand)

This item (Euro 65 thousand at December 31<sup>st</sup> 2001) includes Euro 49 thousand due to the various institutions for social security and national insurance contributions relating to salaries and wages for the months of December 2002 and the allocation of Euro 34 thousand for contributions due from the pay accrued by employees on holidays and paid days off not taken, productivity premiums and overtime not yet paid.

54

### Other payables

	31.12.02	31.12.01
Payables due to employees	202	140
Other sundry payables	115	221
	<b>317</b>	<b>362</b>

"Payables due to employees" refers to sums not yet paid and includes holidays and paid days off not yet taken, overtime and productivity premiums.

The item "other sundry payables" relates to expenses for 2001 paid to the Antitrust Authority for electricity and gas.

### 6.12 Accrued expenses and deferred income

	31.12.02	31.12.01
<b>Accrued expenses:</b>		
Additional salary expenses and contributions	33	29
Expenses from swap operations (IRS)	510	446
	<b>543</b>	<b>476</b>
Rents payable		4

	<u>31.12.02</u>	<u>31.12.01</u>
<b>TOTAL</b>	<b>543</b>	<b>479</b>

The accrued expenses include the expense of Euro 510 thousand of the hedging operation on the interest rates (IRS) of the financial debt obtained via Project financing.

Payables and Accrued expenses are broken down by maturity as follows:

	<u>within 12 months</u>	<u>within 5 years</u>	<u>beyond 5 years</u>	<u>Total</u>
<b>Payables</b>				
bank borrowings	97,598	334,177	268,367	700,142
due to suppliers	24,429			24,429
due to parent companies	29,550	15,653	33,565	78,767
due to associated companies	18,544	3,603	2,252	24,400
due to tax authorities	2,497			2,497
due to social security institutions	83			83
other payables	317			317
<b>Accrued expenses and deferred income</b>				
accrued expenses	543			543
deferred income				
<b>TOTAL</b>	<b>173,561</b>	<b>353,433</b>	<b>304,184</b>	<b>831,178</b>

### 6.13 Memorandum accounts (Euro 3,651 thousand)

Memorandum accounts are open on the raw materials deposited at the ISAB refinery belonging to ERG Raffinerie Mediterranee S.r.l. for Euro 3,631 thousand, and to company goods on consignment to third parties for Euro 20 thousand, as they were goods in transit at December 31<sup>st</sup> 2002.

Reference is made to previous descriptions regarding the Project Financing restrictions, to which the financial flows produced by the company are subject, and to the commitments accepted via the Interest Rate Swap operation, which was activated in order to cover the interest rates on the Project Financing debt.

## 7. Notes to the Income Statement

### 7.1 Production Value (Euro 444,419 thousand)

#### Revenues from sales and services

	<u>2002</u>	<u>2001</u>	<u>2000</u>
<b>Sales and services to customers:</b>			
Electricity	409,329	366,760	221,380
Other services and sales	2,437	1,975	1,292
	<b>411,765</b>	<b>368,736</b>	<b>222,672</b>
<b>Sales and services to parent companies:</b>			
Heat	4,886	5,943	4,214
Steam	1,066	1,364	
Fluxing product (oil)	176	228	1,521

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Other services and sales	909	937	1,009
	<u>7,038</u>	<u>8,471</u>	<u>6,745</u>
<b>Sales and services to associated companies:</b>			
Heat	1,966		
Steam	302		
Other services and sales	248		
	<u>2,516</u>		
<b>TOTAL</b>	<b>421,319</b>	<b>377,207</b>	<b>229,416</b>

Sales revenues are mainly made up of sales of electrical power at the incentive price of CIP/6, inclusive of the adjustment to the sales tariff for 2002, estimated to be minus Euro 21,293 thousand. Net production sold amounted to 4,197 thousand MWh (3,621 thousand in 2001).

Sales and services include revenues for the supply of steam, air, water and various supplies of minor products.

The revenues from parent companies relate to ERG Petroli for just the first nine months of the year and those from associated company ERG Raffinerie Mediterranee for the last three months of the year.

**Changes in the inventories of products in progress, semi-finished products and finished products (Euro 137 thousand)**

The changes relate to the lower value of sulphur inventories (Euro 72 thousand) and vanadium concentrate (Euro 65 thousand).

**Fixed asset increases for internal work**

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Interest payable and financial charges			12,173
Work by employees			333
Material taken from the warehouse	824	37	
<b>TOTAL</b>	<b>824</b>	<b>37</b>	<b>12,506</b>

This item refers to the value of the spare parts taken from the warehouse and used to increase capitalised investments.

**Other income and revenues**

	<u>2002</u>	<u>2001</u>	<u>2000</u>
<b>Sales and services to customers:</b>			
Electricity			63,180
Other services and sales			234
			<u>63,414</u>
<b>Sales and services to parent companies:</b>			
Heat			873
Fluxing product (oil)			632
Other services and sales			293
			<u>1,798</u>

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>2002</u>	<u>2001</u>	<u>2000</u>
<b>Other revenue and income</b>			
Insurance reimbursements	5	17,070	
Penalties and compensation from suppliers	21,091	233	4
Ordinary surpluses	988	1,268	
Sundry revenue and income	328	300	158
	<u>22,413</u>	<u>18,872</u>	<u>162</u>
<b>TOTAL</b>	<b>22,413</b>	<b>18,872</b>	<b>65,374</b>

The compensation arising from the settling of the dispute with the Consortium was recorded amongst "Other revenue and income" as it is linked to the late delivery of the IGCC plant.

For the sake of clarity it should be noted that the sales figures for 2000 refer to the trial period of the plant, completed on April 18<sup>th</sup> 2000, and after that date the values generated by production are entirely allocated in the item a 1) of the Income Statement.

## 7.2 Production expenses (Euro 282,474 thousand)

### Raw, ancillary, and consumable materials and goods

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Raw materials and goods	155,552	160,297	179,818
Materials and spare parts	9,422	8,909	7,363
Sundry materials and purchases	99	61	81
	<u>165,073</u>	<u>169,267</u>	<u>187,262</u>
<b>TOTAL</b>	<b>165,073</b>	<b>169,267</b>	<b>187,262</b>

The purchases relate to the supplies of oxygen and nitrogen for Euro 48,943 thousand, electrical power for Euro 11,388 thousand, methane gas for Euro 5,229 thousand and raw materials supplied by the parent company ERG Petroli and the associated company ERG Raffinerie Mediterranee for Euro 67,700 thousand and Euro 22,293 thousand, respectively.

The relations with other group companies consisted of: the supply of diesel (Euro 10,451 thousand), feedstock (Euro 65,204 thousand), fuel oil (Euro 5,006 thousand) and LCO, Virgin naphtha and LPG (Euro 9,332 thousand).

### Service costs

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Commercial services and transportation	6,459	5,306	3,108
Maintenance and operational assistance	11,970	18,096	10,876
Technical, legal and other advice and services	4,208	7,878	17,004
Insurance	9,730	3,527	1,247
Personnel Costs	192	216	159
Services from parent companies	4,767	3,975	2,528
Services from associated companies	18,858	20,063	14,105
Other services	1,939	289	253
	<u>58,123</u>	<u>59,349</u>	<u>49,281</u>
<b>TOTAL</b>	<b>58,123</b>	<b>59,349</b>	<b>49,281</b>

Service costs on a whole dropped by Euro 1,226 thousand, compared to the previous year. More specifically, the industrial services for the year and the running and maintenance of the plants decreased by Euro 6,083 thousand, commercial services increased by Euro 1,165 thousand and administrative and general services increased by Euro 3,692 thousand.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

Of particular relevance were the increases of insurance policy premiums to cover the risks of damage on the IGCC plant, which recorded an increase of more than 275%.

The services supplied by the parent company ERG Petroli relate to the provision of steam (Euro 2,923 thousand), fire-fighting/prevention services (Euro 797 thousand), several general services, I.T. services, first aid and medical services and public relations (Euro 806 thousand).

The amount paid to ERG S.p.A. (Euro 240 thousand) relates to service contracts regarding staff activities, public relations and the emoluments of directors directly employed by the parent company.

Services received from the associated companies Mission Energy Italia S.r.l. and Edison Mission Energy Ltd. amounted to Euro 336 thousand and relate to the off-site personnel, the emoluments of the directors employed by the companies and financial and insurance consultancy services.

The services rendered by ISAB Energy Services S.r.l. (Euro 17,823 thousand) relate exclusively to the activities of running and maintaining the IGCC complex.

The services received from the associated company ERG Raffinerie Mediterranee relate to the provision of steam (Euro 438 thousand), to fire-fighting/prevention services (Euro 266 thousand) and to other general and commercial services (Euro 42 thousand).

According to the provisions of article 2427 no. 16 of the Italian Civil Code, the fees paid to the Directors and Auditors are set out below:

Directors	106
Statutory Auditors	35
<b>Leases and rentals</b>	

	2002	2001	2000
Rents paid	247	205	366
Long-term hires/leasing	245	179	214
Royalties	1,472	604	717
	<b>1,964</b>	<b>989</b>	<b>1,296</b>
<b>TOTAL</b>			

The item "rents paid" consists of rents paid to the parent company ERG Petroli and to the associated company ERG Raffinerie Mediterranee for the storage of raw materials (Euro 157 thousand

58

and Euro 53 thousand, respectively), to the leasing of service cars (Euro 41 thousand), to office equipment (Euro 41 thousand), to the leasing of computers and instruments (Euro 79 thousand), and various rents (Euro 121 thousand).

The royalties mainly relate to the use of the "Texaco" technological license for the industrial and gasification processes (Euro 1,409 thousand).

### Personnel expenses

	2002	2001	2000
Wages and salaries	952	906	995
Social security expenses	281	242	283
Staff leaving indemnities	65	55	69
Other expenses	19	1	
	<b>1,316</b>	<b>1,204</b>	<b>1,347</b>
<b>TOTAL</b>			

The company avails itself of services rendered by the company ISAB Energy Services for the running of the industrial complex. Personnel expenses therefore refer only to white-collar staff and not operational personnel.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The table shows the breakdown of company personnel by category (average number during the year):

	2002	2001	2000
Managers	4	4	4
Executives	4	5	7
Employees	11	12	11
	<b>19</b>	<b>21</b>	<b>23</b>

At December 31st 2002 the total number of employees was 19 (22 at December 31st 2001).

### Amortisation, depreciation and write-downs

	2002	2001	2000
Amortisation of intangible fixed assets	8,795	9,011	6,629
Depreciation of tangible fixed assets	36,981	36,247	25,001
Write-downs of intangible fixed assets			102
	<b>45,776</b>	<b>45,258</b>	<b>31,733</b>

The value of the amortisation of intangible assets fell due to the completion of the three-year cycle of several software programmes.

The slight increase in the depreciation of fixed assets is due to new assets becoming operational during the year.

Amortisation and depreciation was calculated with exclusive reference to the economic and technical values and excess amortisation and depreciation was therefore not applied.

### Changes in the inventories of raw, ancillary and consumable materials and goods (Euro 1,212 thousand)

The inventories of raw materials saw a negative change of around Euro 285 thousand almost totally due to the fall of 1,151 tonnes of diesel.

59

The change in ancillary and consumable materials was Euro 1,497 thousand, largely due to the effect from the higher levels of spare parts.

### Other provisions (Euro 6,459 thousand)

This item mainly consists (Euro 6,412 thousand) of the maintenance costs for the cyclical shutdown of the plant.

### Other operating expenses

	2002	2001	2000
Duties and taxes for the year	3,510	3,439	4,470
Entertainment and public relations	159	181	96
Ordinary losses	1,166	886	
Losses on disposals of assets	139		
Other expenses			97
	<b>4,975</b>	<b>4,506</b>	<b>4,663</b>

The duties and taxes mainly refer to I.C.I. paid to the council of Priolo Gargallo (Euro 3,242 thousand), the tax on waste (Euro 122 thousand) and the tax on emissions (Euro 76 thousand).

The ordinary losses refer to expenses and revenues pertaining to previous years.

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The losses on disposals of assets relate to the ordinary disposal of the productive process of a plant asset replaced during the year and to several personal computers.

### 7.3 Financial income and expenses (Euro 47,232 thousand)

#### Other financial income

	2002	2001	2000
Bank interest receivables	2,300	2,525	793
Interest receivables from parent companies	52	237	29
Interest receivables from associated companies	26		
Sundry financial income	188	312	76
	2,566	3,074	897

The bank interest receivables arise mainly from the current cash account balances. The interest receivables from parent companies relate to trade relations with ERG Petroli and those from associated companies represent the current share of the loan receivable from ISAB Energy Services.

60

#### Interest and other financial expenses

	2002	2001	2000
Interest payable on financing	30,971	43,943	42,923
Financial expenses payable on financing	5,780	5,989	5,564
Payables due to swap differentials	9,461	2,230	
Interest payable to ERG Petroli S.p.A.	1,431	1,768	660
Interest payable to MEC Priolo (Holland)	191		
Interest payable to Edison Mission Energy (USA)	1,182	1,687	634
Interest payable to ISAB Energy Services	115	45	
Payable due to exchange rate differences	60	178	179
Sundry interest payable and financial expenses	607	59	43
	49,797	55,900	50,003

The Project financing expenses for the year were Euro 5,951 thousand lower than in the previous year, because of the combined effect of lower interest rates and a reduced level of overall debt, partially compensated by the higher negative differentials paid on the "Interest Rate Swap."

The interest payable to ERG Petroli and MEC Priolo and Edison Mission Energy relate to those accrued on subordinated loans and Project financing.

The other financial expenses relate to the adjustment of interest receivables for previous years (Euro 550 thousand) and bank commissions.

### 7.4 Extraordinary items (Euro 391 thousand)

	2002	2001	2000
<b>Extraordinary income</b>			
Gains on disposal of assets		34	
Extraordinary gains			59
Other extraordinary income			2,346
		34	2,404

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

	<u>2002</u>	<u>2001</u>	<u>2000</u>
<b>Extraordinary expenses</b>			
Taxes pertaining to previous years	391		
Losses on disposal of assets		195	1
Extraordinary losses			378
	<u>391</u>	<u>195</u>	<u>379</u>
<b>TOTAL</b>	<b>(391)</b>	<b>(161)</b>	<b>2,025</b>

Euro 391 thousand has been allocated to cover the estimate of the tax charges which the company should have to pay for the assessment by the revenue authorities for the tax periods 1998 and 1999.

**7.5 Income tax**

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Current IRAP	7,290	5,066	1,601
Advance and deferred taxes	72	86	(4,037)
<b>TOTAL</b>	<b>7,362</b>	<b>5,152</b>	<b>(2,437)</b>

61

The provision for income taxes for the year was calculated taking into account the estimated IRAP taxable income determined in the light of current tax regulations.

As far as IRPEG is concerned, the company is covered by a ten-year exemption, which expires in 2003.

Movements in deferred taxes mainly refer to the recovery of IRAP paid in advance on the capitalisation of financial expenses.

**Reconciliation between financial statements and theoretical tax charges**

**IRPEG**

<b>Profit before taxes</b>	<b>114,321</b>	
<b>Theoretical IRPEG taxation (36%)</b>		<b>41,156</b>
<b>Taxable timing differences subsequent years</b>		
<b>Deductible timing differences subsequent years</b>		
<b>Transfer of timing differences from previous years</b>		
<b>Differences which will not arise in subsequent years:</b>

## 9. Reconciliation to Generally Accepted Accounting Principles in the United States

(Amounts in Thousands of Euro, unless otherwise indicated)

## Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

The Company's accounting policies for financial reporting in accordance with Italian GAAP differ in certain respects from accounting principles generally accepted in the United States ("US GAAP"). Significant differences, which have an effect on Net Income / (Loss) and Shareholders' Equity, are described below:

The net income (loss) and net equity (deficit) for each of the three years ended December 31, 2002, have been restated to include the effects of a clerical error in the computation of the net deferred tax asset at the end of each year, respectively. The effect on net income (loss) was additional expense of Euro 1,662, Euro 2,216 and Euro 1,945 for the years ended December 31, 2000, 2001 and 2002, respectively, and to decrease equity Euro 991, Euro 3,206 and Euro 5,151 as of December 31 2000, 2001 and 2002, respectively.

(a)

**Levelisation of incentive component** The selling tariffs of electricity are established annually by the Italian Authority for Energy and include, for the first eight years of operations, an incentive premium referred to as CIP/6. The CIP/6 premium is available to the Company due to an Italian Law applicable to companies that generate electricity through renewable sources. The incentive is currently being received by the Company as part of its annual billing to GTRN; for purposes of Italian GAAP revenue recognition, the amount of the premium is billed annually and recognized in the Profit and Loss Statement.

Under US GAAP, EITF 91-6, Revenue Recognition of Long-Term Power Sales Contracts ("EITF 91-6"), provides the framework for revenue recognition on these types of arrangements. Within EITF 91-6, the Company's contract falls under the "type 1" contract, that is, a contract where the utility is obligated to take or pay for all power made available by the independent power producer for the term of the contract. The price per Kwh is specified and could either increase or decrease during the contract term. EITF 91-6 states that revenue recognition for these types of contracts should be at the lower of i) amounts billable under the contract and ii) an amount equal to the Kwh made available during the period multiplied by the estimated average revenue per Kwh over the term of the contract. The determination of the lesser amount should be made annually based on the cumulative amounts that would have been recognized had each method been applied consistently since the commencement of the contract.

Therefore, for US GAAP purposes, such incentive should be recognized in income over the life of the fifteen-year power sales contract. Therefore, a portion of the CIP/6 incentive billed in each of the first eight years of the plant operation is being deferred to the following years.

(b)

**Capitalization of refinancing costs** In 2000, the project-financing contract was re-negotiated in order to extend its length; according to Italian GAAP, the cost of this re-negotiation was charged to the 2000 statement of operations.

The accounting under US GAAP for this situation is highlighted in EITF 96-19, Debtor's Accounting for a Modification or Exchange of Debt Instruments ("EITF 96-19"). According to EITF 96-19, an exchange of debt is considered significant if, from the debtor's perspective, an exchange of debt instruments between or a modification of a debt instrument by a debtor and a creditor in a non troubled debt situation is deemed to have been accomplished with debt instruments that are substantially different if the present value of the cash flows under the terms of the new debt instrument is at least 10 percent different from the present value of the remaining cash flows under the terms of the original instrument. The restructuring of the debt arrangement, and the resultant net present value of the cash flows was not more than the 10% required by EITF 96-19, therefore, the exchange was not considered substantially different. Such costs have been capitalized and amortized over the life of the project-financing contract.

64

---

(c)

**Reversal of cyclical maintenance fund** The plant consists of two separate lines which need to be shut down every four years for cyclical maintenance. According to Italian GAAP, the budgeted costs for the cyclical maintenance are distributed over the scheduled cycle period through the accrual of a cyclical maintenance provision. Actual costs are charged against the reserve as incurred. According to US GAAP, all maintenance costs are entirely charged to the statement of operations when incurred or, to the extent necessary, capitalized.

(d)

**Derivatives** The only derivative products in use by Isab are interest rate swaps, which are used to lock-in a targeted level of interest rates on the Company's long-term debt. For Italian GAAP purposes, the changes in the fair value of the hedges are not recognized. For US GAAP purposes, it is necessary to designate derivative financial instruments at the time of their inception in order to qualify for hedge accounting. The Company has certain derivatives that have qualified for hedge accounting treatment. The change in the fair values of these hedges is included in Shareholders' Equity. However, one tranche of the debt is covered by an interest rate swap that does not qualify for hedge accounting, therefore the change in the fair value of the derivative has been recognized in earnings. The liability recognized on the balance sheet at December 31, 2002 for this derivative was Euro 5,982 thousand (Euro 6,859 thousand as at

Edgar Filing: EDISON MISSION ENERGY - Form 10-K/A

December 31, 2001).

(e) **Settlement agreement** A claim was pending between Isab and the plant construction consortium for costs related to delayed start up of the plant and additional construction costs related to change orders.

On February 17, 2003, the syndicate banks gave their consent to the settlement agreement reached with the consortium, the agreement was signed on December 30, 2002. By way of indemnity and considerations for the reached agreements, the Consortium agreed to pay a total amount of Euro 21,030 thousand, a portion of which (Euro 15,000 thousand) was to be in cash within February 2003 and an additional Euro 6,030 thousand in waived royalty payments.

In accordance with Italian Law, the effectiveness of the settlement was retroactive to the signature date and the settlement was treated as income in the year ended December 31, 2002. For US GAAP purposes, the settlement would not be recognized in 2002 as it was contingent on future events, in particular the consent of the banks.

(f) **Accounting for start-up costs** Under Italian GAAP, the Company has capitalized and deferred various costs, mainly start-up and other ancillary costs such as training that are to be expensed as incurred under US GAAP.

(g) **Recognition of insurance reimbursement** The Company incurred certain reimbursable damages in 2001, for which insurance claims were filed. According to Italian GAAP, these claims are recognized when reasonably estimable on the basis of supporting documentation. For US GAAP purposes, these amounts are not recognized until they are realizable.

(h) **Accounting for income taxes** In the accompanying reconciliation the effects of the recognition of deferred income taxes relate only to the US GAAP adjustments that give rise to temporary differences between the reporting basis for Italian GAAP and the reporting basis for US GAAP, no significant differences exist between the method of accounting for deferred income taxes applied by Isab under Italian GAAP and US GAAP. The Italian statutory taxation is based on a national tax (IRPEG 36% in 2002 and previous years, 34% in 2003 and following) and on a Regional Tax on Productive Activities (IRAP 4.25%). The taxable basis for the computation of IRAP is essentially operating income, calculated on the basis of the legal Italian statements, plus labor costs. In addition, the company is in a ten-year exemption from IRPEG, which expires in October 2003; the 2003 income will be therefore taxable at the average IRPEG rate of 8.5%, which corresponds to the application of the full tax rate (34%) on a pro-rata basis for one-quarter of 2003.

65

The following table summarizes the significant adjustments to the net loss and shareholders' equity which would be required if US GAAP had been applied instead of Italian accounting principles.

	NET EQUITY (DEFICIT)			NET INCOME (LOSS)		
	2002	2001	2000	2002	2001	2000
	Restated	Restated	Restated	Restated	Restated	Restated
Amounts as per Italian GAAP	144,083	70,657	13,698	106,959	56,959	(11,517)
a <b>Levelisation of Incentive Component</b>	(130,553)	(76,060)	(30,201)	(54,493)	(45,859)	(30,202)

<b>Fair value of hedging derivatives</b>			<b>1,093</b>	<b>1,093</b>
<b>2002 result</b>			<b>71,297</b>	<b>71,297</b>
Balance December 31, 2002	5,165	24,302	21,695	51,162

The coverage of losses under Italian GAAP utilizing paid-in capital has been reclassified under "Additional paid-in capital," for the purpose of US GAAP.

Furthermore, the reimbursement of paid in capital (Euro 8,533 thousand), classified in the Italian accounts as increase of subordinated debt from Shareholders is classified in the above table as dividends.

Italian law requires that 5% of a company's net income be retained as a legal reserve, until such reserve equals 20% of the share capital. This reserve, amounting to Euro 1,033 thousand at December 31, 2002, is not available for distribution.

The Company has capitalized certain start-up and expansion costs under Italian GAAP. According to the Italian Law dividends can be distributed only if the equity reserves are higher than the unamortized amount of such capitalized costs that, at December 31, 2002, amounted to Euro 12,017 thousand.

Dividends amounting to Euro 25,000 thousand were authorized by the Shareholders to be distributed; however, as above mentioned, the banks have blocked all subordinated payments, including dividends, until the Project Financing covenants are met or reviewed.

**SIGNATURES**

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this Amendment No. 2 on Form 10-K/A to its annual report on Form 10-K for the year ended December 31, 2002 to be signed on its behalf by the undersigned, thereunto duly authorized.
