As filed with the Securities and Exchange Commission on June 28, 2007

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 20-F

- o REGISTRATION STATEMENT PURSUANT TO SECTION 12(B) OR (G) OF THE SECURITIES EXCHANGE ACT OF 1934
OR
- ý ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2006
OR
- o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
OR
- o SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission File Number: 1-15040

PRUDENTIAL PUBLIC LIMITED COMPANY

(Exact Name of Registrant as Specified in its Charter)

England and Wales

(Jurisdiction of Incorporation)

**Laurence Pountney Hill,
London EC4R 0HH, England**

(Address of Principal Executive Offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on Which Registered

American Depositary Shares, each
representing 2 Ordinary Shares, 5 pence
par value each

New York Stock Exchange

Ordinary Shares, 5 pence par value each

New York Stock Exchange*

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

The number of outstanding shares of each of the issuer's classes of capital or common stock as of December 31, 2006 was:

Edgar Filing: PRUDENTIAL PLC - Form 20-F

2,444,312,425 Ordinary Shares, 5 pence par value each

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Item 3. Key Information**SELECTED HISTORICAL FINANCIAL INFORMATION OF PRUDENTIAL**

The following table sets forth Prudential's selected consolidated financial data for the periods indicated. Certain data is derived from Prudential's audited consolidated financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"). Were the Group to apply IFRS as published by the IASB, as opposed to EU adopted IFRS, no additional adjustments would be required. Note J to the Prudential audited consolidated financial statements included elsewhere in this document includes a description of the differences between IFRS and US GAAP that are significant to the financial statements and provides a reconciliation from IFRS consolidated profit and shareholders' equity to US GAAP consolidated net income and shareholders' equity, respectively. Item 5, "Operating and Financial Review and Prospects US GAAP Analysis" provides a discussion of the significant differences between IFRS and US GAAP. This table is only a summary and should be read in conjunction with Prudential's consolidated financial statements and the related notes included elsewhere in this document, together with Item 5, "Operating and Financial Review and Prospects".

The following table presents the income statement and balance sheet data for and as at the years ended December 31, 2004 to 2006, as presented in accordance with IFRS, and for the years ended December 31, 2002 to 2006, as presented in accordance with US GAAP, and has been derived from Prudential's consolidated financial statements, audited by KPMG Audit Plc:

Funds under management	491,609	251,000	234,000	197,000		

Certain other minor reclassifications and presentational changes have been made to the amounts presented for prior periods to conform these periods to the current presentation. Such reclassifications and presentational changes had no overall effect on the shareholders' funds, profits or cash flows.

- (1) Amounts stated in US dollars have been translated from pounds sterling at the rate of \$1.9586 per £1.00 (the noon buying rate in New York City on December 29, 2006).
- (2) Profit before tax represents income net of post-tax transfers to unallocated surplus of with-profits funds, before tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders' profits.
- (3) Discontinued operations predominantly relate to Jackson Federal Bank ("JFB"), Egg France and Funds Direct. See Note F6 of the notes to Prudential's consolidated financial statements.
- (4) Effective January 1, 2004, the Group adopted SOP 03-01 "Accounting and Reporting by Insurance Enterprises for Certain Non-traditional Long Duration Contracts and Separate Accounts". This has resulted in business previously being disclosed as separate

Edgar Filing: PRUDENTIAL PLC - Form 20-F

accounts business being reclassified to the general account. The cumulative effect of this change in accounting principle is described in Note K of the consolidated financial statements.

- (5) New regular premium sales are reported on an annualized basis, which represents a full year of installments in respect of regular premiums irrespective of the actual payments made during the year.
- (6) New business premiums are calculated as the aggregate of regular new business amounts and one-tenth of single new business amounts.

The tables shown above are provided as an indicative volume measure of transactions undertaken in the reporting period that have the potential to generate profits for shareholders. The amounts shown are not, and not intended to be, reflective of premium income recorded in the IFRS income statement.

The tables above include a bulk annuity transaction with the Scottish Amicable Insurance Fund ("SAIF") with a premium of £560 million. The transaction reflects the arrangement entered into in June 2006 for the reinsurance of non-profit immediate pension annuity liabilities of SAIF to Prudential Retirement Income Limited ("PRIL"), a shareholder-owned subsidiary of the Group. SAIF is a closed ring-fenced sub-fund of the Prudential Assurance Company Limited ("PAC") long-term fund established by a Court approved Scheme of Arrangement in October 1997, which is solely for the benefit of SAIF policyholders. Shareholders have no interest in the profits of this fund, although they are entitled to investment management fees on this business. The inclusion of the transaction between SAIF and PRIL as new business in the tables reflects the transfer from SAIF to Prudential shareholders' funds of longevity risk, the requirement to set aside supporting capital, and entitlement to surpluses arising on this block of business from the reinsurance arrangement. For Group reporting purposes the amounts recorded by SAIF and PRIL for the premium are eliminated on consolidation.

The details shown above for insurance products include contributions for contracts that are classified under IFRS 4 "Insurance Contracts" as not containing significant insurance risk. These products are described as investment contracts or other financial instruments under IFRS. Contracts included in this category are primarily certain unit-linked and similar contracts written in UK insurance operations and Guaranteed Investment Contracts and similar funding agreements written in US operations.

New business premiums for regular premium products are shown on an annualized basis. Department of Work and Pensions ("DWP") rebate business is classified as single recurrent business. Internal vesting business is classified as new business where the contracts include an open market option.

UK and Asian investment products referred to in the table for funds under management above are unit trust, mutual funds and similar types of retail fund management arrangements. These are unrelated to insurance products that are classified as "investment contracts" under IFRS 4, as described in the preceding paragraph, although similar IFRS recognition and measurement principles apply to the acquisition costs and fees attaching to this type of business. US investment products are no longer included in the table above as they are assets under administration rather than funds under management.

- (7) In previous periods new business premiums for intermediated distribution of UK insurance operations have included DWP rebate business for SAIF. As shareholders have no interest in SAIF, these are now excluded from the table above with comparatives restated accordingly. The amounts of new SAIF DWP rebate business written were £60 million for 2006, £83 million for 2005, £89 million for 2004, £103 million for 2003 and £90 million for 2002.
- (8) Under IFRS, dividends declared after the balance sheet date in respect of the prior reporting period are treated as a non-adjusting event. The appropriation reflected in the statement of changes in equity, therefore, includes the final dividend in respect of the prior year. Parent company dividends relating to the reporting period were an interim dividend of 5.42p per share in 2006 (2005: 5.30p, 2004: 5.19p) and a final dividend of 11.72p per share in 2006 (2005: 11.02p, 2004: 10.65p).
- (9) The dividends have been translated into US dollars at the noon buying rate on the date each payment was made.

Dividend Data

Under UK company law, Prudential may pay dividends only if "distributable profits" of the holding company are available for that purpose. "Distributable profits" are accumulated, realized profits not previously distributed or capitalized less accumulated, realized losses not previously written off, on the applicable GAAP basis. Even if distributable profits are available, under UK law Prudential may pay dividends only if the amount of its net assets is not less than the aggregate of its called-up share capital and undistributable reserves (such as, for example, the share premium account) and the payment of the dividend does not reduce the amount of its net assets to less than that aggregate. For further information about the holding company refer to Schedule II. The financial information in Schedule II has been prepared under UK GAAP

Edgar Filing: PRUDENTIAL PLC - Form 20-F

reflecting the legal basis of preparation of the Company's separate financial statements as distinct from the IFRS basis that applies to the Company's consolidated financial statements.

As a holding company, Prudential is dependent upon dividends and interest from its subsidiaries to pay cash dividends. Many of its insurance subsidiaries are subject to regulations that restrict the amount of dividends that they can pay to Prudential. These restrictions are discussed in more detail in Item 4, "Information on the Company Supervision and Regulation of Prudential UK Supervision and

Regulation Regulation of Insurance Business Distribution of Profits and With-profits Business" and Item 4, " Information on the Company Supervision and Regulation of Prudential US Supervision and Regulation General".

Historically, Prudential has declared an interim and a final dividend for each year (with the final dividend being paid in the year following the year to which it relates). Subject to the restrictions referred to above, Prudential's directors have the discretion to determine whether to pay a dividend and the amount of any such dividend but must take into account the Company's financial position.

The following table shows certain information regarding the dividends per share that Prudential declared for the periods indicated in pence sterling and converted into US dollars at the noon buying rate in effect on each payment date. Interim dividends for a specific year now generally have a record date in August and a payment date in September of that year, and final dividends now generally have a record date in the following April and a payment date in the following May. The comparative figures for 2002 to 2003 have been restated to take account of Prudential's rights offering in 2004. The restatement factor used for these periods is 0.9614 based on a theoretical ex-rights price of 405.71 pence divided by the closing share price on the final day Prudential's shares traded cum-rights of 422.00 pence.

Year	Interim Dividend	Interim Dividend	Final Dividend	Final Dividend
	(pence)	(US Dollars)	(pence)	(US Dollars)
2002	8.56	0.1329	16.44	0.2688
2003	5.09	0.0863	10.29	0.1867
2004	5.19	0.0952	10.65	0.1950
2005	5.30	0.0942	11.02	0.2046
2006	5.42	0.1028	11.72	

A final dividend for 2006 of 11.72 pence per share was approved by the shareholders at the Annual General Meeting held on May 17, 2007. The interim dividend for 2006 was 5.42 pence per share. The total dividend for the year, including the interim dividend and the final dividend, amounts to 17.14 pence per share compared with 16.32 pence per share for 2005, an increase of five per cent. The total cost of dividends in respect of 2006 was £418 million. The full dividend is covered 1.5 times by post-tax IFRS operating profit from continuing operations. Dividend cover is calculated as operating profit after tax on an IFRS basis, divided by the current year total dividend. The board will focus on delivering a growing dividend, which will continue to be determined after taking into account the Group's financial flexibility and opportunities to invest in areas of the business offering attractive returns. The Board believes that in the medium term a dividend cover of around two times is appropriate.

Exchange Rate Information

Prudential publishes its consolidated financial statements in pounds sterling. References in this document to "US dollars", "US\$", "\$" or "¢" are to US currency, references to "pounds sterling", "£", "pounds", "pence" or "p" are to UK currency (there are 100 pence to each pound) and references to "Euro" or "€" are to the Euro. The following table sets forth for each year the average of the noon buying rates on the last business day of each month of that year, as certified for customs purposes by the Federal Reserve Bank of New York, for pounds sterling expressed in US dollars per pound sterling

Edgar Filing: PRUDENTIAL PLC - Form 20-F

for each of the five most recent fiscal years. Prudential has not used these rates to prepare its consolidated financial statements.

Year ended December 31,	Average rate
2002	1.51
2003	1.65
2004	1.84
2005	1.82
2006	1.86

The following table sets forth the high and low noon buying rates for pounds sterling expressed in US dollars per pound sterling for each of the previous six months:

	High	Low
December 2006	1.98	1.95
January 2007	1.98	1.93
February 2007	1.97	1.94
March 2007	1.97	1.92
April 2007	2.01	1.96
May 2007	2.00	1.97

On June 26, 2007, the noon buying rate was £1.00 = \$2.00.

RISK FACTORS

A number of factors (risk factors) affect Prudential's operating results, financial condition and trading price. The risk factors mentioned below should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. The information given is as of the date of this report, is not updated, and any forward-looking statements are made subject to the reservations specified below under "Forward-Looking Statements".

Prudential's businesses are inherently subject to market fluctuations and general economic conditions.

Prudential's businesses are inherently subject to market fluctuations and general economic conditions. In the United Kingdom, this is because a significant part of Prudential's shareholders' profit is related to bonuses for policyholders declared on its with-profits products, which are broadly based on historic and current rates of return on equity, real estate and fixed income securities, as well as Prudential's expectations of future investment returns.

In the United States, fluctuations in prevailing interest rates can affect results from Jackson National Insurance Company ("Jackson"), which has a significant spread-based business with the majority of its assets invested in fixed income securities. In particular, fixed annuities and stable value products written by Jackson expose the Group to the risk that changes in interest rates, which are not fully reflected in the interest rates credited to customers, will reduce spread. The spread is the difference between the amounts that Jackson is required to pay under the contracts and the rate of return it is able to earn on its general account investments to support the obligations under the contracts. Declines in spread from these products or other spread businesses that Jackson conducts, could have a material impact on its businesses or results of operations.

For some non unit-linked investment products, in particular those written in some of the Group's Asian operations, it may not be possible to hold assets which will provide cash flows to exactly match those relating to policyholder liabilities. This is particularly true in those countries where bond markets are not developed and in certain markets such as Taiwan where regulated surrender values are set by regulators with reference to the interest rate environment prevailing at time of policy issue. This results in a mismatch due to the duration and uncertainty of the liability cash flows and the lack of sufficient assets of a suitable duration. This residual asset/liability mismatch risk can be managed but not eliminated. Where interest rates in these markets remain lower than surrender values over a sustained period this could have an adverse impact on the Group's reported profit.

In all markets in which Prudential operates, its businesses are susceptible to general economic conditions and changes in investment returns, which can change the level of demand for Prudential's products. Past uncertain trends in international economic and investment climates which have adversely affected Prudential's business and profitability could be repeated. This adverse effect would be felt principally through reduced investment returns and credit defaults. In addition, falling investment returns could impair Prudential's operational capability, including its ability to write significant volumes of new business. Prudential in the normal course of business enters into a variety of transactions, including derivative transactions with counterparties. Failure of any of these counterparties, particularly in conditions of major market disruption, to discharge their obligations, or where adequate collateral is not in place, could have an adverse impact on Prudential's results.

Prudential is subject to the risk of exchange rate fluctuations owing to the geographical diversity of its businesses.

Due to the geographical diversity of Prudential's businesses, it is subject to the risk of exchange rate fluctuations. Prudential's international operations in the United States and Asia, which represent a significant proportion of operating profit and shareholders' funds, generally write policies and invest in

assets denominated in local currency. Although this practice limits the effect of exchange rate fluctuations on local operating results, it can lead to significant fluctuations in Prudential's consolidated financial statements upon translation of results into pounds sterling. The currency exposure relating to the translation of reported earnings is not separately managed. Consequently, this could impact on the Group's gearing ratios (defined as debt over debt plus shareholders' funds). The impact of gains or losses on currency translations is recorded as a component of shareholders' funds within the statement of changes in equity.

Prudential conducts its businesses subject to regulation and associated regulatory risks, including the effects of changes in the laws, regulations, policies and interpretations and any accounting standards in the markets in which it operates.

Changes in government policy, legislation or regulatory interpretation applying to companies in the financial services and insurance industries in any of the markets in which Prudential operates, which in some circumstances may be applied retrospectively, may adversely affect Prudential's product range, distribution channels, capital requirements and, consequently, reported results and financing requirements. For instance, regulators in jurisdictions in which Prudential operates may change the level of capital required to be held by individual businesses. Also these changes could include possible changes in the regulatory framework for pension arrangements and policies, the regulation of selling practices and solvency requirements. In the United Kingdom several proposed and potential regulatory changes could have significant effect on the types of products Prudential provides to its customers and intermediaries and how those products are priced, distributed and sold. These include the UK Financial Services Authority's ("FSA's") move towards principles-based regulation, the FSA's Treating Customers Fairly initiative, the FSA's review of retail distribution, the proposed regulatory change affecting the UK pensions market and the implementation of the Markets in Financial Instruments Directive ("MiFID") and the Solvency II directive.

Current EU directives require European financial services groups to demonstrate net aggregate surplus capital in excess of solvency requirements at the Group level in respect of shareholder-owned entities. The test is a continuous requirement, so that Prudential needs to maintain a somewhat higher amount of regulatory capital at the Group level than otherwise necessary in respect of some of its individual businesses to accommodate, for example, short-term movements in global foreign exchange rates, interest rates, deterioration in credit quality and equity markets. In addition, changes in the local regulatory regimes of designated territories could affect the calculation of the Group's solvency position under FCD. Given the recently announced sale of Egg, and pending discussions with the FSA, Prudential may again become an insurance group rather than its current classification as a financial conglomerate. This would imply that Prudential would have to meet the requirements of the EU Insurance Groups Directive ("IGD"). This should not have a significant impact on the Group, as the FSA's prudential requirements pertaining to insurance groups are very similar to those applying to financial conglomerates. The EU is also currently reviewing future solvency requirements ("Solvency II") with a draft directive expected in mid 2007 for implementation by member states not earlier than 2010. Inconsistent application of these directives by regulators in different EU member states may place Prudential at a competitive disadvantage to other European financial services groups.

Various jurisdictions in which Prudential operates have created investor compensation schemes that require mandatory contributions from market participants in some instances in the event of a failure of a market participant. As a major participant in the majority of its chosen markets, circumstances could arise where Prudential, along with other companies, may be required to make additional material contributions.

Any further changes or modification of the recently introduced IFRS accounting policies or European Embedded Value ("EEV") principles may require a change in the reporting basis of future results or a restatement of reported results. EEV basis results are published as supplementary

information. The EEV basis is a value based reporting method for Prudential's long-term business which is used by market analysts and which underpins a significant part of the key performance indicators used by Prudential's management for both internal and external reporting purposes.

The resolution of several issues affecting the financial services industry could have a negative impact on Prudential's reported results or on its reputation or on its relations with current and potential customers.

Prudential is, and in the future may be, subject to legal and regulatory actions in the ordinary course of its business, both in the United Kingdom and internationally. This could be a review of business sold in the past under previously acceptable market practices at the time such as the requirement in the United Kingdom to provide redress to certain past purchasers of pension and mortgage endowment policies and regulatory reviews on products sold and industry practices, including in the latter case businesses it has closed.

Regulators particularly, but not exclusively, in the United States and the United Kingdom are increasingly interested in the approach that product providers use to select third-party distributors and to monitor sales made by them.

In the United States, federal and state regulators have focused on, and continue to devote substantial attention to, the mutual fund, variable annuity and insurance product industries. This includes new regulations in respect of the suitability of broker-dealers' sales of certain products. As a result of publicity relating to widespread perceptions of industry abuses, there have been numerous regulatory inquiries and proposals for legislative and regulatory reforms.

In Asia, regulatory regimes are developing at different speeds, driven by a combination of global factors and local considerations. There is a risk that new requirements are introduced that are retrospectively applied to sales made prior to their introduction.

Litigation and disputes may adversely affect Prudential's profitability and financial condition.

Prudential is, and may be in the future, subject to legal actions and disputes in the ordinary course of its insurance, investment management and other business operations. These legal actions and disputes may relate to aspects of Prudential's businesses and operations that are specific to Prudential, or that are common to companies that operate in Prudential's markets. Legal actions and disputes may arise under contracts, regulations or from a course of conduct taken by Prudential, and may be class actions. Although Prudential believes that it has adequately reserved in all material aspects for the costs of litigation and regulatory matters, no assurance can be provided that such reserves are sufficient. Given the large or indeterminate amounts of damages sometimes sought, and the inherent unpredictability of litigation and disputes, it is possible that an adverse outcome could, from time to time, have an adverse effect on Prudential's results of operation or cash flows.

Prudential's businesses are conducted in highly competitive environments with developing demographic trends and Prudential's continued profitability depends on its management's ability to respond to these pressures and trends.

The markets for UK, US and Asian financial services are highly competitive, with several factors affecting Prudential's ability to sell its products and its continued profitability, including price and yields offered, financial strength and ratings, range of product lines and product quality, brand strength and name recognition, investment management performance, historical bonus levels, developing demographic trends and customer appetite for certain savings products. In some of its markets Prudential faces competitors that are larger, have greater financial resources or a greater market share, offer a broader range of products or have higher bonus rates or claims-paying ratios. Further, heightened competition

for talented and skilled employees with local experience, particularly in Asia, may limit the Group's potential to grow its business as quickly as planned.

Within the United Kingdom, Prudential's principal competitors in the life insurance market include many of the major retail financial services companies including, in particular, Aviva, Legal & General, HBOS and Standard Life.

Jackson's competitors in the United States include major stock and mutual insurance companies, mutual fund organizations, banks and other financial services companies such as AXA Financial Inc, Hartford Life Inc., Lincoln National, MetLife, Prudential Financial and TIAA-CREF.

In Asia, the Group's main regional competitors are international financial companies, including AIG, Allianz, ING and Manulife.

Prudential believes competition will intensify across all regions in response to consumer demand, technological advances, the impact of consolidation, regulatory actions and other factors. Prudential's ability to generate an appropriate return depends significantly upon its capacity to anticipate and respond appropriately to these competitive pressures.

Downgrades in Prudential's financial strength and credit ratings could significantly impact its competitive position and hurt its relationships with creditors or trading counterparties.

Prudential's financial strength and credit ratings, which are intended to measure its ability to meet policyholder obligations, are an important factor affecting public confidence in most of Prudential's products, and as a result its competitiveness. Changes in methodologies and criteria used by rating agencies could result in downgrades that do not reflect changes in the general economic conditions or Prudential's financial condition. Downgrades in Prudential's ratings could have an adverse effect on its ability to market products and retain current policyholders. In addition, the interest rates Prudential pays on its borrowings are affected by its debt credit ratings, which are in place to measure Prudential's ability to meet its contractual obligations. Prudential believes the credit rating downgrades it experienced in 2002 and 2003, together with the rest of the United Kingdom insurance industry, and in 2006 by Standard & Poor's to bring Prudential into line with the standard rating agency notching between operating subsidiary financial strength rating and the credit rating for other European insurance holding companies, have not to date had a discernible impact on the performance of its business.

Prudential's long-term senior debt is rated as A2 (stable outlook) by Moody's, A+ (stable outlook) by Standard & Poor's and AA (stable outlook) by Fitch.

Prudential's short-term debt is rated as P-1 by Moody's, A-1 by Standard & Poor's and F1+ by Fitch.

The PAC long-term fund is rated Aa1 (negative outlook) by Moody's, AA+ (stable outlook) by Standard & Poor's and AA+ (stable outlook) by Fitch.

Adverse experience in the operational risks inherent in Prudential's business could have a negative impact on its results of operations.

Operational risks are present in all of Prudential's businesses, including the risk of direct or indirect loss resulting from inadequate or failed internal and external processes, systems and human error or from external events. Prudential's business is dependent on processing a large number of complex transactions across numerous and diverse products, and is subject to a number of different legal and regulatory regimes. In addition, Prudential outsources several operations, including certain United Kingdom processing and IT functions. In turn, Prudential is reliant upon the operational processing performance of its outsourcing partners.

Further, because of the long-term nature of much of Prudential's business, accurate records have to be maintained for significant periods. Prudential's systems and processes incorporate controls which are

designed to manage and mitigate the operational risks associated with its activities. For example, any weakness in the administration systems or actuarial reserving processes could have an impact on its results of operations during the effective period. Prudential has not experienced or identified any operational risks in its systems or processes during 2006, or which have subsequently caused, or are expected to cause, a significant negative impact on its results of operations.

Adverse experience against the assumptions used in pricing products and reporting business results could significantly affect Prudential's results of operations.

Prudential needs to make assumptions about a number of factors in determining the pricing of its products and for reporting the results of its long-term business operations. For example, the assumption that Prudential makes about future expected levels of mortality is particularly relevant for its United Kingdom annuity business. In exchange for a premium equal to the capital value of their accumulated pension fund, pension annuity policyholders receive a guaranteed payment, usually monthly, for as long as they are alive. Prudential conducts rigorous research into longevity risk, using data from its substantial annuitant portfolio. As part of its pension annuity pricing and reserving policy, Prudential United Kingdom assumes that current rates of mortality continuously improve over time at levels based on adjusted data from the Continuous Mortality Investigations ("CMI") medium cohort table projections (as published by the Institute and Faculty of Actuaries). If mortality improvement rates significantly exceed the improvement assumed, Prudential's results of operations could be adversely affected.

A further example is the assumption that Prudential makes about future expected levels of the rates of early termination of products by its customers (persistence). This is particularly relevant to its lines of business other than its United Kingdom annuity business. Prudential's persistence assumptions reflect recent past experience for each relevant line of business. Any expected deterioration in future persistence is also reflected in the assumption. If actual levels of future persistence are significantly lower than assumed (that is, policy termination rates are significantly higher than assumed), Prudential's results of operations could be adversely affected.

In common with other industry participants, the profitability of the Group's businesses depends on a mix of factors including mortality and morbidity trends, policy surrender rates, investment performance, unit cost of administration and new business acquisition expense.

As a holding company, Prudential is dependent upon its subsidiaries to cover operating expenses and dividend payments.

Prudential's insurance and investment management operations are generally conducted through direct and indirect subsidiaries. As a holding company, Prudential's principal sources of funds are dividends from subsidiaries, shareholder-backed funds, the shareholder transfer from Prudential's long-term funds and any amounts that may be raised through the issuance of equity, debt and commercial paper. Certain of the subsidiaries are regulated and therefore have restrictions that can limit the payment of dividends, which in some circumstances could limit the Group's ability to pay dividends to shareholders.

Prudential operates in a number of markets through joint ventures and other arrangements with third parties. These arrangements involve certain risks that Prudential does not face with respect to its consolidated subsidiaries.

Prudential operates, and in certain markets is required by local regulation to operate, through joint ventures. Prudential's ability to exercise management control over its joint venture operations and its investment in them depends on the terms of the joint venture agreements, in particular, the allocation of control among, and continued co-operation between, the joint venture participants. Prudential may also face financial or other exposure in the event that any of its joint venture partners fails to meet its obligations under the joint venture or encounters financial difficulty. In addition, a significant proportion of the Group's product distribution is carried out through arrangements with third parties not controlled by Prudential and is dependent upon continuation of these relationships. A temporary or permanent disruption to these distribution arrangements could affect Prudential's results of operations.

FORWARD-LOOKING STATEMENTS

This annual report may contain certain forward-looking statements with respect to certain of Prudential's plans and its current goals and expectations relating to its future financial condition, performance, results, strategy and objectives. Statements containing the words "believes", "intends", "expects", "plans", "seeks" and "anticipates", and words of similar meaning, are forward-looking. By their nature, all forward-looking statements involve risk and uncertainty because they relate to future events and circumstances which are beyond Prudential's control including among other things, economic and business conditions in the countries in which Prudential operates, market related risks such as fluctuations in interest rates and exchange rates, and the performance of financial markets generally; the policies and actions of regulatory authorities, the impact of competition, inflation, and deflation; experience in particular with regard to mortality and morbidity trends, lapse rates and policy renewal rates; the timing, impact and other uncertainties of future acquisitions or combinations within relevant industries; the impact of changes in capital, solvency or accounting standards, and tax and other legislation and regulations in the jurisdictions in which Prudential and its affiliates operate; and the impact of legal actions and disputes, together with other factors discussed in "Risk Factors". This may for example result in changes to assumptions used for determining results of operations or re-estimations of reserves for future policy benefits. As a result, Prudential's actual future financial condition, performance and results may differ materially from the plans, goals, and expectations set forth in Prudential's forward-looking statements.

In particular, the following are forward-looking in nature:

certain statements in Item 4, "Information on the Company" with regard to strategy and management objectives, trends in market shares, prices, market standing and product volumes and the effects of changes or prospective changes in regulation, and

certain statements in Item 5, "Operating and Financial Review and Prospects" with regard to trends in results, prices, volumes, operations, margins, overall market trends, risk management and exchange rates and with regard to the effects of changes or prospective changes in regulation.

Prudential may also make or disclose written and/or oral forward-looking statements in reports filed or furnished to the US Securities and Exchange Commission, Prudential's annual report and accounts to shareholders, proxy statements, offering circulars, registration statements and prospectuses, press releases and other written materials and in oral statements made by directors, officers or employees of Prudential to third parties, including financial analysts. Prudential undertakes no obligation to update any of the forward-looking statements contained in this annual report or any other forward-looking statements it may make.

Item 4. Information on the Company

BUSINESS OF PRUDENTIAL

Overview

Prudential is a leading international financial services group, providing retail financial services in the markets in which it operates, primarily the United Kingdom, the United States and Asia. At December 31, 2006, Prudential was one of the 30 largest public companies in the United Kingdom in terms of market capitalization on the London Stock Exchange. Prudential is not affiliated with Prudential Financial, Inc. or its subsidiary, The Prudential Insurance Company of America.

Prudential has been writing life insurance policies in the United Kingdom for over 150 years and has had one of the largest long-term funds in the United Kingdom for over a century. Prudential expanded its business into British Commonwealth countries, including Singapore and Malaysia, in the

Edgar Filing: PRUDENTIAL PLC - Form 20-F

1920s and 1930s. In 1986, Prudential acquired Jackson National Life Insurance Company ("Jackson"), a US insurance company writing life and fixed annuity business. A group strategy review in the early 1990s identified significant opportunities for Prudential in the Asian life sector and Prudential Corporation Asia was established in 1994 to develop a material and profitable Asian business. In 1998, Prudential launched Egg, now a leading e-commerce retail financial services provider, and in 1999, Prudential acquired M&G, a leading UK fund manager. In June 2000, Prudential completed its listing on the New York Stock Exchange. In December 2005, Prudential announced its intention to acquire the minority interests in Egg representing approximately 21.7 per cent of the existing issued share capital of Egg. In February 2006, the Board of Egg announced the delisting of Egg shares, and in May 2006, Prudential completed the repurchase of Egg's shares bringing Prudential's holding to 100 per cent. In January 2007, Prudential announced that it had entered into a binding agreement to sell Egg Banking plc ("Egg"), Prudential's UK banking business, to Citibank Overseas Investment Corporation, a subsidiary of Citigroup Inc ("Citi"). The sale completed on May 1, 2007 for a net cash consideration of £546 million, subject to finalization of the completion accounts.

In the United Kingdom, Prudential offers a range of retail financial products and services, including long-term insurance and asset accumulation and retirement income products (life insurance, pensions and pension annuities), retail investment and unit trust products, and fund management services. Prudential primarily distributes these products through financial advisors, partnership agreements with banks and other financial institutions, and direct marketing, by telephone, mail, internet and face to face advisors.

At December 31, 2006, in the United Kingdom, Prudential was:

the second-largest life insurance group in terms of market capitalization,⁽¹⁾

the proprietor of one of the largest long-term funds of investment assets supporting long-term insurance products (the Prudential Assurance Company long-term fund),⁽²⁾

the fourth largest asset manager in the United Kingdom,⁽³⁾

rated as Aa1 (negative outlook) by Moody's, AA+ (stable outlook) by Standard and Poor's and AA+ (stable outlook) by Fitch for the long-term fund of Prudential Assurance. The ratings from Standard & Poor's, Moody's and Fitch for Prudential Assurance's long-term fund represent the second highest ratings in their respective rating categories.

In the United States, Prudential offers a range of products through Jackson, including fixed, fixed index and variable annuities; life insurance; guaranteed investment contracts; and funding agreements. Prudential distributes these products through independent insurance agents; securities broker-dealers; registered investment advisors; a small captive agency channel, consisting of approximately 100 life insurance agents; and banks, credit unions and other financial institutions. Prudential also offers fee-based separately managed accounts and investment products through Curian Capital, LLC, which is Jackson's registered investment advisor channel, established in 2003. At December 31, 2006, in the United States, Jackson was:

the fifteenth largest life insurance company in terms of General Account assets⁽⁵⁾

the seventh largest provider of individual traditional fixed deferred annuities in terms of sales⁽⁶⁾,

the eighth largest provider of fixed index annuities in terms of sales⁽⁶⁾,

the twelfth largest provider of variable annuities in terms of sales, and⁽⁷⁾

rated AA (stable outlook) by Standard & Poor's, AA (stable outlook) by Fitch and A1 (stable outlook) by Moody's in terms of financial strength rating. The ratings from Standard & Poor's and Fitch represent the third highest ratings and the rating from Moody's represents the fifth highest

Edgar Filing: PRUDENTIAL PLC - Form 20-F

rating out of their respective rating categories. On June 23, 2006, Standard & Poor's revised its outlook on Jackson to stable from negative.

Prudential Corporation Asia is the leading European-based life insurer in Asia in terms of market coverage and number of top five positions in markets, with operations in 12 Asian countries and a fund management license in Dubai. Prudential Corporation Asia offers a mix of life insurance with accident and health options, mutual funds and selected personal lines property and casualty insurance with the product range tailored to suit the individual country markets. Its insurance products are distributed mainly through an agency sales-force and complementary bancassurance agreements while the majority of mutual funds are sold through banks and brokers. Its life insurance operations in China and India are conducted through joint ventures in which it holds 50 per cent and 26 per cent, respectively. In addition, in India, Prudential holds 49 per cent of a fund management joint venture with ICICI, in China it has a 33 per cent stake in a funds management joint venture with CITIC, which is called CITIC-Prudential, and in Hong Kong, it holds a 36 per cent stake in a joint venture with Bank of China International for MPF and mutual funds.

At December 31, 2006 Prudential Corporation Asia:

had operations in 12 countries and was Europe's leading life insurer in Asia in terms of market coverage and number of top 5 market positions,

was the region's second largest manager of retail funds (excluding Japan), where retail includes unit trusts, mutual funds and similar types of fund,

had over 288,000 tied agents and multiple third party distribution agreements, and

over seven million life insurance policies in force.

Strategy

In 2005, Prudential undertook a comprehensive strategic review of the retail financial services markets in all major geographies, with an aim of identifying the opportunities, ambitions and business strategies best suited to maximize sustainable growth in value for Prudential's shareholders over the longer term. The key conclusions of the review were that:

Demographic trends and the increasing concentration of wealth in the hands of those approaching retirement or already retired presents a major opportunity to establish the Group as a leading provider of 'financial services for retirement' by playing to its strengths and areas of competitive advantage;

the Group is well positioned in its existing markets that offer highly attractive opportunities for strong organic growth over the next 10 years;

to exploit these opportunities fully Prudential needs to broaden its product range to align them more closely with anticipated retail financial sector profit pools;

in addition, Prudential must complement its strong and important intermediary links by expanding the proportion of revenue derived from direct customers and ensure that they build deep life-cycle relationships with its customers;

Prudential should also develop the global reach and profile of its excellent asset management businesses.

Each of Prudential's businesses has operational autonomy within its market and this is critical to Prudential's success, since it is the key to Prudential's ability to tailor products and services to meet local market needs. However, the review also concluded that there are material synergies that can be achieved through closer working across the Group, consistent with Prudential's decentralized approach.

Finally, the review concluded that Prudential must continue to enhance the effectiveness of its capital management processes, to ensure that investment and capital allocation decisions are focused on those areas of activity that will generate the best returns to shareholders.

Shareholder Focus

Prudential's strong mix of businesses around the world positions it well to benefit from the growth in customer demand for asset accumulation and income in retirement. Prudential believes that its international reach and diversity of earnings will continue to give it a significant advantage.

Prudential's commitment to its shareholders is to maximize the value over the time of their investment. Prudential does this by investing for the long-term to develop and bring out the best in its people and its business to produce superior products and services, and hence superior financial returns.

Prudential's aim is to develop lasting relationships with its customers and policyholders, through products and services that offer value for money and security. Prudential seeks to continually enhance its reputation, built over 150 years, for integrity and for acting responsibly within society.

Building the Platform

In recent years, the global retail financial services industry has undergone significant change. Changes in underlying demographics, government attitudes, regulatory requirements, technology and customer demands are all driving fundamental change in the industry. Prudential is committed to delivering superior returns to its shareholders and has therefore reconfigured its business to compete more effectively in this changing environment.

Prudential has significantly restructured its operations in both the United Kingdom and the United States over the last few years to improve its customer focus and management accountability, and to broaden its product range and distribution reach.

In the United Kingdom, Prudential restructured its long-term savings business into an integrated business combining Prudential's UK businesses with that of Scottish Amicable, which was acquired in 1997, to form Prudential UK Insurance Operations. This has resulted in improved operational effectiveness through removal of duplication, greater customer focus and reduced operating costs.

Within the United Kingdom, as part of its continuing aim to maintain a cost effective platform for growth Prudential has committed to realizing substantial annualized pre tax cost savings of £195 million savings per year by 2010. The total one-off cost of achieving the £195 million per annum of savings is expected to be up to £165 million and will depend upon the final detail of the cost reduction program. One of the key areas of focus will be to continue to deliver embedded value through the in force business while delivering on targets to lower per policy unit costs.

On January 29, 2007, the Prudential board announced that it had entered into a binding agreement to sell Egg to Citi. The sale completed on May 1, 2007 for a net cash consideration of £546 million subject to finalization of the completion accounts. In connection with the sale of Egg, Prudential has agreed distribution rights with Citi through which Prudential will provide life and pension products to Egg's customers for a five year period. In addition, Prudential has been selected as a strategic provider to Citi for the distribution of Life Insurance products to Citi's consumer banking customers in Thailand, Indonesia and the Philippines.

Prudential has initiated a review on the possible reattribution of the inherited estate of the Group's main with-profits fund in the United Kingdom, Prudential Assurance Company. An independent Policyholder Advocate has been nominated to represent policyholders' interests should a decision be made to proceed. Prudential will only proceed if there are clear benefits to both policyholders and shareholders. If a decision is taken to proceed, a formal appointment of the Policyholder Advocate could be expected to take place later in 2007.

In the United States, Prudential has an extensive and diversified product range that includes variable annuities, fixed annuities, fixed index annuities, life assurance and stable value products. Prudential also has diversified distribution for its retail products with distribution through independent agents, independent and regional broker-dealers, and banks and other financial institutions. With the launch of Curian in 2003, Prudential extended its distribution into the registered investment advisor channel and, with the acquisition of Life Insurance Company of Georgia ("Life of Georgia") in 2005, Prudential re-entered the captive agency distribution channel in the United States, with approximately 100 captive life assurance agents.

Since 1994 Prudential has implemented a strategy designed to build an Asian platform with the breadth and depth to deliver material shareholder value that is sustainable over the long term. This strategy has been executed by securing early access to countries with high potential customer bases, building and professionalizing core tied agency distribution that is complemented by alternative channels such as bank partnerships, launching capital efficient consumer orientated products and supporting the entire structure with a sharp focus on excellent customer service.

Underpinning the strategy is an investment in recruiting and training with the objective of retaining the best people in the industry. Prudential also continues to leverage the significant advantages from its well respected UK heritage including a powerful brand, embodied by the Prudence icon, over 150 years experience as a market leader and the governance and compliance infrastructure associated with a leading international business.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Prudential believes value is clearly demonstrated by the scale and mix of Prudential's new business sales. In 2006, new business sales were approximately £49 billion with over half coming from mutual fund sales, and 58 per cent coming from outside the United Kingdom.

This transformation has created a strong platform to pursue strategic initiatives for future growth and shareholder value creation.

Growing the Business

Prudential is conscious that the retail financial services industry continues to evolve, and it expects to continue to adapt its business to maintain a strong advantage over its competitors while delivering returns to shareholders. Prudential's goal is to pursue its key strategic themes of maintaining focus on its customers, investing in technology to improve further customer access and service, driving down costs and driving growth in its existing markets.

The strength of Prudential's businesses and positive developments in a number of its markets represent an opportunity to enhance its market position and generate improved returns for its shareholders. A strong financial position at a Group level provides increased financial flexibility and allows Prudential to capitalize on these opportunities as they arise. In response to these developments the Board decided in October 2004 to launch a 1 for 6 rights offering. As at December 31, 2006 approximately 41 per cent of the net proceeds of Prudential's rights offering (£1,021 million) have been used to provide capital to support Prudential's shareholder-backed UK life businesses. The remainder of the proceeds have been invested centrally within the Group in short-term financial instruments.

Driving Growth

Within its existing major markets of the United Kingdom, the United States and Asia, Prudential believes fundamental shifts in demographics and in the manner of pension provision will create significant opportunities for future profitable growth.

The UK insurance market suffered three years of decline until 2004, when the market showed signs of recovery which continued in 2006. During the period of decline, Prudential transformed its UK insurance business from a direct-sales biased operation, into a company that sells mainly shareholder-backed products through a range of channels, including financial advisors predominately selling with profits products, business to business and partnership agreements with other companies.

Over the next few years, Prudential's UK insurance business intends to continue to focus on efficient profitable growth seeking new opportunities within its distribution channels and focused product range that deliver value rather than volume. Over the last few years, Prudential has built considerable capability in the wholesale bulk and back book annuity markets achieving sales in excess of £1.4 billion in each of the last three years and Prudential plans to continue building on its strengths in these markets.

At the core of its retail retirement proposition, Prudential will continue to manage its vesting annuity pipeline, maintaining its pricing discipline in the external annuity market and building out other retirement income propositions, while developing a clearer focus on the UK retail retirement savings opportunity and exiting the unprofitable front end commission markets for individual pensions and unit linked bonds, particularly moving away from those areas of low persistency. Instead, Prudential will focus on new low risk multi-asset products which utilize its strength in asset allocation and use factory gate pricing (negotiated between customer and advisor with separate advice costs.) These products will target the significant number of retail investors approaching retirement who have substantial assets outside personal or corporate pension plans, or have investments in poorly performing funds, and require inflation protection.

Prudential will no longer participate directly in protection but will instead expand its 50:50 joint venture with Discovery Holdings Limited ("Discovery"), the leading South African insurance company, to offer its flexible protection plan.

Prudential distributes many products via banks and other financial institutions and signed a number of significant new agreements during 2006. This included The Royal London Mutual Insurance Society Limited transaction for its vesting annuity business that came into effect in September. In addition, Prudential signed an exclusive five-year agreement with Threadneedle Pensions Limited ("Threadneedle") as their supplier of annuities for their Stakeholder scheme as well as any future defined contribution ("DC") schemes that Threadneedle acquires. This is a new area for Prudential that builds on its experience in providing annuities to customers of life insurance companies. With the expected future growth in DC schemes within the United Kingdom Prudential expects more agreements of this type.

In October 2004 Prudential launched PruHealth, a UK healthcare product that links health and fitness to the cost of medical insurance. Prudential believes this business has made good progress, with sales growing on average 15 per cent per month in 2006. Total premium income for the year was £36 million, and PruHealth covered over 100,000 individuals at the end of February 2007. The product has been developed and is managed through a joint venture with Discovery. Product leadership through strong innovation and multi-channel distribution strategy is expected to continue to deliver a significant market presence, with PruHealth projected to have 200,000 customers by the end of 2007. PruHealth's aim is to achieve breakeven in 2008 and to be profitable thereafter.

In October 2005, Prudential launched its Prudential Property Value Release Plan. A lifetime mortgage product which gives customers greater flexibility and control over the timing of when they draw down funds, thereby reducing total interest charges over the lifetime of the loan. Prudential believes it has been well received by advisors and customers. Gross advances in 2006 were £90 million and resulted in Prudential achieving an 8 per cent share of the lifetime mortgage market. In 2006 a face to face sales team was established to offer direct advice of the lifetime mortgage product, which Prudential believes meets customer demand for face to face sales in this market. Prudential plans to grow this team in 2007. Prudential was awarded the best lifetime mortgage provider at the 2006 Equity Release Awards for the Property Value Release Plan, together with awards from Moneyfacts and Mortgage Strategy.

The new Flexible Protection Plan was launched in July 2006 to the Direct channel and to a limited group of intermediaries specializing in the protection market. This innovative protection product is designed to pay critical serious illness claimants earlier and more often than traditional protection products with, on average, four times as many serious illnesses covered. Payments are based on severity levels and multiple claims for the same illness or new illnesses are possible. Early results have been encouraging and as a result the product was rolled out nationally in the United Kingdom in February 2007. As previously stated, distribution and administration of the Flexible Protection Plan will move into the joint venture managed with Discovery.

Towards the end of 2006, Prudential UK received four stars in both the Life & Pension Providers category and the Investment Providers & Packages category at the FT Financial Adviser Practiv Services Awards. In addition, Prudential UK was ranked number one for service in the Life & Pension Annuities sector. These awards are widely recognized throughout the industry as independent recognition of a provider's service proposition, as they are voted on by intermediary financial advisers, who base the ratings on the level of service they receive from providers for new business processing, central processing, product support and commission payment.

Prudential UK's strength in retirement provision continued to be well recognized as it won the Moneywise Best Annuity Provider Award for the third year running.

M&G, Prudential's UK and European fund management company, is made up of three distinct and autonomous businesses: Retail, Wholesale and Prudential Finance each with its own strategy for the markets in which it operates: (a) the Retail business aims to maximize the leverage of its strong investment performance, multi-channel distribution and efficient operating platform; (b) the Wholesale business aims to add value to its internal clients through investment performance, liability matching and investment in innovative and attractive areas of capital markets and to utilize the skills developed primarily for internal funds to build new business streams and diversify revenues and (c) Prudential Finance combines the management of Prudential's balance sheet with M&G's market positions to develop a new profit stream.

In the United States, Prudential is focusing on maximizing its opportunities in the evolving US market by pursuing the goal of continued expansion of Jackson's share of the US annuities and retail asset management markets.

Prudential believes expansion of Jackson's share of the US annuities market will be largely contingent on continued expansion of existing product offerings, additional growth in new and existing distribution channels and opportunistic acquisition activity.

Innovation in product design and speed to market continue to be key drivers of Jackson's competitiveness. In January 2006, Jackson added a five per cent annual benefit increase option to its popular lifetime guaranteed minimum withdrawal benefits ("GMWBs"). In February 2006, Jackson launched two new fixed index annuity ("FIA") contracts, Elite Choice and Elite Choice Rewards, which expanded the number of FIA products Jackson offers to five. In May 2006, Jackson added five new GMWB options that provide contract holders with a guaranteed return of premium and lifetime income. Additionally, Jackson expanded its variable annuity fund offering during the year.

In the near term, Jackson's product development strategy includes further enhancement of its variable annuity offerings and the introduction of new guarantees, including a Guaranteed Minimum Accumulation Benefit ("GMAB"). In January 2007, Jackson launched a simplified retirement annuity that will serve as a low-cost option for financial advisors who are currently not participating in the variable annuity market. Additionally, Jackson launched a line of retail mutual funds for distribution by existing wholesalers. Jackson's mutual funds are marketed as an additional option for financial advisors currently selling variable annuity products.

Jackson will continue to build its relationship-based distribution advantage in the advice-based channels and explore additional distribution opportunities, including expansion into the wire house channel, as evidenced by the company's recently announced distribution agreement with UBS.

Jackson's continued expansion in the US retail asset management market will be led by the efforts of Jackson's independent broker-dealer network, National Planning Holdings, Inc. ("NPH") and Jackson's registered investment advisor, Curian Capital, LLC.

In 1998, Jackson formed National Planning Corporation, a subsidiary of NPH. Since its formation, NPH has grown through acquisitions to comprise four broker-dealer firms: INVEST Financial Corporation, Investment Centers of America, National Planning Corporation, and SII Investments, Inc. By leveraging technology, NPH provides its advisors with the tools they need to operate their practices more efficiently. Through its relationship with NPH, Jackson has gained an important distribution outlet, plus invaluable insight into the needs of financial advisors and their clients. NPH was ranked the seventh largest independent broker-dealer network in the US (source: Investment News magazine) and generated nearly \$12 billion in gross product sales and nearly \$500 million in revenues in 2006.

In early 2003, Jackson entered the registered investment adviser channel with the launch of Curian Capital. Curian provides innovative fee-based separately managed accounts and investment products to advisors through a sophisticated technology platform. Curian is one of the fastest growing third-party

separately managed account platforms in the United States, with assets under management of \$2.4 billion at the end of 2006.

Jackson continues to seek opportunities to deploy capital through opportunistic, value-creating acquisitions. Jackson demonstrated its ability to efficiently consolidate annuity and life portfolios by meeting or exceeding performance targets during the completion of its acquisition of Life of Georgia. Jackson integrated more than 1.5 million policies onto its platform within eight months of the acquisition date.

Prudential believes that Asia remains an attractive region with high levels of economic activity translating into higher levels of personal wealth, greater disposable incomes and a growing appetite for good quality protection and savings products. Within this environment, Prudential believes ageing demographics are also beginning to drive increased household savings rates and an emerging need for retirement solutions.

An ongoing priority for Prudential is to continue building distribution to drive growth. Agency is a key distribution channel for Prudential Corporation Asia and so the strategies for its ongoing development are very important and tailored to each market. The more developed markets are typically focused on enhancing agency productivity and the newer markets are emphasizing increased distribution reach through growth in agent numbers. The agency strategy is tailored to each market, with the more developed markets typically focused on enhancing agency productivity and the newer markets emphasizing increased distribution reach through growth in agent numbers. In China and India particularly this means increasing geographic coverage through entering new cities and opening more branches.

Prudential believes 2006 was a very successful year for its agency distribution channel with year-end 2006 agent numbers increasing by 114,000 in India, 11,000 in Indonesia and 5,000 in China compared to 2005. Agency productivity measured by an Annual Premium Equivalent ("APE") basis per average agent also improved during the year with Prudential's more developed markets of Singapore and Hong Kong showing double digit improvement over 2005 of 24 per cent and 15 per cent respectively.

Distribution from non-agency channels also grew in 2006. Strong growth from bank distribution included record new business volumes from Standard Chartered Bank ("SCB") in Hong Kong, an increasing proportion of new business from ICICI Bank in India and encouraging growth from Maybank and Singpost in Singapore. In addition, a new direct distribution initiative, PRUcall, was launched in Thailand during 2006.

Prudential's product strategy has been a key driver of its success. From the outset, the focus has been on predominantly regular premium products designed and targeted to meet customer needs. In the more emerging markets this is illustrated by the success of products that focus on providing for children and their education such as PRUkid in Vietnam. However, in an older and more developed market such as Korea, retirement orientated unit linked products such as PRUretire are proving popular.

Prudential has led product innovation in a number of markets often working closely with the regulators. As a result, Prudential has been first to market with unit linked products in Singapore, Malaysia, Taiwan, Indonesia, India, the Philippines and Korea. These products are now a well established part of the portfolio generating 61 per cent of 2006 new business on an APE basis and, within the regulatory driven investment guidelines in each market, Prudential continues to expand the choice of investment funds available to customers, including third party funds in markets where it makes sense.

During 2006, Prudential launched a new universal life product in Malaysia to give customers more choice. In India, ICICI Prudential launched a new diabetes care product. Prudential has also made its first move into the takaful (Shariah compliant) insurance market by forming a joint venture with Bank Simpanan Nasional ("BSN") in Malaysia and successfully launching its first linked product in

November 2006. The joint venture will offer a range of takaful savings, protection and investment products developed for Muslim Malays, who make up 60 per cent of the population.

As a result of this strategic focus on regular premium policies, capital efficient linked products and the high proportion of accident and health riders, returns tend to be higher in Asia than are seen elsewhere.

The focus on effective distribution and profitable life products has proven more difficult to deliver in Japan. Neither tied agency nor general agency distribution were found to be economically viable and, whilst a profitable variable annuity product has been approved by the regulators, it has not been commercially attractive when compared to some competitor products. The business remains subscale and Prudential continues to look for profitable growth opportunities in the market.

Further demonstrating the benefits of scale that Prudential is beginning to realize in Asia, costs as a proportion of gross written premiums have been decreasing steadily from 16 per cent in 2002 to 11 per cent in 2006. However, continuing to increase efficiencies through greater use of common systems, platforms and processes across the region and the Group remains a priority.

During 2006, a number of steps were taken to further broaden the Asia regional management team including the addition of a new Chief Executive Officer, Chief Financial Officer and Chief Operating Officer.

In Vietnam, Prudential became the first non bank and first foreign firm approved to establish a finance company that can offer credit products such as personal loans and home mortgages. The license also permits corporate loans.

Prudential has also made its first small entry into the Middle East and North Africa ("MENA") region with the granting of a license to establish a fund management and distribution base at Dubai International Financial Center. The intention is to offer domestic investors access to Prudential's international fund range and then launch conventional and Shariah-compliant funds that will be available internationally.

Focusing on Customers

Prudential's goal is to deliver products that its customers want to buy, through the distribution channels they wish to use. Prudential is continually exploring opportunities to expand its distribution reach and broaden its product offering.

In the United Kingdom, Prudential has complementary businesses and market-leading positions in key product areas, enabling it to selectively participate on a value basis. The businesses comprising Prudential's UK Insurance Operations have undergone enormous strategic transformations in recent years, bringing together several operating units under the powerful Prudential brand and improving service to over seven million customers. In 2002, Prudential's UK Insurance Operations announced the development of an outsourced customer service operation in Mumbai, India. In May 2003, the Mumbai customer service center opened and at the end of 2006 employed over 1,300 people.

M&G is Prudential's UK and European fund management business and had over £164 billion of funds under management as of December 31, 2006, of which £119 billion related to Prudential's long-term business funds. M&G aims to maximize profitable growth by operating in markets where it has a leading position and competitive advantage, including retail fund management, institutional fixed income, pooled life and pension funds, property and private finance. M&G also manages Prudential's balance sheet for profit.

In the United States, Prudential, through Jackson, maintains a significant market position across the range of fixed, variable and fixed index annuity products. These products offer guarantees and longevity protection that will become increasingly important in the United States as the approximately 78 million

"baby boomers" reach retirement age over the next decade. Jackson also offers life and institutional products. The company continues to expand its distribution channels and now distributes through independent agents, broker-dealers, banks, registered investment advisors, a small captive agency channel, and other financial institutions. Jackson focuses on product innovation and speed to market in order to provide customers with the products and features they demand on a timely basis. During 2006, 81 percent of Jackson's retail sales were from products and features that did not exist two years earlier. The platform-based design of Jackson's products allows customers to choose and pay for only those features they truly need. Jackson continues in the development of customer-friendly FIAs and the implementation of FIA educational support programs for advisors. The company developed an FIA due diligence kit for its broker-dealer partner organizations, continued the long-standing tradition of requiring representative certification to sell Jackson's fixed index annuities and improved Jackson's Statement of Understanding, which must be signed by the customer before an FIA contract will be issued. All of these measures were designed to ensure that broker-dealers, representatives and customers have a complete understanding of Jackson's fixed index annuities and FIAs in general.

In Asia, Prudential has a reputation for developing customer-focused and innovative savings and insurance products. It leverages UK and US product expertise and works with Asian regulators to bring new products to market, achieving particular success with unit-linked products. While Prudential believes customer needs in Asia are well met by traditional tied agents in most markets, it also gives customers the choice to access its products through complementary bancassurance arrangements, direct distribution and brokers.

Corporate Activity

In March 2006, Prudential received a proposal from Aviva plc about a possible combination of the businesses of Prudential and Aviva. Aviva's offer, which was valued at an aggregate purchase price of approximately £17 billion, included an all-share merger of the two companies based on a merger ratio of 82 Aviva shares for every 100 shares of Prudential, resulting in an implied value of 708 pence per Prudential share based on closing relative share prices on March 17, 2006. The Board of Prudential plc, which had taken independent financial advice, did not consider that the proposal was in the best interests of Prudential shareholders and rejected it. On March 24, 2006, Aviva announced the withdrawal of its proposal.

On January 29, 2007 the Prudential board announced that it had entered into a binding agreement to sell Egg to Citi. The sale completed on May 1, 2007 for a net cash consideration of £546 million, subject to any closing adjustments to the final accounts.

Summary

Prudential has compelling positions in the world's leading retail financial services markets and the resources to capitalize on these;

In the United Kingdom, Prudential has two excellent and profitable franchises in Prudential UK Insurance Operations and M&G on which to build for the future;

In the United States, Jackson is a significant cash-generative business with the market positioning for profitable growth in the retirement market. It has competitive advantage in the sectors in which it chooses to operate; and the ability to participate in market consolidation through bolt-on acquisitions;

In Asia, Prudential believes it has tremendous exposure to opportunities for life insurance sales and profit growth across the region, whilst continuing its program of rapid expansion and profit growth; and

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Prudential's asset management businesses have significant growth prospects and are providing solid cash flow generation.

Prudential believes it has scope to deliver increasing value for shareholders from each individual business operation, and from the Group as a whole which derives both financial advantage and resilience from the diversity of its portfolio of businesses, and the opportunities for collaboration between them.

Company Address and Agent

Prudential plc is a public limited company organized under the laws of England and Wales. Prudential's registered office is Laurence Pountney Hill, London EC4R 0HH, England (telephone: +44 20 7220 7588). Prudential's agent in the United States is Jackson National Life Insurance Company, located at 1 Corporate Way, Lansing, Michigan 48951, United States of America.

Significant Subsidiaries

The table below sets forth Prudential's significant subsidiaries.

Name of Company	Percentage Owned⁽¹⁾	Country of Incorporation
The Prudential Assurance Company Limited	100%	England and Wales
Prudential Annuities Limited ⁽²⁾	100%	England and Wales
Prudential Retirement Income Limited ⁽²⁾	100%	Scotland
M&G Investment Management Limited ⁽²⁾	100%	England and Wales
Egg Banking plc ⁽³⁾	100%	England and Wales
Jackson National Life Insurance Company ⁽²⁾	100%	United States
Prudential Assurance Company Singapore (Pte) Limited ⁽²⁾	100%	Singapore
PCA Life Assurance Company Limited ⁽²⁾	99%	Taiwan

(1) Percentage of equity owned by Prudential directly or indirectly. The percentage of voting power held is the same as the percentage owned. Each subsidiary has one class of ordinary shares and operates mainly in its country of incorporation, except for Prudential Retirement Income Limited which operates mainly in England and Wales.

(2) Owned by a subsidiary of Prudential.

(3) In January 2007, Prudential announced that it had entered into a binding agreement to sell Egg Banking plc to Citi as set out in note I8 to the financial statements. Prudential announced that the sale of Egg Banking plc was completed on May 1, 2007.

UK Business

Introduction

As at December 31, 2006, Prudential's UK business was structured into two business units, each focusing on its respective target customer markets. Prudential's UK business units are UK Insurance Operations and M&G, and until the disposal included the Egg banking operations:

The following discussion describes:

the UK retail financial services market,

Prudential's UK business units and products,

Prudential's reinsurance arrangements and reserving practices,

shareholders' participation in Prudential's long-term insurance business, and

compliance matters, including pension mis-selling.

In 2006, Prudential's UK business generated new business insurance premiums of £7,192 million and investment flows of £13,486 million. As of December 31, 2006, M&G had over £164 billion funds under management. See " M&G" below for an analysis of funds under management.

UK Retail Financial Services Market Overview

The United Kingdom is one of the world's largest life insurance markets in terms of premiums and is one of the largest asset management and retail banking markets. In recent years, the UK markets have changed significantly and are continuing to evolve as a result of changes in regulation and government policy, demographics, technological development and consumer awareness and attitudes. Retail financial services providers are adapting to these changes to meet consumer needs by broadening the range of products that they offer and the means by which those products are distributed to and accessed by customers.

The historical divisions between insurance, banking and other financial products are being eroded. It is increasingly common for providers to offer a range of pension products, life products and services, property and casualty insurance, banking products and retail investment products and services. Consumers are increasingly being offered access to these products through direct marketing and over the internet, as well as through the traditional company sales force, financial advisors, and bank branch distribution channels. However, for more complicated products, detailed "fact finds" are often required and consequently face-to-face advice is still preferred.

Financial advisors continue to be the principal channel for the distribution of life and pension products for insurers in the United Kingdom. This channel is undergoing significant change with the introduction by the FSA of "depolarization" rules in December 2004, leading to the establishment of multi-tie panels. Over the next few years, Prudential UK expects that a proportion of whole of market providers, which were previously known as independent financial advisors ("IFAs"), will continue to move to a panel approach whereby they distribute the product range of a select number of life insurance companies, in particular for mass market customer offers and simpler product types. Depolarization is also expected to have an effect on the UK bank distribution market as some banks move to offer their customers products from a panel of different providers rather than from a single product provider.

Competition among retail financial service companies is focused on product range, distribution reach, brand, investment performance and the specific benefits offered by products, charges and financial strength.

Prudential believes that the prospects for the UK life insurance industry remain healthy and that it is well positioned to take advantage of the opportunities presented. Therefore, since the Rights Issue in 2004, Prudential has invested £249 million in 2005 and £172 million in 2006 into the United Kingdom and continues to invest capital into the UK shareholder-backed business, with the expectation being that this business will become cash positive in 2010.

Prudential is determined to focus its participation in the UK market in propositions with high returns on capital invested and high margins.

UK Products and Profitability

In common with other UK long-term insurance companies, Prudential's products are structured as either with-profits (or participating) products, or non-participating (including unit linked) products. Depending upon the structure, the level of shareholders' interest in the value of policies and the related profit or loss varies.

With-profits policies are supported by a with-profits sub-fund and can be single premium (for example, Prudence Bond) or regular premium (for example, certain corporate pension products). Prudential's primary with-profits sub-fund is part of Prudential Assurance Company's ("PAC") long-term fund. The return to shareholders on virtually all with-profits products is in the form of a statutory transfer to PAC shareholders' funds which is analogous to a dividend from PAC's long-term fund and is dependent upon the bonuses credited or declared on policies in that year. Prudential's with-profits policyholders currently receive 90 per cent of the distribution from the main with-profits sub-fund as bonus additions to their policies and shareholders receive 10 per cent as a statutory transfer.

The profits from almost all of Prudential's new non-participating business accrue solely to shareholders. Such business is written in the non-profit sub-fund within PAC's long-term fund, or in various shareholder owned direct or indirect subsidiaries, the most significant of which is Prudential Retirement Income Limited ("PRIL"), which also writes all new immediate annuities arising from vesting deferred annuity policies in the with-profits sub-fund of PAC. There is a substantial volume of in-force non-participating business in PAC's with-profits sub-fund and that fund's wholly owned subsidiary Prudential Annuities Limited ("PAL"), which is closed to new business; profits from this business accrue to the with-profits sub-fund.

Products

The traditional life insurance product offered by UK life insurance companies was a long-term savings product with a life insurance component. The life insurance element conferred tax advantages that distinguished the traditional life insurance products offered in the United Kingdom from the savings products offered by banks, building societies and unit trust companies. The gradual reduction of these tax advantages and increasing sales of single premium life products have resulted in the distinction between life insurance and other long-term savings products becoming less important. Pension products remain tax-advantaged within certain limits.

Prudential expects demand for private personal pension and savings products to increase over the medium to long term, in part reflecting a change in the UK government's approach to social security that has encouraged long-term savings through tax advantages, but also in reaction to the growing realization that state provided pensions are unlikely to provide sufficient retirement income. An ageing population is focusing on asset accumulation and other retirement products to supplement their state benefits, while younger generations are focusing on pension and long-term savings products as well as health and income protection cover.

Prudential believes the changes created by the Government pension reforms that came into force on April 6, 2006 ("A-Day") will continue to have a positive impact on short term sales as experienced

over 2006, and will create an improved savings environment over time, although the time frame for this improvement is unclear.

As part of its A-Day preparations Prudential made a significant investment into systems development and customer communications and launched its new Flexible Retirement Plan in 2005, while withdrawing from selling front end loaded regular premium individual pensions.

Prudential further strengthened its commitment to the manufacture of products which are economically priced and provide much-needed flexibility to consumers through the launch of its Flexible Protection Plan in July 2006 to the Direct channel and to a limited group of intermediaries specializing in the protection market. This innovative protection product is designed to pay critical serious illness claimants earlier and more often than traditional protection products with, on average, four times as many serious illnesses covered. Payments are based on severity levels and multiple claims for the same illness or new illnesses are possible. This product was rolled out nationally in the United Kingdom in February 2007.

Historically, the majority of the life and pensions business written in the United Kingdom was with-profits business. However, in response to regulatory scrutiny and subsequent changes in the regulatory environment and customer requirements, with-profits products have been increasingly substituted by simpler unit-linked products. For a detailed description of Prudential's with-profits products and policies, see " Shareholders' Interests in Prudential's Long-term Insurance Business With-profits Products".

Distribution

Retail financial services and products are distributed face to face, through branches, tied agents, company sales forces and financial advisors, or directly by mail, telephone and over the internet. Tied agents are exclusive agents who represent only one insurer and must offer customers the products most suitable to their needs, but only from the range of products offered by that insurer. In recent years the high costs of company sales forces and tied agency networks, combined with customers perceiving a lack of choice, have meant that sales forces and tied agents have lost significant market share to financial advisors, with the result that many insurers, including Prudential, have chosen to close these tied agents and direct sales force networks. With the aim of meeting the perceived demand for face to face advice when purchasing equity release products, Prudential established a face to face sales team for its life time mortgage product in late 2006. There are currently 30 advisors, with plans to hire more if demand increases.

Direct and e-commerce distribution methods are generally lower-cost than other methods but have not been conducive to providing financial advice to the consumer to date. Accordingly, products distributed directly are generally more straightforward and have lower, often fee-based, charges.

Previously, IFAs were required by the UK polarization laws to provide "best advice" to customers, considering all of the products available in the market and the customer's particular circumstances, and were legally responsible for their own advice. In contrast, company sales forces could only sell the products of the company they were employed by, but nevertheless had to provide "best advice" in light of the customer's particular circumstances. A company had legal responsibility for the advice its sales force provided and the conduct of its tied agents.

The FSA announced a relaxation of the polarization rules in March 2001 with respect to stakeholder pension schemes and direct offer financial promotions for packaged products (which include life policies other than pure protection policies, pensions, regulated collective investment schemes and investment trust savings schemes). As a result of these changes, tied sales forces and appointed representatives of product provider firms are now free to market stakeholder pensions manufactured by any other company.

The FSA, following a consultation process, implemented new "depolarization" rules at the end of 2004. Advisors now have the choice of being "single tied" as before, or multi-tied advising on the products of a limited range of providers, or equivalent to an IFA where they offer products from the "whole of market" as now, but they also have to offer a "fee alternative", a fee-based charging structure as an alternative to commission. Prudential's view is that over time a material number of existing whole of market advisors will choose to adopt a "multi tie" selecting a limited number of large brands.

Prudential has worked with major financial advisor groups to design and build multi tie propositions, and Prudential UK has been appointed to multi-tie panels for THINC Destini, Sesame, Bankhall and Barclays.

As of December 31, 2006, Prudential UK Insurance operations distributes its products through the following channels:

Direct and Partnerships

The direct distribution channel seeks to increase revenue from existing Prudential customers, in particular at the point of policy maturity and by recruiting new customers. Direct includes the telephone, Internet and face to face advisors and focuses on annuities, investments, protection, health products and lifetime mortgages. Partnerships focuses on developing strong relationships with banks, retail brands and other distributors. Partnerships also seeks to help Prudential's distribution partners in their distribution and product development strategies. Prudential now have a range of providers including Barclays, Lloyds TSB, Pearl Assurance, Zurich Financial Services, Openwork, National Australia Bank and St. James Place.

Wholesale

Wholesale concentrates on using Prudential's financial strength to participate selectively in bulk and back book buy-outs. In June 2005, Prudential reached agreement with Resolution Life to acquire a portfolio of the in-force pension annuities from its subsidiary, Phoenix Life & Pensions. In 2006 Prudential UK completed two significant back book transactions. In January 2006 it reached agreement with Royal London to acquire the portfolio of in-payment pension annuities that had been written primarily under the Royal London brand, but which also included some annuities that had been written under the Refuge Assurance brand. The transaction generated premium income of approximately £660 million. In June 2006, PAC agreed to reinsure the non-profit immediate annuity portfolio of SAIF to PRIL. SAIF is a closed sub-fund established by a court-approved Scheme of Arrangement in September 1997, in which Prudential shareholders have no economic interest. It contains a large proportion of the business originally written by the Scottish Amicable Life Assurance Society that was acquired by PAC in September 1997. The reinsurance premium for this transaction was £560 million.

Prudential additionally signed a number of other deals in 2006 including an exclusive five year agreement with Threadneedle as their supplier of annuities for their Stakeholder scheme as well as any future defined contribution schemes that Threadneedle acquires and a deal with Save & Prosper to reinsure their annuity back book. Prudential also has a deal in place with Royal London to provide pension annuities for vesting Scottish Life policies.

Intermediaries

The intermediary channel focuses on the distribution of products to individual customers via retail financial advisors. This channel was restructured during 2006 in response to the changing needs of Prudential's intermediary distribution partners. A new infrastructure was created to customize the levels of support required, with a new regional structure that matches field-based account managers with high value customer segments. Lower value segments are serviced by telephone-based account managers. The new organization structure positions the Intermediaries business to best manage the needs of

Prudential's intermediary partners at an appropriate level to extract maximum value from the opportunities the new regulatory regime presents.

Following the introduction of the depolarization rules, many financial advisor groups have used the opportunity to establish multi-tie panels. Prudential continues to be well represented on major multi-tie panels currently in operation.

UK Business Units

UK Insurance Operations

Products

Prudential offers a wide range of products which are sold under the Prudential brand. See " Item 5 Operating and Financial Review and Prospects Analysis by Geographic Region UK Insurance operations UK Restructurings". The products distributed include long-term products consisting of:

life insurance savings-type products and pure protection products,

individual and corporate pensions, and

pension annuities.

In October 2004 Prudential launched PruHealth, a UK healthcare product that links health and fitness to the cost of medical insurance. As PruHealth is not a life insurance product its premium income is not reported as long-term new business sales. In 2006, gross written premiums were £36 million, with over 100,000 covered individuals as at the end of February 2007. Support for PruHealth is strong in both the intermediaries channel and the direct to consumer channel. The product has been developed through a joint venture with Discovery of South Africa. For further information see "Strategy Driving Growth" above.

In October 2005, Prudential launched Prudential Property Value Release Plan. A lifetime mortgage product that gives customers greater flexibility and control over the timing of when they draw down funds, thereby reducing total interest charges over the lifetime of the loan.

Long-term Products

Prudential's long-term products in the United Kingdom consist of life insurance, pension products and pensions annuities. The following table shows Prudential's UK Insurance Operations new business

insurance and investment premiums by product line for the periods indicated. New business premiums include deposits for policies with limited or no life contingencies.

	Year Ended December 31,	
	2006	2005
(in £ millions)		
Life insurance

	4,144	4,252
Total pension annuities		
Total new business premiums	7,192	7,075

Life Insurance Products

Prudential's UK life insurance products are predominantly medium to long-term savings products with life cover attached, and also include pure protection (term) products. The main savings products Prudential offers are investment bonds.

Savings Products Investment Bonds

Prudential offers customers a choice through a range of investment funds to meet different risk and reward objectives. Prudential launched the Flexible Investment Plan ("FIP") in November 2003. Through this plan, its customers have the option to invest in the Prudence Bond (With-Profits) along with a range of unit linked investment funds. Advisors can build an individual portfolio and asset allocation model to accurately match a client's risk / reward profile. FIP also gives financial advisors the opportunity to choose from different external fund management groups and the flexibility to make changes to portfolio and asset allocation over time. In 2006, sales of the Unit-linked option of FIP were £367 million.

The Prudence Bond, a single premium, unitized with-profits policy with no fixed term, is one of the United Kingdom's leading investment bond products in terms of with-profits market share. Prudential launched the Prospect Bond, another single premium with-profits bond, in October 2003. The Prospect Bond gives investors the opportunity to move out of under performing funds elsewhere in the market, and into the Prudential With-Profits Fund. In September 2004, Prudential launched the next generation with-profits investment bond, entitled PruFund. A replacement for Prudence Bond it is designed to provide increased transparency and smoothed investment returns to the customer. In 2006, total new business premiums attributable to the PruFund, Prudence Bond, Prospect Bond and the Prudential Investment Bond, were in excess of £250 million. Sales of Prudential's offshore bonds, the International Prudence Bond and International Prudential Portfolio Bond, were £535 million in 2006.

With-profits products aim to provide capital growth over the medium to long-term, and access to a range of investment sectors without the costs and risks associated with direct investment into these sectors. Capital growth for the policyholder on with-profits bonds apart from PruFund is achieved by the addition of reversionary or regular bonuses, which are credited to the bond on a daily basis from investment returns achieved within Prudential Assurance's long-term with-profits fund, off-set by charges and expenses incurred in the fund. A final bonus may also be added when the bond is surrendered. PruFund delivers growth through a published expected growth rate, updated quarterly, and a transparent formulaic smoothing mechanism. In contrast the capital return on unit-linked bonds directly reflects the movement in the value of the assets underlying those funds. When funds invested in Prudential Assurance's long-term with-profits fund are either fully or partially withdrawn, Prudential may apply a market value adjustment to the amount paid out.

Life Protection

Prudential underwrites life protection for companies providing loans to their customers. Sales in 2006 were £687 million mostly generated through Prudential's partnership agreements with Lloyds TSB and Alliance and Leicester. As previously announced, from 2007 both of these agreements will cease.

Pension Products

Prudential provides both individual and corporate pension products. In 2006, new business premiums totaled £127 million for individual pensions and £745 million for corporate pensions. Pension products are tax-advantaged long-term savings products that comply with rules established by the UK Inland Revenue and are designed to supplement state-provided pensions. These rules require that, upon retirement, maturity benefits are used to purchase pension annuities by policyholder election at retirement or at least by the age of 75, although they do permit a portion to be taken as a tax-free lump sum. Prior to retirement, these products typically have minimal mortality risk to Prudential and are primarily considered investment products. An exception is where a guaranteed annuity option has been offered on the product, with an element of risk to Prudential both in underlying mortality and investment assumptions.

Prudential ceased marketing Guaranteed Annuity Options ("GAOs") in 1987, but for a minority of corporate pension schemes GAOs still apply for new members. Current liabilities for this type of business make up less than 1 per cent of the with-profits sub-fund.

Many of the pension products Prudential offers are with-profits products or offer the option to have all or part of the contributions allocated to a with-profits fund. Where funds invested in the with-profits fund are withdrawn prior to the pension date specified by the policyholder, Prudential may apply a market value adjustment to the amount paid out. The remaining pension products are non-participating products, which include unit-linked products.

Individual Pensions

Prudential's individual pension range offers unit-linked and unitized with-profits products.

In 2001, Prudential introduced products that meet the criteria of the UK government's stakeholder pension program. The stakeholder pension is intended for individuals earning enough to be able to afford to make contributions to a pension but who are not currently doing so. The introduction of stakeholder pensions has had implications for, among other things, how Prudential designs, administers, charges for and distributes pension products. The most significant requirements involve capped charges and a low minimum contribution which must be accepted by the provider. The government has capped charges at 1.5 per cent per annum of the policyholder account balance for stakeholder pensions for the first ten years, decreasing to 1 per cent thereafter, which is below the charges on personal pension products previously offered by the UK pensions industry.

Prudential launched a new retirement savings product, the Flexible Retirement Plan in 2005, further extending this proposition to include the Self Invested Personal Pension ("SIPP") proposition, which provides consumers with a wider range of investment options.

Department of Work and Pensions Rebates ("DWP Rebate")

Prudential also provides individual personal pension products through the DWP Rebate arrangement. Under this arrangement, individuals may elect to contract out of the UK's State Second Pension (referred to as S2P) which was previously known as State Earnings Related Pension Scheme, administered by the UK Department of Work and Pensions. If an individual elects to contract out, then he or she will designate a pension provider, such as Prudential. Premiums on products sold in this manner are paid through "rebates" from the Department of Work and Pensions, which represent the amount that would be otherwise paid into S2P. Rebate amounts are invested to provide benefits to the individual. Premiums from Department of Work and Pensions rebates are typically reported in the first quarter of each year.

Corporate Pensions

There are two categories of corporate pension products: defined benefit and defined contribution. Prudential has an established defined benefit plan client base covering the small to medium-sized employer market. Prudential's defined contribution client base ranges from small-unlisted companies to some of the largest companies in the United Kingdom as well as a number of clients in the public sector (in particular the Additional Voluntary Contribution Sector). Additional Voluntary Contribution plans enable employees to make additional pension contributions, either regularly or as a lump sum, to supplement their occupational pension plans.

Defined benefit plans and products continue to dominate the corporate pensions market in terms of funds under management. In recent years, however, most new plans established have been defined contribution products. In addition, there is an increasing trend among companies to close the defined benefit plans to new members or to convert existing schemes from defined benefit to defined contribution in order to stabilize or reduce potential pension liabilities.

Prudential offers group unit linked policies and with-profits policies to the corporate pensions market. Prudential's defined contribution products are Additional Voluntary Contribution plans, Group Money Purchase Plans, Group Personal Pension plans, Group Stakeholder Pension plans and Executive Pension plans.

Prudential also has a Company Pension Transfer Plan (or Bulk S32), designed to accept benefits from both defined benefit and defined contribution pension schemes which are winding-up (cease to exist or being replaced by a new type of scheme).

Pension Annuities and other retirement products

Prudential offers individual conventional immediate annuities that are either fixed or retail price indexed (referred to as RPI), where annuity payments are guaranteed from the outset, or with-profits annuities, where annuity payments are variable dependent on the investment performance of underlying assets. A total of £2,713 million of individual annuities were sold in 2006. Of this total, £1,356 million were sold to existing Prudential customers with maturing pension policies. The other £1,357 million were sold to new customers, typically individuals with a pension maturing with another provider who chose Prudential to provide their annuity. Prudential also offers bulk annuities, whereby it manages the assets and accepts the liabilities, of a company pension scheme, usually when it is being wound up by the employer. Due to the nature of the product, the volume of Prudential's bulk annuity sales is unpredictable as it depends on the decision of scheme trustees. In 2006, Prudential sold £1,431 million of bulk annuities.

Prudential's immediate annuity products provide guaranteed income for a specified time, usually the life of the policyholder, in exchange for a lump-sum capital payment. No surrender value is available

under any of these products. The primary risks to Prudential from immediate annuity products, therefore, are mortality improvements and credit risk.

Conventional Annuities

Prudential's conventional annuities include level (non-increasing), fixed increase and retail price index ("RPI") annuities. Prudential's fixed increase annuities incorporate automatic increases in annuity payments by fixed amounts over the policyholder's life. The RPI annuities provide for a regular annuity payment to which an additional amount is added periodically based on the increase in the UK Retail Prices Index. In 2006, sales of RPI annuities were £1,338 million (including £711 million of bulk annuities). In 2006, sales of level and fixed increase annuities amounted to £2,439 million (including £720 million of bulk annuities and £25 million of unit-linked Flexible Retirement Income Account products ("FRIA")).

With-profits Annuities

Prudential is one of only a few companies in the United Kingdom writing with-profits annuities. In 2006, Prudential wrote £367 million of this business. Prudential's with-profits annuities combine the income features of annuity products with the investment smoothing features of with-profits products and enable policyholders to obtain equity-type returns over time. Policyholders select an "anticipated bonus" from the specific range Prudential offers for the particular product. The value of the annuity payment each year depends upon the anticipated bonus rate selected by the policyholder when the product is purchased and the bonuses Prudential declares each year during the term of the product. If bonus rates fall below the anticipated rate, then the annuity income falls.

Flexible Retirement Income Account

FRIA offers customers a flexible retirement solution and consists of two separate products. The Flexible Income Drawdown Plan ("FIDP") offers wide investment choice, income flexibility and options on death, including the repayment of the remaining fund as a lump sum. Under the current rules for approval of pension schemes, customers can use this draw-down product to provide retirement income up to age 75. These rules require customers to purchase annuities with any remaining pension funds at age 75. The Flexible Lifetime Annuity ("FLA") offers similar investment choice and income flexibility to FIDP but no lump sum death benefits. Prudential sold £25 million of the FRIA products in 2006.

Lifetime mortgage

In October 2005, Prudential launched Prudential Property Value Release Plan. A lifetime mortgage product which gives customers greater flexibility and control over the timing of when they draw down funds, thereby reducing total interest charges over the lifetime of the loan. It has been well received by advisors and customers. Gross advances in 2006 were £90 million, representing an 8 per cent share of the lifetime mortgage market. In 2006 a face to face sales team was established to offer direct advice of the life time mortgage product, with the aim of meeting perceived customer demand for face to face sales in this market. Prudential plans to pursue opportunities to grow this team in 2007.

M&G

M&G is Prudential's fund management business in the United Kingdom and continental Europe and comprises retail, institutional and internal fund management activities. Its key metrics of performance are profits, net sales and investment performance.

Retail Fund Management

Gross fund inflows into M&G's retail products were a record £6.7 billion in 2006, a 75 per cent increase on 2005 as demand remained strong for M&G's high alpha equity and competitive fixed income and property offerings. Net fund inflows for 2006 more than doubled to £3.1 billion. This enabled M&G to consolidate its position as one of the top five retail fund managers in the United Kingdom, measured in terms of total funds under management (source: Investment Management Association).

The UK and European retail asset management industry has grown strongly during 2006 as rising stock markets have increased the value of existing funds under management and attracted investors back into the market. M&G's retail strategy is to maximize the leverage of its strong investment performance, multi-channel distribution and efficient operating platform.

The asset management sector has continued to benefit from the increasing shift by retail investors from opaque to transparent investment products, such as unit trusts, and M&G's range of market leading funds has positioned it well to benefit from this trend. The trend in favor of open architecture, which is the inclusion of funds provided by third party asset managers within products offered by banks, life insurance companies and other financial services providers, has accelerated cross border distribution by fund providers, as Continental European banks and life insurance companies have increased the range of third party funds they offer. Parallel to this, distribution of mutual funds has become increasingly intermediated and has been accompanied by the rise of professional buyers who demand higher levels of service and investment information, areas in which Prudential believes M&G has considerable expertise.

Wholesale Fund Management

In its institutional businesses, M&G continued to reap the benefits of its position as a leading innovator in fixed income and private finance, with gross fund inflows increasing by 66 per cent to £6.8 billion during 2006. Net fund inflows were £3 billion. The successful strategy of developing new external business lines with attractive margins, using expertise developed for internal funds, generated increased revenue streams, especially in the area of non-correlated assets such as leveraged loans. M&G's private finance business successfully completed two more Collateralized Debt Obligations ("CDOs") during the year, bringing the total number of CDOs launched since 2001 to eighteen.

Institutional markets are demanding increasingly sophisticated and tailored products and 2006 saw a rising awareness of asset/liability matching and a continued shift from balanced to specialist mandates. These trends, plus the increased role of fixed income within portfolios, continue to play to the strength and scale of M&G's wholesale business.

M&G's wholesale strategy is twofold: to add value to its internal clients through investment performance, liability matching and investment in innovative and attractive areas of capital markets and to utilize the skills developed primarily for internal funds to build new business streams and diversify revenues. Examples of new business streams include leveraged loans, CDOs, infrastructure finance and the Episode global macro hedge fund. Prudential believes demand has increased for alternative investments and structured credit expertise, and Prudential believes this means managers who offer value-adding skills, such as M&G, are able to command attractive margins. With its strong track record and market leading reputation, Prudential believes M&G remains well placed to continue to benefit from this trend.

Over three years Prudential UK's main with-profits fund, which is principally managed by M&G, has generated annual returns 1.08 per cent higher than its strategic benchmark and 1.96 per cent higher than its competitor benchmark.

Prudential Finance

Prudential Finance was established to manage Prudential's balance sheet for profit. In addition to acting as the internal banker to the Prudential Group and its subsidiaries, Prudential Finance's strategy is to leverage Prudential's and M&G's positioning and skills for profit. Its activities include bridging transactions, property financing and securities lending with a focus on deals which have high profitability and capital velocity but low capital usage.

The following table shows funds managed by M&G at the dates indicated.

	At December 31,	
	2006	2005
	(In £ Billions)	
Retail fund management	19	15
Institutional fund management	26	21
Internal fund management	119	113
	164	149
Total	164	149

Egg

Egg offers banking and insurance products and services, including credit cards, unsecured personal loans, mortgages, savings and general consumer insurance products. It was launched in October 1998 with the goal of attracting a new segment of customers and developing a new direct distribution channel. The Egg brand has consistently targeted consumers who like to manage their own financial affairs, seek consistently good value and simple products and prefer the flexibility offered by remote access. Egg began accepting new applications for deposit accounts exclusively through the internet in April 1999 and since then its business model has remained internet-led, supported by the telephone.

Egg completed its re-focus on its core UK banking business in 2005 with the completion of the sale of its investment wrap, an electronic platform allowing investors or their advisors to organize and transact holdings in investment funds offered by a number of investment companies, business "Funds Direct" in October 2005 and its 49.9 per cent stake in Marlborough Sterling Mortgage Services in January 2006.

The high level of consumer indebtedness has led to a sharp increase in the number of individuals seeking to restructure their credit obligations. This has been observed through higher levels of personal bankruptcies and individual voluntary arrangements: the number of personal insolvencies has risen at an annual rate of over 50 per cent. These factors have given rise to increased bad debt provisions across the UK banking industry.

In January 2007, Prudential concluded that Egg's current banking business does not represent the best opportunity for it to drive profitable growth in the future. On January 29, 2007 the Prudential board announced that it had entered into a binding agreement to sell Egg to Citi. The sale completed on May 1, 2007 for a net cash consideration of £546 million, subject to any closing adjustments to the final accounts. In connection with the sale of Egg, Prudential has agreed distribution rights with Citi through which Prudential will provide life and pension products to Egg's customers for a five year period. Citi is the largest credit card issuer in the world and a group that is well placed to develop and grow Egg's franchise. In addition, Prudential has been selected as a strategic provider to Citi for the distribution of Life Insurance products to Citi's consumer banking customers in Thailand, Indonesia and the Philippines.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table shows the total product balances for both Egg and Prudential branded products at the dates indicated.

Products

	At December 31,	
	2006	2005
	(In £ Millions)	
Customer savings	5,554	5,830
Mortgage loans	1,158	1,484
Credit card receivables	3,215	3,491
Personal loans	2,338	2,790

Egg Card, the United Kingdom's first credit card designed for the internet, was launched in September 1999. As at December 31, 2006 and the balance outstanding on credit cards stood at £3,215 million. At December 31, 2006, Egg's branded savings in the United Kingdom totaled £5,450 million and Egg's own-branded mortgage balances stood at £806 million and its personal loan balances stood at £2,338 million.

Egg also offers motor, travel, home and contents and life assurance, with each product type underwritten by different insurers and Egg receiving a sales commission.

Egg also markets Prudential branded products. These product balances, included in the above table, were £352 million of mortgage loans, £104 million of savings at December 31, 2006.

Reinsurance

In view of the size and spread of Prudential Assurance's long-term insurance fund, there is little need for reinsurance to protect this business. Some limited reinsurance is maintained and treaties relating to critical illness, permanent health insurance, term insurance and certain unit linked products are in place.

Reserves

In the United Kingdom, a life insurance company's reserve and other requirements are determined by its Board, with advice from its Actuarial Function Holder, subject to minimum reserve requirements. These minimum reserve requirements are established by the rules and guidance of the Financial Services Authority ("FSA").

The reserves are published in annual returns to the FSA. In practice, similar provisions are included in the life insurance company's statutory accounts with limited adjustments. Whether an employee of, or consultant to, a life insurance company, the Actuarial Function Holder must pay due regard to the fair treatment of policyholders in making recommendations to the company's board. The Actuarial Function Holder is required to report directly to the FSA any serious concerns regarding the company's ability to treat its customers fairly.

Prudential's regulatory reserving for with-profits products as required by UK regulation, takes into account annual bonuses/annual interest credited to policyholders because these are "attached" to the policies and are guaranteed. Realistic reserves are also calculated for with-profits products under UK regulation. These include an allowance for final bonuses based on the asset share or a prospective valuation of the policies and the cost of guarantees, smoothing and enhancements.

Prudential reserves for unit-linked products on the basis of the value of the unit fund and additional reserves are held for expenses and mortality where this is required by the contract design.

As well as the reserves, the company's assets must also cover other capital requirements set out in the Integrated Prudential Sourcebook. These comprise a with-profits insurance capital component, which is a measure of the difference in the surplus assets on regulatory and realistic bases; a resilience capital requirement for entities other than PAC, which makes prudent allowance for potential future adverse movements in investment values; and the long-term insurance capital requirement, which must be held by all European Union insurance companies. See "Financial Strength of Prudential Assurance's Long-term Fund" for further information on solvency and "Realistic Financial Strength Reporting" for further information on realistic reporting.

Financial Strength of Prudential Assurance's Long-term Fund

The PAC's long-term fund remains very strong. On a realistic valuation basis, with liabilities recorded on a market consistent basis, the free assets are valued at approximately £8.6 billion at December 31, 2006, before a deduction for the risk capital margin.

The PAC long-term fund is rated AA+ by Standard & Poor's, Aa1 by Moody's and AA+ by Fitch Ratings.

The table below shows the change in the investment mix of Prudential's main with-profits fund:

	2006 %	2005 %
UK equities	36	40
International equities	17	19
Property	15	15
Bonds	25	21
Cash and other asset classes	7	5
	100	100

The with-profits sub-fund delivered a pre-tax investment return of 12.4 per cent in 2006, and over the last five years the fund has achieved a total return of 63.8 per cent against 41.1 per cent for the FTSE 100 total return and 50.2 per cent for the FTSE All-Share (Total Return) index (figures are to December 31, 2006, before tax and charges). Much of this excellent investment performance was achieved through the active asset allocation of the fund. As part of its asset allocation process, Prudential constantly evaluates prospects for different markets and asset classes. During the year Prudential decreased its exposure to equities while increasing its exposure to corporate bonds and alternative assets, reflecting Prudential's view that increased diversification in the assets of the with-profits sub-fund was appropriate.

Realistic Financial Strength Reporting

In accordance with the FSA Prudential Sourcebook, PAC has to demonstrate solvency on a 'realistic' valuation basis as well as the regulatory basis. In the aggregate, the basis has the effect of placing a value on the liabilities of UK with-profits contracts that reflects the amounts expected to be paid based on the current value of investments held by the with-profits funds and current circumstances.

This basis makes companies' financial health more transparent to policyholders, intermediaries and regulators alike, and enables more informed choices to be made by policyholders. The PAC long-term with-profits sub-fund is very strong with the inherited estate (free assets) measured in accordance with the detailed methodology included in regulations contained in the FSA's rules for the determination of reserves on the FSA "realistic" Peak 2 basis, valued at approximately £8.6 billion at the year end before deducting for the risk capital margin.

Shareholders' Interests in Prudential's Long-term Insurance Business

In common with other UK long-term insurance companies, Prudential's products are structured as either with-profits products or non-participating (including unit-linked) products. For statutory and management purposes, Prudential Assurance's long-term fund consists of a number of sub-funds in which shareholders and policyholders have varying interests.

With-profits Products

With-profits products provide an equity-type return to policyholders through bonuses that are "smoothed". There are two types of bonuses: "annual" and "final". Annual bonuses, often referred to as reversionary bonuses, are declared once a year and, once credited, are guaranteed in accordance with the terms of the particular product. Unlike annual bonuses, final bonuses are only guaranteed until the next bonus declaration. Final bonuses are only credited on a product's maturity or surrender or on the death of the policyholder. Final bonuses can represent a substantial portion of the ultimate return to policyholders.

With-profits policies are supported by a with-profits fund. Prudential's primary with-profits fund is part of Prudential Assurance's long-term fund. With-profits products provide benefits that are generally either the value of the premiums paid, less charges and fees and with the addition of declared bonuses, or the guaranteed death benefit with the addition of declared bonuses. Smoothing of investment returns is an important feature of with-profits products. It is designed to reduce the impact of fluctuations in investment return from year to year and is accomplished predominantly through the level of final bonuses declared.

The return to Prudential's shareholders in respect of with-profits business Prudential writes is an amount equal to up to one-ninth of the value of the bonuses Prudential credits or declares to policyholders in that year. Prudential has a large block of in-force with-profits business with varying maturity dates that generates a relatively stable stream of shareholder profits from year to year.

Prudential Assurance's board of directors, with the advice of its Actuarial Function Holder and its With-Profits Actuary determines the amount of annual and final bonuses to be declared each year on each group of contracts.

When determining policy payouts, including final bonuses, Prudential follows an actuarial practice of considering "asset shares" for specimen policies. Asset shares broadly reflect the value of premiums paid in respect of a policy accumulated at the investment return on the assets Prudential notionally attributes to the policy. In calculating asset shares, Prudential takes into account the following items:

the cost of mortality risk and other guarantees (where applicable),

the effect of taxation,

management expenses, charges and commissions,

the proportion of the amount determined to be distributable to shareholders, and

the surplus arising from surrenders, non-participating business included in the with-profits fund and other miscellaneous sources.

However, Prudential does not take into account the surplus assets of the long-term fund, or their investment return, in calculating asset shares. Asset shares are used in the determination of final bonuses together with treating customers fairly, the need to smooth claim values and payments from year to year and competitive considerations.

Prudential is required by UK law and regulation to consider the fair treatment of its customers in setting bonus levels. The concept of treating customers fairly is established by statute but is not defined.

In practice, it provides one of the guiding principles for decision-making in respect of with-profits products.

The overall return to policyholders is an important competitive measure for attracting new business. The ability to declare competitive bonuses depends, in part, on the financial strength of Prudential Assurance's long-term fund, enabling it to maintain high levels of investment in equities and real estate, if it wishes to do so. Equities and real estate have historically over the long-term provided a return in excess of fixed interest securities.

In 2006, Prudential declared a total surplus of £2,693 million from PAC's primary with-profits sub fund, of which £2,424 million was added to with-profits policies and £269 million was distributed to shareholders. This includes annual bonus rates of 3.25 per cent per annum for the Prudence Bond and 3.25 per cent per annum for personal pensions. In 2005, Prudential declared a total surplus of £2,234 million from Prudential Assurance's primary with-profits sub fund, of which £2,011 million was added to with-profits policies and £223 million was distributed to shareholders. This includes annual bonus rates of 3.25 per cent for the Prudence Bond and 3.25 per cent for personal pensions.

The closed Scottish Amicable Insurance Fund ("SAIF") declared total bonuses in 2006 of £599 million compared to £455 million in 2005. Shareholders have no interest in profits from the SAIF fund, although they are entitled to the investment management fees paid by this business. For greater detail on the SAIF fund, see " The SAIF Sub-fund and Accounts" below.

Surplus Assets in PAC's Long-term With-profits Fund

The assets of the main with-profits fund within the long-term fund of PAC comprise the amounts that PAC expects to pay out to meet its obligations to existing policyholders and an additional amount used as working capital. The amount payable over time to policyholders from the with-profits fund is equal to the policyholders' accumulated asset shares plus any additional payments that may be required by way of smoothing or to meet guarantees. The balance of the assets of the with-profits fund is called the 'inherited estate' and has accumulated over many years from various sources.

The inherited estate represents the major part of the working capital of PAC's long-term insurance fund. This enables PAC to support with-profits business by providing the benefits associated with smoothing and guarantees, by providing investment flexibility for the fund's assets, by meeting the regulatory capital requirements that demonstrate solvency and by absorbing the costs of significant events or fundamental changes in its long-term business without affecting the bonus and investment policies. The size of the inherited estate fluctuates from year to year depending on the investment return and the extent to which it has been required to meet smoothing costs, guarantees and other events.

PAC believes that it would be beneficial if there were greater clarity as to the status of the inherited estate. As a result, PAC has announced that it has begun a process to determine whether it can achieve that clarity through a reattribution of the inherited estate. As part of this process an independent Policyholder Advocate has been nominated to represent policyholders' interests should a decision be made to proceed. This nomination does not mean that a reattribution will occur.

Given the size of the Group's with-profits business any proposal is likely to be time consuming and complex to implement and is likely to involve a payment to policyholders from shareholders' funds. If a reattribution is completed the inherited estate will continue to provide working capital for the long-term insurance fund.

Depletion of Surplus Assets and Shareholders' Contingencies

As a proprietary insurance company, Prudential Assurance is liable to meet its obligations to policyholders even if the assets of the long-term funds are insufficient to do so. The assets, in excess of

amounts expected to be paid for future terminal bonuses and related shareholder transfers (the excess assets) in the long-term funds, represented by the unallocated surplus of with-profits funds could be materially depleted over time by, for example, a significant or sustained equity market downturn, costs of significant fundamental strategic change or a material increase in mis-selling provisions. In the unlikely circumstance that the depletion of the excess assets within the long-term fund was such that the Group's ability to treat its customers fairly was adversely affected, it might become necessary to restrict the annual distribution to shareholders or to contribute shareholders' funds to the long-term funds to provide financial support.

In 1998, Prudential stated that deducting personal pensions mis-selling costs from the inherited estate of the With-Profits Sub-Fund would not impact the Company's bonus or investment policy. The Company gave an assurance that if this unlikely event were to occur, it would make available support to the fund from shareholder resources for as long as the situation continued, so as to ensure that policyholders were not disadvantaged.

The assurance was designed to protect both existing policyholders at the date it was announced, and policyholders who subsequently purchased policies while the pension mis-selling review was continuing. The mis-selling review was completed on June 30, 2002 and consequently the assurance has not applied to new business issued since January 1, 2004. New business in this context consists of new policies, new members to existing pension schemes plus regular and single premium top-ups, transfers and switches to existing arrangements. The assurance will continue to apply to any policy in force as at December 31, 2003, both for premiums paid before January 1, 2004 and for subsequent regular premiums (including future fixed, retail price index or salary related increases and Department for Work and Pensions rebates).

The maximum amount of capital support available under the terms of the assurance for policies in-force at December 31, 2003 will reduce over time as Prudential pays claims on the policies covered by it.

The bonus and investment policy for each type of with-profits policy is the same irrespective of whether or not the assurance applies. Hence removal of the assurance for new business has had no impact on policyholder returns and this is expected to continue for the foreseeable future.

The SAIF Sub-fund and Accounts

The SAIF sub-fund is a ring-fenced sub-fund of PAC's long-term fund and was formed following the acquisition of the mutual Scottish Amicable Life Assurance Society in 1997. No new business may be written in SAIF, although regular premiums are still being paid on policies in-force at the time of the acquisition and "top-ups" are permitted on these policies.

This fund is solely for the benefit of those Scottish Amicable Life Assurance Society policyholders whose policies were transferred to SAIF. Shareholders have no interest in the profits of this fund, although they are entitled to the investment management fees paid on this business. The brand name and rights to profit on new business were transferred to a new Prudential subsidiary, Scottish Amicable Life plc, which operated for the benefit of shareholders.

At the time of the acquisition, PAC's long-term fund made payments of £276 million to the SAIF sub-fund for the unit-linked life business and non-participating life business and the future profits from unitized with-profits life business. PAC also agreed to set up a memorandum account of £1.3 billion that is considered in determining SAIF's investment policy. The SAIF sub-fund pays an annual charge to the other part of PAC's long-term fund in respect of this memorandum account.

PAC's long-term fund made a further payment of £185 million to qualifying Scottish Amicable Life Assurance Society policyholders for the use of the Scottish Amicable brand and future expense synergies. This payment will be recovered by the long-term fund by means of a combination of a service agreement and a license fee agreement with Craigforth Services Limited (now renamed Prudential UK Services Limited), a shareholder-owned service company set up at the time of the acquisition.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

In addition to the payments described above, shareholders paid £415 million to qualifying Scottish Amicable Life Assurance Society policyholders, representing goodwill, and £70 million for certain Scottish Amicable Life Assurance Society strategic investments.

The adoption on January 1, 2005 of realistic reporting of liabilities in SAIF has had the effect of including the surplus assets over declared bonuses in liabilities rather than as unallocated surplus.

With the exception of certain guaranteed annuity products, referred to below, the majority of SAIF with-profits policies do not guarantee minimum rates of return to policyholders. Should the assets of SAIF be inadequate to meet the guaranteed benefit obligations to the policyholders of SAIF, the PAC long-term fund would be liable to cover any such deficiency. Due to the quality and diversity of the assets in SAIF and the ability of SAIF to revise guaranteed benefits in the event of an asset shortfall, the directors believe that the probability of either the PAC's long-term fund or Prudential's shareholders' funds having to contribute to SAIF is remote.

Non-participating Business

The majority of Prudential-branded non-participating business is written in the non-profit sub-fund of PAC's long-term fund or in subsidiaries owned by Prudential. Since mid-2004, Prudential has written all of its new non-profit annuity business through Prudential Retirement Income limited ("PRIL"), from which the profits are attributed solely to shareholders. Prior to that time, certain non-profit annuity business was written through Prudential Annuities Limited ("PAL"), which is wholly owned by PAC's with-profits fund. The profits on this business are attributable to the fund and not to shareholders, although indirectly shareholders get one ninth of additional amounts paid to policyholders through the declaration of bonuses.

The unit-linked business written by PAC and Prudential International Assurance is written with capital provided by shareholders.

Pension Mis-selling Review

The UK regulator (previously the Personal Investment Authority) has determined that many individuals advised by insurance companies, Independent Financial Advisers and other intermediaries to not join, to transfer from or to opt out of their occupational pension schemes in favor of private pension products during the period April 1988 to June 1994 were incorrectly advised and would have been better off not purchasing the private pension products sold to them. Industry participants are responsible for compensating the persons to whom private pensions were mis-sold. As a consequence of the review of potential cases of mis-selling required by the FSA, and to pay compensation to policyholders where necessary, a provision is maintained by the PAC with-profits fund. Detail of the amounts and movements in the provision are shown in note H14 to the financial statements.

The costs associated with the pension mis-selling review have been met from the inherited estate. Accordingly, these costs have not been charged to the asset shares used in the determination of policyholder bonus rates. Hence policyholders' pay-out values have been unaffected by pension mis-selling.

In 1998, Prudential stated that deducting mis-selling costs from the inherited estate would not impact its bonus or investment policy and it gave an assurance that if this unlikely event were to occur, it would make available support to the fund from shareholder resources for as long as the situation continued, so as to ensure that policyholders were not disadvantaged. The assurance was designed to protect both existing policyholders at the date it was announced, and policyholders who subsequently purchased policies while the pension mis-selling review was continuing.

The pension mis-selling review was completed on June 30, 2002. The assurance will continue to apply to any policy in force at December 31, 2003, both for premiums paid before January 1, 2004, and

for subsequent regular premiums (including future fixed, retail price index or salary related increases and Department of Work and Pensions rebate business). The assurance has not applied to new business since January 1, 2004. New business in this context consists of new policies, new members to existing pension schemes plus regular and single premium top-ups, transfers and switches to existing arrangements. The maximum amount of capital support available under the terms of the assurance will reduce over time as claims are paid on the policies covered by it.

The bonus and investment policy for each type of with-profits policy is the same irrespective of whether or not the assurance applies. Hence removal of the assurance for new business has had no impact on policyholder returns and this is expected to continue for the foreseeable future.

Mortgage Endowment Products Review

In common with several other UK insurance companies, Prudential used to sell low-cost endowment products related to repayment of residential mortgages. The FSA has worked with insurance companies to devise a program whereby the companies write to customers indicating whether there may be a possible shortfall and outline actions that the customers can take to prevent this possibility.

Provisions are held by Prudential to cover potential compensation in respect of mortgage-endowment mis-selling claims as explained in note H14 to the financial statements.

In May 2006 Prudential introduced a deadline for both Prudential and Scottish Amicable mortgage endowment complaints. In line with the time limit prescribed by the FSA and the ABI, impacted customers have three years to lodge a mis-selling complaint from the date they receive their first "red" letter indicating that there is a high risk their mortgage endowment may not achieve its projected final value.

Guaranteed Annuities

PAC used to sell guaranteed annuity products in the United Kingdom and held a provision of £47 million at December 31, 2006, within the main with-profits fund to honor guarantees on these products. The Company's main exposure to guaranteed annuities in the United Kingdom is through the SAIF and a provision of £561 million was held in SAIF at December 31, 2006, to honor the guarantees. As SAIF is a separate sub-fund of the Company's long-term business fund, this provision has no impact on shareholders.

US Business

Prudential conducts its US insurance operations through Jackson National Life Insurance Company and its subsidiaries, including Curian Capital, LLC, a registered investment advisor. The US operations also include PPM America, Prudential's US internal and institutional fund manager, and Prudential's US broker-dealer operations (National Planning Corporation, SII Investments, Inc., IFC Holdings, Inc. and Investment Centers of America, Inc.). At December 31, 2006, Prudential's US operations had almost 3 million policies and contracts in effect and PPM America managed approximately \$74 billion (£38 billion) of assets. In 2006, total new business premiums were £5,981 million.

US Market Overview

The United States is the largest retirement savings market in the world, with 67 per cent, or \$12.9 trillion, of the world's retirement assets concentrated in the United States at the end of 2005 (source: Cerulli Associates). As approximately 78 million "baby boomers" (source: US Census Bureau), born between 1946 and 1964, reach retirement age in the next decade, the aging demographics of the United States are expected to increase annual retirement distributions to more than \$1 trillion per year by 2012. The combination of increasing average life expectancy and decreasing average retirement age

in the United States is leading to an increase in the average time individuals will spend in retirement. At the same time, the responsibility for providing income during retirement continues to shift away from institutions, such as government and employers, toward individuals. These changes, coupled with historically low savings rates in the United States, have resulted in an increasing risk that individuals' finances will be insufficient to cover the cost of living through retirement. These consumers will have a growing need for independent financial advice and increasingly seek guarantees and longevity protections from the financial products they purchase.

Despite favorable demographics, US life insurers face challenges from both within and outside the industry. The US life insurance industry remains highly fragmented the combination of all annuity companies ranked below the top 20 annuity sellers have more than twice the market share of the top annuity provider (source: LIMRA) and competition for market share is expected to intensify. In addition to competing against each other, life insurers are increasingly competing with other financial services providers, in particular mutual fund companies and banks, for a share of retirement savings assets in the US. Sales of annuities in the career agency distribution channel continue to decline to the benefit of independent agents and broker-dealers due to increasing costs and regulatory burdens, as well as a growing pool of sophisticated investors increasingly seeking more independent investment advice.

The US insurance industry faces continued regulatory scrutiny, particularly with respect to index and variable annuity products. The National Association of Securities Dealers Inc. ("NASD") has issued guidelines requesting that its member firms provide stricter supervision of the marketing and sales of index annuities. In the variable annuity market, regulators continue to focus on product suitability in an effort to ensure that the products are sold appropriately to customers. There has also been regulatory pressure to reduce fees and costs associated with variable annuities, which has increased advisor demand for providers to manufacture low-cost variable annuity options.

Companies with quality distribution relationships, strong product manufacturing and below-industry-average cost structures are well positioned to compete effectively and continue to grow profitably. Significant convergence in the US financial services industry has yet to occur. As noted, the market remains fragmented with more business being consolidated organically among market participants with significant scale and sophisticated risk management functions.

During 2006 and 2005, the S&P index increased 13.6 per cent and 3.0 per cent, respectively, increasing the attractiveness of products providing access to equity-based returns. During the same periods, interest rates trended upward. However, the short end of the yield curve rose more dramatically than the long end of the curve, resulting in a flat to inverted yield curve. This, combined with low spreads over Treasury bonds, created a difficult environment for the sale of properly priced fixed annuities.

Products

Jackson provides retirement income and savings solutions in the mass and mass-affluent segments of the US market, primarily to those planning for retirement or in retirement already. It offers tools that help people plan for their retirement, and manufactures products with specialized features and guarantees to meet customers' needs. By seeking to add value to both the representatives who sell Jackson products, and to their customers, Jackson has built a strong position in the US retirement savings and income market with the fastest-growing variable annuity franchise measured by new sales growth during the past four years (source: VARDS) and top-10 sales rankings in fixed index annuities and individual traditional deferred fixed annuities (source: LIMRA).

Jackson's primary focus is manufacturing high-margin, capital-efficient products, such as variable annuities, and marketing these products to advice-based channels through its relationship-based distribution model. In developing new product offerings, Jackson leverages a low-cost, flexible technology platform to manufacture innovative, customizable products that can be brought to the market

quickly. In 2006, 81 per cent of Jackson's retail sales were from products and features developed and launched in 2006 and 2005.

Jackson's product offerings include variable, fixed and fixed index annuities, as well as life insurance and institutional products. Jackson's annuity products are long-term personal retirement products, which offer tax-deferred accumulation on the funds invested until proceeds are withdrawn from the policy. Fixed annuities offer customers a guarantee of principal and a minimum guaranteed rate of return on their deposits. Fixed index annuities also offer these features, but vary from fixed annuities in that they offer the potential for additional interest to be credited based upon the performance of an equity index over a specified period.

Variable annuity products differ from the fixed annuity products in that the returns to the customer will depend upon the performance of the underlying fund portfolio. Jackson's variable annuity products offer a range of protection options, such as death, income and withdrawal benefits, which are priced separately by the company and can be elected by customers according to their individual needs. Jackson manages its exposure to equity market movements through a comprehensive hedging program.

Distribution

Due to the increasing complexity of the retirement savings and income market and broad array of financial products being brought to market, Prudential believes professional advice is vital for customers to understand the choices available and to determine which products are best for their particular financial situation. Therefore, Jackson primarily markets its retail products through advice-based distribution channels, including independent agents, independent broker-dealer firms, regional broker-dealers, banks and registered investment advisors. Beginning in 2005, Jackson also began marketing products through its captive insurance agency, acquired through the purchase of Life of Georgia.

Jackson supports its network of independent agents and advisors with award-winning marketing support and award-winning customer service. In 2006, the Service Quality Measurement Group recognized Jackson with a World Class Customer Satisfaction Award, and Jackson's marketing campaigns won awards for achievement in graphic design, editorial content and overall communications excellence. Jackson complements its award-winning marketing and customer service with value-added services such as the Seminar Systems Unit, which helps advisors host educational seminars for clients on a variety of financial planning topics. In addition, Jackson recently launched the Retirement and Wealth Strategies Group, a unit dedicated to helping advisors better address their clients' evolving retirement planning needs.

Jackson National Life Insurance Company

Jackson is a leading provider of long-term savings and retirement products to retail and institutional customers throughout the United States. Jackson offers variable annuities, fixed index annuities, individual fixed annuities, life insurance and institutional products. By developing and offering a wide variety of products, Jackson believes that it has positioned itself to compete effectively in various stock market and interest rate environments. Jackson markets its retail products through various distribution channels, including independent agents, independent broker-dealer firms (including financial planners), regional broker-dealers, banks, registered investment advisors, and beginning in 2005, through its captive insurance agency, acquired through the purchase of Life of Georgia.

The interest-sensitive fixed annuities, fixed index annuities, immediate annuities and life insurance products are sold through independent agents, broker-dealers and banks. For variable annuity products, which can only be sold through broker-dealers licensed by the US National Association of Securities Dealers, Jackson has selling agreements with such firms and is continuing to focus on its own broker-dealer distribution channel. Its institutional products department sells guaranteed investment contracts, funding agreements and medium-term notes through brokers and investment banks and directly to

institutional investors. In early 2003, Jackson commenced operating in the registered investment advisor channel, with the launch of Curian Capital, LLC. In 2005, Jackson began selling life insurance products through its newly established captive agency, JNL Southeast Agency LLC. For further information, see " Captive Agency".

Products

The following table shows total new business premiums in the United States by product line and distribution channel for the periods indicated, and policyholder liabilities by product line. Total new business premiums include deposits for investment contracts with limited or no life contingencies.

Annuities

Fixed Annuities

Interest-sensitive Annuities

Edgar Filing: PRUDENTIAL PLC - Form 20-F

In 2006, interest-sensitive fixed annuities accounted for 11 per cent of total new business premiums and 31 per cent of policyholder liabilities of the US operations. Interest-sensitive fixed annuities are products which allow for tax-deferred accumulation of funds, with flexible payout options. They are used for asset accumulation in retirement planning and for providing income in retirement.

The contractholder pays Jackson a premium, which is credited to the contractholder's account. Periodically, interest is credited to the contractholder's account and administrative charges are deducted, as appropriate. Jackson may reset the interest rate on each contract anniversary, subject to a guaranteed minimum, in line with state regulations.

When the annuity matures, Jackson either pays the contractholder the amount in the contractholder account or begins making payments to the contractholder in the form of an immediate annuity product. This latter product is similar to a UK annuity in payment.

Fixed annuity policies are subject to early surrender charges for the first six to nine years of the contract. In addition, the contract may be subject to a market value adjustment at the time of early surrender. During the surrender charge period, the contractholder may cancel the contract for the surrender value.

Jackson's profits on fixed annuities arise primarily from the spread between the return it earns on investments and the interest credited to the contractholder's account (net of any surrender charges or market value adjustment) less expenses.

Fixed Index Annuities

Fixed index annuities accounted for 9 per cent of total new business premiums in 2006 and 7 per cent of policyholder liabilities of the US operations. Fixed index annuities (formerly referred to as equity-indexed annuities) are deferred annuities that allow for tax-deferred accumulation of funds, with flexible payout options. They are used for asset accumulation in retirement planning and for providing income in retirement.

The contractholder pays Jackson a premium, which is credited to the contractholder's account. Periodically, interest is credited to the contractholder's account and administrative charges are deducted, as appropriate. Jackson guarantees an annual minimum interest rate, although actual interest credited may be higher and is linked to an equity index over its indexed option period.

Jackson's profit arises from the investment income earned and the fees charged on the contract, less the expenses incurred, which include the costs of the guarantees, and the interest credited to the contract. Fixed index annuities are subject to early surrender charges for the first five to 12 years of the contract. During the surrender charge period, the contractholder may cancel the contract for the surrender value.

Immediate Annuities

In 2006, immediate annuities accounted for 1 per cent of total new business premiums and 2 per cent of policyholder liabilities of the US operations. Immediate annuities guarantee a series of payments beginning within a year of purchase and continuing over either a fixed period of years and/or the life of the policyholder. If the term is for the life of the policyholder, then Jackson's primary risk is mortality risk. This product is generally used to provide a guaranteed amount of income for policyholders and is used both in planning for retirement and in retirement itself. The implicit interest rate on these products is based on the market conditions that exist at the time the policy is issued and is guaranteed for the term of the annuity.

Variable Annuities

In 2006, variable annuities accounted for 64 per cent of total new business premiums and 38 per cent of policyholder liabilities of the US operations. Variable annuities are tax-deferred annuities where the rate of return depends upon the performance of the underlying portfolio, similar in principle to UK unit-linked products. They are also used for asset accumulation in retirement planning and to provide income in retirement.

The contractholder's premiums are held apart from Jackson's general account assets, in a "separate" account, which is analogous to a unit-linked fund. The contractholder can allocate the premiums between a variety of variable sub-accounts with a choice of fund managers and/or guaranteed fixed-rate options. The value of the portion of the separate account allocated to variable sub-accounts fluctuates with the underlying investment. Variable annuity policies are subject to early surrender charges for the first three to six years of the contract. During the surrender charge period, the contractholder may cancel the contract for the surrender value. Jackson offers one variable annuity that has no early surrender charges.

Jackson offers a choice of guaranteed benefit options within its variable annuity product range which customers can elect and pay for. These include the guaranteed minimum death benefit ("GMDB"), which guarantees on death the contractholder receives a minimum value regardless of past market performance. These guaranteed death benefits might be expressed as the return of original premium, the highest past anniversary value of the contract, or as the original premium accumulated at a fixed rate of interest. In addition, there are two other types of guarantee, guaranteed minimum withdrawal benefits ("GMWB") and guaranteed minimum income benefits ("GMIB"). GMWBs provide a guaranteed return of the principal invested by allowing for periodic withdrawals which are limited to a maximum percentage of the initial premium. One version of the GMWBs provides for a minimum annual withdrawal amount that is guaranteed for the contractholder's life without annuitization. GMIBs provide for a minimum level of benefits upon annuitization regardless of the value of the investments underlying the contract at the time of annuitization. The GMIB is reinsured.

As investment return on the separate account assets is attributed directly to the contractholders, Jackson's profit arises from the fees charged on the contracts, less the expenses incurred, which include the costs of guarantees.

Jackson credits premiums on variable annuities to a separate account or to the fixed account, depending on the policyholders' elections. The policyholders determine how the premiums will be allocated by choosing to allocate all or a portion of their accounts either to a variety of variable sub-accounts, with a choice of investment managers, or to guaranteed fixed-rate options. The rate of election of the fixed account option within variable annuities in 2006 of 16 per cent compared with 20 per cent in 2005.

The non-fixed account portion of variable annuity products is backed by specific assets that are held in separate accounts. The assets in these separate accounts are "segregated" pursuant to state insurance law and do not form part of the assets in the US general account, which backs the remainder of the insurance business in the United States. Amounts held in the separate accounts are not chargeable with liabilities arising out of any other business Jackson may conduct. All of the income and gains or losses from these assets less specified management charges are credited to or against this portion of the policies and not any other policies that Jackson may issue. For IFRS reporting, separate account assets and liabilities as presented in this Form 20-F are not distinguished from general account assets and liabilities.

Life Insurance

Reflecting the competitive life insurance market place and the overall trend towards asset accumulation products, Jackson's life insurance products accounted for only 0.4 per cent of the total new business premiums and 10 per cent of policyholder liabilities of the US operations in 2006. Jackson sells several types of life insurance including term life, universal life, survivorship universal life, and variable universal life. Term life provides protection for a defined period of time and a benefit that is payable to a designated beneficiary upon death of the insured. Universal life provides permanent individual life insurance for the life of the insured and includes a savings element. Survivorship universal life is a form of permanent life insurance that insures two people and pays the policy benefits after the

death of the last surviving insured. Variable universal life is a life insurance policy that combines death benefit protection and the important tax advantages of life insurance with the long-term growth potential of professionally managed investments.

Institutional Products

Institutional products consist of guaranteed investment contracts ("GICs"), funding agreements, including agreements issued in connection with participation in the Federal Home Loan Bank of Indianapolis ("FHLBI") program, which is further described below, and medium term note funding agreements. In 2006, institutional products accounted for 15 per cent of total new business premiums and 12 per cent of policyholder liabilities of US operations. The GICs are marketed by its institutional products department to defined contribution pension and profit-sharing retirement plans. Funding agreements are marketed to institutional investors, including corporate cash accounts and securities lending funds, as well as money market funds, and are issued to the FHLBI in connection with its program see "Funding Agreements" below. Three types of institutional products are offered:

traditional GICs,

funding agreements, and

medium term note funding agreements.

Traditional Guaranteed Investment Contracts

Under a traditional GIC, the policyholder makes a lump sum deposit. Interest is paid on the deposited funds, usually on a quarterly basis. The interest rate paid is fixed and is established when the contract is issued.

Traditional GICs have a specified term, usually two to three years, and typically provide for phased payouts. Jackson tailors the scheduled payouts to meet the liquidity needs of the particular retirement plan. If deposited funds are withdrawn earlier than scheduled, an adjustment is made that approximates a market value adjustment.

Jackson sells GICs to retirement plans, in particular 401(k) plans. The traditional GIC market is extremely competitive. This is due in part to competition from synthetic GICs, which Jackson does not sell.

Funding Agreements

Under a funding agreement, the policyholder either makes a lump-sum deposit or makes specified periodic deposits. Jackson agrees to pay a rate of interest, which may be fixed but which is usually a floating short-term interest rate linked to an external index. Interest is paid quarterly to the policyholder. The average term for the funding agreements is one to two years. At the end of the specified term, policyholders may re-deposit the principal in another funding agreement. Jackson makes its profit on the spread between the yield on its investment and the interest rate credited to policyholders.

Typically, brokerage accounts and money market mutual funds are required to invest a portion of their funds in cash or cash equivalents to ensure sufficient liquidity to meet their customers' requirements. The funding agreements permit termination by the policyholder on 7 to 90 days notice, and thus qualify as cash equivalents for the clients' purposes. Funding agreements terminable by the policyholder with less than 90 days notice account for less than 0.1 per cent of Jackson's total policyholder reserves.

In 2005, Jackson became a member of the FHLBI. Membership allows Jackson access to advances from FHLBI that are collateralized by mortgage related assets in Jackson's investment portfolio. These

advances are in the form of funding agreements issued to FHLBI. In 2006, the total premiums generated from advances from the FHLBI were \$500 million.

Medium Term Note Funding Agreements

Jackson has also established European and global medium-term note programs. The notes offered may be denominated in any currency with a fixed or floating interest rate. Notes are issued to institutional investors by a special purpose vehicle and are secured by funding agreements issued by Jackson.

Distribution and Marketing

Jackson distributes products in all 50 states of the United States and in the District of Columbia, although not all products are available in all states. Operations in the state of New York are conducted through a New York insurance subsidiary.

Jackson focuses on independent distribution systems. It supports its network of independent agents and advisors with education and training programs. A substantial portion of the costs associated with generating new business are not fixed costs but vary directly with the level of business produced. Industry figures show that the costs are low relative to other US insurers.

Jackson offers internet-based support to its broker-dealers. It continues to expand its internet-based services, increasing amounts of information available for both customers and agents.

Independent Agents and Broker-Dealers

Jackson's subsidiary, Jackson National Life Distributors, Inc. ("JNLD"), is the primary marketing and distribution organization for annuities and life insurance products. The insurance and fixed annuity products are distributed through independent agents located throughout the United States. These approximately 22,000 appointed insurance agents or brokers, who also may represent other companies, are supported by four regional marketing divisions. JNLD generally deals directly with writing agents and brokers thereby eliminating intermediaries, such as general agents. This distribution channel has enabled it to generate significant volumes of business on a low, variable cost basis. Jackson is responsible for providing agents with product information and sales materials.

JNLD's wholesalers meet directly with broker-dealers and financial planners and are supported by an extensive internal sales staff. There are more than 700 active selling agreements with regional and independent broker-dealer organizations throughout the United States, which provides Jackson access to more than 71,000 appointed agents.

Jackson is responsible for providing training for its broker-dealer partners and providing them with product information and sales materials.

Banks, Credit Unions and Other Financial Institutions

Jackson's Institutional Marketing Group distributes annuity and life insurance products through banks, credit unions and other financial institutions and through third-party marketing organizations that serve these institutions. Jackson is a leading provider of annuities offered through banks and credit unions and can access nearly 18,000 financial institution representatives through existing relationships with banks and credit unions. Jackson has established distribution relationships with medium-sized regional banks, which it believes are unlikely to develop their own insurance product capability.

Independent Broker-Dealers

Jackson's retail distribution is managed by Prudential's independent broker-dealer network, National Planning Holdings ("NPH"), which is made up of four firms, National Planning Corporation, SII Investments, Inc., INVEST Financial Corporation and Investment Centers of America, Inc. NPH had more than 2,600 registered representatives at the end of 2006.

Registered Investment Advisor

Commencing operation in early 2003, Curian Capital, LLC (Jackson's registered investment advisor channel) provides innovative fee-based separately managed accounts and investment products to advisors through a sophisticated technology platform.

The registered investment advisor industry began as a service offered to very high net worth investment clients, focusing on platforms rather than specific products, and providing institutional-quality management, custom portfolios and tax services. The industry has evolved to offer personalized investment advice, very high quality money management, good returns and reasonable costs to a broader range of clients.

Institutional Products Department

Jackson markets its institutional products through its institutional products department. It has direct contacts with banks, municipalities, asset management firms and direct plan sponsors. Institutional products are distributed and marketed through intermediaries to these groups.

Captive Agency

In connection with the acquisition of Life of Georgia in 2005, Jackson established the JNL Southeast Agency ("JNLSA"), the Company's first captive agency since 1970. JNLSA, with approximately 100 life insurance agents, was formed to help retain the Life of Georgia book of business and to create a new distribution channel for Jackson's life insurance products.

Factors Affecting Pricing of Products and Asset Liability Management

Jackson prices products based on assumptions about future mortality, investment yields, expenses and persistency. Pricing is influenced by its objectives for return on capital and by competition. Although Jackson includes a profit margin in the price of its products, the variation between the assumptions and actual experience can result in the products being more or less profitable than it was assumed they would be. This variation can be significant.

Jackson designs its interest-sensitive products and conducts its investment operations to closely match the duration of the assets in its investment portfolio with the annuity, term life, whole life, universal life and guaranteed investment contract product obligations. Jackson seeks to achieve a target spread between what it earns on its assets and what it pays on its liabilities by investing principally in fixed-rate securities and in options and futures to hedge equity-related movements in the value of its products.

Jackson segregates its investment portfolio for certain investment management purposes and as part of its overall investment strategy into four portfolios: fixed annuities without market value adjustment, fixed annuities with market value adjustment, fixed index annuities and institutional liabilities. The portfolios backing fixed annuities with and without market value adjustments and the fixed index annuities have similar characteristics and differ primarily in duration. The portfolio backing the institutional liabilities has its own mix of investments that meet more limited duration tolerances. Consequently, the institutional portfolio is managed to permit less interest rate sensitivity and has limited

exposure to mortgage-backed securities. At December 31, 2006, 8.7 per cent of the institutional portfolio was invested in residential mortgage-backed securities.

The fixed-rate products may incorporate surrender charges, market value adjustments, two-tiered interest rate structures or other limitations relating to when policies can be surrendered for cash, in order to encourage persistency. At December 31, 2006, Jackson National Life's fixed annuity reserves that had surrender penalties or other withdrawal restrictions were 72 per cent. Substantially all of the institutional portfolio had withdrawal restrictions or market value adjustment provisions.

Fixed index annuities issued by Jackson also include an equity component that is hedged using equity options and futures contracts issued on the corresponding exchange. The equity component of these annuities constitutes an embedded derivative under IAS 39, "Financial Instruments: Recognition and Measurement" that is carried at fair value, as are other derivative instruments.

Guaranteed benefits issued by Jackson in conjunction with the sales of variable annuity contracts expose Jackson to equity risk as the benefits generally become payable when equity markets decline below the guaranteed amount. Certain of these benefits are carried at fair value under IAS 39 with changes in fair value recorded in income. Jackson hedges this risk using equity options and futures contracts, which are also carried at fair value under IAS 39. As certain benefits have mortality risk and, are therefore precluded from being carried at fair value, the income statement includes a timing mismatch due to changes in fair value.

Underwriting

The decision to underwrite a particular life policy depends upon the assessment of the risk to Jackson represented by the proposed policy. The risk selection process is performed by underwriters who evaluate policy applications on the basis of information provided by the applicant and other sources. Specific medical tests may be used to evaluate policy applications based on the size of the policy, the age of the applicant and other factors.

Jackson's underwriting rules and procedures are designed to produce mortality results consistent with the assumptions used in product pricing while providing for competitive risk selection.

Reserves

Except for certain non-insurance deposit type accounts and as allowed under IFRS, Jackson uses reserves established on a US GAAP basis as the basis for consolidation into Prudential's IFRS accounts.

For the fixed and variable annuity contracts and institutional products, the reserve is the policyholder's account value. For the immediate annuities, reserves are determined as the present value of future policy benefits. Mortality assumptions are based on the 1983a Individual Annuitant Mortality Table and the Annuity 2000 Mortality Table for newer issues. Interest rate assumptions currently range from 2.0 per cent to 9.0 per cent.

For the traditional term life contracts, reserves for future policy benefits are determined using the net level premium method and assumptions as to mortality, interest, policy persistency and expenses. Mortality assumptions are generally from 25 per cent to 160 per cent of the 1975-1980 Basic Select and Ultimate tables, depending on underwriting classification and policy duration. Interest rate assumptions range from 4.0 per cent to 8.0 per cent. Persistency and expense assumptions are based on Jackson's experience.

For the interest-sensitive and single premium life contracts, reserves approximate the policyholder's account value.

Reinsurance

Jackson reinsures portions of the coverage provided by its life insurance products with other insurance companies under agreements of indemnity reinsurance. Reinsurance assumed from other companies is not material.

Indemnity reinsurance agreements are intended to limit a life insurer's maximum loss on a large or unusually hazardous risk or to obtain a greater diversification of risk for the life insurer. Indemnity reinsurance does not discharge the original insurer's primary liability to the insured. Jackson's reinsured business is ceded to numerous reinsurers and the amount of business ceded to any one reinsurer is not material. Typically, the reinsurers have an AM Best Co rating of A or higher.

Jackson limits the amount of risk it retains on new policies. Currently, the maximum risk that is retained on new policies is \$2.0 million. Jackson is not a party to any risk reinsurance arrangement with any reinsurer pursuant to which the amount of reserves on reinsurance ceded to such reinsurer equals more than 1 per cent of total policy reserves.

Beginning in late 1995, Jackson entered into reinsurance agreements to cede 80 per cent of its new level premium term life insurance business written in the United States to take advantage of competitive pricing in the reinsurance markets. Beginning January 1, 1999, it began to cede 90 per cent of new writings of level premium term products. Jackson intends to continue to cede a significant proportion of new term life insurance business for as long as pricing in the reinsurance markets remains favorable.

Effective from December 31, 2002, Jackson cedes the guaranteed minimum death benefit coverage associated with certain variable annuities issued prior to December 31, 2002 to an affiliate, Prudential Atlantic Reinsurance Company ("PARC"), Dublin, Ireland. PARC is consolidated into the Group's financial statements.

Jackson cedes the guaranteed minimum income benefit on variable annuities to an unaffiliated reinsurer.

In connection with the purchase of Life of Georgia, Jackson acquired certain lines of business that have been wholly ceded to non-affiliates. These include both direct and assumed accident and health business, direct and assumed life insurance business and certain institutional annuities.

Policy Administration

Jackson provides a high level of administrative support for both new and existing policyholders. Jackson's ability to implement new products quickly and provide customer service is supported by integrated computer systems that issue and administer complex life insurance and annuity contracts. Jackson continues to develop its life insurance administration and underwriting systems and its fixed and variable annuity administration systems to enhance the service capabilities for both new and existing policies.

PPM America

PPM America is Prudential's US fund management operation, with offices in Chicago and New York. Its primary focus is to manage funds for Jackson and therefore the majority of funds under management are fixed interest in nature. PPM America has also launched a number of institutional high yield and special investment vehicles to leverage their fund management capabilities into new areas. PPM America also serves as investment advisor for certain mutual funds, several private investment funds and structured finance vehicles, and the US equity and fixed income portion of portfolios of certain affiliates within Prudential.

Life of Georgia

Jackson completed the purchase of Life of Georgia in May 2005 for a preliminary consideration of £142 million. This acquisition doubled the number of Jackson's in-force life and annuity policies, adding scale to its operating platform and expanding its distribution capability, as well as further diversifying its income streams. This transaction enabled Jackson to grow its life business at a higher return and faster rate than could be achieved organically.

The preliminary purchase price was subject to post-closing adjustments and was initially allocated to the assets acquired and liabilities assumed using management's best estimate of fair value as of the acquisition date. In 2006, an arbitrator ruled in Jackson's favor on certain purchase price adjustments. As a result of this determination and other previously settled amounts, the purchase price was reduced by £6.3 million within the purchase price allocation period.

As of December 31, 2005, Jackson recorded in other assets the value of the business acquired totaling £0.6 million. As a result of the purchase price adjustments, this asset was reversed in 2006 and the remaining adjustment resulted in negative goodwill, which was recorded as an extraordinary gain of £4.8 million.

On December 31, 2005, Life of Georgia was merged into Jackson. In January 2006, Jackson completed the integration of the 1.5 million Life of Georgia policies onto its own operating platform, demonstrating its capability in consolidating large blocks of business. The Company expects that Jackson will continue to consider further US acquisitions as opportunities arise.

Asian Business

Asia's life insurance markets are very attractive with large scale and high growth rates supported by economic growth, favorable demographics and market liberalizations. However, there are some formidable barriers to successful entry, including entrenched incumbents, the pace of change and nature of regulations, mandatory domestic partners in some markets and a shortage of experienced staff. Acquisition opportunities, particularly of scale businesses, are limited and in North Asian markets are likely to involve back books that currently experience negative spread and hence require material provisions under European regulatory capital requirements.

Since the mid 1990s Prudential has been progressively building its Asian platform; strengthening and protecting its market leading positions in its established markets (Singapore, Hong Kong and Malaysia), entering emerging markets (Thailand, Indonesia, Philippines, Vietnam), securing strong joint venture partners for the sizable opportunities in India and China (ICICI and CITIC respectively) and taking positions in the large North Asian markets of Taiwan, Japan and Korea. At December 31, 2006 Prudential had 7.2 million customers in Asia, up from 1.5 million in 2000.

Prudential has been focused on building proprietary distribution as the most effective way of delivering sustainable new business volumes and managing the product range typically through growing tied agency and integrated bancassurance arrangements (such as with SCB in Hong Kong). Prudential also prioritizes economic capital efficiency, profitability and customer focus in its Asian product portfolio as seen, for example, with the introduction of unit linked products across the region, an emphasis on regular premium policies, life stage themed marketing and purposely limiting participation in the lowest margin sectors.

Taiwan's macro economic environment remains challenging with interest rates currently at record lows leading to negative spread issues affecting the whole industry, particularly on tranches of business sold prior to 2002. Prudential remains confident that any potential deficits are more than adequately supported by the profitable new business, particularly unit-linked, that it has now been writing for a number of years. Prudential remains firmly focused on long-term profitability and continues to sell a

Edgar Filing: PRUDENTIAL PLC - Form 20-F

higher proportion of unit linked business than the market. In 2006 Prudential's unit linked sales were 73 per cent of total sales premium, compared to 48 per cent for the market.

A new business processing hub was launched in Kuala Lumpur, Malaysia in early 2005 under the name Prudential Services Asia. This processes business for the Malaysian and Singaporean life operations.

During 2006, significant progress continues to be made with embedding a risk management and compliance framework. Prudential employs "three lines of defense"; the operational management in each business, strong risk management related functions and an independent internal audit function.

Prudential Corporation Asia's high proportion of profitable, regular premium business combined with sound operational management means cash flows can be predicted with some certainty. As previously announced the business had net positive remittances of surplus cash back to the Group in 2006 in line with the projection made in 2003.

In summary, Prudential has an excellent track record of building a profitable business in Asia and the scale of the opportunity for continued growth is clear.

Development of Prudential's Asian Business

Prudential's Asian operations are managed by its Hong Kong-based regional head office. Prudential's operations in Asia date from 1923, when it opened a branch office in India, which served the Indian sub-continent and several Middle Eastern countries with historic ties to the United Kingdom. In 1924, Prudential opened a branch office in Malaysia. Prudential expanded into Singapore in 1931 and opened a branch office in Hong Kong in 1964 first selling general insurance products followed by life insurance a few years later. In 1956, Prudential's Indian operations were nationalized and, in 1984, the Malaysian government required Prudential to sell a majority interest in its Malaysian operations to a local company. A majority share of the Malaysian operations was then reacquired in 1998. A group strategy review in the early 1990s identified significant opportunities for Prudential in the Asian life sector and Prudential Corporation Asia was established in 1994 to develop a material and profitable Asian business.

During 1995 and 1996, Prudential Corporation Asia entered Thailand and Indonesia through acquisitions and launched a new operation in the Philippines. These were followed by re-entry into India with a joint venture mutual fund operation in 1998 (currently 49 per cent ownership), the acquisition of a Taiwanese life insurance operation and the launch of a new life insurance operation in Vietnam in 1999. In 2000, Prudential acquired a mutual fund business in Taiwan, launched new life insurance operations in China (50 per cent ownership) and India (26 per cent ownership) and established a joint venture in Hong Kong for the Mandatory Provident Fund ("MPF") and mutual funds (36 per cent ownership).

Prudential Corporation Asia continued its geographic expansion in 2001 with acquisitions of small, life companies in Japan and South Korea. Also in 2001, Prudential Corporation Asia acquired Allstate's small operations in Indonesia and the Philippines. In June 2002, Prudential Corporation Asia acquired ING's small life operation in the Philippines and in October 2002 acquired Good Morning ITMC, a mid-sized South Korean mutual fund operation.

The Japanese life market remains very challenging and in 2003, Prudential scaled back its operations to focus on higher value distribution channels and more profitable products. While the operation is now somewhat more efficient with lower expense levels and has made some progress with establishing new distribution channels, it will take some time to deliver material volumes and become a positive contributor to Prudential Corporation Asia's overall results. During 2005, the acquired goodwill of the Japanese life company was tested for impairment and a charge of £120 million has been separately disclosed in the consolidated income statement. The charge reflects the slower than expected development of the Japanese life business.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Prudential Corporation Asia has also launched mutual fund operations in Japan, Singapore, Malaysia, China (joint venture with CITIC 33 per cent ownership) and maintains its composite insurance licenses in Singapore and Malaysia though little general insurance business is currently written.

In India, Prudential's joint venture with ICICI continues to be a leading private sector player. In 2004, the Indian government announced its intention to allow increased foreign ownership in Indian companies, and Prudential remains interested in increasing its stake in the joint venture. However, the relevant legislation remains to be put before the Indian Parliament.

In 2006, the Chinese authorities granted CITIC Prudential licenses to sell financial services products in an additional eight cities in China. This brought the total number of such licenses on December 31, 2006 to eighteen. As of April 30, 2007, CITIC-Prudential had been granted a further two life insurance licenses. Prudential believes the main challenge facing foreign players trying to become established in China is the need to develop local management teams to support geographical expansion. Prudential believes that it has a real advantage in being able to leverage its existing Chinese speaking operations to help develop new teams quickly. In 2006, sales in China increased by 55 per cent over 2005.

Prudential and Bank Simpanan Nasional ("BSN") which was originally the Malaysian Post Office Bank and is now wholly owned by the Ministry of Finance, established a joint venture to leverage Prudential's existing network of over 7,000 agents and BSN's network of 391 branches.

In January 2006, the Malaysian authorities granted the joint venture a license to develop and market insurance products to Muslim Malays who make up more than 60 per cent of the population. This operation launched successfully in November 2006.

In 2006 Prudential also received fund management licenses for United Arab Emirates ("UAE") and a consumer finance license for Vietnam.

Prudential believes the key ingredients for the long-term Asian growth model are firmly in place: high population densities, high personal savings rates, improving education levels, increasingly entrepreneurial environment, rapid urbanization and deregulation.

Prudential Corporation Asia's strategic themes are to:

build scale in the markets with the potential to deliver profitability over long-term,

continue its core distribution strategy of building agency, with a strong emphasis on productivity and quality of sales,

continue to build complementary bank and direct distribution,

deliver good customer service,

continue to build a profitable and significant mutual fund business,

leverage opportunities to create value from synergies, and

operate high standards of governance, risk management and compliance throughout.

Distribution

Strengthening distribution continues to be a major priority. In 2006, agent numbers grew by 66 per cent to over 285,000 with geographic expansion in India and China being a key driver (up 165 per cent and 49 per cent respectively). In Indonesia the business has excellent momentum and has increased agent numbers by 49 per cent during the year. In the established markets (Singapore, Hong Kong and Malaysia) improving agency productivity is a key initiative and whilst this improved in 2006 there is still significant room for growth. Prudential believes that its multi-channel distribution model in Korea is a

valuable asset as, whilst volumes from direct campaigns such as a home shopping channel have waned and bank distribution has been limited by regulatory caps and labor union constraints, insurance sales growth for 2006 of 93 per cent reflects great success in increasing the number of tied financial advisors (up 49 per cent) and extending the number of general agents (brokers).

Currently 66 per cent of Prudential Corporation Asia's sales come from its tied agency distribution, and whilst this will remain the primary channel for some time, there is the potential to further expand alternate channels, particularly banks and direct marketing. Bancassurance with SCB in Hong Kong continues to be especially successful, and Prudential believes there is considerable potential for further development in bancassurance particularly in Singapore, Malaysia and Taiwan over the short- to medium-term.

Products

Prudential Corporation Asia offers a range of products including life insurance with some accident and health options, personal lines property and casualty insurance and also mutual funds. In January 2006, it also received approval to launch new takaful (Shariah compliant) products in Malaysia with joint venture partner BSN.

Life Insurance

The life insurance products offered by Prudential Corporation Asia include a range of with-profits and non-participating term, whole life, endowment and unit-linked policies. Prudential Corporation Asia also offers health, disability, critical illness and accident coverage to supplement its core life products.

Prudential Corporation Asia has a strong focus on capital-efficient product innovation and packages products to meet specific customer needs. In 1992, Prudential Corporation Asia was the first company to launch unit-linked products in Singapore and subsequently has leveraged this expertise with great success across the region. Only Thailand and Vietnam do not have unit linked products as these products are not yet permitted by their regulators.

Funds Management

In addition to the life insurance products described above, Prudential offers mutual fund investment products in India, Taiwan, Japan, Singapore, Malaysia, Hong Kong and Korea, allowing customers to participate in debt, equity and money market investments. The Company earns a fee based on assets under management. In 2006, Prudential also received a license to sell mutual funds in the UAE.

In Hong Kong, Prudential Corporation Asia has a successful joint venture with Bank of China International ("BOCI") for the Mandatory Provident Fund ("MPF") and also unit trusts. As from December 1, 2000, employees, employers and the self-employed in Hong Kong became obliged to make contributions to the MPF. The plans that comprise the MPF are defined contribution pension plans with immediate vesting, preservation until retirement (or some other event specified by legislation) and full portability. Individuals are required to make monthly mandatory contributions of 5 per cent of salary and employers make contributions equal to 5 per cent of the employee's salary to the individual's accounts in the Fund. Both employee and employer contributions are subject to a maximum amount, currently HK\$1,000 per month, the equivalent of £65 per month. Additional voluntary contributions are possible.

Prudential Asset Management ("PAM") (formerly PPM Asia) is Prudential Corporation Asia's fund management division responsible for managing Prudential Corporation Asia's life and third party institutional funds including the Prudential group's investments in the Asia-Pacific region. PAM has offices in Singapore, Hong Kong and Tokyo.

The Asian fund management business had £29.2 billion of funds under management as at December 31, 2006, of which £12.3 billion related to third party funds in operations in India, Taiwan,

Japan, Korea, Malaysia, Singapore and Hong Kong. Prudential Corporation Asia is a top five foreign provider of mutual funds in all countries in which it operates with the exception of Japan, where significant progress has been made in a very competitive mutual fund market. In 2006, the fund management business continued to expand geographically with the securing of fund management license in UAE. This takes the total number of countries in which the business has a presence to ten. The geographic expansion of the past few years has been matched by growth in market share, with Korea, Japan, India and Malaysia being notable successes.

Net inflows from third parties of £2.5 billion were driven by strong net inflows in India of £0.5 billion, Japan of £0.4 billion and Korea of £0.9 billion.

Total reported third party funds under management of £12.3 billion were up 21 per cent on 2005.

Products and Profitability

Life Insurance Products

Unit-linked products combine savings with protection and the cash value of the policy depends on the value of the underlying unitized funds. Participating products provide savings with protection where the basic sum assured can be enhanced by a profit share (or bonus) from the underlying fund as determined at the discretion of the insurer. Non-participating products offer savings with protection where the benefits are guaranteed or determined by a set of defined market related parameters. Accident and Health ("A&H") products provide mortality or morbidity benefits and include health, disability, critical illness and accident coverage. A&H products are commonly offered as supplements to main life insurance policies but can also be sold separately.

Life Product Profitability

The profits from participating policies are shared between the policyholder and insurer (typically in a 90:10 ratio) in the same way as with-profits business in the United Kingdom. Under unit-linked products the profits that arise from managing the policy, its investments and the insurance risk accrue entirely to shareholders, with investment gains accruing to the policyholder within the underlying unitized fund. The profits from non-participating products consist of any surplus remaining after paying the defined policy benefits. All the profits from A&H products accrue to shareholders.

Unit-linked products tend to have higher profit than traditional non-linked products as expenses and charges are better matched and solvency capital requirements are lower. At the end of 2006 Prudential Corporation Asia offered unit-linked products in 10 of the 12 countries in Asia in which it operates.

Mutual Fund Products

Prudential Corporation Asia's mutual fund range includes debt, equity, balanced and money market funds. Prudential Corporation Asia makes transaction charges (initial and surrender depending on the type of fund and the length of the investment) and also makes a service charge based on assets under management. The charges vary by country and fund with money market style funds generally having the lowest charges and equity funds the highest.

New Business Premiums

In 2006, total sales of insurance products were £1,921 million, up 29 per cent from 2005 (£1,484 million). Of this amount, regular premium insurance sales were up 31 per cent to £849 million and single premium insurance sales increased 28 per cent from £837 million in 2005 to £1,072 million.

The following table shows Prudential's Asian life insurance new business premiums by territory for the periods indicated. In this table "Other Countries" includes, Thailand, The Philippines and Vietnam.

	<u>2006</u>	<u>2005</u>
	£m

Other countries	51	42
	<u> </u>	<u> </u>
Total	1,921	1,485
	<u> </u>	<u> </u>

In addition, for the year ended December 31, 2006, Prudential Corporation Asia's mutual funds had third party funds under management of £12.3 billion, up from £10.1 billion in 2005, following net sales of £2.5 billion during the year, up 91 per cent from 2005. The £12.3 billion of funds under management at the end of 2006 primarily comprised of, Korea £3.6 billion, Japan £2.8 billion, India £2.0 billion and Taiwan £1.4 billion.

Investments

General

The overall financial strength of the Prudential group and the results, both current and future, of the insurance business are in part dependent upon the quality and performance of the various investment portfolios in the United Kingdom, the United States and Asia.

Prudential's Total Investments

The following table shows Prudential's insurance and non-insurance investments at December 31, 2006. In addition, at December 31, 2006 Prudential had £50.1 billion of external mutual funds under management. Assets held to cover linked liabilities relate to unit-linked and variable annuity products. In this table, investments are valued as set out in Note A4 of the notes to Prudential's consolidated financial statements.

Prudential's Insurance Investment Strategy and Objectives

Prudential's insurance investments support a range of businesses operating in many geographic areas. Each of the operations formulates a strategy, based on the nature of its underlying liabilities, its level of capital and its local regulatory requirements. Where the nature of underlying liabilities, level of capital and local regulatory requirements permit, Prudential tends to invest its assets predominantly in equities and real estate that have, over longer periods, provided superior returns to fixed interest assets.

Internal funds under management

Prudential manages 87 per cent of its group funds principally through its fund management businesses, M&G in the United Kingdom, together with PPM America in the United States and Prudential Asset Management (formerly PPM Asia) in Singapore, Hong Kong and Japan. Approximately 3 per cent of the group's funds relate to assets held by the banking operations and the remaining 10 per cent mainly relate to assets held to back unit linked, unit trust and variable annuity liabilities.

In each of the operations, local management analyzes the liabilities and determines asset allocation, benchmarks and permitted deviations from these benchmarks appropriate for its operation. These benchmarks and permitted deviations are agreed with internal fund managers, who are responsible for implementing the specific investment strategy through their local fund management operations.

Investments Relating to UK Insurance Business

Strategy

In the United Kingdom, Prudential tailors its investment strategy for long-term business, other than unit-linked business, to match the type of product a portfolio supports. The primary distinction is between with-profits portfolios and non-participating portfolios, which include the majority of annuity portfolios. Generally, the objective is to maximize returns while maintaining investment quality and asset security and adhering to the appropriate government regulations.

With-profits contracts are long-term contracts with minimal guaranteed amounts, the nature of which permits Prudential to invest primarily in equities and real estate. Accordingly, the with-profits fund investment strategy emphasizes a well-diversified equity portfolio (containing some international equities), real estate (predominantly in the United Kingdom), UK and international fixed income securities and cash.

For Prudential's UK pension annuities business and other non-participating business the objective is to maximize profits while ensuring stability by closely matching the cash flows of assets and liabilities. To achieve this matching, the strategy is to invest in fixed income securities of appropriate maturity dates.

For Prudential's unit-linked business, the primary objective is to maximize investment returns subject to following an investment policy consistent with the representations Prudential has made to its unit-linked product policyholders.

Investments

The following table shows the investments relating to Prudential's UK insurance business, other than its unit-linked business, at December 31, 2006. The "Other" column includes investments relating to solvency capital of unit-linked funds and investments relating to non-life long-term business.

At December 31, 2006

60

Equity Securities

Prudential's UK insurance operations, excluding unit-linked business, had £48,809 million invested in equities at December 31, 2006. Most of these equities support Prudential Assurance's with-profits fund and the SAIF fund, both of which are managed using the same general investment strategy. The following table shows the geographic spread of this equity portfolio by market value in accordance with the policies described in Note A4 of the notes to the consolidated financial statements.

At December 31, 2006		
	Market Value	%
(In £ Millions, Except Percentages)		
United Kingdom	33,026	67.7
United States	2,475	5.1

Japan	1,564	3.2
Pacific (excluding Japan)	3,249	6.6
Other	2,716	5.6
Total	48,809	100.0

The UK equity holdings are well diversified and broadly mirror the FTSE All-Share share index. Prudential holds equities in 523 UK companies. At December 31, 2006, the ten largest holdings in UK equities amounted to £13,769 million, accounting for 41.7 per cent of the total UK equity holdings of £33,026 million supporting the UK insurance operations. The following table shows the market value of the ten largest holdings in UK equities at December 31, 2006.

At December 31, 2006		
	Market Value	%
(In £ Millions, Except Percentages)

Life Insurance	986	3.0
Total	22,780	69.0

Debt Securities

At December 31, 2006, 91.7 per cent of Prudential's debt securities supporting the UK insurance operations were issued by corporations and overseas governments other than the US, 7.3 per cent were issued or guaranteed by the UK government and 1.0 per cent were issued or guaranteed by the US government. These guarantees relate only to payment and, accordingly, do not provide protection against fluctuations in market price that may occur during the term of the fixed income securities.

The following table shows the market value of the debt securities portfolio by maturity at December 31, 2006, in accordance with the policies described in Note A4 of the notes to the consolidated financial statements.

At December 31, 2006		
	Market Value	%
(In £ Millions, Except Percentages)

	12,196	100.0

Approximately 45.1 per cent of the UK held real estate investment is located in London and Southeast England (Buckinghamshire, Berkshire, East and West Sussex, Hampshire, Isle of Wight, Kent, Oxfordshire and Surrey) with 47.9 per cent located throughout the rest of the United Kingdom and the remaining 7.0 per cent located overseas.

Investments Relating to Prudential's US Insurance Business

Strategy

The investment strategy of the US Operations, for business other than the variable annuity business, is to maintain a diversified and largely investment grade debt securities portfolio that maintains a desired

investment spread between the yield on the portfolio assets and the rate credited on policyholder liabilities. Interest rate scenario testing is continually used to monitor the effect of changes in interest yields on cash flows, the present value of future profits and interest rate spreads.

The investment portfolio of the US Operations consists primarily of debt securities, although the portfolio also contains investments in mortgage loans, policy loans, common and preferred stocks, derivative instruments, cash and short-term investments and miscellaneous other investments.

Investments

The following table summarizes the total insurance investments of the US Operations, excluding the separate account investments supporting the variable annuity business, at December 31, 2006.

	December 31, 2006	
	(In £ Millions)	% of Total

Under IFRS, debt securities are shown at fair value and loans are at amortized cost. Equity securities and investment properties are shown at fair value. The fair value of unlisted securities is estimated by Jackson National Life using independent pricing services or analytically determined values.

Debt Securities

Corporate Securities and Commercial Loans

At December 31, 2006, the US Operations had £14,027 million of corporate securities and commercial loans, representing 56.5 per cent of US insurance total investments. Of the £14,027 million, £11,569 million consisted of debt securities that are publicly traded or trade under Rule 144A of the Securities Act of 1933, as amended ("Rule 144A") and £2,458 million consisted of investments in non-Rule 144A privately placed fixed income securities.

For statutory reporting in the United States, debt securities are classified into six quality categories specified by the Securities Valuation Office of the National Association of Insurance Commissioners ("NAIC"). The categories range from Class 1 (the highest) to Class 6 (the lowest). Performing securities are designated Classes 1-5. Securities in or near default are designated Class 6. Securities designated as Class 3, 4, 5 and 6 are non-investment grade securities. Generally, securities rated AAA to A by nationally recognized statistical ratings organizations are Class 1, BBB in Class 2, BB in Class 3 and B and below in Classes 4 through 6. If a designation is not currently available from the NAIC, Jackson National Life's investment advisor, PPM America, provided the designation for the purposes of the disclosure contained herein.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table shows the credit quality of the portfolio of publicly traded and Rule 144A fixed income securities at December 31, 2006.

Residential Mortgage-Backed Securities

At December 31, 2006, the US insurance operations had £2,827 million of residential mortgage-backed securities, representing 11.4 per cent of US insurance total investments. Although this percentage is higher than the average US insurance company, Jackson believes these securities provide additional yield and liquidity. At December 31, 2006, 61.9 per cent of the US insurance Operations' residential mortgage-backed securities were rated AAA or the equivalent by a nationally recognized statistical ratings organization (these include Standard & Poor's, Moody's and Fitch) and approximately 100 per cent were rated NAIC 1.

The primary investment risk associated with residential mortgage-backed securities is that a change in the interest rate environment could cause payment of the underlying obligations to be made more slowly or more quickly than was anticipated at the time of their purchase. If interest rates decline, then this risk is called "pre-payment risk" and the underlying obligations will generally be repaid more quickly when the yields on reinvestment alternatives are lower. Alternatively, if interest rates rise, the risk is called "extension risk" and the underlying obligations will generally be repaid more slowly when reinvestment alternatives offer higher returns. Residential mortgage-backed securities offer additional yield to compensate for these risks. The US Operations can manage pre-payment risk, in part, by reducing crediting rates on its products.

Commercial Mortgage-Backed Securities

At December 31, 2006, the US Operations had £1,155 million of commercial mortgage-backed securities, representing 4.7 per cent of US insurance total investments. 94.4 per cent of this total was rated by a nationally recognized statistical ratings organization (these include Standard & Poor's, Moody's and Fitch) and 93.2 per cent was rated investment grade. Due to the structures of the underlying commercial mortgages, these securities do not present the same pre-payment or extension risk as residential mortgage-backed securities.

Other Debt Securities

At December 31, 2006, the US Operations had £2,137 million of other debt securities, representing 8.6 per cent of US insurance total investments.

Loans

Loans totaled £3,254 million, representing 13.1 per cent of US insurance total investments at December 31, 2006. Of the total, £2,836 million related to commercial mortgage loans and £418 million to policy loans.

Commercial Mortgage Loans

Commercial mortgage loans represented 11.3 per cent of US insurance total investments at December 31, 2006. This total included 524 first mortgage loans with an average loan balance of approximately £5.2 million, collateralized by properties located in the United States and Canada. More than 90.0 per cent of the US operations' commercial mortgage loan investments have been directly originated in the last eight years.

Jackson National Life has addressed the risk of these investments by building a portfolio that is diverse both in geographic distribution and property type, emphasizing four main institutional property types: multi-family residential, retail, suburban office and warehouse/distribution facilities.

As of December 31, 2006, approximately 29.4 per cent of the portfolio was industrial 20.4 per cent multi-family residential, 21.0 per cent suburban office, 19.5 per cent retail, 8.1 per cent hotel and 1.6 per cent other. Approximately 12.6 per cent of the portfolio is collateralized by properties in California, 9.3 per cent by properties in Texas and 8.7 per cent by properties in Arizona. No other state represents more than 6.2 per cent.

Commercial mortgages generally involve more credit risk than residential mortgages due to several factors, including larger loan size, general and local economic conditions, local real estate conditions and the credit quality of the underlying tenants for the properties. Jackson's investment policy and strict underwriting standards are designed to reduce these risks while maintaining attractive yields. In contrast to residential mortgage loans, commercial mortgage loans have minimal or no pre-payment and extension risk.

Policy Loans

Policy loans represented 1.7 per cent of US insurance total investments at December 31, 2006. Policy loans are fully secured by individual life insurance policies or annuity policies and are contractual arrangements made under the policy.

Equity Securities

Equity securities supporting US insurance operations, excluding separate account investments, totaled £343 million at December 31, 2006.

Other

Other financial investments of £570 million, representing 2.3 per cent of US insurance total investments at December 31, 2006, were made up of £269 million of limited partnership interests, derivative assets of £254 million and £47 million of other miscellaneous investments.

The largest investment in the limited partnerships category is a £103.3 million interest in the PPM America Private Equity Fund. The remainder of this category consists of diversified investments in 167 other partnerships managed by independent money managers that generally invest in various equity and fixed income loans and securities.

Investments Relating to Asian Insurance Business

Prudential's Asian operations' investments, other than investments in respect of unit-linked business, largely support the business of its Singapore, Hong Kong, Malaysia, Japan and Taiwan operations.

The following table shows Prudential Corporation Asia's investments, other than investments from unit-linked business, at December 31, 2006. In this table, investments are valued in accordance with the policies described in Note A4 of the notes to the consolidated financial statements.

	At December 31, 2006	
	Market Value	% of Total
	(In £ Millions, Except Percentages)	
Investment Properties	41	0.4
Financial investments:		
Loans and receivables	904	10.0
Equity securities	3,285	36.3
Debt securities	4,490	49.5
Other investments	0	0.0
Deposits	342	3.8
Total financial investments	9,021	99.6
Total investments	9,062	100.0

Prudential manages interest rate risk in Asia by matching liabilities with fixed interest assets of the same duration to the extent possible. Asian fixed interest markets however generally have a relatively short bond issue term, which makes complete matching challenging. A large proportion of the Hong Kong liabilities are denominated in US dollars and Prudential holds US fixed interest securities to back these liabilities.

Debt Securities

The following table shows consolidated investment categorization of the debt security investments of Prudential Corporation Asia's long-term insurance fund, other than investments from unit-linked business, at December 31, 2006.

	At December 31, 2006	
	Market Value	% of Total
	(In £ Millions, Except Percentages)	
Debt securities:

Description of Property Corporate Property

As at December 31, 2006, Prudential's UK based businesses occupied approximately 29 properties in the United Kingdom, Europe and Mumbai. These properties are primarily offices with some ancillary storage or warehouse facilities. Prudential's headquarters are located in London. Of the remainder, the most significant are offices in London, Reading, Chelmsford, Dudley and Derby in England, Stirling in Scotland and Mumbai in India. The property in Stirling and one in Derby are held on a freehold basis. The property in Stirling is leased by the business from Prudential Assurance's long-term fund. The rest of the properties occupied by Prudential UK based businesses, both in the United Kingdom and in Mumbai, are held on long-term leaseholds. The leasehold properties range in size from 200 to 270,000 square feet. Overall, the occupied property portfolio totals approximately 1,300,000 square feet.

In addition to these properties, the Prudential group owns the freehold of a sports facility in Reading for the benefit of staff.

The Prudential group also holds approximately 50 other leasehold properties in the United Kingdom. This surplus accommodation is spread geographically across the United Kingdom and totals approximately 450,000 square feet.

In the United States, Prudential owns Jackson National Life's executive and principal administrative office located in Michigan. Prudential also leases premises in Michigan, Colorado, California, Illinois, New York, New Jersey, Georgia, Florida, Wisconsin, Texas, Massachusetts, Connecticut, New Hampshire, Pennsylvania, Virginia, Indiana and North Dakota for certain of its operations. Prudential holds 33 operating leases with respect to office space, throughout the United States. In the United States, Prudential owns and leases a total of approximately 834,757 square feet of property.

In Asia, Prudential owns or leases properties principally in Hong Kong, Singapore, Malaysia, Indonesia, Thailand, Philippines, China, Taiwan, Japan, Vietnam, India and Korea. Within these countries, Prudential holds 39 offices on a freehold basis, 21 offices on a leasehold basis and 1,162 operating leases in respect of office space, totaling approximately 5,900,000 square feet of property. In addition, Prudential is planning to lease approximately 816,000 square feet of additional property in 2007 to support expansion plans throughout the region.

Prudential believes that its facilities are adequate for its present needs in all material respects.

Competition

General

There are significant other participants in each of the financial service markets in which Prudential operates. Its competitors include both mutual and stock financial companies. In addition, regulatory and other developments in many of Prudential's markets have obscured traditional financial service industry lines and opened the market to new competitors and increased competition. Some new entrants are taking advantage of the low barriers to entry afforded by internet distribution, especially in the area of retail banking. In some of Prudential's markets, other companies may have greater financial resources, allowing them to benefit from economies of scale, and may have stronger brands than Prudential does in that market.

The principal competitive factors affecting the sale of Prudential's products in its chosen markets are:

price and yields offered,

financial strength and ratings,

commission levels, charges and other expenses,

range of product lines and product quality,

brand strength, including reputation and quality of service,

distribution channels,

investment management performance, and

historical bonus levels.

An important competitive factor is the ratings Prudential receives in some of its target markets, most notably in the United States, from recognized rating organizations. The intermediaries with whom Prudential works, including financial advisors, tied agents, brokers, wholesalers and financial institutions consider ratings as one factor in determining from which provider to purchase financial products.

Prudential Assurance's long-term fund is currently rated AA+ (stable outlook) by Standard & Poor's, Aa1 (negative outlook) by Moody's and AA+ (stable outlook) by Fitch Ratings. The ratings from Standard & Poor's, Moody's and Fitch Ratings represent the second highest ratings of their respective rating categories.

Jackson is currently rated AA (stable outlook) by Standard & Poor's, AA (stable outlook) by Fitch Ratings and A1 (stable outlook) by Moody's. The ratings from Standard & Poor's and Fitch Ratings represent the third highest rating category respectively and the ratings from Moody's represent the fifth highest rating category. Prior to June 23, 2006, Standard & Poor's rated Jackson National Life as AA (negative outlook).

Prudential offers different products in its different markets of the United Kingdom, the United States and Asia and, accordingly, faces different competitors and different types of competition in these markets. In all of the markets in which Prudential operates its products are not unique and, accordingly, it faces competition from market participants who manufacture a varying range of similar and identical products.

United Kingdom

Prudential's principal competitors include many of the major stock and mutual retail financial services and fund management companies operating in the United Kingdom. These companies include Aviva, Legal & General, Standard Life, Friends Provident, Lloyds TSB, HBOS, Aegon, AXA, Zurich Financial Services, Fidelity, Invesco, Jupiter, Threadneedle and Schroders. Prudential competes with other providers of

financial products to be included on financial advisors panels of preferred providers.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

In the United Kingdom, the level of bonuses on Prudential's with-profits products is an important competitive measure for attracting new business through financial advisors. The ability to declare competitive bonuses depends, in part, on a company's financial strength, which enables it to adopt an investment approach with a higher weighting in equities and real estate and allows it to smooth the fluctuations in investment performance upon which bonuses are based. Bonus rates on Prudential's with-profits policies are broadly in line with those of its major competitors.

UK retail banking continues to be dominated by HBOS, RBS, Barclays, Lloyds TSB, HSBC and Abbey. In recent years, these big players have increasingly focused on unsecured lending products which traditionally have offered high returns on capital. Margins, whilst still healthy, continue to be squeezed by regulatory pressure on default fees and creditor insurance. 2006 saw rising bad debt charges across the industry.

M&G's principal competitors are the main fund management companies operating in the United Kingdom and Europe. These companies include Fidelity, Invesco Perpetual, Jupiter, Threadneedle, New Star, Artemis, Schroders, Morley, Legal and General, F&C and AXA.

United States

Jackson's competitors in the United States include major stock and mutual insurance companies, mutual fund organizations, banks and other financial services companies. National banks, in particular, may become more significant competitors in the future for insurers who sell annuities, as a result of recent legislation, court decisions and regulatory actions. Jackson's principal life insurance company competitors in the United States include AXA Financial Inc., Hartford Life Inc., Lincoln National, AIG, ING, MetLife, Prudential Financial and TIAA-CREF.

Jackson does not have a significant career agency sales force to distribute its annuity products in the United States and, consequently, competes for distributors such as banks, broker-dealers and independent agents.

Asia

Competition in the Asian markets in which Prudential operates is mainly focused on distribution, with particular emphasis on the size and competency of the agency sales force. Within Asia, Prudential is second to AIG in terms of penetration and overall life market share across the region. Other main regional competitors are Allianz, ING and Manulife. While there are large local participants in individual markets, for example, Great Eastern Life in Singapore and Malaysia, Nippon Life in Japan, Cathay Life in Taiwan, and LIC in India, none of these has pan-regional businesses. Regional players are typically of North American or European origin.

In addition, Prudential competes with the above as well as smaller competitors for talented and skilled employees with local experience, which are in particular demand in Asia. See Item 3 "Key Information-Risk Factors".

In the regional mutual fund market in terms of market presence and position, Prudential ranks alongside leading international participants such as Templeton and Fidelity.

Intellectual Property

Prudential does not operate in the United States under the Prudential name and there have been long-standing arrangements between it and Prudential Financial, Inc. and its subsidiary, the Prudential Insurance Company of America, relating to their respective uses of the Prudential name. Prudential and Prudential Financial, Inc. entered into a new trade mark co-existence agreement in 2004, under which it was agreed that Prudential Financial Inc would have the right to use the Prudential name in the Americas and certain parts of the Caribbean, Japan, Korea and Taiwan and Prudential would have the

right to use the name everywhere else in the world although third parties have rights to the name in certain countries.

Legal Proceedings

Prudential Group

Prudential and its subsidiaries are involved in litigation arising in the normal course of business. While an adverse ruling in any individual case may not in itself be material to Prudential, if applied across all similar cases, the potential liabilities may be more significant. Although the outcome of such matters cannot be predicted with certainty, management believes that the ultimate outcome of such litigation will not have a material adverse effect on the group's financial condition, results of operations or cash flows.

Jackson

Jackson is involved as a defendant in class action litigation substantially similar to class action litigation pending against many life insurance companies that allege misconduct in the sale and administration of insurance products, and class action litigation that alleges violation of law forbidding unsolicited mass facsimile transmission. Jackson with respect to pending litigation generally accrues a liability for legal contingencies once management determines that the contingency is probable and estimable. Accordingly, Jackson on December 31, 2006 had recorded an accrual of \$11.0 million for class action litigation. Management, based on developments to date, believes that the ultimate disposition of the litigation likely will not have a material impact on Jackson's financial condition or results of operations.

Sources

Throughout this annual report, Prudential describes the position and ranking of its overall business and individual business units in various industry and geographic markets. The sources for such descriptions come from a variety of conventional sources generally accepted as relevant business indicators by members of the financial services industry. These sources include information available from the Association of British Insurers, the UK Department of Trade and Industry, Association of Unit Trusts and Investment Funds, Investment Management Association, Nielsen Net Ratings, Moody's, Standard & Poor's, Fitch, UBS, Life Insurance Marketing and Research Association, the Variable Annuity Research Data Service, referred to as VARDS, LIMRA International, Townsend and Schupp, The Advantage Group, the Life Insurance Association of Singapore, the Hong Kong Federation of Insurers, Life Insurance Association of Malaysia, Life Insurance Association of Taiwan and the Taiwanese Securities Investment Trust Consulting Association.

SUPERVISION AND REGULATION OF PRUDENTIAL

Prudential's principal insurance, investment and banking operations are in the United Kingdom, the United States and Asia. Accordingly, it is subject to applicable United Kingdom, United States and Asian insurance, banking and other financial services regulation which is discussed below.

UK Supervision and Regulation

The Financial Services and Markets Act 2000

Prudential's insurance and investment businesses in the United Kingdom are regulated by the FSA, the statutory regulator granted powers under the Financial Services and Markets Act 2000 (the "2000 Act"). In addition, those businesses are subject to various United Kingdom laws (for example, the Data

Protection Act 1998 in relation to the processing of customer data) some of which require the relevant Prudential entity to be licensed or registered.

Egg, Prudential's UK banking business, which was sold to Citi effective May 1, 2007, was also subject to regulation by the FSA under the 2000 Act, by the Office of Fair Trading under the Consumer Credit Act 1974 and was also subject to various UK laws which imposed additional licensing and registration requirements.

Risk-Based Regulation

The FSA employs a risk-based regulatory approach to supervision under the 2000 Act pursuant to which each regulated firm's risk is assessed using a risk assessment methodology known as ARROW. This is a high-level review aimed at assessing the significance of a particular risk posing a threat to the FSA's statutory objectives under the 2000 Act. These objectives relate to market confidence, public awareness, consumer protection and the reduction of financial crime.

The ARROW framework is the core of the FSA's risk-based approach to regulation. Using the process, the FSA will consider the particular risk a firm might pose to the statutory objectives by assessing the impact and probability of a particular risk materializing.

Overview of 2000 Act Regulatory Regime

Single Regulator

The FSA is the single regulator for all authorized persons with respect to regulated activities in the financial services sector. In this regard, the FSA is authorized to make rules and issue guidance in relation to a wide sphere of activity encompassing the governance of the conduct of business by, and the prudential supervision of, authorized persons.

Permission to carry on "Regulated Activities"

Under the 2000 Act, no person may carry on or purport to carry on a regulated activity by way of business in the United Kingdom unless he is an authorized person or is an exempt person. A firm which is granted permission by the FSA to carry on regulated activities becomes an authorized person for the purposes of the 2000 Act. "Regulated activities" are prescribed in the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 and include banking, insurance and investment business, as well as certain other activities such as establishing, operating and winding up stakeholder pension schemes, the mediation of general insurance and certain mortgage mediation and lending activities.

Authorization Procedure

When considering an application for authorization by a firm, the FSA may delineate the scope of, and include such restrictions on, the grant of permission as it deems appropriate. In granting or varying the terms of a firm's permissions, the FSA must ensure that the firm meets certain threshold conditions, which, among other things, require the firm to have adequate resources for the carrying on of its business, and to be a fit and proper person, having regard to all the circumstances.

Once authorized, and in addition to continuing to meet the threshold conditions to authorization, firms are obliged to comply with the FSA Principles for Businesses, which are high level principles for conducting financial services business in the United Kingdom. These include the maintenance of adequate systems and controls, treating customers fairly and communicating with customers in a manner that is clear, fair and not misleading.

Moreover, the 2000 Act obliges firms to secure the FSA's prior approval of the appointment of individuals performing certain important functions within a firm or on its behalf with respect to the carrying on of regulated activities (approved persons).

Principles for Businesses

A key feature of the FSA regime is the existence of 11 "Principles for Businesses", by which all firms are expected to abide. These cover key areas such as firms' relationship with the FSA and the need to act with integrity as well as to treat customers fairly.

The FSA has expressed the intention to move away from a detailed rules-based regime in favor of principle-based regulation, much of which would rely on the Principles for Businesses mentioned above. While firms may welcome this, they are also likely to face greater uncertainty as what would be deemed to be "compliant" under such a regime and this is a concern in the industry.

Application of 2000 Act Regulatory Regime to Prudential

Each of Prudential's principal UK insurance and investment businesses is subject to regulation and supervision by the FSA in the carrying on of its regulated activities. The following discussion considers, in turn, the main features of the 2000 Act regime applicable to Prudential's insurance and investment businesses in the United Kingdom.

Regulation Applicable to Prudential's Insurance, Investment and Banking Businesses

Supervision of Management and Change of Control of Authorized Firms

The FSA closely supervises the management of authorized firms through the approved persons regime, under which any appointment of persons who hold positions of significant influence within an authorized firm must be pre-approved by the FSA.

The FSA also regulates the acquisition and increase of control over authorized firms. Under the 2000 Act, any person proposing to acquire control of or increase control over an authorized firm must first obtain the consent of the FSA. In considering whether to grant or withhold its approval to the acquisition of control, the FSA must be satisfied both that the acquirer is a fit and proper person and that the interests of consumers would not be threatened by his acquisition of or increase in control.

Control over a UK authorized firm ("A") is acquired if the acquirer holds 10 per cent or more of the shares in A or a parent undertaking of A ("P"); is able to exercise significant influence over the management of A or P by virtue of his shareholding in that company; is entitled to exercise, or control the exercise, of 10 per cent or more of the voting power of A or P; or is able to exercise significant influence over the management of A or P by virtue of his voting power in that company. Increases in "control", once they reach thresholds of 20 per cent, 33 per cent and 50 per cent of the shares or voting power of an authorized firm or one of its controllers, also require the consent of the FSA.

In order to determine whether a person or a group of persons is a "controller" for the purposes of the 2000 Act, the holdings (shares or voting rights) of the person and his "associates", if any, are aggregated.

Intervention and Enforcement

The FSA has extensive powers to investigate and intervene in the affairs of an authorized firm. The 2000 Act imposes on the FSA statutory obligations to monitor compliance with the requirements imposed by, and to enforce the provisions of, the 2000 Act, related secondary legislation and the rules made thereunder.

The FSA's enforcement powers, which may be exercised against both authorized firms and approved persons, include public censure, imposition of unlimited fines and, in serious cases, the variation or revocation of permission to carry on regulated activities or of an approved person's approved status. In addition, the FSA may vary or revoke an authorized firm's permission if it is desirable to protect the interests of consumers or potential consumers, or if the firm has not engaged in regulated activity for 12 months, or if it is failing to meet the threshold conditions for authorization. The FSA has further powers to obtain injunctions against authorized persons and to impose or seek restitution orders where persons have suffered loss. Once the FSA has made a decision to take enforcement action against an authorized or approved person (other than in the case of an application to the court for an injunction or restitution order), the person affected may refer the matter to the Financial Services and Markets Tribunal. Breaches of certain FSA rules by an authorized firm may also give a private person who suffers loss as a result of the breach a right of action against the authorized firm for damages.

In addition to its ability to apply sanctions for market abuse, the FSA has the power to prosecute criminal offences arising under the 2000 Act and insider dealing under Part V of the Criminal Justice Act 1993 and breaches of money laundering regulations. The FSA's stated policy is to pursue criminal prosecution in all appropriate cases.

The FSA, although not a creditor, may seek administration orders under the Insolvency Act 1986 (as amended), present a petition for the winding-up of an authorized firm or have standing to be heard in the voluntary winding-up of an authorized firm. It should be noted that insurers carrying on long-term insurance business cannot voluntarily be wound up without the consent of the FSA.

FSA Conduct of Business Rules

The FSA's Conduct of Business Rules apply to every authorized firm carrying on regulated activities and regulate the day-to-day conduct of business standards to be observed by authorized persons in carrying on regulated activities.

The scope and range of obligations imposed on an authorized firm under the Conduct of Business Rules will vary according to the scope of its business and the range of its clients. Generally speaking, however, the obligations imposed on an authorized firm by the Conduct of Business Rules will include the need to classify its clients according to their level of sophistication, provide them with information about the firm, meet certain standards of product disclosure, ensure that promotional material which it produces is clear, fair and not misleading, assess suitability when advising on certain products, manage conflicts of interest, report appropriately to its clients and provide certain protections in relation to client assets.

Following the adoption by the EU of the Markets in Financial Instruments Directive, the FSA is in the process of consulting on the wholesale revision of its Conduct of Business Rules. This process will incorporate the requirements of that Directive in relation to investment business, but also reflect the FSA's move towards a simpler Conduct of Business regime and a more principles-based approach to regulation in relation to other areas.

Treating Customers Fairly

The FSA views its "Treating Customers Fairly" initiative ("TCF") as an important example of its principles-based approach to regulation in practice. This initiative is based upon the application of Principle 6 of the FSA's Principles for Businesses (that a firm must pay due regard to the interests of its customers and treat them fairly). The FSA has defined six objectives for this initiative. These are that:

Consumers can be confident that they are dealing with firms where the fair treatment of customers is central to the corporate culture;

Products and services marketed and sold in the retail market are designed to meet the needs of identified consumer groups and are targeted accordingly;

Consumers are provided with clear information and are kept appropriately informed before, during and after the point of sale;

Where consumers receive advice, the advice is suitable and takes account of their circumstances;

Consumers are provided with products that perform as firms have led them to expect, and the associated service is both of an acceptable standard and as they have been led to expect; and

Consumers do not face unreasonable post-sale barriers imposed by firms to change product, switch provider, submit a claim or make a complaint.

Although the FSA has, with the exception of rules relating to with-profits policyholders, refrained from making rules, it has published a number of case studies providing an indication of its expectations of authorized firms in the areas of product development, complaint handling, financial promotions and systems and controls.

The FSA began work with industry in the United Kingdom on TCF in 2004 and has encouraged firms to adopt a structured approach towards reviewing their business and introducing change through four "phases": awareness, strategy and planning, implementation and embedding. In July 2006, the FSA stated that it expected all firms to be at least implementing TCF in a substantial part of their business by the end of March 2007.

Prudential Supervision

As set out above, in order to maintain authorized status under the 2000 Act, a firm must continue to satisfy the threshold conditions, which, among other things, require the firm to have adequate resources for the carrying on of its business. The FSA has published detailed rules relating to the maintenance of minimum levels of regulatory capital for insurance, investment and banking businesses in the Prudential Standards section of its Handbook.

The FSA's regulatory capital rules for banks, insurers and investment firms are primarily contained in the FSA's General Prudential Sourcebook, Prudential Sourcebook for Banks, Building Societies and Investment Firms and Prudential Sourcebook for Insurers. Although it has been the intention in recent years of the FSA to move towards a unified prudential regime for firms which it authorizes, the FSA has been obliged to revise this approach and its rules to accommodate developments at an international level, including EU legislation relating to the regulatory capital requirements for banks, investment firms and financial groups.

The Financial Ombudsman Service

Authorized firms must have appropriate complaints handling procedures. However, once these procedures have been exhausted, qualifying complainants may turn to the Financial Ombudsman Service is intended to provide speedy, informal and cost effective dispute resolution of complaints made against authorized firms by individuals and small-business customers. The Ombudsman is empowered to order firms to pay fair compensation for loss and damage and may order a firm to take such steps as it determines to be just and appropriate to remedy a complaint.

The Financial Services Compensation Scheme ("FSCS")

The FSCS is intended to compensate individuals and small businesses for claims against an authorized firm where the authorized firm is unable or unlikely to be able to meet those claims (generally, when it is insolvent or has gone out of business). The scheme is divided into three sub-schemes of banking, insurance and investment business, reflecting the different kinds of business

undertaken by authorized firms. The scheme is funded by contributions from industry participants referable to the particular sub-schemes so as to minimize cross-subsidy between authorized persons whose businesses are not similar. Prudential estimates its reserve for future fund assessments for its UK business to be insignificant, and, believes the reserves in place are adequate for all payments for known insolvencies. In the event of a failure of a market participant, Prudential could be required to make contributions to compensate investors. The FSA has recently issued proposals relating to the funding of the FSCS, including for a new model of funding, under which the first tranche of compensation costs emerging from a particular group of firms is borne by that group alone, while costs above a specified threshold are shared out more widely.

Regulation of Insurance Business

Effecting and carrying out contracts of insurance as principal are regulated activities for the purposes of the 2000 Act, and the carrying on of such regulated activities is referred to as insurance business. Some of Prudential's subsidiaries, including The Prudential Assurance Company Limited, Prudential Annuities Limited, Prudential Retirement Income Limited, Prudential Pensions Limited, Prudential Holborn Life Limited and Prudential (AN) Limited carry on insurance business in the United Kingdom with the permission of the FSA and are supervised by the FSA under the 2000 Act.

Conduct of business requirements for insurance business

The Conduct of Business rules issued by the FSA apply differing requirements to the sale of general and long term insurance contracts. Authorized firms which advise and sell private customers packaged products such as life insurance policies are subject to detailed conduct of business obligations relating to product disclosure, assessment of suitability, the range and scope of the advice which the firm provides, and fee and remuneration arrangements.

Capital rules for insurers

The FSA's rules which govern the prudential regulation of insurers form part of the Prudential Sourcebook for Insurers, the General Prudential Sourcebook and the Interim Prudential Sourcebook for Insurers. Overall, the requirements of the General Prudential Sourcebook are intended to align the capital adequacy requirements for insurance businesses more closely with those of banking and investment firms and building societies, for example, by addressing tiers of capital, rather than looking at net admissible assets.

Under the rules in the Prudential Sourcebook for insurers, an insurance company is restricted from carrying on any commercial business other than insurance business and activities directly arising from that business. The FSA Interim Prudential Sourcebook for Insurers (the "Interim Prudential Sourcebook") continues to govern some matters such as reporting requirements.

The Prudential Sourcebook for insurers also contains rules on Individual Capital Assessments for life and non-life insurers. Under these rules and the rules of the General Prudential Sourcebook all insurers must assess for themselves the amount of capital needed to back their business. If the FSA views the result of this assessment as insufficient, it may draw up its own Individual Capital Guidance for a firm, which can be imposed as a requirement on the scope of the authorized firm's permission.

Long-term Assets and Liabilities

Long-term business assets and liabilities those assets and liabilities relating to, broadly, life and health insurance policies must be segregated from the assets and liabilities attributable to non-life insurance business or to shareholders. Separate accounting and other records must be maintained and a separate fund must be established to hold all receipts of long-term business.

The extent to which long-term fund assets may be used for purposes other than long-term business is restricted by the rules in the Prudential Sourcebook for insurers. Only the "established surplus" the excess of assets over liabilities in the long-term fund, as determined by an actuarial investigation may be transferred so as to be available for other purposes. Restrictions also apply to the payment of dividends by the insurance company, as described below. The rules in the Prudential Sourcebook for insurers require, in addition to the capital requirements referred to below, the maintenance of sufficient assets in the separate long-term insurance fund to cover the actuarially determined value of the insurance liabilities.

Capital Requirements

The FSA's rules require that insurance companies maintain assets sufficient to meet the relevant capital requirement at all times in respect of both any long-term insurance and general insurance undertaken by the insurance company, the calculation of which requirement in any particular case being dependent on the type and amount of insurance business a company writes. The method of calculation of the capital requirement is set out in the General Prudential Sourcebook and the level of an insurer's capital resources is also determined in accordance with the rules set out in that Sourcebook. Failure to maintain the required capital resources requirement is one of the grounds on which wide powers of intervention conferred upon the FSA may be exercised.

Under the rules in the General Prudential Sourcebook, an insurer must hold capital resources equal at least to the Minimum Capital Requirement (the "MCR"). Insurers with with-profits liabilities of more than £500 million must hold capital equal to the higher of MCR and the Enhanced Capital Requirement (the "ECR"). The ECR is intended to provide a more risk responsive and "realistic" measure of a with-profits insurer's capital requirements, whereas the MCR is broadly speaking equivalent to the previous required minimum margin under the Interim Prudential Sourcebook and satisfies the minimum EU standards.

Determination of the ECR involves the comparison of two separate measurements of the firm's financial resources requirements, which the FSA refers to as the "twin peaks" approach. The two separate peaks are:

- (i) the requirement comprised by the mathematical reserves plus the "Long Term Insurance Capital Requirement" (the "LTICR"), together known as the "regulatory peak"; and
- (ii) a calculation of the "realistic" present value of the insurer's expected future contractual liabilities together with projected "fair" discretionary bonuses to policyholders, plus a risk capital margin, together known as the "realistic peak".

The regulatory peak implements the Solvency I Directives, the latter forming part of the European Commission's efforts to achieve a single European market for financial services. The LTICR is made up of several components, but in general is equal to approximately 4 per cent of the mathematical reserves, although the formula varies according to the type of business written.

Actuarial functions

The rules in the FSA's Supervision Manual require that every insurance company that carries on long-term business must appoint one or more actuaries to perform the "actuarial function" in respect of all classes of its long-term insurance business and, if it has any with-profits business, the "with-profits actuary function" in respect of all classes of that with-profits business.

The actuary performing the "actuarial function" must prepare an annual report for the company's directors quantifying the company's long-term liabilities attributable to the insurance company's long-term insurance business, determining the value of any excess over those liabilities of the assets representing the long-term insurance fund and where any rights of long-term policyholders to participate

in profits relate to particular parts of such a fund, a valuation of any excess of assets over liabilities in respect of each of those parts.

The actuary performing the "with-profits actuary function" must advise the firm's management, at the level of seniority that is reasonably appropriate, on key aspects of the discretion to be exercised affecting those classes of the with-profits business of the firm in respect of which he has been appointed. He must also, at least once a year report to the firm's governing body on key aspects (including those aspects of the firm's application of its Principles and Practices of Financial Management on which the advice described has been given) of the discretion exercised in respect of the period covered by his report affecting those classes of with-profits business of the firm.

Distribution of Profits and With-profits Business

The Interim Prudential Sourcebook for Insurers provides that, once an allocation of surplus in a with-profits fund has been made to policyholders, no transfer of assets representing any part of a subsequent surplus can be made, to shareholders or otherwise, unless either the "relevant minimum" (as defined in the Interim Prudential Sourcebook) of the surplus has been allocated to policyholders or a statutory notification procedure has been followed. Calculation of the relevant minimum is based upon the percentage of the relevant surplus previously allocated to eligible policyholders.

There has been considerable public debate regarding the rights and legitimate expectations of with-profits policyholders to assets forming part of an insurance company's surplus, particularly where such assets do not derive from the payment of current policyholders' premiums but are rather "inherited" from previous generations of policyholders or from other entities.

The FSA has also mandated that firms carrying on with-profits business must:

define and make publicly available the Principles and Practices of Financial Management (the "PPFM") applied in their management of with-profits funds,

ensure their governance arrangements offer assurance that they have managed their funds in line with the PPFM they have established and published,

produce annual reports for with-profits policyholders on how they have complied with this obligation, including how they have addressed any competing or conflicting rights, interests or expectations of policyholders and, if applicable, shareholders,

comply with (i) modified regulatory reporting requirements designed to achieve the FSA's objective of making directors and senior management more explicitly responsible for setting up technical provisions and other decisions taken on actuarial advice and (ii) new audit requirements for liabilities, and

comply with consequential changes to certification in the insurance returns.

Since April 1, 2004, firms carrying on with-profits business have been required to produce PPFM and to make them publicly available. From the same date, firms have also been required to have in place the relevant governance arrangements and reporting procedures to with-profits policyholders.

Treating Customers Fairly and with-profits business

One of the areas of focus of the FSA's TCF initiative has been with-profit business. The FSA has issued specific rules on this area in relation to with-profits policyholders, which address, among other things, the costs charged to a with-profits fund by the firm managing the fund; penalties and charges levied on policyholders who surrender their policies early, the need for funds to be managed with the objective of ensuring that maturity payouts fall within a target range set for the fund; and the provision of information to with-profits policyholders or potential policyholders in a format that they can more readily understand through the introduction of "Consumer Friendly Principles and Practices of Financial Management" ("CFPPFs").

In addition, life insurers writing with-profits business must provide information to with-profits policyholders within 28 working days of a decision to close a fund to new business or of the appointment of a policyholder advocate to protect the interest of policyholders should a firm decide to make a reattribution of its inherited estate.

Reporting Requirements

Under the Interim Prudential Sourcebook, insurance companies must file with the FSA their audited annual accounts and balance sheets and life insurers annual reports from the actuary performing the actuarial function.

Transfer of Insurance Business

Before any transfer of insurance business may take place, the 2000 Act requires a scheme of transfer to be prepared and approved by the High Court.

Winding-Up Rules

The general insolvency laws applicable to UK companies are modified in certain respects in relation to insurance companies. Since the introduction of the Financial Services and Markets Act 2000 (Administration Orders Relating to Insurers) Order 2002 (the "2002 Order"), which came into force in May 2002, insurance companies in the United Kingdom have become subject to the administration procedures contained in Part II of the Insolvency Act 1986 (which previously did not apply). These administration procedures have, however, also been slightly modified by the 2002 Order in relation to, for example, the power of an administrator to make any payments due to a creditor.

Additionally, in the United Kingdom, all FSA authorized insurance companies, except for pure reinsurers, are subject to the Insurers (Reorganisation and Winding-up) Regulations 2004, which came into force in February 2004.

These Regulations provide, among other things, that direct insurance claims will have priority over the claims of other unsecured creditors (with the exception of preferred creditors), including reinsurance creditors, on a winding-up by the court or a creditors' voluntary winding up of the insurance company. Furthermore, instead of making a winding-up order when an insurance company has been proved unable to pay its debts, a UK court may, under Section 377 of the 2000 Act, reduce the amount of one or more of the insurance company's contracts on terms and subject to conditions (if any) which the court considers fit. Where an insurance company is in financial difficulties but not in liquidation, the Financial Services Compensation Scheme may take measures for securing the transfer of all or part of the business to another insurance company.

Section 376 of the 2000 Act provides further insolvency protection to policyholders of insurance companies effecting or carrying out contracts of long-term insurance. Unless the court orders otherwise, a liquidator must carry on the insurer's business so far as it consists of carrying out the insurer's contracts of long-term insurance with a view to it being transferred as a going concern to a person who may lawfully carry out those contracts. In carrying on the business, the liquidator may agree to the variation of any contracts of insurance in existence when the winding-up order is made, but must not effect any new contracts of insurance.

EU Directives on groups

The FSA has also issued rules on the prudential supervision of insurance groups, which implement the requirements of the EU's Insurance Groups Directive ("IGD"), on the supplementary supervision of insurance undertakings within a group (Directive 98/78/EC). The IGD required Member States to

introduce the following measures to strengthen supervision of insurance companies, which are part of a group:

an adjustment to the solo supervision solvency calculation in relation to participating interests in other insurance undertakings in order to eliminate "double-gearing" (the use of the same regulatory capital in more than one entity of a group),

an additional parent undertaking solvency margin calculation analogous to the adjusted solo solvency margin test referred to above, to be applied at the level of the parent undertaking,

the introduction of new solo-supervision requirements, including rules as to internal control within the insurance undertaking regarding the production of information relevant to supplementary supervision, the exchange of information within the group and the supervision of intra-group transactions, and

further provisions aimed at ensuring co-operation between competent regulatory authorities of member states.

Since December 31, 2006, the group capital resources requirement (the parent undertaking solvency calculation mentioned above) has been a "hard" test (i.e. it constitutes a requirement to maintain the group capital resources, rather than simply to make the calculation) under the rules in the Prudential Sourcebook for Insurers.

The FSA's rules also implement the requirements of the European Union's Financial Conglomerates Directive ("FCD", Directive 2002/87/EC), which affects groups with significant cross-sector activities in insurance and banking/investment services, and with which Prudential has been obliged to comply since January 1, 2005. Prior to this Prudential had been required to meet the solvency requirements of the IGD, as implemented by the FSA. The FSA has implemented the FCD by applying the sectoral rules of the largest sector, with the result that a group such as Prudential is classified as an insurance conglomerate and is required to focus on the capital adequacy requirements of the IGD, the Consolidated Life Directive and the Insurance Company Accounts Directive.

The FCD requires a continuous parent company solvency test which requires the aggregating of surplus capital held in the regulated subsidiaries, from which Group borrowings are deducted, other than those subordinated debt issues which qualify as capital. No credit for the benefit of diversification is allowed for under this approach. The test is passed when this aggregate number is positive, and a negative result at any point in time is a notifiable breach of UK regulatory requirements.

Due to the geographically diverse nature of Prudential's operations, the application of these requirements to Prudential is complex. In particular, for many of our Asian operations, the assets, liabilities and capital requirements have to be recalculated based on FSA regulations as if the companies were directly subject to FSA regulation.

The sale of Egg implies that Prudential may again become an 'insurance group' rather than its current treatment as a financial conglomerate and thus will be required to meet the requirements of the IGD. This should not have a significant impact on the Group, as the FSA's prudential requirements pertaining to insurance groups are very similar to those applying to insurance conglomerates, in particular because the FSA has decided to make the continuous parent solvency test mandatory from December 31, 2006 for all insurance groups.

New EU Solvency Framework

The European Commission is continuing to develop a new prudential framework for insurance companies, 'the Solvency II project' that will update the existing life, non-life, re-insurance and insurance groups directives. The main aim of this framework is to ensure the financial stability of the insurance industry and protect policyholders through establishing solvency requirements better matched to the

true risks of the business. Like Basel 2, the new approach is expected to be based on the concept of three pillars – minimum capital requirements, supervisory review of firms' assessments of risk and enhanced disclosure requirements. However, the scope is wider than Basel 2 and will cover valuations, the treatment of insurance groups, the definition of capital and the overall level of capital requirements.

A key aspect of Solvency II is the focus on risks and, for example, capital requirements will be calibrated to one year Value at Risk with a 99.5 per cent confidence level. Companies will be encouraged to improve their risk management processes and will be allowed to make use of internal economic capital models to enable a better understanding of risks. The emphasis on transparency and comparability would ensure a level playing field but delivering this remains one of the key risks for the project.

The Commission intends to adopt proposals for a framework directive in mid 2007 which will contain high-level principles. These principles will be supplemented by implementing measures that will be adopted by the Commission and EU member states. Solvency II is then intended to be implemented around 2010.

During 2006, the Committee of European Insurance and Occupational Pensions Supervisors ("CEIOPS") invited EU insurance industry to participate in the second quantitative impact study, which provided useful input for supervisors and industry alike. The EU insurance industry is participating in another quantitative impact study during the first half of 2007 with a view to provide quantitative input into the calibration of the capital requirements. Participation in these exercises involves a substantive commitment and is expected to yield benefits by providing evidence leading to a truly risk-based capital requirement.

Other EU Measures

On 16th November, 2005, the Council and the European Parliament adopted Directive 2005/68/EC on reinsurance (the "Reinsurance Directive"), which Member States will be obliged to transpose into national law by December 10, 2007. The Reinsurance Directive requires that all reinsurance undertakings be authorized in their home Member State. To obtain that authorization, they will need to meet strict requirements. Once they have done so, they will be free to carry out their activity anywhere in the EU through the single market passport. The FSA has implemented the requirements of the Reinsurance Directive through changes to the General Prudential Sourcebook for Insurers and the Prudential Sourcebook for Insurers.

Regulation of Investment Business

Certain of Prudential's subsidiaries are authorized by the FSA to carry on investment business. These entities are subject to regulation and supervision by the FSA and must comply with the FSA conduct of business and prudential rules made under the 2000 Act.

Conduct of business requirements for investment businesses and the Markets in Financial Instruments Directive ("MiFID")

MiFID, unlike its predecessor legislation, the Investment Services Directive, sets out detailed and specific requirements in relation to organizational and conduct of business matters for investment firms and regulated markets. In particular, MiFID and its implementing measures make specific provision in relation to, among other things, organizational requirements, outsourcing, customer classification, conflicts of interest, best execution, client order handling and suitability and appropriateness, and investment research and financial analysis, pre- and post trade transparency obligations, transaction reporting and substantial changes to the responsibility for the supervision of cross border investment services.

The scope of MiFID has required the FSA, as set out above, to engage in wholesale revision of its conduct of business requirements. The United Kingdom is required, as set out above, to ensure that the Rules which implement MiFID in the United Kingdom are in force by from November 1, 2007 and its revised form of conduct of business rules will come into force with effect from that date.

Capital requirements for investment businesses

The FSA's capital requirements for investment businesses are also contained in the Prudential Standards section of its Handbook, primarily in the General Prudential Sourcebook and the Prudential Sourcebook for Banks, Building Societies and Investment firms. These rules implement the requirements of European Union legislation relating to the prudential supervision of investment firms, including the Capital Adequacy Directive (Directive 93/6/EEC), as re-cast by the Capital Requirements Directive (Directive 2006/49/EC).

Regulation of Banking Business

The following section sets out the supervisory regime and framework to which Egg, Prudential's UK banking business, was subject in the United Kingdom prior to its sale to Citi effective May 1, 2007.

Supervision

The FSA has sole responsibility for banking supervision and regulation in the United Kingdom and has wide discretionary powers in relation to those banks it regulates. The FSA has wide investigatory and enforcement powers, including the power to require information and documents from banks, appoint investigators, apply to the court for injunctions in cases of breaches or likely breaches of rules, impose financial penalties, issue a public statement or censure and vary, cancel or withdraw authorization to carry on banking business.

In its role as supervisor of banks, the primary objective of the FSA is to fulfill its responsibilities under the 2000 Act regime relating to the safety and soundness of banks with the aim of strengthening, but not guaranteeing, the protection of depositors. As part of its supervision, the FSA requires the banks subject to its supervision to provide it with information that the FSA may reasonably require to perform its functions under the 2000 Act regime.

The FSA also takes a risk-based approach to the supervision of banks.

Solvency Requirements

The requirement to have adequate financial resources is one of the criteria for permission to accept deposits under the 2000 Act. A bank should have sufficient capital, including capital resources and liquidity resources, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due. In assessing a bank's capital adequacy, the FSA takes into account not only the level of a bank's own funds but also other matters such as concentration of the loan book (large exposures) and liquidity. The provisions of the Interim Prudential Sourcebook for Banks and the General Prudential Sourcebook require banks operating in the United Kingdom to maintain adequate liquidity, taking into account the nature and scale of their business so that they are able to conduct business in a prudent manner and meet their obligations as they fall due.

The FSA's rules and guidelines impose on banks a requirement that they maintain a minimum level of capital to support on and off-balance sheet exposures, weighted according to broad categories of risk. Each bank must maintain a minimum capital requirement based upon an assessment of its ratio of total capital to risk-weighted assets. This ratio is set by the FSA individually for each bank, but the ratio is in no case less than 8 per cent.

The liquidity standard for sterling, which the UK government introduced in January 1996, requires the maintenance of sufficient holdings of liquid assets to cover potential cash outflows over the next five business days. This policy applies to UK-incorporated retail banks and group UK-based sterling operations.

Regulatory capital framework

The FSA's capital adequacy rules and guidelines implement the requirements of the Banking Consolidation Directive and the Capital Adequacy Directive, as re-cast by the Capital Requirements Directive, which require credit institutions and investment firms to provide capital for counterparty risk and market risk. In turn, the requirements of these Directives reflected the terms of the Basel Capital Accord of 1988, which established a framework for measuring the capital adequacy of international banking organizations, and following their re-cast, of the Basel Revised Framework for International Convergence of Capital Measurement and Capital Standards of 2004 ("Basel II"), which replaced the 1988 Capital Accord.

Basel II consists of three "pillars": minimum capital, a supervisory review of an institution's capital adequacy and internal assessment process and market discipline to strengthen disclosure. With respect to the first pillar, the new capital framework expands and develops the standardized rules set out in the 1988 Accord and allows banks to compute their capital charges for credit risk on the basis of their own internal ratings, subject to rigorous quantitative and qualitative criteria.

The FSA has transposed the requirements of the re-cast Banking Consolidation Directive and the Capital Adequacy Directive into the rules and guidance in its General Prudential Sourcebook and Prudential Sourcebook for Banks, Building Societies and Investment firms. The majority of these rules came into force from January 1, 2007, although banks are permitted under transitional rules to remain on the current regime for some or all of 2007. During 2007 and 2008 the FSA will be undertaking the first supervisory reviews of banks' Internal Capital Adequacy Assessment Process ("ICAAP") that assesses the amount of internal capital considered adequate by banks to cover all of the risks to which they are exposed.

Prior to the sale of the business effective May 1, 2007, the FSA required Egg to maintain a certain minimum capital adequacy ratio of total capital to risk-weighted assets and to provide supervisory reports on capital adequacy and on large exposures. There was also a requirement to provide consolidated supervisory reports for capital adequacy and large exposures for the parent of the banking group. Prior to its sale, it was intended that Egg would apply the existing regulatory capital rules in parallel with the new requirements from January 1, 2007, and comply fully with the new requirements from January 1, 2008.

Regulation of mortgage lending, sales and administration and general insurance mediation

Mortgage lending, sales and administration as well as the mediation of long-term care insurance became regulated activities under the 2000 Act on October 31, 2004, and the sale and administration of general insurance became regulated activities on January 14, 2005, for which authorization by the FSA under the 2000 Act is consequently required.

The FSA has produced a specialist rulebook containing conduct of business rules and guidance which apply to the mediation of general insurance contracts, including specific rules on the promotion, advice, sale and cancellation of such contracts, as well as provisions on product disclosure and claims handling. Similarly, the FSA has produced a specialist rulebook containing rules and guidance governing the promotion, advice and sale of regulated mortgage contracts, as well as provisions on product disclosure, charges and arrears and repossessions.

The FSA has also produced the Prudential Sourcebook for Mortgage and Home Finance Firms and Insurance Intermediaries, which contains prudential rules for firms which are authorized under the 2000 Act to engage in insurance mediation activity and regulated mortgage mediation activity. However, the regulatory capital rules which it contains do not apply to a bank which is authorized by the FSA under the 2000 Act, which instead will continue to be subject to the relevant rules in the FSA's General Prudential Sourcebook and Prudential Sourcebook for Banks, Building Societies and Investment firms.

US Supervision and Regulation

General

Prudential conducts its US insurance activities through Jackson, a stock life insurance company licensed to transact its insurance business in, and subject to regulation and supervision by, the District of Columbia, the Cayman Islands and 49 of the 50 states; Jackson operates a subsidiary, Jackson National Life Insurance Company of New York, in the state of New York. The extent of such regulation varies, but most jurisdictions have laws and regulations governing the financial aspects of insurance companies, including standards of solvency, reserves, reinsurance and capital adequacy and the business conduct of insurance companies. In addition, statutes and regulations usually require the licensing of insurers and their agents and the approval of policy forms and related materials. These statutes and regulations in Jackson's state of domicile, which is Michigan, also regulate the investment activities of insurers.

Insurance regulatory authorities in the jurisdictions in which Jackson does business require it to file detailed quarterly and annual financial statements, and these authorities have the right to examine its operations and accounts. In addition, Jackson is generally subject to federal and state laws and regulations that affect the conduct of its business. New York and Michigan require their state insurance authorities to conduct an examination of an insurer under their jurisdiction at least once every five years. The New York insurance authorities began an examination of Jackson National Life of New York in 2006 for the exam period of January 1, 2003 through December 31, 2005. While the report is not finished, no material findings have been identified to-date. Michigan insurance authorities completed a routine examination of Jackson in 2006 for the period January 1, 2001 through December 31, 2004. The report included no material findings.

Jackson's ability to pay shareholder dividends is limited under Michigan insurance law. The Commissioner of the Michigan Office of Financial and Insurance Services (the "Michigan Insurance Commissioner") may limit, or not permit, the payment of shareholder dividends if the Michigan Insurance Commissioner determines that an insurer's surplus, as regards policyholders, is not reasonable in relation to its outstanding liabilities and is not adequate to meet its financial needs as required by Michigan insurance law. Jackson must report any shareholder dividends to the Michigan Insurance Commissioner before they can be paid. In the case of an extraordinary shareholder dividend or distribution, an insurer may not pay the dividend or distribution until 30 days after the Michigan Insurance Commissioner has received notice of the declaration and has not disapproved, or has approved, the payment within that period. For this purpose, an extraordinary dividend or distribution means any dividend or distribution of cash or other property where the fair market value, together with that of other dividends or distributions that an insurer made within the preceding twelve months, exceeds the greater of 10 per cent of the insurer's surplus, as regards policyholders as of December 31 of the immediately preceding year, or the net gain from operations of the insurer, not including realized capital gains, for the prior year. In 2004, 2005 and 2006, Jackson paid shareholder dividends of \$120.0 million, \$410.8 million, and \$209.1 million, respectively. The dividends paid included extraordinary dividends, approved by the Michigan Insurance Commissioner, of \$260.8 million in 2005 to fund the purchase of Life of Georgia.

State regulators also require prior notice or regulatory approval of changes in control of an insurer or its holding company and of certain material transactions with affiliates. Under New York and Michigan insurance laws and regulations, no person, corporation or other entity may acquire control of an insurance company or a controlling interest in any parent company of an insurance company, unless that person, corporation or entity has obtained the prior approval of the regulator for the acquisition. For the purpose of each of New York and Michigan law, any person acquiring, directly or indirectly, 10 per cent or more of the voting securities of an insurance company is presumed to have acquired "control" of the company. To obtain approval of any change in control, the proposed acquiror must file an application with the New York Superintendent of Insurance or the Michigan Insurance Commissioner, as appropriate.

This application requires the proposed acquiror to disclose, among other information, its background, financial condition, the financial condition of its affiliates, the source and amount of funds by which it will effect the acquisition, the criteria used in determining the nature and amount of consideration to be paid for the acquisition, proposed changes in the management and operations of the insurance company and other related matters.

Guaranty Associations and Similar Arrangements

Each of the 50 states of the United States, the District of Columbia and the Commonwealth of Puerto Rico have laws requiring insurance companies doing business within their jurisdictions to participate in various types of guaranty associations or other similar arrangements. These associations and arrangements provide certain levels of protection to policyholders from losses under insurance policies issued by insurance companies that become impaired or insolvent. Typically, these associations levy assessments, up to prescribed limits, on member insurers on a basis that is related to the member insurer's proportionate share of the business in the relevant jurisdiction of all member insurers in the lines of business in which the impaired or insolvent insurer is engaged. Some jurisdictions permit member insurers to recover assessments that they paid through full or partial premium tax offsets, usually over a period of years. Prudential estimated its reserve for future guarantee fund assessments for Jackson to be £9.2 million (\$18.0 million) at December 31, 2006. Prudential believes this reserve to be adequate for all anticipated payments for known insolvencies.

Asset Valuation Reserve

State regulators generally require that insurers establish an asset valuation reserve that consists of two components: a "default component" to provide for future credit-related losses on fixed income investments and an "equity component" to provide for losses on all types of equity investments. The asset valuation reserve establishes statutory reserves for fixed maturity securities, equity securities, mortgage loans, equity real estate and other invested assets. The reserve is designed to provide for a normalized level of future defaults based on the credit rating of each individual investment. The level of reserves is based on both the type of investment and its rating. Contributions to the reserve may result in a slower growth in surplus or a reduction of Jackson's unassigned surplus, which, in turn, may reduce funds available for shareholder distributions. The extent of the impact of the asset valuation reserve on Jackson's statutory surplus depends in part on the future composition of the investment portfolio.

Interest Maintenance Reserve

State regulators generally require that insurers establish an interest maintenance reserve to defer non-credit-related realized capital gains and losses, net of taxes, on fixed income investments (primarily bonds and mortgage loans) which are amortized into net income over the estimated remaining periods to maturity of the investments sold and to defer material gains or losses, net of taxes, resulting from market value adjustments on policies and contracts backed by assets carried at book value. The extent of the impact of the interest maintenance reserve on earnings and surplus depends on the amount of future interest-rate related realized capital gains and losses on fixed maturity investments and deferred gains or losses resulting from market value adjustments on policies and contracts backed by assets that are valued at book value.

The National Association of Insurance Commissioners Ratios

On the basis of statutory financial statements that insurers file with state insurance regulators, the National Association of Insurance Commissioners annually calculates twelve financial ratios to assist state regulators in monitoring the financial condition of insurance companies. A usual range of results for each ratio is used as a benchmark and departure from the usual range on four or more of the ratios can lead

to inquiries from individual state insurance departments. In 2006, all of Jackson's ratios fell within the usual range.

Policy and Contract Reserve Sufficiency Analysis

Michigan insurance law requires Jackson to conduct annually an analysis of the sufficiency of its life and annuity reserves. A qualified actuary must submit to the insurance department an opinion that states that the reserves, when considered in the light of the assets that an insurance company holds with respect to such reserves, make good and sufficient provision for the associated contractual obligations and related expenses of the insurance company. If a qualified actuary cannot provide such an opinion, then the insurance company must set up additional reserves by moving funds from unassigned surplus. The 2006 opinion has been submitted to the Michigan Office of Financial and Insurance Services without any qualifications.

Jackson's Capital and Surplus

Michigan insurance law requires Jackson, as a domestic stock life insurance company, to maintain at least \$7,500,000 in unimpaired capital and surplus. In addition, insurance companies are required to have sufficient capital and surplus to be safe, reliable and entitled to public confidence.

As a licensed insurer in the District of Columbia and every state but New York, where it operates through a subsidiary, Jackson is subject to the supervision of the regulators of each jurisdiction. In connection with the continual licensing of Jackson, regulators have discretionary authority to limit or prohibit the new issuance of business to policyholders when, in their judgment, the regulators determine that such insurer is not maintaining minimum surplus or capital or if the further transaction of business will be hazardous to policyholders.

Risk-based Capital

In 1992, the National Association of Insurance Commissioners approved risk-based capital standards for life insurance companies as well as a model act for state legislatures to enact. The model act requires that life insurance companies report on a formula-based, risk-based capital standard that they calculate by applying factors to various asset, premium and reserve items. The formula takes into account the risk characteristics of a company, including asset risk, insurance risk, interest rate risk and business risk. The National Association of Insurance Commissioners designed the formula as an early warning tool to identify potentially inadequately capitalized companies for purposes of initiating regulatory action. The National Association of Insurance Commissioners intended the formula as a regulatory tool only and did not intend it as a means to rank insurers generally. The model act imposes broad confidentiality requirements on those engaged in the insurance business (including insurers, agents, brokers and others) and on state insurance departments as to the use and publication of risk-based capital data.

Any state adopting the model act gives the state insurance commissioner explicit regulatory authority to require various actions by, or take various actions against, insurance companies whose adjusted capital does not meet minimum risk-based capital standards. The Michigan Insurance Commissioner takes into account the National Association of Insurance Commissioners' risk-based capital standards to determine adequate compliance with Michigan insurance law.

Effective December 31, 2005, the National Association of Insurance Commissioners implemented new requirements, referred to as C-3 Phase II, for calculating risk based capital in connection with variable annuity products with death and living benefit guarantees. These changes did not have a material effect on Jackson, and at December 31, 2006, the Company's total adjusted capital under the National Association of Insurance Commissioners' definition substantially exceeded Michigan standards.

Regulation of Investments

Jackson is subject to state laws and regulations that require diversification of its investment portfolio, limit the amount of investments in certain investment categories such as below investment grade fixed income securities, common stock, real estate and foreign securities and forbid certain other types of investments altogether. Jackson's failure to comply with these laws and regulations would cause investments exceeding regulatory limitations to be treated by the Michigan Insurance Commissioner as non-qualified assets for purposes of measuring surplus and, in some instances, the Michigan Insurance Commissioner could require divestiture of non-qualifying investments.

USA Patriot Act

The USA Patriot Act, enacted in 2001, includes numerous provisions designed to fight international money laundering and to block terrorist access to the US financial system. The US Treasury Department has issued a number of regulations implementing the Patriot Act that apply certain of its requirements to financial institutions including broker dealers and insurance companies. Among other things, the regulations impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing. Jackson has established policies and procedures to ensure compliance with the Patriot Act's provisions and the Treasury Department regulations.

Securities Laws

Jackson, certain of its affiliates and certain policies and contracts that Jackson offers are subject to various levels of regulation under the federal securities laws that the US Securities and Exchange Commission (the "SEC") administers.

The primary intent of these laws and regulations is to protect investors in the securities markets and generally grant supervisory agencies broad administrative powers, including the power to limit or restrict the conduct of business for failure to comply with such laws and regulations. Jackson may also be subject to similar laws and regulations in the states in which it provides investment advisory services, offers the products described above or conducts other securities-related activities.

Jackson National Asset Management, LLC is registered with the SEC as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended ("Investment Advisers Act of 1940"). Jackson National Asset Management, LLC is registered as a transfer agent pursuant to the Securities Exchange Act of 1934, as amended ("Securities Exchange Act"). The investment companies (mutual funds) for which Jackson National Asset Management, LLC serves as an investment adviser are subject to SEC registration and regulation pursuant to the Securities Act of 1933, as amended ("Securities Act"), and the Investment Company Act of 1940, as amended ("Investment Company Act"). In addition, each variable annuity and variable life product sponsored by Jackson is subject to SEC registration and regulation pursuant to the Securities Act and the Investment Company Act, and applicable state insurance and securities laws. Each variable annuity and variable life product are organized as separate accounts that are unit investment trusts.

Curian Capital, LLC is registered with the SEC pursuant to the Investment Advisers Act of 1940 and is also registered or notice filed in all applicable states.

Curian Clearing, LLC is registered as a broker-dealer with the SEC pursuant to the Securities Exchange Act, and is registered as a broker-dealer in all applicable states. In addition, Curian Clearing, LLC is a member firm of the National Association of Securities Dealers (the "NASD").

Jackson National Life Distributors, LLC is registered as a broker-dealer with the SEC pursuant to the Securities Exchange Act, and is registered as a broker-dealer in all applicable states. In addition, Jackson National Life Distributors, LLC is a member firm of the NASD.

Each of SII Investments, Inc., National Planning Corporation, Investment Centers of America, Inc., and IFC Holdings, Inc. (which does business under the name INVEST Financial Corporation), is a broker-dealer, investment adviser, and insurance agency (or affiliated with an insurance agency), licensed and qualified to transact business pursuant to its respective registration and/or membership with the SEC, the NASD, the Municipal Securities Rulemaking Board, applicable state securities and insurance authorities, and all other applicable jurisdictional authorities.

Prudential also conducts US investment management activities through PPM America, Inc., which is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940. PPM America, Inc. serves as the investment adviser to Jackson and other US, UK and Asian entities affiliated with service to other institutional clients such as CDOs or similar structured vehicles and private investment funds (in which PPM affiliates such as Prudential UK entities and Jackson are investors), as well as UK based unit trusts or OEICs, a SICAV and similar vehicles sponsored by affiliates. Currently, a limited number of PPM America, Inc.'s clients are unaffiliated or have underlying investors who are unaffiliated institutions, trusts or individuals. The US mutual funds for which PPM America, Inc. serves as investment adviser or sub-adviser are subject to regulation under the Securities Act and the Investment Company Act, and other similar vehicles organized outside of the US may be subject to regulation under applicable local law.

PPM America, Inc. and certain of its subsidiaries are subject to various levels of regulation under the federal securities laws that the SEC administers as well as state securities laws. In connection with providing investment advisory services to certain of its clients, PPM America, Inc. may also be subject to regulation under applicable foreign laws.

To the extent that PPM America, Inc. manages assets of employee benefit plans subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), or the Internal Revenue Code, it may be subject to certain restrictions imposed by ERISA and taxes imposed by the Internal Revenue Code. Such restrictions are summarized in "Employee Benefit Plan Compliance" in this section below. The US Department of Labor ("Department of Labor") and the US Internal Revenue Service have interpretive and enforcement authority over the applicable provisions of ERISA and the Internal Revenue Code.

Employee Benefit Plan Compliance

Jackson issues certain types of general account stable value products, such as GICs and funding agreements, to employee benefit plans and to investment vehicles that pool the investments of such plans. Many of these plans are retirement plans that are subject to the fiduciary standards of ERISA and that are tax-qualified under the Internal Revenue Code. As such, Jackson may be subject to certain restrictions imposed by ERISA and taxes imposed by the Internal Revenue Code. These restrictions include:

the requirement under ERISA that fiduciaries must perform their duties solely in the interests of ERISA plan participants and beneficiaries,

the requirements under ERISA that fiduciaries may not engage in "conflict of interest" transactions, and

the requirements under ERISA that a fiduciary may not cause a covered plan to engage in certain "prohibited transactions" with certain persons who provide services to the plan or are affiliated with the plan sponsor or a plan service provider.

In general, the Internal Revenue Code imposes taxes on persons involved in certain of the transactions described above.

The Department of Labor and the Internal Revenue Service, have interpretive and enforcement authority over the applicable provisions of ERISA and the Internal Revenue Code.

In the instance where an insurer issues a guaranteed benefit policy to a plan, ERISA provides that the insurer need not become a fiduciary with respect to the plan solely as a result of the issuance of the policy. Under Section 401 of ERISA, a guaranteed benefit policy means an insurance policy to the extent such policy provides for benefits the amount of which the insurer guarantees.

In 1993, in *John Hancock Mutual Life Insurance Company v. Harris Trust & Savings Bank*, the US Supreme Court held that a portion of the funds held under a certain type of general account annuity contract did not constitute a "guaranteed benefit policy" within the meaning of ERISA, a holding which potentially exposes insurers with similar types of contracts to the application of ERISA's fiduciary and prohibited transaction provisions in connection with the management of assets in their general accounts.

Although no assurances can be given, Jackson believes that none of its contracts are of the type to which the holding in *Harris Trust* would be applicable. Moreover, the Department of Labor has issued PTE 95-60 which generally exempts external, unaffiliated investment transactions from ERISA's prohibited transaction provisions. If the *Harris Trust* holding is applied to its contracts, Jackson would be subject to ERISA's fiduciary and prohibited transaction provisions described above.

Financial Services Regulatory and Legislative Issues

Proposals to change the laws and regulations governing the financial institutions industry are frequently introduced in the US Congress, in the state legislatures and before the various regulatory agencies. The likelihood and timing of any proposals or legislation and the impact they might have on Jackson and its subsidiaries cannot be determined at this time.

State legislatures and/or state insurance regulatory authorities frequently enact laws and/or regulations that significantly affect insurers supervised by such authorities. Although the US federal government does not directly regulate the insurance business, federal initiatives may also have an impact on the insurance industry.

A major issue at the state level involves the Insurance Product Regulation Compact (the "Compact"), which has now been adopted by the requisite number of states for implementation, including the state of Michigan. The Compact was developed by the National Association of Insurance Commissioners to serve as an agreement among member states to create a more streamlined system of insurance product regulation. A principal component of the Compact is the creation of a multi-state commission governed by participating states, known as the Interstate Insurance Product Regulation Commission ("IIPRC"). It is contemplated that the IIPRC will serve as a single point of filing for life insurance and annuity products, and establish uniform, national standards for those products applicable to the 29 states that have approved the compact to date. The IIPRC continues to make progress toward meeting its operational goals for receiving its first product filings by June 2007 and has adopted eleven new Uniform Product Standards, three new Operating Procedures, and is moving expeditiously to adopt more new Standards.

The US President has in the past proposed to increase the taxes levied against the insurance industry to increase the federal budget revenues. The industry has been very successful in resisting these proposals on the grounds that an increase in taxes on insurance companies or insurance policies would have a negative affect on US citizens saving for their retirement. The insurance industry is very vigilant in monitoring these proposals and taking action to oppose them, as well as to support proposals that would provide more favorable tax treatment for certain annuity products.

The Governor of Michigan has recently proposed to increase the state tax assessed on insurance companies' premiums. This proposal was actively considered during the last legislative session by the state legislature and was not acted upon favorably. The Governor has again proposed a number of tax increases applicable to insurers, and the insurance industry is working to resist these proposals. The likelihood that any of these proposals will be enacted into law cannot be determined at this time.

A coalition of national insurance and banking organizations has supported the recent introduction of US federal legislation that would allow insurance companies to obtain a federal charter as a regulatory alternative to a state charter. A coalition of insurers has been formed that is opposed to the so-called optional federal charter. Prudential cannot predict whether any federal (or state) legislative initiative to change the nature or scope of the regulation of the insurance industry will be enacted into law.

Federal and state regulators have focused on, and continue to devote substantial attention to, the mutual fund and variable annuity and insurance product industries including the broker-dealer system. As a result of publicity relating to widespread perceptions of industry abuses, including fraudulent and anticompetitive practices among insurance brokers and mutual funds, there have been numerous regulatory inquiries and proposals for legislative and regulatory reforms. It is difficult to predict at this time whether changes resulting from industry investigations and/or new laws and regulations will affect Prudential's insurance or investment management businesses, and, if so, to what degree.

Asian Supervision and Regulation

Prudential's businesses in Asia are subject to all relevant local regulatory and supervisory schemes. These laws and regulations vary from country to country, but the regulators typically grant (or revoke) licenses and therefore control the ability to operate a business.

The industry regulations are usually widely drawn and will include provisions governing both financial matters and the way business is conducted in general. Examples include the registration of agents, the approval of products, asset allocation, minimum capital and the basis for calculating the company's solvency and reserves and the valuation of policyholder liabilities. Regulatory authorities may also regulate affiliations with other financial institutions, shareholder structures and the injection of capital and payment of dividends. Financial statements and other returns are filed with the regulators. The regulators may also conduct physical inspections of the operations from time to time.

A number of jurisdictions across Asia require insurance companies to participate in policyholder protection schemes (i.e., contribute to a fund to support policyholders in the event of an insurance company failing).

To date Prudential Corporation Asia has had no regulatory issues giving rise to a material impact on its results.

For Prudential Corporation Asia's more significant insurance operations the details of the regulatory regimes are as follows:

Hong Kong

The Insurance Companies Ordinance ("ICO") empowers a Commissioner of Insurance to establish an office for the administration of the industry including approvals for a company to conduct insurance business. The Office of the Commissioner for Insurance ("OCI") acts as the supervisory arm.

The Hong Kong branch of The Prudential Assurance Company Ltd is authorized to carry on both long-term business and general business under a composite license.

Japan

The Financial Services Agency of Japan ("JFSA") regulates insurance companies and other financial institutions. The Insurance Business Division of the JFSA specifically undertakes the supervision of insurance companies. The fundamental principles of insurance regulation are set out in the Insurance Business Law.

PCA Life Japan is licensed by and registered with the JFSA as a life insurance company.

Korea

The Ministry of Finance and Economy of Korea set the insurance law after consultation with the Financial Supervisory Commission ("FSC"). The FSC's responsibilities include regulation of the insurance industry but it delegates to the Financial Supervisory Services ("FSS") work such as supervision, examination and direct contact with insurance companies. The detailed rules under the supervisory regulation are prepared by FSS

PCA Life Korea is licensed by and registered with the FSC as a life insurance company

Singapore

The Monetary Authority of Singapore ("MAS") is responsible for insurance company regulation and supervision. In order to sell insurance in Singapore, companies need to be licensed by the MAS.

Prudential Assurance Company Singapore is registered and licensed to manufacture and sell both life and general insurance business.

Taiwan

The Financial Supervisory Commission ("FSC") is responsible for regulating the entire financial services sector. The FSC's responsibilities include supervision, examination and investigation. The Insurance Bureau of the FSC is responsible for the insurance sector.

PCA Life Taiwan is licensed for life insurance business.

Malaysia

In Malaysia, Bank Negara is the regulatory body responsible for supervising and regulating the conduct of financial services including insurance business.

All insurance companies must be licensed with the Ministry of Finance. In addition, they are required to be a member of the Life Insurance Association of Malaysia and/or Persatuan Insurans Am Malaysia (for general insurers).

Prudential Assurance Malaysia Berhad has a license for both life and general insurance business.

China

The body responsible for regulation of the insurance sector is the China Insurance Regulatory Commission ("CIRC") established in 1998. CIRC reports directly to the State Council.

CIRC is authorized to conduct administration, supervision and regulation of the Chinese insurance market, and to ensure that the insurance industry operates stably in compliance with the law.

CIRC drafts relevant laws and regulations regarding insurance supervision, examines and approves the establishment of insurance companies and their branches and supervises market conduct.

India

Insurance is subject to federal regulation in India. The primary legislation is the Insurance Act, 1938, and the Insurance Regulatory & Development Authority Act, 1999 ("IRDA").

The IRDA's duties include issue of certificates of registration to insurance companies and it has a mandate to protect the interests of the policy holders

Indonesia

The insurance industry is regulated by the Insurance Bureau of the Ministry of Finance.

The local Life Insurance Association ("AAJI") acts as a conduit between insurers and the MOF in terms of the development of new regulations.

Funds Businesses

PCA Funds businesses across the region are authorized and licensed by the relevant authorities. In some instances there is a single financial services regulator as noted above and in others a separate regulator is responsible for the securities and asset management sector.

Future Regulatory Development

Prudential Corporation Asia expects the regulatory regimes in Asia to continue to develop, potentially driven by, for example, consumers requiring greater degrees of product transparency and the need for more sophisticated advice. Regulators may introduce new legislation and hence there is a risk past sales may be assessed against new compliance requirements and investment conditions. Given the size of Prudential Corporation Asia's footprint across Asia, the development of regulations may increase the risk of compliance issues in the future.

Item 4A. Unresolved staff comments

None.

Item 5. Operating and Financial Review and Prospects

OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion and analysis should be read in conjunction with Prudential's consolidated financial statements and the related notes to Prudential's consolidated financial statements included elsewhere in this document. Prudential's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), which differs in certain material respects from US GAAP. Information related to the nature and effect of such differences is presented in Sections J and K of the notes to the consolidated financial statements in this document. A summary of the critical accounting policies which have been applied to these statements is set forth in the section below entitled " Factors Affecting Results of Operations IFRS Critical Accounting Policies".

The results discussed below are not necessarily indicative of the results to be expected in any future periods. This discussion contains forward-looking statements based on current expectations, which involve risks and uncertainties. Actual results and the timing of certain events may differ significantly from those projected in these forward-looking statements due to a number of factors, including those set forth in the section below entitled " Factors Affecting Results of Operations", in Item 3, "Key Information Risk Factors" and elsewhere in this document.

Introduction

Prudential provides a broad range of financial products and services, primarily to the retail market.

In the United Kingdom, following the introduction of the new depolarization rules in December 2004, many financial advisor groups have used the opportunity to establish multi-tie panels. Prudential has worked with major advisor groups to design and build multi tie propositions and Prudential UK has been appointed to the regulated multi-tie panels for THINC Destini, Sesame, Bankhall, and Barclays and is strongly positioned to take advantage of the depolarized marketplace as this develops over the next few years.

In October 2004, Prudential launched PruHealth, a UK healthcare product that links health and fitness to the cost of medical insurance. The business has made good progress with sales growing on average 15 per cent per month in 2006. Total premium income for the year was £36 million and PruHealth now has over 100,000 covered individuals. The product has been developed through a joint venture with Discovery of South Africa.

In October 2005, Prudential launched Prudential Property Value Release Plan. A lifetime mortgage product which gives customers greater flexibility and control over the timing of when they draw down funds, thereby reducing total interest charges over the lifetime of the loan. It has been well received by advisors and customers. Gross advances in 2006 were £90 million and resulted in Prudential achieving an 8 per cent share of the lifetime mortgage market. In 2006 a face to face sales team was established to offer direct advice of the lifetime mortgage product, which Prudential believes meets customer demand for face to face sales in this market. Opportunities to grow this team will be pursued in 2007.

At the end of 2006, M&G, Prudential's UK and European fund management business, had £164 billion of funds under management, of which £119 billion relates to Prudential's long-term business funds. M&G operates in markets where it has a leading position and competitive advantage, including retail fund management, institutional fixed income, pooled life and pension funds, property and private finance. M&G also manages Prudential's balance sheet for profit.

During 2006, Prudential launched a new universal life product in Malaysia to give customers more choice. In India, ICICI Prudential launched a new diabetes care product. Prudential has also made its first move into the takaful (Shariah compliant) market by forming a joint venture with Bank Simpanan Nasional ("BSN") in Malaysia to offer a range of takaful savings, protection and investment products

developed for Muslim Malays (who make up 60 per cent of the population), successfully launching its first linked product in November.

In Vietnam, Prudential became the first non bank and first foreign firm approved to establish a finance company that can offer credit products such as personal loans and home mortgages. The license also permits corporate loans.

Prudential has also made its first small entry into the Middle East and North Africa region with the granting of a license to establish a fund management and distribution base at Dubai International Financial Center. The intention is to offer domestic investors access to Prudential's international fund range and then launch conventional and Shariah compliant funds that will be available internationally.

In October 2004, the Board decided to launch a 1 for 6 rights offering. At December 31, 2006, approximately 41 per cent of the net proceeds of the rights offering (£1,021 million) have been used to provide capital to support Prudential's shareholder backed UK life businesses. The remainder of the proceeds have been invested centrally within the Group in short-term financial instruments.

Factors Affecting Results of Operations

Prudential's results of operations are affected, to a greater or lesser degree, by a variety of factors, including demographics, general economic and market conditions, government policy and legislation and regulation, as discussed in greater detail below. See Item 3, "Key Information Risk Factors" for more information on risks associated with these and other factors. In addition, changes to the composition of its businesses and the execution of its growth strategy may result in increased variation in profits from year to year.

General Economic and Market Conditions

Prudential believes that the historical strength of the UK and US equity markets, combined with demographic factors and governmental efforts to increase individual savings and self-provision for retirement, are leading to an increased consumer focus on savings and investment products.

In Asia, Prudential believes the potential for strong economic growth remains and that it is in a strong position to benefit from the long-term growth potential throughout the region. In 2006 Asian economies performed exceptionally well, with strong GDP growth. The composition of demand and economic activity has been shifting recently towards being more domestically driven and Prudential expects this trend to continue, resulting in less dependence on Western economies. Short interest rates are expected to continue to rise slowly as central banks balance normalizing economic policy with containing pressure for currencies to appreciate. Long bond yields are expected to climb from current levels as economic activity broadens and domestic inflation rises. Equity investments will be supported by continued economic growth and the current valuation levels. Overall, it is expected that these factors will continue to encourage investors into long term savings products.

Changes in interest rates and returns from equity, real estate and other investments as well as volatility in these items may affect Prudential's profitability. In the United Kingdom, where Prudential invests in debt and other fixed income securities, equity securities and real estate, shareholders' profits under IFRS are strongly related to the bonuses it declares on with-profits products. The most important influences on the bonus rates are the overall rate of return earned on investments and Prudential's expectation of future investment returns. See " Analysis by Geographic Region United Kingdom Basis of Profits", " With-profits Products" and " Bonus Rates" below. Prudential's bonus policy and its impact on profitability are addressed in more detail in "IFRS Critical Accounting Policies" below.

In the United States, fluctuations in prevailing interest rates, including changes in the difference between the levels of prevailing short-term and long-term rates, can affect results from Jackson, which is predominantly a spread-based business with the majority of its assets invested in fixed income

securities. Changes in interest rates, either upward or downward, can expose Jackson to the risk of not earning anticipated spreads between the rate earned on investments and the rate credited on its policies. For example, if interest rates go up and/or competitors offer higher crediting rates, withdrawals on annuity contracts may increase as policyholders seek higher investment returns elsewhere. In response, Jackson could (1) raise its crediting rates to stem withdrawals, decreasing its spread; (2) sell assets which may have depressed values in a high interest rate environment, creating realized investment losses; or (3) pay out existing cash which would otherwise have earned interest at the higher interest rates. Moreover, to the extent that Jackson holds illiquid private placements and commercial mortgages, there is a risk that it will incur losses if it needs to sell those assets. Conversely, if interest rates decrease, withdrawals from annuity contracts may decrease relative to original expectations, creating more cash than expected to be invested at lower rates. Jackson may have the ability to lower the rates it credits to policyholders as a result, but may be forced to maintain crediting rates for competitive reasons or because there are minimum interest rate guarantees in certain contracts. In either case, the spread earned by Jackson would be lowered.

The profitability of Jackson's spread-based businesses depends in large part on its ability to manage interest rate spreads, as well as the credit and other risks inherent in its investment portfolio. There can be no guarantee that these risks will be managed successfully. Prudential designs its US products and manages the investments supporting this business to reduce interest rate sensitivity. This has the effect of moderating the impact on Prudential's results of changes in prevailing interest rates. Jackson is exposed to equity risk through the options embedded in the fixed indexed liabilities and GMDB and GMWB guarantees included in certain VA benefits. This risk is managed using a comprehensive equity hedging program to minimize the risk of a significant economic impact as a result of increases or decreases in equity market levels while taking advantage of naturally offsetting exposures in Jackson's operations. See Item 11, "Quantitative and Qualitative Disclosures about Market Risk" for a discussion of the management of Prudential's exposure to such market risk.

Government Policy and Legislation

Changes in government policy or legislation applying to companies in the financial services and insurance industries in any of the jurisdictions in which Prudential operates, particularly in the United Kingdom, the United States and Asia, may adversely affect the result of its operations. These include possible changes in the tax treatment of financial products and services, government pension arrangements and policies, the regulation of selling practices and solvency standards. These changes may affect Prudential's existing and future business by, for example, causing customers to cancel existing policies, requiring Prudential to change its range of products and services, redesign its technology or other systems, retrain staff, pay increased tax or incur other costs.

Regulation

In recent years, the insurance sectors in the markets in which Prudential operates have seen considerable regulatory change. Failure to comply with local regulation may result in sanctions, which could take the form of a financial penalty. Pension mis-selling is discussed in more detail under Item 4, "Information on the Company Business of Prudential UK Business Shareholders' Interests in Prudential's Long-term Insurance Business Pension Mis-selling". Mortgage endowment mis-selling and regulatory actions taken by the FSA to address the issue are discussed in more detail under Item 4, "Information on the Company Business of Prudential UK Business Shareholders' Interests in Prudential's Long-term Insurance Business Mortgage Endowment Products Review".

Additional regulation, scrutiny and related costs have put pressure on the margins on new business. In the United States, Prudential has been the subject of regulatory sanctions and class actions. These legal proceedings are discussed in more detail under Item 4, "Information on the Company Business of Prudential Legal Proceedings". Changes in pension, financial services and tax regulation could have an

impact on Prudential's results. See Item 4, "Information on the Company Supervision and Regulation of Prudential" for a summary of the current regulatory environment in which Prudential conducts its business.

Exchange Rates

Due to the geographical diversity of Prudential's businesses, it is subject to the risk of exchange rate fluctuations. Prudential's international operations in the United States, Asia and Europe, which represent a significant proportion of total group income and expenses, generally write policies and invest in the same local currency, which although limiting the effect of exchange rate fluctuations on local operating results, can lead to fluctuations in Prudential's consolidated financial statements upon translation of results into pounds sterling.

IFRS Critical Accounting Policies

Prudential's discussion and analysis of its financial condition and results of operations are based upon Prudential's consolidated financial statements, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") adopted for use in the European Union ("EU"). Were the Group to apply IFRS as published by the International Accounting Standards Board, as opposed to EU adopted IFRS, no additional adjustments would be required.

The preparation of these financial statements requires Prudential to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an on-going basis, Prudential evaluates its estimates, including those related to long-term business provisioning, the fair value of assets and the declaration of bonus rates. Prudential bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and potentially give rise to materially different results under different assumptions and conditions. Prudential believes that its critical accounting policies are limited to those described below. For further details see "US GAAP Analysis US GAAP Critical Accounting Policies" below.

The critical accounting policies in respect of the items discussed below are critical for the Group's results insofar as they relate to the Group's shareholder financed business, in particular for Jackson. The policies are not critical in respect of the Group's with-profits business. Accordingly, explanation is provided in this section as to why the distinction between with-profits business and shareholder-backed business is relevant.

The items discussed below explain the effect of changes in estimates and the effect of reasonably likely changes in the key assumptions underlying these estimates as of the latest balance sheet date so as to provide analysis that recognizes the different accounting effects on profit and loss or equity. In order to provide relevant analysis that is appropriate to the circumstances applicable to the Group's businesses, the explanations refer to types of business, fund structure, the relationship between asset and policyholder liability measurement, and the differences in the method of accounting permitted under IFRS 4 for accounting for insurance contract assets, policyholder liabilities and unallocated surplus of the Group's with-profits funds.

Investments

Determining the fair value of unquoted investments

The Group holds financial investments which are not quoted on active markets. Their fair values are determined in full or in part by using valuation techniques. If the market for a financial investment of the Group is not active, the Group establishes fair value by using quotations from independent third parties, such as brokers or using valuation techniques. The fair values of investments valued using a valuation technique at December 31, 2006 were £4,548 million (2005: £4,947 million). The valuation techniques include the use of recent arm's length transactions, reference to instruments that are substantially the same, discounted cash flow analysis, option-adjusted spread models and enterprise valuation and may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these instruments.

The impact of changed values on the results depends on whether the instruments are held by with-profits or shareholder-backed operations of the Group.

Of the financial investments that are not quoted on active markets, assets with a fair value at December 31, 2006 of £3,959 million (2005: £3,729 million) were held by UK operations. £3,563 million (2005: £3,466 million) of this amount related to assets held by with-profits operations and £396 million (2005: £263 million) related to assets held by the shareholder-backed UK annuity subsidiary PRIL.

The majority of these assets are private debt securities such as private placements, project finance, asset securitizations and local authority securities. The securities are mainly long-dated and not regularly traded and are valued internally using market standard practices. These practices mainly use matrix pricing, which is based on assessing credit quality of the underlying borrower to derive a suitable discount rate relative to government securities.

In accordance with the Group's Risk Management Framework, all internally generated calculations are subject to independent assessment by the Group's Fair Value Committees which comprise members who are independent of the fund managers involved in the day-to-day trading in these assets. Changing any one of the underlying assumptions within a reasonable range used in determining the fair value would not have a significant impact on the value of the assets.

The total amount of the change in fair value estimation using valuation techniques, including valuation techniques based on assumptions not wholly supported by observable market prices or rates, recognized in the profit and loss account in 2006 was a loss of £63 million (2005: a gain of £82 million) for the with-profits fund investments. Changes in values of assets of the with-profits funds are reflected in policyholder liabilities and unallocated surplus. Due to the liability accounting treatment of unallocated surplus, changes in values of securities held by with-profits funds have no direct effect on the profit or loss or shareholders' equity.

The total amount of the change in fair value estimation using valuation techniques, including those based on assumptions not wholly supported by observable market prices or rates, recognized in the profit and loss account in 2006 and which was attributable to shareholders, was a loss of £12 million (2005: a gain of £11 million) for the PRIL investments.

The other financial investments which are not quoted on active markets were assets held by Jackson that had a fair value of £589 million (2005: £1,218 million).

The US operations of Prudential had two groups of assets which were valued using valuation techniques derivatives that are accounted for under IAS 39 on a fair value through profit and loss basis and securities held by the Piedmont trust entity, an 80 per cent Jackson held static trust formed as a result of a securitization of asset-backed securities in 2003 that are accounted for on an available-for-sale basis. As at December 31, 2006, the fair value of the derivative and Piedmont assets valued using

valuation techniques was £184 million and £405 million, respectively (2005: £518 million and £700 million, respectively).

The majority of the factors entering into the valuation of the derivatives are readily observable in the market and, therefore, are not subject to interpretation in the model. The most significant non-observable factor is the level of implied volatility assumed in the valuation. However, changing the implied volatility within a reasonable range would not have a significant impact on the fair value of the derivatives.

Significant estimates and judgments are also employed in valuing certain asset-backed and mortgage-backed securities held by the Piedmont trust entity. These valuations may impact reported shareholder profit and loss amounts through the determination of impairment and recovery amounts. While management believes that the estimates and assumptions employed in developing the fair value estimates are reasonable and present management's best estimate of such values, a reasonable range of values exists with respect to most assumptions utilized in determining these values. As a result of the potentially significant variability in the estimates of the assumptions used in these models, the range of reasonable estimates of the fair value of these securities is significant.

Management has obtained broker bids on these securities that represent the value at which the Group could sell the investments, if forced. These bids are not based on full knowledge and hence analysis of the investments, but represent the best estimate of the worst case market valuation of these securities. The broker bids for these securities at December 31, 2006 totaled £372 million, a difference of £33 million (2005: £514 million, a difference of £186 million).

Determining impairments relating to financial assets

Available-for-sale securities

Financial investments carried on an available-for-sale basis are represented by Jackson's and Egg's debt securities portfolio. These are considered to be impaired if there has been a significant or prolonged period of decline in fair value below its amortized cost or if there is objective evidence of impairment. The consideration of this requires management's judgment. Among the factors considered is whether the decline in fair value results from a change in quality of the security itself, or from a downward movement in the market as a whole and the likelihood of recovering the carrying value based on the current and short-term prospects of the issuer. Unrealized losses that are considered to be primarily the result of market conditions, such as increasing interest rates, unusual market volatility, or industry-related events, and where the Group also believes there is a reasonable expectation for recovery and, furthermore, it has the intent and ability to hold the investment until maturity or the market recovers, are usually determined to be temporary. Prudential's review of fair value involves several criteria including economic conditions, credit loss experience, other issuer-specific developments and future cash flows. These assessments are based on the best available information at the time. Factors such as market liquidity, the widening of bid/ask spreads and a change in cash flow assumptions can contribute to future price volatility. If actual experience differs negatively from the assumptions and other considerations used in the consolidated financial statements, unrealized losses currently in equity may be recognized in the income statement in future periods.

In 2006, impairment losses recognized on available-for-sale securities amounted to £24 million (2005: £24 million). Of this amount, 76 per cent (2005: 28 per cent) has been recorded on structured asset-backed securities, primarily due to reduced cash flow expectations on such securities that are collateralized by diversified pools of primarily below investment grade securities. 22 per cent (2005: 53 per cent) of the losses related to the impairment of fixed maturity securities of two individual corporate issuers, reflecting deteriorating business outlook of the companies concerned.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

In 2006, the Group realized gross losses on sales of available-for-sale securities of £58 million (£29 million). 30 per cent (2005: 38 per cent) of these losses related to the disposal of fixed maturity securities of six individual issuers, which were disposed of to rebalance the portfolio in the US operations.

The effect of those reasonably likely changes in the key assumptions underlying the estimates that underpin the assessment of whether impairment has taken place depends on the factors described in note A3 to the financial statements. A key indicator of whether such impairment may arise in future, and the potential amounts at risk, is the profile of gross unrealized losses for fixed maturity and equity securities accounted for on an available-for-sale basis by reference to the time periods by which the securities have been held continuously in an unrealized loss position and by reference to the maturity date of the securities concerned.

For 2006, the difference between the carrying value and book cost of equity securities in gross unrealized loss position was £(1) million (2005: £(1) million). The following table shows the amounts of gross unrealized losses for fixed maturity securities classified as available-for-sale under IFRS in an unrealized loss position for the time periods indicated as at December 31, 2006 and 2005.

2006	Not rated	Non- investment grade	Investment grade	Total
	£m	£m	£m	£m
Less than 6 months	(1)	(1)	(14)	(16)
6 months to 1 year	(3)	(1)	(10)	(14)
1 year to 2 years	(24)	(10)	(135)	(169)
2 years to 3 years	(5)	0	(9)	(14)
3 years to 4 years	(5)	0	(35)	(40)
4 years to 5 years	0	0	0	0
5 years to 6 years	(2)	(1)	0	(3)
	(40)	(13)	(203)	(256)
2005	Not rated	Non- investment grade	Investment grade	Total
	£m	£m	£m	£m
Less than 6 months	(17)	(10)	(99)	(126)

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table shows the amount of gross unrealized losses for fixed maturity securities classified as available-for-sale under IFRS in an unrealized loss position by maturity date of the securities as at December 31, 2006 and 2005.

	2006	2005
	£m	£m
Less than 1 year	(1)	0
1 to 5 years	(29)	(23)
5 to 10 years	(113)	(126)
More than 10 years	(51)	(41)
Mortgage-backed securities and other debt securities	(62)	(73)
	(256)	(263)

Assets held at amortized cost

Loans and receivables are carried at amortized cost using the effective interest rate method. The loans and receivables include loans collateralized by mortgages, deposits and loans to policyholders. For these assets, the Group measures the amount of any impairment loss by comparing the carrying amount of the asset with the present value of its estimated future cash flows.

In estimating future cash flows, the Group looks at the expected cash flows of the assets and applies historical loss experience of assets with similar credit risks that has been adjusted for conditions in the historical loss experience which no longer exist, or for conditions that are expected to arise. The estimated future cash flows are discounted using the financial asset's original or variable effective interest rate and exclude credit losses that have not yet been incurred.

The risks inherent in reviewing the impairment of any investment include the risk that market results may differ from expectations; facts and circumstances may change in the future and differ from estimates and assumptions; or the Group may later decide to sell the security as a result of changed circumstances.

The principal holdings of loans and receivables where credit risk is of particular significance are loans and advances to customers held by Egg. Egg has significant concentrations of credit risk in respect of its unsecured lending on credit cards, personal loans and mortgage lending secured on property in the United Kingdom. The table below details the movements in the allowance for losses on such loans and advances.

	2006	2005	2004
	£m	£m	£m
Balance at the beginning of the year	335	250	193
Amounts written off	(201)	(161)	(126)
New and additional provisions	384	241	204
Transition adjustment to reflect adoption of IAS 39 at January 1, 2005		5	
Other movements *			(21)
	518	335	250

*

The other movements reflect a release of provisions for bad and doubtful debts following the sale of the Egg France unsecured lending portfolio

Changes in the estimates of credit risk in any reporting period could result in a change in the allowance for losses on the loans and advances.

Life Assurance contracts

Product classification

IFRS 4 requires contracts written by insurers to be classified as either "insurance contracts" or "investment contracts" depending on the level of insurance risk transferred. If significant insurance risk is transferred by the contract then it is classified as an insurance contract. Contracts that transfer financial risk but not significant insurance risk are termed investment contracts. Furthermore, some contracts, both insurance and investment, contain discretionary participation features representing the contractual right to receive additional benefits as a supplement to guaranteed benefits:

- (a) that are likely to be a significant portion of the total contractual benefits;
- (b) whose amount or timing is contractually at the discretion of the insurer; and
- (c) that are contractually based on asset or fund performance, as discussed in IFRS 4.

Accordingly, insurers must perform a product classification exercise across their portfolio of contracts issued to determine the allocation to these various categories. IFRS 4 permits the continued usage of previously applied GAAP for insurance contracts and investment contracts with discretionary participating features. Except for UK regulated with-profits funds, as described subsequently, this basis has been applied by the Company.

For investment contracts that do not contain discretionary participating features, IAS 39 and, where the contract includes an investment management element, IAS 18, apply measurement principles to assets and liabilities attaching to the contract that may diverge from those previously applied. The principal lines of business for which measurement changes arose on adoption of IFRS are certain unit-linked savings and similar contracts in the United Kingdom. Further details of this exercise are given in note D1 to the financial statements.

Valuation assumptions

(i) Contracts of with-profits funds

The Group's insurance contracts and investment contracts with discretionary participating features are primarily with-profits and other protection type policies. For UK regulated with-profits funds for 2006 and 2005, the contract liabilities are valued by reference to the FSA realistic basis. In aggregate this basis has the effect of placing a value on the liabilities of UK with-profits contracts, which reflects the amounts expected to be paid based on the current value of investments held by the with-profits funds and current circumstances.

The basis of determining liabilities for the Group's with-profits business has little or no effect on the results attributable to shareholders. This is because movements on liabilities of the with-profits funds are absorbed by the unallocated surplus. The unallocated surplus represents the excess of assets over liabilities that have yet to be appropriated between policyholders and shareholders. Except through indirect effects, or in remote circumstances as described below, changes to liability assumptions are therefore reflected in the carrying value of the unallocated surplus rather than shareholders' equity.

A detailed explanation of the basis of liability measurement is contained in note D2(d)(ii) to the financial statements. Key elements of the value placed on the liabilities are that:

- (a) The component for the with-profits benefit reserve is based on retrospective calculation of documented asset shares. Asset shares are calculated as the accumulation of all items of income and outgo that are relevant to each policy type; and

(b)

The component for future policyholder related liabilities includes a market consistent valuation of costs and guarantees, options and smoothing determined using either a stochastic approach, hedging costs or a series of deterministic projections with attributed probabilities.

The Group's other with-profits contracts are written in with-profits funds that operate in some of the Group's Asian operations. The liabilities for these contracts and those of Prudential Annuities Limited, which is a subsidiary company of the PAC with-profits funds, are determined differently. For these contracts the liabilities are estimated using actuarial methods based on assumptions relating to premiums, interest rates, investment returns, expenses, mortality and surrenders. The assumptions to which the estimation of these reserves is particularly sensitive are the interest rate used to discount the provision and the assumed future mortality experience of policyholders.

For liabilities determined using the basis described above for UK regulated with-profits funds, and the other liabilities described in the preceding paragraph, changes in estimates arising from the likely range of possible changes in underlying key assumptions have no direct impact on the reported profit.

This lack of sensitivity reflects the with-profits fund structure, basis of distribution, and the application of previous GAAP to the unallocated surplus of with-profits funds as permitted by IFRS 4. Changes in liabilities of these contracts that are caused by altered estimates are absorbed by the unallocated surplus of the with-profits funds. As noted previously, the unallocated surplus is accounted for as a liability and thus, except in the remote circumstances where support for the funds by shareholders' funds was required, changes in its level do not directly affect shareholders' equity. The Company's obligations and more detail on such circumstances are described in note H14 to the financial statements.

(ii) Other contracts

Contracts, other than those of with-profits funds, are written in shareholder-backed operations of the Group. The significant shareholder-backed product groupings and the factors that may significantly affect IFRS results due to experience against assumptions or changes of assumptions vary significantly between business units. For some types of business the effect of changes in assumptions may be significant, whilst for others, due to the nature of the product, assumption setting may be of less significance. The nature of the products and the significance of assumptions are discussed below. From the perspective of shareholder's results, the key sensitivity relates to assumed future investment returns for the Taiwan life operation.

UK insurance operations

The types of products written by UK shareholder-backed insurance operations are for annuity, non-profit unit-linked and other non-participating business. For liabilities of these products a number of changes in assumptions were made in 2006 and 2005.

In 2006, changes to the FSA rules for UK regulated shareholder-backed non-participating business resulted in an increase in profit before tax of £46 million with a consequent decrease in liabilities. These changes to the FSA rules were proposed in the consultative paper CP06/16 and confirmed in December 2006 policy statement PS06/14. In addition to the £46 million credit, a charge of £4 million was recognized in 2006 for the effect of change of assumption for renewal and termination expenses mainly in respect of PAC.

In 2005, a number of changes of assumptions were made which taken together these changes had the effect of reducing profit before tax by £36 million with a consequent increase in liabilities. The reduction arose from a charge of £69 million for strengthened mortality assumptions, being partially offset by a net credit of £29 million in respect of a reduced level of expected defaults for debt securities, and a credit of £4 million for other changes.

The most significant business for which changes in assumptions may affect results is the shareholder-backed annuity business. As the assets and liabilities of this type of business are closely matched by duration, liabilities are determined using a valuation rate of interest that is sensitive to current market conditions. Accordingly, the profits are not particularly sensitive to interest rate movements. Profits from shareholder-backed annuity business are most sensitive to:

the extent to which the duration of the assets held closely matches the expected duration of the liabilities under the contracts. Assuming close matching, the impact of short-term asset value movements as a result of interest rate movements will broadly offset changes in the value of liabilities caused by movements in valuation rates of interest;

actual versus expected default rates on assets held;

the difference between long-term rates of return on corporate bonds and risk-free rates;

the variance between actual and expected mortality experience;

the extent to which expected future mortality experience gives rise to changes in the measurement of liabilities; and

changes in renewal expense levels.

For 2006, a decrease in assumed mortality rates of one per cent would decrease gross profits by approximately £34 million (2005: £33 million). A decrease in credit default assumptions of five basis points would increase gross profits by £64 million (2005: £65 million). A decrease in renewal expenses (excluding investment management expenses) of five per cent would increase gross profits by £14 million (2005: £12 million). The effect on profits would be approximately symmetrical for changes in assumptions that are directionally opposite to those explained above.

Jackson

Jackson offers individual fixed annuities, fixed index annuities, immediate annuities, variable annuities, individual and variable life insurance and institutional products. With the exception of institutional products and an incidental amount of business for annuity certain contracts, which are accounted for as investment contracts under IAS 39, all of Jackson life assurance contracts are accounted for under IFRS 4 as insurance contracts by applying US GAAP, the previous GAAP used before IFRS adoption. Under US GAAP the requirements of SFAS 60 'Accounting and Reporting for Insurance Enterprises' and SFAS 97 'Accounting and Reporting by Insurance Enterprises for certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments' apply to these contracts. The accounting requirements under these standards and the effect of changes in valuation assumptions are considered below for fixed annuity, variable annuity and traditional life insurance contracts.

Fixed annuity contracts, which are treated as investment contracts under US GAAP terminology, are accounted for by applying in the first instance a retrospective deposit method to determine the liability for policyholder benefits. This is then augmented by potentially three additional amounts, namely deferred income, any amounts previously assessed against policyholders that are refundable on termination of the contract, and any premium deficiency, i.e., any probable future loss on the contract. These types of contract contain considerable interest rate guarantee features. Notwithstanding the accompanying market risk exposure, except in the circumstances of interest rate scenarios where the guarantee rates included in contract terms are higher than crediting rates that can be supported from assets held to cover liabilities, the accounting measurement of Jackson's fixed annuity products is not generally sensitive to interest rate risk. This position derives from the nature of the products and the US GAAP basis of measurement.

Variable annuity contracts written by Jackson may provide for guaranteed minimum death, income, or withdrawal features. In general terms, liabilities for these benefits are accounted for under US GAAP by using estimates of future benefits and fees under best estimate assumptions. For variable annuity business the key assumption is the expected long-term level of equity market returns which for 2006 and 2005 was 8.4 per cent per annum determined using a mean reversion methodology. Likely changes to this percentage return are not expected to be significant.

These returns affect the level of future expected profits through their effects on the fee income with consequential impact on the amortization of deferred acquisition costs as described below and the required level of provision for guaranteed minimum death benefit claims.

For traditional life insurance contracts, provisions for future policy benefits are determined under SFAS 60 using the net level premium method and assumptions as of the issue date as to mortality, interest, policy lapses and expenses plus provisions for adverse deviation.

Except to the extent of mortality experience, which primarily affects profits through variations in claim payments and the guaranteed minimum death benefit reserves, the profits of Jackson are relatively insensitive to changes in insurance risk.

Generally, assumptions were modified in 2006 to conform to more recent experience. These changes included revisions to the assumptions regarding utilization of free partial withdrawal options, resulting in a decrease in deferred acquisition costs ("DAC") of £12 million. In 2005, the principal change of valuation assumption was a reserve increase of £13 million due to increasing the mortality assumption for certain Universal Life contracts. This change resulted from the application of Statement of Position 03-01 under US GAAP.

Asian operations

The insurance products written in the Group's Asian operations principally cover with-profits business, unit-linked business, and other non-participating business. The results of with-profits business are relatively insensitive to changes in estimates and assumptions that affect the measurement of policyholder liabilities. As for the UK business, this feature arises because unallocated surplus is accounted for by the Group as a liability. The results of Asian unit-linked business are also relatively insensitive to changes in estimates or assumptions.

For Asian non-participating business the only significant change of estimate that affected the measurement of liabilities arose in the Singapore life business. From 2005, the liabilities of Singapore life business are determined using the basis under the Singapore risk-based capital framework.

The principal non-participating business in the Group's Asian operations, for which changes in estimates and assumptions are important from year to year, is the traditional whole-life business written in Taiwan. The premiums for the in-force business for these contracts have been set by the regulator at different points for the industry as a whole. Premium rates were set to give a guaranteed minimum sum assured on death and a guaranteed surrender value on early surrender based on prevailing interest rates at the time of policy issue. Premium rates also included an allowance for mortality and expenses. The required rates of guarantee have fallen over time as interest rates have reduced from a high of eight per cent to current levels of around two per cent. The current bond rates in Taiwan gives rise to a negative spread against the majority of these policies. The current cash costs of funding in-force negative spread in Taiwan is around £40 million a year.

The profits attaching to these contracts are particularly affected by the rates of return earned, and estimated to be earned on, the assets held to cover liabilities and on future investment income and contract cash flows. Under IFRS, the insurance contract liabilities of the Taiwan business are determined on the US GAAP basis as applied previously under UK GAAP. Under this basis the policy liabilities are

calculated on sets of assumptions, which are locked-in at the point of policy inception, and a deferred acquisition cost is held in the balance sheet.

The adequacy of the insurance contract liabilities is tested by reference to best estimates of expected investment returns on policy cash flows and reinvested income. The assumed earned rates are used to discount the future cash flows. The assumed earned rates consist of a long-term best estimate determined by consideration of long-term market conditions, and rates assumed to be earned in the trending in period. For 2005, it was projected that rates of return for Taiwanese bond yields would trend from the then current levels of some two per cent to 5.5 per cent by December 31, 2012. For 2006, it has been assumed that the longer-term bond rate will be attained one year later, i.e. by December 31, 2013.

The liability adequacy test results are sensitive to the attainment of the trended rates during the trending period. Based on the current asset mix, margins in other contracts that are used in the assessment of the liability adequacy tests, and currently assumed future rates of return, if interest rates were to remain at current levels in 2007, and the target date for attainment of the long-term bond yield deferred to December 31, 2014, the premium reserve, net of deferred acquisition costs, would be broadly sufficient. If interest rates were to remain at current levels in 2008 with a further one year delay in the progression period, then some level of write-off of deferred acquisition costs may be necessary. However, the amount of the charge, based on current in-force business which is estimated at £70-90 million, is sensitive for the previously mentioned variables.

Furthermore, the actual amount of any write-off would be affected by the impact of new business written between December 31, 2006 and the future reporting dates to the extent that the business is taken into account as part of the liability adequacy testing calculations for the portfolio of contracts.

The adequacy of the liability is also sensitive to the level of the projected long-term bond rate. The current long-term assumption of 5.5 per cent has been determined on a prudent best estimate basis by reference to detailed assessments of the financial dynamics of the Taiwanese economy. In the event that the rate applied was altered, the carrying value of the deferred acquisition costs and policyholder liabilities would potentially be affected.

At December 31, 2006, if the assumed long-term bond yield applied had been reduced by 0.5 per cent from 5.5 per cent to 5.0 per cent and continued to apply the same progression period to December 31, 2013, by assuming bond yields increase from current levels in equal annual installments to the long-term rate, the premium reserve, net of deferred acquisition costs, would have been insufficient and there would have been a charge of some £60 million to the income statement. The impact of reducing the long-term rate by a further 0.5 per cent to 4.5 per cent would have increased this charge by some £160 million. The primary reason for the lower level of charge for the initial 0.5 per cent reduction is the current level of margins in the liability adequacy calculation. The effects of additional 0.5 per cent reductions in the assumed long-term rate below 4.5 per cent would be of a similar or slightly higher level to the £160 million noted previously. The effects of changes in any one year reflect the combination of the short-term and long-term factors described above.

Whole of life contracts with floor levels of policyholder benefits that accrue at rates set at inception are also written in the Korean life operations, though to a much less significant extent than in Taiwan. The business is much less sensitive to returns than Taiwan with the higher proportion of linked and health business.

The other area of note in respect of guarantees is the Japanese business where pricing rates are higher than current bond yields. Lapse risk is a feature in that policyholders could potentially surrender their policies on guaranteed terms if interest rates significantly increased leaving the potential for losses if bond values had depreciated significantly. However, the business is matched to a relatively short realistic liability duration.

For the Korean and Japanese life business exposures described above, the results are comparatively unaffected by changes of assumption. The accounts basis value of liabilities for both operations are of a similar order of magnitude to those that apply for the purposes of Group solvency calculations under the FCD.

Deferred acquisition costs

Significant costs are incurred in connection with acquiring new insurance business. Except for acquisition costs of with-profits contracts of the UK regulated with-profits funds, which are accounted for under the realistic FSA regime as described in note A4 to the financial statements, these costs, which vary with, and are primarily related to, the production of new business, are capitalized and amortized against margins in future revenues on the related insurance policies. The recoverability of the asset is measured and the asset is deemed impaired if the projected future margins are less than the carrying value of the asset. To the extent that the future margins differ from those anticipated, then an adjustment to the carrying value of the deferred acquisition cost asset will be necessary.

The deferral and amortization of acquisition costs is of most relevance to the Group's results for shareholder-financed long-term business of Jackson and Asian operations. The majority of the UK shareholder-backed operations is for individual and group annuity business where the incidence of acquisition costs is negligible.

Jackson

For term business, acquisition costs are deferred and amortized in line with expected premiums. For annuity business, acquisition costs are deferred and amortized in line with expected gross profits on the relevant contracts. For interest-sensitive business, the key assumption is the long-term spread between the earned rate and the rate credited to policyholders, which is based on the annual spread analysis. In addition, expected gross profits depend on mortality assumptions, assumed unit costs and terminations other than deaths (including the related charges), all of which are based on a combination of actual experience of the Jackson companies, industry experience and future expectations. A detailed analysis of actual experience is measured by the internally developed mortality studies.

For variable annuity business, as described above, the key assumption is the expected long-term level of equity market returns, which for 2006 and 2005 was 8.4 per cent per annum determined using a mean reversion methodology.

In 2006, revisions to the assumptions regarding utilization of free partial withdrawal options, resulted in a decrease in DAC of £12 million. In addition, several smaller changes relating to lapse rates, mortality rates and other assumptions resulted in an increase of £6 million in DAC with the resulting net impact of all changes a decrease in pre-tax profits of £7 million. In 2005, a write-down of £21 million to deferred acquisition costs for single premium deferred annuity partial withdrawal charges and a £13 million reserve increase due to increasing mortality assumption was incurred. These charges were partially offset by several smaller changes, relating to single premium whole life surrenders and annuity mortality and annuitization rates, which resulted in a £19 million benefit on adjusting amortization of DAC with the resulting net impact of all changes a decrease in pre-tax profits of £7 million.

The effects of reasonably likely changes in the key assumptions underlying the estimates that affect the amortization of DAC for Jackson are not individually or collectively material.

Asian operations

The key shareholder-backed Asian operation is the Taiwan life business.

In 2005, the application of the liability adequacy testing for the Taiwan life business resulted in a write-off of DAC of £21 million. This reflected the comparison of the net amount of the present value of

future payments for benefits and claims less present value of future premiums, determined using revised assumptions based on actual and anticipated experience, i.e., the best estimate amount, against the balance sheet liability for policy benefits less unamortized acquisition costs. There was no write-off of DAC made in 2006.

The sensitivity of the results for this operation, including the potential effect on write-offs of deferred acquisition costs, is significant and is described above.

Pensions

The Group applies the requirements of IAS 19, "Employee Benefits" to its defined benefit pension schemes. Due to the inclusion of actuarial gains and losses in the income statement rather than being recognized directly in equity, the results of the Group are affected by changes in interest rates for corporate bonds that affect the rate applied to discount projected pension payments and changes in mortality assumptions.

The economic participation in the surplus or deficits attaching to the main PSPS and the smaller SAPS are shared between the PAC WPSF and shareholder operations. The economic interest reflects the source of contributions over the scheme life, which in turn reflects the activity of the members during their employment.

In the case of PSPS, at December 31, 2004, the attribution between the WPSF and shareholders' funds was in the ratio 80/20. In 2005, following extensive analysis, this ratio was revised to 70/30 at December 31, 2005. Movements in the apportionment of the surplus or deficit for PSPS between the WPSF and shareholders' funds in 2006 reflects the 70/30 ratio application to movements in the carrying value of assets and liabilities at December 31, 2005 but with service cost and contributions for ongoing service apportioned by reference to the cost allocation for activity of current employees.

For SAPS the ratio for both 2006 and 2005 is estimated to be 50/50 between the WPSF and shareholders' funds.

The table below shows the sensitivity of the PSPS liabilities of £4,607 million at December 31, 2006 to changes in discount rates, inflation rates and mortality assumptions.

Assumption	Change in assumption	Impact on scheme liabilities on IAS 19 basis
Discount rate	Decrease by 0.2% from 5.2% to 5.0%	Increase scheme liabilities by 3.6%
Discount rate	Increase by 0.2% from 5.2% to 5.4%	Decrease scheme liabilities by 3.4%
Rate of inflation	Decrease by 0.2% from 3.0% to 2.8%	Decrease scheme liabilities by 1.3% with consequent reduction in salary increases
Mortality rates	Reduce rates from 100% of table to 95%	Increase liabilities by 1.2%

Deferred tax

Deferred tax assets are recognized to the extent that they are regarded as recoverable, that is to the extent that, on the basis of all the available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which the losses can be relieved. The UK taxation regime applies separate rules to trading and capital profits and losses. The distinction between temporary differences that arise from items of either a capital or trading nature may affect the recognition of deferred tax assets. The judgments made, and uncertainties considered, in arriving at deferred tax balances in the financial statements are discussed in note H4 to the financial statements.

Goodwill

Goodwill impairment testing requires the exercise of judgment by management as to prospective future cash flows.

Other features of IFRS accounting that are of particular significance to an understanding of Prudential's IFRS results

The other features that are of significance relate to the timing of adoption of certain IFRS standards and their consequential impact upon the financial statements; the accounting for UK with-profits funds; and the presentation of certain items in the financial statements.

Adoption of IAS 32, IAS 39 and IFRS 4

Three IFRS accounting standards, IAS 32, "Financial Instruments: Disclosure and Presentation", IAS 39, "Financial Instruments: Recognition and Measurement" and IFRS 4, "Insurance Contracts", have been adopted as at January 1, 2005 rather than January 1, 2004. This treatment is consistent with the policy typically applied by groups with banking operations where the practical consequences of adopting these standards for 2004 are significant.

Accordingly, the amounts recorded for revenue and expenses and assets and liabilities of certain items reflected in the Group's financial statements are not on a consistent basis in 2006 and 2005 compared to amounts recorded for the comparative period of 2004. The main area where this inconsistency applies is valuation and accounting presentation of fair value movements of derivatives and debt securities of Jackson (as described below). In addition, the measurement of assets and liabilities and income and expenses of those UK unit-linked contracts, and those with similar features, that do not contain significant insurance risk, is altered.

Insurance contract accounting

With the exception of investment contracts without discretionary participation features, the Group's life assurance contracts are classified as insurance contracts and investment contracts with discretionary participating features. As permitted by IFRS 4, assets and liabilities of these contracts (see below) are accounted for under previously applied GAAP. Accordingly, except as described below, the modified statutory basis ("MSB") of reporting as set out in the revised Statement of Recommended Practice ("SORP") issued by the ABI in November 2003 has been applied for the 2006 and 2005 results.

In the United Kingdom, for the 2004 comparative results, with the exception of minor accounting adjustments, the technical provisions reflect the UK regulatory basis of reporting that has applied previously for many years. This effectively constitutes the Peak 1 basis under the current FSA regime.

From January 1, 2005 the Group has chosen to improve its accounting for UK regulated with-profits funds by the voluntary application of the UK accounting standard FRS 27, "Life Assurance". Under this standard, the main accounting changes that were required for UK with-profits funds were:

derecognition of deferred acquisition costs and related deferred tax; and

replacement of MSB liabilities with adjusted realistic basis liabilities.

The primary effect of these changes was to fundamentally alter the basis of accounting and carrying value of deferred acquisition costs (as set out in note H2 to the financial statements) and the reported level of unallocated surplus of with-profits funds (as set out in note H12 to the financial statements) from January 1, 2005.

Under UK GAAP, the fund for future appropriations ("FFA") represents the excess of assets over policyholder liabilities for the Group's with-profit funds. Under IFRS the FFA is termed unallocated

surplus and the Group has opted to account for it wholly as a liability with no allocation to equity. This treatment reflects the fact that shareholders' participation in the cost of bonuses arises only on distribution. As a consequence of this accounting treatment, shareholder profits on with-profits business continue to reflect the one-ninth cost of declared bonus previously applied under UK GAAP.

For Jackson, applying the MSB as applicable to overseas operations, the assets and liabilities of insurance contracts are accounted for under insurance accounting prescribed by US GAAP. For Asian operations the local GAAP is applied with adjustments, where necessary, to comply with UK GAAP. For Asian operations in countries where local GAAP is not well established and in which the business written is primarily non-participating business, US GAAP is used as the most appropriate proxy to local GAAP.

The usage of these bases of accounting has varying effects on the way in which product options and guarantees are measured. For UK regulated with-profits funds, for the 2006 and 2005 results, options and guarantees are valued on a market consistent basis. The basis is described in note D2(d)(ii). For other operations a market consistent basis is not applied under the accounting basis described in note A4. Details of the guarantees, basis of setting assumptions, and sensitivity to altered assumptions are described in notes D3 and D4 to the financial statements.

Valuation and accounting presentation of fair value movements of derivatives and debt securities of Jackson

Under IAS 39, derivatives are required to be carried at fair value. Unless hedge accounting is applied, value movements on derivatives are recognized in the income statement.

For derivative instruments of Jackson, the Group has considered at length whether it is appropriate to undertake the necessary operational changes to qualify for hedge accounting so as to achieve matching of value movements in hedging instruments and hedged items in the performance statements. In reaching the decision a number of factors were particularly relevant. These were:

IAS 39 hedging criteria has been designed primarily in the context of hedging and hedging instruments that are assessable as financial instruments that are either stand-alone or separable from host contracts, rather than, for example, duration characteristics of insurance contracts;

the high hurdle levels under IAS 39 of ensuring hedge effectiveness at the level of individual hedge transactions for specific transactions;

the difficulties in applying the macro hedge provisions under IAS 39 (which are more suited to banking arrangements) to Jackson's derivative book;

the complexity of asset and liability matching of US life insurers such as those with Jackson's product range; and finally

whether it is possible or desirable, without an unacceptable level of costs and restraint on commercial activity, to achieve the accounting hedge effectiveness required under IAS 39.

In this regard, the issues surrounding the IAS 39 application are very similar to those considered by other US life insurers when the US financial reporting standard FAS 133 was first applied for US GAAP reporting. Taking account of these considerations the Group has decided that, except for certain minor categories of derivatives, it is not appropriate to seek to achieve hedge accounting under IAS 39 by completely reconfiguring the structure of Jackson's derivative book. As a result of this decision, the total income statement results are more volatile as the movements in the value of Jackson's derivatives are reflected within it.

Under IAS 39, unless carried at amortized cost (subject to impairment provisions where appropriate) under the held-to-maturity category, debt securities are also carried at fair value. The Group has chosen

not to classify any financial assets as held-to-maturity. Debt securities of Jackson are designated as available-for-sale with value movements being recorded as movements within shareholders' equity.

Accounting for with-profits business

For with-profits business (including non-participating business of Prudential Annuities Limited which is owned by the PAC with-profits fund), adjustments to liabilities and any related tax effects are recognized in the income statement. However, except for any impact on the annual declaration of bonuses, shareholder profits for with-profits business and shareholders' funds would not be affected by adjustments to liabilities. This is because the income statements solely reflect one-ninth of the cost of bonuses declared for with-profits policies for the year.

For 2006, 2005 and 2004, adjustments to the long-term business provision for the PAC with-profits fund would normally reflect changes that have also been reflected in the annual regulatory returns submitted to the FSA. Except to the extent of any second order effects on other elements of the regulatory returns, such changes can be expected to have a consequent effect on the excess of assets over liabilities of the fund for the purposes of solvency calculations, and the related free asset ratio which is an indicator of the overall financial strength of the fund. Similar principles apply to the Group's Asian with-profits business.

Profits Recognition

As outlined in " Analysis by Business Segment and Geographic Region United Kingdom Basis of Profits" below, Prudential's results include an annual profit distribution to shareholders from long-term with-profits funds that represents an amount of up to one-ninth of the value of that year's bonus declarations to policyholders. The distribution corresponds directly to the post-tax basis profit for with-profits business. The boards of directors of the subsidiary companies that have with-profits operations, using actuarial advice, determine the amount of annual and final bonuses to be declared each year on each group of contracts.

Unallocated surplus

As discussed above, the unallocated surplus represents the excess of assets over policyholder liabilities of the Group's with-profits funds. The annual excess or shortfall of income over expenditure of the with-profits funds after declaration and attribution of the cost of bonuses to policyholders and shareholders is transferred to, or from, the unallocated surplus through a charge or credit to the income statement. The balance is determined after full provision for deferred tax on unrealized appreciation of investments.

Changes to the level of the unallocated surplus do not directly impact shareholders' results or funds. After allowing for differences in the basis of preparation of the financial statements and UK regulatory returns, movements in the level of the unallocated surplus are broadly indicative of movements in the excess of regulatory basis assets over liabilities of the fund. In turn, movements in this excess as a proportion of liabilities are indicative of changes in the financial strength of the fund. Differences in the basis of preparation of financial statements and UK regulatory returns arise principally from the treatment of certain regulatory basis liabilities, such as mismatching reserves (that are accounted for as reserves within the unallocated surplus), recognition of deferred acquisition costs in the financial statements, and asset valuation differences and admissibility deductions reflected in the regulatory returns.

Fair Value of Assets

Changes in the fair value of assets of Prudential's long-term with-profits funds will primarily be reflected in the excess of assets over liabilities recorded as the unallocated surplus. Shareholders' profits

from with-profits business and shareholders' funds are not directly impacted by movements in the fair values of the assets. However, current investment performance is a factor that is taken into account in the setting of the annual declaration of bonuses which, in turn, affects UK shareholder profits to the extent of one-ninth of the cost of bonus.

Changes in the fair value of assets of unit-linked (separate account) funds are normally accompanied by a matching change in unit-linked business liabilities that is also recognized in the income statement.

Investment Returns

For with-profits business, investment returns together with other income and expenditure are recorded within the income statement. However, the difference between net income of the fund and the cost of bonuses and related statutory transfers is reflected in an amount transferred to or from the unallocated surplus within the income statement. Except to the extent of current investment returns being taken into account in the setting of bonus policy, the investment returns of with-profits fund in a particular year do not affect shareholder profits or with-profits funds.

Presentation of results before tax

The total tax charge for the Group reflects tax that in addition to relating to shareholders' profits is also attributable to policyholders and unallocated surplus of with-profits funds and unit-linked policies. This is explained in more detail in note F5 to the financial statements. However, pre-tax profits are determined after transfers to or from unallocated surplus of with-profits funds. These transfers are in turn determined after taking account of tax borne by with-profits funds. Consequently reported profit before the total tax charge is not representative of pre-tax profits attributable to shareholders. In order to provide a measure of pre-tax profits attributable to shareholders the Group has chosen to adopt an income statement presentation of the tax charge and pre-tax results that delineates between policyholder and shareholder components.

Overview of Consolidated Results

Introduction

Prudential has built strong positions in the United Kingdom, the United States and Asia, three of the largest and most attractive markets in the world where Prudential believes rising wealth and changing demographics are fueling demands for life insurance and other long-term savings and protection products.

Prudential's strategy is centered on optimizing Prudential's competitive advantages in life insurance, becoming a leading provider of financial services for the retirement market, and on the further development of the asset management businesses. Prudential's focus is on value not volume, growing sales in areas that deliver the most profitable returns.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table shows Prudential's IFRS consolidated total profit for the periods indicated.

	Year Ended December 31,		
	2006	2005	2004
	£m	£m	£m
Total revenue, net of reinsurance	35,945	41,125	33,904
Total charges	(33,874)	(38,980)	(32,343)
	2,071	2,145	1,561
Profit before tax*			
Tax attributable to policyholders' returns	(849)	(1,147)	(711)
	1,222	998	850
Profit before tax attributable to shareholders			
Tax expense	(1,196)	(1,388)	(951)
Less: tax attributable to policyholders' returns	849	1,147	711
Tax attributable to shareholders' profits	(347)	(241)	(240)
	875	757	610
Profit from continuing operations after tax			
Discontinuing operations (net of tax)		3	(94)
	875	760	516
Profit for the year			

*

Profit before tax represents income net of post-tax transfers to unallocated surplus of with-profits funds, before tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders' profits.

Basis of preparation of overview

In Prudential's interim and annual financial statements that appear in Prudential's distributions to UK shareholders and the UK financial market, and in Prudential's preliminary results release and its UK Annual Report, the structure of the operating and financial review has been prepared in accordance with the basis for financial reporting used by Prudential's management. Prudential's management analyze IFRS profit before shareholder tax between management's chosen performance measure of operating profit based on longer-term investment returns and other items.

In preparing this Form 20-F, it has been necessary for the structure of the overview of the consolidated results to be reconfigured to meet US reporting requirements.

Under IFRS the pre-tax GAAP measure of profits is profit before policyholder and shareholder taxes. This measure is not relevant for reflecting pre-tax results attributable to shareholders for two reasons. First, this profit measure represents the aggregate of pre-tax results attributable to shareholders and a pre-tax amount attributable to policyholders. Second, the amount is determined after charging the transfer to the liability for unallocated surplus, which in turn is determined in part by policyholder taxes borne by the ring-fenced with-profits funds. It is noted that this circular feature is specific to with-profits funds in the UK, and other similarly structured overseas funds, and should be distinguished from other products, which are referred to as 'with-profits' and the general accounting treatment of premium or other policy taxes.

Accordingly, Prudential has chosen to explain its consolidated results by reference to profits for the year, reflecting profit after tax for continuing and discontinued operations. In explaining movements in profit for the year reference is made to trends in profit before shareholder tax and the shareholder tax charge.

Profit for the year

Profit for 2006 was £875 million compared with £760 million in 2005. This £115 million increase reflects an increase in the profit from continuing operations after tax of £118 million from £757 million

to £875 million offset by a decrease of £3 million in the net of tax result for discontinued operations from a profit of £3 million in 2005 to £nil reported in 2006.

The increase in profit from continuing operations after tax reflects an increase in profits before tax attributable to shareholders of £224 million, from £998 million in 2005 to £1,222 million in 2006, offset by a £106 million increase in the tax charge attributable to shareholders, which grew from £241 million in 2005 to £347 million in 2006

The increase in profit before tax attributable to shareholders in 2006 reflects a £217 million positive movement from the prior year in actuarial and other gains and losses on defined pension schemes, from a loss of £50 million in 2005 to a gain of £167 million in 2006 and no goodwill impairment charge in 2006 compared to a charge of £120 million in 2005. These were partially offset by decreased underlying profits of £64 million, from £893 million in 2006 compared to £957 million in 2005, and decreased short-term value gains on financial instruments credited to income, down £49 million from £211 million in 2005 to £162 million in 2006.

Profit from continuing operations after tax in 2006 was £875 million compared with £757 million in 2005, with the shareholder tax charge increasing to £347 million in 2006 from £241 million in 2005. The effective tax rate in 2006 was 28 per cent compared with 24 per cent in 2005. The effective tax rate in 2006 was close to the expected tax rate of 31 per cent (which reflects the geographic split of profits). The effective tax rate in 2005 was unusually low due to a number of factors, including favorable settlements reached with the revenue authorities and being able to take credit for Egg's losses in France.

Profit for 2005 was £760 million compared with £516 million in 2004. This £244 million increase reflected an increase in the profit from continuing operations after tax of £147 million from £610 million to £757 million and an increase of £97 million in the net of tax result for discontinued operations from a charge of £94 million to a profit of £3 million.

The increase in profit from continuing operations after tax in 2005 reflected growth in profits before tax attributable to shareholders of £148 million, which grew from £850 million in 2004 to £998 million in 2005, and a £1 million increase in the tax charge attributable to shareholders, which grew from £240 million in 2004 to £241 million in 2005.

In 2005, the growth in profit before tax attributable to shareholders primarily reflected growth in underlying profits and a higher level of short-term value movements on financial instruments credited to income. These increases offset a goodwill impairment charge and an increased negative level of actuarial and other gains and losses attaching to the Group's defined benefit pension schemes.

In comparison to the growth in profits before tax attributable to shareholders, the small increase in the shareholder tax charge in 2005 corresponded to a reduction in the effective tax rate from 28 per cent to 24 per cent. The reduction in the 2005 effective tax rate arose from a number of factors, including settlement of a number of outstanding issues with HM Revenue and Customs ("HMRC") and benefit taken for prior year losses incurred in France following a European Court of Justice decision.

There were no operations classified as discontinued in 2006. Discontinued operations in 2005 related to the completion of Egg's withdrawal from France and the losses incurred by Funds Direct. The discontinued operations in 2004 related to the profit on sale of Jackson Federal Bank, the profit generated by the sale of a stake in Life Assurance Holding Corporation Limited and losses relating to Egg France.

Analysis by Business Segment and Geographic Region

The Group's reportable segments are based on the organizational structure used by management for making operating and investment decisions and for assessing performance. The Group's business segments are long-term business, banking, and broker dealer and fund management, whilst its

Edgar Filing: PRUDENTIAL PLC - Form 20-F

geographical segments comprise the territories in which the Group conducts business, which are the United Kingdom, the United States and Asia.

The following table shows Prudential's IFRS consolidated total profit for the periods indicated divided by business segment and geographic region. The accounting policies applied to the segments below are the same as those used in the Group's consolidated accounts and are described in Note A4 to the consolidated financial statements. The Group had taken advantage of the exemption within IFRS that allows comparative information presented in the first year of adoption of IFRS not to comply with standards IAS 32, IAS 39 and IFRS 4. Accordingly, reported profit for the year in 2004 does not reflect the impact of these standards. For further information on the impact of adopting these standards see Note A5 to the consolidated financial statements.

Total profit for the year reflecting profit after tax for continued and discontinued operations:

2006	UK	US	Asia	Total
	£m	£m	£m	£m

Profit from Long-term business operations

Total profit from long-term business in 2006 was £845 million compared to £786 million in 2005. There were no profits or losses from discontinued operations from long term business.

The growth in 2006 of profits from continuing operations after tax was supported by a 3 per cent increase in profit before shareholder tax from £1,152 million in 2005 to £1,186 million in 2006, with the result enhanced by a decrease in the shareholder tax charge from £366 million in 2005 to £341 million in 2006.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The growth in profit before tax attributable to shareholders of £34 million compared to 2005 primarily reflects an increase in underlying profits offset by a lower level of short-term value increases on financial instruments.

The effective shareholder tax rate on profits from continuing long-term business operations decreased from 32 per cent in 2005 to 29 per cent in 2006 resulting from minor variations on the rates applicable to UK and Asian businesses.

Total profit from long-term business in 2005 was £786 million compared to £585 million in 2004.

Profit from long-term business operations increased from £585 million in 2004 to £786 million in 2005 and there was a non-recurrence of a £4 million contribution (net of tax) for discontinued operations in 2004.

The growth in 2005 of profits from continuing operations after tax was supported by a 38 per cent increase in profit before shareholder tax from £832 million in 2004 to £1,152 million in 2005 partially offset by an increase in the shareholder tax charge from £251 million in 2004 to £366 million in 2005.

The growth in profit before tax attributable to shareholders of £320 million in 2005 compared to 2004 primarily reflects an increase in underlying profits and a higher level of short-term value increases on financial instruments. The growth in profit before tax in 2005 also reflects short-term value increases of £122 million on derivatives held by Jackson, which are used for economic hedging purposes. Prior to the adoption of IAS 39 at January 1, 2005, these derivatives were carried at amortized cost and, as a result, the 2004 income does not include any attributable value movement.

The effective shareholder tax rate on profits from continuing long-term business operations increased from 30 per cent in 2004 to 32 per cent in 2005 resulting from minor variations on the rates applicable to UK and Asian businesses.

In order to understand how Prudential's results are derived it is necessary to understand how profit emerges from its business. This varies from region to region, primarily due to differences in the nature of the products and regulatory environment in which Prudential operates.

United Kingdom

Basis of profits

Prudential's results comprise an annual profit distribution to shareholders from its UK long-term with-profits fund, hereafter referred to as the with-profits fund, as well as profits from its other businesses. For most of Prudential's operations, other than its UK long-term insurance businesses, the IFRS basis of accounting matches items of income and related expenditure within the same accounting period. This is achieved through the deferral of acquisition costs and application of the accruals concept.

With-profits products

For Prudential's UK long-term insurance business, the primary annual contribution to shareholders' profit comes from its with-profits products. With-profits products are designed to provide policyholders with smoothed investment returns through a mix of annual and final bonuses. Shareholders' profit in respect of bonuses from with-profits products represents an amount of up to one-ninth of the value of that year's bonus declaration to policyholders. The smoothing inherent in the bonus declarations provides for relatively stable annual shareholders' profit from this business.

Bonus rates

The main factors that influence the determination of bonus rates are the return on the investments of the with-profits fund, the effect of inflation, taxation, the expenses of the fund chargeable to policyholders and the degree to which investment returns are smoothed. The overall rate of return earned on investments and the expectation of future investment returns are the most important influences on bonus rates. The assets backing the with-profits business are predominantly invested in

equities and real estate. If the financial strength of the with-profits fund were adversely affected, then a higher proportion of fixed interest or similar assets might be held by the fund.

Unallocated surplus

The annual excesses of premiums and investment returns over claim payments, operating expenses and the change in policyholder provisions within Prudential's with-profits fund that are not distributed in that year as bonuses and related shareholders' profit are transferred to the liability for unallocated surplus by a charge to the income statement of the with-profits fund. Any shortfall in such amounts would result in a transfer from the unallocated surplus by a credit to the income statement of the long-term fund. Current year amounts in respect of premiums, investment returns, operating expenses and unusual charges or credits do not directly affect the distribution of profit to shareholders from the with-profits business in that year. Current year claims, which include final bonus payments, do have an effect on shareholders' profit through the shareholders' proportion of the value of those final bonuses.

Surplus assets and their use

The liability for unallocated surplus comprises amounts Prudential expects to pay to policyholders in the future, the related shareholder transfers and surplus assets. These surplus assets, which are described in more detail under Item 4, "Information on the Company Business of Prudential UK Business Shareholders' Interests in Prudential's Long-term Insurance Business Surplus Assets in Prudential Assurance's Long-term With-profits Fund", have accumulated over many years from a variety of sources and provide the with-profits fund with working capital. This working capital permits Prudential to invest a substantial portion of the assets of the with-profits fund in equity securities and real estate, smooth investment returns to with-profits policyholders, keep its products competitive, write new business without being constrained as to cash flows in the early policy years and demonstrate solvency.

In addition, Prudential can use surplus assets to absorb the costs of significant events, such as fundamental strategic change in its long-term business and, with the consent of the UK regulator, the cost of its pension mis-selling, without affecting the level of distributions to policyholders and shareholders. The costs of fundamental strategic change may include investment in new technology, redundancy and restructuring costs, cost overruns on new business and the funding of other appropriate long-term insurance related activities, including acquisitions.

The "SAIF" and "PAL" funds

Prudential's with-profits fund also includes the SAIF and the wholly-owned subsidiary, PAL. All assets of the SAIF business are solely attributable to former policyholders of Scottish Amicable Life Assurance Society (predating the acquisition of Scottish Amicable by Prudential in October 1997). The SAIF with-profits fund is discussed in more detail under Item 4, "Information on the Company Business of Prudential UK Business Shareholders' Interests in Prudential's Long-term Insurance Business The SAIF Sub-fund and Accounts". Since PAL is a wholly owned subsidiary of the with-profits fund, profits from this business affect shareholders' profits only to the extent that they affect the annual with-profits bonus declaration and resultant transfer to shareholders.

Comparison of total profit arising from UK long-term business

Profit from UK long-term business increased from £288 million in 2005 to £317 million in 2006. The increase of £29 million reflects a rise in profits from continuing operations. There were no discontinued operations for UK long-term business in 2006 and 2005.

The growth in profits from continuing operations after tax reflects an increase in profit before shareholder tax from £416 million in 2005 to £426 million in 2006 and a decrease in the shareholder tax charge from £128 million in 2005 to £109 million in 2006.

The growth in profit before tax attributable to shareholders of £10 million primarily reflects growth in underlying profits, which was partially offset by a decrease in short-term value gains on financial instruments in 2006.

The effective shareholder tax rate on profits from continuing UK long-term business operations decreased from 31 per cent in 2005 to 26 per cent in 2006. This partially related to a tax credit arising from relief for excess expenses in respect of the shareholder-backed protection business.

Profit from UK long-term business increased from £247 million in 2004 to £288 million in 2005. The increase of £41 million reflects a rise of £45 million in profit from continuing operations after tax from £243 million in 2004 to £288 million in 2005 and the non-recurrence of the £4 million net of tax profit that arose in 2004 on the sale of Prudential's stake in Life Assurance Holding Company.

The growth in profits from continuing operations after tax in 2005 reflects an increase in profit before shareholder tax from £334 million in 2004 to £416 million in 2005 and an increase in the shareholder tax charge from £91 million in 2004 to £128 million in 2005.

The growth in profit before tax attributable to shareholders of £82 million in 2005 primarily reflects growth in underlying profits. This growth was partially offset by a £20 million charge in 2005 (2004: £nil) for the effect of strengthening actuarial provisions for increases in ongoing contributions for future service of active scheme members of the Prudential Staff Pension Scheme.

The effective shareholder tax rate on profits from continuing UK long-term business operations increased from 27 per cent in 2004 to 31 per cent in 2005.

United States

Basis of profits

The profit on Jackson's business predominantly arises from spread income from interest-sensitive products, such as fixed annuities, institutional products and fee income on variable annuities. Except for institutional products and certain term annuities which are classified as investment products under IAS 39, for the purposes of IFRS reporting, deposits into these products are recorded as premiums, withdrawals and surrenders and are included in benefits and claims and the resulting net movement is recorded under other reserve movements within benefits and claims. Benefits and claims also include interest credited to policyholders in respect of deposit products less fees charged on these policies. While the presentation of these items differs between IFRS and US GAAP, there is no net impact on total profits.

Comparison of total profit arising from US long-term business

Profit from US long-term business decreased from £350 million in 2005 to £301 million in 2006. This decrease of £49 million reflects a decrease in profit before shareholder tax from £526 million in 2005 to £451 million in 2006 offset by a decrease in the shareholder tax charge from £176 million to £150 million over the same period.

The £75 million decrease in 2006 of profit before tax attributable to shareholders mainly reflects growth in underlying profits (as described in the additional analysis of consolidated results reflecting the basis used by management and reported externally to UK shareholders and the UK financial market) more than offset by a significant decrease in the accounting value of short-term value movements in financial instruments reflected in the IFRS income statement.

Profit from US long-term business increased from £235 million in 2004 to £350 million in 2005. This increase of £115 million reflected a rise in profit before shareholder tax from £357 million in 2004 to £526 million in 2005 and an increase in the shareholder tax charge from £122 million to £176 million over the same period.

The £169 million growth in 2005 of profit before tax attributable to shareholders mainly reflected growth in underlying profits (as described in the additional analysis of consolidated results reflecting the basis used by management and reported externally to UK shareholders and the UK financial market) and a significant increase in the accounting value of short-term value movements in financial instruments reflected in the IFRS income statement. £122 million of the increase is attributable to an increase in the value of derivatives used by Jackson for economic hedging purposes. Prior to the adoption of IAS 39 at January 1, 2005, these derivatives were carried at amortized cost and therefore these increases were not reflected in the 2004 income statement.

Asia

Basis of profits

The assets and liabilities of contracts classified as insurance under IFRS 4 are determined in accordance with methods prescribed by local GAAP and adjusted to comply, where necessary, with UK GAAP. Under IFRS 4, subject to the conditions of that standard, the continued application of UK GAAP in this respect is permitted.

For Asian operations in countries where local GAAP is not well established and in which the business is primarily non-participating and linked business, US GAAP is used as the most appropriate reporting basis. Of the more significant Asia operations, this basis is applied in Taiwan, Japan and Vietnam. For with-profits business in Hong Kong, Singapore and Malaysia the basis of profit recognition is bonus driven as described in the section " United Kingdom, with-profits products".

Comparison of total profit arising from Asian long-term business

Profit from Asian long-term business increased from £148 million in 2005 to £227 million in 2006. This £79 million increase largely reflects a rise in profit before shareholder tax from £210 million to £309 million and an increase in the shareholder tax charge from £62 million to £82 million during the same period.

The £99 million increase in profit before tax attributable to shareholders in 2006 arose primarily from an increase in short-term value gains on financial instruments included in the income statement.

The effective shareholder tax rate decreased from 30 per cent in 2005 to 27 per cent in 2006.

Profit from Asian long-term business increased from £103 million in 2004 to £148 million in 2005. This £45 million increase largely reflected a rise in profit before shareholder tax from £141 million to £210 million and an increase in the shareholder tax charge from £38 million to £62 million during the same period.

£30 million of the growth in profit before tax attributable to shareholders in 2005 arose from various non-recurring items.

The effective shareholder tax rate increased from 27 per cent in 2004 to 30 per cent in 2005.

A goodwill impairment charge of £120 million was incurred in 2005 in respect of the Group's Japanese life business. This charge is reflected in the explanation of profit and losses for unallocated corporate activity.

Profit from banking operations

Basis of profits

The Group's banking operations solely comprise of Egg in the United Kingdom, which is a financial services company primarily offering unsecured personal loans, credit cards, mortgages and savings accounts. The basis of profits is the margin between interest income and expense and fee and commission income.

Comparison of total profit arising from banking operations

In 2006, loss for the year was £106 million compared with a profit of £48 million in 2005. The £154 million decrease all relates to UK banking.

The banking business' £154 million decrease largely reflects a decrease in the contribution from continuing operations from £45 million profit in 2005 to £106 million loss in 2006. In 2005, there was a £3 million profit on discontinued operations that related to the closure of the Egg France operation and the discontinuation of Egg's Funds Direct operation. In 2006, there were no discontinued operations.

The £151 million decrease in profit from continuing operations mainly reflects a decrease of £194 million in profit before shareholder tax from £44 million profit in 2005 to £150 million loss in 2006, offset by an increase in the tax credit of £43 million mainly arising from the benefit of previously unused tax losses.

In 2005, profit for the year was £48 million compared with a loss of £62 million in 2004. The £110 million increase reflected a £143 million rise in the profit for UK banking from a loss of £95 million in 2004 to a profit of £48 million in 2005, and the non-recurrence of a £33 million profit resulting from the discontinued Jackson Federal Bank business, which was disposed of in 2004.

In 2005, the banking business £143 million growth largely reflected an increase in the contribution from continuing operations from £36 million in 2004 to £45 million in 2005 and an increase of £134 million in the result from discontinued operations, which increased from a loss of £131 million in 2004 to a profit of £3 million in 2005.

The £9 million increase in profit from continuing operations in 2005 mainly reflects a decrease of £17 million in profit before shareholder tax from £61 million in 2004 to £44 million in 2005, offset by a reduction in the tax charge of £26 million mainly arising from the benefit of previously unused tax losses.

Profit from broker-dealer and fund management

In 2006 total profit from broker-dealer and fund management increased by £121 million from £104 million in 2005 to £225 million in 2006. This increase primarily results from an improvement in profit earned from M&G's UK and European operations, from £99 million in 2005 to £166 million in 2006, the improvement in profits from the Group's Asian operations from £nil in 2005 to a profit of £37 million in 2006 and an increase in the Group's US operations' profit from £5 million in 2005 to £22 million in 2006.

The increase of £121 million in total profit reflects an increase of £129 million in profit before shareholder tax from £154 million in 2005 to £283 million in 2006 and an increase in the tax charge of £8 million from £50 million in 2005 to £58 million in 2006.

The increase in profit before shareholder tax reflects growth in underlying profits, as explained in the additional analysis of consolidated results reflecting the basis used by management and reported externally to UK shareholders and the financial market, short-term value increases of certain financial instruments, and an increase in actuarial gains attributable to the M&G defined benefit pension scheme.

In 2005 total profit from broker-dealer and fund management increased by £4 million from £100 million in 2004 to £104 million in 2005. This increase resulted primarily from an improvement in profit earned from M&G's UK and European operations, from £94 million in 2004 to £99 million in 2005, and the improvement in profits from the US operations from a loss of £8 million in 2004 to a profit of £5 million in 2005. These profit gains offset a reduction in the Group's Asian operations from a profit of £14 million in 2004 to £nil in 2005.

The increase of £4 million in total profit in 2005 largely reflected an increase of £5 million in profit before shareholder tax from £149 million in 2004 to £154 million in 2005 and an increase in the tax charge of £1 million from £49 million in 2004 to £50 million in 2005.

In 2005, the increase in profit before shareholder tax reflects growth in underlying profits, as explained in the additional analysis of consolidated results reflecting the basis used by management and reported externally to UK shareholders and the financial market, which was offset by adverse changes in the short-term value increases of certain financial instruments, a reduction in the result attributable to minorities of US funds consolidated under IFRS, and actuarial losses attributable to the M&G defined benefit pension scheme.

Unallocated corporate

Total net of tax charges for unallocated corporate activity decreased by £89 million from £178 million in 2005 to £89 million in 2006. The change primarily reflects a £255 million decrease in pre-tax expenditure from £352 million in 2005 to £97 million in 2006 offset by an decrease of £166 million in the tax credit, from £174 million in 2006 to £8 million in 2005.

The decrease in pre-tax expenditure primarily reflects an increase in the level of underlying expenditure offset by an increase in the short-term value gains and technical adjustments for consolidated investment funds, an increase in shareholder actuarial gains on defined benefit schemes and there was no goodwill impairment charge for 2006. In 2005 there was a goodwill impairment charge of £120 million in respect of the Japanese life insurance business.

The decrease in the tax credit largely reflects that in 2005 there were a number of one-off events as described further below.

In 2005, total net of tax charges for unallocated corporate activity increased by £71 million from £107 million in 2004 to £178 million in 2005. The change primarily reflected a £160 million increase in pre-tax expenditure from £192 million in 2004 to £352 million in 2005 offset by an increase of £89 million in the tax credit, from £85 million in 2004 to £174 million in 2005.

In 2005, the increase in pre-tax expenditure primarily reflected a consistent level of underlying expenditure, a goodwill impairment charge of £120 million in 2005 on the Japanese life insurance business, a decrease in the short-term value changes and technical adjustments for consolidated investment funds.

The increase in the tax credit in 2005 largely reflected the settlement of outstanding issues with HMRC at amounts below those previously provided, the tax credit arising from relief for excess expenses in respect of the shareholder backed protection business and adjustments for prior years resulting from routine revisions of tax returns.

Business Segment and Geographical Analysis by Nature of Revenue and Charges

The following table shows Prudential's consolidated total revenue and consolidated total charges for the following periods.

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Earned premiums, net of reinsurance	15,986	15,028	16,152
Investment income	17,904	24,013	15,750
Other income	2,055	2,084	2,002
Total revenue, net of reinsurance	35,945	41,125	33,904
Benefits and claims and movement in unallocated surplus of with-profits funds	(28,421)	(33,100)	(26,593)
Acquisition costs and other operating expenditure	(5,243)	(5,552)	(5,563)
Finance costs: interest on core structural borrowings of shareholder-financed operations	(210)	(208)	(187)
Goodwill impairment charge		(120)	
Total charges	(33,874)	(38,980)	(32,343)
Profit before tax*	2,071	2,145	1,561
Tax attributable to policyholders' returns	(849)	(1,147)	(711)
Profit before tax attributable to shareholders	1,222	998	850
Tax attributable to shareholders' profits	(347)	(241)	(240)
Profit from continuing operations after tax	875	757	610
Discontinued operations (net of tax)		3	(94)
Total profit	875	760	516

*

Profits before tax represents income net of post-tax transfers to unallocated surplus of with-profits funds, before tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders' profits.

Earned premiums

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Long-term business:			
UK Operations	6,971	7,800	9,096
US Operations	5,323	4,270	4,647
Asian Operations	3,692	2,958	2,409

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Year Ended December 31,

Total	15,986	15,028	16,152

Earned premiums, net of reinsurance, for long-term business totaled £15,986 million in 2006 compared to £15,028 million in 2005. The increase in earned premiums compared with 2005 was contributed largely from the growth in earned premiums in the US and Asian operations partly offset by a decrease in the UK operations.

Earned premiums, net of reinsurance, for long-term business totaled £15,028 million in 2005 compared to £16,152 million in 2004. The main reason for the reduction in earned premiums in 2005

was the adoption of IAS 39 and IFRS 4 from January 1, 2005. For 2004, the income statement includes premiums on all contracts that were then classified under previous GAAP as insurance, including deposit style 'investment contracts' where the insurance risk in the contracts is insignificant. For 2005, the recognition basis in the income statement remains the same except for investment contracts, as defined under IFRS 4, which do not contain discretionary participation features, where the accounting reflects the deposit nature of the arrangement. In 2004, the earned premiums for the UK, US and Asia included approximately £1,381 million, £873 million and £5 million, respectively, of premiums for investments contracts.

a) United Kingdom

Earned premiums decreased by 10.6 per cent from £7,800 million in 2005 to £6,971 million in 2006.

Prudential UK delivered a strong retail performance in 2006 primarily driven by strong individual annuity volumes together with increased sales of with-profits bonds and offshore bonds. The decrease in the earned premiums in 2006 in spite of the underlying growth in the UK retail business largely reflects decreased sales in the wholesale market, bulks and back book business as Prudential UK undertook a selective participation strategy to ensure margins and profitability were maintained in a period when the market experienced increased competition.

b) United States

Earned premiums increased by 24.7 per cent from £4,270 million in 2005 to £5,323 million in 2006. This increase is driven by strong growth in Jackson's variable annuity business in 2006. Jackson delivered record variable annuity sales in 2006. This reflects its distinct competitive advantages of an innovative product offering, an efficient and flexible technology platform, a relationship-driven distribution model and award-winning service.

The growth in sales of variable annuities in 2006 was partially offset by lower sales of fixed annuities and fixed index annuities. Entry spreads for fixed annuities continued to be challenging during 2006, which limited the attractiveness of the market to Jackson, whilst fixed index annuity sales continued to be affected by the uncertain regulatory environment in the United States.

Earned premiums from insurance contracts increased by 13.1 per cent in 2005 from £3,774 million in 2004 to £4,270 million in 2005, after adjusting for the effects of IAS 39 and IFRS 4.

The increase in 2005 was predominantly due to growth in variable annuity and fixed index annuity sales. Prudential believes that Jackson's strong sales of variable annuities reflect its differentiated product structure, distribution proposition and service offering.

Stronger fixed index annuity sales in 2005 reflected customers' increasing preference for products with the potential for higher returns linked to equity index performance. Jackson believes it has benefited from its approach to educating broker-dealers about a complex product, while at the same time offering lower commissions and passing the benefit to the end consumer.

The growth in sales of variable annuity and fixed index annuity products in 2005 was partially offset by lower sales of fixed annuities. This primarily reflected the continued low interest rate environment and the relatively flat interest yield curve in the United States.

c) Asia

Earned premiums increased by 24 per cent to £3,692 million in 2006 compared to £2,958 million in 2005. Prudential believes Asia remains a very attractive region for growth opportunities due to its high level of economic activity translating into higher levels of personal wealth, greater disposable incomes

and a growing appetite for good quality protection and savings products. Within this environment, Prudential believes ageing demographics are also beginning to drive increased household savings rates and an emerging need for retirement solutions. Prudential's product strategy has been a key driver to its success. From the outset, the focus has been on predominantly regular premium products designed and targeted to meet customer needs. Prudential believes it has led product innovation in a number of markets, often working closely with the regulators.

Prudential believes 2006 was a very successful year for the agency distribution channel, which remains the major channel in Asia. The agent numbers at the end of 2006 increased by 114,000 in India, 11,000 in Indonesia and 5,000 in China compared to 2005. Distribution from non-agency channels also grew strongly in 2006. Strong growth from bank distribution included record new business volumes from SCB in Hong Kong, an increasing proportion of new business from ICICI Bank in India and encouraging growth from Maybank and Singpost in Singapore.

After adjusting for the effects of IAS 39 and IFRS 4, earned premiums in 2004 and 2005 were £2,404 million and £2,958 million, respectively, an increase of 23 per cent in 2005.

While the majority of these earned premiums in 2005 related to sales made through Asia's tied agency distribution channel, Prudential believed that there was potential to expand alternate channels, particularly banks and direct marketing. Growth in earned premiums in 2005 was most significant in Singapore, Korea and India with increases of £127 million, £76 million and £59 million, respectively.

Singapore's operations grew largely as a result of the broadening of its unit linked range and also increased bank distribution. In contrast, growth in sales in Korea was mainly due to the increased success in the tied financial advisor and general agency channels and the continued appeal of its universal life product. In addition, Prudential's Indian life insurance joint venture, ICICI-Prudential Life, supported its growth in 2005 primarily through ongoing expansion. The Indian business in 2005 had 74 branches and had grown agent numbers by 36 per cent during 2005 to 70,000.

Investment income

	Year Ended December 31,		
	2006	2005	2004
	£m	£m	£m
Long-term business:			
UK Operations	13,248	20,852	13,541
US Operations	2,937	2,391	1,474
Asian Operations	1,719	770	735
Total	17,904	24,013	15,750

Investment income consists of interest income, dividends and realized and unrealized gains and losses on investments designated as fair value through profit and loss. As allowed by IFRS, the Group adopted IAS 39 on January 1, 2005.

a) United Kingdom

In the United Kingdom, investment income decreased from £20,852 million in 2005 to £13,248 million in 2006. This decrease is due to between a reduction of £10,022 million in net unrealized gains on 2005 which is offset partially by an increase of £1,403 million in interest and dividends and an increase of £1,015 million in net realized gains.

The investment income for UK operations primarily represents the return on the assets supporting the PAC long-term fund. The PAC with-profits sub-fund delivered a pre-tax return of 12.4 per cent in

2006 compared with a pre-tax return of 20 per cent in 2005. Over the last five years the fund has achieved a total return of 63.8 per cent against 41.1 per cent for the FTSE 100 total return and 50.2 per cent for the FTSE All-Share (Total Return) index (figures are to December 31, 2006, before tax and charges). As part of its asset allocation process, Prudential continuously evaluates prospects for different markets and asset classes. During 2006, Prudential decreased its exposure to equities while increasing its exposure to corporate bonds and alternative assets, reflecting Prudential UK's view that increased diversification in the assets of the with-profits sub-fund was appropriate

Investment income increased from £13,541 million in 2004 to £20,852 million in 2005. The main reason for this increase in investment income was the appreciation of UK share and bond prices during 2005. This resulted in an increase in investment income of approximately £6 billion. The effect of adopting IAS 39 in 2005 was to increase reported investment income by £192 million.

b) United States

In the United States, investment income increased from £2,391 million in 2005 to £2,937 million in 2006. The increase in investment income in 2006 is mainly due to an increase of £697 million in income received such as dividends and interest offset partially by a decrease of £182 million in realized gains. Overall, the investment yields increased from 6.3 per cent in 2005 to 8.1 per cent in 2006.

Investment income increased from £1,474 million in 2004 to £2,391 million in 2005. The effect of adopting IAS 39 was to increase investment income by £578 million. The remaining increase in investment income was due to an increase of £171 million in income received such as dividends and interest and realized gains by £152 million reflecting an increase in investment yields from 5.6 per cent in 2004 to 6.3 per cent in 2005.

c) Asia

In Asia, investment income increased from £770 million in 2005 to £1,719 million in 2006. This increase is mainly driven by an increase in net unrealized gains on investments.

Investment income increased from £735 million in 2004 to £770 million in 2005. The main reason for the movement was an increase in external investment income by £39 million. The adoption of IAS 39 did not have any material effect in Asia.

Benefits and claims and movement in unallocated surplus of with-profits funds

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Long-term business:			
United Kingdom	(17,030)	(24,782)	(18,832)
United States	(7,291)	(5,591)	(5,339)
Asia	(4,100)	(2,727)	(2,422)
Total	(28,421)	(33,100)	(26,593)

Benefits and claims represent payments, including final bonuses, to policyholders in respect of maturities, surrenders and deaths plus the change in technical provisions (which primarily represents the movement in amounts owed to policyholders). Movement in unallocated surplus of with-profits funds represents the transfer to (from) the unallocated surplus each year through a charge (credit) to the income statement of the annual excess (shortfall) of income over expenditure of the with-profits funds, after declaration and attribution of the cost of bonuses to policyholders and shareholders.

Total benefits and claims decreased by £4,679 million in 2006 to £28,421 million compared to £33,100 million in 2005. Total benefits and claims increased by £6,507 million in 2005 to £33,100 million, compared to £26,593 million in 2004. These movements principally reflect the movement in policyholder liabilities as a result of the decrease or increase in investment income discussed above, which has been passed on to the policyholders in the form of bonus declaration for with-profits products or through the corresponding decrease or increase in policyholder liabilities for unit-linked and similar products, or transfer to unallocated surplus.

a) United Kingdom

Overall benefits, claims and the transfer to unallocated surplus decreased from £24,782 million in 2005 to £17,030 million in 2006. Overall benefits, claims and the transfer to unallocated surplus increased from £18,832 million in 2004 to £24,782 million in 2005. There are two principal reasons for these movements in 2006 and 2005, both of which relate to the accounting treatment of investment returns for allocated assets backing liabilities and unallocated surplus of with-profits funds.

For unit-linked, variable annuity and other policies which are classified as insurance contracts under IFRS 4 where there is a direct relationship between policyholder benefits and asset returns on attaching pools of assets, the charge for benefits and claims reflects investment return credited to policyholder balances. With decreased market returns in 2006 compared to 2005 and increased market returns in 2005 compared to 2004 there is a natural decrease and increase in 2006 and 2005 respectively in the charge. This feature also applies in a similar manner for closely matched UK annuity business, where the calculation of liabilities reflects period-end yields.

The second reason relates to the basis of accounting for with-profits funds. The charge to the income statement for these funds reflects:

a) Liabilities for contract benefits either include bonuses declared to date (as applied in 2004 for all with-profits business and in 2006 and 2005 for the Singapore and Malaysia with-profits funds) or "asset share" attribution (as applied in 2006 and 2005 for UK regulated with-profits funds on the application of FRS 27 as part of the adoption of IFRS 4 as explained in note D2 of the financial statements), and

b) The movement in the excess of assets over policyholder liabilities is charged to the income statement as a movement on the liability for unallocated surplus.

The combined effect of these two items is that there is a close correlation between the level of increase in the values of assets of the funds and the level of combined charge for benefits and movement on unallocated surplus. With market returns of 12.4 per cent on the Prudential Assurance long-term fund in 2006 compared to 20 per cent for 2005, there is an attendant decrease in the change to the income statement. Conversely, with market returns of 20 per cent on the Prudential Assurance long-term fund in 2005 compared to 13.4 per cent for 2004, there was an attendant increase in the charge to the income statement in 2005.

The annual movements in benefits and claims also include changes in the pension mis-selling provision, which increased in 2006 after decreasing in 2005 and 2004. For a detailed analysis of this provision, see Item 4, "Information on the Company Business of Prudential UK Business Shareholders' Interests in Prudential's Long-term Insurance Business Pension Mis-selling". With the consent of the UK regulator, the total cost of pension mis-selling is included within the transfer to the unallocated surplus of the Prudential Assurance long-term with-profits fund. Payments related to pension mis-selling will be met from the surplus assets in the Prudential Assurance long-term with-profits fund and not from amounts intended to fund existing and future bonuses.

As described in "United Kingdom Basis of Profits" above, because shareholders' profit from the Prudential Assurance with-profits sub-fund represents an amount of up to one-ninth of the value of that

year's bonus declaration to policyholders, shareholders' profit from the fund has not been affected by the increase in the provision for pension mis-selling. Given the strength of the fund, Prudential does not believe that pension mis-selling costs will have an adverse impact on the levels of bonuses paid to policyholders and, therefore, shareholders' profit from the fund. In the unlikely event that this proves not to be the case, Prudential's intention would be that an appropriate contribution to the long-term with-profits fund be made from shareholders' funds with a consequential impact on shareholders' profit.

b) United States

In 2006, the accounting charge for benefits and claims increased by 30.4 per cent to £7,291 million compared to 2005. In 2005, the accounting charge for benefits and claims increased by 4.7 per cent to £5,591 million compared to 2004.

The change in 2006 and 2005 reflects underlying movements in claims, benefits and maturities for contracts classified as insurance products under IFRS 4. The charge for 2004 includes maturities and other changes for institutional business and certain term certain annuities.

c) Asia

In 2006, benefits and claims totaled £4,100 million, up 50.3 per cent on £2,727 million in 2005, reflecting primarily an increase in policyholder benefits of 19 per cent from £938 million in 2005 to £1,117 million in 2006 and an increase in the movement in policyholder liabilities and unallocated surplus of with-profit funds of 67 per cent from £1,780 million in 2005 to £2,974 million in 2006.

In 2005, benefits and claims totaled £2,727 million, up 12.6 per cent on £2,422 million in 2004, reflecting primarily an increase in policyholder benefits of 30 per cent from £719 million to £938 million. The adoption of IFRS 4, IAS 39 and FRS 27 did not have material effects on the change in the accounting charges for benefits and claims for the Group's Asian operations.

Acquisition costs and other operating expenditure

	Year Ended December 31,		
	2006	2005	2004
	£m	£m	£m
Long-term business:			
United Kingdom	(3,493)	(4,018)	(4,282)
United States	(800)	(767)	(650)
Asia	(950)	(767)	(631)
	<u> </u>	<u> </u>	<u> </u>
Total	(5,243)	(5,552)	(5,563)
	<u> </u>	<u> </u>	<u> </u>

Total acquisition costs and other operating expenditure of £5,243 million in 2006 was 5.6 per cent lower than the £5,552 million incurred in 2005. Total acquisition costs and other operating expenditure of £5,552 million in 2005 was 0.2 per cent lower than the £5,563 million incurred in 2004.

a) United Kingdom

Total UK acquisition costs and other operating expenses in 2006 were £3,493 million, compared to £4,018 million in 2005. The decrease of £525 million in 2006 mainly relates to a decrease in operating expenses from £2,404 million to £2,185 million and a lower amortization of DAC from £738 million in 2005 to £619 million in 2006.

Total UK acquisition costs and other operating expenses in 2005 were £4,018 million, compared to £4,282 million in 2004. The decrease of £264 million in 2005 mainly relates to a decrease in operating expenses from £2,793 million to £2,404 million.

b) United States

Acquisition costs and other operating expenses of £800 million in 2006 were 4.3 per cent higher than expenses in 2005 of £767 million. The increase primarily reflects higher US interest rates resulting in an increase in interest payable from £147 million in 2005 to £269 million in 2006 offset partially by lower amortization of DAC from £276 million in 2005 to £203 million in 2006.

Acquisition costs and other operating expenses of £767 million in 2005 were 18 per cent higher than expenses in 2004 of £650 million. The increase in expenses primarily reflects higher amortization of DAC by £55 million from £221 million in 2004 to £276 million in 2005.

c) Asia

Total Asian acquisition costs and other operating expenses in 2006 were £950 million, an increase of £183 million compared to £767 million in 2005. This increase reflects an increase in DAC amortization from £431 million in 2005 to £465 million in 2006 and an increase in operating expenses from £401 million in 2005 to £440 million in 2006.

Total Asian acquisition costs and other operating expenses in 2005 were £767 million, an increase of £136 million compared to £631 million in 2004. This increase reflects an increase in DAC amortization from £285 million in 2004 to £431 million in 2005 and an increase in operating expenses from £308 million in 2004 to £401 million in 2005. The increase in operating expenses in part reflects development expenses of £20 million, restructuring costs of £14 million in Japan and an increase in administrative expenses of £20 million.

Additional analysis of consolidated results reflecting the basis used by management and reported externally to UK shareholders and the UK financial market

For many years, the assessment of performance by management has been, and continues to be, applied to profit before shareholder tax by analysis of the result between operating profit based on longer-term investment returns and other reconciling items. The focus on profit before shareholder tax, rather than profit before policyholder and shareholder tax, reflects the shareholders' interests in surpluses as they arise and the regulatory basis of ring-fenced long-term funds in the United Kingdom. In particular, taxes borne by policyholders of with-profits contracts are borne by the liability for unallocated surplus of with-profits funds.

Until the adoption of IFRS, operating profit based on longer-term investment returns was a GAAP measure arising from the specific recommendation of the Statement of Recommended Practice (SORP) for accounting for insurance business issued by the ABI. With the adoption of IFRS, the ABI SORP is no longer authoritative literature for the purposes of determining GAAP measures. Nevertheless, it continues to be the basis applied by the Company for internal performance assessment and a fundamental element of the analysis provided to shareholders and the UK stock market. The analysis that follows reflects information published with the Group's results on March 15, 2007.

Reconciliation of total profit by business segment and geography to underlying performance measure

A reconciliation of profit before all taxes to profit before tax attributable to shareholders and profit for the year is shown below.

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Profit before tax	2,071	2,145	1,561
Tax attributable to policyholders' returns	(849)	(1,147)	(711)
Profit before tax attributable to shareholders	1,222	998	850
Tax expense	(1,196)	(1,388)	(951)
Less: tax attributable to policyholders' returns	849	1,147	711
Tax attributable to shareholders' profits	(347)	(241)	(240)

Shareholders' share of actuarial and other gains and losses on defined benefit pension schemes (iv)	167	(50)	(7)
Profit from continuing operations before tax attributable to shareholders	1,222	998	850

Notes:

- (i) Operating profit based on longer-term investment returns

Operating

profit based on longer-term investment returns is a supplemental measure of results. For the purposes of measuring operating profit, investment returns on shareholder financed business are based on expected long-term rates of return. The expected long-term rates of return are intended to reflect historical real rates of return and, where appropriate, current inflation expectations adjusted for consensus economic and investment forecasts. The significant operations that require adjustment for the difference between actual and longer-term investment returns are Jackson and certain businesses of the Group's Asian operations. The amounts included in operating results for long-term capital returns for debt securities comprise two components. These are a risk margin reserve based charge for expected defaults, which is determined by reference to the credit quality of the portfolio, and amortization of interest-related gains and losses for operating results based on long-term results to the date when sold bonds would otherwise have matured.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

(ii) Goodwill impairment charge

The charge for goodwill impairment in 2005 of £120 million relates to the Japan life insurance business. The charge reflects the slower than expected development of the Japanese life insurance business. There was no impairment charge for goodwill in 2006 and 2005.

(iii) Short-term fluctuations in investment returns on shareholder-backed business

The fluctuations arise as follows:

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
US operations:			
Movements in market value of derivatives (other than equity-based) used for economic hedging purposes (2004 not applicable because of formal adoption of IAS 32, IAS 39 and IFRS 4 on January 1, 2005)	34	122	
Actual less longer-term investment returns for other items	20	56	61
Asian operations	134	32	37
Other operations (2005: including £6m (2004: £nil) on sale of partial stake in Indian subsidiary)	(26)	1	51
	162	211	149

(iv) Shareholders' share of actuarial and other gains and losses on defined benefit pension schemes

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Actuarial gains and losses			
Actual less expected return on scheme assets	156	544	115
Experience gains (losses) on liabilities	18	1	(17)
Gains (losses) on changes of assumptions for scheme liabilities (based on long-term inflation of 2.8%)	311	(489)	(141)
	485	56	(43)
Less: amount attributable to the PAC with-profits sub-fund	(318)	(58)	36
Total	167	(2)	(7)

Non-recurrent credit (charge)

Shareholders' share of credit arising from reduction in level of assumed future discretionary increases for the Prudential Staff Pension Scheme (PSPS) for pensions in payment to 2.5%

35

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Year Ended December 31,

Losses on re-estimation of shareholders' share of deficits arising from the PPS (a)		(63)	
Strengthening in actuarial provisions for increase in ongoing contributions for future service of active scheme members (b)		(20)	
		(48)	
Total	167	(50)	(7)

(a)

Up to December 31, 2004, the deficits arising on the PPS had been assessed as being 80 per cent attributable to the PAC with-profits fund and 20 per cent to shareholder operations. In 2005, following additional analysis this apportionment was altered so that a ratio of 70/30 was applied to the PPS deficit at December 31, 2005. For 2006, the opening deficit of the PPS scheme has been allocated in the ratios 70/30 between the with-profits fund and shareholder-backed operations. The

Edgar Filing: PRUDENTIAL PLC - Form 20-F

ratio has continued to be applied to movements in the financial position that relate to opening assets and liabilities. However, the service charge and contributions for ongoing service are allocated by reference to the cost allocation for current business.

(b)

As a result of the April 2005 scheme valuation and subsequent discussions, the contribution levels for future ongoing service of active members will approximately double. The charge of £20 million in 2005 reflected the actuarial provision for this increase in future expenses for certain insurance contracts.

The Group uses a performance measure of operating profit based on longer-term investment returns, excluding charges for goodwill impairment and actuarial and other gains and losses on defined benefit pension schemes. The directors believe that this performance measure better reflects underlying performance. It is the basis used by management for the reasons outlined below. It is also the basis on which analysis of the Group's results has been provided to UK shareholders and the UK financial market for some years under long standing conventions for reporting by proprietary UK life assurers.

Longer-term investment returns included within the performance measure are determined by reference to expected long-term rates of return. These are intended to reflect historical rates of return on assets, and where appropriate, current inflation expectations adjusted for consensus economic and investment forecasts. The overriding reason for distinguishing longer-term investment returns from short-term fluctuations is that the investments are generally held for the longer-term to back long duration insurance contract liabilities and solvency capital rather than for short-term trading purposes.

Furthermore, the income statement recognition of investment appreciation, short-term value movements on derivatives, and the charge for the policyholder benefits under IFRS 4 give rise to accounting mismatches that are not representative of the underlying economic position.

Goodwill impairment charges reflect adverse changes in assessment in a given period as to whether the excess of the amount paid over the accounting value of acquired assets and liabilities is expected to be recoverable in the future. It is thus appropriate for such charges to be distinguished from current period operational performance.

Actuarial and other gains and losses on defined benefit pension schemes principally reflect short-term value movements on scheme assets and the effects of changes in actuarial assumptions. Under the Group's accounting policies these items are recorded within the income statement, rather than through other comprehensive income, solely due to the interaction of the Group's approach to adoption of IFRS 4 for with-profits funds and the requirements of IAS 19. In analyzing profit before shareholder tax the separate identification of these gains and losses is analogous to the more normal treatment of inclusion as a movement on other comprehensive income i.e. not within profit for the period.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following tables reconcile "Operating profit based on longer-term investment returns", the Group's chosen performance measure, to "Profit before shareholder tax attributable to shareholders", the Group's reported performance within the consolidated IFRS income statement by business segment and geography.

Group operating profit based on longer-term investment returns

Group operating profit based on longer-term investment returns from continuing operations in 2006 was £893 million, a reduction of 7 per cent compared to the 2005 operating profit of £957 million. This reduction is mainly caused by the loss of £157 million in 2006 by Egg (2005: £44 million profit). The 2006 operating profit amount includes £50 million of restructuring costs.

In 2005, Group operating profit based on longer-term investment returns from continuing operations was £957 million compared to £708 million in 2004. The higher profit in 2005 compared to 2004 primarily reflects strong growth in the insurance and fund management businesses.

Long-term operations

In the United Kingdom, operating profit based on longer-term investment returns increased 17 per cent to £469 million in 2006 compared to 2005. This reflects a 22 per cent increase in profits attributable to the with-profits business, which contributed £368 million reflecting the strong investment performance of the life-fund and its impact on terminal bonuses. In addition, the result benefited from a £46 million positive impact of changes in FSA reserving requirements for protection and unit-linked products. This was due to the FSA's relaxation of reserving requirements under the policy statement that effected the proposal in CP 06/16. The 2006 result includes restructuring costs of £31 million in respect of implementation costs associated with Prudential UK and Egg cost saving initiatives announced in July 2006.

Operating profit based on longer-term investment returns increased 31 per cent to £400 million in 2005 compared to 2004. This primarily reflected a 9 per cent increase in profits attributable to the with-profits business, a consequence of bonus declarations announced in February 2005 and February 2006, a 44 per cent increase in profits arising from the Group's annuities business, and profits arising from the Phoenix Life and Pensions transaction completed in June 2005.

In the United States, operating profit based on longer-term investment returns from long-term business was £398 million in 2006, up 13 per cent from £348 million in 2005. The US operations' results are based on US GAAP, adjusted where necessary to comply with IFRS as the Group's basis of presenting operating profit based on longer-term investment returns. In determining the US results, long-term returns for fixed income securities incorporate a risk margin reserve (RMR) charge for long-term defaults and amortization of interest-related realized gains and losses.

The increase primarily reflects an increase in fee and spread income over 2005. The improved spread income primarily reflects higher net average invested assets. Higher fee income was primarily driven by a 51 per cent increase in separate account assets given the growth in variable annuity sales, and an improvement in the average fees generated from those assets given the increase in election of high margin guaranteed optional benefits. Spread income included a number of items including mortgage prepayment fees, make-whole payments and total return swap income which together represent £33 million of spread in 2006, compared to £44 million in 2005, both net of DAC amortization.

Operating profit based on longer-term investment returns from long-term business was £348 million in 2005, up 18 per cent from £296 million in 2004.

In 2005, spread income was £119 million higher than in 2004, and included a number of items including mortgage prepayment fees, make-whole payments and total return swap income which together represented £60 million of spread income. The increase in fee income by Jackson during 2005 was driven by a 42 per cent increase in separate account in assets held at year end, with improved returns on these assets.

The 2004 result benefited from two one-off items, a favorable legal settlement of £28 million (£21 million after related charge to amortization of deferred acquisition costs) and positive £8 million adjustment arising from the adoption of new accounting guidance in SOP 03-01 "Accounting and Reporting by Insurance Enterprises for Certain Non-traditional Long Duration Contracts and for Separate Accounts". This adjustment relates to a change in the method of valuing certain liabilities.

Prudential Corporation Asia's operating profit based on longer-term investment returns for long-term business after development expenses attributable to the long-term business of £14 million, was £175 million in 2006 which is consistent with the operating profit, after development expenses of £20 million, of £175 million in 2005. This reflects the steady profits from the established markets of Singapore, Malaysia and Hong Kong with total IFRS operating profits of £139 million, and the increased contributions from Indonesia and Vietnam as they build scale. Four of Prudential's life insurance operations in Asia recorded losses in 2006, being China, India and Korea, which are relatively new businesses and are rapidly building scale, plus Thailand, which is marginally loss making.

Prudential Corporation Asia's operating profit based on longer-term investment returns for long-term business before development expenses of £20 million was £195 million in 2005, an increase of 67 per cent compared to 2004, and included a net £44 million profit related to exceptional items reported in the Group's interim results subsequently reduced by £14 million for restructuring costs in Japan. The majority of this profit came from the larger and more established operations of Singapore, Hong Kong and Malaysia, which accounted for £127 million of the total operating profit based on longer-term investment returns in 2005, excluding exceptional items, compared to £111 million in 2004. Five of Prudential's life insurance operations in Asia recorded losses in 2005 being China, India, Thailand, Taiwan and Japan.

Prudential Corporation Asia's development expenses (excluding the regional head office expenses) decreased by 25 per cent to £15 million in 2006, compared with £20 million in 2005. Of the £15 million (2005: £20 million), £14 million (2005: £20 million) relates to long-term business and £1 million (2005: nil) relates to fund management.

Within the net positive £30 million of exceptional items in 2005 as mentioned above for Prudential Corporation Asia, there was a write-off of DAC of £21 million. No write-off was required in 2006. The profits and recoverability of DAC in Taiwan are dependent on the rates of return earned and assumed to be earned on the assets held to cover liabilities and on future investment income and contract cash flows for traditional whole of life policies. If interest rates were to remain at current levels in 2007 the premium reserve, net of DAC, would be broadly sufficient. If interest rates were to remain at current levels in 2008 then some level of write-off of DAC may be necessary. However, the amount of the charge currently estimated to be £70-90 million is sensitive to the above mentioned variables.

Prudential Corporation Asia's development expenses (excluding the regional head office expenses) increased by 33 per cent to £20 million in 2005, compared with £15 million in 2004. These development expenses primarily related to our newer operations and establishing our services hub in Malaysia.

Broker-dealer and fund management business

M&G's operating profit based on longer-term investment returns was £202 million, an increase of 24 per cent compared to 2005. This included £27 million in performance-related fees ("PRF") and a £2 million charge for restructuring costs.

Underlying profits, excluding PRF, were £175 million for 2006, an increase of 26 per cent compared to the previous year. M&G delivered significant profit growth during 2006 on the back of rising market levels, strong net inflows and continued business diversification. PRF increased by 13 per cent over 2005, totaling £27 million for 2006, of which £5m was earned by PPM Capital.

M&G's operating profit based on longer-term investment returns was £163 million in 2005, an increase of 20 per cent compared to 2004. This included £24 million in performance-related fees (PRF), of which £17 million was earned by PPM Capital.

Underlying profit (excluding PRF) of £139 million in 2005 was 25 per cent higher than in 2004, which included £7 million of non-recurring provision releases. Adjusting for these releases gives a like-for-like increase in profit of 34 per cent compared to 2004. Profits growth in 2005 was largely due to the impact of higher asset prices in equity and property markets, combined with the impact of positive net inflows over a period of several years. In addition, discipline continued to be exercised over costs, which rose slightly in the year after four years in which they were held flat.

In the past few years, growth in income from M&G's existing businesses has been reinforced by the successful revenue streams from new activities. These include Prudential Finance, which manages Prudential's balance sheet for profit, private finance, including CDOs, and Prudential Property Investment Managers (PruPIM), which increasingly manages assets for external investors. In its retail businesses, sales of equity funds have risen significantly in both the United Kingdom, as a result of strong investment performance, and overseas, where M&G continues to build new distribution channels in selected European and other markets.

In the United States, operating profit based on longer-term investment returns for broker-dealer and fund management was £10 million, a decrease of 29 per cent compared to 2005. The 2005 result however, benefited from a one-off £5 million revaluation of an investment vehicle managed by PPM America ("PPMA"). Curian recorded losses of £8 million in 2006, down from £10 million in 2005, as the business continues to build scale. Curian's assets under management have grown from \$1.7 billion (£973 million) in 2005 to \$2.4 billion (£1,242 million) at year-end 2006.

In 2005, the United States improvement in broker-dealer and fund management profits was primarily driven by reduced losses recorded by Curian, down to £10 million in 2005 from £29 million in 2004, as the business continues to build scale. At year-end 2005, Curian had grown assets under management to \$1.7 billion (£973 million) from \$1.1 billion (£551 million) at year-end 2004. The result also benefited from an improvement in PPMA profits, primarily due to a one-off £5 million revaluation of an investment vehicle managed by PPMA.

Operating profit based on longer-term investment returns from Asian fund management operations increased by 308 per cent to £49 million in 2006 compared to 2005. This increase is driven by strong contributions from the established markets of Singapore and Hong Kong and also reflects the strengths of the Asia fund management's geographic and product diversification. Additionally, the 2005 operating profit based on longer-term investment returns included a negative £16 million of exceptional items.

Due to exceptional costs of £16 million in 2005 incurred due to bond fund restructuring, which was required as a result of industry-wide issues in Taiwan, profit from the Asian fund management operations decreased by 37 per cent compared to 2004. In 2005, underlying profit from the Asian fund management operations, excluding the £16 million charges, grew by 47 per cent to £28 million, a strong result Prudential believes is indicative of the economies of scale the business is now generating. Adjusting for the reporting of India at 49 per cent from August 26, 2005, when the entity started to be accounted for as a joint venture rather than as a subsidiary as a result of Prudential's sale of a 6 per cent holding, results in an increase in profits of 55 per cent over 2004.

At the Group level in 2005, profit before tax includes £6 million in profit attributable to realizing value created in India when ICICI increased its stake in Prudential's Indian asset management joint venture from 45 per cent to 51 per cent. This amount is included in short-term fluctuations in investment returns but excluded from operating profit based on longer-term investment returns.

Banking operations

In January 2007, Prudential concluded that its current banking business does not represent the best opportunity for it to drive profitable growth in the future and it announced that it had entered into a binding agreement to sell Egg to Citi. The sale completed on May 1, 2007, for a net cash consideration of £546 million, subject to finalization of the completion accounts.

Egg's operating loss before tax on continuing operations in 2006 was £157 million, compared with a £44 million profit in 2005. This result reflects a marked deterioration in industry-wide consumer behavior. This has resulted in a reduction of net borrowing on credit cards as consumers reduce their spending and borrowing. In addition, bad debt experience is considerably worse than expected, particularly in relation to personal loans.

During 2006, Egg made a number of changes to its lending approach. On unsecured loans, Egg's strategy was to tactically reduce its exposure and it tightened the acceptance criteria throughout the year. This resulted in a significantly reduced level of sales, and associated insurance income. Egg also changed its approach to management of the credit card book, and it adopted the standard, industry policy of charging variable interests rates in relation to a customer's expected risk profile.

Throughout the industry, 2006 saw an increase in the application of balance transfer fees therefore reducing the levels of balance transfer activity.

Egg's net interest income of £330 million increased 6 per cent in 2006 compared to £312 million in 2005. Slightly lower customer balances were offset by the effects of a higher interest rate environment.

Net non-interest income reduced by 36 per cent from £216 million in 2005 to £138 million in 2006 following a significant reduction in personal loan insurance income as Egg reduced its exposure to the unsecured loans business. Total new loan sales reduced to 83,000, which is approximately 50 per cent of the new volumes achieved in 2005. In addition, payment protection insurance ("PPI") penetration rates were far lower than that experienced in 2005. Other non-interest card income is lower than 2005, reflecting consumer spend patterns and continuing regulatory focus on the creditor insurance market, resulting in reductions in commission revenue earned.

Egg's loan book performance reflects the industry wide increase in consumers using individual voluntary arrangements, debt management companies and in some cases bankruptcy to alleviate their debt burden. Within the Egg personal loan portfolio, the number of customers employing debt management companies in the last quarter increased 18 per cent on the prior quarter. These arrangements typically result in lower recoveries from customers than have historically been achieved via Egg's collection strategies. The overall deterioration in credit led to the total charge for bad debts increasing by £143 million from £241 million in 2005 to £384 million in 2006. Restructuring costs of £12 million were incurred during 2006.

In 2006 Egg's operating profit before tax on continuing operations was £44 million, compared with £61 million in 2004. This primarily reflected the increasingly challenging market conditions and £10 million restructuring costs incurred in the first half of 2005.

In 2005, operating profit based on longer-term investment returns of the core UK banking business was £60 million. The reduction from £72 million in 2004 primarily reflected an increase of £59 million in bad debts due to the changing mix in the portfolio, business growth plus a deterioration in credit quality driven by economic factors across the UK unsecured lending market. These results were partially offset by a growth in income of £31 million and £17 million decrease in its cost base.

Unallocated Corporate

The operating loss based on longer-term investment returns increased by 27 per cent in 2006 to £253 million compared to £199 million in 2005. This reflected increased operating expenses from £

181 million in 2005 to £329 million in 2006 and an increase of 20 per cent in the amount of interest payable from £206 million in 2005 to £248 million in 2006. Head office costs (including Prudential's Asia regional head office costs of £36 million) were £119 million in 2006, up £19 million compared to 2005.

The operating result based on longer-term investment returns in 2005 remained constant over 2004. This reflected other income comprised of the interest earned on the net proceeds from the 2004 Rights Issue which was offset by higher interest payable. Head office costs (including Prudential's Asia regional head office costs of £30 million) were £100 million in 2005, up £20 million compared to 2004. The increase mainly reflects the substantial work being undertaken to comply with the requirements of the Sarbanes-Oxley Act and other regulatory compliance costs.

US GAAP Analysis

Prudential's consolidated financial statements have been prepared in accordance with IFRS, which differs in certain material respects from US GAAP. Information related to the nature and effect of such differences is presented in Notes J and K to Prudential's consolidated financial statements in this document.

The most significant difference in the results of operations between IFRS and US GAAP is the treatment of the with-profits business.

Under IFRS, profit attributable to shareholders in respect of Prudential's with-profits business reflects up to one-ninth of the value of bonuses paid to policyholders. To the extent the annual earnings of the with-profits fund exceed policyholder bonuses and related shareholder distributions, this excess is added to the unallocated surplus by a charge to the income statement. However, to the extent the annual earnings of the with-profits fund are less than policyholder bonuses and related shareholder distributions, the shortfall is transferred from the unallocated surplus.

Under US GAAP, the impact of pre-bonus operating results within the with-profits fund is reflected in net income in the period in which it occurs. However, 90 per cent of these results are allocated to with-profits policyholders by a charge to net income. The residual 10 per cent interest is allocated to shareholders.

This treatment of Prudential's with-profits fund under US GAAP causes profits attributable to shareholders to be strongly influenced by annual investment returns, particularly on equities. Annual investment returns include unrealized gains and losses and, accordingly, these returns and shareholders' profits will be subject to considerable volatility in the US GAAP figures.

Other material differences between IFRS and US GAAP results include the method of deferral and amortization of acquisition costs, accounting for real estate, revenue and claims recognition on certain investment type contracts, the measurement of and changes in policyholder benefits, and their related deferred income tax effects.

US GAAP Critical Accounting Policies

There are a number of differences between accounting policies under IFRS and US GAAP. The critical accounting policies under US GAAP most relevant to Prudential are set out below.

Provision for Policy Liabilities

The concept of providing for policy liabilities is consistent with that under IFRS, in that the liabilities are estimated using actuarial methods based on assumptions about premiums, interest rates, investment returns, expenses, mortality and surrenders. However, the underlying classification of policies, reserving methodology and assumptions are different.

For unitized with-profits life insurance and other investment-type policies, the liability is represented by the policyholders' account balances before any applicable surrender charges. Policyholder benefit liabilities for conventional with-profits life insurance and other protection-type insurance policies are developed using the net level premium method, with assumptions for interest, mortality, morbidity, withdrawals and expenses using best estimates at the date of policy issue plus provisions for adverse deviation based on group experience. When the policyholder benefit liability plus the present value of expected future gross premiums are insufficient to provide for expected future policy benefits and expenses, using current best estimate assumptions, deferred acquisition costs are written down and/or a deficiency liability is established by a charge to earnings.

The impact of changes would depend upon whether or not the liabilities being adjusted are for with-profits business, non-participating business of Prudential Annuities Limited (which is owned by the Prudential Assurance long-term fund) or shareholder financed long-term business operations.

For with-profits business, adjustments to liabilities and any related tax effects are recognized in the income statement. However, an amount equal to nine-tenths of the related increase or decrease in pre-bonus earnings of the with-profits fund is transferred to or from the Undistributed Policyholder Allocation. US GAAP shareholder profits are therefore only affected to the extent of one-tenth of the change in liabilities.

This effect also applies to changes in liabilities recorded in the income statement of Prudential Annuities Limited. In addition to the extent that movements in liabilities are recorded in Other Comprehensive Income under shadow accounting in respect of unrealized gains and losses in investments to the income statement, an amount equal to nine-tenths of the movement is recognized within Other Comprehensive Income as a consequential change to the Undistributed Policyholder Allocation. Net movements on Other Comprehensive Income for this item will therefore reflect only one-tenth of the gross change.

For shareholder financed long-term business operations, other than for exchange translation effects, changes to policy liabilities will be directly reflected in net income.

Treatment of With-profits Business

Under IFRS, as described in " Analysis by Business Segment and Geographic Region United Kingdom Basis of Profits" the shareholders' profit in respect of with-profits business represents an amount of up to one-ninth of the value of that year's bonus declaration to policyholders. As a consequence, current year amounts in respect of premiums, investment returns and operating expenses do not have an effect on the profit attributable to shareholders in that year. Consistent with this treatment, as mentioned in " IFRS Critical Accounting Policies", amounts retained within with-profits funds are accounted for as unallocated surplus which, under the Company's basis of adopting IFRS, is accounted for as a liability.

For US GAAP purposes, the provision for the policyholders' share of earnings on with-profits business charged to income represents 90 per cent of the current year's pre-bonus earnings, before income taxes. As a result, reported profit is directly impacted by current year amounts in respect of premiums, investment returns and operating expenses. As most investments of with-profits operations are accounted for on a trading basis, the shareholders' 10 per cent share of the pre-bonus earnings is likely to be highly volatile from year to year as a result of the fluctuations in investment markets.

Investment Classification and Returns

All investment returns for long-term insurance business are accounted for on a trading basis except primarily for Jackson and UK annuity business (other than with-profits) which are accounted for on an available-for-sale basis. Accordingly investment returns reported in the income statement include the

unrealized gains and losses of the investments accounted for on a trading basis. This reflects the fact that policyholder benefits, in particular for with-profits business, include the impact of unrealized appreciation over time through the bonus mechanism.

In 2005, the Group changed the valuation bases for certain investment securities from applying the mid market value to applying the bid market value as fair value. This change has the impact of increasing net income by £6 million and reducing other comprehensive income and shareholders' equity by £10 million and £88 million, respectively, in the year ended December 31, 2005.

Impairment of Assets

The Group conducts regular impairment reviews in respect of those investment securities held on an available-for-sale basis. The Group considers indicators, such as serious downgrades in credit ratings, breach of covenants or failure to make interest payments, that may suggest that interest and principal may not be paid in full. Any impairment losses that are not considered temporary are recognized in the income statement. In assessing the fair value for impairment testing purposes where third party information is not available, the Group performs alternative valuation techniques, including discounted cash flow analysis, option-adjusted spread models, and enterprise valuation.

Among the factors considered is whether the decline in fair value results from a change in the quality of the security itself, or from a downward movement in the market as a whole, and the likelihood of recovering the carrying value based on the current and short term prospects of the issuer. Unrealized losses that are considered to be primarily the result of market conditions, such as increasing interest rates, unusual market volatility or industry-related events, and where the Group also believes there exists a reasonable expectation for recovery and, furthermore, it has the intent and ability to hold the investment until maturity or the market recovers, are usually determined to be temporary.

Deferred Acquisition Costs

Commissions, sales force direct costs and costs associated with policy issue and underwriting that vary with and are primarily related to the production of new and renewal contracts are deferred. Deferred acquisition costs are regularly evaluated for recoverability and amounts determined not to be recoverable are charged to income. Deferred acquisition costs for conventional with-profits life insurance and other protection-type insurance policies are amortized in relation to premium income using assumptions consistent with those used in computing policyholder benefit provisions. Deferred acquisition costs for unitized with-profits life insurance and investment-type policies are amortized in relation to expected gross profits. Expected gross profits are evaluated regularly against actual experience and revised estimates of future gross profits and amortization are adjusted for the effect of any changes. Deferred acquisition costs associated with internally replaced policies are written off in the year replacement occurs and the incremental commissions and selling costs of the replacement contract are capitalized and amortized over the life of the replacement policy.

The deferral and amortization of deferred acquisition costs is of most relevance to the Group's reported profits for shareholder financed long-term business operations, principally Jackson in the United States. For shareholder financed long-term business operations, the full accounting impact of deferring and amortizing deferred acquisition costs is taken to net income. In 2006, 2005 and 2004, the amortization of deferred acquisition costs were at expected levels and, except for a £21 million write down in the Taiwan life operation in 2005, no significant deferred acquisition cost asset impairments were recorded in any of the years.

For with-profits funds, the shareholder impact of the accounting policy for acquisition costs is limited to 10 per cent of the direct income statement and balance sheet effect due to 90 per cent of the excess of US GAAP basis assets (including deferred acquisition costs) over liabilities in the funds being allocated to the Undistributed Policyholder Allocation. Accordingly, after this allocation, income before

tax includes effectively only 10 per cent of the amortization of deferred acquisition costs and shareholders' equity includes effectively only a 10 per cent shareholder interest in the balance sheet carrying value of deferred acquisition costs.

Deferred Income Tax

Deferred taxes are provided under the liability method for all temporary differences except for undistributed earnings of foreign subsidiaries that are not expected to be remitted for an indefinite period. Deferred tax assets are recognized subject to adjustment for valuation allowances when it is more likely than not that the underlying tax benefit will not be realized.

In the United Kingdom the taxation regime applies separate rules to trading and capital profits and losses. The distinction between timing differences that arise from items of either a capital or trading nature may affect the recognition of deferred tax assets under IAS 12 "Income Taxes" and similarly under FAS 109 "Accounting for Income Taxes".

For the 2006 results and balance sheet position at December 31, 2006, the possible net tax benefit of approximately £333 million which may arise from capital losses valued at approximately £1.7 billion, is sufficiently uncertain that it has not been recognized. Similarly, a potential deferred tax asset of £71 million, which may arise from trading losses of approximately £245 million, is sufficiently uncertain that it too has not been recognized.

Derivative Financial Instruments

Under US GAAP, derivative financial instruments may only be accounted for as hedges where they are appropriately documented and comply with the strict criteria as required by FAS 133 "Accounting for Derivative Instruments and Hedging Activities". Derivative financial instruments held by the Group's with-profits operations are generally entered into for the purposes of efficient portfolio management rather than as hedges. Consistent with the accounting treatment of other investment assets of with-profits funds, the movements in the fair value of derivative financial instruments are recognized in the income statement with shareholders net income reflecting, as part of the 10 per cent of pre-bonus earnings of the fund, 10 per cent of the movement in the values of the derivative instruments.

For the Group's shareholder financed long-term business operations, principally Jackson, which accounts for investments under FAS 115 "Accounting for Certain Investments in Debt and Equity Securities" on an available-for-sale basis, the impact of temporary movements in the values of these investments are recorded within Other Comprehensive Income. However, although Jackson uses derivatives (primarily interest rate swaps) to hedge certain risks in conjunction with its asset/liability program, it has elected not to incur the costs of restructuring its derivative contracts, segregating investment portfolios and adding the systems personnel required to qualify for hedge accounting treatment on an ongoing basis. Accordingly, value movements on its derivative financial instruments are recognized in income while the largely offsetting change in fair value of hedged investments are reflected in other comprehensive income in the balance sheet as unrealized gains and losses.

Scottish Amicable Insurance Fund ("SAIF")

The SAIF sub-fund is a ring-fenced sub-fund of Prudential Assurance's long-term fund that was formed following the acquisition of the mutual Scottish Amicable Life Assurance Society in 1997. No new business may be written in SAIF, although regular premiums are still being paid on policies that were in force at the time of acquisition and "top-ups" are permitted on these policies. This fund is solely for the benefit of those Scottish Amicable Life Assurance Society policyholders whose policies were transferred to SAIF. All investments held by the SAIF sub-fund and all future earnings arising in the fund are to be equitably distributed to qualifying SAIF policyholders over the lifetime of these policies.

Shareholders have no interests in the profits of this fund, although they are entitled to the management fees paid on this business.

For IFRS purposes, no effect on shareholders' equity is recorded for SAIF, reflecting the sole interests of policyholders in the performance of the fund. Under US GAAP, SAIF does not qualify for separate account treatment under SOP 03-1 "Accounting and Reporting by Insurance Enterprises for Certain Non traditional Long Duration Contracts and for Separate Accounts" which was adopted in 2004. All of SAIF's assets and liabilities are recorded under the general accounts under US GAAP. Except for real estate, all SAIF's assets are recorded at fair value. Real estate is valued at depreciated historic cost.

Changes in Net Income on Application of US GAAP

The following table analyzes the adjustments to consolidated net income in accordance with IFRS on application of US GAAP for the operations and periods indicated.

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Consolidated profit attributable to equity holders of the Company in accordance with IFRS	874	748	517
US GAAP adjustments:			
With-profits fund	367	697	332
Other operations	(536)	(253)	(758)
	(169)	444	(426)
Net income in accordance with US GAAP	705	1,192	91
Comprising:			
Net income from continuing operations after minority interests	704	1,206	697
Net loss from discontinued operations including profit on disposals		(14)	(88)
Cumulative effect of changes in accounting principles	1		(518)
	705	1,192	91

On a US GAAP basis, consolidated net income totaled £705 million, £1,192 million and £91 million in 2006, 2005 and 2004, respectively. Consolidated net income on a US GAAP basis was £169 million lower in 2006, £444 million higher in 2005 and £426 million lower in 2004 than consolidated profit under IFRS.

The US GAAP adjustments to IFRS consolidated net income in respect of the with-profits fund were increases of £367 million, £697 million and £332 million in 2006, 2005 and 2004, respectively. The table

below analyzes the shareholders' 10 per cent interest in the adjustments to the Prudential Assurance long-term with-profits fund's results, as reflected above.

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
US GAAP adjustments:			
Real estate	(58)	(54)	(84)
Securities	83	(69)	(28)
Deferred acquisition costs	(6)	(20)	(1)
Policy liabilities	165	701	110
Pension plans	(34)	(34)	(4)
Movement in IFRS basis excess assets over liabilities	227	179	351
Other	(26)	8	0
Deferred tax effect of the above adjustments	16	(14)	(12)
	367	697	332

The adjustment for policy liabilities and deferred acquisition costs in 2005 compared to 2004 reflects the application in 2005 of UK accounting standard FRS 27, "Life Assurance" ("FRS 27") as an improvement in the Group's accounting for UK regulated with-profits funds as allowed under IFRS 4, "Insurance Contracts". FRS 27 follows closely the requirements of the UK Financial Services Authority's new 'realistic regime'. FRS 27 requires the de-recognition of deferred acquisition costs for the UK with-profits fund and the inclusion of 'realistic' basis liabilities for the policy liabilities. The Group has taken advantage of the provisions of IFRS 4 in 2005 that allow the 2004 comparative net income not to be adjusted for this improvement. The US GAAP adjustments for policy liabilities of £165 million in 2006 and £701 million in 2005 reflect the replacement of the "realistic" basis of measurement of with-profits liabilities under IFRS with the US GAAP treatment. The "realistic" basis is overall more prudent and volatile than the US GAAP treatment.

The increase in the US GAAP adjustment for movement in the IFRS basis excess of assets over liabilities (represented by the transfer from or to the unallocated surplus) from £179 million in 2005 to £227 million in 2006 and the decrease from £351 million in 2004 to £179 million in 2005, primarily reflected the impact of the movement in the investment return and the movement in the "realistic" basis of measurement with-profits liabilities over the period.

The other main effects of accounting for the income and expenditure of the with-profits fund on a US GAAP basis are:

exclusion of the unrealized appreciation for investment properties and inclusion of depreciation on investment properties;

exclusion of the unrealized appreciation and depreciation for securities classified as available-for-sale under US GAAP but classified as fair value through the profit and loss under IFRS. This adjustment has been affected by the adoption of IAS 39 "Financial Instruments: Recognition and Measurement" on January 1, 2005 for the changes in the valuation bases of certain investments; and

adjustments to the accounting basis of the Group's defined benefit pension plans.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table analyzes the US GAAP adjustments for other operations.

	Year Ended December 31,		
	2006	2005	2004
	(In £ Millions)		
Business acquisitions and investments in associates	(30)	(37)	
Real estate:			
Investment results	(135)	(224)	(203)
Cumulative effect of change in accounting principle			(638)
Securities	532	(496)	(78)
Derivative instruments	22	(61)	149
Revenue and expense recognition	(463)	(265)	(433)
Deferred acquisition costs	88	220	104
Policy liabilities	(427)	295	160
Profit on disposals			(5)
Pension plans	(172)	103	(6)
Other	11	(24)	12
Deferred tax effect:			
Cumulative effect of change in accounting principles			117
Other adjustments above	38	236	63
	(536)	(253)	(758)

The US GAAP adjustments for business acquisitions and investments in associates primarily reflect the reversal of the results of the CDO funds which met the consolidation criteria under IFRS but not under US GAAP. In addition, the adjustments in 2005 also reflected the lower goodwill impairment charge to Prudential's Japanese business made under IFRS.

The US GAAP adjustments for real estate primarily reflect the exclusion of the unrealized appreciation for investment properties and inclusion of depreciation on investment properties. Upon adoption of SOP 03-1 in 2004, certain land and buildings, previously reported at fair value within separate account, were reclassified to the general account at depreciated historic cost. This resulted in a transitional charge of £638 million gross of tax in 2004 to reflect the accumulated depreciation and reversal of unrealized gains on the land and buildings. The tax credit relating to this charge is £117 million resulting in an overall net of tax charge of £521 million in 2004.

The US GAAP adjustments for 2006 and 2005 on securities primarily reflect the exclusion from the income statement of the unrealized appreciation and depreciation for certain securities classified as available-for-sale under US GAAP, but accounted for as fair value through profit and loss under IFRS. In 2004, the adjustments primarily related to the debt securities of Jackson and the Group's shareholder-backed annuities business. Following the adoption of IAS 39 in 2005, Jackson's debt securities are carried on an available-for-sale basis for IFRS reporting which is similar to US GAAP. The 2004 comparatives were not restated as permitted under IFRS.

The US GAAP adjustments relating to derivative instruments from 2005 onwards were also affected by the adoption of IAS 39 on January 1, 2005. Derivatives previously carried at amortized cost in 2004 are carried at fair value from January 1, 2005 with movements being booked in the income statement similar to US GAAP. The US GAAP adjustments in 2006 and 2005 reflect the difference in the designation and effectiveness testing criteria for hedges applied under IFRS and US GAAP reporting.

The US GAAP adjustments for revenue and expense recognition primarily reflect the deferral of premiums and policy charges relating to future periods in respect of investment contracts with discretionary participation features and investment and universal life products classified as insurance

under IFRS. Under IFRS these considerations and related expenses are, on recognition, recorded within the income statement. The IFRS to US GAAP adjustments for deferred acquisition costs primarily relate to differences in what is allowed to be capitalized as an asset, associated recoverability tests and amortization profiles. See Notes J and K of the notes to Prudential's consolidated financial statements for further discussion.

Profit on sale of Jackson Federal Bank in 2004 on a US GAAP basis was £5 million lower than on an IFRS basis. The difference reflects the accumulated goodwill amortization under IFRS as at January 1, 2004.

The US GAAP adjustment relating to share-based payment is included within Other adjustments in the table above. The adoption of FAS 123(R) "Share-based Payment" under US GAAP by the Group on January 1, 2006 has affected the IFRS to US GAAP adjustments for stock-based compensation. Under IFRS, the Group recognizes an expense, measured at fair value, in respect of all share-based payments the Group makes. Under FAS 123(R), where the Group has adopted the modified prospective application, the requirements of FAS 123(R) are applied to all awards granted after January 1, 2006, and to awards modified, repurchased or cancelled after that date. Additionally, FAS 123(R) also applies to the awards granted after January 1, 1995 and which have not vested by January 1, 2006. FAS 123(R) requires compensation costs for share-based payments to employees to be recognized based on the grant-date fair value of the award for financial statement. In 2006, compensation expense of £22 million was recorded under FAS 123(R) which is similar to the amount recorded under IFRS. In addition, the Group has also recorded a one-time cumulative effect adjustment of a credit of £1 million.

Changes in Shareholders' Equity on Application of US GAAP

The following table shows the adjustments in shareholders' equity from IFRS to consolidated shareholders' equity under US GAAP for the operations and periods indicated.

	At December 31,	
	2006	2005
	(In £ Millions)	
Shareholders' equity in accordance with IFRS	5,488	5,194
US GAAP adjustments:		
With-profits fund	2,504	2,136
Other operations	(788)	(137)
	1,716	1,999
Shareholders' equity in accordance with US GAAP	7,204	7,193

Shareholders' equity was greater under US GAAP than IFRS in 2006 and 2005 by £1,716 million and £1,999 million, respectively. The greater equity in respect of with-profits business was £2,504 million at December 31, 2006 and £2,136 million at December 31, 2005. This difference reflects the attribution to shareholders of a 10 per cent interest in the excess of assets over liabilities held within the with-profits fund.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table analyzes the shareholders' 10 per cent interests in adjustments to the with-profits fund as reflected above.

	At December 31,	
	2006	2005
	(In £ Millions)	
US GAAP adjustments:		
Real estate	(641)	(584)
Revenue and expense recognition	(131)	(119)
Deferred acquisition costs	196	205
Policy liabilities	2,037	1,826
IFRS basis excess of assets over liabilities	1,058	834
Pension plans	9	18
Other	16	19
Deferred tax effect of the above adjustments	(40)	(63)
	2,504	2,136

Under IFRS, the excess of assets over liabilities within the with-profits fund is not allocated between policyholders and shareholders. Under US GAAP, shareholders are credited with a 10 per cent interest in the adjusted excess of assets over liabilities.

The other main effects of accounting for the assets and liabilities of the with-profits fund on a US GAAP basis are:

adjustments to policy liabilities. Following the voluntary application of UK accounting standard FRS 27 on January 1, 2005, as allowed under IFRS 4, with-profits liabilities are measured on a "realistic" basis. This basis, derived from UK regulatory reporting, is more prudent than the analogous US GAAP treatment for Prudential's UK with-profits business;

write-down of real estate values in respect of investment properties from market value under IFRS to depreciated historic cost under US GAAP;

adjustments to revenue and expense recognition and deferred acquisition costs, and

pension scheme accounting. The US GAAP adjustments to IFRS in 2006 is impacted by the adoption of FAS 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" an amendment of FASB Statements No. 87, 88, 106 and 132(R)" on December 31, 2006. See Notes J and K to the financial statements for further details.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The following table analyzes US GAAP adjustments to shareholders' interests in other operations.

	At December 31,	
	2006	2005
	(In £ Millions)	
Business acquisitions and investments in associates	565	416
Real estate	(1,204)	(1,068)
Derivative instruments	10	(6)
Revenue and expense recognition	(1,896)	(1,472)
Deferred acquisition costs	899	846
Policy liabilities	265	683
Pension plans	199	260
Other	7	(9)
Deferred tax effect of the above adjustments	367	213
	(788)	(137)

For other operations, shareholders' equity on a US GAAP basis was £788 million and £137 million lower than on an IFRS basis at December 31, 2006, and December 31, 2005, respectively.

The principal reasons for the differences in consolidated shareholders' equity under US GAAP compared to consolidated shareholders' equity under IFRS are:

capitalization of goodwill on acquisitions prior to 1998 and discontinuance of goodwill amortization under FAS 142 from January 1, 2002 (subject to any impairments that may have arisen);

write-down of real estate values in respect of investment properties from market value under IFRS to depreciated historic cost under US GAAP;

the adjustments to revenue and expense recognition in respect of investment contracts with discretionary participation features and investment/universal life products classified as insurance under IFRS, deferred acquisition costs and insurance liabilities; and

pension scheme accounting. The US GAAP adjustments to IFRS in 2006 is impacted by the adoption of FAS 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" an amendment of FASB Statements No. 87, 88, 106 and 132(R)" on December 31, 2006. See Notes J and K to the financial statements for further details.

Available-for-Sale Debt and Equity Securities

For US GAAP purposes, the Group has classified certain debt, other fixed income and equity securities principally in relation to Jackson and the UK annuity business as available-for-sale. Securities classified as available-for-sale are carried at fair value and changes in unrealized gains and losses are reflected in accumulated other comprehensive income in shareholders' equity. Impairments in the value

of available-for-sale securities that are considered other than temporary are reflected as realized losses in net income. The Group's available-for-sale investments at December 31, 2006 and 2005 were as follows:

	Amortized Cost or Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Estimated Fair Value
(In £ Millions)				
December 31, 2006				
Fixed maturities available-for-sale				
UK government securities	3,327	135	(18)	3,444
US government and other governments	2,538	156	(20)	2,674
Local government securities	632	32	(2)	662
Corporate securities	34,294	1,661	(323)	35,632
Mortgage-backed securities	4,053	47	(58)	4,042
Other debt securities	1,158	20	(4)	1,174
	<u>46,002</u>	<u>2,051</u>	<u>(425)</u>	<u>47,628</u>
Total fixed maturities available-for-sale				
Equity securities available-for-sale	408	94	(1)	501
	<u>46,410</u>	<u>2,145</u>	<u>(426)</u>	<u>48,129</u>
Total available-for-sale fixed maturities and equity securities				
December 31, 2005				
Fixed maturities available-for-sale				
UK government securities	3,739	305		4,044
US government and other governments	2,034	228	(3)	2,259
Local government securities	515	37	(1)	551
Corporate securities	35,879	2,900	(224)	38,555
Mortgage-backed securities	3,790	43	(68)	3,765
Other debt securities	1,516	15	(6)	1,525
	<u>47,473</u>	<u>3,528</u>	<u>(302)</u>	<u>50,699</u>
Total fixed maturities available-for-sale				
Equity securities available-for-sale	513	96	(1)	608
	<u>47,986</u>	<u>3,624</u>	<u>(303)</u>	<u>51,307</u>
Total available-for-sale fixed maturities and equity securities				

Fair value for listed securities or otherwise actively traded securities is based on their quoted market price. The Group's determination of fair value for unlisted or inactively traded securities without a readily ascertainable market value is generally based on values provided by independent sources, including broker-dealer provided estimates. Where third party information is not available, the Group performs alternative valuation techniques, including discounted cash flow analysis, option-adjusted spread models, and enterprise valuation. At December 31, 2006 and 2005, available-for-sale securities without a readily ascertainable market value having a cost of £8,933 million and £9,243 million, respectively, had an estimated fair value of £9,489 million and £9,974 million, respectively.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

As of December 31, 2006 and 2005, the amount of gross unrealized losses and related fair value, by investment type included in accumulated other comprehensive income in shareholder's equity, was as follows:

	December 31, 2006		December 31, 2005	
	Estimated Fair Value	Gross Unrealized (Losses)	Estimated Fair Value	Gross Unrealized (Losses)
(In £ Millions)				
Fixed maturities available-for-sale				
UK government securities	1,341	(18)	98	
US government and other governments	1,459	(20)	557	(3)
Local government securities	117	(2)		(1)
Corporate securities	13,737	(323)	9,232	(224)
Mortgage-backed securities	1,760	(58)	1,790	(68)
Other debt securities	1,244	(4)	1,584	(6)
	19,658	(425)	13,261	(302)
Equity securities available-for-sale		(1)		(1)
	19,658	(426)	13,261	(303)

The majority of fixed maturities in the Group's portfolio are rated by external rating agencies. Fixed maturities are considered investment grade if they carry a rating of BBB-/Baa3 or better. For fixed maturities in an unrealized loss position at December 31, 2006, 91 per cent (based on fair value) were investment grade, 3 per cent were below investment grade and 6 per cent were not rated. For fixed maturities in an unrealized loss position at December 31, 2005, 81 per cent were investment grade, 7 per cent were below investment grade and 12 per cent were not rated. At December 31, 2006 and 2005, unrealized losses from fixed maturities that were below investment grade or not rated represented approximately 14 per cent and 28 per cent, respectively, of gross unrealized losses on available-for-sale fixed maturities.

Corporate fixed maturities in an unrealized loss position were diversified across industries. As of December 31, 2006, the industries representing the larger unrealized losses included financial services (23 per cent of fixed maturities gross unrealized losses) and energy and utilities (9 per cent). As of December 31, 2005, the industries representing the larger unrealized losses included financial services (11 per cent of fixed maturities gross unrealized losses) and industrial and manufacturing (8 per cent). The Group had no material unrealized losses on individual fixed maturities or equity securities at December 31, 2006 or 2005.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

As of December 31, 2006 and 2005, the amounts of gross unrealized losses for fixed maturities and equity securities continuously in an unrealized loss position for the time periods indicated are shown in the table below.

December 31, 2006				
Fixed Maturities				
Not Rated	Non-investment Grade	Investment Grade	Equity Securities	Total
(In £ Millions)				
Less than six months	(2)	(3)	(153)	(158)

	<u>At December 31,</u>	
	<u> </u>	<u> </u>
Total gross unrealized losses	(425)	(302)

Realized Losses

The following table sets out certain additional information relating to sales and realized losses on available-for-sale securities sold at a loss and impairment losses recognized:

	2006	2005
	(In £ Millions)	
Sales proceeds	1,833	975
Gross realized losses on sales	(136)	(57)
Impairment losses	(27)	(24)
Gross realized losses	(163)	(81)

The Group periodically reviews its fixed maturities and equity securities to determine if any decline in fair value below the carrying value is "other than temporary" on a case-by-case basis. If it is determined that a decline in value of an investment is temporary, the decline is recorded as an unrealized loss in accumulated other comprehensive income in shareholders' equity pursuant to FASB Statement 115, "Accounting for Certain Investments in Debt and Equity Securities". If the decline is considered to be other than temporary, a realized loss is recorded in the Consolidated Statement of Income.

Securities with declines in value generally to less than 80 per cent of cost and other securities the Group determines are under performing or potential problem securities are subject to regular review. To facilitate the review, securities with significant declines in value, or where other objective criterion evidencing credit deterioration have been met, are included on a watch list. Among the criteria for securities to be included on a watch list are credit deterioration which has led to a significant decline in value of the security, a significant covenant related to the security has been breached, an issuer has filed or indicated a possibility of filing for bankruptcy, has missed or announced it intends to miss a scheduled interest or principal payment, or has experienced a specific material adverse change that may impair its credit worthiness.

In performing reviews, the Group considers the relevant facts and circumstances relating to each investment and must exercise considerable judgment in determining whether a security is other than temporarily impaired. Among the factors considered is whether the decline in fair value results from a change in the quality of the security itself, or from a downward movement in the market as a whole, and the likelihood of recovering the carrying value based on the current and short term prospects of the issuer. Unrealized losses that are considered to be primarily the result of market conditions, such as increasing interest rates, unusual market volatility or industry-related events, and where the Group also believes there exists a reasonable expectation for recovery and, furthermore, has the intent and ability to hold the investment until maturity or the market recovery, are usually determined to be temporary.

The Group applies the provisions of EITF 99-20, "Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets" when evaluating whether impairments on its structured securities, including asset-backed securities and collateralized debt obligations, are other than temporary. The Group regularly reviews future cash flow assumptions and in accordance with EITF 99-20 if there has been an adverse change in estimated cash flows to be received from a security, an impairment is recognized in net income. For privately placed structured securities, impairment amounts are based on discounted cash flows.

The risks inherent in reviewing the impairment of any investment include the risk that market results may differ from expectations; facts and circumstances may change in the future and differ from estimates and assumptions; or the Group may later decide to sell the security as a result of changed circumstances.

For 2006, other than temporary impairment losses recognized amounted to £27 million. Approximately 71 per cent of the impairment losses were recorded on structured asset-backed securities, primarily due to reduced cash flow expectations on such securities that are collateralized by diversified pools of primarily below investment grade securities. Approximately 27 per cent of these losses related to the impairments of fixed maturities of these individual corporate issuers, including one operating in the industrial and manufacturing industry, an automotive issuer and an information technology issuer. The market value of the industrial and manufacturing issuer was written down to reflect continued depressed trading levels and a poor liquidity position. Both the automotive and information technology issuers experienced deteriorating trading performances with the information technology issuer exchanging senior notes into common equity, deteriorating the value of stockholders.

For 2005, other than temporary impairment losses recognized amounted to £24 million. Approximately 28 per cent of the impairment losses were recorded on structured asset-backed securities, primarily due to reduced cash flow expectations on such securities that are collateralized by diversified pools of primarily below investment grade securities. Approximately 53 per cent of these losses related to the impairments of fixed maturities of five individual corporate issuers, including two operating in the automotive industry, two industrial and manufacturing issuers and a financial service issuer. The market value of the automotive issuers were written down to reflect continuing depressed trading levels due to rising fuel and labor costs. Both industrial and manufacturing issuers experienced deteriorating trading performances with one of the issuers failing to find a buyer even after significant cost reductions and debt restructuring.

To the extent factors contributing to the impairment losses recognized in 2006 and 2005 affected other investments, such investments were reviewed for other than temporary impairment and losses were recorded if appropriate.

There are inherent uncertainties in assessing the fair values assigned to Prudential's investments and in determining whether a decline in market value is other than temporary. Prudential's review of fair value involves several criteria including economic conditions, credit loss experience, other issuer-specific developments and future cash flows. These assessments are based on the best available information at the time. Factors such as market liquidity, the widening of bid/ask spreads and a change in the cash flow assertions can contribute to future price volatility. If actual experience differs negatively from the assumptions and other considerations used in the consolidated financial statements, unrealized losses currently in accumulated other comprehensive income may be recognized in the statement of operations in future periods.

In 2006 the group realized gross losses on sales of available-for-sale securities of £136 million. Approximately 35 per cent of these losses related to the disposal of fixed maturities of 16 individual issuers, which were disposed of as a result of changed circumstances. These included the significant reduction of a drugs and healthcare holding which was going ahead with a leveraged buyout of another company resulting in the holding's gearing increasing, reducing the exposure of a telecommunications holding as a result of a pending merger with another telecommunications holding, and the deteriorating credit fundamental faced by other industry holdings which resulted in an uncertainty regarding the future value of their securities. Significant losses were realized on a drugs and healthcare holding (£6 million), a food producing holding (£3 million), investments in nine UK government bonds (£15 million) and three foreign government bonds (£7 million), a telecommunications holding (£3 million) and nine other industry holdings (£13 million).

In 2005, the Group realized gross losses on sales of available-for-sale securities of £57 million. Approximately 54 per cent of these losses related to the disposal of fixed maturities of 14 individual issuers, which were disposed of as a result of changed circumstances. These included disposals to rebalance the portfolio in the US Operations, in particular reducing exposure in the US automotive industry, and the deteriorating credit fundamental faced by other industry holdings which resulted in an

uncertainty regarding the future value of their securities. Significant losses were realized on four automotive holdings (£12 million), two financial service holdings (£5 million), investments in three UK Government bonds (£5 million), an energy and utilities holding (£2 million), and four other industry holdings (£7 million).

The Group currently intends to hold available-for-sale securities with unrealized losses not considered other than temporary until they mature, or recover in value. However, if the specific facts and circumstances surrounding a security or the outlook for its industry sector change, the Group may sell the security and realize a loss. Of the gross realized losses on sales of available-for-sale securities during 2006, 28 per cent arose from securities that had been in an unrealized loss position for less than six months, 58 per cent for six months to one year and 14 per cent for more than one year. Of the gross realized losses on sales of available-for-sale securities during 2005, 30 per cent arose from securities that had been in an unrealized loss position for less than six months, 27 per cent for six months to one year and 43 per cent for more than one year.

US GAAP Restructuring Analysis

In 2001, Prudential announced the restructuring of the direct sales force and customer service channels of its UK Insurance Operations. These changes also included a simplification of the organizational structure and plans for a significant reduction in operating costs. For US GAAP purposes, during 2006, costs of £6 million were paid, £4 million were released and an additional £17 million was provided. During 2005, costs of £8 million were paid, £8 million were released and an additional £1 million was provided. During 2004, £2 million of termination and redundancy costs were expensed. The restructuring provision held under US GAAP at December 31, 2006 was £37 million all related to property charges.

In 2002, Prudential announced plans to establish an off-shore service center in India to improve customer contact service levels for its UK Insurance Operations customers and to achieve further cost savings to those announced in 2001. During 2004, an unused provision for termination and redundancy costs of £9 million was released to the statement of income, and an additional provision of £1 million was expensed for other transition and system related costs. During 2005, £1 million was paid leaving no restructuring provision held at December 31, 2005.

In December 2005, the Group announced an initiative for UK Operations to work more closely with Egg and M&G and in the process facilitate the realization of substantial annualized pre-tax cost savings and opportunities for revenue synergies. For US GAAP purposes, during 2006 £39 million was provided and costs of £23 million were paid. The restructuring provision held under US GAAP at December 31, 2006 was £16 million.

In 2004 Egg announced its withdrawal from the French market. For US GAAP purposes, during 2006, no costs were expensed. During 2005, other operating costs of £13 million were expensed. During 2004, £100 million was expensed, of which £25 million related to termination and redundancy costs and £75 million to other associated costs. The restructuring provision held under US GAAP for this restructuring at December 31, 2006 remains at £1 million.

Additionally in 2006, as a result of the UK and Egg initiative described above, a provision of £11 million was setup of which £8 million was used leaving a provision of £3 million at December 31, 2006.

In 2005, the Company's Japanese operations closed its Financial Advisor distributions channel. A £10 million provision was expensed relating to closure costs and a voluntary early retirement program for the employees. During 2006, costs of £10 million were paid, leaving no restructuring position held at December 31, 2006.

New US Accounting Pronouncements

Several new US accounting standards were issued during 2006 and 2005 that are pertinent to Prudential's US GAAP consolidated financial statements. These are discussed in detail in Note K of the notes to Prudential's consolidated financial statements.

Liquidity and Capital Resources

Prudential operates a central treasury function, which has overall responsibility for managing the Group's capital funding program as well as its central cash and liquidity positions. Prudential arranges the financing of each of its subsidiaries primarily by raising external finance either at the Prudential parent company level (including through finance subsidiaries whose obligations the parent company guarantees) or at the operating company level. Egg had its own treasury function to manage its cash and liquidity positions.

Group Cash Flow

The Group holding company's principal cash requirements are the payment of dividends to shareholders, the servicing of debt, the payment of group activity expenses and investment in businesses.

The Group holding company received £596 million in cash remittances from business units in 2006, compared with £517 million in 2005. These remittances primarily comprise dividends from business units and the prior year's shareholders' statutory transfer from the PAC long-term with-profits fund (UK Life Fund). In 2005, the last of three special dividends of £100 million was paid from the PAC shareholders' funds to the Group holding company in respect of profit arising from earlier business disposals.

After dividends and interest paid, there was a net cash inflow of £160 million in 2006, compared with a net inflow of £79 million in 2005.

During 2006, the Group holding company paid £67 million in respect of corporate activities and received £122 million in respect of Group relief on taxable losses.

In 2006, the holding company invested £319 million in its business units, comprising £172 million in its UK Insurance Operations and £147 million in Asia.

In aggregate, this gave rise to a decrease in cash of £104 million, compared to a decrease of £298 million in 2005.

Liquidity Requirements

Dividend Payments

Total dividends proposed and paid by Prudential were £398 million and £378 million for the years ended December 31, 2006 and 2005, respectively. The final dividend in respect of the year ended December 31, 2006 was £287 million of which £115 million was allocated as scrip dividends. The dividend was paid on May 22, 2007.

Debt Service Costs

Debt service costs in respect of core borrowings paid by Prudential in 2006 were £177 million, compared with £175 million for 2005. Of total consolidated borrowings of £10,448 million at December 31, 2006, the parent company and finance subsidiaries had core borrowings of £2,485 million outstanding, including £150 million of bonds due to mature in 2007, and £248 million of bonds due in 2009. The remaining outstanding core borrowings are due to mature in more than five years.

Investment in Businesses

In 2006, Prudential invested £147 million into its Asian business compared to £169 million in 2005. In 2006, Asia became a net contributor to the Group holding company cash flow for the first time, with a net remittance of £28 million. In 2006, Prudential also invested £172 million into its UK Insurance Operations compared to £249 million in 2005. Depending on the mix of business written and the opportunities available, cash invested to support the UK Insurance Operations in 2007 is expected to be less than in 2006, at up to £160 million, with the expectation that the UK shareholder-backed business will become a net contributor to the Group holding company cash flow in 2010.

Acquisition of Businesses

Jackson completed the purchase of Life of Georgia from ING Groep NV in May 2005 for a preliminary consideration of £142 million. The preliminary purchase price was subject to post-closing adjustments and was initially allocated to the assets acquired and liabilities assumed using management's best estimate of fair value as of the acquisition date. In 2006, an arbitrator ruled in Jackson's favor on certain purchase price adjustments. As a result of this determination and other previously settled amounts, the purchase price was reduced by £6.3 million within the purchase price allocation period.

On December 31, 2005, Life of Georgia was merged into Jackson. In January 2006, Jackson had completed the integration of the 1.5 million Life of Georgia policies onto its own operating platform, demonstrating its capability in consolidating large blocks of business. Prudential expects that Jackson National Life will continue to consider further US bolt-on acquisitions as opportunities arise.

Liquidity Sources

The parent company held cash and short-term investments of £1,119 million and £1,128 million at December 31, 2006 and 2005 respectively. The sources of cash in 2006 included dividends, loans and interest received from operating subsidiaries and proceeds from borrowings.

Prudential received £596 million in cash remittances from business units in 2006, compared to £517 million received in 2005. These remittances primarily comprise dividends from business units and the shareholders' statutory transfer from the PAC long-term with-profits fund (UK Life Fund) relating to earlier bonus declarations.

Shareholders' Statutory Transfer

In 2006, Prudential declared total surplus of £2.7 billion from Prudential Assurance's primary with-profits fund, of which £2.4 billion was added to with-profits policies and £269 million was distributed to shareholders. In 2005, Prudential declared total surplus of £2.2 billion from Prudential Assurance's primary with-profits fund, of which £2.0 billion was added to with-profits policies and £223 million was distributed to shareholders. The bonus rates for the Prudence Bond and personal pensions remained constant with 2005.

Dividends, Loans and Interest Received from Subsidiaries

Under UK company law, dividends can only be paid if a company has distributable reserves sufficient to cover the dividend. In PAC, Prudential's largest operating subsidiary, distributable reserves are created mainly by the statutory long-term business profit transfer to shareholders that occurs upon the declaration of bonuses to policyholders of with-profit products, see "Shareholders' Statutory Transfer" above. Prudential's insurance, banking and fund management subsidiaries' ability to pay dividends and loans to the parent company is restricted by various laws and regulations. Jackson is subject to state laws that limit the dividends payable to its parent company. Dividends in excess of these limitations generally require approval of the state insurance commissioner.

The table below shows the dividends, loans and other amounts received by the parent company from the principal operating subsidiaries during the year ended December 31, 2006.

	Dividends, loans and interest received in	
	2006	2005
(In £ Millions)		
UK Insurance Operations (mainly PAC)	217	297
M&G	94	62
US Operations	110	85
Asian Operations	175	73
Total	596	517

Each of Prudential's main operations generates sufficient profits to pay dividends to the parent. The amount of dividends paid by the operations is determined after considering the development, growth and investment requirements of the operating businesses. Prudential does not believe that the legal and regulatory restrictions constitute a material limitation on the ability of businesses to meet their obligations or pay dividends to the parent company.

Amounts received from UK Insurance Operations in 2006 comprised £217 million relating to the PAC shareholders' statutory life fund transfer. In 2005, amounts received from UK Insurance Operations included £194 million relating to the PAC shareholders' statutory life fund transfer and £100 million of additional dividends from the PAC shareholders' funds.

In Asia, Prudential's more established operations in Singapore, Hong Kong, Malaysia and Indonesia remit surplus capital to the Group.

Sale of Businesses

In January 2007, Prudential announced that it had entered into a binding agreement to sell its holding in Egg to Citi. The sale completed on May 1, 2007 for a net cash consideration of £546 million, subject to finalization of the completion accounts.

Shareholders' Borrowings and Financial Flexibility

Net core structural borrowings, comprising core debt of the parent company and related finance subsidiaries, Jackson surplus notes and Egg debenture loans, at December 31, 2006 were £1,493 million, compared with £1,611 million at December 31, 2005. This reflects the net cash outflow of £104 million, exchange conversion gains of £240 million and other movements of negative £18 million.

After adjusting for holding company cash and short-term investments of £1,119 million, core structural borrowings of shareholder-financed operations (excluding Egg) at the end of 2006 totaled £2,612 million, compared with £2,739 million at the end of 2005. This decrease reflects exchange conversion gains of £135 million and other movements of £8 million.

Core long-term loans at the end of 2006 included £1,626 million at fixed rates of interest with maturity dates ranging from 2007 to perpetuity. Core borrowings of £890 million were denominated in US dollars, to hedge partially the currency exposure arising from the Group's investment in Jackson.

Prudential has in place an unlimited global commercial paper program. At December 31, 2006, commercial paper of £198 million, \$3,449 million and €85 million has been issued under this program.

Prudential also has in place a £5,000 million medium-term note ("MTN") program. At December 31, 2006, subordinated debt outstanding under this program was £435 million and €520 million, and senior debt outstanding was \$18 million and £5 million.

In addition, the holding company has access to £1,600 million committed revolving credit facilities, provided by 16 major international banks. The holding company also has access to an annually renewable £500 million committed securities lending liquidity facility, which is expected to be renewed next on December 13, 2007. There were no draw-downs under either facility since their respective inceptions and hence there were no amounts outstanding under these facilities at December 31, 2006.

Prudential also maintains uncommitted credit facilities totaling £346 million. There was no amount outstanding under these facilities at December 31, 2006.

The commercial paper program, the MTN program, the committed revolving credit facilities and the committed securities lending liquidity facility are available for general corporate purposes and to support the liquidity needs of the parent company.

The Group's insurance and asset management operations are funded centrally. Egg, as a separate bank, was responsible for its own financing. The Group's core debt is managed to be within a target level consistent with its current debt ratings.

Prudential plc enjoys strong debt ratings from Standard & Poor's, Moody's and Fitch. Prudential long-term senior debt is currently rated A+ (stable outlook), A2 (stable outlook) and AA- (stable) from Standard & Poor's, Moody's and Fitch respectively, while short term ratings are A1+, P-1 and F1+. On June 23, 2006, Standard and Poor's announced that it had lowered Prudential's long-term senior debt rating from AA- (negative outlook) to A+ (stable outlook).

Prudential believes the credit rating downgrades it experienced in 2002 and 2003, together with the rest of the UK insurance industry, and in 2006 by Standard & Poor's to bring Prudential into line with the notching between operating subsidiary financial strength rating and the credit rating for other European insurance holding companies, have not to date had a discernible impact on the performance of its business.

Securities lending and reverse repurchase agreements-

The Group has entered into securities lending (including repurchase agreements) whereby blocks of securities are loaned to third parties, primarily major brokerage firms. The agreements require that amounts between 102 per cent and 105 per cent of the fair value of the loaned securities be held as collateral, depending on the quality of the collateral, calculated on a daily basis. The loaned securities are not removed from the Group's consolidated balance sheet, rather they are retained within the appropriate investment classification. Collateral typically consists of cash, debt securities, equity securities and letters of credit. At December 31, 2006, the Group had lent £11,418 million (2005: £10,594 million) (of which £7,592 million (2005: £8,250 million) was lent by the PAC with-profits fund) of securities and held collateral under such agreements of £11,814 million (2005: £11,112 million) (of which £7,934 million (2005: £8,657 million) was held by the PAC with-profits fund).

At December 31, 2006, the Group had entered into reverse repurchase transactions under which it purchased securities and had taken on the obligation to resell the securities for the purchase price of £1,435 million (2005: £1,214 million), together with accrued interest.

Collateral and pledges under derivative transactions

At December 31, 2006, the Group had pledged £263 million (2005: £403 million) for liabilities and held collateral of £212 million (2005: £193 million) in respect of over-the-counter derivative transactions.

Securitization

During 2006, Egg transferred additional UK credit card receivables to its trust vehicle, Arch (Term) Limited, created in 2002 for the purpose of asset-backed securitization, bringing the outstanding balance of assets in this vehicle to £2.8 billion (2005: £2.8 billion). The noteholders in securitizations from this vehicle have a proportional interest in each account balance in the trust. As at December 31, 2006, the value of this interest was £2.3 billion (2005: £2.3 billion). This securitization does not qualify for derecognition under IAS 39 and the total portfolio is, therefore, included in loans and receivables. The funding giving rise to the note-holders interest is included within operational borrowings attributable to shareholder-financed operations.

Prudential anticipates that these programs and facilities are sufficient to meet foreseeable requirements to support shareholders' existing operations.

Financial Conglomerates Directive

As at December 31, 2006, Prudential met the requirements of the Financial Conglomerates Directive Test. The Financial Conglomerates Directive is discussed in greater detail in Item 4, "Information on the Company UK Supervision and Regulation".

Derivative Financial Instruments and Commitments

During the normal course of business Prudential enters into various arrangements in order to increase liquidity and decrease certain risks.

At December 31, 2005, Egg had two credit default swaps in place, comprising residential mortgages of £1.4 billion and asset backed securities of £589 million. Their effect was to remove from Egg's balance sheet the risk of default on the underlying assets and reduce the regulatory capital that must be held by Egg in relation to these assets.

Any potential credit risk relates to the swap counter-party, namely its ability to pay in the event of default on the underlying assets. If such a double failure occurred, Egg could be required to increase regulatory capital held against the underlying assets. All swap counter-parties are highly rated financial institutions.

Egg has also entered into interest rate swaps for the purpose of hedging interest rate risk on lending to customers. The total notional value of these swaps is £2.9 billion.

At December 31, 2005, Egg had entered into a series of derivative financial instrument transactions to hedge against foreign currency exposures with nominal value of £1.7 billion.

At December 31, 2006, M&G had entered into a series of derivative financial instrument transactions relating to interest rate swaps and caps, cross currency swaps, credit default swaps and similar instruments. These derivatives were entered into in the normal course of business and solely for the purpose of matching or eliminating risks arising from potential movements in interest and exchange rates inherent in M&G's assets and liabilities.

Jackson has unfunded commitments related to its investments in limited partnerships totaling £174 million at December 31, 2006. These reflect on demand contractual commitments to fund further investments by the limited partnerships.

For further discussion of derivatives and hedging instruments, please see Note G3 to the consolidated financial statements.

Contractual Obligations

Contractual obligations with specified payment dates at December 31, 2006 were as follows:

	Total £m	Less than 1 year £m	1-3 years £m	3-5 years £m	More than 5 years £m
Policyholder liabilities ^(a)	315,927	15,791	29,599	29,605	240,932
Long-term debt	10,448	3,319	1,739	632	4,758
Capital lease obligations	75	3	14	1	57
Operating lease obligations	355	53	87	55	160
Purchase obligations ^(b)	358	358			
Obligations under funding, securities lending and sale and repurchase agreements	4,232	4,232			
Other long-term liabilities ^(c)	8,555	8,166	253	97	39
Total	339,950	31,922	31,692	30,390	245,946
Reconciliation to balance sheet:	£m	£m			
Total contractual obligations per above		339,950			
Difference between policyholder liabilities per above (based on undiscounted cash flows) and total policyholder liabilities and unallocated surplus of with-profits funds per balance sheet:					
Total policyholder liabilities and unallocated surplus of with-profits funds per balance sheet	178,587				
Policyholder liabilities (undiscounted) per above	(315,927)	(137,340)			
Other short-term/non-contractual obligations:					
Current tax liabilities	1,303				
Deferred tax liabilities	3,882				
Accruals and deferred income	517				
Other creditors (excluding capital and operating lease obligations and purchase obligations)	1,398				
Other liabilities	1,652				
Held for sale liabilities	387	9,139			
Other items		(849)			
Total liabilities per balance sheet		210,900			

(a) Amounts shown in respect of policyholder liabilities represent estimated undiscounted cash flows for the Group's life assurance contracts. In determining the projected payments, account has been taken of the contract features, in particular that the amount and timing of policyholder benefit payments reflect either surrender, death, or contract maturity. In addition, the undiscounted amounts shown include the expected payments based on assumed future investment returns on assets backing policyholder liabilities. The projected cash flows exclude the unallocated surplus of with-profits funds. At December 31, 2006, on the IFRS basis of reporting the unallocated surplus was £13,599 million. The unallocated surplus represents the excess of assets over liabilities, including policyholder "asset share" liabilities, which reflect the amount payable under the realistic Peak 2 reporting regime of the FSA. Although accounted for as a liability, as permitted by IFRS 4, there is currently no expected payment date for the unallocated surplus.

(b) Comprising unfunded commitments for investments in limited partnerships of £174 million, unfunded commitments related to mortgage loans of £38 million and commitments to purchase and develop investment properties of £146 million.

- (c) Amounts due in less than one year include banking customer accounts of £5,554 million and amounts attributable to unit holders of consolidated unit trusts and similar funds of £2,476 million.

Operating Businesses

UK Life Insurance

The liquidity sources for Prudential's UK life insurance businesses comprise premiums, deposits and charges on policies, investment income, proceeds from the sale and maturity of investments, external borrowings and capital contributions from the parent company. The liquidity requirements comprise benefits and claims, operating expenses, interest on debt, purchases of investments and dividends to the parent company.

The liquidity requirements of Prudential's UK life insurance businesses are regularly monitored to match anticipated cash inflows with cash requirements. Cash needs are forecast and projected sources and uses of funds, as well as the asset, liability, investment and cash flow assumptions underlying these projections are reviewed periodically. Adjustments are made periodically to the investment policies with respect to, among other things, the maturity and risk characteristics of the investment assets to reflect changes in the business' cash needs and also to reflect the changing competitive and economic environment.

The primary source of short-term liquidity to support operations is a pool of highly liquid, high quality short-term instruments to provide liquidity in excess of the expected cash requirements. At December 31, 2006, the investment assets included £48,113 million of equity securities, £45,534 million of debt securities and £6,058 million of deposits.

The liquidity of Prudential's UK insurance operations is affected by the payment of guaranteed benefits and terminal bonuses on maturing and surrendering policies by the UK insurance operations. In addition, the non-cash bonus declaration to policyholders results in a cash transfer to shareholders' funds. A large proportion of Prudential's liabilities contains discretionary surrender values or surrender charges. In addition, pension annuity policies cannot be surrendered by the policyholder.

At December 31, 2006 and 2005, Prudential Assurance's long-term fund assets in excess of its capital requirements were £24,002 million and £14,451 million, respectively. The "with-profits insurance capital component", at December 31, 2006, amounted to £15,042 million (2005: £9,055 million).

M&G

The principal liquidity source for M&G is fee income for managing retail, institutional and the internal investment funds of Prudential's UK operations. The principal liquidity requirement is operating expenses. Amounts are distributed to the parent company after considering capital requirements. Capital requirements are driven by the regulatory stipulations based on fixed operating expenses and other operating considerations. At December 31, 2006, M&G met the relevant regulatory requirements.

Egg

Egg has a balance of funding between deposits from customers (approximately 60 per cent) and wholesale liabilities and subordinated debt (approximately 40 per cent). This funding supports the retail asset book and treasury assets. The majority of treasury assets are held for liquidity purposes.

Regulatory liquidity requirements seek to ensure that banks have access at all times to sufficient sources of liquidity to enable them to pay both expected and unexpected demands. These regulations provide that a minimum level of liquid assets needs to be held. The calculation of these liquid assets depends on the nature of customer deposits and the time over which they can be withdrawn. Capital requirements are driven by the FSA capital regulations stipulated under the Basel Accord.

In 2001, Egg issued £125 million loan capital with a coupon of 6.875 per cent for a 20.5 year term (2021). This was issued at a discount of £1.4 million.

In 2002, Egg issued £75 million additional loan capital with a coupon of 6.875 per cent for a 19 year term (2021). This was issued at premium of £3.1 million. There is an early repayment option in 2016 for both loan capital issues.

In 2003 Egg issued £250 million of loan capital with a coupon of 7.5 per cent and is perpetual with a callable date of 2013. This was issued at a £0.9 million discount. There were no subordinated loan capital issues during 2004 or 2005.

Up to and including the completion of sale to Citi on May 1, 2007, Egg met all regulatory requirements including the target risk asset ratio set by the FSA.

US Life Insurance

The liquidity sources for Jackson are its cash, short-term investments and publicly traded bonds, premium income, deposits received on certain annuity and institutional products, investment income and capital contributions from the parent company.

Liquidity requirements are principally for purchases of new investments and businesses, repayment of principal and interest on intercompany debt, payments of interest on surplus notes, funding of insurance product liabilities, including payments for policy benefits, surrenders, maturities and new policy loans and funding of expenses, including payment of commissions, operating expenses and taxes. At December 31, 2006, Jackson's outstanding notes and bank debt included:

\$250 million of surplus notes maturing in 2027,

\$114 million of senior notes maturing by 2010,

\$35 million of collateralized loans maturing in 2016,

\$4 million of non-investment grade debt issued by variable interest entities maturing by 2013.

Significant increases in interest rates and disintermediation can create sudden increases in surrender and withdrawal requests by policyholders and contract holders. Other factors that are not directly related to interest rates can also give rise to disintermediation risk, including but not limited to changes in ratings from rating agencies, general policyholder concerns relating to the life insurance industry (e.g., the unexpected default of a large, unrelated life insurer) and competition from other products, including non-insurance products such as mutual funds, certificates of deposit and newly developed investment products. Most of the life insurance, annuity and institutional products Jackson offers permit the policyholder or contract holder to withdraw or borrow funds or surrender cash values, although some include policy restrictions such as surrender charges and market value adjustments to discourage early withdrawal of policy and contract funds. At December 31, 2006, approximately \$10.7 billion of policy and contract funds had no surrender charge or market value adjustment restrictions.

Jackson uses a variety of asset-liability management techniques to provide for the orderly provision of cash flow from investments and other sources as policies and contracts mature in accordance with their normal terms. Jackson's principal sources of liquidity to meet unexpected cash outflows associated with sudden and severe increases in surrenders and withdrawals are its portfolio of liquid assets and its net operating cash flows. At December 31, 2006, the portfolio of cash, short-term investments and publicly traded bonds and equities amounted to \$30.7 billion. Operating net cash inflows for Jackson in 2006 were \$1.9 billion. Prudential believes that these liquidity sources are sufficient to satisfy the company's liquidity needs.

At December 31, 2006, the statutory capital and surplus of Jackson was \$3.7 million, which was significantly in excess of the requirements set out under Michigan insurance law. As described in Item 4,

"Information on the Company Supervision and Regulation of Prudential US Supervision and Regulation", Jackson is also subject to risk-based capital guidelines that provide a method to measure the adjusted capital that a life insurance company should have for regulatory purposes, taking into account the risk characteristics of the company's investments and products. At December 31, 2006, Jackson's total risk based capital ratio under the National Association of Insurance Commissioners' definition substantially exceeded model act standards.

Asia Life Insurance

The liquidity sources for Prudential's Asia life insurance businesses comprise premiums, deposits and charges on policies, investment income, proceeds from the sale and maturity of investments, external borrowings and capital contributions from the parent company. The liquidity requirements comprise benefits and claims, operating expenses, interest on debt, purchases of investments and dividends to the parent company.

The liquidity requirements of Prudential's Asia life insurance businesses are regularly monitored to match anticipated cash inflows with cash requirements. Cash needs are forecast and projected sources and uses of funds, as well as the asset, liability, investment and cash flow assumptions underlying these projections are reviewed periodically. Adjustments are made periodically to the investment policies with respect to, among other things, the maturity and risk characteristics of the investment assets to reflect changes in the business cash needs and also to reflect the changing competitive and economic environment.

Group Consolidated Cash Flows on an IFRS Basis

The discussion that follows is based on the consolidated statement of cash flows prepared under IFRS and presented in Item 18 of this Form 20-F.

Net cash inflows (outflows) in 2006 were £2,209 million from operating activities, £(102) million from investing activities, and £(522) million from financing activities. In 2005, net cash inflows (outflows) were £(199) million from operating activities, £30 million from investing activities, and £(678) million from financing activities. In 2004, net cash inflows (outflows) were £850 million from operating activities, £(97) million from investing activities, and £902 million from financing activities, including the proceeds from the rights issue of £1,021 million.

The Group held cash and cash equivalents of £5,071 million at December 31, 2006 compared with £3,586 million and £4,341 million at December 31, 2005 and 2004 respectively.

Item 6. Directors, Senior Management and Employees

The Prudential Board of directors currently consists of 13 directors. Since January 2006, the following Board changes took place: Nick Prettejohn, Lord Turnbull and Barry Stowe were appointed as directors on January 1, 2006, May 18, 2006 and November 1, 2006 respectively. Rob Rowley, Mark Norbom and Roberto Mendoza ceased to be directors on May 18, 2006, December 14, 2006 and May 17, 2007 respectively.

Set forth below are the names, ages, positions, business experience and principal business activities performed by the current directors of Prudential, as well as the dates of their initial appointment as directors. Ages given are as at April 30, 2007.

Sir David Clementi FCA MBA (Age 58)
Chairman and Chairman of the Nomination Committee

Sir David Clementi has been Chairman of Prudential since December 2002. In 2005, he was appointed as President of the Investment Property Forum. In 2003, he joined the Financial Services Authority's Financial Capability Steering Group, and was appointed by the Secretary of State for Constitutional Affairs to carry out a review of the regulation of legal services in England and Wales, which was completed in 2004. In 2003, he also joined the Financial Reporting Council, and became a non-executive director of Rio Tinto plc. He is also a board member of the Royal Opera House. From 1997 to 2002 he was Deputy Governor of the Bank of England. During this time, he served as a member of the Monetary Policy Committee and as a non-executive director of the Financial Services Authority. From 1975 to 1997 he worked for the Kleinwort Benson Group, latterly as Chief Executive.

Mark Tucker ACA (Age 49)
Group Chief Executive

Mark Tucker was re-appointed as an executive director in May 2005, when he also became Group Chief Executive. From May 2004 to March 2005 he was Group Finance Director, HBOS plc and director of Halifax plc. Previously, he was an executive director of Prudential from 1999 to 2003, and from 1993 to 2003 he was Chief Executive of Prudential Corporation Asia, and also held senior positions in Prudential's businesses in the United Kingdom and the United States. He first joined Prudential in 1986, having previously been a tax consultant at PriceWaterhouse UK in London.

Philip Broadley FCA (Age 46)
Group Finance Director

Philip Broadley has been an executive director of Prudential and Group Finance Director since May 2000. He is currently Chairman of the 100 Group of Finance Directors and a member of the Insurance Advisory Group of the International Accounting Standards Board. He is also President of the Przeworski Charitable Foundation, which has been established in Poland in recognition of former policyholders with whom Prudential lost contact. Previously, he was with the UK firm of Arthur Andersen, where he became a partner in 1993.

Clark Manning FSA MAAA (Age 48)
Executive director

Clark Manning has been an executive director of Prudential since January 2002. He is also President and Chief Executive Officer of Jackson National Life Insurance Company. He was previously Chief Operating Officer, Senior Vice President and Chief Actuary of Jackson National Life Insurance Company, which he joined in 1995. Prior to that, he was Senior Vice President and Chief Actuary for SunAmerica Inc, and prior to that Consulting Actuary at Milliman & Robertson Inc. He has more than 25 years' experience in the life insurance industry, and holds both a bachelor's degree in actuarial science and an

MBA from the University of Texas. He also holds professional designations of Fellow of the Society of Actuaries (FSA) and Member of the American Academy of Actuaries (MAAA).

Michael McLintock (Age 46)
Executive director

Michael McLintock has been an executive director of Prudential since September 2000. He is also Chief Executive of M&G, a position he held at the time of M&G's acquisition by Prudential in 1999. He joined M&G in 1992. He is also a non-executive director of Close Brothers Group plc.

Nick Prettejohn (Age 46)
Executive director

Nick Prettejohn has been an executive director of Prudential and Chief Executive, Prudential UK and Europe since January 1, 2006. He is also a board member of the ABI, Deputy Chairman of the Financial Services Practitioner Panel, and a board member of the Royal Opera House. Previously, he was Chief Executive of Lloyd's of London from 1999 until 2005. He joined the Corporation of Lloyd's in 1995 as Head of Strategy, and played a key role in the Reconstruction and Renewal process, which reorganized Lloyd's after the losses of the late 1980s and early 1990s. Following the successful completion of the reorganization in 1996, he became Managing Director of Lloyd's Business Development Unit and in 1998 he also assumed responsibility for Lloyd's North America business unit. Prior to his appointment to Lloyd's, he was responsible for corporate strategy at National Freight Corporation plc, and prior to that he was a partner at management consultants Bain and Co and a director of private equity company Apax Partners.

Barry Stowe (Age 49)
Executive director

Barry Stowe has been an executive director of Prudential since November 1, 2006, and Chief Executive, Prudential Corporation Asia since October 9, 2006. Previously, he was President, Accident & Health Worldwide for AIG Life Companies. He joined AIG in 1995, and prior to that was President and CEO of NISUS, a subsidiary of Pan-American Life, from 1992-1995. Prior to NISUS, he spent 12 years at Willis Corroon in the United States.

Keki Dadiseth FCA (Age 61)
Independent non-executive director and member of the Audit and Remuneration Committee

Keki Dadiseth has been an independent non-executive director of Prudential since April 2005. During 2006, he was appointed as a non-executive director of ICICI Prudential Life Assurance Company Limited and ICICI Prudential Trust Limited. He is also a member of the Advisory Board of Marsh & McLennan Companies Inc. and an International Advisor to Goldman Sachs. In addition, he is a director of Nicholas Piramal Limited, Siemens Limited, Britannia Industries Limited and The Indian Hotels Company Limited, all quoted on the Bombay Stock Exchange. He is also a director of the Indian School of Business and acts as a trustee of a number of Indian charities. Before he retired from Unilever in 2005, he was Director, Home and Personal Care, responsible for the HPC business of Unilever worldwide, a Board member of Unilever PLC and Unilever N.V. and a member of Unilever's Executive Committee. He joined Hindustan Lever Ltd in India in 1973.

Michael Garrett (Age 64)
Independent non-executive director and member of the Remuneration Committee

Michael Garrett has been an independent non-executive director of Prudential since September 2004. He worked for Nestlé from 1961, becoming Head of Japan (1990 - 1993), and then

Zone Director and Member of the Executive Board, responsible for Asia and Oceania, and in 1996 his responsibilities were expanded to include Africa and the Middle East. He retired as Executive Vice President of Nestlé in 2005. In addition, he served the Government of Australia as Chairman of the Food Industry Council and as a Member of the Industry Council of Australia, and was also a member of the Advisory Committee for an APEC (Asia-Pacific Economic Cooperation) Food System, a Member of The Turkish Prime Minister's Advisory Group and the WTO (World Trade Organization) Business Advisory Council in Switzerland. He remains a director of Nestlé companies in India and Japan, and was appointed Chairman of the Evian Group in 2001, a think tank and forum for dialogue promoting free trade. He also serves as a non-executive director on the Boards of the Bobst Group Switzerland and Hasbro Inc. in the United States, and is a member of the Finance and Performance Review Committee of The Prince of Wales International Business Leaders Forum (IBLF).

Bridget Macaskill (Age 58)

Independent non-executive director, Chairman of the Remuneration Committee, and member of the Nomination Committee

Bridget Macaskill has been an independent non-executive director of Prudential since September 2003. She rejoined the Board of Prudential having previously resigned due to a potential conflict of interest in 2001. She has been a member of the Remuneration Committee since 2003 and became Chairman of the Remuneration Committee on May 18, 2006. She is a non-executive director of the Federal National Mortgage Association (Fannie Mae) and Scottish & Newcastle PLC. She was previously a non-executive director of J Sainsbury Plc. Prior to that she spent 18 years at OppenheimerFunds Inc, a major New York based investment management company, the final 10 years of which she was Chief Executive Officer.

Kathleen O'Donovan ACA (Age 49)

Independent non-executive director and Chairman of the Audit Committee

Kathleen O'Donovan has been an independent non-executive director of Prudential since May 2003. She has been a member of the Audit Committee since 2003 and became Chairman of the Audit Committee on May 18, 2006. She is a non-executive director and Chairman of the Audit Committee of Great Portland Estates PLC and a non-executive director of ARM Holdings plc. She is also Chairman of the Invensys Pension Scheme. Previously, she was a non-executive director and Chairman of the Audit Committees of the EMI Group plc and the Court of the Bank of England, and a non-executive director of O₂ plc. Prior to that, she was Chief Financial Officer of BTR and Invensys, and before that she was a partner at Ernst & Young.

James Ross (Age 68)

Senior independent non-executive director and member of the Audit and Nomination Committee

James Ross has been an independent non-executive director since May 2004 and the Senior Independent Director since May 2006. He holds non-executive directorships with McGraw Hill and Datacard in the United States and Schneider Electric in France. He is also Chairman of the Leadership Foundation for Higher Education. He was previously Chairman of National Grid plc and Littlewoods plc.

He was also Chief Executive of Cable and Wireless plc and Chairman and Chief Executive of BP America Inc., and a Managing Director of the British Petroleum Company plc.

Lord Turnbull KCB CVO (Age 62)

Independent non-executive director and member of the Audit Committee

Lord Turnbull has been an independent non-executive director of Prudential since May 18, 2006, and a member of the Audit Committee since January 1, 2007. He entered the House of Lords as a Life Peer in 2005. In 2002 he became Secretary of the Cabinet and Head of the Home Civil Service until he retired in 2005. Prior to that, he held a number of positions in the civil service, including Permanent Secretary at HM Treasury; Permanent Secretary at the Department of the Environment (later Environment, Transport and the Regions); Private Secretary (Economics) to the Prime Minister; and Principal Private Secretary to Margaret Thatcher and then John Major. He joined HM Treasury in 1970. Lord Turnbull is a non-executive director of Frontier Economics Ltd, The British Land Company PLC and the Arup Group. He also works part-time as a Senior Advisor to the London partners of Booz Allen Hamilton (UK).

Other Executive Officers

The heads of Prudential's business units, UK Insurance Operations, M&G, Jackson National Life and Prudential Corporation Asia are also directors of Prudential, as set forth above. For information relating to the compensation paid or accrued to all Prudential directors and the other senior executive officer, see below.

Service Contracts

Chairman's letter of appointment and benefits

The Chairman, Sir David Clementi, is paid an annual fee and the contractual notice periods are 12 months from either party. The Chairman participates in a medical insurance scheme, has life assurance cover and has the use of a car and driver. He is entitled to a supplement to his fees, intended for pension purposes. He is not a member of any Group pension scheme providing retirement benefits.

Directors' service contracts and letters of appointment

Executive directors have contracts that terminate on their normal retirement date. Following the new Age Discrimination legislation in the United Kingdom, the normal retirement date for the executive directors except Clark Manning was changed to the date of their 65th birthday. The normal retirement date for Clark Manning is the date of his 60th birthday. The normal notice of termination the Company is required to give executive directors is 12 months, although for newly appointed directors there may be an initial contractual period of up to two years before the 12 months' notice period applies. When considering termination of service contracts, the Remuneration Committee will have regard to the specific circumstances of each case, including a director's obligation to mitigate his loss.

The contract for Clark Manning is a renewable one-year fixed-term contract. The contract is renewable automatically upon the same terms and conditions unless the Company or Clark Manning gives at least 90 days' notice prior to the end of the relevant term. In the case of the former, Clark Manning would be entitled to continued payment of salary and benefits for the period of one year from the day such notice is delivered to him. Payments of Clark Manning's salary during the period following the termination of employment would be reduced by the amount of compensation earned by him from any subsequent employer or from any person for whom he performs services. Benefits to be provided during such period would also be cancelled to the extent that comparable benefits were available to him from these alternative sources.

Executive Directors, with the exception of Michael McLintock, are required to give 12 months' notice of termination to the Company. Michael McLintock is required to give 6 months' notice to the Company.

Non-executive directors do not have service contracts but are appointed pursuant to letters of appointment with notice periods of six months without liability for compensation.

Benefits and protections

Executive directors receive certain benefits, principally participation in medical insurance schemes, the provision of a cash allowance for a car (except for Clark Manning) and in some cases the use of a car and driver and security arrangements. No benefits are pensionable. The executive directors' pension arrangements and life assurance provisions are set out in the Directors' pensions and life assurance section on pages 182 and 183.

Executive directors are eligible to participate in either the Company's UK or International Savings-Related Share Option Scheme (except for Clark Manning). Options granted under these schemes are not subject to performance conditions because the UK plan is an all-employee share scheme governed by specific legislation and the international scheme mirrors it.

Executive directors are entitled to participate in arrangements in certain M&G investment products on the same terms as available to other members of staff.

In addition, the Company provides certain protections for directors and senior managers against personal financial exposure that they may incur in their capacity as such. This includes qualifying third party indemnity provisions (as defined under section 309B of the Companies Act 1985) in force for the benefit of the directors of the Company and of associated companies (as defined under section 309A of the Companies Act 1985), both of which were in force throughout 2006 and are currently in force.

Policy on external appointments

Subject to the Board's approval, executive directors are able to accept external appointments as non-executive directors of other organizations.

Compensation

In 2006 the aggregate compensation that Prudential paid or accrued to all Prudential executive directors and the other executive officer was £12,870,338 including performance related bonuses paid to executive directors and executive officers and an aggregate pension contribution of £1,166,789 and provision for future benefits.

**

Pension supplements that are paid in cash are reported in this table for the first time. The policy on pensions is described in the section on Pensions arrangements on page 176. The pension arrangements for current executive directors are described in the section on Directors' pensions and life assurance on page 182.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Notes:

1. A deferred share award from his 2006 annual bonus valued at £211,947 was made to Philip Broadley. This is included in the 2006 bonus figure.
2. Clark Manning's bonus figure excludes a contribution of £5,969 from a profit sharing plan, that has been made into a 401k retirement plan. This is included in the table on pension contributions on page 183.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

3. A deferred share award from his 2006 annual bonus valued at \$121,360 was made to Clark Manning. This is included in the 2006 bonus figure.
4. A deferred share award from his 2006 annual bonus valued at £555,000 was made to Michael McLintock. This is included in the 2006 bonus figure.
5. Mark Norbom's directorship with Prudential plc ended on December 14, 2006 but he remained in employment until January 31, 2007. In connection with the termination of his employment he received a payment of £291,000 and will receive nine successive monthly payments of £55,792. He also continues to receive private medical and life cover, school fees and club memberships until October 31, 2007 and housing benefits until May 5, 2007, unless in each case he finds new employment which provides such benefits.
6. For 2006 Mark Norbom was also paid £90,603 in dividend equivalents from the awards detailed in the section on Other share awards on page 181. This amount is included in the column headed Other payments.
7. Mark Norbom's benefits include those that reflect his expatriate status, including costs of £153,071 related to housing.
8. A deferred share award from his 2006 annual bonus valued at £80,673 was made to Nick Prettejohn. This is included in the 2006 bonus figure.
9. Barry Stowe joined on September 26, 2006. As part of his appointment terms he was paid \$75,000, included in the 2006 bonus in the table above, as compensation for the loss of his 2006 bonus from his previous employer. The exchange rate used is \$1.8430 = £1.
10. Barry Stowe's benefits include those that reflect his expatriate status, including costs of £43,403 related to housing.
11. A deferred share award from his 2006 annual bonus valued at £492,744 was made to Mark Tucker. This is included in the 2006 bonus figure.
12. Mark Tucker was eligible to be paid a housing allowance of £11,017 per month until April 30, 2006. This is included in the benefits figure.
13. Keki Dadiseth is paid an allowance of £10,478 per annum in respect of his accommodation expenses in London whilst on the Company's business, in lieu of reimbursing hotel costs as is the usual practice for directors who are not resident in the United Kingdom.
14. Paul Gratton who was employed up to February 28, 2006. The payments included in Other payments relates to his termination from the company.

Executive director remuneration

Total remuneration levels for executive directors are set by reference to levels in their relevant markets and all pay data is externally provided. Prudential's remuneration structure is summarized in the following table.

Director	Role	Annual Salary from January 1, 2007	Long Term Incentives			
			Annual Bonus Plan		Group Performance Share Plan	Business Unit Performance Plan
			Target	Maximum	Maximum	Maximum
Philip Broadley	Group Finance Director	£567,100	50%	110%	160%	n/a
Clark Manning ⁽¹⁾	Jackson President & CEO	£1,000,000	100%	120%	230%	230%
Michael McLintock ⁽²⁾	Chief Executive M&G	£320,000	300% ⁽²⁾	500% ⁽²⁾	100% ⁽²⁾	Cash LTIP ⁽²⁾
Nick Prettejohn	CEO UK	£615,250	50%	110%	130%	130%
Barry Stowe	CEO Asia	£500,000	50%	110%	130%	130%
Mark Tucker	Group Chief Executive	£907,200	75%	125%	200%	n/a

Annual Bonus Plan Performance driven, paid in cash up to target, with payment for performance above target in the form of deferred shares. Bonuses are based on a combination of Group and Business unit financial measures, and the individual strategic objectives set for each director.

Group Performance Share Plan Share based plan, driven by Total Shareholder Return (TSR) out-performance of an index comprised of peer companies over three years.

Business Unit Performance Plan Share and cash based plan (split 50/50), driven by compound annual growth in Shareholder Capital Value (SCV) over three years with stretch targets for each region.

Notes:

- (1) Clark Manning is also eligible to receive an annual bonus which provides for a percentage share of a bonus pool based on the profits of Jackson. He is additionally eligible to participate in a US tax qualified all-employee profit sharing plan.
- (2) The annual bonus plan levels shown for Michael McLintock are for 2006. His remuneration arrangements will be reviewed with investors in 2007.

All outstanding long-term awards held by the executive directors are detailed on pages 176 to 180.

Annual incentive plans

The annual incentive for executive directors is aligned with the interests of shareholders in that any part of the annual incentive award made for performance above target will be made in the form of a share award. Receipt of these shares is deferred and the shares are normally only released after three years. Dividends accumulate for the benefit of award holders during the deferral period. Bonuses awarded are not pensionable.

Annual incentives are based on a combination of Group and business unit financial measures and the individual strategic objectives set for each individual director.

Long term incentive plans

In 2006 two new long-term incentive plans were approved by shareholders and in 2006 the awards described below were made to executive directors under these plans.

Group Performance Share Plan ("Group PSP")

The Group PSP delivers shares subject to performance over a three-year period. The performance measure for the award is Prudential's Total Shareholder Return ("TSR") performance compared to an index comprised of peer companies. The vesting schedule is set out in the following table and graph.

Prudential's TSR relative to the index at the end of the performance period	Percentage of Award that vests
Less than index return	0%
Index return	25%
Index return × 110%	75%
Index return × 120%	100%

Companies in the index for 2006 were: Aegon, Allianz, Aviva, Axa, Friends Provident, Generali, ING, Legal & General, Manulife and Old Mutual.

Group Performance Share Plan

Edgar Filing: PRUDENTIAL PLC - Form 20-F

To encourage close alignment with our shareholders' long-term interests, participants will normally be entitled to receive the value of reinvested dividends over the performance period for those shares that vest.

The Remuneration Committee must also be satisfied that the quality of the underlying financial performance justifies the level of award delivered at the end of the performance period and may adjust awards accordingly at its discretion.

Business Unit Performance Plan ("BUPP")

The BUPP delivers share and cash-based awards, subject to a three-year performance period. The performance measure under the BUPP is Shareholder Capital Value ("SCV") which is shareholders' capital and reserves on a European Embedded Value ("EEV") basis (using the European Embedded Value Principles for reporting adopted by European insurance companies) for each regional business unit. Payouts depend on the increase in SCV over the performance period, the required growth rates under the award being different for each of Prudential's geographic regions. The vesting schedules for 2006 are set out in the table below.

Percentage of Award that vests	Compound annual growth in Shareholder Capital Value over three years		
	UK	Jackson	Asia
0%	<8%	<8%	<15%
30%	8%	8%	15%
75%	11%	10%	22.5%
100%	14%	12%	30%

Business Unit Performance Plan

To encourage close alignment with our shareholders' long-term interests, participants will normally be entitled to receive the value of reinvested dividends over the performance period for those shares that vest.

The Remuneration Committee must also be satisfied that the quality of the underlying financial performance justifies the level of award delivered at the end of the performance period and may adjust awards accordingly at its discretion.

Michael McLintock

In 2006 Michael McLintock participated in the M&G Chief Executive Long-Term Incentive Plan that provides a cash reward through phantom M&G share awards and options, whose value depends on the profit and fund performance of M&G over the performance period. The change in the phantom share

price equals the change in M&G profit, modified up or down by the investment performance of M&G over the performance period. For 2006 the face value of the share award was £225,000. For 2006 the phantom option award had a face value of £367,800. Provided the phantom share options have value, they may be exercised in part or in full during annual exercise periods after three to seven years from the start of the performance period.

Pensions arrangements

It is the Company's policy to provide efficient pension vehicles to allow executive directors to save for their retirement and to make appropriate contributions to their retirement savings plans. The level of company contribution is related to competitive practice in the executive directors' employment market.

The executive director employed in the USA is eligible to participate in a 401K approved pension scheme on the same basis as all other US based employees. The executive director employed in Asia is eligible to receive a 25 per cent salary supplement for pension purposes.

UK executive directors are offered a combination of HMRC approved pension schemes and supplementary provision. Participation in the HMRC approved pension schemes is on the same basis as other employees who joined at the same date, with benefits based on basic salary up to the HMRC earnings cap. For defined benefit schemes, the policy is to retain a notional scheme earnings cap, replicating the HMRC earnings cap, which no longer exists after April 6, 2006 ("A-Day"). No employees with employment offers after June 30, 2003 were eligible for membership of the defined benefit schemes.

Changes to UK pensions regulations took effect from A-Day. Executive directors were not compensated for the effects of any change in their taxation position as a result of these changes. Prudential reviewed its policy in 2006 and for future UK executive director appointments, its policy is to provide a simple salary supplement of 25 per cent of salary. This will include, where relevant, any company contributions to the staff defined contribution pension plan, which UK executive directors would be eligible to join. This plan has no salary cap. After A-Day, the policy is to discontinue further contributions to Funded Unapproved Retirement Benefit Schemes ("FURBS") which were provided for some UK executive directors before this date.

The application of this policy to executive directors is described on pages 182 and 183.

Shareholding guidelines

Executive directors should hold a substantial number of shares according to the following schedule. The executive directors will be encouraged to build up their shareholding over a five-year period.

Group Chief Executive and Chief Executive M&G	2 × salary (interim target of 1 × salary after three years)
Other executive directors	1 × salary

Shares earned and deferred under the annual incentive plan are included in the guideline.

At least half the shares released from long-term incentive awards after tax should be retained by the executive director until the guideline is met.

Senior executives' outstanding long-term incentive awards

The section below sets out the outstanding share awards under the Restricted Share Plan, the Group Performance Share Plan and the awards under additional long-term plans for the executive directors who run specific businesses. These shares are held in trust and represent the conditional awards out of which rights may be granted or shares released, and the end of the relevant performance period, depending on the performance conditions. See " Long term incentive plans".

Nick Prettejohn						
Business Unit Performance Plan (Cash element)	2006		374		374	2008
Restricted Share Plan awards						

For RSP awards prior to 2004, no rights were granted if the Company's TSR performance as ranked against the comparator group was at the 60th percentile or below. For the 2004 and 2005 awards, no rights are granted if the Company's TSR performance is below 50th percentile. For all awards the maximum grant is made only if the TSR ranking of the Company is 20th percentile or above. Between these points, the size of the grant made is calculated on a straight line sliding scale. In normal circumstances, directors may take up their right to receive shares at any time during the following seven years.

2006 Awards

The awards made in respect of 2006 run to December 31, 2008. In determining the 2006 conditional share awards the shares were valued at their average share price during the preceding calendar year, and the price used to determine the number of shares was 498.45 pence.

Group Performance Share Plan

Awards under the Group Performance Share Plan are described on page 174.

Business Unit Performance Plan

Awards under the Business Unit Performance Plan are described on page 175.

Notes

- For awards made in 2003 under the Restricted Share Plan, the Company's TSR was ranked at 71st percentile at the end of the three year performance period ending on December 31, 2005 and as a result the 2003 awards lapsed.
- For the 2004 conditional RSP award the ranking of the Company's TSR at the end of the three year performance period ending on December 31, 2006 was 51st out of the remaining 89 companies in the FTSE (56th percentile) and as a result the awards lapsed.
- For the awards under the 2005 Restricted Share Plan, as at December 31, 2006, Prudential's TSR performance was ranked at thirty-fourth percentile compared to the FTSE 100 companies.
- For the awards made in 2006 under the Group Performance Share Plan, as at December 31, 2006, Prudential's TSR performance was at 106.7 per cent of the TSR performance of the index.
- The 2005 RSP awards for Mark Norbom lapsed on the termination of his employment.
- All awards granted to Mark Norbom under the 2006 LTIPs lapsed on the termination of his employment.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

7. Mark Wood's directorship ended effective October 17, 2005. Under his 2003 and 2004 conditional RSP awards, the ranking of the Company's TSR in the month prior to his date of resignation of his directorship was below 50th percentile and as a result no release was made from these awards.
8. For the 2005 conditional RSP award to Mark Wood, the ranking of the Company's TSR in the month prior to his date of resignation of his directorship was 27th and as a result 27.5 per cent of his award was released. This percentage takes into account pro-rating for his service during the three-year performance period.

Other long-term incentive plans

Details of all outstanding awards under other cash-based long-term incentive plans up to and including 2006 are set out in the table below. The performance period for all awards is three years.

	Year of initial award	Face value of conditional awards outstanding at January 1, 2006	Conditionally awarded in 2006	Payments made in 2006	Face value of conditional awards outstanding at December 31, 2006	Date of end of performance period (December 31)

Clark Manning

In 2003, 2004 and 2005 Clark Manning participated in a cash-based long-term plan that rewards the growth in appraisal value of Jackson. The award payout equals an initial award value adjusted by the Prudential plc share price change over the performance period. In order for any award to be made under the 2005 plan, the growth rate over the performance period must be eight per cent per annum compound or greater. At this level of performance, the initial award value is \$864,240. If the on-target performance level of 11.5 per cent per annum compound is achieved the initial award value is doubled. If the annual growth rate is at least 17.5 per cent, the payout increases to a maximum of three times the initial award value. For performance between these points, payouts are on a straight line sliding scale.

For the 2003 award the results led to a payment of \$2,703,461. The face values of the awards for Clark Manning are converted at the average exchange rate for 2006 which was \$1.8430 = £1 (2005: \$1.8192 = £1). For the 2004 Business Cash LTIP, the compound annual growth rate in appraisal value was 21.64 per cent and as a result a payment of \$4,028,896 was made.

Michael McLintock

Michael McLintock's 2003, 2004 and 2005 cash long-term incentive awards were under the M&G Chief Executive Long-Term Incentive Plan that provides a cash reward through phantom M&G share awards and options. For these awards, the phantom share price at the beginning of the performance period was £1. The change in the phantom share price equals the change in M&G profit, modified up or down by the investment performance of M&G, over the performance period. For each year the face value of the share award was £225,000 and the phantom option award had a face value of £367,800. Provided the phantom share options have value, they may be exercised in part or in full during annual exercise periods after three to seven years from the start of the performance period.

For the 2003 award the phantom share price at the end of the performance period was £2.03. This resulted in a payment from the phantom share award of £456,750 and a phantom option award of 367,800 units. Michael McLintock did not exercise any of these options. For the 2004 award, the phantom share price at the end of the performance period was £2.59. This resulted in a payment of £582,750 from the share element of the award.

Mark Norbom

Mark Norbom's awards under the Business Cash LTIP for 2004 vested as a result of Asia's performance and a payment of £412,751 was made. On the termination of his employment his award under the 2005 Business Cash LTIP lapsed.

Mark Wood

Under the terms of the termination of his contract, payments were made to Mark Wood in 2006 from his 2003, 2004 and 2005 LTIP awards, taking into account performance and pro-rating for service during each respective performance period. The payments made to him were respectively £235,000, £180,556 and £103,056.

]

Other share awards

The table below sets out the share awards that have been made to executive directors under their appointment terms and those deferred from annual incentive plan payouts. The values of the deferred share awards are included in the bonus and total figures in the Remuneration table on page 172. The number of shares is calculated using the average share price over the three business days commencing on the day of the announcement of the Group's annual financial results for the relevant year. For the 2005 awards, which were made in 2006, the average share price was 671 pence.

Year of initial grant	Conditional share awards outstanding at January 1, 2006 (Number of shares)	Conditionally awarded in 2006 (Number of shares)	Scrip dividends accumulated (Number of shares)	Shares released in 2006 (Number of shares)	Conditional share awards outstanding at December 31, 2006 (Number of shares)	Date of end of restricted period	Shares released in 2006 (Number of shares)	Date of release	Market price at original date of award (pence)	Market price at date of vesting or release (pence)

Mark Tucker										
Deferred 2005 annual incentive award ¹										
2006		36,282	924		37,206 ¹	December 31, 2008				

- Under the annual bonus plans, the element of bonus for performance above target is made in the form of a share award deferred for three years. The value of the 2005 deferred share award is included in the total 2005 figure in the Remuneration table on page 172.
- Mark Norbom's deferred shares under the 2004 Annual Incentive Plan (33,965 shares) and 2005 Annual Incentive Plan (18,306 shares) were released to him in February 2007. In addition, the 89,353 employer replacement shares which vested on January 1, 2007 were released and the Remuneration Committee exercised its discretion to allow a further 87,403 shares out of his awards under the appointment terms to vest, representing the proportion of the performance period which Mark Norbom had worked in respect of his pension replacement shares. Awards over 374,358 shares granted under the terms of Mark Norbom's appointment lapsed.

3. In order to secure the appointment of Nick Prettejohn, he was awarded rights to Prudential plc shares that vest as set out in the table. In normal circumstances, releases are conditional on Nick Prettejohn being employed by Prudential at the date of vesting. If there is a change of control of Prudential he may be entitled to retain any unvested awards.
4. In order to secure the appointment of Barry Stowe, he was awarded rights to Prudential plc American Depositary Receipts, that vest as set out in the table. The figures in the table are the equivalent number of Prudential plc shares (one American Depositary Receipt equals two Prudential plc shares). In normal circumstances, releases are conditional on Barry Stowe being employed by Prudential at the date of vesting. If there is a change of control of Prudential he may be entitled to retain any unvested awards.
5. Mark Wood's directorship ended with effect from October 17, 2005 and as part of the terms of the termination of his employment, 35,942 deferred shares under the 2004 annual incentive plan were released in 2006.

Directors' pensions and life assurance

Philip Broadley participates in a non-contributory scheme that provides a pension of 1/60th of Final Pensionable Earnings for each year of service on retirement at age 60. Michael McLintock participates in a contributory scheme that provides a target pension of 2/3rds of Final Pensionable Earnings on retirement at age 60 for an employee with 30 years or more potential service, for which his contribution is 4 per cent of basic salary. In both cases Final Pensionable Earnings are capped by a notional scheme earnings cap which replicates the HMRC earnings cap in force before A-Day (April 6, 2006).

Philip Broadley and Michael McLintock are entitled to supplements based on the portion of their basic salary not covered for pension benefits under a HMRC approved scheme. These supplements are paid directly to them or, before A-Day, to a FURBS established in their name. They are provided with life assurance cover related to salary over the HMRC earnings cap. The cover is broadly equivalent to the death in service benefits provided under the relevant UK HMRC approved pension scheme.

Nick Prettejohn is paid a salary supplement and he is a member of the staff defined contribution pension plan, which provides death in service benefits. The company contributions to the pension plan and his salary supplement are in total 25 per cent of his salary.

Mark Tucker is paid a salary supplement of 25 per cent of his salary. He is also provided with life assurance cover of four times salary.

Clark Manning participates in a US tax-qualified defined contribution plan (a 401k plan). He is also provided with life assurance cover of two times salary.

Barry Stowe is paid a salary supplement of 25 per cent of his salary. He is also provided with life assurance cover of four times salary.

Where supplements for pension purposes are paid in cash, the amounts are included in the table on directors' remuneration on page 172.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Details of directors' pension entitlements under HMRC approved defined benefit schemes and supplements that are in the form of contributions to FURBS or other pension arrangements paid by the Company are set out in the following table.

	Age at December 31, 2006	Years of pensionable service at December 31, 2006	Additional pension earned during year ended December 31, 2006		Transfer value of accrued benefit at December 31 ⁽³⁾		Amount of (B-A) less contributions made by directors during 2006	Contributions to FURBS or other pension and life assurance arrangements ⁽⁴⁾
			Ignoring inflation on pension earned to December 31, 2005 ⁽¹⁾	Allowing for inflation on pension earned to December 31, 2005 ⁽²⁾	2006 B	2005 A		
(in £ Thousands)

Notes

- (1) As required by Stock Exchange Listing rules.
- (2) As required by the Companies Act remuneration regulations.
- (3) The transfer value equivalent has been calculated in accordance with Actuarial Guidance Note GN11.
- (4) Supplements in the form of cash are included in the Remuneration table on page 172.

No enhancements to the retirement benefits paid to or receivable by directors or former directors other than the discretionary pension increases awarded to all pensioners have been made during the year.

Total contributions to directors' pension arrangements including cash supplements for pension purposes were £1,161,410 (2005: £1,111,602) of which £138,937 (2005: £361,145) related to money purchase schemes.

The other executive officer was a member of appropriate local pension arrangements, contributions to which have been included in " Compensation" above.

Share Ownership

Directors' Shareholdings

The current shareholding policy is that as a condition of serving, all executive and non-executive directors are required to have beneficial ownership of 2,500 ordinary shares in Prudential. This interest in shares must be acquired within two months of appointment to the Board if the director does not have such an interest upon appointment. Annually, the non-executive directors use the net value of £25,000 of their total annual fees to purchase shares in Prudential. Shares are purchased each quarter and are held at least until retirement from the Board.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

The interests of directors in ordinary shares of Prudential are shown below and include shares acquired under the Share Incentive Plan, the deferred annual incentive awards detailed in the table on other share awards under " Other share awards" above, and interests in shares awarded on appointment. Awards that remain conditional under the Restricted Share Plan, Prudential Group Performance Share Plan, and Prudential Business Unit Performance Plan are excluded. The interests of directors in office at April 30, 2007 in ordinary shares of the Company are shown below. All interests are beneficial.

Name ⁽¹⁾	Holding as of April 30, 2007	Approximate Percentage of Ordinary Shares
Philip Broadley ⁽²⁾	102,162	0.0042
Sir David Clementi	38,582	0.0016
Keki Dadiseth	6,015	0.0003
Michael Garrett	19,448	0.0008
Bridget Macaskill	15,378	0.0007
Clark Manning	34,689	0.0015
Michael McLintock	349,128	0.0143
Roberto Mendoza	215,724	0.0089
Kathleen O'Donovan	12,756	0.0006
Nick Prettejohn	69,567	0.0029
James Ross	10,908	0.0005
Barry Stowe ⁽³⁾	66,678	0.0028
Mark Tucker	271,390	0.0111
Lord Turnbull	4,397	0.0002

- (1) Current information has not been provided on Mark Norbom and Rob Rowley because they were not directors at April 30, 2007 or Paul Gratton because he was not an executive officer of Prudential at April 30, 2007 and Prudential does not maintain any information on their current shareholdings. On resignation Mark Norbom had an interest of 86,559 ordinary shares (at December 14, 2006), Rob Rowley had an interest of 41,564 ordinary shares (at May 18, 2006) and Paul Gratton had an interest of 140,550 ordinary shares (at January 30, 2006).
- (2) The shares in the table include shares purchased under the Prudential Services Limited Share Incentive Plan together with Matching Shares (on a 1:4 basis) that will only be released if the employee remains in employment for three years. For Philip Broadley the total number of Matching Shares at 30 April 2007 was 128.
- (3) Barry Stowe's interest in shares are made up of 33,339 American Depositary Receipts (representing 66,678 ordinary shares).

Prudential is not owned or controlled directly or indirectly by another corporation or by any government or by any other natural or legal person severally or jointly and Prudential does not know of any arrangements that might result in a change in Prudential's control.

In addition, Prudential's directors and other executive officers held, as at April 30, 2007, options to purchase 11,827 shares, all of which were issued pursuant to Prudential's Savings-Related Share Option Scheme. These options and plans are described in more detail below under " Options to Purchase Securities from Prudential" in this section. Neither Paul Gratton nor Michael Harris holds more than 1 per cent of Prudential shares.

Outstanding Options of Directors and Other Executive Officers

Outstanding options under the Savings-Related Share Option Scheme (referred to as SAYE) are set out below. The Savings-Related Share Option Scheme is open to all UK and certain overseas employees and options up to the Inland Revenue limits are granted at a 20 per cent discount and cannot normally be exercised until a minimum of three years has elapsed. No payment has been made for the grant of

Edgar Filing: PRUDENTIAL PLC - Form 20-F

any such options. The price to be paid for exercise of these options is shown in the table below. No variations to any outstanding options have been made.

Name ⁽¹⁾	Options outstanding at April 30, 2007	Exercise price (pence) ⁽²⁾	Earliest exercise date	Latest exercise date
Mark Tucker	2,297	407	December 1, 2008	May 31, 2009
Philip Broadley	2,716	346	June 1, 2007	November 30, 2007
Michael McLintock	6,153	266	June 1, 2008	November 30, 2008
Nick Prettejohn	661	565	June 1, 2009	November 30, 2009
TOTAL	11,827			

(1) None of Sir David Clementi, Keki Dadiseth, Michael Garrett, Bridget Macaskill, Clark Manning, Roberto Mendoza, Barry Stowe, Kathleen O'Donovan, James Ross, Rob Rowley or Andrew Turnbull holds options to purchase Prudential shares.

(2) The market price of shares at April 30, 2007 was 749 pence. The highest and lowest share prices during 2006 were 744 pence and 538.5 pence, respectively.

Options to Purchase Securities from Prudential

As of April 30, 2007, 10,445,647 options were outstanding, which Prudential issued under the Savings-Related Share Option Schemes. As of April 30, 2007 directors and other executive officers held 11,827 of such outstanding options. Except as described above in " Outstanding Options of Directors and Other Executive Officers," each option represents the right of the bearer to subscribe for one share at a particular pre-determined exercise price at a pre-set exercise date.

As of April 30, 2007, 5,616 options were outstanding under the Restricted Share Plan. Such outstanding options held by directors or other executive officers are included in the shares set forth under " Senior Executives' Long-term Incentive Plans" in this section above.

As of April 30, 2007, 2,944,440 shares were outstanding under the Prudential Jackson National Life US Performance Share Plan, none of which was held by directors or other executive officers.

As of April 30, 2007, 6,299,642 shares were outstanding under other awards. (587,671 shares were outstanding under the Annual Incentive Plan, 177,758 shares were outstanding under the 1000 Day Plan, 1,198,836 shares were outstanding under the Asia Retention Plan, 286,029 shares were outstanding under the One Off Awards, 2,873,445 shares were outstanding under the Group Performance Share Plan and 1,175,903 shares were outstanding under the Business Unit Performance Plan. Such outstanding awards held by directors or other executive officers are included in the shares set forth under " Senior Executives' Long-term Incentive Plans" in this section above).

The aggregate proceeds that would arise if all outstanding options under the Savings-Related Share Option Schemes were exercised is £38 million. The latest expiration dates for exercise or release of the

securities underlying the options or awards and the number of options or shares are set out in the table below.

Year of Expiration	Shares Outstanding Under the Prudential Jackson National Life US Performance Share Plan	Options Outstanding Under Restricted Share Plan	Options Outstanding Under Executive Share Option Scheme and Savings-Related Share Option Scheme	Shares Outstanding Under Other Awards	Total
(In Millions)					
2007	0.518	0.002	1.332	0.397	2.249

Total	2.944	0.006	10.445	6.3	19.695

Board Practices

Non-executive directors of Prudential are appointed initially for a three-year term, commencing with their election by shareholders at the first Annual General Meeting following their appointment by the Board. Upon appointment, all directors embark upon a wide-ranging induction program covering, amongst other things, the principal bases of accounting for the Group's results, the role of the audit committee and the ambit of the internal audit function. In addition, they receive detailed briefings on the Group's principal businesses, its product range, the markets in which it operates and the overall competitive environment. Other areas addressed include legal issues affecting directors of financial services companies, the Group's governance arrangements, its investor relations program, as well as its remuneration policies. The appointment is then reviewed towards the end of the three-year period against performance and the requirements of the Company's businesses. All directors are required to submit themselves for re-election by shareholders at regular intervals and at least every three years at the relevant Annual General Meeting.

The Board has established a number of standing committees of directors. The terms of reference for these committees are reviewed regularly.

Audit Committee

The Group Audit Committee, which forms a key element of the Group's governance framework, is comprised exclusively of independent non-executive directors. Kathleen O'Donovan is the Chairman of the Group Audit Committee, and Keki Dadiseth, James Ross and Lord Turnbull are members. Kathleen O'Donovan has been a member of the Group Audit Committee since May 8, 2003 and was appointed as Chairman with effect from May 18, 2006, on which date Rob Rowley, the previous Chairman, ceased to be a director of Prudential plc and a member of the Group Audit Committee. Lord Turnbull was appointed on January 1, 2007.

For the purposes of compliance with the Sarbanes-Oxley Act, the Board has determined that Kathleen O'Donovan qualifies as an "Audit Committee Financial Expert" within the meaning of Item 16A of Form 20-F. See Item 16A "Audit Committee Financial Expert". Rob Rowley was Prudential's designated "Audit Committee Financial Expert" prior to May 18, 2006.

Role of the Group Audit Committee

The Committee's principal oversight responsibilities cover:

internal control and risk management;

internal audit;

external audit (including auditor independence); and

financial reporting.

The Group Audit Committee has formal terms of reference set by the Board, which are reviewed regularly.

The Group Audit Committee received presentations from senior management throughout the year, and the standing agenda items also included regular reports from Group-wide Internal Audit, Group Risk, Group Compliance, Group Tax and Group Security.

Meetings

The Group Audit Committee met nine times during the year. Additionally, by invitation, the Chairman of the Board, the Group Finance Director, the Group Chief Risk Officer, the Company Secretary, the Group-wide Internal Audit Director, and other senior staff from Internal Audit, Group Risk and Group Compliance where appropriate, as well as the external auditor, attended the majority of the meetings.

The Chairman held preparatory meetings with the Group-wide Internal Auditor, the Group Chief Risk Officer, the external auditor, the Group Finance Director and the Company Secretary before each Group Audit Committee meeting, with the exception of single-issue meetings. A detailed annual agenda has been developed, which Prudential believes assists the Group Audit Committee in addressing all matters for which it is responsible at the appropriate time of year. The principal business of the Group Audit Committee's meetings includes:

half year and full year results, press releases and annual report and accounts;

accounting policies and key judgmental areas, Group policies for compliance with regulations worldwide, including Sarbanes-Oxley procedures;

US filings and related external audit opinion;

external auditor's interim management letter, external auditor's full year memorandum, external audit opinion and final management letter;

auditor independence, external auditor's plans and audit strategy, effectiveness of the external audit process, external auditor's qualifications, expertise and resources, economic service, and recommendations for the appointment/re-appointment of the external auditor;

framework and effectiveness of the Group's systems of internal control and Turnbull compliance statement;

effectiveness of the Group Risk Framework and half-yearly key risk report;

Edgar Filing: PRUDENTIAL PLC - Form 20-F

internal audit plan and resources, and monitoring of the audit framework and internal audit effectiveness;

effectiveness of compliance processes and controls and performance against the Group Compliance Plan;

audit committee effectiveness and terms of reference;

Group Security annual report, report on anti-money laundering and reporting of allegations from whistleblowers;

International Financial Reporting Standards ("IFRS") and practices;

Supplementary Financial Reporting under European Embedded Value ("EEV"); and

changes in and implementation of Group Accounting Policies in compliance with International Accounting Standards and practices, including the European CFO Forum Principles and Guidance on Embedded Values and IFRS.

During the year, the Group Audit Committee's standing agenda items also included reports from Group-wide Internal Audit, Group Risk, Group Compliance, Group Tax and Group Security. In addition, the Group Audit Committee received presentations from some of the business unit chief executives and members of senior management.

The Group Audit Committee Chairman reported to the Board on matters of particular significance after each Group Audit Committee meeting, and the minutes of Group Audit Committee meetings were circulated to all Board members.

The Group Audit Committee recognizes the need to meet without the presence of executive management. Such sessions were held in February 2006 with the external and internal auditors, and in September 2006 with the internal auditors.

Business unit audit committees

Each business unit has its own audit committee whose members and chairmen are independent of the individual business unit. The chairmen of these committees are approved by the Chairman of the Group Audit Committee, and the committees are attended by business unit senior management including the business units' chief executives and heads of finance, risk, compliance and internal audit. Business unit audit committees have similar terms of reference to the Group Audit Committee, and report significant issues to the Group Audit Committee when they arise. They approve the business unit internal audit plans and oversee the adequacy of internal audit resources, receive presentations from external audit, and meet privately with local external audit and the business unit heads of internal audit.

Internal Control and Risk Management

The Group Audit Committee reviewed the Group's statement on internal control systems prior to its endorsement by the Board. It also reviewed the policies and processes for identifying, assessing and managing business risks. Throughout the year, the Group Audit Committee received the minutes of the Disclosure Committee and the Group Operational Risk Committee and noted their activities.

Pursuant to the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 the Group must assess annually the effectiveness of its internal controls over financial reporting. In common with other companies which must comply with this legislation, this has required the Group to undertake a significant project to document and test its internal controls over financial reporting. The Group Audit Committee has overseen the progress of this project through regular status reports submitted by management in 2006. During the year, the Group's external auditor, KPMG Audit Plc, also reported to the Group Audit Committee on Prudential's progress towards compliance with Section 404. The first annual assessment and related report from the external auditor is included in this Form 20-F on pages 222 and 223 under Item 15.

Internal Audit

The Group Audit Committee regards its relationship with internal audit as a particularly important one. Group-wide Internal Audit plays an important role in supporting the Group Audit Committee to fulfill its responsibilities under the Combined Code and the Sarbanes-Oxley Act. Each of the Group's business units has an internal audit team, the heads of which report to the Group-wide Internal Audit Director. Group-wide Internal Audit resources, plans and work are overseen by the Group Audit Committee and by business unit audit committees.

Across the Group, 118 people work for Internal Audit. The Group-wide Internal Audit Director reports functionally to the Group Audit Committee and for management purposes to the Group Chief Risk Officer. During the year, the business unit audit committees reviewed and approved internal audit's plans, resources and the results of its work. Reporting to the Group Audit Committee by Group-wide Internal Audit occurs through formal reports four times during the year and regular private meetings, as well as additional regular private meetings between the Chairman of the Group Audit Committee and the Group-wide Internal Audit Director.

The Group Audit Committee assesses the effectiveness of the internal audit function through a review carried out by external advisors, and through ongoing dialogue with the Group-wide Internal Audit Director. An external review of internal audit arrangements and standards was conducted in 2006 to determine whether the activities and resources of internal audit are most effectively organized to support the oversight responsibilities of the Group Audit Committee. This review, performed by Deloitte, confirmed that the internal audit function complies with The Institute of Internal Auditors' international standards for the professional practice of internal auditing and is operating effectively.

External Audit

Details of the Group Audit Committee's responsibilities in respect of the external audit are set out in Item 16c on page 223.

Financial Reporting

The Group Audit Committee reviewed the interim and annual financial statements before their submission to the Board, paying particular attention to critical accounting policies and practices and any changes in them; decisions requiring a major element of judgment; unusual transactions; clarity of disclosures; significant audit adjustments; the going concern assumption; compliance with accounting standards; and compliance with obligations under the Combined Code and other applicable laws and regulations.

In addition, the Group Audit Committee is regularly briefed by senior management on developments in International Financial Reporting Standards.

Confidential Reporting

At each meeting, the Group Audit Committee received and reviewed a report on calls to the confidential reporting line, which is made available to employees to enable them to communicate confidentially on matters of concern, and actions taken in response to these calls. The Group Audit Committee also considered whether any internal control implications arose from communications received. No internal control implications were raised from calls to the confidential helpline.

Audit Committee Effectiveness

During the year, the Group Audit Committee undertook a formal review of its own effectiveness and the Group Audit Committee is satisfied, based on the findings of this review, that it had been

operating as an effective audit committee, meeting all applicable legal and regulatory requirements. Further reviews of the effectiveness of the Group Audit Committee will be undertaken annually.

Remuneration Committee

The Remuneration Committee is comprised exclusively of independent non-executive directors of Prudential. Bridget Macaskill is the Chairman of the Committee, and Keki Dadiseth and Michael Garrett are members. Bridget Macaskill has been a member of the Committee since September 1, 2003 and was appointed as Chairman with effect from May 18, 2006, on which date Roberto Mendoza resigned as Chairman of the Committee but remained a member until May 17, 2007, on which date he ceased to be a director of Prudential plc and a member of the Remuneration Committee. While the Chairman of the Board and the Group Chief Executive are not members, they attend meetings unless they have a conflict of interest.

The Remuneration Committee normally has scheduled meetings at least three times a year and a number of additional meetings, as required, to review remuneration policy and the application of that policy. The Remuneration Committee determines the remuneration packages of the Chairman and executive directors, and monitors the level and structure of remuneration for a defined population of senior management as determined by the Board. The Remuneration Committee agreed principles for the level and structure of remuneration for this population. During 2006 a total of nine meetings were held. Except in relation to the remuneration of the Group Chief Executive, when only the Chairman is consulted, the Remuneration Committee consults the Chairman and the Group Chief Executive about its proposals relating to the remuneration of all executive directors. The Remuneration Committee has access to professional advice inside and outside Prudential.

Nomination Committee

Sir David Clementi is Chairman of the Nomination Committee, and Bridget Macaskill and James Ross are members. Rob Rowley was a member until May 18, 2006, on which date he ceased to be a director of Prudential plc and a member of the Nomination Committee.

The Nomination Committee is comprised exclusively of independent non-executive directors and the Chairman. The Group Chief Executive is also closely involved in the work of the Nomination Committee and is invited to attend and contribute to meetings of the Nomination Committee. The Nomination Committee meets as required to consider candidates for appointment to the Board and to make recommendations to the Board in respect of those candidates. The Nomination Committee, in consultation with the Board, evaluates the balance of skills, knowledge and experience on the Board and makes recommendations regarding appointments based on merit and against objective criteria and the requirements of the Group's business. In appropriate cases, search consultants are used to identify suitable candidates.

During 2006, the Nomination Committee held four meetings resulting in the appointment by the Board of Lord Turnbull as a non-executive director on May 18, 2006, and Barry Stowe as an executive director on November 1, 2006.

During the year, the Nomination Committee continued the search for additional non-executive directors and employed professional search consultants to oversee the initial process. This process is ongoing.

NYSE Corporate Governance Rules compared to Prudential plc's Corporate Governance Practice

Pursuant to NYSE rule 303A Prudential has disclosed the differences between the NYSE Corporate Governance Rules and its Corporate Governance Practice on its website at <http://www.prudential.co.uk>.

Employees

The average numbers of staff employed by the Prudential group, excluding employees of the Venture investment subsidiaries of the PAC with-profits fund, for the following periods were:

	<u>2006</u>	<u>2005</u>	<u>2004</u>
UK operations	10,914	10,708	10,849
US operations	2,863	2,588	2,589
Asian operations	12,114	9,652	8,277
	<u>25,891</u>	<u>22,948</u>	<u>21,715</u>

At December 31, 2006, Prudential employed 26,924 persons. Of the 26,924 employees, approximately 38 per cent were located in the United Kingdom and 51 per cent in Asia and 11 per cent in the United States. In the United Kingdom at December 31, 2006, Prudential had 954 employees paying union subscriptions through the payroll. At December 31, 2006, Prudential had 344 temporary employees in the United Kingdom and 559 in Asia. Prudential did not have a significant number of temporary employees in the United States. At December 31, 2006, Prudential had 295 fixed term contractors in the United Kingdom, 51 in the United States and 569 in Asia.

Item 7. Major Shareholders and Related Party Transactions

Major Shareholders

The Financial Services Authority Disclosure and Transparency Rules 2006 provides that a person or corporate entity that acquires an interest of 3 per cent or more in Prudential ordinary shares is required to notify Prudential of that interest. Any subsequent increase or decrease of 1 per cent or more must also be notified. Similarly, a notification is required once the interest falls below 3 per cent. At April 30, 2007 Prudential had received the following notifications:

Significant Changes in Ownership

In March 2004, Cater Allen International Limited informed Prudential it was interested in 68,165,921 of its ordinary shares, or 3.39 per cent of its ordinary share capital. Further notifications were received from Cater Allen International Limited in March 2004 informing Prudential that it was interested in 90,343,121 of its ordinary shares, or 4.50 per cent of its ordinary share capital, and subsequently that its holding had increased to 92,263,121 ordinary shares, or 4.59 per cent of Prudential's ordinary share capital, and later in March 2004 that it had ceased to have a notifiable interest. In March 2004 Lehman Brothers International (Europe) informed Prudential that it was interested in 102,420,602 of its ordinary shares, or 5.10 per cent of its ordinary share capital. Further notifications were received from Lehman Brothers International (Europe) in March 2004 informing the Company that it was interested in 83,760,737 of Prudential's ordinary shares, or 4.17 per cent of its ordinary share capital and subsequently that its interest had decreased to 66,066,824 of Prudential's ordinary shares, or 3.29 per cent of its ordinary share capital. Subsequently in March 2004 Lehman Brothers International (Europe) informed Prudential that it had ceased to have a notifiable interest in Prudential's ordinary share capital. In April 2004, Aviva plc informed Prudential that it was interested in 60,323,328 of its ordinary shares, or 3.0023 per cent of Prudential's ordinary share capital. Also in April 2004, Morley Fund Management Limited informed Prudential that it was interested in 60,506,819 of its ordinary shares, or 3.01 per cent of Prudential's ordinary share capital. Subsequently in June 2004, both Aviva plc and Morley Fund Management Limited informed Prudential that they had ceased to have a notifiable interest in Prudential's share capital. In July 2004, Prudential received notifications from Legal and General Investment Management Limited that it was interested in 81,326,380 ordinary shares of Prudential, and from Fidelity International Limited and FMR Corp that they together were interested in 77,255,787

ordinary shares of Prudential, or 4.02 per cent and 3.82 per cent respectively of Prudential's ordinary share capital. In August 2004 Prudential received two notifications from Barclays PLC, the first informing it of an interest in 61,406,677 ordinary shares, or 3.035 per cent of Prudential's ordinary share capital, the second informing Prudential that it had ceased to have a notifiable interest in Prudential's ordinary share capital. Also in August 2004, Lehman Brothers International (Europe) informed Prudential that it had a notifiable interest in 108,413,123 ordinary shares, or 5.36 per cent of Prudential's ordinary share capital, and subsequently in September 2004, notifications were received that that interest had decreased to 74,042,089 ordinary shares or 3.66 per cent, and eventually ceased to be a notifiable interest. In October 2004, Prudential received two notifications from Fidelity International Limited and FMR Corp, initially of a combined notifiable interest in 82,567,578 ordinary shares, or 4.08 per cent of Prudential's ordinary share capital, and later of a decrease of that interest to 78,275,627 ordinary shares, or 3.87 per cent. Subsequently in November 2004, Fidelity International Limited and FMR Corp informed Prudential that they together had ceased to have a notifiable interest in the ordinary share capital of Prudential plc.

In February 2005, Barclays PLC notified Prudential that it had a notifiable interest in 79,033,599 ordinary shares, or 3.33 per cent of Prudential's ordinary share capital, and subsequently, also in February 2005, that its interest had ceased to be notifiable. In March 2005, Prudential received a notification from Cater Allen International Limited that it had a notifiable interest in 88,640,496 ordinary shares, or 3.73 per cent of Prudential's ordinary share capital, and subsequently, also in March 2005, it notified Prudential that its interest had ceased to be notifiable. Also in March 2005, Prudential received notifications from Lehman Brothers International (Europe) that it had a notifiable interest in 99,067,148 ordinary shares, or 4.17 per cent, and subsequently that that interest had decreased to 75,591,074 ordinary shares, or 3.18 per cent of the ordinary share capital, and finally, also in March 2005, that its interest had ceased to be notifiable. In April 2005, Barclays PLC notified Prudential that it had an interest in 94,041,936 ordinary shares, or 3.96 per cent of the ordinary share capital, and later in April 2005 that its interest had ceased to be notifiable. In July 2005, Fidelity Investments notified Prudential that it had an interest in 72,441,901 ordinary shares, or 3.04 per cent of the ordinary share capital. In August 2005, Barclays PLC notified Prudential that it had an interest in 73,951,823 ordinary shares, or 3.10 per cent of the ordinary share capital. Also in August 2005, Deutsche Bank AG notified Prudential that it had an interest in 77,713,900 ordinary shares, or 3.26 per cent of the ordinary share capital, and later in August 2005 that its interest had ceased to be notifiable. In November 2005, UBS AG notified Prudential that it had an interest in 241,298,813 ordinary shares, or 10.11 per cent of the ordinary share capital, and in December 2005 that its interest had ceased to be notifiable. Also in December 2005, Prudential received notification from Fidelity Investments that its interest had ceased to be notifiable.

In February 2006, Fidelity Investments notified Prudential that it had an interest in 75,706,390 ordinary shares, or 3.13 per cent of the ordinary share capital, and later in December 2006 that its interest had ceased to be notifiable. In March 2006, UBS AG notified Prudential that it had an interest in 75,530,091 ordinary shares, or 3.04 per cent of the ordinary share capital, and later in March 2006 that it had an interest in 250,259,483 ordinary shares, or 10.33 per cent of the ordinary share capital. Also in March 2006, Prudential received notification from Lehman Brothers International (Europe) of an interest in 131,384,250 ordinary shares, or 5.42 per cent of the ordinary share capital. In April 2006, Prudential received notifications from UBS AG and Lehman Brothers International (Europe) that their interests had ceased to be notifiable. In August 2006, Barclays PLC notified Prudential that it had an interest in 74,326,719 ordinary shares, or 3.06 per cent of the ordinary share capital, and subsequently that its interest had increased to 122,896,820 ordinary shares, or 5.06 per cent of the ordinary share capital, and later in August 2006 that its interest had ceased to be notifiable. Also in August 2006, Lehman Brothers International (Europe) informed Prudential that it was interested in 90,397,085 of its ordinary shares, or 3.73 per cent of its ordinary share capital. Further notifications were received from Lehman Brothers International (Europe) in August 2006 informing the Company that it had an interest in

126,451,077 of Prudential's ordinary shares, or 5.22 per cent of its ordinary share capital, and then again that it had an interest in 167,540,854 of Prudential's ordinary shares, or 6.92 per cent of its ordinary share capital and subsequently that its interest had decreased to 101,257,449 of Prudential's ordinary shares, or 4.17 per cent of its ordinary share capital. Subsequently in August 2006 Lehman Brothers International (Europe) informed Prudential that it had ceased to have a notifiable interest in Prudential's ordinary share capital. In October 2006, Barclays PLC notified Prudential that it had an interest in 73,499,119 ordinary shares, or 3.025 per cent of the ordinary share capital.

In February 2007, Legal and General Investment Management Limited notified Prudential that it had an interest in 110,232,362 ordinary shares, or 4.50 per cent of the ordinary share capital, and subsequently in April 2007 that its interest had increased to 124,077,012 of Prudential's ordinary shares, or 5.07 per cent of its ordinary share capital. In April 2007, Cater Allen International Limited notified Prudential that it had an interest in 75,255,755 ordinary shares, or 3.08 per cent of the ordinary share capital, and subsequently later in April 2007 that its interest had ceased to be notifiable.

Table: Major shareholders at April 30, 2007

Shareholder	Shareholding	% of share capital	Date advised
Barclays PLC	73,499,119	3.025%	October 2006
Legal and General Investment Management Limited	124,077,012	5.07%	April 2007

Major shareholders of Prudential have the same voting rights per share as other shareholders. See Item 10, "Additional Information Memorandum and Articles of Association Voting Rights".

As of April 30, 2007, there were 132 shareholders holding Prudential ordinary shares in the United States. These shares represented approximately 0.01 per cent of Prudential's issued ordinary share capital. As of April 30, 2007 there were 34 registered Prudential ADR holders. These shares represented by the ADRs held amounted to approximately 0.009 per cent of Prudential's issued ordinary share capital.

Prudential does not know of any arrangements which may at a subsequent date result in a change of control of Prudential.

Related Party Transactions

Transactions between the Company and its subsidiaries are eliminated on consolidation.

In addition, the Company has transactions and outstanding balances with certain unit trusts, Open Ended Investment Companies ("OEICs"), collateralized debt obligations and similar entities, which are not consolidated and where a Group company acts as manager. These entities are regarded as related parties for the purposes of IAS 24. The balances are included in the Group's balance sheet at fair value or amortized cost in accordance with their IAS 39 classifications. The transactions are included in the income statement and include: amounts paid on issue of shares or units, amounts received on cancellation of shares or units and paid in respect of the periodic charge and administration fee.

Various executive officers and directors of Prudential may from time to time purchase insurance, investment management or annuity products, or be granted mortgages or credit card facilities marketed by Prudential Group companies in the ordinary course of business on substantially the same terms, including interest rates and security requirements, as those prevailing at the time for comparable transactions with other persons.

In 2006, three (2005: two) directors had credit card borrowings with Egg of £2,000 (2005: £7,000). In addition, in 2005 one director had a mortgage with Egg of £118,000 and one director had a life insurance policy with a sum assured of £4.0 million. In 2006 and 2005, other transactions with directors

were de minimis both by virtue of their size and in the context of the director's financial positions. As indicated above, all of the above noted transactions are on terms equivalent to those that prevail in arm's length transactions.

Apart from the transactions with directors discussed above and in Item 6 "Directors, Senior Management and Employees", no director had an interest in shares, transactions or arrangements that requires disclosure.

Item 8. Financial Information

See Item 18, "Financial Statements".

Item 9. The Offer and Listing

Comparative Market Price Data

The tables below set forth for the periods indicated the highest and lowest closing middle-market quotations for Prudential ordinary shares, as derived from the Daily Official List of the London Stock Exchange, and the actual ADS high and low closing sale prices on the New York Stock Exchange after that date.

Year	Prudential Ordinary Shares		Prudential ADS Actual	
	High	Low	High	Low
	(pence)		(US Dollars)

Market Data

Prudential ordinary shares are listed on the Official List of the UK Listing Authority and traded on the London Stock Exchange under the symbol "PRU". Prudential ADSs have been listed for trading on the New York Stock Exchange since June 28, 2000 under the symbol "PUK".

Item 10. Additional Information

Memorandum and Articles of Association

Prudential plc is incorporated and registered in England and Wales, under registered number 1397169. Prudential's corporate objects are extensive, as more fully set out in clause 4 of Prudential's Memorandum of Association.

The following is a summary of both the rights of Prudential shareholders and certain provisions of Prudential's memorandum and articles of association. Rights of Prudential shareholders are set out in Prudential's memorandum and articles of association or are provided for by applicable English law. Because it is a summary, it does not contain all the information that is included in Prudential's memorandum and articles of association. A complete copy of Prudential's memorandum and articles of association is filed as an exhibit to this Form 20-F. In addition, these documents may be viewed on Prudential's website at:

["www.prudential.co.uk/prudential-plc/aboutpru/corporategovernance/articlesofassociation/"](http://www.prudential.co.uk/prudential-plc/aboutpru/corporategovernance/articlesofassociation/)

Share capital

The issued share capital of Prudential is not currently divided into different classes of shares, however, the authorized share capital consists of 4,000,000,000 ordinary shares of £0.05 each, 2,000,000,000 Sterling Preference Shares of £0.01 each, 2,000,000,000 Dollar Preference Shares of \$0.01 each, and 2,000,000,000 Euro Preference Shares of €0.01 each. To date, no preference shares have been issued.

The Board of Directors shall determine whether the preference shares are to be redeemable, their dividend rights, their rights to a return of capital or to share in the assets of the Company on a winding up or liquidation and their rights to attend and vote at general meetings of the Company prior to the date on which the preference shares are allotted. If the Board of Directors determines prior to any allotment date that the shares are to be redeemable, on redemption the holder of a preference share shall be paid the aggregate of the nominal amount of such preference share, any premium paid by the shareholder on allotment and, if the directors so decide, a redemption premium which shall be calculated in accordance with a formula chosen by the Board of Directors from a selection set out in Prudential's articles of association. No dividend will be payable after the date of redemption of any preference share but dividends accrued at such date will be payable.

The Board is restricted from capitalizing any amounts available for distribution in respect of any series or class of preference shares without the written consent of the holders of at least three-quarters in nominal value, or an extraordinary resolution passed at a general meeting of the holders of the class or series of preference shares if to do so would mean that the aggregate of the amounts so capitalized would be less than the multiple, if any, determined by the Board of the aggregate amount of the dividends payable in the twelve-month period following the capitalization on the series or class of preference shares and on any other preference shares in issue which rank *pari passu* in relation to participation in profits.

Dividends and other distributions

Under English law, Prudential may pay dividends only if distributable profits are available for that purpose. Distributable profits are accumulated, realized profits not previously distributed or capitalized, less accumulated, realized losses not previously written off in a reduction or reorganization of capital. Even if distributable profits are available, Prudential may only pay dividends if the amount of its net assets is not less than the aggregate of its called-up share capital and undistributable reserves, including, for example, the share premium account, and the payment of the dividend does not reduce the amount of the net assets to less than that aggregate. Subject to these restrictions, Prudential's directors may recommend to ordinary shareholders that a final dividend be declared, recommend the amount of any such dividend, determine whether to pay a distribution by way of an interim dividend, and the amount of any such interim dividend out of the profits of the Company, but must take into account Prudential's financial position. Following a change in accounting rules, any dividends which are proposed after an accounting period but are still subject to shareholder approval, will no longer be treated as a liability at the balance sheet date; a liability will only arise after such approval has been obtained. Prudential also has authorized preference shares, the terms of which as to redemption and rights to the profits of the Company available for dividend and rights to a return of capital or to share in the surplus assets of the Company on a winding up or liquidation will be determined by the directors prior to each tranche of preference shares being issued. Subject to any such special rights attaching to preference shares in issue, the profits available for distribution and resolved to be distributed are distributed to the ordinary shareholders. Currently, there are no preference shares in issue.

Prudential's directors or the Company also determine the date on which Prudential pays dividends. Prudential pays dividends to the shareholders on the register on the record date, which the directors or the Company determine, in proportion to the number of shares that those shareholders hold. There are no fixed dates on which entitlements to dividends arise. Interest is not payable on dividends or other amounts payable in respect of shares.

Prudential's directors have the discretion to offer shareholders the right to elect to receive additional shares (credited as fully paid) instead of all or any part of a cash dividend. The aggregate value of additional shares that a shareholder may receive under such an election is as nearly as possible equal to (but not greater than) the cash amount the shareholder would have received. Prudential does not issue fractions of shares and Prudential's directors may make such provision as they think appropriate to deal with any fractional entitlements. Prudential's directors may exclude shareholders from the right to receive shares instead of cash dividends if Prudential's directors believe that extending the election to such shareholders would violate the laws of any territory or for any other reason the directors consider in their absolute discretion appropriate.

If a shareholder does not claim a dividend within 12 years of such dividend becoming due for payment, such shareholder forfeits it. Such unclaimed amounts may be invested or otherwise used for Prudential's benefit.

Shareholder Meetings

English company law provides for shareholders to exercise their power to decide on corporate matters at general meetings. Prudential's articles of association, in accordance with English company law, require the Company to call annual general meetings, at intervals of not longer than 15 months. At annual general meetings, shareholders receive and consider the statutory accounts and the reports by the auditor and the directors, approve the directors' remuneration report, elect and re-elect directors, declare final dividends, approve the appointment and fix, or determine the manner of fixing, the remuneration of Prudential's auditor, and transact any other business which ought to be transacted at a general meeting, either under the articles of association or English company law generally. Extraordinary general meetings to consider specific matters may be held at the discretion of Prudential's directors and must be convened, in accordance with English company law, following the written request of shareholders representing at least one-tenth of the voting rights of the issued and paid-up share capital. The quorum required under Prudential's articles of association for a general meeting is two shareholders present in person or by proxy.

Voting Rights

Voting at any meeting of shareholders is by show of hands unless a poll (meaning a vote by the number of shares held rather than by a show of hands) is demanded as described below. On a show of hands every shareholder holding ordinary shares who is present in person or in the case of a corporation, its duly authorized corporate representative, has one vote. Proxies are not allowed to vote on a show of hands. On a poll every shareholder who is present in person or by proxy and every duly authorized corporate representative have one vote for every share held. Only the holders of fully paid shares are allowed to attend and be counted in the quorum at meetings, and to vote. If more than one joint shareholder votes, only the vote of the shareholder whose name appears first in the register is counted. A shareholder whose shareholding is registered in the name of a nominee may not attend and vote at a general meeting and may only vote through his or her nominee.

Resolutions of Prudential's shareholders generally require the approval of a majority of the shareholders to be passed. Such resolutions, referred to as ordinary resolutions, require:

on a show of hands, a majority in number of the shareholders present and voting in person or (in the case of a corporate shareholder) by an authorized corporate representative to vote in favor, or

on a poll, more than 50 per cent of the votes cast to be in favor.

Some resolutions, referred to as special resolutions, however, such as a resolution to amend the memorandum and articles of association, require a 75 per cent majority. Such special resolutions require:

on a show of hands, at least 75 per cent of the shareholders present and voting in person or (in the case of a corporate shareholder) by an authorized corporate representative to vote in favor, or

on a poll, at least 75 per cent of the votes cast to be in favor.

In the case of an equality of votes, the chairman of the general meeting has a tie-breaking vote both on a show of hands and on a poll. Any shareholder who is entitled to attend and vote at a general meeting may appoint one or more proxies to attend and vote at the meeting on his or her behalf.

The following persons may demand a poll:

the chairman of the meeting,

at least five shareholders present in person or by proxy having the right to vote at the meeting,

any shareholder or shareholders present in person or by proxy and representing at least 10 per cent of the total voting rights of all the shareholders having the right to vote at the meeting, or

any shareholder or shareholders present in person or by proxy and holding shares conferring a right to vote at the meeting on which an aggregate sum has been paid up equal to at least 10 per cent of the total sum paid up on all the shares conferring that right.

Voting rights of Prudential's preference shares will be determined by the directors prior to each tranche of preference shares being issued. Currently, there are no preference shares in issue.

Transfer of Shares

Transfers of shares may be made by an instrument of transfer. An instrument of transfer must be signed by or on behalf of the transferor and, unless the share is fully paid, by or on behalf of the transferee. The transferor remains the holder of the relevant shares until the name of the transferee is entered in the share register. Transfers of shares may also be made by a computer-based system (currently the CREST system) and transferred without a written instrument in accordance with English company law. The directors may in certain circumstances refuse to register transfers of shares, but only if such refusal does not prevent dealings in the shares from taking place on an open and proper basis. If the directors refuse to register a transfer they must send the transferee notice of the refusal within two months.

Changes in Share Capital

Increases in share capital may only take place after approval by shareholders by ordinary resolution. The class and other rights attaching to such new shares may be determined by resolution of the shareholders or may be delegated by the shareholders to the directors. Prudential's directors may issue and allot such new shares if authorized to do so by the shareholders. In addition to any increase, the following changes in share capital may only take place after approval by an ordinary resolution of the shareholders:

share consolidations,

subdivisions of shares, and

cancellations of shares that have not been taken or agreed to be taken by any person.

Reductions in Prudential's issued share capital and share premium account must be approved by a special resolution of the shareholders and must be confirmed by an order of the court. Purchases of Prudential's own shares also require authority to be granted by a special resolution passed by shareholders.

Variation of Rights

If the share capital is divided into different classes of shares, the rights of any class of shares may be changed or taken away only if such measure is approved by an extraordinary resolution passed at a separate meeting of the holders of that class, or with the written consent of at least three quarters of the shares of that class. Two persons holding or representing by proxy at least one-third in nominal amount of the issued shares of the class must be present at such a meeting in person or by proxy to constitute a quorum.

The Board may not authorize, create or increase the amount of, any shares of any class or any security convertible into shares of any class or any security which is convertible into shares of any class ranking, as regards rights to participate in the profits or assets in the Company, in priority to a series or class of preference shares without the consent in writing of at least three-quarters in nominal value of, or the sanction of an extraordinary resolution of the holders of such series or class of preference shares.

Lien

Prudential may not have a lien on fully paid shares.

Shareholders Resident Abroad

Accidental omission to send notices to shareholders shall not invalidate the proceedings of the ensuing meeting. There are no limitations on non-resident or foreign shareholders' rights to own Prudential securities or exercise voting rights where such rights are given under English company law.

Winding-up

Prudential is subject to the general insolvency law applicable to UK companies, which is described in Item 4, "Information on the Company Supervision and Regulation of Prudential UK Supervision and Regulation Application of 2000 Act Regulatory Regime to Prudential Regulation of Insurance Business Winding-up Rules".

Board of Directors

Prudential's board of directors manages Prudential's business. However, Prudential's shareholders must approve certain matters, such as changes to the share capital and the election and re-election of directors. Directors are appointed subject to Prudential's articles of association. Prudential's board of directors may fill vacancies and appoint additional directors who hold office until the next annual general meeting. The articles of association require that each director must have beneficial ownership of a given number of ordinary shares. The number of shares is determined by ordinary resolution at a general meeting and is currently 2,500. The minimum number of directors is eight and the maximum number is twenty. Prudential may vary the limits on the number of directors by special resolution. As at April 30, 2007 there are fourteen members on Prudential's board of directors.

At every annual general meeting, directors who have been in office for three years and have not sought re-election during that time are required to retire by rotation and are eligible for re-election. Shareholders may remove any director before the end of his or her term of office by ordinary resolution and may appoint another person in his or her place by ordinary resolution.

The directors may exercise all the powers of Prudential to borrow money and to mortgage or charge any of its assets provided that the total amount borrowed does not, when aggregated with the total borrowing (which excludes, amongst other things, intra-group borrowings and amounts secured by policies, guarantees, bonds or contracts issued or given by Prudential or its subsidiaries in the course of its business) of all of Prudential's subsidiaries, exceed the aggregate of the share capital and consolidated reserves and of one-tenth of the insurance funds of Prudential and each of its subsidiaries as shown in the most recent audited consolidated balance sheet of the Group prepared in accordance with the Companies Act 1985.

There is no age restriction applicable to directors in Prudential's articles of association.

Disclosure of Interests

Rule 5.1.2R of the UK Listing Authority's Disclosure and Transparency Rules provides that a person (including a company and other legal entities) who acquires voting rights of 3 per cent or more of an English public company's share capital (e.g., Prudential-issued share capital carrying the right to vote in all circumstances at a general meeting of Prudential) is required to notify Prudential of its interest within two trading days following the day on which it acquires that interest, unless the person acquiring the interest is a non-UK issuer, in which case a four-day deadline applies. After the 3 per cent level is exceeded, similar notifications must be made in respect of increases or decreases of 1 per cent or more. In addition a notification is required once the interest falls below 3 per cent.

For the purposes of the notification obligations, the holding of voting rights includes shares or financial instruments, held directly or indirectly, including, for example, voting rights held by a third party with whom the person has concluded an agreement, which obliges them to adopt, by concerted exercise of the voting rights they hold, a lasting common policy towards the management of the issuer in question. The indirect holding of voting rights also includes voting rights which a person may exercise as a proxy where that person can exercise the voting rights at his discretion in the absence of specific instructions from the shareholders.

Some interests in voting rights (e.g., those held by certain investment fund managers) may be disregarded for the purposes of the notification obligation, except at the thresholds of 5 per cent and 10 per cent, applicable to all other notifiable interests in voting rights. In addition, those other notifiable interests must be aggregated with the interests notifiable above 3 per cent.

Section 793 of the Companies Act 1985 provides that a public company may send a written notice to a person whom the company knows or has reasonable cause to believe to be, or to have been at any time during the three years immediately preceding the date on which the notice is issued, interested in the company's shares. The notice may require that person to confirm such an interest in shares, and in case that person holds or has held an interest in those shares, to give additional information relating to that interest and any other interest in the shares of which that person is aware.

Where a company serves notice under the provisions described above on a person who is or was interested in shares of the company and that person fails to give the company the information required by the notice within the time specified in the notice, the company may apply to an English court for an order directing that the shares in question be subject to restrictions prohibiting, among other things, any transfer of those shares, the exercise of voting rights in respect of those shares and, other than in liquidation, payments in respect of those shares.

In addition, under Prudential's articles of association, a shareholder may lose the right to vote his shares if he or any other person appearing to be interested in those shares fails to comply within a prescribed period of time with such a request to give the required information with respect to past or present ownership or interests in those shares, or makes a statement in response to such a request which is in the opinion of the directors false or misleading in any material manner. In the case of holders of 0.25 per cent or more of the issued share capital of Prudential (or any class of the share capital), in addition to disenfranchisement, the sanctions that may be applied by Prudential under its articles of association include withholding the right to receive payment of dividends on those shares, and restrictions on transfers of those shares. In the case of holders of less than 0.25 per cent of the issued share capital of Prudential, the sanction is disenfranchisement alone.

Permitted Operations

Under clause 4 of Prudential's Memorandum of Association, Prudential's principal object is to carry on the business of an investment holding company and, for that purpose to acquire and hold (for itself or as trustee or nominee) securities in any part of the world. Further objects include providing financial, administrative and investment services in its own right and for the companies in which Prudential is interested. In addition, the Memorandum of Association provides that each of the paragraphs setting out its objects is not limited by reference to or inference from the terms of any other paragraph but may be construed in its widest sense.

Directors' Interests

A director may not vote, and is not to be counted in the quorum present at a meeting of the board of directors, in respect of any contract or arrangement in which he has an interest that is (together with any interest of any person connected with him), to his knowledge, a material interest, other than an

interest in shares or debentures of Prudential. This prohibition does not apply to resolutions concerning the following matters:

a guarantee, security or indemnity in respect of money lent or obligations incurred by that director at the request of or for the benefit of Prudential or one of its subsidiaries,

giving a guarantee, security or indemnity in respect of a debt or obligation of Prudential or one of its subsidiaries for which the director has assumed responsibility under a guarantee or indemnity,

any contract by a director to underwrite shares or debentures of Prudential,

any proposal concerning any other company in which a director is interested directly or indirectly, provided that neither he nor anyone connected with him is beneficially interested in 1 per cent or more of any class of the equity share capital of such company (or of any third company through which his interest is derived) or of the voting rights available to shareholders in the relevant company,

any arrangement for the benefit of the employees of Prudential or any of its subsidiaries that only gives the director benefits also given to employees to which the arrangements relate, or

any insurance contract that Prudential proposes to maintain or purchase for the benefit of the directors or for the benefit of persons including any of the directors.

These prohibitions may at any time be suspended or relaxed (generally or in respect of any particular contract, arrangement or transaction) by shareholders in a general meeting.

Directors' remuneration

The remuneration of the executive directors and the Chairman is determined by the Remuneration Committee, which consists of independent, non-executive directors. The remuneration of the non-executive directors is determined by the Board. For further details see Item 6 "Directors, Senior Management and Employees Compensation".

Change of Control

There is no specific provision in Prudential's articles of association that would have an effect of delaying, deferring or preventing a change in control of Prudential and that would operate only with respect to a merger, acquisition or corporate restructuring involving Prudential, or any of its subsidiaries.

Material Contracts

Prudential operates two primary long-term incentive plans to provide rewards to executive directors and most other executive officers. All executive directors receive awards under the Group Performance Share Plan which is contingent upon the achievement of pre-determined returns to shareholders. Executive directors with regional responsibilities also receive awards under the BUPP, contingent upon the financial performance of the relevant region. See Item 6, "Directors, Senior Management and Employees Compensation Senior Executives' Long-term Incentive Plans".

Prudential has also entered into service contracts with executive directors relating to their employment in such capacity. See Item 6, "Directors, Senior Management and Employees Service Contracts".

Exchange Controls

Other than the requirement to obtain the consent of HM Treasury to certain corporate actions, there are currently no UK laws, decrees or regulations that restrict the export or import of capital,

including, but not limited to, foreign exchange controls, or that affect the remittance of dividends or other payments to non-UK residents or to US holders of Prudential's securities, except as otherwise set forth under "Taxation" in this section.

Taxation

The following is a summary, under current law, of the principal UK tax and US federal income tax considerations relating to an investment by a US taxpayer in Prudential ordinary shares or ADSs. This summary applies to you only if:

you are an individual US citizen or resident, a US corporation, or otherwise subject to US federal income tax on a net income basis in respect of the Prudential ordinary shares or ADSs;

you hold Prudential ordinary shares or ADSs as a capital asset for tax purposes; and

if you are an individual, you are neither resident nor ordinarily resident in the United Kingdom for UK tax purposes, and do not hold Prudential ordinary shares or ADSs for the purposes of a trade, profession, or vocation that you carry on in the United Kingdom through a branch or agency or if you are a corporation, you are not resident in the UK for UK tax purposes and do not hold the securities for the purpose of a trade carried on in the United Kingdom through a permanent establishment in the United Kingdom.

This summary does not purport to be a comprehensive description of all of the tax considerations that may be relevant to any particular investor, and does not address the tax treatment of investors that are subject to special rules. Prudential has assumed that you are familiar with the tax rules applicable to investments in securities generally and with any special rules to which you may be subject. You should consult your own tax advisors regarding the tax consequences of the ownership of Prudential ordinary shares or ADSs in the context of your own particular circumstances.

The discussion is based on laws, treaties, judicial decisions, and regulatory interpretations in effect on the date hereof, all of which are subject to change.

Beneficial owners of ADSs will be treated as owners of the underlying Prudential ordinary shares for US federal income tax purposes and for purposes of the July 24, 2001 Treaty between the United States and the United Kingdom. Deposits and withdrawals of Prudential ordinary shares in exchange for ADSs will not result in the realization of gain or loss for US federal income tax purposes.

UK Taxation of Dividends

Under current UK tax law, no tax is required to be withheld in the United Kingdom at source from cash dividends paid to US resident holders.

UK Taxation of Capital Gains

A holder of Prudential ordinary shares or ADSs who for UK tax purposes is a US corporation that is not resident in the United Kingdom will not be liable for UK taxation on capital gains realized on the disposal of Prudential ordinary shares or ADSs unless at the time of disposal:

the holder carries on a trade in the United Kingdom through a permanent establishment in the United Kingdom, and

the Prudential ordinary shares or ADSs are or have been used, held or acquired for use by or for the purposes of such trade or permanent establishment.

Subject to the comments in the following paragraph, a holder of Prudential ordinary shares or ADSs who, for UK tax purposes, is an individual who is neither resident nor not ordinarily resident in the

United Kingdom will not be liable for UK taxation on capital gains realized on the disposal of Prudential ordinary shares or ADSs unless at the time of the disposal:

the holder carries on a trade, profession or vocation in the United Kingdom through a branch or agency, and

the Prudential ordinary shares or ADSs are or have been used, held, or acquired for use by or for the purposes of such trade, profession, or vocation, or for the purposes of such branch or agency.

A holder of Prudential ordinary shares or ADSs who (1) is an individual who has ceased to be both resident and ordinarily resident for UK tax purposes in the United Kingdom, (2) was both resident and ordinarily resident for UK tax purposes in the United Kingdom for at least four out of the seven UK tax years immediately preceding the year in which he or she ceased to be both resident and ordinarily resident in the United Kingdom, (3) continues to be neither resident nor ordinarily resident in the United Kingdom for a period of less than five tax years and (4) disposes of their Prudential ordinary shares or ADSs during that period of non-residence may also be liable, upon becoming both resident and ordinarily resident in the United Kingdom again for UK tax on capital gains, subject to any available exemption or relief, even though he or she was not resident or ordinarily resident in the United Kingdom at the time of the disposal.

UK Inheritance Tax

Prudential ordinary shares are assets situated in the United Kingdom for the purposes of UK inheritance tax (the equivalent of US estate and gift tax). Prudential ADSs are likely to be treated in the same manner as the underlying Prudential ordinary shares are situated in the United Kingdom. Subject to the discussion of the UK-US estate tax treaty in the next paragraph, UK inheritance tax may apply if an individual who holds Prudential ordinary shares or ADSs gifts them or dies even if he or she is neither domiciled in the United Kingdom nor deemed to be domiciled there under UK law. For inheritance tax purposes, a transfer of Prudential ordinary shares or ADSs at less than full market value may be treated as a gift for these purposes. Special inheritance tax rules apply (1) to gifts if the donor retains some benefit, (2) to close companies and (3) to trustees of settlements.

However, as a result of the UK-US estate tax treaty, Prudential ordinary shares or ADSs held by an individual who is domiciled in the United States for the purposes of the UK-US estate tax treaty and who is not a UK national will not be subject to UK inheritance tax on that individual's death or on a gift of the Prudential ordinary shares or ADSs unless the Prudential ordinary shares or ADSs:

are part of the business property of a permanent establishment of an enterprise in the United Kingdom, or

pertain to a fixed base in the UK used for the performance of independent personal services.

The UK-US estate tax treaty provides a credit mechanism if the Prudential ordinary shares or ADSs are subject to both UK inheritance tax and to US estate and gift tax.

UK Stamp Duty and Stamp Duty Reserve Tax

UK stamp duty is payable on a transfer of, and UK stamp duty reserve tax is payable upon a transfer or issue of, Prudential ordinary shares to the depository of Prudential ordinary shares that is responsible for issuing ADSs (the "ADS Depository"), or a nominee or agent of the ADS depository, in exchange for American Depository Receipts ("ADRs") representing ADSs. For this purpose, the current rate of stamp duty and stamp duty reserve tax is 1.5 per cent (rounded up, in the case of stamp duty, to the nearest £5). Where Prudential ordinary shares are transferred to the ADS depository, the rate is applied, in each case, to the amount or value of the consideration given for the Prudential ordinary

shares or, in some circumstances where consideration is not in money, to the value of the Prudential ordinary shares at the time of transfer. To the extent that such stamp duty is paid on any such transfer of Prudential ordinary shares, no stamp duty reserve tax should be payable on that transfer. Where Prudential ordinary shares are issued to the ADS depository the rate is applied, in such case, to the issue price.

Provided that the instrument of transfer is not executed in the United Kingdom and remains at all subsequent times outside the United Kingdom, no UK stamp duty will be required to be paid on any transfer of Prudential ADRs representing ADSs. A transfer of Prudential ADRs representing ADSs will not give rise to a liability to stamp duty reserve tax.

A transfer for value of Prudential ordinary shares, as opposed to ADSs, will generally give rise to a charge to UK stamp duty or stamp duty reserve tax at the rate of 0.5 per cent (rounded up, in the case of stamp duty, to the nearest £5). The rate is applied to the price payable for the relevant Prudential ordinary shares. To the extent that stamp duty is paid on a transfer of Prudential ordinary shares, no stamp duty reserve tax should be payable on that transfer. A transfer of ordinary shares from a nominee to its beneficial owner, including a transfer of underlying Prudential ordinary shares from the ADS depository or its nominee to an ADS holder, is subject to stamp duty at the fixed rate of £5 per transfer and is not subject to stamp duty reserve tax.

UK stamp duty is usually paid by the purchaser. Although stamp duty reserve tax is generally the liability of the purchaser, any such tax payable on the transfer or issue of Prudential ordinary shares to the ADS depository or its nominee will be payable by the ADS depository as the issuer of the ADSs. In accordance with the terms of the Deposit Agreement, the ADS depository will recover an amount in respect of such tax from the initial holders of the ADSs.

US Federal Income Tax Treatment of Distributions on Prudential Ordinary Shares or ADSs

If Prudential pays dividends, you must include those dividends in your income when you receive them. The dividends will be treated as foreign source income. You should determine the amount of your dividend income by converting pounds sterling into US dollars at the exchange rate in effect on the date of your (or the depository's, in the case of ADSs) receipt of the dividend. Subject to certain exceptions for short-term and hedged positions, the US dollar amount of dividends received by an individual before January 1, 2011 will be subject to taxation at a maximum rate of 15 per cent if the dividends are "qualified dividends." Dividends received with respect to the ordinary shares or ADSs will be qualified dividends if Prudential was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid, a passive foreign investment company ("PFIC"). Based on Prudential's audited financial statements and relevant market data, Prudential believes that it was not treated as a PFIC for US federal income tax purposes with respect to its 2006 taxable year. In addition, based on Prudential's audited financial statements and its current expectations regarding the value and nature of its assets, the sources and nature of its income, and relevant market data, Prudential does not anticipate becoming a PFIC for its 2007 taxable year.

Capital Gains

If you sell your Prudential ordinary shares or ADSs, you will recognize a capital gain or loss. A gain on the sale of Prudential ordinary shares or ADSs held for more than one year will be treated as a long-term capital gain. The net long-term capital gain recognized before 2011 generally is subject to taxation at a maximum rate of 15 per cent. Your ability to offset capital losses against ordinary income is subject to limitations.

US Information Reporting and Backup Withholding

Under the US tax code, a US resident holder of Prudential ordinary shares or ADSs may be subject, under certain circumstances, to information reporting and possibly backup withholding with respect to dividends and proceeds from the sale or other disposition of Prudential ordinary shares or ADSs, unless the US resident holder provides proof of an applicable exemption or correct taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. Any amount withheld under the backup withholding rules is not additional tax and may be refunded or credited against the US resident holder's federal income tax liability, so long as the required information is furnished to the IRS.

Documents on Display

Prudential is subject to the informational requirements of the Securities Exchange Act of 1934 applicable to foreign private issuers. In accordance with these requirements, Prudential files its Annual Report on Form 20-F and other documents with the Securities and Exchange Commission. You may read and copy this information at the following location:

Public Reference Room
100 F Street, N.E.
Room 1580
Washington, D.C. 20549

Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. Copies of these materials can also be obtained by mail at prescribed rates from the Public Reference Section of the Securities and Exchange Commission, 100 F Street, N.E., Room 1580, Washington, D.C. 20549. In addition, some of Prudential's filings with the Securities and Exchange Commission, including all those filed on or after November 4, 2002 are available on the Securities and Exchange Commission's website at <http://www.sec.gov>, and on the New York Stock Exchange's website at <http://www.nyse.com/>.

Prudential also files reports and other documents with the London Stock Exchange. This information may be viewed on the London Stock Exchange's website at <http://www.londonstockexchange.com>, and those reports and documents not filed electronically may be viewed at the Document Viewing Facility, UK Listing Authority, Financial Services Authority, 25 The North Colonnade, Canary Wharf, London E14 5HS, UK. All reports and other documents filed with the London Stock Exchange are also published on Prudential's website at <http://www.prudential.co.uk>.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

RISK MANAGEMENT OF PRUDENTIAL

Overview

A significant part of the Group's business involves the acceptance and management of risk. The Group's risk management model requires the primary responsibility for risk management at an operational level to rest with business unit chief executives. The second line of defense of risk comprises oversight functions reporting to the Group Chief Executive together with business unit risk functions and risk management committees. The third line of defense comprises independent assurance from Internal Audit reporting to business unit and Group audit committees.

The Group Risk Framework requires that all of the Group's businesses and functions establish processes for identifying, evaluating and managing the key risks faced by the Group. The risk management of the Group has been given additional focus by the creation in 2005 of a new role of

Group Chief Risk Officer ("CRO"). The CRO oversees all aspects of the Group's risk management, including Financial Risk, Operational Risk, Compliance, and for management purposes, Internal Audit.

As a provider of financial services, including insurance, the Group's business is the managed acceptance of risk. The system of internal control is an essential and integral part of the risk management process. As part of the annual preparation of its business plan, all of the Group's businesses and functions are required to carry out a review of risks. This involves an assessment of the impact and likelihood of key risks and of the effectiveness of the controls in place to manage them. The assessment is reviewed regularly throughout the year. In addition, business units evaluate opportunities and risks against business objectives regularly with the Group Chief Executive, Group Finance Director and the Group Chief Risk Officer.

Businesses are required to confirm annually that they have undertaken risk management during the year as required by the Group Risk Framework and that they have reviewed the effectiveness of the system of internal control. The results of these reviews are reported to the Audit Committee, together with the confirmation that the processes described above as required by the Group Risk Framework were in place throughout the period covered by the report. The businesses also confirm that they complied with Internal Control: Guidance on the Combined Code (the Turnbull guidance). In addition, Internal Audit executes a comprehensive risk-based audit plan throughout the Group, with all significant issues arising from the audit reported to the Group Audit Committee.

The Group's internal control framework includes detailed procedures set down in financial and actuarial procedure manuals. The Group prepares an annual business plan with three-year projections. Executive management and the Board receive monthly reports on the Group's actual performance against plan, together with updated forecasts.

The insurance operations of the Group all prepare a financial condition report which is presented to the Board, together with regular reports from the Group Finance Director on the financial position of the Group.

Major risks

Specific business environmental and operational risks are discussed under Item 3, "Key Information Risk Factors" and Item 5, "Operating and Financial Review and Prospects Factors Affecting Results of Operations". Risks discussed under Item 4, "Information on the Company Business of Prudential" include "Business of Prudential UK Compliance" and "Business of Prudential Legal Proceedings".

Financial risks

Foreign exchange risk

Prudential faces foreign exchange risk, primarily because its presentation currency is pounds sterling, whereas approximately 64 per cent of Prudential's profit after tax for the year ended December 31, 2006 came from Prudential's US and Asian operations. The exposure relating to the translation of reported earnings is not separately managed although its impact is reduced by interest payments on foreign currency borrowings and by the adoption of average exchange rates for the translation of foreign currency revenues.

Approximately 76 per cent of the Group's IFRS basis shareholders' funds at December 31, 2006 arose in Prudential's US and Asian operations. To mitigate the exposure of the US component there are \$1.55 billion of borrowings held centrally. The Group has also entered into a series of forward currency transactions which together form a \$2 billion net investment hedge. Net of the currency position arising from these instruments some 43 per cent of the Group's shareholders' funds are represented by net assets in currencies other than sterling.

Liquidity risk

Liquidity risk is the risk that Prudential may be unable to meet payment of obligations in a timely manner at a reasonable cost or the risk of unexpected increases in the cost of funding at appropriate maturities or rates. Liquidity management in each business seeks to ensure that, even under adverse conditions, Prudential has access to the funds necessary to cover surrenders, withdrawals and maturing liabilities.

In practice, most of Prudential's invested assets are marketable securities. This, combined with the fact that a large proportion of the liabilities contain discretionary surrender values or surrender charges, reduces the liquidity risk. The Group maintains committed borrowing and securities lending facilities.

Credit risk

Credit risk is the risk that a counterparty or an issuer of securities, which Prudential holds in its asset portfolio, defaults or another party fails to perform according to the terms of the contract. Some of Prudential's businesses, in particular Jackson, Egg, the PAC with-profits fund and Prudential's UK pension annuity business, hold large amounts of interest-sensitive investments that contain credit risk on which a certain level of defaults is expected. These expected losses are considered when Prudential determines the crediting rates, deposit rates and premium rates for the products that will be supported by these assets. The key shareholder businesses exposed to credit risks are Jackson and Egg.

Certain over-the-counter derivatives contain a credit risk element that is controlled through evaluation of collateral agreements and master netting agreements on interest rate and currency swaps. Prudential is also exposed to credit-related losses in the event of non-performance by counterparties.

Operational, compliance and fiscal risk

Operational risk can result from a variety of factors, including failure to obtain proper internal authorizations or maintain internal controls, failure to document transactions properly, failure of operational and information security procedures or other procedural failures, computer system or software failures, other equipment failures, fraud, inadequate training or errors by employees. Compliance with internal rules and procedures designed to manage these risks is monitored by Prudential's local management boards.

Internal compliance managers who report to the local management boards monitor adherence to local regulatory requirements. The head of Prudential's Group Compliance function reports directly to the Group Chief Risk Officer who submits regular reports to the Board of Directors.

Compliance risk includes the possibility that transactions may not be enforceable under applicable law or regulation as well as the cost of rectification and fines, and also the possibility that changes in law or regulation could adversely affect Prudential's position. Prudential seeks to minimize compliance risk by seeking to ensure that transactions are properly authorized and by submitting new or unusual transactions to legal advisors for review.

Prudential is exposed to certain fiscal risks arising from changes in tax laws and enforcement policies and in reviews by taxation authorities of tax positions taken by Prudential in recent years. Prudential manages this risk and risks associated with changes in other legislation and regulation through ongoing review by relevant departments of proposed changes to legislation and by membership of relevant trade and professional committees involved in commenting on draft proposals in these areas.

Market risk

Market risk is the risk that future changes in market prices may make a financial instrument less valuable. The primary market risks Prudential faces are equity risk and interest rate risk because most of

its assets are investments that are either equity type investments and subject to equity price risk, or bonds, mortgages or cash deposits, the values of which are subject to interest rate risk. The amount of risk borne by Prudential's shareholders depends on the extent to which its customers share the investment risk through the structure of Prudential's products.

The split of Prudential's investments between equity investments and interest-sensitive instruments depends principally on the type of liabilities supported by those investments and the amount of capital Prudential has available. This mix of liabilities allows Prudential to invest a substantial portion of its investment funds in equity and property investments that Prudential believes produce greater returns over the long term. On the other hand Prudential has some liabilities that contain guaranteed returns and allow instant access (for example, interest-sensitive fixed annuities, immediate annuities and fixed rate customer bank deposits), which generally will be supported by fixed income investments.

To reduce investment, interest rate and foreign exchange exposures, and to facilitate efficient investment management, Prudential uses derivative instruments. Prudential's policy is that cash or corresponding assets cover amounts at risk through derivative contracts.

Asset/liability management

Prudential manages its assets and liabilities locally, in accordance with local regulatory requirements and reflecting the differing types of liabilities Prudential has in each business. As a result of the diversity of products offered by Prudential and the different regulatory environments in which it operates, Prudential employs different methods of asset/liability management, on both an in-force and new business basis. Stochastic modeling of assets and liabilities is undertaken in the Group's insurance operations to assess economic capital requirements for different confidence intervals and time horizons. In addition, reserve adequacy testing under a range of scenarios and dynamic solvency analysis is carried out, including under certain scenarios mandated by the US, the UK and Asian regulators.

A stochastic approach models the inter-relationship between asset and liability movements, taking into account asset correlation and policyholder behavior, under a large number of possible scenarios. These scenarios are projected forward over a period of time, typically 25 years or longer, and the liabilities and solvency position of the fund are calculated in each scenario in each future year. This allows the identification of which extreme scenarios will have the most adverse effects and what the best estimate outcome may be. The fund's policy on management actions, including bonus and investment policy, are then set in order that they are consistent with the available capital and the targeted risk of default. This differs from a deterministic model, which would only consider the results from one carefully selected scenario.

For businesses that are most sensitive to interest rate changes, such as immediate annuity business, Prudential uses cash flow analysis to create a portfolio of fixed income securities whose value changes in line with the value of liabilities when interest rates change. This type of analysis helps protect profits from changing interest rates. In the United Kingdom, the cash flow analysis is used in Prudential's annuity and banking business while, in the United States, it is used for its interest-sensitive and fixed index annuities and stable value products such as Guaranteed Investments Contracts (GICs). Perfect matching is not possible for interest-sensitive and fixed index annuities because of the nature of the liabilities (which include guaranteed surrender values) and options for prepayment contained in the assets. The US supervisory authorities require Jackson to calculate projections to test Jackson's ability to run off its liabilities with assets equal to statutory reserves in a number of specified future economic scenarios. If Jackson is unable to satisfy all of these tests, which are carried out at least annually, then it may be required to establish additional statutory reserves.

For businesses that are most sensitive to equity price changes, Prudential uses stochastic modeling and scenario testing to look at the expected future returns on its investments under different scenarios that best reflect the large diversity in returns that equities can produce. This allows Prudential to devise

an investment and with-profits policyholder bonus strategy that, on the model assumptions, allows it to optimize returns to its policyholders and shareholders over time while maintaining appropriate financial strength. Prudential uses this method extensively in connection with its UK with-profits business.

When presenting regulatory returns to the UK supervisory authorities, the calculation of the statutory liabilities for solvency purposes on the FSA's Peak 1 basis is required to incorporate a "resilience" reserve that is sufficient to ensure that assets equal to the statutory reserves (including the resilience reserve) remain equal to statutory reserves in the event of certain prescribed changes in equity and real estate prices combined with prescribed rises and falls in interest yields.

All of Prudential's investments are held either for risk management or investment purposes. This is because almost all of the investments support policyholder or customer liabilities of one form or another. Any assets that Prudential holds centrally that are not supporting customer liabilities are predominantly invested in short-term fixed income and fixed maturity securities.

Use of derivatives

In the United Kingdom and Asia, Prudential uses derivatives to reduce equity risk, interest rate and currency exposures, and to facilitate efficient investment management. In the United States, Prudential uses derivatives to reduce interest rate risk, to facilitate efficient portfolio management and to match liabilities under fixed index annuities policies.

These derivatives are used for efficient portfolio management to obtain cost effective and efficient exposure to various markets in accordance with the Group's investment strategies and to manage exposure to interest rate, currency, credit and other business risks.

The Group uses the various interest rate derivative instruments, such as interest rate swaps to reduce exposure to interest rate volatility.

The UK insurance operations use various currency derivatives in order to limit volatility due to foreign currency exchange rate fluctuations arising on securities denominated in currencies other than Sterling. In addition, total return swaps and interest rate swaps are held for efficient portfolio management.

As part of the efficient portfolio management of the PAC with-profits fund, the fund may, from time to time, invest in cash-settled forward contracts over Prudential plc shares, which are accounted for consistently with other derivatives. This is in order to avoid a mismatch of the with-profits investment portfolio with the investment benchmarks set for its equity-based investment funds. The contracts will form part of the long-term investments of the with-profits fund. These contracts are subject to a number of limitations for legal and regulatory reasons.

Some of the Group's products, especially those sold in the United States, have certain guarantee features linked to equity indexes. A mismatch between product liabilities and the performance of the underlying assets backing them exposes the Group to equity index risk. In order to mitigate this risk, the relevant business units purchase swaptions, equity options and futures to match asset performance with liabilities under equity-indexed products.

The US operations and some of the UK operations hold large amounts of interest-rate sensitive investments that contain credit risks on which a certain level of defaults is expected. These entities have purchased some swaptions in order to manage the default risk on certain underlying assets and hence reduce the amount of regulatory capital held to support the assets.

Egg used derivative instruments for the purpose of supporting the strategic and operational business activities and reducing and eliminating the risk of loss arising from changes in interest rates and foreign exchange rates. Derivatives were used solely to hedge risk exposures and Egg did not take any trading position in derivatives.

For the purpose of reducing interest rate risk, Egg used a number of derivative instruments, including interest rate swaps and forward agreements. Additionally, swaps were used to provide caps to the funding cost of the credit card product.

Egg also made general use of credit default swaps to manage credit risk without changing the underlying product or investment portfolios.

For the purpose of reducing currency risk, Egg used forward exchange contracts and currency swaps.

It is Prudential's policy that cash or corresponding assets cover amounts at risk through derivative transactions. Derivative financial instruments used to facilitate efficient portfolio management and for investment purposes are carried at fair value with changes in fair value included in the income statement.

Group overview

UK Business

For risk management purposes, the UK asset portfolio is divided into assets that support non-linked life and pensions business, pension annuity business, unit-linked business and banking business. The assets of the insurance business and the banking business are shown in note D2 and E2 to the financial statements, respectively.

Non-linked life and pensions Business

For with-profits business, the absence of guaranteed surrender values and the flexibility given by the operation of the bonus system means that the majority of the investments backing the with-profits business are in equities and real estate with the balance in debt securities, deposits and loans.

The investments supporting the protection business are small in value and tend to be fixed maturities reflecting the guaranteed nature of the liabilities.

Pension Annuity Business

Prudential's UK annuity business employs fixed income investments (including UK retail price index-linked assets) because the liabilities consist of guaranteed payments for as long as each annuitant or surviving partner is alive. Retail price index-linked assets are used to back pension annuities where the payments are linked to the retail price index.

Unit-linked Business

Except through the second order effect on investment management fees, the unit-linked business of the UK insurance operations is not exposed to market risk. The lack of exposure arises from the contract nature whereby policyholder benefits reflect asset value movements of the unit-linked funds.

Banking Business

The assets of Prudential's UK banking business consisted of retail mortgages, credit card receivables and personal loans, while the liabilities comprised mostly customer deposits. To the extent that customer deposits exceeded loans, mortgages and credit card receivables, the banking business purchased money market assets.

The primary market risk to which Egg was exposed is interest rate risk. Interest rate risk arose in Egg as a result of fixed rate, variable rate and non-interest bearing assets and liabilities. Exposure to

interest rate movements arose when there was a mismatch between interest rate sensitive assets and liabilities.

The composition of interest rate risk was closely monitored and managed on a day-to-day basis by Egg's treasury function where professional expertise and systems existed to control it. This was primarily done via asset and liability models that look at the sensitivity of earnings to movements in interest rates to measure overall exposure which may then be hedged in accordance with the policy limits set by management.

The risks arising from assets and liabilities denominated in foreign currencies were managed by Egg's treasury function within agreed limits set by management. Cash flows generated by the foreign currency assets and liabilities were hedged by using derivative contracts to manage exposure to exchange rate fluctuations.

US Business

Jackson's main exposures to market risk are through its exposure to interest rate risk and equity risk. Approximately 89 per cent of its general account investments support interest-sensitive and fixed-indexed annuities, life business and surplus and 11 per cent support institutional business. All of these types of business contain considerable interest rate guarantee features and, consequently, require that the assets that support them are primarily fixed income or fixed maturity.

Prudential is exposed primarily to the following risks in the United States arising from fluctuations in interest rates:

the risk of loss related to meeting guaranteed rates of accumulation following a sharp and sustained fall in interest rates;

the risk of loss related to policyholder withdrawals following a sharp and sustained increase in interest rates; and

the risk of mismatch between the expected duration of certain annuity liabilities and prepayment risk and extension risk inherent in mortgage-backed securities.

Jackson enters into financial derivative transactions, including swaps, forwards, put-swaptions, futures and options to reduce and manage business risks. These transactions manage the risk of a change in the value, yield, price, cash flows, or quantity of, or a degree of exposure with respect to assets, liabilities or future cash flows, which Jackson has acquired or incurred.

The types of derivative used by Jackson and their purpose are as follows:

interest rate swaps generally involve the exchange of fixed and floating payments over the life of the agreement without an exchange of the underlying principal amount. These agreements are used for hedging purposes. At December 31, 2006, the notional amount of interest rate swaps held by Jackson was an asset of £2,407 million and a liability of £1,988 million;

put-swaption contracts provide the purchaser with the right, but not the obligation, to require the writer to pay the present value of a long-duration interest rate swap at future exercise dates. Jackson purchases and writes put-swaptions with maturities up to 10 years. On a net basis, put-swaptions hedge against significant upward movements in interest rates. At December 31, 2006 the notional amount of put swaption contracts held by Jackson was an asset of £13,540 million and a liability of £11,751 million;

equity index futures contracts and equity index call and put options are used to hedge Jackson's obligations associated with its issuance of fixed indexed immediate and deferred annuities and certain variable annuity guarantees. These annuities and guarantees contain embedded options which are fair valued for accounting and financial reporting purposes. At December 31, 2006, the

Edgar Filing: PRUDENTIAL PLC - Form 20-F

notional amount of equity index futures contracts and equity index call and put options held by Jackson was an asset of £3,291 million and a liability of £286 million;

total return swaps in which Jackson receives equity returns or returns based on reference pools of assets in exchange for short-term floating rate payments based on notional amounts, are held for both hedging and investment purposes. At December 31, 2006, the notional amount of total return swaps held by Jackson was an asset of £230 million and a liability of £65 million; and

cross-currency swaps, which embody spot and forward currency swaps and additionally, in some cases, interest rate swaps and equity index swaps, are entered into for the purpose of hedging Jackson's foreign currency denominated funding agreements supporting trust instrument obligations. At December 31, 2006, the notional amount of cross-currency swaps held by Jackson was an asset of £537 million and a liability of £26 million.

Jackson is exposed to equity risk through the options embedded in Jackson's fixed indexed liabilities and guarantees included in certain variable annuity benefits including guaranteed minimum death benefit ("GMDB") and guaranteed minimum withdrawal benefit ("GMWB"). This risk is managed using a comprehensive equity hedging program to minimize the risk of a significant economic impact as a result of increases or decreases in equity market levels while taking advantage of naturally offsetting exposures in Jackson's operations. Jackson purchases external futures and options that hedge the risks inherent in these products, while also considering the impact of rising and falling separate account fees. As a result of this hedging program, if the equity markets were to increase, Jackson's free-standing derivatives would decrease in value. However, over time, this movement would be broadly offset by increased separate account fees and reserve decreases, net of the related changes to amortization of deferred acquisition costs. Due to the nature of the free-standing and embedded derivatives, this hedge, while highly effective on an economic basis, may not completely mute the immediate impact of the market movements as the free-standing derivatives reset immediately while the hedged liabilities reset more slowly and fees are recognized prospectively. It is estimated that an immediate increase in the equity markets of 10 per cent would result in a net accounting charge of up to £20 million, excluding the impact on future separate account fees. The actual impact on financial results would vary contingent upon the volume of new product sales and lapses, changes to the derivative portfolio, correlation of market returns and various other factors including volatility, interest rates and elapsed time.

For risk management purposes, the US general account portfolio is divided substantially into assets that support the interest-sensitive life and fixed annuity business, the institutional business and the fixed indexed business. Jackson hedges the equity return risk on fixed indexed products by purchasing futures and options on the relevant index.

Asian Business

In Asia, Prudential sells with-profits and unit-linked policies and, although the with-profits business generally has a lower terminal bonus element than in the United Kingdom, the investment portfolio still contains a proportion of equities and, to a lesser extent, property. Non-participating business is largely backed by debt securities or deposits. With the principal exception of Taiwan's whole of life policy book, as described below, the exposure to market risk of the Group arising from its Asian operations is at modest levels. This arises from the fact that the Group's Asian operations have a balanced portfolio of with-profits, unit-linked and other types of business.

The in-force business of the Group's Taiwan life insurance operation includes traditional whole of life policies where the premium rates have been set by the regulator at different points for the industry as a whole. Premium rates were set to give a guaranteed minimum sum assured on death and a guaranteed surrender value on early surrender, based on prevailing interest rates at the time of policy issue. Premium rates also included allowance for mortality and expenses. The required rates of guarantee have fallen over time as interest rates have reduced from a high of eight per cent to current

levels of around two per cent. The current low level of bond rates in Taiwan gives rise to a negative spread against the majority of these policies. The current cash cost of funding in-force negative spread in Taiwan is around £40 million a year.

The profits attaching to these contracts are particularly affected by the rates of return earned, and estimated to be earned, on the assets held to cover liabilities and on future investment income and contract cash flows. The adequacy of the insurance contract liabilities is tested by reference to best estimates of expected investment returns on policy cash flows and reinvested income. The assumed earned rates are used to discount the future cash flows. The assumed earned rates consist of a long-term best estimate determined by consideration of long-term market conditions and rates assumed to be earned in the trending period. For 2005, it was projected that rates of return for Taiwanese bond yields would trend from the then current levels of some two per cent to 5.5 per cent by December 31, 2012. For 2006, it has been assumed that the long-term bond rate will be attained one year later, i.e. by December 31, 2013.

The liability adequacy test results are sensitive to the attainment of the trended rates during the trending period. Based on the current asset mix, margins in other contracts that are used in the assessment of the liability adequacy tests, and currently assumed future rates of return, if interest rates were to remain at current levels in 2007 and the target date for attainment of the long-term bond yield deferred to December 31, 2014, the premium reserve, net of deferred acquisition costs, would be broadly sufficient. If interest rates were to remain at current levels in 2008 with a further one year delay in the progression period, then some level of write-off of deferred acquisition costs may be necessary. However, the amount of the charge, based on current in-force business, which is estimated at £70-90 million, is sensitive to the previously mentioned variables.

Furthermore, the actual amount of any write-off would be affected by the impact of new business written between December 31, 2006 and the future reporting dates to the extent that the business is taken into account as part of the liability adequacy testing calculations for the portfolio of contracts.

The adequacy of the liability is also sensitive to the level of the projected long-term rate. The current long-term assumption of 5.5 per cent has been determined on a prudent best estimate basis by reference to detailed assessments of the financial dynamics of the Taiwanese economy. In the event that the rate applied was altered, the carrying value of the liabilities would potentially be affected.

At December 31, 2006, if the assumed long-term bond yield applied had been reduced by 0.5 per cent from 5.5 per cent to 5.0 per cent and continued to apply the same progression period to December 31, 2013, by assuming bond yields increase from current levels in equal annual installments to the long-term rate, the premium reserve, net of deferred acquisition costs, would have been insufficient and there would have been a charge of some £60 million to the income statement. The impact of reducing the long-term rate by a further 0.5 per cent to 4.5 per cent would have increased this charge by some £160 million. The primary reason for the reduced level of charge for the initial 0.5 per cent reduction is the current level of margins in the liability adequacy calculation. The effects of additional 0.5 per cent reductions in the assumed long-term rate below 4.5 per cent would be of a similar or slightly higher level to the £160 million noted previously. The effects of changes in any one year reflect the combination of the short-term and long-term factors described above.

Currency of Investments

Prudential's investments are generally held in the same currency as its liabilities and, accordingly, pound sterling liabilities will generally be supported by pound sterling assets and US dollar liabilities will generally be supported by US dollar assets. However, where Prudential believes it is appropriate, it holds some non-domestic equities in the equity portfolios in the belief that this diversifies the overall portfolio risk.

As at December 31, 2006, the Group held 16 per cent of its financial assets in currencies, mainly US dollar and Euro, other than the functional currency of the relevant business unit.

The financial assets, of which 90 per cent are held by the PAC with-profits fund, allow the PAC with-profits fund to obtain exposure to foreign equity markets.

The exchange risks inherent in these exposures are mitigated through the use of derivatives, mainly forward currency contracts.

Currency of Core Borrowings

Prudential is subject to certain interest rate risk and foreign exchange risk on its core borrowings. At December 31, 2006, there was £1,825 million of pounds sterling debt, £890 million, or \$1,800 million, of US dollar debt and £348 million, or €520 million of Euro debt. £2,077 million of the core debt was at fixed rates of interest and £986 million has been swapped into floating rates of interest.

Foreign currency borrowings that have been used to provide a hedge against Group equity investments in overseas subsidiaries are translated at year end exchange rates and gains and losses are taken directly to shareholders' equity. Other foreign currency monetary items are translated at year end exchange rates with changes recognized in the income statement. Foreign currency transactions are translated at the spot rate prevailing at the time.

Sensitivity Analysis

Prudential is sensitive to interest rate movements, movements in the values of equities and real estate and foreign exchange fluctuations.

Foreign Exchange Rate Risk

Prudential's primary foreign exchange risk relates to the translation of the US operations' profits into pounds sterling. The potential exposure to a 10 per cent adverse fluctuation (appreciation of pounds sterling) in the average US dollar/pounds sterling exchange rates for the years ended December 31, 2006, 2005 and 2004 would have been a reduction in profit after tax of £32 million, £37 million and £34 million in 2006, 2005 and 2004, respectively. Prudential believes this to be a reasonably possible near-term market change.

Interest Rate Risk Investments

The following table quantifies the estimated reduction in fair value of investments at December 31, 2006 and 2005, resulting from a 100 basis point increase in interest rates at each date. Prudential believes this to be a reasonably possible near-term market change for both UK and US interest rates.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Amounts in this table do not include investments backing unit-linked, unit trust and variable annuity business.

	December 31, 2006		December 31, 2005

Total	78,877	5,515	81,051	5,748

A 100 basis point increase in interest rates would have reduced the fair value of the total investments by £5,515 million and £5,748 million at December 31, 2006 and 2005, respectively. The change in estimated reduction in fair value relates primarily to the increase in interest sensitive assets held. The profit impact would be as follows:

United Kingdom with-profits fund (including Prudential Annuities Limited). Of the reduction in value, £2,620 million and £2,632 million, at December 31, 2006 and 2005, respectively, relates to debt securities, which are designated as fair value through profit and loss in accordance with IAS39. This reduction would be borne in the first instance by the unallocated surplus. Consequently, the impact on profit would be limited to the impact on current and future bonus declarations and the impact to shareholders would be limited to a maximum of one-ninth of the total cost of declared bonuses. The loans and receivables are held at amortized cost and therefore changes in fair value do not directly affect profit.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

United Kingdom SAIF. The reduction of £339 million and £377 million relates to debt securities at December 31, 2006 and 2005, respectively. This reduction would not impact profit because the profits of this business are wholly attributable to the former Scottish Amicable policyholders.

United Kingdom shareholder-backed annuities and other insurance. The reduction in value of £1,576 million and £1,474 million at December 31, 2006 and 2005, respectively, would be directly reflected in profit.

United States insurance. Of the reduction in value of £975 million and £1,227 million at December 31, 2006 and 2005, respectively, £857 million and £1,095 million would be reflected in equity as the US operations debt securities are mostly held at available-for-sale. £118 million and £132 million at December 31, 2006 and 2005, respectively, would not directly be reflected in profit as loans and receivables are held at amortized cost.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Interest Rate Risk Long-term Debt

The table below quantifies the estimated increase in fair value of long-term borrowings at December 31, 2005 and 2004, resulting from a 100 basis point reduction in interest rates at those dates. The carrying value of short-term borrowings, which approximates their fair value, would not be materially increased by a 100 basis point reduction in interest rates. Prudential believes this to be a reasonably possible near-term market change for interest rates.

(1)

Edgar Filing: PRUDENTIAL PLC - Form 20-F

In February 2006, £1.3 million of the original bond issue of £250 million was redeemed.

(2)

The €500 million 5.75 per cent borrowings have been swapped into borrowings of £333 million with interest payable at six month £Libor plus 0.962 per cent.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

- (3) Interest on the \$1,000 million 6.5 per cent borrowings has been swapped into floating rate payments at three month \$Libor plus 0.80 per cent.
- (4) Interest on the \$300 million 6.5 per cent borrowings has been swapped into floating rate payments at three month \$Libor plus 0.0225 per cent.
- (5) The €20 million Medium Term Subordinated Notes were issued at 20-year Euro Constant Maturity Swap (capped at 6.5 per cent). These have been swapped into borrowings of £14 million with interest payable at three month £Libor plus 1.2 per cent.

There is no impact on profit at December 31, 2006 and 2005 as a result of these reductions in interest rates because the liabilities are recognized in the financial statements at carrying value, which is equal to their amortized cost.

Equity Market Risk

The following table quantifies the estimated reduction in fair value of investments at December 31, 2006 and 2005, resulting from a 10 per cent decline in the value of equity and real estate values at each date. Prudential believes this to be a reasonably possible near-term market change for both UK and US equities and for both UK and US real estate. Amounts in this table do not include investments backing unit-linked, unit trust and variable annuity business. Prudential does not hold equity investments in its UK banking portfolio.

	December 31, 2006		December 31, 2005

218

Edgar Filing: PRUDENTIAL PLC - Form 20-F

As shown by the table above, a 10 per cent decline in the value of equities and real estate would reduce the value of those investments by £6,137 million and £5,994 million at December 31, 2006 and 2005, respectively.

For the United Kingdom with-profits fund the reduction in fair value of £5,180 million and £5,030 million for December 31, 2006 and 2005, respectively, would be borne in the first instance by the unallocated surplus. Consequently the impact on profit would be limited to the impact on current and future bonus declarations and the impact to shareholders would be limited to a maximum of one-ninth of the total cost of declared bonuses.

For SAIF, the reduction in fair value of £895 million and £911 million for December 31, 2006 and 2005, respectively, would not impact profit because the profits of this business are wholly attributable to the former Scottish Amicable policyholders.

The remaining reduction in fair value of £62 million and £53 million for December 31, 2006 and 2005, respectively, would be directly reflected in profit.

Derivative Contracts

At December 31, 2006 and 2005, the net market value exposure of derivatives was a gain of £294 million and a loss of £134 million, respectively. The tables below show the sensitivity of those derivatives, measured in terms of fair value, to equity and real estate market increases and decreases of 10 per cent and to interest rate increases and decreases of 100 basis points. Prudential believes these increases and decreases to be reasonably possible near-term market changes. These exposures will change as a result of ongoing portfolio and risk management activities.

Long-term Insurance Contracts

At December 31, 2006 and 2005, the aggregate carrying value of total policyholder liabilities and unallocated surplus of with-profits funds net of the reinsurance share of insurance contract liabilities was £177,709 million and £169,112 million, respectively, and the fair value was estimated to be £171,314 million and £164,005 million, respectively. The fair value of the policyholder liabilities and the unallocated surplus is sensitive to changes in the fair value of investments in the with-profits fund because increases in the fair value of such investments would result in increases in future bonuses for the with-profits contracts. A 10 per cent increase in the fair value of total investments would result in an increase in the fair value of the technical provisions and the fund for future appropriations of £17,131 million and £16,401 million at December 31, 2006 and 2005, respectively. Prudential believes this to be a reasonably possible near-term market change for the fair value of investments.

Limitations

The above sensitivities do not consider that assets and liabilities are actively managed and may vary at the time any actual market movement occurs. There are strategies in place to minimize the exposure to market fluctuations. For example, as market indices fluctuate, Prudential would take certain actions including selling investments, changing investment portfolio allocation, and adjusting bonuses credited to policyholders. In addition, these analyzes do not consider the effect of market changes on new business generated in the future.

Other limitations on the sensitivities include: the use of hypothetical market movements to demonstrate potential risk that only represent Prudential's view of reasonably possible near-term market changes and that cannot be predicted with any certainty; the assumption that interest rates in all countries move identically; the assumption that all global currencies move in tandem with the US dollar against pounds sterling; and the lack of consideration of the inter-relation of interest rates, equity markets and foreign currency exchange rates.

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders

None.

Item 15. Controls and Procedures

Management has evaluated, with the participation of Prudential's Group Chief Executive and Group Finance Director, the effectiveness of Prudential's disclosure controls and procedures as at December 31, 2006. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon Prudential's evaluation, the Group Chief Executive and Group Finance Director concluded that as of December 31, 2006 Prudential's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by Prudential in the reports Prudential files and submits under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms and that it is accumulated and communicated to Prudential's management, including the Group Chief Executive and Group Finance Director, as appropriate to allow timely decisions regarding required disclosure.

From December 31, 2006, the Group is required to undertake an annual assessment of the effectiveness of internal controls over financial reporting under Section 404 of the Sarbanes-Oxley Act. In accordance with the requirements of Section 404 the following report is provided by management in respect of the Group's internal control over financial reporting (as defined in Rules 13a-15(f) and 15-d-15(f) under the US Securities Exchange Act of 1934):

Management acknowledges its responsibility for establishing and maintaining adequate control over financial reporting for the Group. Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards ("IFRS"), including reconciliations required under US GAAP.

Management has conducted, with the participation of Prudential's Group Chief Executive and Group Finance Director, an evaluation of the effectiveness of internal control over financial reporting based on the framework in "Internal Control Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on the assessment under these criteria, Management has concluded that, as of December 31, 2006, the Group's internal control over financial reporting was effective. In addition, there have been no changes in the Group's internal control over financial reporting during 2006 that have materially affected, or are reasonably likely to affect materially, the Group's internal control over financial reporting.

Management's assessment, as well as the effectiveness of internal control over financial reporting, as of December 31, 2006, have been audited by KPMG Audit Plc. The audit report on internal control over financial reporting is shown below.

KPMG Audit Plc, which has audited the consolidated financial statements of the Group for the year ended December 31, 2006, has also audited management's assessment of the effectiveness of internal control over financial reporting and the effectiveness of the Group's internal control over financial reporting under Auditing Standard No. 2 of the Public Company Accounting Oversight Board (United States).

Report of Independent Registered Public Accounting Firm to the Board of Directors and Shareholders of Prudential plc

We have audited management's assessment, included in the accompanying Management's Annual Report in Internal Control over Financial Reporting that Prudential plc ("Prudential"), maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Prudential's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Prudential's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Prudential maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in Internal Control Integrated Framework issued by COSO. Also in our opinion, Prudential maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control Integrated Framework issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Prudential and subsidiaries as of December 31, 2006 and 2005 and the related consolidated income statement, statement of changes in equity and consolidated cash flow statement for each of the years in the three-year period ended December 31, 2006 and our report dated June 28, 2007 expressed an unqualified opinion on those financial statements.

Item 16A. Audit Committee Financial Expert

The Board has determined that Kathleen O'Donovan, Chairman of the Audit Committee, qualifies as an audit committee financial expert within the meaning of Item 16A of Form 20-F, and that Ms O'Donovan is independent as defined by the New York Stock Exchange Corporate Governance Standards.

Item 16B. Code of Ethics

Prudential has a code of ethics, as defined in Item 16B of Form 20-F under the Exchange Act, (which Prudential calls its Code of Business Conduct) which applies to the Group Chief Executive, the Group Finance Director, the Group Chief Risk Officer and persons performing similar functions as well as to all other employees. Prudential's Code of Business Conduct is available on its website at www.prudential.co.uk. If Prudential amends the provisions of the Code of Business Conduct, as it applies to the Group Chief Executive, Group Finance Director and the Group Chief Risk Officer or if Prudential grants any waiver of such provisions, the Company will disclose such amendment or waiver on the Prudential website. There were no amendments to, or waivers from, the Code of Business Conduct in 2006. On June 21, 2007, the Code of Business Conduct was revised to incorporate a clause on anti-money laundering and financial crime. This is now available on Prudential's website at www.prudential.co.uk.

Item 16C. Principal Accountant Fees and Services

The Group Audit Committee has a key oversight role in relation to the external auditor, KPMG Audit Plc, whose primary relationship is with the Group Audit Committee. The Group's Auditor Independence Policy seeks to ensure that the independence and objectivity of the external auditor is not impaired, and that the Group maintains a sufficient choice of appropriately qualified audit firms. The policy sets out four key principles which underpin the provision of non-audit services by the external auditor, namely that the auditor should not:

- audit its own firm's work;
- make management decisions for the Group;
- have a mutuality of financial interest with the Group; or
- be put in the role of advocate for the Group.

The Group Audit Committee reviewed and updated the policy in December 2005.

The Group has a policy that at least once every five years, the Group Audit Committee undertakes a formal review to assess whether the external audit should be re-tendered. The external audit was last put out to competitive tender in 1999 when the present auditor was appointed. In both July 2005 and 2006, the Group Audit Committee formally considered the need to re-tender the external audit service and concluded that, given the significant changes in accounting and regulatory requirements, the interests of the Company were better served by retaining the existing auditor through a period of transition. In addition, the Group Audit Committee concluded that there was nothing in the performance of the auditor requiring a change, except a rotation of audit partner, in line with the Auditing Practices Board Ethical Statements and the Sarbanes-Oxley Act, which the Group is effecting following the approval of its 2006 UK Annual Report earlier this year.

During the year, the Group Audit Committee assessed the qualification, expertise and resources, effectiveness and independence of the external auditor. In addition to the questioning of the external auditor and the Group Finance Director, which is a regular feature of meetings, the review of the effectiveness of the external audit process was conducted through a questionnaire-based exercise

administered by Group-wide Internal Audit, supplemented by interviews with senior finance staff and Group Audit Committee members.

For the year ended December 31, 2006, the Group Audit Committee approved fees of £10.1 million for audit services and other services supplied by its auditor pursuant to relevant legislation. In addition, the Group Audit Committee approved other fees of £2.4 million, not related to audit work, and in accordance with the Group's Auditor Independence Policy, these fees were approved prior to work commencing. These non-audit related fees amounted to 19 per cent of total fees paid to its auditor, KPMG Audit Plc. The Group Audit Committee reviewed the non-audit services being provided to the Group by its auditor at regular intervals in 2006. These services primarily related to comfort and attestation letters, to assurance services associated with the implementation of Sarbanes-Oxley, to accounting and regulatory requirements, and to corporate finance transactions.

Total fees payable to KPMG for the fiscal years ended December 31, 2006 and 2005 are set out below:

	2006	Restated 2005
	(in £ Millions)	
Fees payable to Prudential's auditor for the audit of Prudential's annual accounts	2.3	2.2
Fees payable to Prudential's auditor and its associates for other services:		
Audit of subsidiaries and associates pursuant to legislation	3.8	3.6
Other services supplied pursuant to legislation	4.0	1.4
Other services relating to taxation	0.2	0.5
Services relating to corporate finance transactions	0.7	0.9
All other services	1.3	4.2
Total	12.3	12.8

In addition, there were fees of £0.2 million (2005: £0.1 million) for the audit of pension schemes.

2006

Fees of £2.3 million for the audit of Prudential's annual accounts comprised statutory audit fees of £0.9 million, US GAAP audit fees of £0.8 million and EEV reporting audit fees of £0.6 million. Fees of £3.8 million for audit of subsidiaries and associates pursuant to legislation mainly related to the audit of local and statutory accounts and to statutory audit work in connection with the submission of results to be consolidated in Prudential's annual accounts.

Fees of £4.0 million for other services supplied pursuant to legislation comprised of Sarbanes-Oxley reporting of £2.6 million, interim and regulatory reporting of £0.7 million.

Fees of £0.2 million for services relating to taxation related to tax compliance throughout the Group. Fees of £0.7 million for services relating to corporate finance transactions related to work in connection with a business proposal received and to due diligence work.

Fees of £1.3 million for all other services comprised services in respect of accounting and regulatory requirements of £0.5 million services in respect of attestation letters of £0.5 million, and services in respect of Sarbanes-Oxley requirements of £0.3 million.

2005

Fees of £2.2 million for the audit of Prudential's annual accounts comprised statutory audit fees of £0.7 million, US GAAP fees of £0.8 million and EEV reporting audit fees of £0.7 million. Fees of £3.6 million for audit of subsidiaries and associates pursuant to legislation mainly related to the audit of local and statutory accounts and to statutory audit work in connection with the submission of results to be consolidated in Prudential's annual accounts.

Fees of £1.4 million for other services supplied pursuant to legislation comprised interim reporting of £0.7 million.

Fees of £0.5 million for services relating to taxation compliance throughout the Group. Fees of £0.9 million for services relating to corporate finance transactions related to the acquisition of the minority interest in Egg and to due diligence work.

Fees of £4.2 million for all other services comprised services in respect of Sarbanes-Oxley requirements of £2.2 million, services in respect of accounting and regulatory requirements of £1.4 million and of £0.6 million services in respect of comfort and attestation letters

Tax fees of £0.2 million related to tax compliance work in respect of federal and state tax returns for the Group's US operations.

Other fees of £3.9m comprised reviewing the processes that the Group is implementing in order to comply with the requirements of the Sarbanes-Oxley Act of £1.8 million, reviewing prospectuses for the Group's equity and debt issues of £0.5 million, reviewing the Group's proposals with regard to implementing new regulatory requirements of £0.4 million, provision of comfort letters mainly relating to Jackson National Life's funding programs of £0.2 million, and review work in connection with the Group's acquisitions and disposals of £0.5 million and other general financial work across the Group of £0.5 million.

Item 16E. Purchases of Equity Securities by Prudential plc and Affiliated Purchasers.

The following table sets forth information with respect to purchases made by or on behalf of Prudential or any "affiliated purchasers" (as that term is defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended) of Prudential's ordinary shares or American depositary shares for the year ended December 31, 2006.

Period	Total Number of Shares Purchased ⁽¹⁾⁽²⁾	Average Price Paid Per Share (£)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under Plans or Programs
January 1 - January 31	13,155	5.722	N/A	N/A
February 1 - February 28	14,871	5.8973		
March 1 - March 31	14,288	5.8304		
April 1 - April 30	12,865	6.3941		
May 1 - May 31	12,555	6.3645		
June 1 - June 30	14,794	5.6330		
July 1 - July 31	14,412	5.8055		
August 1 - August 31	15,123	5.9434		
September 1 - September 30	13,093	5.8425		
October 1 - October 31	2,185,520	6.2088		
November 1 - November 30	13,818	6.445		
December 1 - December 31	11,154	6.8337		

- (1) The shares listed in this column were acquired by employee benefit trusts during the year to satisfy future obligations to deliver shares under the Company's employee incentive plans, the savings-related share option scheme and the share participation plan.
- (2) This table excludes Prudential plc shares purchased by investment funds managed by M&G in accordance with investment strategies that are established by M&G acting independently of Prudential plc.
- (3) 24,886 shares were acquired by employee benefit trusts in lieu of receiving dividends as part of Prudential's scrip dividend alternative program in May and October 2006.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Prudential plc

We have audited the accompanying consolidated balance sheet of Prudential plc and subsidiaries (together "Company") as of December 31, 2006 and 2005 and the related consolidated income statement, statement of changes in equity and consolidated cash flow statement for the each of the years in the three-year period ended December 31, 2006. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Prudential plc and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2006, in conformity with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"). IFRS as adopted by the EU vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note J to the consolidated financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), and our report dated June 28, 2007 expressed an unqualified opinion on management's assessment of, and the effective operation of, internal control over financial reporting.

*

Profit before tax represents income net of post-tax transfers to unallocated surplus of with-profits funds, before tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders' profits. It does not represent profit before tax attributable to shareholders.

Prudential plc and Subsidiaries

Notes to the Consolidated Financial Statements

December 31, 2006

A: Background and adoption of International Financial Reporting Standards (IFRS)

A1: Nature of operations

Prudential plc (the Company) together with its subsidiaries (collectively, the Group or Prudential) is an international financial services group with its principal operations in the UK, the US and Asia. The Group operates in the UK through its subsidiaries, primarily The Prudential Assurance Company Limited (PAC), Prudential Annuities Limited (PAL), Prudential Retirement Income Limited (PRIL), M&G Group Limited and Egg plc. On January 29, 2007 the Company announced that it had entered into a binding agreement to sell its Egg banking business to Citi, the sale of which was completed on May 1, 2007, as described in note I8.

In the US, the Group's principal subsidiary is Jackson National Life Insurance Company (Jackson). The Group also has operations in Hong Kong, Malaysia, Singapore, Taiwan and other Asian countries.

Prudential offers a wide range of retail financial products and services and fund management services throughout these territories. The retail financial products and services principally include life insurance, pensions and annuities as well as collective investments and deposit and mortgage banking services.

Long-term business products written in the UK and Asia are principally with-profits deposit administration, other conventional and unitized with-profits policies and non-participating pension annuities in the course of payment. Long-term business also includes linked business written in the UK and Asia. The principal products written by Jackson are interest-sensitive deferred annuities and whole-life policies, variable annuities, guaranteed investment contracts, fixed index deferred annuities and term life insurance.

Prudential plc is a public limited company incorporated and registered in England and Wales. The registered office is:

Laurence Pountney Hill
London
EC4R 0HH
UK Companies House registered number: 1397169

A2: Basis of preparation

The consolidated financial statements consolidate the Group and the Group's interest in associates and jointly-controlled entities. The parent company financial statements present information about the Company as a separate entity and not about the Group.

The consolidated financial statements have been prepared and approved by the directors in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU). Were the Group to apply IFRS as published by the IASB, as opposed to EU-endorsed IFRS, no additional adjustments would be required.

In 2005, the Group early adopted the amendment to IAS 39, 'The Fair Value Option' and IAS 19, 'Employee Benefits' (as amended in 2004).

The Group has applied all IFRS standards and interpretations adopted by the EU and effective at December 31, 2006.

The consolidated financial statements do not represent the Prudential's statutory accounts for the purposes of the UK Companies Act 1985. These financial statements are based on the prescribed formats. The Group's external auditors have reported on the 2006, 2005 and 2004 statutory accounts and the accounts have been delivered to the UK Registrar of Companies. The auditors' reports were unqualified and did not contain a statement under Section 237 (2) (inadequate accounting records or returns not agreeing with records and returns) or Section 237 (3) (failure to obtain necessary information and explanations) of the UK Companies Act 1985.

The consolidated financial statements have been prepared in accordance with IFRS and include additional disclosures required under US GAAP. Information related to the nature and effect of differences between IFRS and US GAAP affecting Prudential's consolidated profits and shareholders' funds have been summarized in Note J, 'Summary of Material Differences between IFRS and US Generally Accepted Accounting Principles'. Condensed consolidated US GAAP financial statements are presented in Note K.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

The years "2006", "2005" and "2004" refer to the years ended December 31, 2006, 2005 and 2004 respectively.

A3: Critical accounting policies, estimates and judgements

(a) Critical accounting policies

Prudential's discussion and analysis of its financial condition and results of operations are based upon Prudential's consolidated financial statements, which have been prepared in accordance with IFRS adopted for use in the EU. Were the Group to apply IFRS as published by the International Accounting Standards Board, as opposed to EU-adopted IFRS, no additional adjustments would be required.

The preparation of these financial statements requires Prudential to make estimates and judgements that affect the reported amounts of assets, liabilities, and revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, Prudential evaluates its estimates, including those related to long-term business provisioning, the fair value of assets and the declaration of bonus rates. Prudential bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgements about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgements and uncertainties, and potentially give rise to different results under different assumptions and conditions. Prudential believes that its critical accounting policies are limited to those described below.

The critical accounting policies in respect of the items discussed below are critical for the Group's results insofar as they relate to the Group's shareholder-financed business, in particular for Jackson. The policies are not critical in respect of the Group's with-profits business. Accordingly, explanation is

provided in this note and cross-referenced notes as to why the distinction between with-profits business and shareholder-backed business is relevant.

The items discussed below and in cross-referenced notes explain the effect of changes in estimates and the effect of reasonably likely changes in the key assumptions underlying these estimates as of the latest balance sheet date so as to provide analysis that recognizes the different accounting effects on profit and loss or equity. In order to provide relevant analysis that is appropriate to the circumstances applicable to the Group's businesses, the explanations refer to types of business, fund structure, the relationship between asset and policyholder liability measurement, and the differences in the method of accounting permitted under IFRS 4 for accounting for insurance contract assets, policyholder liabilities and unallocated surplus of the Group's with-profits funds.

Insurance contract accounting

With the exception of contracts described in note D1, the Group's life assurance contracts are classified as insurance contracts and investment contracts with discretionary participating features. As permitted by IFRS 4, assets and liabilities of these contracts (see below) are accounted for under previously applied GAAP. Accordingly, except as described below, the modified statutory basis (MSB) of reporting as set out in the revised Statement of Recommended Practice (SORP) issued by the Association of British Insurers (ABI) in November 2003 has been applied for the 2006 and 2005 results.

From January 1, 2005, the Group has chosen to improve its accounting for UK regulated with-profits funds by the voluntary application of the UK accounting standard FRS 27, 'Life Assurance'. Under this standard, the main accounting changes that were required for UK with-profits funds were:

derecognition of deferred acquisition costs and related deferred tax; and

replacement of MSB liabilities with adjusted realistic basis liabilities.

The primary effect of these changes was to fundamentally alter the basis of accounting and carrying value of deferred acquisition costs (as set out in note H2) and the reported level of unallocated surplus of with-profits funds (as set out in note H12) from January 1, 2005. Under UK GAAP, the fund for future appropriations (FFA) represented the excess of assets over policyholder liabilities for the Group's with-profits funds.

Under IFRS the FFA is termed unallocated surplus and the Group has opted to account for it wholly as a liability with no allocation to equity. This treatment reflects the fact that shareholders' participation in the cost of bonuses arises only on distribution. As a consequence of this accounting treatment, shareholder profits on with-profits business continue to reflect the one-ninth cost of declared bonus previously applied under UK GAAP.

For Jackson, applying the MSB as applicable to overseas operations, the assets and liabilities of insurance contracts are accounted for under insurance accounting prescribed by US GAAP. For Asian operations the local GAAP is applied with adjustments, where necessary, to comply with UK GAAP. For Asian operations in countries where local GAAP is not well established and in which the business written is primarily non-participating business, US GAAP is used as the most appropriate proxy to local GAAP.

The usage of these bases of accounting has varying effects on the way in which product options and guarantees are measured. For UK regulated with-profits funds, for the 2006 and 2005 results, options and guarantees are valued on a market consistent basis. The basis is described in note D2(d)(ii). For other operations a market consistent basis is not applied under the accounting basis described in note A4. Details of the guarantees, basis of setting assumptions, and sensitivity to altered assumptions are described in notes D3 and D4.

Valuation and accounting presentation of fair value movements of derivatives and debt securities of Jackson

Under IAS 39, derivatives are required to be carried at fair value. Unless hedge accounting is applied, value movements on derivatives are recognized in the income statement.

For derivative instruments of Jackson, the Group has considered at length whether it is appropriate to undertake the necessary operational changes to qualify for hedge accounting so as to achieve matching of value movements in hedging instruments and hedged items in the performance statements. In reaching the decision a number of factors were particularly relevant. These were:

IAS 39 hedging criteria has been designed primarily in the context of hedging and hedging instruments that are assessable as financial instruments that are either stand-alone or separable from host contracts, rather than, for example, duration characteristics of insurance contracts;

the high hurdle levels under IAS 39 of ensuring hedge effectiveness at the level of individual hedge transactions for specific transactions;

the difficulties in applying the macro hedge provisions under IAS 39 (which are more suited to banking arrangements) to Jackson's derivative book;

the complexity of asset and liability matching of US life insurers such as those with Jackson's product range; and finally

whether it is possible or desirable, without an unacceptable level of costs and restraint on commercial activity, to achieve the accounting hedge effectiveness required under IAS 39.

In this regard, the issues surrounding the IAS 39 application are very similar to those considered by other US life insurers when the US financial reporting standard FAS 133 was first applied for US GAAP reporting. Taking account of these considerations the Group has decided that, except for certain minor categories of derivatives, it is not appropriate to seek to achieve hedge accounting under IAS 39 by completely reconfiguring the structure of Jackson's derivative book. As a result of this decision the total income statement results are more volatile as the movements in the value of Jackson's derivatives are reflected within it.

Under IAS 39, unless carried at amortized cost (subject to impairment provisions where appropriate) under the held-to-maturity category, debt securities are also carried at fair value. The Group has chosen not to classify any financial assets as held-to-maturity. Debt securities of Jackson are designated as available-for-sale with value movements being recorded as movements within shareholders' equity.

Presentation of results before tax

The total tax charge for the Group reflects tax that in addition to relating to shareholders' profits is also attributable to policyholders and unallocated surplus of with-profits funds and unit-linked policies. This is explained in more detail in note F5. However, pre-tax profits are determined after transfers to or from unallocated surplus of with-profits funds. These transfers are in turn determined after taking account of tax borne by with-profits funds. Consequently reported profit before the total tax charge is not representative of pre-tax profits attributable to shareholders. In order to provide a measure of pre-tax profits attributable to shareholders the Group has chosen to adopt an income statement presentation of the tax charge and pre-tax results that delineates between policyholder and shareholder components.

(b) Critical accounting estimates and judgements

Investments

Determining the fair value of unquoted investments

The Group holds financial investments which are not quoted on active markets. Their fair values are determined in full or in part by using valuation techniques. If the market for a financial investment of the Group is not active, the Group establishes fair value by using quotations from independent third parties, such as brokers or by using valuation techniques. The fair values of investments valued using a valuation technique at December 31, 2006 was £4,548 million (December 31, 2005: £4,947 million). The valuation techniques include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option adjusted spread models and enterprise valuation and may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these instruments. Additional details are explained in note G1.

Determining impairments relating to financial assets

Available-for-sale securities

Financial investments carried on an available-for-sale basis are represented by Jackson's and Egg's debt securities portfolio. These are considered to be impaired if there has been a significant or prolonged period of decline in fair value below its amortized cost or if there is objective evidence of impairment. The consideration of this requires management's judgement. Among the factors considered is whether the decline in fair value results from a change in quality of the security itself, or from a downward movement in the market as a whole and the likelihood of recovering the carrying value based on the current and short-term prospects of the issuer.

Unrealized losses that are considered to be primarily the result of market conditions, such as increasing interest rates, unusual market volatility, or industry-related events, and where the Group also believes there is a reasonable expectation for recovery and, furthermore, it has the intent and ability to hold the investment until maturity or the market recovers, are usually determined to be temporary. Prudential's review of fair value involves several criteria, including economic conditions, credit loss experience, other issuer-specific developments and future cash flows. These assessments are based on

the best available information at the time. Factors such as market liquidity, the widening of bid/ask spreads and a change in cash flow assumptions can contribute to future price volatility. If actual experience differs negatively from the assumptions and other considerations used in the consolidated financial statements, unrealized losses currently in equity may be recognized in the income statement in future periods. Additional details are described in note G5.

Assets held at amortized cost

Loans and receivables are carried at amortized cost using the effective interest rate method. The loans and receivables include loans collateralised by mortgages, deposits and loans to policyholders. For these assets, the Group measures the amount of any impairment loss by comparing the carrying amount of the asset with the present value of its estimated future cash flows.

In estimating future cash flows, the Group looks at the expected cash flows of the assets and applies historical loss experience of assets with similar credit risks that has been adjusted for conditions in the historical loss experience which no longer exist or for conditions that are expected to arise. The estimated future cash flows are discounted using the financial asset's original or variable effective interest rate and exclude credit losses that have not yet been incurred.

The risks inherent in reviewing the impairment of any investment include the risk that market results may differ from expectations; facts and circumstances may change in the future and differ from estimates and assumptions; or the Group may later decide to sell the security as a result of changed circumstances.

The principal holdings of loans and receivables where credit risk is of particular significance are loans and advances to customers held by Egg. Egg has significant concentrations of credit risk in respect of its unsecured lending on credit cards, personal loans and mortgage lending secured on property in the UK. The table in note E5 details the movements in the allowance for losses on such loans and advances.

Changes in the estimates of credit risk in any reporting period could result in a change in the allowance for losses on the loans and advances.

Insurance contracts

Product classification

IFRS 4 requires contracts written by insurers to be classified as either 'insurance contracts' or 'investment contracts' depending on the level of insurance risk transferred. If significant insurance risk is transferred by the contract then it is classified as an insurance contract. Contracts that transfer financial risk but not significant insurance risk are termed investment contracts. Furthermore, some contracts, both insurance and investment, contain discretionary participation features representing the contractual right to receive additional benefits as a supplement to guaranteed benefits:

- (a) that are likely to be a significant portion of the total contract benefits;
- (b) whose amount or timing is contractually at the discretion of the insurer; and
- (c) that are contractually based on asset or fund performance, as discussed in IFRS 4.

Accordingly, insurers must perform a product classification exercise across their portfolio of contracts issued to determine the allocation to these various categories. IFRS 4 permits the continued usage of previously applied GAAP for insurance contracts and investment contracts with discretionary participating features. Except for UK regulated with-profits funds, as described subsequently, this basis has been applied by the Group.

For investment contracts that do not contain discretionary participating features, IAS 39 and, where the contract includes an investment management element, IAS 18, apply measurement principles to assets and liabilities attaching to the contract that may diverge from those previously applied. The principal lines of business for which measurement changes arose on adoption of IFRS are certain unit-linked savings and similar contracts in the UK. Further details of this exercise are given in note D1.

Valuation assumptions

(i) Contracts of with-profits funds

The Group's insurance contracts and investment contracts with discretionary participating features are primarily with-profits and other protection type policies. For UK regulated with-profits funds, the contract liabilities are valued by reference to the UK Financial Services Authority's (FSA) realistic basis. In aggregate, this basis has the effect of placing a value on the liabilities of UK with-profits contracts, which reflects the amounts expected to be paid based on the current value of investments held by the with-profits funds and current circumstances.

The basis of determining liabilities for the Group's with-profits business has little or no effect on the results attributable to shareholders. This is because movements on liabilities of the with-profits funds are absorbed by the unallocated surplus. The unallocated surplus represents the excess of assets over liabilities that have yet to be appropriated between policyholders and shareholders. Except through indirect effects, or in remote circumstances as described below, changes to liability assumptions are therefore reflected in the carrying value of the unallocated surplus rather than shareholders' equity.

A detailed explanation of the basis of liability measurement is contained in note D2(d)(ii).

The Group's other with-profits contracts are written in with-profits funds that operate in some of the Group's Asian operations. The liabilities for these contracts and those of Prudential Annuities Limited, which is a subsidiary company of the PAC with-profits funds, are determined differently. For these contracts the liabilities are estimated using actuarial methods based on assumptions relating to premiums, interest rates, investment returns, expenses, mortality and surrenders. The assumptions to which the estimation of these reserves is particularly sensitive are the interest rate used to discount the provision and the assumed future mortality experience of policyholders.

For liabilities determined using the basis described above for UK regulated with-profits funds, and the other liabilities described in the preceding paragraph, changes in estimates arising from the likely range of possible changes in underlying key assumptions have no direct impact on the reported profit.

This lack of sensitivity reflects the with-profits fund structure, basis of distribution, and the application of previous GAAP to the unallocated surplus of with-profits funds as permitted by IFRS 4. Changes in liabilities of these contracts that are caused by altered estimates are absorbed by the unallocated surplus of the with-profits funds. As noted previously, the unallocated surplus is accounted

for as a liability and thus, except in the remote circumstances where support for the funds by shareholders' funds was required, changes in its level do not directly affect shareholders' equity. The Company's obligations and more detail on such circumstances are described in note H14.

(ii) Other contracts

Contracts, other than those of with-profits funds, are written in shareholder-backed operations of the Group. The significant shareholder-backed product groupings and the factors that may significantly affect IFRS results due to experience against assumptions or changes of assumptions vary significantly between business units. For some types of business the effect of changes in assumptions may be significant, whilst for others, due to the nature of the product, assumption setting may be of less significance. The nature of the products and the significance of assumptions are discussed in notes D2, D3 and D4. From the perspective of shareholder results the key sensitivity relates to assumed future investment returns for the Taiwan life operation as described in note D4.

Jackson

Jackson offers individual fixed annuities, fixed index annuities, immediate annuities, variable annuities, individual and variable life insurance and institutional products. With the exception of institutional products and an incidental amount of business for annuity certain contracts, which are accounted for as investment contracts under IAS 39, all of Jackson life assurance contracts are accounted for under IFRS 4 as insurance contracts by applying US GAAP, the previous GAAP used before IFRS adoption. Under US GAAP the requirements of SFAS 60 'Accounting and Reporting for Insurance Enterprises' and SFAS 97 'Accounting and Reporting by Insurance Enterprises for certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments' apply to these contracts. The accounting requirements under these standards and the effect of changes in valuation assumptions are considered below for fixed annuity, variable annuity and traditional life insurance contracts.

Fixed annuity contracts, which are investment contracts under US GAAP terminology, are accounted for by applying in the first instance a retrospective deposit method to determine the liability for policyholder benefits. This is then augmented by potentially three additional amounts, namely deferred income, any amounts previously assessed against policyholders that are refundable on termination of the contract, and any premium deficiency, i.e., any probable future loss on the contract. These types of contract contain considerable interest rate guarantee features. Notwithstanding the accompanying market risk exposure, except in the circumstances of interest rate scenarios where the guarantee rates included in contract terms are higher than crediting rates that can be supported from assets held to cover liabilities, the accounting measurement of Jackson's fixed annuity products is not generally sensitive to interest rate risk. This position derives from the nature of the products and the US GAAP basis of measurement.

Variable annuity contracts written by Jackson may provide for guaranteed minimum death, income, or withdrawal features. In general terms, liabilities for these benefits are accounted for under US GAAP by using estimates of future benefits and fees under best estimate assumptions. For variable annuity business the key assumption is the expected long-term level of equity market returns which for 2006

and 2005 was 8.4 per cent per annum determined using a mean reversion methodology. Likely changes to this percentage return are not expected to be significant.

These returns affect the level of future expected profits through their effects on the fee income with consequential impact on the amortization of deferred acquisition costs as described below and the required level of provision for guaranteed minimum death benefit claims.

For traditional life insurance contracts, provisions for future policy benefits are determined under SFAS 60 using the net level premium method and assumptions as of the issue date as to mortality, interest, policy lapses and expenses plus provisions for adverse deviation.

Except to the extent of mortality experience, which primarily affects profits through variations in claim payments and the guaranteed minimum death benefit reserves, the profits of Jackson are relatively insensitive to changes in insurance risk.

Asian operations

The insurance products written in the Group's Asian operations principally cover with-profits business, unit-linked business, and other non-participating business. The results of with-profits business are relatively insensitive to changes in estimates and assumptions that affect the measurement of policyholder liabilities. As for the UK business, this feature arises because unallocated surplus is accounted for by the Group as a liability. The results of Asian unit-linked business are also relatively insensitive to changes in estimates or assumptions.

The principal non-participating business in the Group's Asian operations, for which changes in estimates and assumptions are important from year to year, is the traditional whole-life business written in Taiwan. The premiums for the in-force business for these contracts have been set by the regulator at different points for the industry as a whole. Premium rates were set to give a guaranteed minimum sum assured on death and a guaranteed surrender value on early surrender based on prevailing interest rates at the time of policy issue. Premium rates also included an allowance for mortality and expenses. The required rates of guarantee have fallen over time as interest rates have reduced from a high of eight per cent to current levels of around two per cent. The current low bond rates in Taiwan gives rise to a negative spread against the majority of these policies. The current cash costs of funding in force negative spread in Taiwan is around £40 million a year.

The profits attaching to these contracts are particularly affected by the rates of return earned, and estimated to be earned on, the assets held to cover liabilities and on future investment income and contract cash flows. Under IFRS, the insurance contract liabilities of the Taiwan business are determined on the US GAAP basis as applied previously under UK GAAP. Under this basis the policy liabilities are calculated on sets of assumptions, which are locked-in at the point of policy inception, and a deferred acquisition cost is held in the balance sheet.

The adequacy of the insurance contract liabilities is tested by reference to best estimates of expected investment returns on policy cash flows and reinvested income. The assumed earned rates are used to discount the future cash flows. The assumed earned rates consist of a long-term best estimate determined by consideration of long-term market conditions, and rates assumed to be earned in the trending in period. For 2005, it was projected that rates of return for Taiwanese bond yields would trend

from the then current levels of some two per cent to 5.5 per cent by December 31, 2012. For 2006, it has been assumed that the longer-term bond rate will be attained one year later, i.e. by December 31, 2013.

The liability adequacy test results are sensitive to the attainment of the trended rates during the trending period. Based on the current asset mix, margins in other contracts that are used in the assessment of the liability adequacy tests, and currently assumed future rates of return, if interest rates were to remain at current levels in 2007, and the target date for attainment of the long-term bond yield deferred to December 31, 2014, the premium reserve, net of deferred acquisition costs, would be broadly sufficient. If interest rates were to remain at current levels in 2008 with a further one year delay in the progression period, then some level of write-off of deferred acquisition costs may be necessary. However, the amount of the charge based on current in-force business which is estimated at £70-90 million, is sensitive for the previously mentioned variables.

Furthermore, the actual amount of any write-off would be affected by the impact of new business written between December 31, 2006 and the future reporting dates to the extent that the business is taken into account as part of the liability adequacy testing calculations for the portfolio of contracts.

The adequacy of the liability is also sensitive to the level of the projected long-term rate. The current long-term assumption of 5.5 per cent has been determined on a prudent best estimate basis by reference to detailed assessments of the financial dynamics of the Taiwanese economy. In the event that the rate applied was altered, the carrying value of the deferred acquisition costs and policyholder liabilities would potentially be affected. Details of this sensitivity are shown in note D4(g)(ii).

Deferred acquisition costs

Significant costs are incurred in connection with acquiring new insurance business. Except for acquisition costs of with-profits contracts of the UK regulated with-profits funds, which are accounted for under the realistic FSA regime as described in note A4, these costs, which vary with, and are primarily related to, the production of new business, are capitalised and amortized against margins in future revenues on the related insurance policies. The recoverability of the asset is measured and the asset is deemed impaired if the projected future margins are less than the carrying value of the asset. To the extent that the future margins differ from those anticipated, then an adjustment to the carrying value of the deferred acquisition cost asset will be necessary.

The deferral and amortization of acquisition costs is of most relevance to the Group's results for shareholder-financed long-term business of Jackson and Asian operations. The majority of the UK shareholder-backed operations is for individual and group annuity business where the incidence of acquisition costs is negligible.

Jackson National Life Insurance Company (Jackson)

For term business, acquisition costs are deferred and amortized in line with expected premiums. For annuity business, acquisition costs are deferred and amortized in line with expected gross profits on the relevant contracts. For interest-sensitive business, the key assumption is the long-term spread between the earned rate and the rate credited to policyholders, which is based on the annual spread analysis. In addition, expected gross profits depend on mortality assumptions, assumed unit costs and terminations

other than deaths (including the related charges), all of which are based on a combination of actual experience of the Jackson companies, industry experience and future expectations. A detailed analysis of actual experience is measured by the internally developed mortality studies.

For variable annuity business, as described above, the key assumption is the expected long-term level of equity market returns, which for 2006 and 2005 was 8.4 per cent per annum determined using a mean reversion methodology.

Asian operations

The key shareholder-backed Asian operation is the Taiwan life business.

The sensitivity of the results for this operation, including the potential effect on write-offs of deferred acquisition costs, is significant and is described above.

Pensions

The Group applies the requirements of IAS 19, 'Employee benefits', to its defined benefit pension schemes. Due to the inclusion of actuarial gains and losses in the income statement rather than being recognized directly in equity, the results of the Group are affected by changes in interest rates for corporate bonds that affect the rate applied to discount projected pension payments and changes in mortality assumptions.

The economic participation in the surplus or deficits attaching to the main Prudential Staff Pension Scheme (PSPS) and the smaller Scottish Amicable Pensions Scheme (SAPS) are shared between the PAC with-profits sub-fund (WPSF) and shareholder operations. The economic interest reflects the source of contributions over the scheme life, which in turn reflects the activity of the members during their employment.

In the case of PSPS, at December 31, 2004, the attribution between the WPSF and shareholders' funds was in the ratio 80/20. In 2005, following extensive analysis, this ratio was revised to 70/30 at December 31, 2005. Movements in the apportionment of the surplus or deficit for PSPS between the WPSF and shareholders' funds in 2006 reflects the 70/30 ratio application to movements in the carrying value of assets and liabilities as at December 31, 2005 but with service cost and contributions for ongoing service apportioned by reference to the cost allocation for activity of current employees.

For SAPS the ratio for both 2006 and 2005 is estimated to be 50/50 between the WPSF and shareholders' funds.

Deferred tax

Deferred tax assets are recognized to the extent that they are regarded as recoverable, that is to the extent that, on the basis of all the available evidence, it can be regarded as more likely than not that there will be suitable taxable profits against which the losses can be relieved. The UK taxation regime applies separate rules to trading and capital profits and losses. The distinction between temporary differences that arise from items of either a capital or trading nature may affect the recognition of deferred tax assets. The judgements made, and uncertainties considered, in arriving at deferred tax balances in the financial statements are discussed in note H4.

Goodwill

Goodwill impairment testing requires the exercise of judgement by management as to prospective future cash flows.

A4: Significant accounting policies

(a) Background

Description of the accounting policies applied in the financial statements is complicated by the basis of adoption and application of IFRS standards for 2006 and 2005 results and the 2004 comparative results. Accordingly, the policies set out below should be read in the context of this background information.

With the exceptions of IAS 32, IAS 39 and IFRS 4, all IFRS standards were adopted on transition to IFRS from January 1, 2004 on the basis described in this note. IAS 32, IAS 39 and IFRS 4 standards were adopted from January 1, 2005 when, at the same time, the Group has improved the policy applied for UK regulated with-profits funds. The 2004 comparatives have not been restated for this change. Note A5 provides a summary of the changes made in 2005 and their numeric effect on shareholders' equity at January 1, 2005.

In summary, the accounting bases applied across the three years reflect the following:

Financial instruments (other than long-term business contracts classified as financial instruments)

For 2004, previous UK GAAP has been applied. For 2005 onwards, the adoption of the standards IAS 32 and IAS 39 gives rise to presentation, recognition and measurement changes. The most significant changes relate to the measurement basis of the debt securities and derivatives of Jackson. The accounting policies are described in note (b) (i) below.

Long-term business contracts

Income statement

For 2004, the income statement includes premiums and claim payments on all contracts that were then classified under previous GAAP as insurance, including deposit style 'investment contracts' where the insurance risk in the contracts is insignificant. For 2005 onwards, the recognition basis in the income statement remains the same except for investment contracts, as defined under IFRS 4, which do not contain discretionary participation features, where the accounting reflects the deposit nature of the arrangement. Consequently, premiums and claims on these contracts are not recognized in the income statement.

UK regulated with-profits funds

The UK GAAP basis applied in 2004 was the MSB, which closely reflected the Peak 1 regulatory basis of the UK FSA with the addition of deferred acquisition costs. For 2005 onwards, this basis has

been replaced under a policy improvement to align with the UK accounting standard FRS 27, 'Life Assurance'.

Other insurance contracts

UK GAAP has been applied in 2004, 2005 and 2006. In this respect UK GAAP also reflects the MSB. For overseas operations local GAAP or, in some cases, US GAAP has been applied but with the necessary changes to comply with UK GAAP.

Investment contracts

UK GAAP has been applied for 2004. Investment contracts with discretionary participation features are also accounted for in accordance with UK GAAP in 2005, in common with insurance contracts. For 2005 onwards, investment contracts without discretionary participation features are accounted for on a basis that reflects the hybrid nature of the arrangements whereby the deposit component is accounted for as a financial instrument under IAS 39 and the service component is accounted for under IAS 18, 'Revenue'.

Other assets, liabilities, income and expenditure

All other items are accounted for in the 2004, 2005 and 2006 results and notes on the financial statements under the relevant IFRS standard.

The summary above should be read in conjunction with the full description of significant accounting policies described elsewhere in this note and in note A5 for a comprehensive explanation.

(b) Accounting policies applied

(i) Financial instruments (other than long-term business contracts classified as financial instruments under IFRS 4)

2004

Previous UK GAAP has been applied as follows:

Other than banking business

Equity securities and debt securities

Equity securities were carried at fair value. Debt securities were carried at fair value, except those held by Jackson which, subject to provision for permanent diminutions in value, were carried at amortized cost. Fair value was based on quoted market prices for listed securities, and on quotations provided by external fund managers, brokers, independent pricing services or values as determined by the directors for unlisted securities. Changes in fair value were recognized in investment returns during the year of the change. Debt securities held by Jackson were carried at amortized cost as permitted by paragraph 24 of schedule 9A to the Companies Act 1985. The amortized cost basis of valuation was appropriate under the provisions of the ABI SORP for Jackson's redeemable debt securities as they were deemed held as part of a portfolio of such securities intended to be held to maturity.

Mortgages and other loans

Loans collateralized by mortgages and other unsecured loans were carried at unpaid principal balances, net of unamortized discounts and premiums and an allowance for loan losses, except for loans held by UK insurance operations which were carried at fair value. The allowance for loan losses was maintained at a level considered adequate to absorb losses in the mortgage loan portfolio.

Loans to policyholders

Loans to policyholders were carried at unpaid principal balances and fully collateralized by the cash value of policies.

Deposits with credit institutions

Deposits with credit institutions were carried at fair value. Changes in fair value were included in investment income for the year.

Derivatives

With the principal exception of derivatives held by Jackson, these instruments were carried at fair value with changes in fair value included in investment income. Derivative instruments of Jackson and certain other minor holdings were accounted for at amortized cost.

Banking business

Debt securities intended to be held for continuing use were carried at cost less any provision for permanent diminution in value. Discount or premiums on purchase were amortized through the profit and loss account over the period from date of purchase to date of maturity.

Debt securities, which were held for resale, were stated at their net realisable value.

Derivative instruments were accounted for in a manner consistent with the assets and liabilities or positions being hedged. Profits or losses and interest on these instruments were recognized in accordance with the accounting treatment of the underlying transaction as an adjustment to interest receivable or interest payable.

2005 and 2006

The accounting policies for financial instruments from 2005 onwards are changed in a number of areas with the adoption of IAS 32 and IAS 39 on January 1, 2005. In general, where a fair value basis of measurement was applied for 2004, this basis has been continued for 2005 and 2006. However, for instruments previously carried at cost, or amortized cost, the general effect of the standards adopted is for the use of fair value to be extended. The most significant changes relate to the measurement basis of the debt securities and derivatives of Jackson.

The accounting policies applied in 2005 and 2006 are as follows:

Investment classification

Upon initial recognition, financial investments are measured at fair value. Subsequently, the Group is permitted under IAS 39, subject to specific criteria, to designate its investments as either financial investments at fair value through profit and loss, financial investments held on an available-for-sale basis, financial investments held-to-maturity or loans and receivables. The Group holds financial investments on the following bases:

- (i) Financial assets and liabilities at fair value through profit and loss this comprises assets and liabilities designated by management as fair value through profit and loss on inception. These investments are measured at fair value with all changes thereon being recognized in investment income.
- (ii) Financial investments on an available-for-sale basis this comprises assets that are designated by management and/or do not fall into any of the other categories. These investments are carried at fair value. Interest income is recognized on an effective interest basis in the income statement. Unrealized gains and losses relating to changes in fair value are recognized in equity. Upon disposal or impairment, accumulated unrealized gains and losses are transferred from equity to the income statement as realized gains or losses.
- (iii) Loans and receivables this comprises investments that have fixed or determinable payments and are not designated as fair value through profit and loss or available-for-sale. These investments include loans collateralised by mortgages, deposits, loans to policyholders and other unsecured loans and receivables. These investments are carried at amortized cost using the effective interest method.

The Group has designated certain financial assets as fair value through profit and loss as these assets are managed and their performance is evaluated on a fair value basis. These assets represent all of the Group's financial assets except all loans and receivables and debt securities held by Jackson and Egg. Debt securities held by Jackson and Egg are accounted for on an available-for-sale basis. The use of the fair value option is consistent with the Group's risk management and investment strategies.

The Group uses the trade date method to account for regular purchases and sales of financial assets with the exception of Egg's loans and advances to customers which are on a settlement day basis.

Use of fair values

The Group uses current bid prices to value its quoted investments. Actively traded investments without quoted prices are valued using external broker bid prices. If there is no active established market for an investment, the Group applies an appropriate valuation technique such as a discounted cash flow technique.

Impairments

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets not held at fair value through profit and loss is impaired. A financial

asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a loss event) and that a loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of financial assets is impaired includes observable data that comes to the attention of the Group. For assets designated as available-for-sale, the impairment is measured as the difference between the amortized cost of the asset and its fair value which is removed from the available-for-sale reserve within equity and recognized in the income statement.

For loans and receivables carried at amortized cost, the impairment amount is the difference between amortized cost and the present value of the expected cash flows discounted at the original effective interest rate.

If, in subsequent periods, an impaired debt security held on an available-for-sale basis or an impaired loan or receivable recovers in value (in part or in full), and this recovery can be objectively related to an event occurring after the impairment, then the previously recognized impairment loss is reversed through the income statement (in part or in full).

Derivatives and hedge accounting

Derivative financial instruments are used to reduce or manage investment, interest rate and currency exposures, to facilitate efficient portfolio management and for investment purposes. The Group's policy is that amounts at risk through derivative transactions are covered by cash or by corresponding assets.

The Group may designate certain derivatives as hedges. This includes fair value hedges, cash flow hedges and hedges of net investments in foreign operations. If the criteria for hedge accounting are met then the following accounting treatments are applied from the date at which the designation is made and the accompanying requisite documentation is in place:

- (i) Hedges of net investments in foreign operations the effective portion of any change in fair value of derivatives or other financial instruments designated as net investment hedges are recognized in equity. The ineffective portion of changes in the fair value of the hedging instrument is recorded in the income statement. The gain or loss on the hedging instrument recognized directly in equity is recognized in the income statement on disposal of the foreign operation.
- (ii) Fair value hedges movements in the fair value of the hedged item attributable to the hedged risk are recognized in the income statement.
- (iii) Cash flow hedges the effective portion of changes in the fair value of derivatives designated as cash flow hedges is recognized in equity. Movements in fair value relating to the ineffective portion are booked in the income statement. Amounts recognized directly in equity are recorded in the income statement in the periods in which the hedged item affects profit or loss.

All derivatives that do not meet the relevant hedging criteria are carried at fair value with movements in fair value being recorded in the income statement.

Embedded derivatives

Embedded derivatives are held by various Group companies including Jackson and Egg. They are embedded within other non-derivative host financial instruments to create hybrid instruments. Where economic characteristics and risks of the embedded derivatives are not closely related to the economic characteristics and risks of the host instrument, and where the hybrid instrument is not measured at fair value with the changes in fair value recognized in the income statement, the embedded derivative is bifurcated and carried at fair value as a derivative in accordance with IAS 39.

Securities lending including repurchase agreements

The Group is party to various securities lending agreements under which securities are loaned to third parties on a short-term basis. The loaned securities are not derecognized; rather, they continue to be recognized within the appropriate investment classification. The Group's policy is that collateral in excess of 100 per cent of the fair value of securities loaned is required from all securities borrowers and typically consists of cash, debt securities, equity securities or letters of credit.

In cases where the Group takes possession of the collateral under its securities lending program, the collateral, and corresponding obligation to return such collateral, are recognized in the consolidated balance sheet. To further minimize credit risk, the financial condition of counterparties is monitored on a regular basis.

Derecognition of financial assets and liabilities

The Group's policy is to derecognize financial assets when it is deemed that substantially all the risks and rewards of ownership have been transferred. The Group also recognizes a financial asset when the contractual rights to the cash flows from the financial asset expire. Where the Group neither transfers nor retains substantially all the risks and rewards of ownership, the Group will derecognize the financial asset where it is deemed that the Group has not retained control of the financial asset.

Where the transfer does not result in the Group transferring the right to receive the cash flows of the financial assets, but does result in the Group assuming a corresponding obligation to pay the cash flows to another recipient, the financial assets are also accordingly derecognized providing all of the following conditions are met:

the Group has no obligation to pay amounts to the eventual recipients unless it collects the equivalent amounts from the original asset;

the Group is prohibited by the terms of the transfer contract from selling or pledging the original asset; and

the Group has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

The Group derecognizes financial liabilities only when the obligation specified in the contract is discharged, cancelled or has expired.

Securitization of assets

Egg has issued debt securities in order to finance certain portfolios of loan and investment assets. These obligations are secured on Egg's assets. The securitised assets and the related liabilities are presented gross within the relevant headings in the balance sheet under the 'gross presentation' method.

Borrowings

Although initially recognized at fair value, net of transaction costs, borrowings, excluding liabilities of consolidated collateralised debt obligations, are subsequently accounted for on an amortized cost basis using the effective interest method. Under the effective interest method, the difference between the redemption value of the borrowing and the initial proceeds (net of related issue costs) is amortized through the income statement to the date of maturity.

Financial liabilities designated at fair value through profit and loss

The Group has designated under IAS 39 classification certain financial liabilities at fair value through profit and loss as these instruments are managed and their performance evaluated on a fair value basis. These instruments include liabilities related to consolidated collateralised debt obligations and net assets attributable to unit holders of consolidated unit trusts and similar funds.

(ii) Long-term business contracts

Income statement treatment

2004

Premiums and claims

Premium and annuity considerations for conventional with-profits policies and other protection type insurance policies are recognized when due. Premiums and annuity considerations for linked policies, unitized with-profits and other investment type policies are recognized when received or, in the case of unitized or unit-linked policies, when units are issued. These amounts exclude any taxes or duties assessed based on premiums.

Policy fees charged on linked and unitized with-profits policies for mortality, asset management and policy administration are recognized as revenue when related services are provided.

Claims paid include maturities, annuities, surrenders and deaths. Maturity claims are recorded on the policy maturity date. Annuity claims are recorded when the annuity becomes due for payment. Surrenders are recorded when paid and death claims are recorded when notified.

Premiums and claims include receipts and payments on deposit style 'investment contracts' where the insurance risk in the contracts is insignificant.

Acquisition costs

Costs of acquiring new insurance business, principally commissions, marketing and advertising costs and certain other costs associated with policy issuance and underwriting that are not reimbursed by policy charges, are specifically identified and capitalised as part of deferred acquisition costs (DAC), which are included as an asset in the balance sheet. The DAC asset in respect of insurance contracts is amortized against margins in future revenues on the related insurance policies, to the extent that the amounts are recoverable out of the margins. Recoverability of the unamortized DAC asset is assessed at the time of policy issue and reviewed if profit margins have declined.

2005 and 2006

For 2006 and 2005, the recognition basis in the income statement remains the same except for investment contracts which do not contain discretionary participating features, where the accounting reflects the deposit nature of the arrangement, with premium and claims reflected as deposits and withdrawals taken directly to the balance sheet.

Under IFRS, investment contracts (excluding those with discretionary participation features) are required to be accounted for as financial liabilities in accordance with IAS 39 and, where relevant, the provisions of IAS 18 in respect of the attaching investment management features of the contracts. The Group's investment contracts primarily comprise of certain unit-linked savings contracts in the UK and Asia and contracts with fixed and guaranteed terms in the US (such as guaranteed investment contracts and annuity-certain).

Incremental, directly attributable acquisition costs relating to the investment management element of these contracts are capitalised and amortized in line with the related revenue. If the contracts involve up-front charges, this income is also deferred and amortized through the income statement in line with contractual service provision.

UK regulated with-profits funds

2004

The UK GAAP basis applied in 2004 was the MSB, which closely reflected the Peak 1 regulatory basis of the UK FSA.

Prudential's long-term business written in the UK comprises predominantly life insurance policies under which the policyholders are entitled to participate in the returns of the funds supporting these policies. Business similar to this type is also written in certain of the Group's Asian operations and subject to local market and regulatory conditions. Such policies are called with-profits policies. Prudential maintains with-profits funds within the Group's long-term business funds, which segregate the assets and liabilities and accumulate the returns related to that with-profits business. The amounts accumulated in these with-profits funds are available to provide for future policyholder benefit provisions and for bonuses to be distributed to with-profits policyholders. The bonuses, both annual and final, reflect the right of the with-profits policyholders to participate in the financial performance of the with-profits funds. Shareholders' profits with respect to bonuses declared on with-profits business correspond to the shareholders' share of the cost of bonuses as declared by the Board of directors. The

shareholders' share currently represents one-ninth of the cost of bonuses declared for with-profits policies.

Annual bonuses are declared and credited each year to with-profits policies. The annual bonuses increase policy benefits and, once credited, become guaranteed. Annual bonuses are charged to the profit and loss account in the year declared. Final bonuses are declared each year and accrued for all policies scheduled to mature and for death benefits expected to be paid during the next financial year. Final bonuses are not guaranteed and are only paid on policies that result from claims through the death of the policyholder or maturity of the policy within the period of declaration or by concession on surrender. No policyholder benefit provisions are recorded for future annual or final bonus declarations.

Conventional with-profits business

Future policyholder benefit provisions on conventional with-profits and other protection-type policies were calculated using the net premium valuation method. The net premium was calculated such that it would be sufficient at the outset of the policy to provide only for the discounted value of the original guaranteed death and maturity benefits on the chosen valuation assumptions. The provision was then calculated by subtracting the present value of future net premiums from the present value of future benefits (including vested bonuses) using a prudent discount rate.

Under the net premium valuation method, vested bonuses were included in the cash flows assessed but future allocations of bonuses are not included explicitly, although they were implicitly taken into account in the discount rate used, which was based on the return available on suitable investments. The detailed methodology for UK companies is included in regulations contained in the FSA rules. In particular, the returns available from equity and property assets are based on expected income and/or earnings and no allowance was made for potential future capital growth.

Accumulating with-profits business

For accumulating with-profits business, the calculation of the long-term business provision was based on a gross premium bonus reserve valuation. In general terms, a gross premium valuation basis is one in which the premiums brought into account are the full amounts receivable under the contract. The method included explicit estimates of premiums, expected claims, future regular bonuses, costs of maintaining contracts and future renewal expenses. Cash flows were discounted at the valuation rate of interest. The methodology for UK companies is included in the FSA rules. The discount rate was based on the expected return on the assets deemed to back the liabilities as prescribed by the FSA rules.

For PAC business, the calculation was based on a valuation under which future reversionary bonuses were added to the guaranteed liabilities existing at the valuation date. The provision was then calculated as the present value of future policyholder benefits plus the present value of future expenses, without assumption for withdrawals.

An addition was made in respect of future premiums if this produced a higher provision. The assumptions to which the estimation of the long-term business provision was particularly sensitive included the assumed future reversionary bonuses, the interest rate used to discount the provision, the assumed future per policy expenses and the assumed future mortality experience of policyholders.

For PAC business, the provision was taken as the lower of:

The accumulated fund or the value at the bid price of the notional number of units allocated to policyholders, in both cases excluding final bonus; and

the surrender or transfer value which, having regard to policyholders' reasonable expectations, would be payable at the valuation date, or, if greater, the value of the guaranteed liabilities excluding final bonus calculated on a gross premium bonus reserve method.

The amounts shown in the consolidated balance sheet for the year ended December 31, 2004, for with-profits contracts and unallocated surplus of the PAC with-profits fund have been determined in accordance with the MSB. With the exception of minor accounting adjustments, the technical provisions reflect the UK regulatory basis of reporting that has applied for many years, and which effectively constitutes the Peak 1 basis under the new FSA regime.

2005 and 2006

From January 1, 2005, the previous UK GAAP basis was replaced under a policy improvement to align with the UK accounting standard FRS 27, 'Life Assurance'.

FRS 27 is underpinned by the FSA's Peak 2 basis of reporting. This Peak 2 basis, which came into effect for the first time for 2004 regulatory reporting, requires the value of liabilities to be calculated as:

a with-profits benefits reserve (WPBR); plus

future policy related liabilities (FPRL); plus

the realistic current liabilities of the fund.

The WPBR is primarily based on the retrospective calculation of accumulated asset shares but is adjusted to reflect future policyholder benefits and other outgoings. By contrast, the Peak 1 basis addresses, at least explicitly, only declared bonuses.

The FPRL must include a market consistent valuation of costs of guarantees, options and smoothing, less any related charges, and this amount is determined using either a stochastic approach, hedging costs or a series of deterministic projections with attributed probabilities. Under the Peak 1 basis there is an allowance on a deterministic basis for the intrinsic value of these costs.

The assumptions used in the stochastic models are calibrated to produce risk-free returns on each asset class. Volatilities of, and correlations between, investment returns from different asset classes are as determined by the Group's Portfolio Management Group but are also market consistent.

The cost of guarantees, options and smoothing is very sensitive to the bonus, market value reduction (MVR) and investment policy the Group employs and therefore the stochastic modeling incorporates a range of management actions that would help to protect the fund in adverse scenarios. Substantial flexibility has been included in the modeled management actions in order to reflect the discretion that the Group retains in adverse investment conditions, thereby avoiding the creation of unreasonable minimum capital requirements. The management actions assumed are consistent with management's policy for with-profits funds and the disclosures made in the publicly available Principles and Practices of Financial Management.

Under FRS 27, the main changes that are required for UK with-profits funds are:

derecognition of deferred acquisition costs and related deferred tax; and

replacement of MSB liabilities for with-profits business with adjusted realistic basis liabilities.

Adjusted realistic basis liabilities represent the Peak 2 basis realistic liabilities for with-profits business included in Form 19 of the FSA regulatory returns, but after excluding the element for the shareholders' share of the future bonuses. This latter item is recognized as a liability for the purposes of regulatory returns but, for accounting purposes under FRS 27, consistent with the current basis of financial reporting, shareholder transfers are recognized only on declaration.

Unallocated surplus

The unallocated surplus represents the excess of assets over policyholder liabilities for the Group's with-profits funds. In 2006 and 2005, as allowed under IFRS 4, the Group has opted to continue to record unallocated surplus of with-profits funds wholly as a liability. The annual excess (shortfall) of income over expenditure of the with-profits funds, after declaration and attribution of the cost of bonuses to policyholders and shareholders, is transferred to (from) the unallocated surplus each year through a charge (credit) to the income statement. The balance retained in the unallocated surplus represents cumulative income arising on the with-profits business that has not been allocated to policyholders or shareholders. The balance of the unallocated surplus is determined after full provision for deferred tax on unrealized appreciation on investments.

Other insurance contracts (i.e. contracts which contain significant insurance risk as defined under IFRS 4)

For these contracts, in 2004, 2005 and 2006, UK GAAP has been applied, which reflects the MSB. Under this basis the following approach applies:

Other UK insurance contracts

Other UK insurance contracts that contain significant insurance risk include unit-linked, annuity and other non-profit business. For the purposes of local regulations, segregated accounts are established for linked business for which policyholder benefits are wholly or partly determined by reference to specific investments or to an investment-related index. The interest rates used in establishing policyholder benefit provisions for pension annuities in the course of payment are adjusted each year. Mortality rates used in establishing policyholder benefit provisions were based on published mortality tables adjusted to reflect actual experience.

Overseas subsidiaries

The assets and liabilities of insurance contracts of overseas subsidiaries are determined initially using local GAAP bases of accounting with subsequent adjustments where necessary to comply with the Group's accounting policies.

Jackson

The future policyholder benefit provisions for Jackson's conventional protection-type policies are determined using the net level premium method under US GAAP principles and assumptions as of the issue date as to mortality, interest, policy lapses and expenses plus provisions for adverse deviations. For non-conventional protection-type policies, the policyholder benefit provision included within policyholder liabilities in the consolidated balance sheet is the policyholder account balance.

For the business of Jackson, the determination of the expected emergence of margins, against which the amortization profile of the DAC asset is established, is dependent on certain key assumptions. For single premium deferred annuity business, the key assumption is the expected long-term spread between the earned rate and the rate credited to policyholders. For variable annuity business, the key assumption is the expected long-term level of equity market returns which, for 2006, 2005 and 2004, was 8.4 per cent per annum implemented using a mean reversion methodology. These returns affect the level of future expected profits through their effects on fee income and the required level of provision for guaranteed minimum death benefit claims.

From 2005 onwards, Jackson accounts for the majority of its investment portfolio on an available-for-sale basis (see investment policies above) whereby unrealized gains and losses are recognized directly in equity. As permitted by IFRS 4, Jackson has used shadow accounting. Under shadow accounting, to the extent that recognition of unrealized gains or losses on available-for-sale securities causes adjustments to the carrying value and amortization patterns of deferred acquisition costs and deferred income, these adjustments are recognized directly in equity to be consistent with the treatment of the gains or losses on the securities.

Asian operations

The future policyholder benefit provisions for Asian businesses are determined in accordance with methods prescribed by local GAAP adjusted to comply, where necessary, with UK GAAP. For the Hong Kong business, which is a branch of the PAC, and the Singapore and Malaysian operations the valuation principles and sensitivities to changes of assumptions of conventional with-profits and other protection-type policies are similar to those described above for equivalent products written by the UK operations.

For Asian operations in countries where local GAAP is not well established and in which the business written is primarily non-participating and linked business, US GAAP is used as the most appropriate proxy to local GAAP. The future policyholder benefit provisions for non-linked business are determined using the net level premium method, with an allowance for surrenders, maintenance and claim expenses. Rates of interest used in establishing the policyholder benefit provisions vary by operation depending on the circumstances attaching to each block of business.

Although the basis of valuation of Prudential's overseas operations is in accordance with the requirements of the Companies Act 1985 and ABI SORP, the valuation of policyholder benefit provisions for these businesses may differ from that determined on a UK MSB for UK operations with the same features.

Liability adequacy

The Group performs liability adequacy testing on its insurance provisions to ensure that the carrying amounts of provisions (less related deferred acquisition costs and present value of in-force business see policy on Business Acquisitions and Disposals) is sufficient to cover current estimates of future cash flows. When performing the liability adequacy test, the Group discounts all contractual cash flows and compares this amount to the carrying value of the liability. Any deficiency is immediately charged to the income statement.

Reinsurance

In the normal course of business, the Group seeks to reduce loss exposure by reinsuring certain levels of risk in various areas of exposure with other insurance companies or reinsurers. An asset or liability is recognized in the consolidated balance sheet representing premiums due to or payments due from reinsurers and the share of losses recoverable from reinsurers. The measurement of reinsurance assets is consistent with the measurement of the underlying direct insurance contracts.

Gains arising on the purchase of reinsurance contracts by Jackson are deferred and amortized over the contract duration. Any loss is recognized in the income statement immediately.

Investment contracts (contracts which do not contain significant insurance risk as defined under IFRS 4)

For investment contracts with discretionary participation features, the accounting basis is consistent with the accounting for similar with-profits insurance contracts. Other investment contracts are accounted for on a basis that reflects the hybrid nature of the arrangements whereby part is accounted for as a financial instrument under IAS 39 and the investment management service component is accounted for under IAS 18.

For those investment contracts in the US with fixed and guaranteed terms, the Group uses the amortized cost model to measure the liability. On contract inception, the liability is measured at fair value less incremental, directly attributable acquisition costs. Remeasurement at future reporting dates is on an amortized cost basis utilising an effective interest rate methodology whereby the interest rate utilised discounts to the net carrying amount of the financial liability.

Those investment contracts without fixed and guaranteed terms are designated at fair value through profit and loss. Fair value is based upon the fair value of the underlying assets of the fund. Where the contract includes a surrender option its carrying value is subject to a minimum carrying value equal to its surrender value.

(iii) Other assets, liabilities, income and expenditure

All other items are accounted for in 2004, 2005 and 2006 results and notes on the financial statements under the relevant IFRS standard.

Basis of consolidation

The Group consolidates those entities it is deemed to control. The degree of control is determined by the ability of the Group to govern the financial and operating policies of an entity in order to obtain benefits. Consideration is given to other factors such as potential voting rights.

The Group has consolidated some special purpose entities (SPEs), such as funds holding collateralised debt obligations (CDOs) where equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. These SPEs are consolidated because the Group is deemed to control them under IFRS.

The Group holds investments in internally and externally managed Open-ended Investment Companies (OEICs) and unit trusts. The Group's percentage ownership levels in these entities can fluctuate from day to day according to changes in the Group's and third party participation in the funds. In instances where the Group's ownership of internally managed funds declines marginally below 50 per cent and, based on historical analysis and future expectations the decline in ownership is expected to be temporary, the funds continue to be consolidated as subsidiaries under IAS 27.

Where the Group exercises significant influence or has the power to exercise significant influence over an entity, generally through ownership of 20 per cent or more of the entity's voting rights, but does not control the entity, then this is considered to be an investment in an associate. With the exception of those referred to below, the Group's investments in associates are recorded at the Group's share of the associates' net assets. The carrying value of investments in associates is adjusted each year for the Group's share of the entities' profit or loss. This does not apply to investments in associates held by the Group's insurance or investment funds including the venture capital business or mutual funds and unit trusts, which are carried at fair value through profit and loss.

The Group's investments in joint ventures are recognized using proportional consolidation whereby the Group's share of an entity's individual balances are combined line-by-line with similar items into the Group financial statements.

Other interests in entities, where significant influence is not exercised, are carried as investments at fair value through profit and loss.

The consolidated financial statements of the Group include the assets, liabilities and results of the Company and subsidiary undertakings in which Prudential has a controlling interest, using accounts drawn up to December 31, 2006 except where entities have non-coterminous year ends. In such cases, the information consolidated is based on the accounting period of these entities and is adjusted for material changes up to December 31. Accordingly, the information consolidated is deemed to cover the same period for all entities throughout the Group. The results of subsidiaries are included in the financial statements from the date acquired to the effective date of disposal. All inter-company transactions are eliminated on consolidation. Results of investment management activities include those for managing internal funds.

Investment properties

Investments in tenant occupied leasehold and freehold properties are carried at fair value, with changes in fair value included in the income statement. Properties are valued annually either by the Group's qualified surveyors or professional external valuers using the Royal Institution of Chartered Surveyors (RICS) guidelines. The RICS guidelines apply separate assumptions to the value of the land, buildings and tenancy associated with each property. Each property is externally valued at least once every three years. The cost of additions and renovations is capitalised and considered when estimating fair value.

Leases of investment property where the Group has substantially all the risks and rewards of ownership are classified as finance leases (leasehold property). Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. Where a lease has a contingent rent element, the rent is calculated in accordance with individual lease terms and charged as an expense as incurred.

Pension schemes

The Group operates a number of pension schemes around the world. The largest of these schemes is the PSPS, a defined benefit scheme. The Group also operates defined contribution schemes. Defined contribution schemes are schemes where the Company pays contributions into a fund and the Company has no legal or constructive obligation to pay further contributions should the assets of that fund be insufficient to pay the employee benefits relating to employee service in both current and prior periods. Defined benefit schemes are post-employment benefit plans that are not defined contribution schemes.

For the Group's defined benefit schemes, if the present value of the defined benefit obligation exceeds the fair value of the scheme assets, then a liability is recorded in the Group's balance sheet. The Group utilises the projected unit credit method to calculate the defined benefit obligation. Estimated future cash flows are then discounted at a high-quality corporate bond rate to determine its present value. These calculations are performed by independent actuaries.

The plan assets of the Group's pension schemes exclude several insurance contracts that have been issued by the Group. These assets are excluded from plan assets in determining the pension obligation recognized in the consolidated balance sheet.

The aggregate of the actuarially determined service costs of the currently employed personnel and the unwind of discount on liabilities at the start of the period, less the expected investment return on scheme assets at the start of the period, is charged to the income statement. Actuarial gains and losses as a result of changes in assumptions or experience variances are also charged or credited to the income statement.

Contributions to the Group's defined contribution schemes are expensed when due. Once paid, the Group has no further payment obligations. Any prepayments are reflected as an asset on the balance sheet.

Share-based payments

The Group offers share award and option plans for certain key employees and a Save As You Earn (SAYE) plan for all UK and certain overseas employees. The arrangements for distribution to employees of shares held in trust relating to share award plans and for entitlement to dividends depend upon the particular terms of each plan. Shares held in trust relating to these plans are conditionally gifted to employees.

The compensation expense charged to the income statement is primarily based upon the fair value of the options granted, the vesting period and the vesting conditions. The Group revises its estimate of the number of options likely to be exercised at each balance sheet date and adjusts the charge to the income statement accordingly. Where the share-based payment depends upon vesting outcomes attaching to market-based performance conditions, additional modeling is performed to estimate the fair value of the awards. No subsequent adjustment is then made to the fair value charge for awards that do not vest on account of these performance conditions not being met.

The Company has established trusts to facilitate the delivery of Prudential plc shares under employee incentive plans and savings-related share option schemes. None of the trusts that hold shares for employee incentive and savings plans continue to hold these shares once they are issued to employees. The cost to the Company of acquiring these treasury shares held in trusts is shown as a deduction from shareholders' equity.

Tax

The Group's UK subsidiaries each file separate tax returns. Jackson and other foreign subsidiaries, where permitted, file consolidated income tax returns. In accordance with UK tax legislation, where one domestic UK company is a 75 per cent owned subsidiary of another UK company or both are 75 per cent owned subsidiaries of a common parent, the companies are considered to be within the same UK tax group. For companies within the same tax group, trading profits and losses arising in the same accounting period may be offset for purposes of determining current and deferred taxes.

Current tax expense is charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year. To the extent that losses of an individual UK company are not offset in any one year, they can be carried back for one year or carried forward indefinitely to be offset against profits arising from the same company.

Deferred taxes are provided under the liability method for all relevant temporary differences, being the difference between the carrying amount of an asset or liability in the balance sheet and its value for tax purposes. IAS 12, 'Income Taxes' does not require all temporary differences to be provided for, in particular, the Group does not provide for deferred tax on undistributed earnings of subsidiaries where the Group is able to control the timing of the distribution and the temporary difference created is not expected to reverse in the foreseeable future. The tax effects of losses available for carry forward are recognized as an asset. Deferred tax assets are only recognized when it is probable that future taxable profits will be available against which these losses can be utilised. Deferred tax related to charges or credits taken directly to equity is also credited or charged directly to equity and is subsequently recognized in the income statement together with the deferred gain or loss.

The tax charge for long-term business includes tax expense on with-profits funds attributable to both the policyholders and the shareholders. Different tax rules apply under UK law depending upon whether the business is life insurance or pension business. Tax on the life insurance business is based on investment returns less expenses attributable to that business. Tax on the pension business is based on the shareholders' profits or losses attributable to that business. The shareholders' portion of the long-term business is taxed at the shareholders' rate with the remaining portion taxed at rates applicable to the policyholders.

Basis of presentation of tax charges

Historically, under Companies Act requirements, tax charges attributable to policyholders and unallocated surplus of with-profits funds and unit-linked policies were charged, together with tax charges attributable to the long-term business result attributable to shareholders, as an expense in the long-term business technical account of the profit and loss account. In the non-technical section (i.e. the summary profit and loss section attributable to shareholders) the post-tax balance transferred from the long-term business technical account was grossed up by attributable shareholder tax to derive the pre-shareholder tax long-term business result. Tax charges in the non-technical account reflected the aggregate of the shareholder tax on the long-term business result and on the Group's other results.

Under UK Listing Authority rules, profit before tax is required to be presented. This requirement, coupled with the fact that IFRS does not contemplate tax charges which are attributable to policyholders and unallocated surplus of with-profits funds and unit-linked policies, necessitates the reporting of total tax charges within the presented results. The result before all taxes (i.e. 'profit before tax' as shown in the income statement) represents income net of post-tax transfers to unallocated surplus of with-profits funds, before tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders. Separately within the income statement, 'profit before tax attributable to shareholders' is shown after deduction of taxes attributable to policyholders and unallocated surplus of with-profits funds and unit-linked policies. Tax charges on this measure of profit reflect the tax charges attributable to shareholders. In determining the tax charges attributable to shareholders, the Group has applied a methodology consistent with that previously applied under UK GAAP reflecting the broad principles underlying the tax legislation of life assurance companies.

Property, plant and equipment

All property, plant and equipment such as owner occupied property, computer equipment and furniture and fixtures, are carried at depreciated cost. Costs including expenditure directly attributable to the acquisition of the assets are capitalised. Depreciation is calculated and charged on a straight-line basis over an asset's estimated useful life. The residual values and useful lives are reviewed at each balance sheet date. If the carrying amount of an asset is greater than its recoverable amount then its carrying value is written down to that recoverable amount.

Leasehold improvements to owner occupied property are depreciated over the life of the lease. Assets held under finance leases are capitalised at their fair value.

Business acquisitions and disposals

Business acquisitions are accounted for by applying the purchase method of accounting, which adjusts the net assets of the acquired company to fair value at the date of purchase. The excess of the costs of acquisition over the fair value of the assets and liabilities of the acquired entity is recorded as goodwill. Should the fair value of the identifiable assets and liabilities of the entity exceed the cost of acquisition then this amount is recognized immediately in the income statement. Income and expenses of acquired entities are included in the income statement from the date of acquisition. Revenues and expenses of entities sold during the period are included in the income statement up to the date of disposal. The gain or loss on disposal is calculated as the difference between sale proceeds, net of selling costs, less the net assets of the entity at the date of disposal.

For life insurance company acquisitions, the adjusted net assets include an identifiable intangible asset for the present value of in-force business which represents the profits that are expected to emerge from the acquired insurance business. The present value of in-force business is calculated using best estimate actuarial assumptions for interest, mortality, persistency and expenses and is amortized over the anticipated lives of the related contracts in the portfolio. An intangible asset may also be recognized in respect of acquired investment management contracts representing the fair value of contractual rights acquired under these contracts.

The Company uses the economic entity method to purchase minority interests. Under the economic entity method any difference between consideration and the share of net assets acquired is recorded directly in equity.

Goodwill

Goodwill arising on acquisitions of subsidiaries and businesses is capitalised and carried on the Group balance sheet as an intangible asset at initial value less any accumulated impairment losses. Goodwill impairment testing is conducted annually and when there is an indication of impairment. For the purposes of impairment testing, goodwill is allocated to cash generating units. These cash generating units reflect the smallest group of assets that includes the goodwill and generates cash flows that are largely independent of the cash inflows from other groups of assets. If the carrying amount of the cash generating unit exceeds its recoverable amount then the goodwill is considered impaired. Impairment losses are recognized immediately in the income statement and may not be reversed in future periods.

Acquired intangible assets

Intangible assets acquired on the purchase of a subsidiary or portfolio of contracts are valued at acquisition and carried at amortized cost. Amortization calculated is charged on a straight-line basis over the estimated useful life of the assets. The residual values and useful lives are reviewed at each balance sheet date.

Cash and cash equivalents

Cash and cash equivalents consist of cash at bank and in hand, deposits held at call with banks, treasury bills and other short-term highly liquid investments with less than 90 days maturity from the date of acquisition.

Rights of offset

Assets and liabilities in the consolidated financial statements are only reported on a net basis when there is a legally enforceable right to offset and there is an intention to settle on a net basis.

Segments

In accordance with IAS 14, 'Segment Reporting' the Group reports its results and certain other financial information by primary and secondary segments. The Group's primary segments are its business segments, namely, long-term business, banking and broker-dealer and fund management. The Group's secondary segments are its geographical segments, namely, UK, US and Asia.

Shareholders' dividends

Dividends to shareholders are recognized as a liability in the period in which they are declared. Where scrip dividends are issued, the value of such shares, measured as the amount of the cash dividend alternative, is credited to reserves and the amount in excess of the nominal value of the shares issued is transferred from the share premium account to retained earnings.

Share capital

Where there is no obligation to transfer assets, shares are classified as equity. The difference between the proceeds received on issue of the shares, net of share issue costs, and the nominal value of the shares issued, is credited to share premium. Where the Company purchases shares for the purposes of employee incentive plans, the consideration paid, net of issue costs, is deducted from retained earnings. Upon issue or sale any consideration received is credited to retained earnings net of related costs.

Foreign exchange

The Group's consolidated financial statements are presented in pounds sterling, the Group's presentation currency. Accordingly, the results and financial position of foreign subsidiaries must be translated into the presentation currency of the Group from their functional currencies, i.e. the currency of the primary economic environment in which the entity operates. All assets and liabilities of foreign subsidiaries are converted at year end exchange rates whilst all income and expenses are converted at average exchange rates where this is a reasonable approximation of the rates prevailing on transaction dates. The impact of these currency translations is recorded as a separate component of equity.

Foreign currency borrowings that have been used to provide a hedge against Group equity investments in overseas subsidiaries, are translated at year end exchange rates and taken directly to shareholders' equity. Other foreign currency monetary items are translated at year end exchange rates with changes recognized in the income statement. Foreign currency transactions are translated at the spot rate prevailing at the time.

A5: Adoption of IAS 32, IAS 39 and IFRS 4 at January 1, 2005

The standards of IAS 32, IAS 39 and IFRS 4 were adopted on January 1, 2005.

The principal effects of adopting these standards arose in the Group's UK long-term business contracts, Jackson's debt securities and derivative instruments and Egg's banking assets, liabilities and derivatives positions.

The following table demonstrates the effects of adoption of IAS 32, IAS 39 and IFRS 4 on the IFRS balance sheet at January 1, 2005.

Effect of adoption of IAS 32, IAS 39 and IFRS 4

	At Dec 31, 2004	UK insurance operations (note i)	Jackson (note ii)	Banking and non- insurance operations (note iii)	Grossing-up and other format changes effect	Total	At Jan 1, 2005
	£ million	£ million	£ million	£ million	£ million	£ million	£ million
Assets							
Intangible assets attributable to shareholders:							
Goodwill	1,461						1,461
Deferred acquisition costs and acquired in-force value of long-term business	2,244	23	(456)			(433)	1,811
Total	3,705	23	(456)			(433)	3,272
Intangible assets attributable to PAC with-profits fund:							
In respect of acquired venture fund investment subsidiaries	858						858
Deferred acquisition costs	798	(765)				(765)	33
Total	1,656	(765)				(765)	891
Total	5,361	(742)	(456)			(1,198)	4,163
Other non-investment and non-cash assets:							
Property, plant and equipment	967						967
Reinsurers' share of policyholder liabilities	1,018						1,018
Deferred tax assets	827	10	67	7		84	911
Current tax recoverable	159						159
Accrued investment income	1,733			(50)		(50)	1,683
Other debtors	1,171		(1)	(49)		(50)	1,121

Edgar Filing: PRUDENTIAL PLC - Form 20-F

Effect of adoption of IAS 32, IAS 39 and IFRS 4

Total other non-insurance liabilities	11,840	(68)	443	(65)	76	386	12,226
Total liabilities	175,437	(855)	599	81	68	(107)	175,330
Total equity and liabilities	180,063	(877)	872	53	68	116	180,179

Notes

The changes shown above include the impact of remeasurement for:

- (i) UK insurance operations
- (a) The reduction in shareholders' equity of £22 million includes £20 million relating to certain unit-linked and similar contracts that do not contain significant insurance risk and are therefore categorised as investment contracts under IFRS 4.

Edgar Filing: PRUDENTIAL PLC - Form 20-F

(b)

Changes to insurance assets and liabilities of the PAC with-profits fund following the improvement of accounting policy applied on adoption of IFRS 4. The changes correspond to those applicable if the Group had adopted FRS 27 under UK GAAP. As a result of the policy improvement, liabilities, deferred acquisition costs, deferred tax and unallocated surplus of UK regulated with-profits funds are remeasured as described in note A4. At January 1, 2005, the unallocated surplus is subject to a transition adjustment of £(7.8) billion. Shareholders' equity is not affected by this change.

The unallocated surplus of £8.3 billion at January 1, 2005 post-IAS 39 and IFRS 4 adoption, comprises £8.0 billion for the PAC with-profits fund and £0.3 billion for Asian subsidiaries. The £8.0 billion for the PAC with-profits fund represents:

	£bn
Regulatory basis realistic surplus of with-profits sub-fund and SAIF	6.0
Add back: regulatory basis provision for future shareholder transfers	2.9
Less: other adjustments to align with accounting basis	(0.9)
Accounts basis	8.0

(ii)

Jackson

Under IAS 39, Jackson's debt securities and derivative financial instruments are remeasured to fair value from the lower of amortized cost and, if relevant, impaired value. Fair value movements on debt securities, net of 'shadow' changes to deferred acquisition costs and related deferred tax are recorded directly to equity. Fair value movements on derivatives are recorded in the income statement.

(iii)

Banking and non-insurance operations

Under IAS 39, for Egg, changes to opening equity at January 1, 2005 arise from altered policies for effective interest rate on credit card receivables, impairment losses on loans and advances, fair value adjustments on wholesale financial instruments and embedded derivatives in equity savings products. The net effect on shareholders' equity of these changes, after tax, is a deduction of £15 million. A further £10 million reduction in equity arises on fair valuation of certain centrally held financial instruments and derivatives.

A6: New accounting pronouncements

The following standards, interpretations and amendments have either been effective and adopted in 2006 or have been issued but are not yet effective in 2006. This is not intended to be a complete list as only those standards, interpretations and amendments that are anticipated to have an impact upon the Group's financial statements have been discussed.

Accounting pronouncements adopted in 2006

Amendment to IAS 39, 'Cash Flow Hedge Accounting of Forecast Intra-Group Transactions'

Amendments in respect of cash flow hedge accounting of forecast intra-group transactions were issued in April 2005 to clarify the accounting treatment of certain foreign currency cash flow hedges. The amendments are effective for annual periods beginning on or after January 1, 2006.

Amendment to IAS 39 and IFRS 4, 'Financial Guarantee Contracts'

Issued in August 2005, the amendments to IAS 39 and IFRS 4 in respect of financial guarantee contracts are effective for annual periods beginning on or after January 1, 2006. These amendments define a financial guarantee contract and address initial and subsequent measurement issues. These amendments apply even if the contract meets the definition of an insurance contract under IFRS 4 although they allow continuation of accounting under IFRS 4 if the contracts were considered to be insurance contracts and documented as such.

Amendment to IAS 21, 'Net Investment in a Foreign Operation'

Issued in December 2005, the amendments to IAS 21 clarify the definition of a foreign operation and the recognition of exchange difference in a net investment in a foreign operation. The amendments are effective for annual periods beginning on or after January 1, 2006.

The adoption of these aforementioned amendments did not have a material impact on the financial statements of the Group.

Accounting pronouncements not yet effective

IFRS 7, 'Financial Instruments: Disclosures'

IFRS 7 replaces IAS 30, 'Disclosures in the Financial Statements of Banks and Similar Financial Institutions', which dealt with disclosures for banking operations, and the disclosure requirements of IAS 32, 'Financial Instruments: Disclosure and Presentation'. The latter, therefore, becomes a standard dealing wholly with presentation of financial instruments. IFRS 7 is intended to complement the principles for recognising, measuring and presenting financial assets and financial liabilities in IAS 32 and IAS 39, 'Financial Instruments: Recognition and Measurement'. The objective of IFRS 7 is to require entities to provide disclosures in their financial statements to enable the users of financial statements to evaluate the significance of financial instruments for the entity's financial position and performance and the nature and extent of risks arising from financial instruments to which the entity is exposed and how the entity manages those risks. Consequential amendments have been made to other standards as a result of the release of IFRS 7, notably IAS 1, 'Presentation of Financial Statements', and IFRS 4, 'Insurance Contracts'.

IFRS 7 was issued on August 18, 2005 and is effective for annual periods beginning on or after January 1, 2007.

Revised IFRS 4, 'Implementation Guidance'

Revised IFRS 4, 'Implementation Guidance', was issued in December 2005 and is effective in conjunction with the adoption of IFRS 7 as discussed above. The revisions relate to disclosures around insurance contracts.

Amendment to IAS 1, 'Capital Disclosures'

As a result of the issue of IFRS 7, IAS 1 was amended in August 2005 to include a requirement to disclose information on the entity's objectives, policies and processes for managing capital. This amendment will become effective for annual periods beginning on or after January 1, 2007.

IFRS 8, 'Operating Segments'

IFRS 8 requires entities to adopt the 'management approach' to reporting the financial performance of its operating segments. The amount of each operating segment item to be reported is the measure reported to the chief operating decision maker, which in some instances will be non-GAAP. IFRS 8 will require the Group to provide an explanation of the basis on which the segment information is prepared and a reconciliation to the amount recognized in the Group's consolidated financial statements. This standard is effective for accounting periods beginning on or after January 1, 2009.

IFRIC 9, 'Reassessment of Embedded Derivatives'

IFRIC 9 will require the Group to assess whether an embedded derivative is required to be separated from the host contract and accounted for as a derivative when it first becomes a party to the contract. Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract, in which case a reassessment is required. This interpretation became effective for annual periods beginning on or after June 1, 2006.

IFRIC 10, 'Interim Financial Reporting and Impairment'

IFRIC 10 addresses the apparent conflict between the requirements of IAS 34, 'Interim Financial Reporting', and those in other standards on the recognition and reversal in financial statements of impairment losses on goodwill and certain financial assets. IFRIC 10 states that any such impairment losses recognized in an interim financial statement may not be reversed in subsequent interim or annual financial statements. This interpretation became effective for annual periods beginning on or after November 1, 2006.

The Group is currently assessing the impact of the aforementioned standards, interpretations and amendments on its financial statements. The Group has not early adopted any of the above noted items.

US GAAP SOP 05-1 'Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts'

As explained in note A3, the assets and liabilities of the insurance contracts of Jackson and certain Asian operations, where the local GAAP is not well established, are accounted for under insurance accounting prescribed by US GAAP. This is permitted by IFRS 4, where assets and liabilities of life assurance contracts classified as insurance contracts and investment contracts with discretionary participating features under this standard are accounted for under previously applied GAAP, which in the case of Jackson and these certain Asian operations is US GAAP. In September 2005, the American Institute of Certified Public Accountants (AICPA) issued SOP 05-1 which will affect the US GAAP insurance accounting. This SOP provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in FAS 97 'Accounting and Reporting by Insurance Enterprises for Certain Long-Duration and for Realized Gains and Losses from the Sale of Investments'. SOP 05-1 sets out conditions to determine whether contract modifications are considered as internal replacements and result in a replacement contract that is substantially changed from the replaced contract. SOP 05-1 then requires unamortized deferred acquisition costs, unearned revenue liabilities and deferred sales inducement assets from replaced contract in an internal replacement transaction that results in a substantially changed contract not to be deferred in connection with the replacement contract.

This SOP is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. The Group is currently assessing the impact of SOP 05-1 on Jackson and the affected Asian operations but the adoption of SOP 05-1 in 2007 is not expected to result in a material change in DAC amortization. The actual impact will also depends on the level of contract modifications implemented.

B: Summary of results**B1: Earnings per share**

Basic earnings per share is calculated by dividing the earnings attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the year, excluding those held in employee share trusts, which are treated as cancelled.

For diluted earnings per share, the weighted average number of shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The Group's only class of dilutive potential ordinary shares are those share options granted to employees where the exercise price is less than the average market price of the Company's ordinary shares during the year.

2006	Before tax	Tax (note F5)	Minority interests	Net of tax and minority interests	Basic earnings per share	Diluted earnings per share
	£ million	£ million	£ million	£ million	Pence	Pence
Based on profit for the year	1,222	(347)	(1)	874	36.2p	36.2p
2005	Before tax	Tax (note F5)	Minority interests	Net of tax and minority interests	Basic earnings per share	Diluted earnings per share
	£ million	£ million	£ million	£ million	Pence	Pence
Based on profit for the year from continuing operations	998	(241)	(12)	745	31.5p	31.5p
Adjustment for post-tax results of discontinued operations	3	0	0	3	0.1p	0.1p
Based on profit for the year	1,001	(241)	(12)	748	31.6p	31.6p
2004	Before tax	Tax (note F5)	Minority interests	Net of tax and minority interests	Basic earnings per share	Diluted earnings per share
	£ million	£ million	£ million	£ million	Pence	Pence
Based on profit for the year from continuing operations	850	(240)	(26)	584	27.5p	27.5p
Adjustment for post-tax results and profits on business disposals of discontinued operations	(108)	14	27	(67)	(3.1)p	(3.1)p
Based on profit for the year	742	(226)	1	517	24.4p	24.4p

Number of shares

A reconciliation of the weighted average number of ordinary shares used for calculating basic and diluted earnings per share is set out as below:

	2006	2005	2004
	millions	millions	millions
Weighted average shares for calculation of basic earnings per share	2,413	2,365	2,121
Shares under option at end of year	10	13	13
Number of shares that would have been issued at fair value on assumed option exercise	(7)	(9)	(10)

B2: Dividends

	<u>2006</u>	<u>2005</u>	<u>2004</u>
	£ million	£ million	£ million
Dividends declared and paid in reporting period			
Parent company:			
Interim dividend (2006: 5.42p, 2005: 5.30p per share, 2004: 5.19p per share)	131	126	109
Final dividend for prior period (2005: 11.02p, 2004: 10.65p per share, 2003: 10.29p per share)	267	252	214
Subsidiary company payment to minority interests	1	2	
	<u>399</u>	<u>380</u>	<u>323</u>
Total			

As a result of shares issued in lieu of dividends of £76 million (2005: £52 million; 2004: £118 million), dividends paid in cash, as set out in the consolidated cash flow statement, were £323 million (2005: £328 million; 2004: £380 million).

	<u>2006</u>	<u>2005</u>	<u>2004</u>
	£ million	£ million	£ million
Parent company dividends relating to reporting period:			
Interim dividend (2006: 5.42p, 2005: 5.30p per share, 2004: 5.19p per share)	131	126	109
Final dividend (2006: 11.72p, 2005: 11.02p per share, 2004: 10.65p per share)	287	267	252
	<u>418</u>	<u>393</u>	<u>361</u>
Total			

A final dividend of 11.72 pence per share was proposed by the directors on March 14, 2007. Subject to shareholders' approval, the dividend will be paid on May 22, 2007 to shareholders on the register at the close of business on April 13, 2007. The dividend will absorb an estimated £287 million of shareholders' funds. A scrip dividend alternative will be offered to shareholders.

B3: Group balance sheet

The Group's primary reporting segments are long-term business, banking, and broker-dealer and fund management. The Group's secondary reporting segments are geographical namely the UK, the US, and Asia. Details of disclosures in accordance with the requirements of IAS 14 for segment assets and liabilities are shown below.

Details of the primary reporting segments are as follows:

Long-term business

This segment comprises long-term products that contain both a significant and insignificant element of insurance risk. The products are managed together and not classified in this way other than for accounting purposes. This segment also includes activity of the PAC with-profits funds' venture

investments managed by PPM Capital and other investment subsidiaries held for the purpose of supporting the Group's long-term business operations.

Banking

This segment consists of products provided by the Group's online banking subsidiary, Egg. The nature of these products and the managing of the business differ from the risks inherent in the other business segments, and the regulatory environment of the banking industry differs from that of the other business segments. Note I8 includes details of the agreement in January 2007 to sell Egg Banking plc.

Broker-dealer and fund management

The investment management segment is comprised of both internal and third-party asset management services, inclusive of portfolio and mutual fund management, where the Group acts as an advisor, and broker-dealer activities. The nature of the products and the managing of the business differ from the risks inherent in the other business segments, and the regulatory environment of the investment management industry differs from that of the other business segments.

2006	Long-term business	Banking	Broker-dealer and fund management	Unallocated to a segment	Intra-group eliminations	Total
	£ million	£ million	£ million	£ million	£ million	£ million
Consolidated total assets	201,937	9,498	5,564	3,672	(4,151)	216,520
