Copart, Inc.

(Exact name of registrant as specified in its charter)

California <i>(State or other jurisdiction of incorporation or organization)</i>	94-2867490 <i>(I.R.S. Employer Identification Number)</i>
4665 Business Center Drive Fairfield, California <i>(Address of principal executive offices)</i>	94534 <i>(Zip code)</i>

Registrant's telephone number, including area code:
(707) 639-5000

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of each exchange on which registered
Common Stock, no par value (Including associated Preferred Stock Rights)	The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Edgar Filing: COPART INC - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting Common Stock held by non-affiliates of the registrant as of January 31, 2009 (the last business day of the registrant's most recently completed second fiscal quarter) was \$1,576,240,787 based upon the closing sales price reported for such date on the NASDAQ Global Select Market (formerly the NASDAQ National Market). For purposes of this disclosure, shares of Common Stock held by persons who hold more than 5% of the outstanding shares of Common Stock and shares held by officers and directors of the registrant have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily conclusive for other purposes.

At September 29, 2009, registrant had 84,082,113 outstanding shares of Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

Items 10, 11, 12, 13, and 14 of Part III incorporate certain information by reference from the registrant's definitive proxy statement for its 2009 Annual Meeting of Shareholders (Proxy Statement) to be filed pursuant to Regulation 14A within 120 days after the registrant's fiscal year end of July 31, 2009. Except with respect to the information specifically incorporated by reference, the Proxy Statement is not deemed to be filed as a part hereof.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K for the fiscal year ended July 31, 2009, or this Form 10-K, including the information incorporated by reference herein, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expect," "plan," "intend," "forecast," "anticipate," "believe," "estimate," "predict," "potential," "continue" or the negative of these terms or other comparable terminology. The forward-looking statements contained in this Form 10-K involve known and unknown risks, uncertainties and situations that may cause our or our industry's actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. These forward-looking statements are made in reliance upon the safe harbor provision of the Private Securities Litigation Reform Act of 1995. These factors include those listed in Item 1A Business under the caption entitled "Risk Factors" in this Form 10-K and those discussed elsewhere in this Form 10-K. Unless the context otherwise requires, references in this Form 10-K to "Copart," the "Company," "we," "us," or "our" refer to Copart, Inc. We encourage investors to review these factors carefully together with the other matters referred to herein, as well as in the other documents we file with the Securities and Exchange Commission (the SEC). We may from time to time make additional written and oral forward-looking statements, including statements contained in the Company's filings with the SEC. We do not undertake to update any forward-looking statement that may be made from time to time by or on behalf of the Company.

Although we believe that, based on information currently available to Copart and its management, the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on these forward-looking statements.

Corporate Information

We were incorporated in California in 1982 and became a public company in 1994. Our principal executive offices are located at 4665 Business Center Drive, Fairfield, California 94534 and our telephone number at that address is (707) 639-5000. Our website is www.copart.com. The contents of our website are not incorporated by reference into this Form 10-K. We provide free of charge through a link on our website access to our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, as well as amendments to those reports, as soon as reasonably practical after the reports are electronically filed with, or furnished to, the SEC.

Copart , VB , CopartDirect , BID4U , CoPartfinder and CI & Design are trademarks of Copart, Inc. This Form 10-K also includes other trademarks of Copart and of other companies.

Table of Contents

PART I

Item 1. Business

General

Copart, Inc. is a leading provider of online auctions and vehicle remarketing services in the United States (US), Canada and the United Kingdom (UK).

We provide vehicle sellers with a full range of services to process and sell vehicles over the Internet through our Virtual Bidding Second Generation Internet auction-style sales technology, which we refer to as VB². Sellers are primarily insurance companies but also include banks and financial institutions, charities, car dealerships, fleet operators, vehicle rental companies and the general public. We sell principally to licensed vehicle dismantlers, rebuilders, repair licensees, used vehicle dealers and exporters and, at certain locations, we sell directly to the general public. The majority of the vehicles sold on behalf of the insurance companies are either damaged vehicles deemed a total loss or not economically repairable by the insurance companies or are recovered stolen vehicles for which an insurance settlement with the vehicle owner has already been made. We offer vehicle sellers a full range of services that expedite each stage of the vehicle sales process, minimize administrative and processing costs and maximize the ultimate sales price.

In the US and Canada, or North America, we sell vehicles primarily as an agent and derive revenue primarily from fees paid by vehicle sellers and vehicle buyers as well as related fees for services such as towing and storage. In the UK we operate primarily on a principal basis, purchasing the salvage vehicle outright from the insurance companies and reselling the vehicle for our own account.

During fiscal 2004 and fiscal 2008, we converted all of our North American and UK sales respectively, to our Internet based auction-style selling platform which we call VB². This technology and model employs a two-step bidding process. The first step is an open preliminary bidding feature that allows a buyer to enter bids either at a bidding station at the storage facility during the preview days or over the Internet. To improve the effectiveness of bidding, the VB² system lets a buyer see the current high bid on the vehicle they want to purchase. The preliminary bidding step is an open bid format similar to eBay. Buyers enter the maximum price they are willing to pay for a vehicle and VB²'s BID4U feature will incrementally bid the vehicle on their behalf during all phases of the auction. Preliminary bidding ends one hour prior to the start of a second bidding step, an Internet-only virtual auction. This second step allows bidders the opportunity to bid against each other and the high preliminary bidder. The bidders enter bids via the Internet in real time, BID4U submits bids for the high preliminary bidder, up to their maximum bid. When bidding stops, a countdown is initiated. If no bids are received during the countdown, the vehicle sells to the highest bidder. VB² opens our sales process to registered buyers anywhere in the world who have Internet access.

We believe the implementation of VB² has increased the pool of available buyers for each sale and the added competition has increased the amount buyers are willing to pay for vehicles. We also believe that it has improved the efficiency of our operations by eliminating the expense and capital requirements associated with live auctions. For fiscal 2009, sales of North American vehicles, on a unit basis, to buyers registered outside the state where the vehicle is located accounted for 46.8% of total vehicles sold (25.3% of vehicles were sold to out of state buyers and 21.5% were sold to out of country buyers, based on registration). For fiscal 2009, sales of UK vehicles, on a unit basis, to buyers registered outside the country where the vehicle is located accounted for 18.4% of total vehicles sold.

Edgar Filing: COPART INC - Form 10-K

Table of Contents

We believe that we offer the highest level of service in the auction and vehicle remarketing industry and have established our leading market position by:

providing coverage that facilitates seller access to buyers around the world, reducing towing and third-party storage expenses, offering a local presence for vehicle inspection stations, and providing prompt response to catastrophes and natural disasters by specially-trained teams;

providing a comprehensive range of customer services that include merchandising services, efficient title processing, timely pick-up and delivery of vehicles, and Internet sales;

establishing and efficiently integrating new facilities and acquisitions;

increasing the number of bidders that can participate at each sale through the ease and convenience of Internet bidding;

applying technology to enhance operating efficiency through Internet bidding, web-based order processing, salvage value quotes, electronic communication with buyers and sellers, vehicle imaging, and an online used vehicle parts locator service; and

providing the venue for insurance customers through our Virtual Insured Exchange (VIX) product to contingently sell a vehicle through the auction process to establish its true value, allowing the insurance customer to avoid dealing with estimated values when negotiating with owners who wish to retain their damaged vehicles.

Historically, we believe our business has grown as a result of (i) acquisitions, (ii) increases in the overall volume in the salvage car market, (iii) growth in market share, (iv) increases in amount of revenue generated per sales transaction resulting from increases in the gross selling price and the addition of value-added services for both buyers and sellers, and (v) the growth in non-insurance company sellers. For fiscal year 2009, which ended July 31, 2009, our revenues were approximately \$743.1 million and our operating income was approximately \$225.3 million.

On June 14, 2007, we entered the UK salvage market through the acquisition of Universal Salvage Plc (Universal). In fiscal 2008, we made the following additional acquisitions: Century Salvage Sales Limited (Century) on August 1, 2007; AG Watson Auto Salvage & Motors Spares (Scotland) Limited (AG Watson) on February 29, 2008; and Simpson Bros. (York) Holdings Limited (Simpson) on April 4, 2008. Universal, Century and Watson were all leading providers of vehicle auctions and services to the motor insurance and automotive industries. Simpson was primarily an auto dismantler and was acquired primarily for its real estate holdings.

In fiscal 2008, we initiated two new programs (i) Copart Dealer Services (CDS), by which we sell dealer-trade-ins using our VB² application and (ii) CopartDirect, whereby we sell cars on behalf of the general public, using our VB² application, so that individuals can avoid the inconvenience of selling the cars themselves. Our goal through these two programs is to expand VB²'s application beyond traditional salvage in order to expand our customer base. CDS targets franchise and independent dealerships while CopartDirect targets the general public.

In fiscal 2009, we opened our website to the public, initiated our Registered Broker program by which the public can purchase vehicles through a registered buyer, and initiated our Market Maker program by which registered buyers can open Copart storefronts with internet kiosks that enable the general public to browse and view our inventory and purchase vehicles from us through the Market Maker.

In North America, we opened five new facilities located in Louisville, Kentucky; Richmond, Virginia; Montgomery, Alabama; Greer, South Carolina; and Warren, Massachusetts. As of July 31, 2009, we had 133 facilities in the US, 2 facilities in Canada and 12 facilities in the UK.

Table of Contents

Industry Overview

The auction and vehicle remarketing services industry provides a venue for sellers to dispose of or liquidate vehicles to a broad domestic and international buyer pool. In North America, sellers generally auction or sell their vehicles on consignment either for a fixed fee or a percentage of the sales price. On occasion in North America and on a primary basis in the UK, companies in our industry will purchase vehicles from the largest segment of sellers, insurance companies, and resell the vehicles for their own account. The vehicles are usually purchased at a price based either on a percentage of the vehicles' estimated pre-accident cash value and/or based on the extent of damage. Vehicle remarketers typically operate from multiple facilities where vehicles are processed, viewed, stored and delivered to the buyer. While most companies in this industry remarket vehicles through a physical auction, Copart sells all of its vehicles on its Internet selling platform, VB², thus eliminating the requirement for buyers to travel to an auction location to participate in the sales process. In the UK, all sales were converted to VB² during fiscal 2008.

Although there are other sellers of vehicles, such as banks and financial institutions, charities, car dealerships, fleet operators, vehicle rental companies and the general public, the primary sellers of vehicles are insurance companies.

Automobile manufacturers are incorporating new standard features, including unibody construction, passenger safety cages with surrounding crumple zones to absorb impacts, plastic components, airbags, xenon lights, computer systems, heated seats, and navigation systems. We believe that one effect of these additional features is that newer vehicles involved in accidents are more costly to repair and, accordingly, more likely to be deemed a total loss for insurance purposes. This may result in an increased supply of total loss salvage vehicles from insurance companies.

The primary buyers of the vehicles are vehicle dismantlers, rebuilders, repair licensees, used vehicle dealers, exporters and in some states, the general public. Vehicle dismantlers, which we believe are the largest group of vehicle buyers, either dismantle a salvage vehicle and sell parts individually or sell the entire vehicle to rebuilders, used vehicle dealers, or the public. Vehicle rebuilders and vehicle repair licensees generally purchase salvage vehicles to repair and resell. Used vehicle dealers generally purchase recovered stolen or slightly damaged vehicles for resale.

The majority of our vehicles are sold on behalf of insurance companies and are usually vehicles involved in an accident. Typically the damaged vehicle is towed to a storage facility or a vehicle repair facility for temporary storage pending insurance company examination. The vehicle is inspected by the insurance company's adjuster, who estimates the costs of repairing the vehicle and gathers information regarding the damaged vehicle's mileage, options and condition in order to estimate its pre-accident value (PAV), or actual cash value (ACV). The adjuster determines whether to pay for repairs or to classify the vehicle as a total loss based upon the adjuster's estimate of repair costs, vehicle's salvage value, and the PAV or ACV, as well as customer service considerations. If the cost of repair is greater than the pre-accident value less the estimated salvage value, the insurance company generally will classify the vehicle as a total loss. The insurance company will thereafter assign the vehicle to a vehicle auction and remarketing services company, settle with the insured and receive title to the vehicle.

We believe the primary factors that insurance companies consider when selecting an auction and vehicle remarketing services company include:

the anticipated percentage return on salvage (i.e., gross salvage proceeds, minus vehicle handling and selling expenses, divided by the actual cash value);

the services provided by the company and the degree to which such services reduce administrative costs and expenses;

the price the company charges for its services;

Table of Contents

national coverage and ability to respond on a national scale;

the ability to provide analytical data to the seller; and

in the UK, the actual amount paid for the vehicle.

In the UK, insurance companies generally tender periodic contracts for the purchase of salvaged vehicles. The insurance company will generally award the contract to the company that is willing to pay the highest price for the vehicles.

Generally, upon receipt of the pick up order (the assignment), we arrange for the transport of a vehicle to a facility. As a service to the vehicle seller, we will customarily pay advance charges (reimbursable charges paid on behalf of vehicle sellers) to obtain the vehicle's release from a towing company, vehicle repair facility or impound facility. Advance charges paid on behalf of the vehicle seller are either recovered upon sale of the vehicle or invoiced separately to the seller.

The salvage vehicle then remains in storage at one of our facilities until ownership documents are transferred from the insured vehicle owner and the title to the vehicle is cleared through the appropriate state's motor vehicle regulatory agency, or DMV. In the US, total loss vehicles may be sold in most states only after obtaining a salvage title from the DMV. Upon receipt of the appropriate documentation from the DMV, which is generally received within 45 to 60 days of vehicle pick-up, the vehicle is sold either on behalf of the insurance company or for our own account, depending on the terms of the contract. In the UK, upon release of interest by the vehicle owner, the insurance company notifies us that the vehicle is available for sale for our own account.

Generally, sellers of non-salvage vehicles will arrange to deliver the vehicle to one of our locations. At that time, the vehicle information will be uploaded to our system and made available for buyers to review online. The vehicle is then sold either at a live auction or, in our case, on VB² typically within 7 days. Proceeds are then collected from the buyer, seller fees are subtracted and the remainder is remitted to the seller.

Operating and Growth Strategy

Our growth strategy is to increase our revenues and profitability by, among other things (i) acquiring and developing new facilities in key markets including foreign markets, (ii) pursuing national and regional vehicle supply agreements, (iii) expanding our online auctions and vehicle remarketing service offerings to sellers and buyers, and (iv) expanding the application of VB² into new markets and to new sellers within the vehicle market. In addition, to maximize gross sales proceeds and cost efficiencies at each of our acquired facilities we introduce our (i) pricing structure, (ii) selling processes, (iii) operational procedures, (iv) management information systems, and (v) when appropriate, redeploy existing personnel.

As part of our overall expansion strategy, our objective is to increase our revenues, operating profits, and market share in the vehicle sales industry. To implement our growth strategy, we intend to continue to do the following:

Acquire and Develop New Vehicle Storage Facilities in Key Markets Including Foreign Markets

Our strategy is to offer integrated services to vehicle sellers on a national or regional basis by acquiring or developing facilities in new and existing markets. We integrate our new acquisitions into our global network and capitalize on certain operating efficiencies resulting from, among other things, the reduction of duplicative overhead and the implementation of our operating procedures.

Edgar Filing: COPART INC - Form 10-K

Table of Contents

The following table sets forth facilities that we have acquired or opened from August 1, 2006 through July 31, 2009:

Locations	Acquisition or Greenfield	Date	Geographic Service Area

Pursue National and Regional Vehicle Supply Agreements

Our broad national presence enhances our ability to enter into local, regional or national supply agreements with vehicle sellers. We actively seek to establish national and regional supply agreements with insurance companies by promoting our ability to achieve high net returns and broader access to buyers through our national coverage and electronic commerce capabilities. By utilizing our existing insurance company seller relationships, we are able to build new seller relationships and pursue additional supply agreements in existing and new markets.

Expand Our Service Offerings to Sellers and Buyers

Edgar Filing: COPART INC - Form 10-K

Over the past several years, we have expanded our available service offerings to vehicle sellers and buyers. The primary focus of these new service offerings is to maximize returns to our sellers and maximize product value to our buyers. This includes, for our sellers, real-time access to sales

Table of Contents

data over the Internet, national coverage, the ability to respond on a national scale and, for our buyers, the implementation of VB² real-time bidding at all of our facilities, permitting buyers at any location worldwide to participate in the sales at all of our yards. We plan to continue to refine and expand our services, including offering software that can assist our sellers in expediting claims and salvage management tools that help sellers integrate their systems with ours.

Our Competitive Advantages

We believe that the following attributes and the services that we offer position us to take advantage of many opportunities in the online vehicle auction and services industry.

National Coverage and Ability to Respond on a National Scale

Since our inception in 1982, we have expanded from a single facility in Vallejo, California to an integrated network of 147 facilities located in the United States, Canada and the UK as of July 31, 2009. We are able to offer integrated services to our vehicle sellers, which allow us to respond to the needs of our sellers and buyers with maximum efficiency. Our coverage provides our sellers with key advantages, including:

a reduction in administrative time and effort;

a reduction in overall vehicle towing costs;

convenient local facilities;

improved access to buyers throughout the world;

a prompt response in the event of a natural disaster or other catastrophe; and

consistency in products and services.

Value-Added Services

We believe that we offer the most comprehensive range of services in our industry, including:

Internet bidding, Internet proxy bidding, and virtual sales powered by VB², which enhance the competitive bidding process;

online payment capabilities via our ePay product;

e-mail notifications to potential buyers of vehicles that match desired characteristics;

sophisticated vehicle processing at storage sites, including ten-view digital imaging of each vehicle and the scanning of each vehicle's title and other significant documents such as body shop invoices, all of which are available from us through the Internet;

CoPartfinder, our Internet-based used vehicle parts locator that provides vehicle dismantlers with greater resale opportunities for their purchases;

specialty sales, which allow buyers the opportunity to focus on select types of vehicles: i.e. motorcycles, heavy equipment, boats, recreational vehicles and rental cars; and

Interactive Online Counter-bidding, which allows sellers who have placed a minimum bid or a bid to be approved on a vehicle to directly counter-bid the current high bidder.

Proven Ability to Acquire and Integrate Acquisitions

We have a proven track record of successfully acquiring and integrating vehicle storage facilities. Since becoming a public company in 1994, we have completed the acquisition of 74 facilities in North America and the UK. As part of our acquisition and integration strategy, we seek to:

expand our global presence;

Table of Contents

strengthen our networks and access new markets;

utilize our existing corporate and technology infrastructure over a larger base of operations; and

introduce our comprehensive services and operational expertise.

We strive to integrate all new facilities, when appropriate, into our existing network without disruption of service to vehicle sellers. We work with new sellers to implement our fee structures and new service programs. We typically retain existing employees at acquired facilities in order to retain knowledge about, and respond to, the local market. We also assign a special integration team to help convert newly acquired facilities to our own management information and proprietary software systems, enabling us to ensure a smooth and consistent transition to our business operating and sales systems.

Technology to Enhance and Expand Our Business

We have developed management information and proprietary software systems that allow us to deliver a fully integrated service offering. Our proprietary software programs provide vehicle sellers with online access to data and reports regarding their vehicles being processed at any of our facilities. This technology allows vehicle sellers to monitor each stage of our vehicle sales process, from pick up to sale and settlement by the buyer. Our full range of Internet services allows us to expedite each stage of the vehicle sales process and minimizes the administrative and processing costs for us as well as our sellers. We believe that our integrated technology systems generate improved capacity and financial returns for our clients, resulting in high client retention, and allow us to expand our national supply contracts.

Our Service Offerings

We offer vehicle sellers a full range of vehicle services, which expedite each stage of the vehicle sales process, maximizing proceeds and minimizing costs. Not all service offerings are available in all markets.

Online Seller Access

Through Copart Access, our Internet-based service for vehicle sellers, we enable sellers to assign vehicles for sale, check sales calendars, view vehicle images and history, view and reprint body shop invoices and towing receipts and view the historical performance of the vehicles sold at our sales.

Salvage Estimation Services

We offer Copart ProQuote, a proprietary service that assists sellers in the vehicle claims evaluation process by providing online salvage value estimates, which help sellers determine whether to repair a particular vehicle or deem it a total loss.

Estimating Services

We offer vehicle sellers in the UK estimating services for vehicles taken to our facilities. Estimating services provide our insurance company sellers repair estimates which allow the insurance company to determine if the vehicle is a total loss vehicle. If the vehicle is determined to be a total loss, it is generally assigned to inventory.

End-of-Life Vehicle Processing

In the UK, we are an authorized treatment facility, or ATF, for the disposal of End-of-Life vehicles, or ELVs.

Table of Contents

Virtual Insured Exchange (VIX)

We provide the venue for insurance customers to enter a vehicle into a sealed bid sale to establish its true value, thereby allowing the insurance customer to avoid dealing with estimated values when negotiating with owners who wish to retain their damaged vehicles.

Transportation Services

We maintain contracts with third-party vehicle transport companies, which enable us to pick up most of our sellers' vehicles within 24 hours. Our national network and transportation capabilities provide cost and time savings to our vehicle sellers and ensure on-time vehicle pick up and prompt response to catastrophes and natural disasters in North America. In the UK, we perform transportation services through a combination of our fleet of over 100 vehicles and third party vehicle transport companies.

Vehicle Inspection Stations

We offer certain of our major insurance company sellers office and yard space to house vehicle inspection stations on-site at our facilities. We have over 60 vehicle inspection stations at our facilities. An on-site vehicle inspection station provides our insurance company sellers with a central location to inspect potential total loss vehicles, which reduces storage charges that otherwise may be incurred at the initial storage or repair facility.

On-Demand Reporting

We provide vehicle sellers with real time data for vehicles that we process for the particular seller. This includes vehicle sellers' gross and net returns on each vehicle, service charges, and other data that enable our vehicle sellers to more easily administer and monitor the vehicle disposition process. In addition, we have developed a database containing over 240 fields of real-time and historical information accessible by our sellers allowing for their generation of custom ad hoc reports and customer specific analysis.

DMV Processing

We have extensive expertise in DMV document and title processing for salvage vehicles. We have developed a computer system which provides a direct link to the DMV computer systems of several states, allowing us to expedite the processing of vehicle title paperwork.

Flexible Vehicle Processing Programs

At the election of the seller, we sell vehicles pursuant to our Percentage Incentive Program (PIP), Consignment Program or Purchase Program.

Percentage Fee Consignment. Our Percentage Incentive Program is an innovative processing program designed to broadly serve the needs of vehicle sellers. Under PIP, we agree to sell all of the vehicles of a seller in a specified market, usually for a predetermined percentage of the vehicle sales price. Because our revenues under PIP are directly linked to the vehicle's sale price, we have an incentive to actively merchandise those vehicles to maximize the net return. We provide the vehicle seller, at our expense, with transport of the vehicle to our nearest facility, and DMV document and title processing. In addition, we provide merchandising services such as covering or taping openings to protect vehicle interiors from weather, washing vehicle exteriors, vacuuming vehicle interiors, cleaning and polishing dashboards and tires, making keys for drivable vehicles, and identifying drivable vehicles. We believe our merchandising efforts increase the sales prices of the vehicles, thereby increasing the return on salvage vehicles to both vehicle sellers and us.

Table of Contents

Consignment Program. Under our consignment program, we sell vehicles for a fixed consignment fee. Although sometimes included in the consignment fee, we may also charge additional fees for the cost of transporting the vehicle to our facility, storage of the vehicle, and other incidental costs.

Purchase Program. Under the purchase program, we purchase vehicles from a vehicle seller at a formula price, based on a percentage of the vehicles' estimated pre-accident value (PAV), or actual cash value (ACV), and sell the vehicles for our own account. We have no purchase programs in North America.

Buyer Network

We maintain a database of thousands of registered buyers in the vehicle dismantling, rebuilding, repair licensee, used vehicle dealer, and export industries. Public buyer information is included in this database as we sell directly to the general public at certain locations. Our database includes each buyer's vehicle preference and purchasing history. This data enables us to notify via e-mail prospective buyers throughout the world of vehicles available for bidding that match their vehicle preferences. Listings of vehicles to be sold on a particular day and location are also made available on the Internet.

Sales Process

We offer a flexible and unique sales process designed to maximize the sale prices of the vehicles. We utilize VB², an auction-style sales methodology that we developed. This technology and model employs a two-step bidding process. The first step is an open preliminary bidding feature that allows a buyer to enter bids either at a bidding station at the storage facility during the preview days or over the Internet. To improve the effectiveness of bidding, the VB² system lets a buyer see the current high bid on the vehicle they want to purchase. The preliminary bidding step is an open bid format similar to eBay. Buyers enter the maximum price they are willing to pay for a vehicle and VB²'s BID4U feature will incrementally bid the vehicle on their behalf during all steps of the auction. Preliminary bidding ends one hour prior to the start of a second bidding step, an Internet-only virtual auction. This second step allows bidders the opportunity to bid against each other and the highest preliminary bidder. The bidders enter bids via the Internet in real time, then BID4U submits bids for the highest preliminary bidder, up to their maximum bid. When bidding stops, a countdown is initiated. If no bids are received during the countdown, the vehicle sells to the highest bidder. VB² opens our sales process to registered buyers anywhere in the world who have Internet access.

CoPartfinder

CoPartfinder is our unique Internet "search engine" that enables users to locate used vehicle parts quickly and efficiently. CoPartfinder is accessible by the public through a Copart-sponsored website. CoPartfinder lists vehicles recently sold through VB² and identifies certain purchasers. This allows vehicle dismantlers and other resellers to streamline their parts sale process and access a large pool of potential buyers. Parts buyers can use CoPartfinder to search for specific vehicle makes and models and view digital images of vehicles that meet their requirements. Once a specific parts seller is identified for a specific part requirement, buyers have the option to call, fax, or e-mail the dismantler/seller. We believe that CoPartfinder provides an incentive for vehicle dismantlers to purchase their salvage vehicles through our sales process.

Copart Dealer Services

We provide franchise and independent dealers with a convenient method to sell their trade-ins through any of our North American facilities. We have engaged agents that target these dealers and work with them throughout the sales process.

Table of Contents

CopartDirect

We provide the general public with a fast and convenient method to sell vehicles through any of our North American facilities. Anyone can call 1-888-Sell-it-1 and arrange to drop off their vehicle and transferable title at any of our North American facilities. We sell the vehicle by listing it on VB², monitoring the sale, handling the title processing, collecting payment from the buyer, and remitting the balance less our fees to the seller.

U-Pull-It

In the UK we have two facilities from which the public can purchase parts from salvaged and end-of-life vehicles. In general, the buyer is responsible for detaching the parts from the vehicle and any associated hauling or transportation of the parts after detachment. After the valuable parts have been removed by the buyer, the remaining parts and car body are sold for their scrap value.

Seller Marketing

We process vehicles from hundreds of different vehicle sellers. State Farm Insurance Company accounted for 10% of our revenues during fiscal year 2007. No customer accounted for more than 10% of our total revenues during fiscal years 2009 or 2008. Of the total number of vehicles processed during fiscal years 2009, 2008 and 2007, we obtained approximately 83%, 83% and 84%, respectively, from insurance company sellers. Our arrangements with our sellers are typically subject to cancellation by either party upon 30 to 90 days notice.

We typically contract with the regional or branch office of an insurance company or other vehicle sellers. The agreements are customized to each vehicle seller's particular needs and often provide for the disposition of different types of salvage vehicles by differing methods. Our arrangements generally provide that we will sell total loss and recovered stolen vehicles generated by the vehicle seller in a designated geographic area.

We market our services to vehicle sellers through an in-house sales force and independent agents that utilize a variety of sales techniques, including targeted mailing of our sales literature, telemarketing, follow-up personal sales calls, Internet search engines, employee referrals, tow shop referrals, participation in trade shows and vehicle and insurance industry conventions. We market our services to the general public under CopartDirect by utilizing an in-house sales force and we market our services to franchise and independent dealerships through a group of independent agents. We may, when appropriate, provide vehicle sellers with detailed analysis of the net return on vehicles and a proposal setting forth ways in which we believe that we can improve net returns on vehicles and reduce administrative costs and expenses.

Buyers

We maintain a database of thousands of registered buyers in the vehicle dismantling, rebuilding, repair licensee, used vehicle dealer and export industries. We believe that we have established a broad international and domestic buyer base by providing buyers with a variety of programs and services. To become a registered buyer and gain admission to one of our sales, prospective buyers must first pay an initial registration fee and an annual fee, provide requested personal and business information, and have, in most states, a vehicle dismantler's, dealer's, resale, repair or export license. In certain venues we may sell to the general public. Registration entitles a buyer to transact business at any of our sales subject to local licensing and permitting requirements. However, non-registered buyers may transact business at any of our sales via a registered broker who meets the local licensing and permitting requirements. A buyer may also bring guests to a facility for a fee to preview vehicles for sale. Strict admission procedures are intended

Table of Contents

to prevent frivolous bids that would invalidate the sale. We market to buyers on the Internet and via e-mail notifications, sales notices, telemarketing, and participation in trade show events.

Competition

We face significant competition from other remarketers of both salvage and non-salvage vehicles. We believe our principal competitors include vehicle auction and sales companies and vehicle dismantlers. These national, regional and local competitors may have established relationships with vehicle sellers and buyers and may have financial resources that are greater than ours. The largest national or regional vehicle auctioneers in North America include KAR Holdings, Inc. (formerly Adesa, Inc. and Insurance Auto Auctions, Inc.), Auction Broadcasting Company, and Manheim Auctions. The largest national dismantler is LKQ Corporation. LKQ, in addition to trade groups of dismantlers such as the American Recycling Association and the United Recyclers Group, may purchase salvage vehicles directly from insurance companies, thereby bypassing vehicle remarketing companies entirely. In the UK, our principal competitors are privately held independent remarketers.

Management Information Systems

Our primary management information system consists of an IBM AS/400 mainframe computer system, integrated computer interfaces, and proprietary business operating software that we developed and which tracks salvage sales vehicles throughout the sales process. We have implemented our proprietary business operating software at all of our storage facilities. In addition, we have integrated our mainframe computer system with Internet and Intranet systems in order to provide secure access to our data and images in a variety of formats.

Our auction-style service product, VB², is served by an array of identical high-density, high-performance servers. Each individual sale is configured to run on an available server in the array and can be rapidly provisioned to any other available server in the array as required. Our sale, Internet and imaging services are load balanced across different geographical data centers.

We have invested in a production data center that is designed to run the business in the event of an emergency. The facility's electrical and mechanical systems are continually monitored. This facility is located in an area considered to be free of weather-related disasters and earthquakes.

As of July 31, 2008, our UK operations were completely migrated to our proprietary business operating software and servers described above.

Employees

As of July 31, 2009, we had 2,713 full-time employees, of whom approximately 480 were engaged in general and administrative functions and approximately 2,233 were engaged in yard operations. As of July 31, 2009, we had 2,253 and 460 employees located in North America and the UK, respectively. We are not currently subject to any collective bargaining agreements and believe our relationships with our employees are good.

Environmental Matters

Our operations inside and outside the US are subject to various laws and regulations regarding the protection of the environment. In the salvage vehicle remarketing industry, large numbers of wrecked vehicles are stored at facilities and, during that time, spills of fuel, motor oils and other fluids may occur, resulting in soil, surface water or groundwater contamination. Certain of our facilities store petroleum products and other hazardous materials in above-ground containment tanks and some of our facilities generate waste materials such as solvents or used oils that must

Table of Contents

be disposed of as non-hazardous or hazardous waste, as appropriate. We have implemented procedures to reduce the amount of soil contamination that may occur at our facilities, and we have initiated safety programs and training of personnel on the safe storage and handling of hazardous materials. We believe that we are in compliance, in all material respects, with all applicable environmental regulations and we do not anticipate any material capital expenditures to remain in environmental compliance. If additional or more stringent requirements are imposed on us in the future, we could incur additional capital expenditures.

In connection with the acquisition of the Dallas, Texas facility in 1994, we set aside \$3.0 million to cover the costs of environmental remediation, stabilization and related consulting expenses for a six-acre portion of the facility that contained elevated levels of lead due to the activities of the former operators. We began the stabilization process in 1996 and completed it in 1999. We paid all remediation and related costs from the \$3.0 million fund and, in accordance with the acquisition agreement, distributed the remainder of the fund to the seller of the Dallas facility, less \$0.2 million which was held back to cover the costs of obtaining the no-further-action letter. In September 2002, our environmental engineering consultant issued a report, which concludes that the soil stabilization has effectively stabilized the lead-impacted soil, and that the concrete cap should prevent impact to storm water and subsequent surface water impact. Our consultant thereafter submitted an Operations and Maintenance Plan (Plan) to the Texas Commission on Environmental Quality (TCEQ) providing for a two-year inspection and maintenance plan for the concrete cap, and a two-year ground and surface water monitoring plan. In January of 2003, the TCEQ approved the Plan, subject to the additions of upstream (background) surface water samples from the intermittent stream adjacent to the facility and documentation of any repairs to the concrete cap during the post closure-monitoring period. The first semi-annual water sampling was conducted in April 2003, which reflected that the lead-impacted, stabilized soil is not impacting the ground and/or surface water. The second round of semi-annual water samples collected in October and November 2003 reported concentration of lead in one storm water and one surface water sample in excess of the established upstream criteria for lead. In correspondence, which we received in July 2004, the TCEQ approved with comment our water monitoring report dated February 24, 2004. The TCEQ instructed us to continue with post-closure monitoring and maintenance activities and submit the next report in accordance with the approved schedules. In February 2005, a report from our environmental engineering consultant was transmitted to the TCEQ containing the results of annual monitoring activities consisting of two (2) semi-annual sampling events which occurred in April/June 2004 and October/November 2004. Laboratory analytical results indicated no lead concentrations exceeding the target concentration level set in the Corrective Measures Study for the site, but some results were in excess of Texas surface water quality standards. Our environmental engineering consultant concluded in the February 2005 report to the TCEQ that it is unlikely that lead concentrations detected in the storm water runoff samples are attributable to the lead impacted soils. Based on the results of the 2004 samplings, we requested that no further action be taken and that a closure letter be issued by the TCEQ. In September 2007, the TCEQ notified us that they did not concur with our consultant's conclusions and recommendations. The TCEQ said it would not provide a closure letter until additional sampling of surface water is performed which reflects concentrations of lead below Texas surface water quality standards. In February 2008, the TCEQ provided comments to our proposal for surface water sampling. In March 2008, our environmental engineer submitted to the TCEQ an addendum to the surface water sampling plan, which was approved by the TCEQ in June 2008. Sampling was performed in November 2008. In December 2008, a report was submitted to the TCEQ indicating that lead levels were below Texas surface water quality standards. In May of 2009, the TCEQ approved the Surface Water Sampling Report, as well as the Concrete Cap Inspection Report submitted in December 2008. We are making necessary repairs to the concrete cap and providing a survey map of the cap. Annual inspections of the cap will be required to ensure its maintenance. There is no assurance that we may not incur future liabilities if the stabilization process proves

Table of Contents

ineffective, or if future testing of surface or ground water reflects concentrations of lead which exceed Texas surface or ground water quality standards.

We do not believe that the above environmental matter will, either individually or in the aggregate, have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Governmental Regulations

Our operations are subject to regulation, supervision and licensing under various federal, national, international, provincial, state and local statutes, ordinances and regulations. The acquisition and sale of damaged and recovered stolen vehicles is regulated by various state, provincial and international motor vehicle departments. In addition to the regulation of sales and acquisitions of vehicles, we are also subject to various local zoning requirements with regard to the location of our storage facilities. These zoning requirements vary from location to location. At various times, we may be involved in disputes with local governmental officials regarding the development and/or operation of our business facilities. We believe that we are in compliance in all material respects with applicable regulatory requirements. We may be subject to similar types of regulations by federal, national, international, provincial, state, and local governmental agencies in new markets.

Legal Proceedings

We are involved in litigation and damage claims arising in the ordinary course of business, such as actions related to injuries, property damage, and handling or disposal of vehicles. This litigation includes the following matters:

On November 20, 2007, Car Auction & Reinsurance Solutions, Inc. (CARS) filed suit against Copart in the Superior Court in the County of New Castle, Delaware. CARS is seeking in excess of \$2 million in damages, punitive damages, and prejudgment interest related to allegations involving breach of contract and misrepresentation. We believe the claim is without merit and we are vigorously defending the lawsuit.

On December 16, 2008, Liberty Mutual Fire Insurance Company filed suit against Copart in the US District Court, Northern District of California. Liberty Mutual's complaint seeks reformation of an insurance contract and specific performance in relation to a policy issued to us with a \$50,000 self-insured retention. After settlement of a claim under the subject policy for \$3.95 million, Liberty Mutual is seeking to reform the contract and charge Copart for a \$2 million self-insured retention which it claims was the original intent. We are vigorously defending the lawsuit.

We provide for costs relating to these matters when a loss is probable and the amount can be reasonably estimated. The effect of the outcome of these matters on our future results of operations cannot be predicted because any such effect depends on future results of operations and the amount and timing of the resolution of such matters. We believe that the ultimate liability, if any, will not have a material effect on our financial position, results of operations or cash flows. However, the amount of the liabilities associated with these claims, if any, cannot be determined with certainty. We maintain insurance which may or may not provide coverage for claims made against us. There is no assurance that there will be insurance coverage available when and if needed or that our insurers will not seek to deny or limit coverage. Additionally, the insurance that we carry requires that we pay for costs and/or claims exposure up to the amount of the insurance deductibles negotiated when insurance is purchased.

Table of Contents

Intellectual Property and Proprietary Rights

In June 2003, we filed a provisional US patent application on VB² in the United States. This provisional patent application was followed by a US utility application filed in July 2003 and a concurrent international application that has since been nationalized and is pending in the Netherlands, Canada, Australia, China, the European Union, Mexico and Japan. The patent was issued by the United States Patent and Trademark Office on January 1, 2008. Generally, patents issued in the US are effective for 20 years from the earliest asserted filing date of the patent application. The duration of foreign patents varies in accordance with the provisions of applicable local law. We are not dependent upon any single patent application and there can be no assurance that any patents will be issued from pending applications or that any patents that are issued will provide meaningful protection or other commercial advantages to us.

We also rely on a combination of trade secret, copyright and trademark laws, as well as contractual agreements to safeguard our proprietary rights in technology and products. In seeking to limit access to sensitive information to the greatest practical extent, we routinely enter into confidentiality and assignment of invention agreements with each of our employees and consultants and nondisclosure agreements with our key customers and vendors.

Seasonality

Historically, our operating results have been subject to quarterly variations based on a variety of factors, of which the primary influence is the seasonal change in weather patterns. During the winter months we tend to have higher demand for our services because there are more weather related accidents.

Table of Contents

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should consider carefully the risks and uncertainties described below before making an investment decision. Our business could be harmed if any of these risks, as well as other risks not currently known to us or that we currently deem immaterial, materialized. The trading price of our common stock could decline due to the occurrence of any of these risks, and you may lose all or part of your investment. In assessing the risks described below, you should also refer to the other information contained in this Form 10-K, including our consolidated financial statements and the related notes and schedules, and other filings with the SEC before deciding to purchase any shares of our common stock.

We depend on a limited number of major vehicle sellers for a substantial portion of our revenues. The loss of one or more of these major sellers could adversely affect our results of operations and financial condition, and an inability to increase our sources of vehicle supply could adversely affect our growth rates.

Historically, a limited number of vehicle sellers have accounted for a substantial portion of our revenues. Seller arrangements are either written or oral agreements typically subject to cancellation by either party upon 30 to 90 days notice. Vehicle sellers have terminated agreements with us in the past in particular markets, which has affected the pricing for sales services in those markets. There can be no assurance that our existing agreements will not be cancelled. Furthermore, there can be no assurance that we will be able to enter into future agreements with vehicle sellers or that we will be able to retain our existing supply of salvage vehicles. A reduction in vehicles from a significant vehicle seller or any material changes in the terms of an arrangement with a substantial vehicle seller could have a material adverse effect on our results of operations and financial condition. In addition, a failure to increase our sources of vehicle supply could adversely affect our earnings and revenue growth rates. During fiscal 2009, no single customer accounted for more than 10% of our revenues.

Our acquisitions in the UK expose us to risks arising from the acquisitions and risks associated with operating in markets outside North America. We may acquire additional companies in the UK or other countries in Europe or seek to establish new yards or facilities to complement the acquired companies' operations. We have limited experience operating outside North America, and any failure to integrate these recently acquired companies or future UK or other European acquisitions into our operations successfully could have an adverse effect on our financial position, results of operations or cash flows.

During fiscal 2007, we completed the acquisition of Universal Salvage plc, or Universal, our first acquisition in the UK. In fiscal 2008, we completed the acquisitions of Century Salvage Sales Limited, or Century, Simpson Bros. (York) Holdings, Limited and AG Watson Auto Salvage & Motor Spares (Scotland) Limited, all located within the UK. We may continue to acquire additional companies or operations in the UK or other countries in Europe or may seek to establish new yards or operations in the UK or Europe now that we have established a presence in these markets. We have limited experience operating our business outside North America, which presents numerous strategic, operational, and financial risks to us.

Our acquisitions in the UK and continued expansion of our operations outside North America pose substantial risks and uncertainties that could have an adverse effect on our future operating results. In particular, we may not be successful in realizing anticipated synergies from these acquisitions, or we may experience unanticipated costs or expenses integrating the acquired operations into our existing business. For example, in the second quarter of fiscal 2008, we experienced losses associated with credit card fraud in the UK. Although historical practice in the UK market has been to accept credit cards, we have not accepted them in North America and may need to further enhance our security systems to reduce the risk of credit card fraud. In addition, our

Table of Contents

operating expenses were adversely affected in the second quarter of fiscal 2008 by incremental integration expenses. We have and may continue to incur substantial expenses establishing new yards or operations in the UK or Europe. Among other things, we have deployed our VB² online vehicle auction technologies at all of our operations in the UK and we cannot predict whether this deployment will be successful or will result in increases in the revenues or operating efficiencies of any acquired companies relative to their historic operating performance. Integration of our respective operations, including information technology integration and integration of financial and administrative functions, may not proceed as we currently anticipate and could result in presently unanticipated costs or expenses (including unanticipated capital expenditures) that could have an adverse effect on our future operating results. We cannot provide any assurances that we will achieve our business and financial objectives in connection with these acquisitions or our strategic decision to expand our operations internationally.

We have limited experience operating our business outside North America and lack familiarity with local laws, regulations and business practices. We will need to develop policies and procedures to manage our business on a global scale. Operationally, the businesses of Universal, Century and AG Watson have depended on key seller relationships, and our failure to maintain those relationships would have an adverse effect on our operating objectives for the UK and could have an adverse effect on our future operating results.

In addition, we anticipate our international operations will subject us to a variety of risks associated with operating on an international basis, including:

the difficulty of managing and staffing foreign offices and the increased travel, infrastructure and legal compliance costs associated with multiple international locations;

the need to localize our product offerings, particularly with respect to VB²;

tariffs and trade barriers and other regulatory or contractual limitations on our ability to operate in certain foreign markets; and

exposure to foreign currency exchange rate risk, which we have not been previously subject to in any material amounts and which had an adverse impact on our revenues and revenue growth rates during the twelve months ended July 31, 2009.

As we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. Our failure to manage any of these risks successfully could harm our international operations and have an adverse effect on our operating results.

If we determine that our goodwill has become impaired, we could incur significant charges that would have a material adverse effect on our results of operations.

Goodwill represents the excess of cost over the fair market value of assets acquired in business combinations. In recent periods, the amount of goodwill on our balance sheet has increased substantially, principally as a result of a series of acquisitions we have made in the UK since 2007. As of July 31, 2009, the amount of goodwill on our balance sheet subject to future impairment testing was approximately \$166 million.

Pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets*, we are required to annually test goodwill and intangible assets with indefinite lives to determine if impairment has occurred. Additionally, interim reviews must be performed whenever events or changes in circumstances indicate that impairment may have occurred. If the testing performed indicates that impairment has occurred, we are required to record a non-cash impairment charge for the difference between the carrying value of the goodwill or other intangible assets and the implied fair value of the goodwill or other intangible assets in the period the determination is made. The testing of goodwill and other intangible assets for impairment requires us to make significant estimates about our future

Table of Contents

performance and cash flows, as well as other assumptions. These estimates can be affected by numerous factors, including changes in the definition of a business segment in which we operate, changes in economic, industry or market conditions, changes in business operations, changes in competition or potential changes in the share price of our common stock and market capitalization. Changes in these factors, or changes in actual performance compared with estimates of our future performance, could affect the fair value of goodwill or other intangible assets, which may result in an impairment charge. For example, continued deterioration in worldwide economic conditions could affect these assumptions and lead us to determine that a goodwill impairment is required with respect to our acquisitions in the UK. We cannot accurately predict the amount or timing of any impairment of assets. Should the value of our goodwill or other intangible assets become impaired, it could have a material adverse effect on our operating results and could result in our incurring net losses in future periods.

In the UK we operate primarily on a principal basis, purchasing the salvage vehicle outright from the insurance companies and reselling the vehicle to buyers. Continued operations on a principal basis will have a negative impact on our future consolidated gross margin percentages and exposes us to additional inventory risks.

The period-to-period comparability of our operating results and financial condition is substantially affected by business acquisitions during such periods. In particular, the UK acquisitions, because of their size and, also, because the UK operates primarily on the principal model versus the agency model employed in North America, will have a significant impact on the comparability of revenues, margins and margin percentages in future periods. Continued operations on a principal basis will have a negative impact on our future consolidated gross margin percentages, and exposes us to inventory risks including:

loss from theft or damage;

loss from devaluation; and

loss from obsolescence.

Our strategic shift from live sales to an entirely Internet-based sales model presents risks, including substantial technology risks.

During 2004, in North America and during 2008 in the UK we converted all of our sales from a live auction process to an entirely Internet-based auction-style model based on technology developed internally by us. The conversion represented a significant change in the way we conduct business and currently presents numerous risks, including our increased reliance on the availability and reliability of our network systems. In particular, we believe the conversion presents the following risks, among others:

Our operating results in a particular period could be adversely affected in the event our networks are not operable for an extended period of time for any reason, as a result of Internet viruses, or as a result of any other technological circumstance that makes us unable to conduct our virtual sales.

Our business is increasingly reliant on internally developed technology, and we have limited historic experience developing technologies or systems for large-scale implementation and use.

Our general and administrative expenses have tended to increase as a percentage of revenue as our information technology payroll has increased.

The change in our business model may make it more difficult for management, investment analysts, and investors to model or predict our future operating results until sufficient historic

Table of Contents

data is available to evaluate the effect of the VB² implementation over a longer period of time and in different economic environments.

Our increasing reliance on proprietary technology subjects us to intellectual property risks, including the risk of third party infringement claims or the risk that we cannot establish or protect intellectual property rights in our technologies. We have filed patent applications for VB² in the Netherlands, Canada, Australia, China, the European Union, Mexico and Japan, but we cannot provide any assurances that the patents will actually be issued, or if issued that the patents would not later be found to be unenforceable or invalid.

Our results of operations may not continue to benefit from the implementation of VB² to the extent we have experienced in recent periods.

We believe that the implementation of our proprietary VB² sales technologies across our operations has had a favorable impact on our results of operations by increasing the size and geographic scope of our buyer base and increasing the average selling price for vehicles sold through our sales. VB² was implemented across all of our North American and UK salvage yards beginning in fiscal 2004 and fiscal 2008, respectively. We do not believe, however, that we will continue to experience improvements in our results of operations at the same relative rates we have experienced in the last few years. In addition, we cannot predict whether we will experience the same initial benefits from the implementation of VB² in the UK market, or in future markets we may enter, that we experienced in North America.

Failure to have sufficient capacity to accept additional cars at one or more of our storage facilities could adversely affect our relationships with insurance companies or other sellers of vehicles.

Capacity at our storage facilities varies from period to period and from region to region. For example, following adverse weather conditions in a particular area, our yards in that area may fill and limit our ability to accept additional salvage vehicles while we process existing inventories. As discussed below, Hurricanes Katrina and Rita had, in certain quarters, an adverse effect on our operating results, in part because of yard capacity constraints in the Gulf Coast area. We regularly evaluate our capacity in all our markets and, where appropriate, seek to increase capacity through the acquisition of additional land and yards. We may not be able to reach agreements to purchase independent storage facilities in markets where we have limited excess capacity, and zoning restrictions or difficulties obtaining use permits may limit our ability to expand our capacity through acquisitions of new land. Failure to have sufficient capacity at one or more of our yards could adversely affect our relationships with insurance companies or other sellers of vehicles, which could have an adverse effect on our operating results.

Factors such as mild weather conditions can have an adverse effect on our revenues and operating results as well as our revenue and earnings growth rates by reducing the available supply of salvage vehicles. Conversely, extreme weather conditions can result in an oversupply of salvage vehicles that requires us to incur abnormal expenses to respond to market demands.

Mild weather conditions tend to result in a decrease in the available supply of salvage vehicles because traffic accidents decrease and fewer automobiles are damaged. Accordingly, mild weather can have an adverse effect on our salvage vehicle inventories, which would be expected to have an adverse effect on our revenue and operating results and related growth rates. Conversely, our inventories will tend to increase in poor weather such as a harsh winter or as a result of adverse weather-related conditions such as flooding. During periods of mild weather conditions, our ability to increase our revenues and improve our operating results and related growth will be increasingly dependent on our ability to obtain additional vehicle sellers and to compete more effectively in the market, each of which is subject to the other risks and uncertainties described in these sections. In

Table of Contents

addition, extreme weather conditions, although they increase the available supply of salvage cars, can have an adverse effect on our operating results. For example, during the year ended July 31, 2006, we recognized substantial additional costs associated with the impact of Hurricanes Katrina and Rita in Gulf Coast states. These additional costs, characterized as "abnormal" under Statement of Financial Accounting Standards 151, were recognized during the year ended July 31, 2006, and included the additional subhauling, payroll, equipment and facilities expenses directly related to the operating conditions created by the hurricanes. In the event that we were to again experience extremely adverse weather or other anomalous conditions that result in an abnormally high number of salvage vehicles in one or more of our markets, those conditions could have an adverse effect on our future operating results.

Macroeconomic factors such as high fuel prices, declines in commodity prices, and declines in used car prices may have an adverse effect on our revenues and operating results as well as our earnings growth rates.

Macroeconomic factors that affect oil prices and the automobile and commodity markets can have adverse effects on our revenues, revenue growth rates (if any), and operating results. Significant increases in the cost of fuel could lead to a reduction in miles driven per car and a reduction in accident rates. A material reduction in accident rates could have a material impact on revenue growth. In addition, under our percentage incentive program contracts, or PIP, the cost of towing the vehicle to one of our facilities is included in the PIP fee. We may incur increased fees, which we may not be able to pass on to our vehicle sellers. A material increase in tow rates could have a material impact on our operating results. Recently, the markets in which we operate have been particularly affected by changes in fuel prices, commodity prices, and decreases in the prices of used cars. In particular, declines in scrap metal and used car prices had an adverse impact on our revenue growth rates during the twelve months ended July 31, 2009. Continued volatility in fuel, commodity, and used car prices could have a material adverse effect on our revenues and revenue growth rates in future periods.

The salvage vehicle sales industry is highly competitive and we may not be able to compete successfully.

We face significant competition for the supply of salvage vehicles and for the buyers of those vehicles. We believe our principal competitors include other auction and vehicle remarketing service companies with whom we compete directly in obtaining vehicles from insurance companies and other sellers, and large vehicle dismantlers, who may buy salvage vehicles directly from insurance companies, bypassing the salvage sales process. Many of the insurance companies have established relationships with competitive remarketing companies and large dismantlers. Certain of our competitors may have greater financial resources than us. Due to the limited number of vehicle sellers, particularly in the UK, the absence of long-term contractual commitments between us and our sellers and the increasingly competitive market environment, there can be no assurance that our competitors will not gain market share at our expense.

We may also encounter significant competition for local, regional and national supply agreements with vehicle sellers. There can be no assurance that the existence of other local, regional or national contracts entered into by our competitors will not have a material adverse effect on our business or our expansion plans. Furthermore, we are likely to face competition from major competitors in the acquisition of vehicle storage facilities, which could significantly increase the cost of such acquisitions and thereby materially impede our expansion objectives or have a material adverse effect on our results of operations. These potential new competitors may include consolidators of automobile dismantling businesses, organized salvage vehicle buying groups, automobile manufacturers, automobile auctioneers and software companies. While most vehicle sellers have abandoned or reduced efforts to sell salvage vehicles directly without the use of service

Table of Contents

providers such as us, there can be no assurance that this trend will continue, which could adversely affect our market share, results of operations and financial condition. Additionally, existing or new competitors may be significantly larger and have greater financial and marketing resources than us; therefore, there can be no assurance that we will be able to compete successfully in the future.

Because the growth of our business has been due in large part to acquisitions and development of new facilities, the rate of growth of our business and revenues may decline if we are not able to successfully complete acquisitions and develop new facilities.

We seek to increase our sales and profitability through the acquisition of additional facilities and the development of new facilities. There can be no assurance that we will be able to:

continue to acquire additional facilities on favorable terms;

expand existing facilities in no-growth regulatory environments;

increase revenues and profitability at acquired and new facilities;

maintain the historical revenue and earnings growth rates we have been able to obtain through facility openings and strategic acquisitions; or

create new vehicle storage facilities that meet our current revenue and profitability requirements.

As we continue to expand our operations, our failure to manage growth could harm our business and adversely affect our results of operations and financial condition.

Our ability to manage growth depends not only on our ability to successfully integrate new facilities, but also on our ability to:

hire, train and manage additional qualified personnel;

establish new relationships or expand existing relationships with vehicle sellers;

identify and acquire or lease suitable premises on competitive terms;

secure adequate capital; and

maintain the supply of vehicles from vehicle sellers.

Our inability to control or manage these growth factors effectively could have a material adverse effect on our financial position, results of operations, or cash flows.

Our annual and quarterly performance may fluctuate, causing the price of our stock to decline.

Our revenues and operating results have fluctuated in the past and can be expected to continue to fluctuate in the future on a quarterly and annual basis as a result of a number of factors, many of which are beyond our control. Factors that may affect our operating results include, but are not limited to, the following:

Edgar Filing: COPART INC - Form 10-K

fluctuations in the market value of salvage and used vehicles;

the impact of foreign exchange gain and loss as a result of our recently acquired companies in the UK;

our ability to successfully integrate our newly acquired operations in the UK and any additional international markets we may enter;

the availability of salvage vehicles;

variations in vehicle accident rates;

buyer participation in the Internet bidding process;

delays or changes in state title processing;

Edgar Filing: COPART INC - Form 10-K

Table of Contents

changes in international, state or federal laws or regulations affecting salvage vehicles;

changes in local laws affecting who may purchase salvage vehicles;

our ability to integrate and manage our acquisitions successfully;

the timing and size of our new facility openings;

the announcement of new vehicle supply agreements by us or our competitors;

the severity of weather and seasonality of weather patterns;

the amount and timing of operating costs and capital expenditures relating to the maintenance and expansion of our business, operations and infrastructure;

the availability and cost of general business insurance;

labor costs and collective bargaining;

the availability of subhaulers at competitive rates;

acceptance of buyers and sellers of our Internet-based model deploying VB², a proprietary Internet auction-style sales technology;

changes in the current levels of out of state and foreign demand for salvage vehicles;

the introduction of a similar Internet product by a competitor; and

the ability to obtain necessary permits to operate.

Due to the foregoing factors, our operating results in one or more future periods can be expected to fluctuate. As a result, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as any indication of future performance. In the event such fluctuations result in our financial performance being below the expectations of public market analysts and investors, the price of our common stock could decline substantially.

Our strategic shift to an Internet-based sales model has increased the relative importance of intellectual property assets to our business, and any inability to protect those rights could have a material adverse effect on our business, financial condition, or results of operations.

Implementation of VB² in our operations has increased the relative importance of intellectual property rights to our business. Our intellectual property rights include a patent for VB² as well as trademarks, trade secrets, copyrights and other intellectual property rights. In addition, we may enter into agreements with third parties regarding the license or other use of our intellectual property in foreign jurisdictions.

Effective intellectual property protection may not be available in every country in which our products and services are distributed, deployed, or made available. We seek to maintain certain intellectual property rights as trade secrets. The secrecy could be compromised by third parties, or intentionally or accidentally by our employees, which would cause us to lose the competitive advantage resulting from those trade secrets. Any significant impairment of our intellectual property rights, or any inability to protect our intellectual property rights, could have a material adverse effect on our financial position, results of operations, or cash flows.

We have in the past been and may in the future be subject to intellectual property rights claims, which are costly to defend, could require us to pay damages, and could limit our ability to use certain technologies in the future.

Litigation based on allegations of infringement or other violations of intellectual property rights are common among companies who rely heavily on intellectual property rights. Our reliance on intellectual property rights has increased significantly in recent years as we have implemented our VB² auction-style sales technologies across our business and ceased conducting live auctions in our North American operations. As we face increasing competition, the possibility of intellectual property

Table of Contents

rights claims against us grows. Litigation and any other intellectual property claims, whether with or without merit, can be time-consuming, expensive to litigate and settle, and can divert management resources and attention from our core business. An adverse determination in current or future litigation could prevent us from offering our products and services in the manner currently conducted. We may also have to pay damages or seek a license for the technology, which may not be available on reasonable terms and which may significantly increase our operating expenses, if it is available for us to license at all. We could also be required to develop alternative non-infringing technology, which could require significant effort and expense.

Government regulation of the salvage vehicle sales industry may impair our operations, increase our costs of doing business and create potential liability.

Participants in the salvage vehicle sales industry are subject to, and may be required to expend funds to ensure compliance with a variety of governmental, regulatory and administrative rules, regulations, land use ordinances, licensure requirements and procedures, including those governing vehicle registration, the environment, zoning and land use. Failure to comply with present or future regulations or changes in interpretations of existing regulations may result in impairment of our operations and the imposition of penalties and other liabilities. At various times, we may be involved in disputes with local governmental officials regarding the development and/or operation of our business facilities. We believe that we are in compliance in all material respects with applicable regulatory requirements. We may be subject to similar types of regulations by federal, national, international, provincial, state, and local governmental agencies in new markets. In addition, new regulatory requirements or changes in existing requirements may delay or increase the cost of opening new facilities, may limit our base of salvage vehicle buyers and may decrease demand for our vehicles.

Changes in laws affecting the importation of salvage vehicles may have an adverse effect on our business and financial condition.

Our Internet-based auction-style model has allowed us to offer our products and services to international markets and has increased our international buyer base. As a result, foreign importers of salvage vehicles now represent a significant part of our total buyer base. Changes in laws and regulations that restrict the importation of salvage vehicles into foreign countries may reduce the demand for salvage vehicles and impact our ability to maintain or increase our international buyer base. For example, in March 2008, a decree issued by the president of Mexico became effective that placed restrictions on the types of vehicles that can be imported into Mexico from the United States. The adoption of similar laws or regulations in other jurisdictions that have the effect of reducing or curtailing our activities abroad could have a material adverse effect on our results of operations and financial condition by reducing the demand for our products and services.

New accounting pronouncements or new interpretations of existing standards could require us to make adjustments to accounting policies that could adversely affect the financial statements.

The Financial Accounting Standards Board, or the FASB, the Public Company Accounting Oversight Board, the SEC, and other accounting organizations or governmental entities from time to time issue new pronouncements or new interpretations of existing accounting standards that require changes to our accounting policies and procedures. To date, we do not believe any new pronouncements or interpretations have had a material adverse effect on our financial condition or results of operations, but future pronouncements or interpretations could require a change or changes in our policies or procedures.

Table of Contents

The operation of our storage facilities poses certain environmental risks, which could adversely effect our financial position, results of operations or cash flows.

Our operations are subject to federal, state, national, provincial and local laws and regulations regarding the protection of the environment in the countries which we have storage facilities. In the salvage vehicle remarketing industry, large numbers of wrecked vehicles are stored at storage facilities and, during that time, spills of fuel, motor oil and other fluids may occur, resulting in soil, surface water or groundwater contamination. In addition, certain of our facilities generate and/or store petroleum products and other hazardous materials, including waste solvents and used oil. In the UK, we provide vehicle de-pollution and crushing services for End-of-Life program vehicles. We could incur substantial expenditures for preventative, investigative or remedial action and could be exposed to liability arising from our operations, contamination by previous users of certain of our acquired facilities, or the disposal of our waste at off-site locations. Environmental laws and regulations could become more stringent over time and there can be no assurance that we or our operations will not be subject to significant costs in the future. Although we have obtained indemnification for pre-existing environmental liabilities from many of the persons and entities from whom we have acquired facilities, there can be no assurance that such indemnifications will be adequate. Any such expenditures or liabilities could have a material adverse effect on our results of operations and financial condition.

If we experience problems with our trucking fleet operations, our business could be harmed.

We rely solely upon independent subhaulers to pick up and deliver vehicles to and from our North American storage facilities. We also utilize, to a lesser extent, independent subhaulers in the UK. Our failure to pick up and deliver vehicles in a timely and accurate manner could harm our reputation and brand, which could have a material adverse effect on our business. Further, an increase in fuel cost may lead to increased prices charged by our independent subhaulers, which may significantly increase our cost. We may not be able to pass these costs on to our sellers or buyers.

In addition to using independent subhaulers in the UK, we utilize a fleet of company trucks to pick up and deliver vehicles from our UK storage facilities. In connection therewith, we are subject to the risks associated with providing trucking services, including inclement weather, disruptions in transportation infrastructure, availability and price of fuel, any of which could result in an increase in our operating expenses and reduction in our net income.

We are partially self-insured for certain losses and if our estimates of the cost of future claims differ from actual trends, our results of our operations could be harmed.

We are partially self-insured for certain losses related to medical insurance, general liability, workers' compensation and auto liability. Our liability represents an estimate of the ultimate cost of claims incurred as of the balance sheet date. The estimated liability is not discounted and is established based upon analysis of historical data and actuarial estimates. While we believe these estimates are reasonable based on the information currently available, if actual trends, including the severity of claims and medical cost inflation, differ from our estimates, our results of operations could be impacted. Further, we rely on independent actuaries to assist us in establishing the proper amount of reserves for anticipated payouts associated with these self-insured exposures.

Our executive officers, directors and their affiliates hold a large percentage of our stock and their interests may differ from other shareholders.

Our executive officers, directors and their affiliates beneficially own, in the aggregate, approximately 16% of our common stock as of July 31, 2009. If they were to act together, these shareholders would have significant influence over most matters requiring approval by shareholders,

Table of Contents

including the election of directors, any amendments to our articles of incorporation and certain significant corporate transactions, including potential merger or acquisition transactions. In addition, without the consent of these shareholders, we could be delayed or prevented from entering into transactions that could be beneficial to us or our other investors. These shareholders may take these actions even if they are opposed by our other investors.

We have a shareholder rights plan, or poison pill, which could affect the price of our common stock and make it more difficult for a potential acquirer to purchase a large portion of our securities, to initiate a tender offer or a proxy contest, or to acquire us.

In March 2003, our board of directors adopted a shareholder rights plan, commonly known as a poison pill. The poison pill may discourage, delay, or prevent a third party from acquiring a large portion of our securities, initiating a tender offer or proxy contest, or acquiring us through an acquisition, merger, or similar transaction. Such an acquirer could be prevented from consummating one of these transactions even if our shareholders might receive a premium for their shares over then-current market prices.

If we lose key management or are unable to attract and retain the talent required for our business, we may not be able to successfully manage our business or achieve our objectives.

Our future success depends in large part upon the leadership and performance of our executive management team, all of whom are employed on an at-will basis and none of whom are subject to any agreements not to compete. If we lose the service of one or more of our executive officers or key employees, in particular Willis J. Johnson, our Chief Executive Officer, and A. Jayson Adair, our President, or if one or more of them decides to join a competitor or otherwise compete directly or indirectly with us, we may not be able to successfully manage our business or achieve our business objectives.

Our cash investments are subject to numerous risks.

We may invest our excess cash in securities or money market funds backed by securities, which may include US treasuries, other federal, state and municipal debt, bonds, preferred stock, commercial paper, insurance contracts and other securities both privately and publicly traded. All securities are subject to risk, including fluctuations in interest rates, credit risk, market risk and systemic economic risk. Changes or movements in any of these risk factors may result in a loss or an impairment to our invested cash and may have a material affect on our financial statements.

The recent financial crisis and economic downturn may negatively affect our business, operating results, or financial condition.

The capital and credit markets have been experiencing extreme volatility and disruption for over a year, which has led to an economic downturn in the US and abroad. As a result of the ongoing financial crisis and economic downturn, the number of miles driven may continue to decrease, which may lead to fewer accident claims, a reduction of vehicle repairs, and fewer salvage vehicles. Adverse credit conditions may also affect the ability of buyers to secure financing to purchase salvaged vehicles which may adversely affect demand. In addition if the banking system or the financial markets deteriorate or remain volatile our banking institution may reduce our line of credit.

Fluctuations in foreign currency exchange rates could result in declines in our reported revenues and earnings.

Our reported revenues and earnings are subject to fluctuations in currency exchange rates. We do not engage in foreign currency hedging arrangements and, consequently, foreign currency fluctuations may adversely affect our revenues and earnings. Should we choose to engage in

Table of Contents

hedging activities in the future we cannot be assured our hedges will be effective or that the costs of the hedges will not exceed their benefits. Fluctuations in the rate of exchange between the US dollar and foreign currencies, primarily the British Pound and Canadian Dollar, could adversely affect our financial results.

Investment in NASCAR sponsorships and other advertising could impact our operating results

We have, in fiscal 2009, and will continue in fiscal 2010 to invest in advertising and sponsorship programs with NASCAR and other events in the motorsports industry. We may expend amounts that are material to our overall general and administrative expenses and we cannot predict what future benefits, if any, will be derived.

New buyer programs could impact our operating results

We have or will initiate programs to open our auctions to the general public. These programs include the Registered Broker program through which the public can purchase vehicles through a registered buyer and the Market Maker program through which registered buyers can open Copart storefronts with internet kiosks enabling the general public to search our inventory and purchase vehicles. Initiating programs that allow access to our online auctions to the general public may involve material expenditures and we cannot predict what future benefit, if any, will be derived.

Item 1B. *Unresolved Staff Comments*

Not applicable.

Item 2. *Properties*

Our corporate headquarters are located in Fairfield, California. This facility consists of approximately 100,000 square feet of office space owned by Copart. We also own or lease an additional 147 operating facilities. In the US, we have facilities in every state except Delaware, New Hampshire, North Dakota, Rhode Island, South Dakota, Vermont and Wyoming. In Canada, we are only in the province of Ontario. In the UK, as of July 31, 2009, we owned or leased 12 operating facilities. We believe that our existing facilities are adequate to meet current requirements and that suitable additional or substitute space will be available as needed to accommodate any expansion of operations and additional offices on commercially acceptable terms.

Item 3. *Legal Proceedings*

We are involved in litigation and damage claims arising in the ordinary course of business, such as actions related to injuries, property damage, and handling or disposal of vehicles. This litigation includes the following matters:

On November 20, 2007, Car Auction & Reinsurance Solutions, Inc. (CARS) filed suit against Copart in the Superior Court in the County of New Castle, Delaware. CARS is seeking in excess of \$2 million in damages, punitive damages, and prejudgment interest related to allegations involving breach of contract and misrepresentation. We believe the claim is without merit and we are vigorously defending the lawsuit.

On December 16, 2008, Liberty Mutual Fire Insurance Company filed suit against Copart in the US District Court, Northern District of California. Liberty Mutual's complaint seeks reformation of an insurance contract and specific performance in relation to a policy issued to us with a \$50,000 self-insured retention. After settlement of a claim under the subject policy for \$3.95 million, Liberty Mutual is seeking to reform the contract and charge Copart for a \$2 million self-insured retention which it claims was the original intent. We are vigorously defending the lawsuit.

Table of Contents

We provide for costs relating to these matters when a loss is probable and the amount can be reasonably estimated. The effect of the outcome of these matters on our future results of operations cannot be predicted because any such effect depends on future results of operations and the amount and timing of the resolution of such matters. We believe that any ultimate liability will not have a material effect on our financial position, results of operations or cash flows. However, the amount of the liabilities associated with these claims, if any, cannot be determined with certainty. We maintain insurance which may or may not provide coverage for claims made against us. There is no assurance that there will be insurance coverage available when and if needed or that our insurers will not seek to deny or limit coverage. Additionally, the insurance that we carry requires that we pay for costs and/or claims exposure up to the amount of the insurance deductibles negotiated when insurance is purchased.

Item 4. *Submission of Matters to a Vote of Security Holders*

We did not submit any matters to a vote of our shareholders during the fourth quarter of our 2009 fiscal year.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities****Market Information**

The following table summarizes the high and low sales prices per share of our common stock for each quarter during the last two fiscal years. As of July 31, 2009, there were 83,938,814 shares outstanding. Our common stock has been quoted on the Nasdaq under the symbol "CPRT" since March 17, 1994. As of July 31, 2009, we had 1,745 shareholders of record. On July 31, 2009, the last reported sale price of our common stock on the Nasdaq Global Select Market was \$35.31 per share.

Fiscal Year 2009	High	Low
Fourth Quarter	36.00	29.02
Third Quarter	32.78	23.48
Second Quarter	36.57	22.54
First Quarter	46.96	30.21

Fiscal Year 2008	High	Low
Fourth Quarter	49.34	39.50
Third Quarter	42.83	33.81
Second Quarter	43.27	33.44
First Quarter	38.58	27.90

Dividend Policies

We have not paid a cash dividend since becoming a public company in 1994. We currently intend to retain any earnings for use in our business.

We expect to continue to use cash flows from operations to finance our working capital needs and to develop and grow our business. In addition to our stock repurchase program, we are considering a variety of alternative potential uses for our remaining cash balances and our cash flow from operations. These alternative potential uses include additional stock repurchases, the payment of dividends and acquisitions.

Repurchase of Our Common Stock

In October 2007, our Board of Directors approved a 20 million share increase in our stock repurchase program bringing the total current number of shares authorized for repurchase to 29 million shares. The repurchases may be effected through solicited or unsolicited transactions in the open market or in privately negotiated transactions. No time limit has been placed on the duration of the share repurchase program. Subject to applicable securities laws, such repurchases will be made at such times and in such amounts as we deem appropriate and may be discontinued at any time. For the year ended July 31, 2009, we did not repurchase any shares under our stock repurchase program. For the year ended July 31, 2008, we repurchased 6,615,764 shares at a weighted average price of \$40.70. For the year ended July 31, 2007, we repurchased 2,995,405 shares at a weighted average price of \$29.91. At the end of fiscal year 2009, the total number of shares repurchased under the program was 13,649,469. As of July 31, 2009, 15,350,531 shares were available for repurchase under our program.

In December 2008, our President exercised 600,000 options at an exercise price of \$4.47 per share. In a cashless exercise, 96,929 shares of the 600,000 options exercised were net settled in

Table of Contents

satisfaction of the exercise price for the portion of options that were classified as non-qualified stock options. Additionally, 222,817 shares were withheld at a per share price of \$26.93, totaling approximately \$6.0 million, based on the closing price of our common stock on the date of exercise, in lieu of the federal and state minimum statutory tax withholding requirements. In June 2009, our President exercised 361,035 options at an exercise price of \$11.12 per share. In a cashless exercise, 116,741 shares of the 361,035 shares exercised were net settled in satisfaction of the exercise price for the portion of options that were classified as non-qualified stock options. Additionally, 109,595 shares were withheld at a per share price of \$34.39, totaling approximately \$3.8 million, based on the closing price of our common stock on the date of exercise, in lieu of the federal and state minimum statutory tax withholding requirements. We remitted approximately \$9.8 million to the proper taxing authorities in satisfaction of the employee's minimum statutory withholding requirements. The tax withholding amounts paid by us have been accounted for as a repurchase of shares in the shareholders' equity section in the accompanying consolidated balance sheet. However, these deemed share repurchases are not included as part of our stock repurchase program described in the preceding paragraph.

The number and average price of shares purchased in each fiscal year are set forth in the table below:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares That May Yet Be Purchased Under the Program
<i>Fiscal 2007</i>				
First Quarter				
Second Quarter				
Third Quarter				
Fourth Quarter	2,995,405	\$ 29.91	2,995,405	1,966,295
<i>Fiscal 2008</i>				
First Quarter				21,966,295*
Second Quarter	982,655	\$ 41.67	982,655	20,983,640
Third Quarter	2,779,509	\$ 38.77	2,779,509	18,204,131
Fourth Quarter	2,853,600	\$ 42.24	2,853,600	15,350,531
<i>Fiscal 2009</i>				
First Quarter				15,350,531
Second Quarter				15,350,531
Third Quarter				15,350,531
Fourth Quarter				15,350,531

*

Includes 20 million share increase in our stock repurchase program authorized by the Board of Directors in October 2007.

Issuances of Unregistered Securities

There were no issuances of unregistered securities in the quarter ended July 31, 2009.

Table of Contents**Performance Graph**

Notwithstanding any statement to the contrary in any of our previous or future filings with the SEC, the following information relating to the price performance of our common stock shall not be deemed "filed" with the SEC or "Soliciting Material" under the Exchange Act, or subject to Regulation 14A or 14C, or to liabilities of Section 18 of the Exchange Act except to the extent we specifically request that such information be treated as soliciting material or to the extent we specifically incorporate this information by reference.

The following is a line graph comparing the cumulative total return to shareholders of our common stock at July 31, 2009 since July 31, 2004, to the cumulative total return over such period of (i) the NASDAQ Composite Index, (ii) a peer group consisting of Sterling Construction Company, Inc. (STRL) and Coast Distribution System, Inc. (CRV), and (iii) the NASDAQ Q-50 (NXTQ). We have determined that our peer group is no longer representative of our industry and we intend to discontinue the use of the peer group beginning in our Form 10-K for fiscal 2010.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*
Among Copart, Inc., The NASDAQ Composite Index,
A Peer Group, and The NASDAQ Q-50 (NXTQ)

	7/04	7/05	7/06	7/07	7/08	7/09

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, including the information incorporated by reference herein, contains forward-looking statements within the meaning of Section 27A of the Securities Act, and Section 21E of the Exchange Act. All statements other than statements of historical facts are statements that could be deemed forward-looking statements. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expect," "plan," "intend," "forecast," "anticipate," "believe," "estimate," "predict," "potential," "continue" or the negative of these terms or other comparable terminology. The forward-looking statements contained in this Form 10-K involve known and unknown risks, uncertainties and situations that may cause our or our industry's actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. These forward-looking statements are made in reliance upon the safe harbor provision of the Private Securities Litigation Reform Act of 1995. These factors include those listed in Part I, Item 1A. "Risk Factors" of this Form 10-K and those discussed elsewhere in this Form 10-K. We encourage investors to review these factors carefully together with the other matters referred to herein, as well as in the other documents we file with the SEC. The Company may from time to time make additional written and oral forward-looking statements, including statements contained in the Company's filings with the SEC. The Company does not undertake to update any forward-looking statement that may be made from time to time by or on behalf of the Company.

Although we believe that, based on information currently available to the Company and its management, the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on these forward-looking statements.

Overview

We provide vehicle sellers with a full range of services to process and sell vehicles primarily over the Internet through our Virtual Bidding Second Generation Internet auction-style sales technology, which we refer to as VB². Sellers are primarily insurance companies but also include banks and financial institutions, charities, car dealerships, fleet operators, vehicle rental companies and the general public. We sell principally to licensed vehicle dismantlers, rebuilders, repair licensees, used vehicle dealers and exporters; however at certain locations, we sell directly to the general public. The majority of the vehicles sold on behalf of the insurance companies are either damaged vehicles deemed a total loss or not economically repairable by the insurance companies or are recovered stolen vehicles for which an insurance settlement with the vehicle owner has already been made. We offer vehicle sellers a full range of services that expedite each stage of the salvage vehicle sales process and minimize administrative and processing costs. In the United States and Canada, or North America, we sell vehicles primarily as an agent and derive revenue primarily from fees paid by vehicle sellers and vehicle buyers as well as related fees for services such as towing and storage. In the United Kingdom, or UK, we operate primarily on a principal basis, purchasing salvage vehicles outright from insurance companies and reselling the vehicles for our own account.

Our revenues consist of sales transaction fees charged to vehicle sellers and vehicle buyers, transportation revenue, purchased vehicle revenues, and other remarketing services. Revenues from sellers are generally generated either on a fixed fee contract basis where we collect a fixed amount for selling each vehicle regardless of the selling price of the vehicle or, under our Percentage Incentive Program, or PIP program, where our fees are generally based on a predetermined percentage of the vehicle sales price. Under the fixed fee program, we generally charge an

Table of Contents

additional fee for title processing and special preparation. Although sometimes included in the consignment fee, we may also charge additional fees for the cost of transporting the vehicle to our facility, storage of the vehicle, and other incidental costs. Under the consignment programs, only the fees associated with vehicle processing are recorded in revenue, not the actual sales price (gross proceeds). Sales transaction fees also include fees charged to vehicle buyers for purchasing vehicles, storage, loading and annual registration. Transportation revenue includes charges to sellers for towing vehicles under certain contracts. Transportation revenue also includes towing charges assessed to buyers for delivering vehicles. Purchased vehicle revenue includes the gross sales price of the vehicle which we have purchased or are otherwise considered to own and is primarily generated in the UK.

Operating costs consist primarily of operating personnel (which includes yard management, clerical and yard employees), rent, contract vehicle towing, insurance, fuel, equipment maintenance and repair, and costs of vehicles we sold under purchase contracts. Costs associated with general and administrative expenses consist primarily of executive management, accounting, data processing, sales personnel, human resources, professional fees, research and development and marketing expenses.

During fiscal 2004 and fiscal 2008, we converted all of our North American and UK sales, respectively, to an Internet-based auction-style model using our VB² Internet sales technology. This process employs a two-step bidding process. The first step, called the preliminary bid, allows buyers to submit bids up to one hour before a real time virtual auction begins. The second step allows buyers to bid against each other, and the high bidder from the preliminary bidding process, in a real-time process over the Internet.

Acquisitions and New Operations

We have experienced significant growth in facilities as we have acquired twenty three facilities and established thirteen new facilities since the beginning of fiscal 2006. All of these acquisitions have been accounted for using the purchase method of accounting.

As part of our overall expansion strategy of offering integrated services to vehicle sellers, we anticipate acquiring and developing facilities in new regions, as well as the regions currently served by our facilities. We believe that these acquisitions and openings strengthen our coverage as we have 147 facilities located in North America and the UK and are able to provide national coverage for our sellers.

Edgar Filing: COPART INC - Form 10-K

Table of Contents

The following table sets forth facilities that we have acquired or opened from August 1, 2006 through July 31, 2009:

Locations	Acquisition or Greenfield	Date	Geographic Service Area
Baltimore Maryland	Greenfield	November 2006	Central Maryland
Woodburn, Oregon	Greenfield	January 2007	Central Oregon
Sandy, England	Acquisition	June 2007	East England and Midlands
Sandtoft, England	Acquisition	June 2007	Northern England
Sandwich, England	Acquisition	June 2007	London and South East England
Westbury, England	Acquisition	June 2007	South Wales and South West England
Chester, England	Acquisition	June 2007	North Wales and North West England
Denny, Scotland	Acquisition	*June 2007	Scotland
Wootton, England	Acquisition	June 2007	Central England
Punta Gorda, Florida	Greenfield	July 2007	Southwest Florida
Peterlee, England	Acquisition	August 2007	Northern England
Wisbech, England	Acquisition	August 2007	Eastern England
Rochford, England	Acquisition	August 2007	Southeast England
London, Canada	Greenfield	September 2007	Southern Ontario
Windsor, New Jersey	Greenfield	November 2007	Central New Jersey
Walton, Kentucky	Greenfield	January 2008	Northern Kentucky
Birmingham, Alabama	Greenfield	February 2008	Central Alabama
Inverkeithing, Scotland	Acquisition	March 2008	Central Scotland
Whitburn, Scotland	Acquisition	March 2008	Central Scotland
Featherstone, England	Acquisition	*March 2008	Northeast England
Doncaster, England	Acquisition	*March 2008	Northeast England
Minneapolis, Minnesota	Greenfield	March 2008	Central Minnesota and Wisconsin
Sikeston, Missouri	Acquisition	March 2008	Southeast Missouri
York, England	Acquisition	April 2008	Northern England
Prairie Grove, Arkansas	Greenfield	July 2008	Northwest Arkansas
Louisville, Kentucky	Greenfield	September 2008	Northwest Kentucky and Southern Indiana
Richmond, Virginia	Greenfield	**October 2008	Central Virginia
Montgomery, Alabama	Greenfield	February 2009	Central Alabama
Greer, South Carolina	Greenfield	February 2009	Northwest South Carolina
Warren, Massachusetts	Greenfield	June 2009	Central Massachusetts

*
Closed in fiscal 2008

**
Former MAG facility

In April 2008, we completed the acquisition of Simpson Bros. (York) Holdings Limited, a UK limited liability company (Simpson), which operates one location in York, England. Simpson's primary business activity was the dismantling of automobiles and the sales of salvaged auto parts. In the same month, we also completed the acquisition of Bob Lowe Salvage Pool, Inc., which operates one location in Sikeston, Missouri. In February 2008, we completed the purchase of the assets and business of AG Watson Auto Salvage & Motors Spares (Scotland) Limited (AG Watson) which operates two salvage locations in Scotland and two salvage locations in northern England. In August 2007, we completed the acquisition of Century Salvage Sales Limited (Century), a vehicle salvage disposal company with three facilities located in the UK. The total consideration paid for these acquisitions consisted of approximately \$38.2 million in cash, net of cash acquired.

Table of Contents

On June 14, 2007, we acquired all the issued share capital of Universal Salvage plc, or Universal, for £2.00 per share (approximately \$3.94 based on currency exchange rates on June 14, 2007). Universal, based in the UK and operating exclusively within the UK, is a service provider to the motor insurance and automotive industries. The aggregate acquisition consideration paid by us totaled approximately £60.7 million (approximately \$120.0 million based on currency exchange rates on June 14, 2007) and was funded from our available cash resources. We also assumed outstanding indebtedness of Universal totaling approximately £2.3 million (\$4.5 million as of June 14, 2007). The acquisition was our first acquisition outside North America and included the seven facilities discussed above.

The period-to-period comparability of our operating results and financial condition is substantially affected by business acquisitions, new openings, weather and product introductions during such periods. In particular, we have certain contracts inherited through our UK acquisitions that require us to act as a principal, purchasing vehicles from the insurance companies and reselling them for our own account. It is our intention, where possible, to migrate these contracts to the agency model in future periods. Changes in the amount of revenue derived in a period from principal transactions relative to total revenue will impact revenue growth and margin percentages.

In addition to growth through acquisitions, we seek to increase revenues and profitability by, among other things, (i) acquiring and developing additional vehicle storage facilities in key markets, (ii) pursuing national and regional vehicle seller agreements, (iii) expanding our service offerings to sellers and buyers, and (iv) expanding the application of VB² into new markets. In addition, we implement our pricing structure and merchandising procedures and attempt to effect cost efficiencies at each of our acquired facilities by implementing our operational procedures, integrating our management information systems and redeploying personnel, when necessary.

Results of Operations

The following table sets forth for the periods indicated below, certain information derived from our consolidated statements of income presented in absolute dollars and as a percentage of revenues. There can be no assurance that any trend in operating results will continue in the future.

Fiscal 2009 Compared to Fiscal 2008

Revenues

The following sets forth information on revenue by class (in thousands, except percentages):

	2009	Percentage of Revenue	2008	Percentage of Revenue
Service revenues	\$ 615,352	83%	\$ 619,728	79%
Vehicle sales	127,730	17%	165,120	21%
	\$ 743,082	100%	\$ 784,848	100%

Service Revenues. Service revenues were approximately \$615.4 million during fiscal 2009 compared to \$619.7 million for fiscal 2008, a decline of \$4.4, million or 0.7%, below fiscal 2008. The decline in service revenue was due to the negative impact on recorded service revenues due to the change in the GBP to USD exchange rate and was offset by growth in unit volume and a marginal growth in revenue per transaction. The average dollar to pound exchange rate was 1.59 dollars to the pound and 2.00 dollars to the pound for fiscal 2009 and fiscal 2008, respectively, and lead to a reduction in service revenue of \$9.5 million. Growth in unit volume was driven primarily by an increase in the units sold on behalf of insurance companies and units sold on behalf of franchise and independent car dealerships. The growth resulted from market wins and, with respect to insurance company cars, from what we believe to be an increase in salvage frequency.

Table of Contents

Salvage frequency is the percentage of cars involved in accidents that are deemed total economic losses by the insurance company. We believe the increased availability of such cars was as a result of lower average used car pricing. The growth in unit volume generated \$4.9 million in additional revenue relative to last year. Revenue yield per transaction was marginally higher as the decline in the average selling price was offset by higher yield on services provided and generated \$0.2 million in additional revenue compared to last year. Over 50% of our service revenue is tied in some manner to the ultimate selling price of the vehicles. We believe the decline in the average selling price was primarily due to: (i) the recent declines in commodity and used car pricing as we believe that commodity pricing, particularly the per ton price for crushed car bodies, has an impact on the ultimate selling price of vehicles sold for scrap and vehicles sold for dismantling; (ii) the decline in used car pricing because we believe used car pricing has an impact on the ultimate selling price of vehicles sold to rebuilders and retailers; and (iii) the strengthening of the dollar as we believe a stronger dollar increases the purchase price of US vehicles paid for in our international buyers' local currencies. However, we do not have sufficient information to determine which vehicles are sold for scrap, dismantling, retailing or export and, accordingly, cannot quantify the impact that commodity pricing, used car pricing and foreign currency exchange rates had on the selling price of vehicles.

Vehicle Sales. We have assumed certain contracts through our UK acquisitions that require us to act as a principal, purchasing vehicles from the insurance companies and reselling them for our own account. Vehicle sales revenues were approximately \$127.7 million during fiscal 2009 compared to \$165.1 million for fiscal 2008, a decline of \$37.4 million, or 22.6%, below fiscal 2008. The decline in vehicle sales revenue was due to the negative impact on recorded vehicle sales revenue due to the change in the GBP to USD exchange rate, the decline in unit volume, and the decline in revenue per transaction. The decline in the average USD to GBP exchange rate lead to a reduction in vehicle sales revenue of \$29.7 million. The decline in unit volume lead to a reduction in revenue of \$5.3 million and was due primarily to the migration of certain contracts in the UK from a principal basis to a fee basis. The decline in the average revenue per transaction lead to a reduction of revenue of \$2.3 million. We believe the decline in the average selling price was primarily due to: (i) the declines in commodity pricing as we believe that commodity pricing, particularly the price per ton for crushed car bodies, has an impact on the ultimate selling price of vehicles sold for scrap and vehicles sold for dismantling; (ii) the decline in used car pricing because we believe used car pricing has an impact on the ultimate selling price of vehicles sold to rebuilders and retailers; and (iii) the strengthening of the dollar as we believe a stronger dollar increases the purchase price of US vehicles paid for in our international buyers' local currencies. However, we do not have sufficient information to determine which vehicles are sold for scrap, dismantling, retailing or export and, accordingly, cannot quantify the impact that commodity pricing, used car pricing and foreign currency exchange rates had on the selling price of vehicles.

Yard Operation Expenses. Yard operation expenses were approximately \$324.8 million during fiscal 2009 compared to \$328.9 million for fiscal 2008, a decline of approximately \$4.1 million, or 1.3%, below fiscal 2008. The beneficial impact on yard operating expenses due to the change in GBP to USD exchange rate was \$10.6 million and was offset by an increase in the cost to process each car which was driven primarily by an increase in subhauling costs in the US and the additional costs associated with five new facilities. Included in yard operation costs were depreciation and amortization expenses which were \$32.8 million and \$32.2 million for the fiscal years ended July 31, 2009 and 2008, respectively.

Cost of Vehicle Sales. The cost of vehicles sold was approximately \$106.0 million during fiscal 2009 compared to \$133.7 million for fiscal 2008, a decline of approximately \$27.6 million, or 20.7%. The beneficial impact on the cost of sales due to the change in the GBP to USD exchange rate was \$23.8 million. Unit volume decline was responsible for \$4.3 million of the total decline and was due primarily to the migration of certain contracts in the UK from a principal basis to a fee

Table of Contents

basis. Cost per unit sold was up marginally and represented a \$0.4 million increase relative to last year.

General and Administrative Expenses. General and administrative expenses were approximately \$86.9 million for fiscal 2009 compared to \$84.3 million for fiscal 2008, an increase of approximately \$2.6 million, or 3.1%. The beneficial impact on general and administrative expenses due to the change in GBP to USD exchange rate was approximately \$3.0 million. The growth in general and administrative costs was due primarily to: i) increased IT payroll and technology costs as we expanded our development and network departments, ii) increased advertising costs as we invested in events and media promotions to generate public awareness, and iii) the additional costs associated with the CEO and President's non cash compensation package approved by the shareholders in April 2009. Also included in general and administrative expenses were depreciation and amortization expenses which were \$9.0 million and \$10.6 million for the years ended July 31, 2009 and 2008, respectively.

Other Income (Expense). Total other income was approximately \$2.4 million during fiscal 2009 compared to \$11.7 million for fiscal 2008, a decline of approximately \$9.3 million, or 79.5%. Net interest income declined \$6.1 million due to reductions in both the average cash balances and the interest yield. Other income, net, declined \$3.2 million primarily due to the impairment of a note receivable relating to the sale of assets of the public auction business which we exited in 2006 and the loss on the sale of an airplane in the UK, together totaling \$2.2 million, currency exchange losses on certain intercompany obligations and losses on the disposition of other certain assets.

Income Taxes. Our effective income tax rates for fiscal 2009 and 2008 were approximately 38.7% and 37.1%, respectively. The increase was driven primarily by the decline in tax exempt interest income.

Discontinued Operations. During fiscal 2009 we received a \$12 million payment for a note receivable resulting from the sale of certain MAG business assets and real estate. We exited the MAG business in our 2006 fiscal year. The gain on the sale of the real estate was deferred until payment on the note receivable was received. The \$1.6 million of income from discontinued operations represents that gain, net of taxes.

Net Income. Due to the foregoing factors, we realized net income of approximately \$141.1 million for fiscal 2009, compared to net income of approximately \$156.9 million for fiscal 2008.

*Fiscal 2008 Compared to Fiscal 2007***Revenues**

The following sets forth information on customer revenue by geographic region based on the location of the selling entity (in thousands, except percentages):

	2008	Percentage of Revenue	2007	Percentage of Revenue
Service revenues	\$ 619,728	79%	\$ 535,794	96%
Vehicle sales	165,120	21%	24,886	4%
	\$ 784,848	100%	\$ 560,680	100%

Service Revenues. Service revenues were approximately \$619.7 million during fiscal 2008 compared to \$535.8 million for fiscal 2007, an increase of \$83.9 million, or 15.7%, over fiscal 2007. The growth in revenue came from an increase in units sold and an increase in revenue per transaction. The growth in units sold came from acquisitions, primarily in the UK, market share wins and the development of non-insurance markets and represented \$59.7 million of the increase and

Table of Contents

service revenue yield represented \$24.2 million of the total increase. Growth in revenue yield per transaction was primarily due to an increase in the average selling price of the vehicles. Over 50% of our service revenue is tied in some manner to the ultimate selling price of the vehicles. We believe the increase in the average selling price was due primarily to: (i) the increases in commodity pricing, as we believe that commodity pricing, particularly the per ton price for crushed car bodies, has an impact on the ultimate selling price of vehicles sold for scrap and vehicles sold for dismantling; (ii) the increase in used car pricing, as we believe used car pricing has an impact on the ultimate selling price of vehicles sold to rebuilders and retailers; (iii) the weakening of the dollar, as we believe a weaker dollar decreases the purchase price of US vehicles paid for in our international buyers' local currencies; and (iv) the decline in salvaged cars sold as a percentage of total cars sold as salvaged cars generally sell for less than non-salvaged cars. However, we do not have sufficient information to determine which vehicles are sold for scrap, dismantling, retailing or export and, accordingly, cannot quantify the impact that commodity pricing, used car pricing and foreign currency exchange rates had on the selling price of vehicles.

Vehicle Sales. Vehicle sales revenues were approximately \$165.1 million during fiscal 2008 compared to \$24.9 million for fiscal 2007, an increase of \$140.2 million, or 563.5% over fiscal 2007. The increase was due almost entirely to the UK acquisitions in which we assumed certain contracts that required us to act as a principal, purchasing vehicles from the insurance companies and reselling them for our own account. In North America we have no contracts in which we are required to purchase the vehicle from the seller.

Yard Operation Expenses. Yard operation expenses from continuing operations were approximately \$328.9 million during fiscal 2008 compared to \$271.5 million for fiscal 2007, an increase of \$57.4 million, or 21.1%, over fiscal 2007. Yard operating expenses in the UK, excluding depreciation, increased by \$49.6 million as we made our first acquisition in our fourth quarter of fiscal 2007 and, accordingly, had a full year of expenses in fiscal 2008. In North America, excluding depreciation, yard operating expenses grew by \$6.3 million due primarily to increased volume. Included in yard operation costs were depreciation and amortization expenses which grew by \$1.5 million to \$32.2 million due primarily to increased amortization associated with intangible assets acquired in the UK.

Cost of Vehicles Sales. The cost of vehicles sold was approximately \$133.7 million during fiscal 2008 compared to \$22.4 million for fiscal 2007, an increase of \$111.3 million, or 497.4%, over fiscal 2007. The increase was due primarily to the UK acquisitions in which we assume certain contracts that require us to act as a principal, purchasing vehicles from the insurance companies and reselling them for our own account.

General and Administrative. General and administrative expenses from continuing operations were approximately \$84.3 million for fiscal 2008, compared to \$63.6 million for fiscal 2007, an increase of approximately \$20.7 million, or 32.5%, over fiscal 2007. The increase came primarily from the additional management, finance, technology, systems and administrative resources required to support international operations, increased resources required to accelerate the development and deployment of the enhancements to VB² and to our seller support software and interfaces, and the incremental costs associated with the UK integration. Included in general and administrative expenses is depreciation and amortization of \$10.6 million, an increase of \$4.9 million over fiscal 2007 and includes amortization expenses relating to intangible assets acquired as part of the UK acquisitions.

Other Income. Total other income was approximately \$11.7 million during fiscal 2008, compared to \$14.3 million for fiscal 2007, a decline of approximately \$2.5 million, or 17.8%, over fiscal 2007. Interest income declined \$6.0 million due to lower interest rates and a lower average cash and investment balance. Net other income increased approximately \$1.3 million. Equity in loss

Table of Contents

of unconsolidated entity reflected a \$2.2 million write down, in fiscal 2007, to the carrying value of our investment in Lanelogic Corporation (Lanelogic).

Income Taxes. Our effective income tax rates for fiscal 2008 and 2007 were approximately 37.1% and 37.3%, respectively.

Net Income. Due to the foregoing factors, we realized net income of approximately \$156.9 million for fiscal 2008, compared to net income of approximately \$136.3 million for fiscal 2007.

Liquidity and Capital Resources

Our primary source of working capital is cash generated through operations. Potential internal sources of additional working capital are the sale of assets or the issuance of equity through option exercises and shares issued under our Employee Stock Purchase Plan. A potential external source of additional working capital is the issuance of debt and equity. However, with respect to the issuance of equity or debt, we cannot predict if these sources will be available in the future and, if available, if they can be issued under terms commercially acceptable to us.

Historically, we have financed our growth through cash generated from operations, public offerings of common stock, the equity issued in conjunction with certain acquisitions and debt financing. Our primary source of cash generated by operations is from the collection on sellers' fees, buyers' fees and reimbursable advances from the proceeds of auctioned salvage vehicles. Our business is seasonal as inclement weather during the winter months increases the frequency of accidents and, consequently, the number of cars totaled by the insurance companies. During the winter months, most of our facilities process 10% to 30% more vehicles than at other times of the year. This increased volume requires the increased use of our cash to pay out advances and handling costs of the additional business.

Because our primary source of working capital is net income, factors affecting net income are the principal factors affecting the generation of working capital. Those primary factors: (i) seasonality, (ii) market wins and losses, (iii) supplier mix, (iv) accident frequency, (v) salvage frequency, (vi) change in market share of our existing suppliers, (vii) commodity pricing, (viii) used car pricing, (ix) foreign currency exchanges rates, (x) product mix, and (xi) contract mix to the extent appropriate, are discussed in the Results of Operations and Risk Factors sections in this Form 10-K.

As of July 31, 2009, we had working capital of approximately \$212.3 million, including cash, and cash equivalents of approximately \$162.7 million. Cash and cash equivalents consisted primarily of funds invested in money market accounts, which bear interest at a variable rate. Cash and cash equivalents increased by approximately \$123.7 million from fiscal 2008 to fiscal 2009.

We believe that our currently available cash and cash equivalents and cash generated from operations will be sufficient to satisfy our operating and working capital requirements for at least the next 12 months. However, if we experience significant growth in the future, we may be required to raise additional cash through the issuance of new debt or additional equity.

Operating Activities

Net cash provided by operating activities increased by approximately \$9.3 million to \$203.3 million during fiscal 2009 when compared to fiscal 2008. The increase was driven primarily by a reduction in income taxes receivable of \$18.0 million which was offset by a decrease in net income of \$15.8 million. The remaining increase of \$7.1 million is due to routine changes in working capital items.

Net cash provided by operating activities increased by approximately \$12.0 million to \$194.1 million during fiscal 2008 when compared to fiscal 2007, due to the increase in net income which was offset in part by the timing of routine changes in working capital items. The increase in net income is primarily the result of increased revenue in fiscal 2008.

Table of Contents

Net cash provided by operating activities increased by approximately \$40.8 million to \$182.1 million during fiscal 2007 when compared to fiscal 2006, due to the increase in net income which was offset in part to the timing of routine changes in working capital items. The increase in net income is primarily the result of increased revenue in fiscal 2007 and the loss on discontinued operations in the amount of \$17.9 million in fiscal 2006, which did not recur in fiscal 2007.

Investing Activities

During the fiscal years ended July 31, 2008 and 2007, we purchased approximately \$154.4 million and \$921.8 million, respectively, of short-term investments, which were offset by the sale of \$257.0 million and \$967.9 million, respectively, of short-term investments. We historically invested our cash in auction rate notes with ratings of AAA. By the end of the first quarter of fiscal 2008, we converted our entire balance of short-term investments to cash and cash equivalents.

Capital expenditures related to continuing operations (excluding those associated with fixed assets attributable to acquisitions) were approximately \$79.0 million, \$113.4 million and \$76.8 million for fiscal 2009, 2008 and 2007, respectively. Our capital expenditures are primarily related to opening and improving facilities and acquiring yard equipment. We continue to expand and invest in new and existing facilities and standardize the appearance of existing locations. We have no material commitments for future capital expenditures as of July 31, 2009.

During the fiscal year ended July 31, 2008, we used approximately \$38.2 million in cash for the acquisitions of Century Salvage Sales Limited; Simpson Bros. (York), Ltd; AG Watson Auto Salvage and Motor Spares (Scotland) Limited; and Bob Lowe's Salvage Pool. During the fiscal year ended July 31, 2007, we used approximately \$120.0 million in cash for the acquisition of Universal which includes the following seven locations in the UK: Sandy, Sandtoft, Sandwich, Westbury, Chester, Denny, and Wootton.

Financing Activities

In fiscal 2009, 2008 and 2007, we generated approximately \$3.1 million, \$12.7 million and \$10.9 million, respectively, through the exercise of stock options.

In fiscal 2009, 2008 and 2007, we generated approximately \$1.9 million, \$1.7 million and \$1.5 million, respectively, through the issuance of shares under the Employee Stock Purchase Plan.

In fiscal 2009, we used approximately \$17.5 million and in 2008 and 2007, we generated approximately \$8.2 million and \$4.7 million, respectively, through changes in our book overdraft.

In February 2003, our Board of Directors authorized us to repurchase up to 9.0 million shares of our common stock. In October 2007, our Board of Directors approved a 20 million share increase in our stock repurchase program bringing the total current number of shares authorized for repurchase to 29 million shares. The repurchases may be effected through solicited or unsolicited transactions in the open market or in privately negotiated transactions. No time limit has been placed on the duration of the share repurchase program. Subject to applicable securities laws, such repurchases will be made at such times and in such amounts as we deem appropriate and may be discontinued at any time. For the year ended July 31, 2009, we did not repurchase any shares under our stock repurchase program. For the year ended July 31, 2008, we repurchased 6,615,764 shares at a weighted average price of \$40.70. For the year ended July 31, 2007, we repurchased 2,995,405 shares at a weighted average price of \$29.91. From February 2003 through July 31, 2009, we repurchased a total of 13,649,469 shares at a weighted average price of \$29.21.

In December 2008, our President exercised 600,000 options at an exercise price of \$4.47 per share. In a cashless exercise, 96,929 shares of the 600,000 options exercised were net settled in satisfaction of the exercise price for the portion of options that were classified as non-qualified stock options. Additionally, 222,817 shares were withheld at a per share price of \$26.93, totaling

Table of Contents

approximately \$6.0 million, based on the closing price of our common stock on the date of exercise, in lieu of the federal and state minimum statutory tax withholding requirements. In June 2009, our President exercised 361,035 options at an exercise price of \$11.12 per share. In a cashless exercise, 116,741 shares of the 361,035 shares exercised were net settled in satisfaction of the exercise price for the portion of options that were classified as non-qualified stock options. Additionally, 109,595 shares were withheld at a per share price of \$34.39, totaling approximately \$3.8 million, based on the closing price of our common stock on the date of exercise, in lieu of the federal and state minimum statutory tax withholding requirements. We remitted approximately \$9.8 million to the proper taxing authorities in satisfaction of the employee's minimum statutory withholding requirements. The tax withholding amounts paid by us have been accounted for as a repurchase of shares in the shareholders' equity section in the accompanying consolidated balance sheet. However, these deemed share repurchases are not included as part of our stock repurchase program described in the preceding paragraph.

Contractual Obligations

We lease certain domestic and foreign facilities, and certain equipment under non-cancelable operating leases. In addition to the minimum future lease commitments presented, the leases generally require the company to pay property taxes, insurance, maintenance and repair costs which are not included in the table because we have determined these items are not material. The following table summarizes our significant contractual obligations and commercial commitments as of July 31, 2009 (in thousands):

Contractual Obligations	Total	Payments Due By Period				Other
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	
Operating leases(1)	\$ 93,755	\$ 20,378	\$ 33,737	\$ 18,185	\$ 21,455	\$
Capital leases(1)	1,334	507	587	240		
Tax liabilities(2)	20,266					20,266
Total contractual obligations	\$ 115,355	\$ 20,885	\$ 34,324	\$ 18,425	\$ 21,455	\$ 20,266

Commercial Commitments(3)	Total	Amount of Commitment Expiration Per Period				Other
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	
Letters of credit	\$ 8,273	\$ 8,273	\$	\$	\$	\$

-
- (1) Contractual obligations consist of future non-cancelable minimum lease payments under capital and operating leases, used in the normal course of business.
- (2) Tax liabilities include the long-term liabilities in the consolidated balance sheet for unrecognized tax positions. At this time we are unable to make a reasonably reliable estimate of the timing of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes.
- (3) Commercial commitments consist primarily of letters of credit provided for insurance programs and certain business transactions.

Credit Facilities

On March 6, 2008, we entered into an unsecured credit agreement with Bank of America, N.A. (the Credit Agreement) providing for a \$175 million (reduced from \$200 million pursuant to the terms of the Credit Agreement) revolving credit facility (the Credit Facility), including a \$100 million foreign currency borrowing sublimit and a \$50 million letter of credit sublimit. Amounts borrowed under the Credit Facility may be used for repurchases of stock, capital expenditures, working capital

Table of Contents

and other general corporate purposes. The Credit Facility matures, and all outstanding borrowings are due, on the fifth anniversary of the Credit Agreement, with annual reductions in availability of \$25 million on each of the first three anniversaries of the Credit Agreement. Amounts borrowed under the Credit Facility may be repaid and re-borrowed until the maturity date and bear interest, at our option, at either Eurocurrency Rate plus 0.5% to 0.875%, depending of the leverage ratio, as defined in the Credit Agreement, at the end of the previous quarter or at the prime rate. A default interest rate applies on all obligations during an event of default under the Credit Facility at a rate per annum equal to 2.0% above the otherwise applicable interest rate. The Credit Facility requires us to pay a commitment fee on the unused portion of the Credit Facility. The commitment fee ranges from 0.075% to 0.15% depending on the leverage ratio as of the end on the previous quarter. The Credit Facility contains customary representations and warranties and places certain business operating restrictions on us relating to, among other things, indebtedness, liens and other encumbrances, investments, mergers and acquisitions, asset sales, and dividends, distributions and redemptions of capital stock. In addition, the Credit Agreement provides for a maximum total leverage ratio and a minimum interest coverage ratio. The Credit Facility contains events of default that include, among others, non-payment of principal, interest or fees, violation of covenants, inaccuracy of representations and warranties, cross-defaults to certain other indebtedness, bankruptcy and insolvency defaults, material judgments, invalidity of the loan documents and events constituting a change of control. The Credit Facility is guaranteed by our material domestic subsidiaries. The Credit Facility contains restrictions with respect to investments, mergers and acquisitions, dividends and distributions and redemptions of capital stock, these restrictions become effective only after the Company's debt to EBITDA ratio exceeds 1.0:1.0. At July 31, 2009, the debt to EBITDA ratio was less than 1.0:1.0. As of July 31, 2009, we did not have an outstanding balance under the Credit Facility.

Off-Balance Sheet Arrangements

As of July 31, 2009, we did not have any off-balance sheet arrangements (as defined in item 303(a)(4)(ii) of Regulation S-K).

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to vehicle pooling costs, self-insured reserves, allowance for doubtful accounts, income taxes, revenue recognition, share-based compensation, long-lived asset impairment calculations and contingencies. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management has discussed the selection of critical accounting policies and estimates with the Audit Committee of the Board of Directors and the Audit Committee has reviewed our disclosure relating to critical accounting policies and estimates in this Annual Report on Form 10-K. Our significant accounting policies are described in Note 1 to our consolidated financial statements for fiscal 2009. The following is a summary of the more significant judgments and estimates included in our critical accounting policies used in the preparation of our consolidated financial statements. Where appropriate, we discuss sensitivity to change based on other outcomes reasonably likely to occur.

Table of Contents

Revenue Recognition

We provide a portfolio of services to our sellers and buyers that facilitate the sale and delivery of a vehicle from seller to buyer. These services include the ability to use our Internet sales technology and vehicle delivery, loading, title processing, preparation and storage. We evaluate multiple-element arrangements relative to our buyer and seller agreements in accordance with Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables* (EITF 00-21), which addresses accounting for multiple-element arrangements, and Staff Accounting Bulletin No. 104, *Revenue Recognition* (SAB 104), which addresses revenue recognition for units of accounting.

The services we provide to the seller of a vehicle involve disposing of a vehicle on the seller's behalf and, under most of our current North American contracts, collecting the proceeds from the buyer. We are not entitled to any such seller fees until we have collected the sales proceeds from the buyer for the seller and, accordingly, we recognize revenue for seller services after service delivery and cash collection.

Vehicle sales, where we purchase and remarket vehicles on our own behalf, are recognized in accordance with SAB 104 on the sale date, which is typically the point of high bid acceptance. Upon high bid acceptance, a legal binding contract is formed with the buyer, and we record the gross sales price as revenue.

In certain cases, seller fees are not contingent upon collection of the seller proceeds from the buyer. However, we determined that we are not able to separate the services into separate units of accounting because we do not have fair value for undelivered items. As a result, we do not recognize seller fees until the final seller service has been delivered, which generally occurs upon collection of the sales proceeds from the buyer for the seller.

We provide a number of services to the buyer of the vehicle, charging a separate fee for each service. Each of these services has been assessed under the criteria of EITF 00-21 to determine whether we have met the requirements to separate them into units of accounting within a multi-element arrangement. We have concluded that the sale and the post-sale services are separate units of accounting. The fees for sale services are recognized upon completion of the sale, and the fees for the post-sale services are recognized upon successful completion of those services using the residual method.

We also charge buyers an annual registration fee for the right to participate in our vehicle sales program, which is recognized ratably over the term of the arrangement, and relist and late-payment fees, which are recognized upon receipt of payment by the buyer. No provision for returns has been established, as all sales are final with no right of return, although we provide for bad debt expense in the case of non-performance by our buyers or sellers.

Vehicle Pooling Costs

We defer in vehicle pooling costs certain yard operation expenses associated with vehicles consigned to and received by us, but not sold as of the balance sheet date. We quantify the deferred costs using a calculation that includes the number of vehicles at our facilities at the beginning and end of the period, the number of vehicles sold during the period and an allocation of certain yard operation expenses of the period. The primary expenses allocated and deferred are certain facility costs, labor, transportation, and vehicle processing. If our allocation factors change, then yard operation expenses could increase or decrease correspondingly in the future. These costs are expensed as vehicles are sold in the subsequent periods on an average cost basis. Given the fixed cost nature of our business there is not a direct correlation in an increase in expenses or units processed on vehicle pooling costs.

Table of Contents

We apply the provisions of Statement of Financial Accounting Standards (SFAS), No. 151, *Inventory Costs* (SFAS 151), to our vehicle pooling costs. SFAS 151 requires that items such as idle facility expense, excessive spoilage, double freight and rehandling costs be recognized as current-period charges regardless of whether they meet the criteria of "so abnormal" as provided in Accounting Research Bulletin No. 43, Chapter 4, *Inventory Pricing*. In addition, SFAS 151 requires that the allocation of fixed production overhead to the costs of conversion be based on the normal capacity of production facilities.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts in order to provide for estimated losses resulting from disputed amounts billed to sellers or buyers and the inability of our sellers or buyers to make required payments. If billing disputes exceed expectations and/or if the financial condition of our sellers or buyers were to deteriorate, additional allowances may be required. The allowance is calculated by taking both seller and buyer accounts receivables written off during the previous 12 month period as a percentage of the total accounts receivable balance, i.e. total write-offs/total accounts receivable (write-off percentage). We note that a one percentage-point deviation in the write-off percentage would have resulted in an increase or decrease to the allowance for doubtful accounts balance of less than \$0.1 million.

Valuation of Goodwill

We evaluate the impairment of goodwill of our North America and UK operating segments annually (or on an interim basis if certain indicators are present) by comparing the fair value of the operating segment to its carrying value. Future adverse changes in market conditions or poor operating results of the operating segments could result in an inability to recover the carrying value of the investment, thereby requiring impairment charges in the future.

Income Taxes and Deferred Tax Assets

We account for income taxes in accordance with SFAS No.109, *Accounting for Income Taxes*. We are subject to income taxes in the US, Canada and UK. In arriving at a provision of income taxes, we first calculate taxes payable in accordance with the prevailing tax laws in the jurisdictions in which we operate; we then analyze the timing differences between the financial reporting and tax basis of our assets and liabilities, such as various accruals, depreciation and amortization. The tax effects of the timing difference are presented as deferred tax assets and liabilities in the consolidated balance sheet. We assess the probability that the deferred tax assets will be realized based on our ability to generate future taxable income. In the event that it is more likely than not the full benefit would not be realized from the deferred tax assets we carry on our consolidated balance sheet, we record a valuation allowance to reduce the carrying value of the deferred tax assets to the amount expected to be realized. As of July 31, 2009, we had approximately \$0.3 million of valuation allowance arising from the net operating losses in states where we had discontinued certain operations in prior years. To the extent we establish a valuation allowance or change the amount of valuation allowance in a period, we reflect the change with a corresponding increase or decrease in our income tax provision in the consolidated income statement.

Historically, our income taxes have been sufficiently provided to cover our actual income tax liabilities among the jurisdictions in which we operate. Nonetheless, our future effective tax rate could still be adversely affected by the following factors, including (i) the geographical allocation of our future earnings, (ii) the change in tax laws or our interpretation of tax laws, (iii) the changes in governing regulations and accounting principles, (iv) the changes in the valuation of our deferred tax assets and liabilities and (v) the outcome of the income tax examinations. As a result, we routinely

Table of Contents

assess the possibilities of material changes resulting from the aforementioned factors to determine the adequacy of our income tax provision.

Based on our results for the twelve months ended July 31, 2009, a one percentage-point change in our provision for income taxes as a percentage of income before taxes would have resulted in an increase or decrease in the provision of approximately \$2.2 million.

Effective August 1, 2007, we adopted Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of *FASB Statement No. 109* (FIN 48). FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109, *Accounting for Income Taxes*. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Although we believe we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest settlement of any particular position, could require the use of cash. In addition, we are subject to the continuous examination of our income tax returns by various taxing authorities, including the Internal Revenue Service and US states. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

Long-lived Asset Valuation, Including Intangible Assets

We evaluate long-lived assets, including property and equipment and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets is measured by comparing the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the use of the asset. If the estimated undiscounted cash flows change in the future, we may be required to reduce the carrying amount of an asset.

Stock-Based Compensation

We account for our stock-based awards to employees and non-employees using the fair value method as required by SFAS No. 123(R), *Share-Based Payment*. SFAS No. 123(R) requires that the compensation cost related to share-based payment transactions, measured based on the fair value of the equity or liability instruments issued, be recognized in the financial statements. Determining the fair value of options using the Black-Scholes model, or other currently accepted option valuation models, requires highly subjective assumptions, including future stock price volatility and expected time until exercise, which greatly affect the calculated fair value on the grant date. If actual results are not consistent with our assumptions and judgments used in estimating the key assumptions, we may be required to record additional compensation or income tax expense, which could have a material impact on our consolidated financial position and results of operations.

Table of Contents

Retained Insurance Liabilities

We are partially self-insured for certain losses related to medical, general liability, workers' compensation and auto liability. Our insurance policies are subject to a \$250,000 deductible per claim, with the exception of our medical policy which is \$150,000 per claim. In addition, each of our policies contains an aggregate stop loss which limits our ultimate exposure. Our liability represents an estimate of the ultimate cost of claims incurred as of the balance sheet date. The estimated liability is not discounted and is established based upon analysis of historical data and actuarial estimates. The primary estimates used in the actuarial analysis include total payroll and revenue. Our estimates have not materially fluctuated from actual results. While we believe these estimates are reasonable based on the information currently available, if actual trends, including the severity of claims and medical cost inflation, differ from our estimates, our consolidated financial position, results of operations or cash flows could be impacted. The process of determining our insurance reserves requires estimates with various assumptions, each of which can positively or negatively impact those balances. The total amount reserved for all policies is approximately \$5.8 million as of July 31, 2009. If the total number of participants in the medical plan changed by 10% we estimate that our medical expense would change by approximately \$1.0 million and our medical accrual would change by approximately \$200,000. If our total payroll changed by 10% we estimate that our workers' compensation expense would change by approximately \$100,000 and our accrual for workers' compensation expenses would change by \$100,000. A 10% change in revenue would change our insurance premium for the general liability and umbrella policy by less than \$25,000.

Segment Reporting

Our North American and UK regions are considered two separate operating segments, which have been aggregated into one reportable segment because they share similar economic characteristics.

Recently Issued Accounting Standards

For a description of the new accounting standards that affect us, refer to Note 1 to the Consolidated Financial Statements included in this Annual Report on Form 10-K.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Our principal exposures to financial market risk are interest rate risk, foreign currency risk and translation risk.

Interest Rate Risk

The primary objective of our investment activities is to preserve principal while secondarily maximizing yields without significantly increasing risk. To achieve this objective in the current uncertain global financial markets, as of July 31, 2009, all of our total cash and cash equivalents were held in bank deposits and money market funds. As the interest rates on a material portion of our cash and cash equivalents are variable, a change in interest rates earned on our investment portfolio would impact interest income along with cash flows, but would not materially impact the fair market value of the related underlying instruments. As of July 31, 2009, we held no direct investments in auction rate securities, collateralized debt obligations, structured investment vehicles or mortgaged-backed securities. Based on the average cash balance held during the twelve months ended July 31, 2009, a 10% change in our interest yield would not materially affect our operating results. We do not hedge interest rate fluctuation risks.

Table of Contents

Foreign Currency and Translation Exposure

Fluctuations in the foreign currencies create volatility in our reported results of operations because we are required to consolidate the results of operations of our foreign currency denominated subsidiaries. International net revenues result from transactions by our Canadian and UK operations and are typically denominated in the local currency of each country. These operations also incur a majority of their expenses in the local currency, the Canadian dollar and the British pound. Our international operations are subject to risks associated with foreign exchange rate volatility. Accordingly, our future results could be materially adversely impacted by changes in these or other factors. A hypothetical uniform 10% strengthening or weakening in the value of the US dollar relative to the Canadian dollar and British pound in which our revenues and profits are denominated would result in a decrease/increase to revenue of approximately \$15.2 million for the twelve months ended July 31, 2009. There are inherent limitations in the sensitivity analysis presented, due primarily to the assumption that foreign exchange rate movements are linear and instantaneous. As a result, the analysis is unable to reflect the potential effects of more complex market changes that could arise, which may positively or negatively affect income.

Fluctuations in the foreign currencies create volatility in our reported consolidated financial position because we are required to remeasure substantially all assets and liabilities held by our foreign subsidiaries at the current exchange rate at the close of the accounting period. At July 31, 2009, the cumulative effect of foreign exchange rate fluctuations on our consolidated financial position was a net translation loss of approximately \$27.1 million. This loss is recognized as an adjustment to stockholders' equity through accumulated other comprehensive income. A 10% strengthening or weakening in the value of the US dollar relative to the Canadian dollar or the British pound will not have a material affect on our consolidated financial position.

We do not hedge our exposure to translation risks arising from fluctuations in foreign currency exchange rates.

Item 8. *Financial Statements and Supplementary Data*

The response to this item is submitted as a separate section of this Annual Report on Form 10-K in Item 15. See Part IV, Item 15(a) for an index to the financial statements and supplementary financial information.

Item 9. *Changes in and Disagreements With Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

We conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, or "Disclosure Controls," as of the end of the period covered by this Annual Report on Form 10-K. This evaluation, or "Controls Evaluation," was performed under the supervision and with the participation of management, including our Chairman of the Board, Chief Executive Officer and Director (our CEO) and our Senior Vice President and Chief Financial Officer (our CFO). Disclosure Controls are controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports filed under the Exchange Act, such as this Annual Report, is recorded, processed, summarized and reported within the time periods specified in the US Securities and Exchange Commission's rules and forms. Disclosure Controls include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports filed under the Exchange Act is

Table of Contents

accumulated and communicated to our management, including our CEO and CFO, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Our Disclosure Controls include some, but not all, components of our internal control over financial reporting.

Based upon the Controls Evaluation, our CEO and CFO have concluded that, as of the end of the period covered by this Annual Report on Form 10-K, our Disclosure Controls were effective to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is accumulated and communicated to management, including the CEO and CFO, to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission.

Table of Contents

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining internal control over financial reporting (as such item is defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Management assessed our internal control over financial reporting as of July 31, 2009, the end of our fiscal year. Management based its assessment on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management's assessment included evaluation of such elements as the design and operating effectiveness of key financial reporting controls, process documentation, accounting policies, and our overall control environment. This assessment is supported by testing and monitoring performed by our Finance department.

Based on our assessment, management has concluded that our internal control over financial reporting was effective as of the end of the fiscal year to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with generally accepted accounting principles. We reviewed the results of management's assessment with the Audit Committee of our Board of Directors.

Our independent registered public accounting firm, Ernst & Young LLP, independently assessed the effectiveness of our internal control over financial reporting as of July 31, 2009. Ernst & Young LLP has issued an attestation report which appears on the following page of this Annual Report on Form 10-K.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Copart, Inc.

We have audited Copart, Inc.'s internal control over financial reporting as of July 31, 2009, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Copart, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying "Management's Report on Internal Control Over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Copart, Inc. maintained, in all material respects, effective internal control over financial reporting as of July 31, 2009 based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Copart, Inc. as of July 31, 2009 and 2008, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended July 31, 2009 of Copart, Inc. and our report dated September 29, 2009 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Sacramento, California
September 29, 2009

Table of Contents

Limitations on the Effectiveness of Controls

Our management, including our CEO and CFO, does not expect that our disclosure controls or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Copart have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with associated policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in Internal Control Over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act), during the most recent fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Item 9B. *Other Information*

None.

Table of Contents

PART III

Certain information required by Part III is omitted from this Annual Report on Form 10-K because we intend to file a definitive proxy statement for our 2009 Annual Meeting of Shareholders (the Proxy Statement) not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K, and certain information to be included therein is incorporated herein by reference.

Item 10. Directors, Executive Officers of the Registrant and Corporate Governance

Information required by this item concerning the Board of Directors of the Company, the members of the Company's Audit Committee, the Company's Audit Committee Financial Expert, and compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated by reference to the sections entitled "Election of Directors and Director Biographies," "Board of Directors Information" and "General Compliance with Section 16(a) Beneficial Ownership Reporting Requirements" in the Company's Proxy Statement.

Information required by this item concerning our Executive Officers is incorporated by reference to the section entitled "Executive Officers" in the Company's Proxy Statement.

Information required by this item with respect to material changes to the procedures by which our shareholders may recommend nominees to our Board of Directors is incorporated herein by reference from the information provided under the heading "The Nominating and Governance Committee" of our Proxy Statement.

Code of Ethics

We have adopted the Copart, Inc. Code of Ethics for Principal Executive and Senior Financial Officers (Code of Ethics). The Code of Ethics applies to our principal executive officer, our principal financial officer, our principal accounting officer or controller, and persons performing similar functions and responsibilities who shall be identified by our Audit Committee from time to time.

The Code of Ethics is available at our website, located at <http://www.copart.com>. It may be found at our website as follows:

1. From our main web page, click on "Company Info."
2. Next, click on "Investor Relations."
3. Finally, click on "Code of Ethics for Principal Executive and Senior Financial Officers."

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Copart, Inc.

We have audited the accompanying consolidated balance sheets of Copart, Inc. as of July 31, 2009 and 2008, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended July 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Copart, Inc. at July 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended July 31, 2009, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, effective August 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Copart, Inc.'s internal control over financial reporting as of July 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated September 29, 2009 expressed an unqualified opinion thereon.
