Table of Contents

Lexicon Pharmaceuticals, Inc.

Notes to Consolidated Financial Statements
(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of Lexicon Pharmaceuticals, Inc. (“Lexicon” or the “Company”) have been prepared in accordance with generally accepted accounting principles for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2013 are not necessarily indicative of the results that may be expected for the year ended December 31, 2013.

The accompanying consolidated financial statements include the accounts of Lexicon and its wholly-owned subsidiaries. Intercompany transactions and balances are eliminated in consolidation. For further information, refer to the financial statements and footnotes thereto included in Lexicon’s annual report on Form 10-K for the year ended December 31, 2012, as filed with the SEC.

2. Net Loss Per Share

Net loss per share is computed using the weighted average number of shares of common stock outstanding during the applicable period and excludes shares underlying stock options and restricted stock units because they are antidilutive. There are no differences between basic and diluted net loss per share for all periods presented.

3. Stock-Based Compensation

The Company recorded \$2.1 million and \$1.7 million of stock-based compensation expense for the three months ended March 31, 2013 and 2012, respectively. The Company utilized the Black-Scholes valuation model for estimating the fair value of the stock compensation granted, with the following weighted-average assumptions for options granted in the three months ended March 31, 2013 and 2012:

	Expected Volatility	Risk-free Interest Rate	Expected Term	Dividend Rate	
March 31, 2013:					
Employees	91	% 0.8	% 5	—	%
Officers and non-employee directors	81	% 1.6	% 8	—	%
March 31, 2012:					
Employees	92	% 0.8	% 5	—	%
Officers and non-employee directors	80	% 1.6	% 8	—	%

Table of Contents

The following is a summary of option activity under Lexicon's stock-based compensation for the three months ended March 31, 2013:

	Options (in thousands)	Weighted Average Exercise Price
Outstanding at December 31, 2012	21,525	\$2.51
Granted	2,971	2.11
Exercised	(140)) 1.78
Expired	(695)) 3.62
Forfeited	(5)) 1.94
Outstanding at March 31, 2013	23,656	2.43
Exercisable at March 31, 2013	16,128	\$2.66

During the three months ended March 31, 2013, Lexicon also granted its employees annual restricted stock units. These restricted stock units vest in four annual installments. The following is a summary of restricted stock units activity under Lexicon's stock-based compensation plans for the three months ended March 31, 2013:

	Shares (in thousands)	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2012	3,543	\$1.80
Granted	1,969	2.09
Vested	(991)) 1.80
Forfeited	(37)) 1.85
Nonvested at March 31, 2013	4,484	\$1.93

During 2010, Lexicon granted certain employees restricted stock units with a performance condition. The shares subject to the restricted stock units granted in 2010 vested upon the dosing of the first patient in a pivotal human clinical trial in any country, the results of which could be used to establish safety and efficacy of a pharmaceutical product discovered or developed by Lexicon as a basis for a New Drug Application. This performance condition occurred during the three months ended March 31, 2013, and therefore all outstanding restricted stock units with this performance condition vested. Stock-based compensation expense for awards with performance conditions is recognized over the period from the date the performance condition is determined to be probable of occurring through the time the applicable condition is met. The following is a summary of performance-based restricted stock units activity under Lexicon's stock-based compensation plans for the three months ended March 31, 2013:

	Shares (in thousands)	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2012	329	\$1.90
Vested	(329)) 1.90
Nonvested at March 31, 2013	—	\$—

Table of Contents

4. Cash and Cash Equivalents and Investments

The fair value of cash and cash equivalents and investments held at March 31, 2013 and December 31, 2012 are as follows:

	As of March 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
Cash and cash equivalents	\$34,248	\$—	\$—	\$34,248
Securities maturing within one year:				
Certificates of deposit	550	—	—	550
U.S. treasury securities	162,323	42	—	162,365
Total short-term investments	\$162,873	\$42	\$—	\$162,915
Total cash and cash equivalents and investments	\$197,121	\$42	\$—	\$197,163
	As of December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
Cash and cash equivalents	\$30,423	\$—	\$—	\$30,423
Securities maturing within one year:				
Certificates of deposit	551	—	—	551
U.S. treasury securities	192,211	24	(1)	192,234
Total short-term investments	\$192,762	\$24	\$(1)	\$192,785
Total cash and cash equivalents and investments	\$223,185	\$24	\$(1)	\$223,208

There were no realized gains or losses for the three months ended March 31, 2013, and no realized gains or losses for the three months ended March 31, 2012. The cost of securities sold is based on the specific identification method.

5. Fair Value Measurements

The Company uses various inputs in determining the fair value of its investments and measures these assets on a recurring basis. Assets and liabilities recorded at fair value in the consolidated balance sheets are categorized by the level of objectivity associated with the inputs used to measure their fair value. The following levels are directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities:

Level 1 - quoted prices in active markets for identical investments

Level 2 - other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)

Level 3 - significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the credit risk associated with investing in those securities. The following table provides the fair value measurements of applicable Company

assets and liabilities that are measured at fair value on a recurring basis according to the fair value levels described above as of March 31, 2013 and December 31, 2012.

Table of Contents

	Assets and Liabilities at Fair Value as of March 31, 2013			
	Level 1	Level 2	Level 3	Total
	(in thousands)			
Assets				
Cash and cash equivalents	\$34,248	\$—	\$—	\$34,248
Short-term investments	162,915	—	—	162,915
Total cash and cash equivalents and investments	\$197,163	\$—	\$—	\$197,163
Liabilities				
Other long-term liabilities	\$—	\$—	\$31,184	\$31,184
Total liabilities	\$—	\$—	\$31,184	\$31,184
	Assets and Liabilities at Fair Value as of December 31, 2012			
	Level 1	Level 2	Level 3	Total
	(in thousands)			
Assets				
Cash and cash equivalents	\$30,423	\$—	\$—	\$30,423
Short-term investments	192,785	—	—	192,785
Total cash and cash equivalents and investments	\$223,208	\$—	\$—	\$223,208
Liabilities				
Other long-term liabilities	\$—	\$—	\$29,920	\$29,920
Total liabilities	\$—	\$—	\$29,920	\$29,920

The Company's Level 3 liabilities are estimated using a probability-based income approach utilizing an appropriate discount rate. Subsequent changes in the fair value of the Symphony Icon purchase consideration liability are recorded as an increase or decrease in Symphony Icon purchase liability expense in the accompanying consolidated statements of comprehensive loss. On July 30, 2012, Lexicon issued 13,237,519 shares of common stock to designees of Symphony Icon Holdings LLC ("Holdings") in satisfaction of the \$35 million base payment obligation (see Note 7, Arrangements with Symphony Icon, Inc., for more information). The following table summarizes the change in consolidated balance sheet carrying value associated with Level 3 liabilities for the three months ended March 31, 2013 and 2012.

	Other Long-term Liabilities (in thousands)
Balance at December 31, 2012	\$29,920
Change in valuation of purchase consideration payable to former Symphony Icon stockholders	1,264
Balance at March 31, 2013	\$31,184
Balance at December 31, 2011	\$55,033
Change in valuation of purchase consideration payable to former Symphony Icon stockholders	2,081
Balance at March 31, 2012	\$57,114

The Company also has assets that under certain conditions are subject to measurement at fair value on a non-recurring basis. These assets include goodwill associated with the acquisitions of Coelacanth Corporation in 2001 and Symphony Icon on July 30, 2010 and intangible assets associated with the acquisition of Symphony Icon on July 30, 2010. For these assets, measurement at fair value in periods subsequent to their initial recognition is applicable if one or more is determined to be impaired.

Table of Contents

6. Debt Obligations

Mortgage Loan. In April 2004, Lexicon obtained a \$34.0 million mortgage on its facilities in The Woodlands, Texas. The mortgage loan has a ten-year term with a 20-year amortization and bears interest at a fixed rate of 8.23%. The mortgage had a principal balance outstanding of \$23.1 million as of March 31, 2013. The fair value of Lexicon's mortgage loan approximates its carrying value. The fair value of Lexicon's mortgage loan is estimated using discounted cash flow analysis, based on the Company's current incremental borrowing rate.

7. Arrangements with Symphony Icon, Inc.

On June 15, 2007, Lexicon entered into a series of related agreements providing for the financing of the clinical development of certain of its drug candidates, including LX1032 and LX1033, along with any other pharmaceutical compositions modulating the same targets as those drug candidates (the "Programs"). The agreements included a Novated and Restated Technology License Agreement pursuant to which the Company licensed to Symphony Icon, a then wholly-owned subsidiary of Holdings, the Company's intellectual property rights related to the Programs. Holdings contributed \$45 million to Symphony Icon in order to fund the clinical development of the Programs.

Under a Share Purchase Agreement, dated June 15, 2007, between the Company and Holdings, the Company issued and sold to Holdings 7,650,622 shares of its common stock on June 15, 2007 in exchange for \$15 million and an exclusive purchase option (the "Purchase Option") that gave the Company the right to acquire all of the equity of Symphony Icon, thereby allowing the Company to reacquire all of the Programs. On July 30, 2010, Lexicon entered into an Amended and Restated Purchase Option Agreement with Symphony Icon and Holdings and simultaneously exercised the Purchase Option, thereby reacquiring the Programs. Pursuant to the amended terms of the Purchase Option, Lexicon paid Holdings \$10 million on July 30, 2010 and issued 13,237,519 shares of common stock to designees of Holdings on July 30, 2012 in satisfaction of an additional \$35 million base payment obligation.

Lexicon also agreed to make up to \$45 million in additional contingent payments, which will consist of 50% of any consideration Lexicon receives pursuant to any licensing transaction (a "Licensing Transaction") under which Lexicon grants a third party rights to commercialize LX1032, LX1033 or other pharmaceutical compositions modulating the same target as those drug candidates (the "LG103 Programs"), subject to certain exceptions. The contingent payments will be due if and when Lexicon receives such consideration from a Licensing Transaction. In the event Lexicon receives regulatory approval in the United States for the marketing and sale of any product resulting from the LG103 Programs prior to entering into a Licensing Transaction for the commercialization of such product in the United States, in lieu of any contingent payment from such a Licensing Transaction, Lexicon will pay Holdings the sum of \$15 million and the amount of certain expenses Lexicon incurred after its exercise of the Purchase Option which are attributable to the development of such product, reduced by up to 50% of such sum for the amount of any contingent payments paid prior to such United States regulatory approval attributable to any such Licensing Transaction outside of the United States with respect to such product. In the event Lexicon makes any such payment upon United States regulatory approval, Lexicon will have no obligation to make subsequent contingent payments attributable to any such Licensing Transactions for the commercialization of such product outside the United States until the proceeds of such Licensing Transactions exceed 50% of the payment made as a result of such United States regulatory approval. The contingent payments may be paid in cash or a combination of cash and common stock, in Lexicon's discretion, provided that no more than 50% of any contingent payment will be paid in common stock.

Lexicon accounted for the exercise of the Purchase Option and acquisition of Symphony Icon as a business combination. In connection with its acquisition of Symphony Icon, Lexicon paid \$10.0 million in cash, and also agreed to pay Holdings additional base and contingent payments as discussed above. The fair value of the base and contingent consideration payments was \$45.6 million at the date of acquisition and was estimated by applying a

probability-based income approach utilizing an appropriate discount rate. This estimation was based on significant inputs that are not observable in the market, referred to as Level 3 inputs. Key assumptions include: (1) a discount rate of 14% for the base payments; (2) a discount rate of 18% for the contingent payments; and (3) a probability adjusted contingency. The discount rate assumptions have not changed through March 31, 2013, and as programs progress, the probability adjusted contingency is adjusted as necessary. Subsequent changes in the fair value of the Symphony Icon purchase consideration liability are recorded as an increase or decrease in fair value of Symphony Icon purchase liability expense in the accompanying consolidated statements of comprehensive loss. During the three months ended March 31, 2013 and 2012, the fair value of the Symphony Icon purchase consideration liability increased by \$1.3 million and \$2.1 million, respectively.

Table of Contents

8. Commitments and Contingencies

Operating Lease Obligations: A Lexicon subsidiary leases laboratory and office space in Hopewell, New Jersey under an agreement which expires in June 2018. Rent expense is recognized on a straight-line basis over the lease term. Lexicon is the guarantor of the obligations of its subsidiary under this lease. The maximum potential amount of future payments the Company could be required to make under this agreement is \$5.3 million as of March 31, 2013. The Company is required to maintain restricted investments to collateralize a standby letter of credit for this lease. The Company had \$0.4 million and \$0.4 million in restricted investments as collateral as of March 31, 2013 and December 31, 2012, respectively. Additionally, Lexicon leases certain equipment under operating leases.

Legal Proceedings. Lexicon is from time to time party to claims and legal proceedings that arise in the normal course of its business and that it believes will not have, individually or in the aggregate, a material adverse effect on its results of operations, financial condition or liquidity.

9. Collaboration and License Agreements

Lexicon has derived substantially all of its revenues from drug discovery and development collaborations, target validation collaborations for the development and, in some cases, analysis of the physiological effects of genes altered in knockout mice, government grants and contracts, technology licenses, subscriptions to its databases and compound library sales. Revenues generated from third parties under collaborative arrangements are recorded on a gross basis on the consolidated statements of comprehensive loss as Lexicon is the principal participant for these transactions for the purpose of accounting for these arrangements.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a biopharmaceutical company focused on the discovery and development of breakthrough treatments for human disease. We have used gene knockout technologies and an integrated platform of advanced medical technologies to identify and validate, in vivo, more than 100 targets with promising profiles for drug discovery. For targets that we believe have high pharmaceutical value, we engage in programs for the discovery and development of potential new drugs. We have multiple drug programs in various stages of clinical development and have advanced small molecule compounds from a number of additional drug programs into various stages of preclinical development and research.

We are working both independently and through strategic collaborations and alliances to capitalize on our technology, drug target discoveries and drug discovery and development programs. Consistent with this approach, we seek to retain exclusive rights to the benefits of certain drug programs by developing drug candidates from those programs internally and to collaborate with third parties with respect to the discovery, development and commercialization of drug candidates for other targets, particularly when the collaboration provides us with access to expertise and resources that we do not possess internally or are complementary to our own. We have established drug discovery and development collaborations with leading pharmaceutical and biotechnology companies which generated near-term cash while offering us the potential to retain economic participation in products developed from the collaboration. In addition, we have established collaborations and license agreements with other leading pharmaceutical and biotechnology companies, research institutes and academic institutions under which we received fees and, in some cases, are eligible to receive milestone and royalty payments, in return for granting access to some of our technologies and discoveries.

We have derived substantially all of our revenues from drug discovery and development collaborations and other collaborations and technology licenses, and will continue to do so for the foreseeable future. To date, we have generated a substantial portion of our revenues from a limited number of sources.

Our operating results and, in particular, our ability to generate additional revenues are dependent on many factors, including our success in establishing new collaborations and licenses, the success rate of our discovery and development efforts leading to opportunities for new collaborations and licenses, the timing and willingness of collaborators to commercialize products that would result in milestone payments and royalties and their success in such efforts, and general and industry-specific economic conditions which may affect research and development expenditures. Future revenues from our existing collaborations and licenses are uncertain because they depend, to a large degree, on the achievement of milestones and payment of royalties we earn from any future products developed under the collaboration. As a result, we depend, in part, on securing new collaborations and license agreements. Our ability to secure future revenue-generating agreements will depend upon our ability to address the needs of our potential future collaborators and licensees, and to negotiate agreements that we believe are in our long-term best interests. We may determine, as we have with certain of our clinical drug candidates, that our interests are better served by retaining rights to our discoveries and advancing our therapeutic programs to a later stage, which could limit our near-term revenues. Because of these and other factors, our operating results have fluctuated in the past and are likely to do so in the future, and we do not believe that period-to-period comparisons of our operating results are a good indication of our future performance.

Since our inception, we have incurred significant losses and, as of March 31, 2013, we had an accumulated deficit of \$925.8 million. Our losses have resulted principally from costs incurred in research and development, general and administrative costs associated with our operations, and non-cash stock-based compensation expenses associated with

stock options and restricted stock granted to employees and consultants. Research and development expenses consist primarily of salaries and related personnel costs, external research costs related to our preclinical and clinical efforts, material costs, facility costs, depreciation on property and equipment, and other expenses related to our drug discovery and development programs. General and administrative expenses consist primarily of salaries and related expenses for executive and administrative personnel, professional fees and other corporate expenses, including information technology, facilities costs and general legal activities. We expect to continue to incur significant research and development costs in connection with our drug discovery and development programs. As a result, we will need to generate significantly higher revenues to achieve profitability.

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make judgments, estimates and assumptions in the preparation of our consolidated financial statements and accompanying

Table of Contents

notes. Actual results could differ from those estimates. We believe there have been no significant changes in our critical accounting policies as discussed in our Annual Report on Form 10-K for the year ended December 31, 2012.

Recent Accounting Pronouncements

There are no recent accounting pronouncements that have a material impact on our consolidated financial statements.

Results of Operations

Revenues

Total revenues and dollar and percentage changes as compared to the corresponding period in the prior year are as follows (dollar amounts are presented in millions):

	Three Months Ended March 31,	
	2013	2012
Total revenues	\$0.4	\$0.3
Dollar increase	\$0.1	
Percentage increase	20	%

Collaborative research – Revenue from collaborative research for the three months ended March 31, 2013 increased 87% to \$0.3 million, as compared to the corresponding period in 2012, primarily due to increased revenues under our alliance with Taconic Farms.

Subscription and license fees – Revenue from subscriptions and license fees for the three months ended March 31, 2013 decreased 49% to \$0.1 million, as compared to the corresponding period in 2012, primarily due to a decrease in technology license fees.

Research and Development Expenses

Research and development expenses and dollar and percentage changes as compared to the corresponding period in the prior year are as follows (dollar amounts are presented in millions):

	Three Months Ended March 31,	
	2013	2012
Total research and development expense	\$20.3	\$23.0
Dollar decrease	\$(2.7))
Percentage decrease	(12)%

Research and development expenses consist primarily of salaries and other personnel-related expenses, third-party and other services principally related to preclinical and clinical development activities, facility and equipment costs, stock-based compensation expense, and laboratory supplies costs.

Personnel – Personnel costs for the three months ended March 31, 2013 decreased 9% to \$7.3 million, as compared to the corresponding period in 2012, primarily due to reductions in our personnel in January 2012. Salaries, bonuses, employee benefits, payroll taxes, recruiting and relocation costs are included in personnel costs.

Third-party and other services – Third-party and other services for the three months ended March 31, 2013 decreased 19% to \$7.2 million, as compared to the corresponding period in 2012, primarily due to decreases in external preclinical and clinical research and development costs. Third-party and other services relate principally to our clinical trial and related development activities, such as preclinical and clinical studies and contract manufacturing.

Facilities and equipment – Facilities and equipment costs for the three months ended March 31, 2013 decreased 25% to \$2.2 million, as compared to the corresponding period in 2012, primarily due to decreases in rent costs and depreciation expense. Effective December 31, 2012, our subsidiary Lexicon Pharmaceuticals (New Jersey), Inc. amended its laboratory and office space lease extending the lease term and decreasing both the rentable square-feet and rental rate.

Table of Contents

• Stock-based compensation – Stock-based compensation expense for the three months ended March 31, 2013 increased 28% to \$1.3 million, as compared to the corresponding period in 2012.

• Laboratory supplies – Laboratory supplies expense for the three months ended March 31, 2013 decreased 9% to \$0.8 million, as compared to the corresponding period in 2012, primarily due to reductions in early-stage research activities.

• Other – Other costs for the three months ended March 31, 2013 increased 15% to \$1.5 million, as compared to the corresponding period in 2012.

Increase in Fair Value of Symphony Icon Liability

The increase in fair value of the Symphony Icon purchase liability was \$1.3 million and \$2.1 million for the three months ended March 31, 2013 and 2012, respectively (see Note 7, Arrangements with Symphony Icon, Inc., of the Notes to Consolidated Financial Statements, for more information).

General and Administrative Expenses

General and administrative expenses and dollar and percentage changes as compared to the corresponding period in the prior year are as follows (dollar amounts are presented in millions):

	Three Months Ended March 31,	
	2013	2012
Total general and administrative expense	\$4.3	\$4.6
Dollar decrease	\$(0.2)
Percentage decrease	(5)%

General and administrative expenses consist primarily of salaries and other personnel-related expenses, stock-based compensation expenses, professional fees such as legal fees, and facility and equipment costs.

• Personnel – Personnel costs for the three months ended March 31, 2013 decreased 12% to \$2.1 million, as compared to the corresponding period in 2012, primarily due to reductions in our personnel in January 2012. Salaries, bonuses, employee benefits, payroll taxes, recruiting and relocation costs are included in personnel costs.

• Stock-based compensation – Stock-based compensation expense for the three months ended March 31, 2013 increased 14% to \$0.8 million, as compared to the corresponding period in 2012.

• Professional fees – Professional fees for the three months ended March 31, 2013 were \$0.7 million, consistent with the corresponding period in 2012.

• Facilities and equipment – Facilities and equipment costs for the three months ended March 31, 2013 decreased 16% to \$0.4 million, as compared to the corresponding period in 2012.

• Other – Other costs for the three months ended March 31, 2013 were \$0.3 million, consistent with the corresponding period in 2012.

Interest Income and Interest Expense

Interest Income. Interest income for the three months ended March 31, 2013 was \$0.1 million, consistent with the corresponding period in 2012.

Interest Expense. Interest expense for the three months ended March 31, 2013 was \$0.5 million, consistent with the corresponding period in 2012.

Consolidated Net Loss and Consolidated Net Loss per Common Share

Consolidated Net Loss and Consolidated Net Loss per Common Share. Consolidated net loss decreased to \$26.0 million in the three months ended March 31, 2013 from \$29.9 million in the corresponding period in 2012.
Consolidated

15

Table of Contents

net loss per common share decreased to \$0.05 in the three months ended March 31, 2013 from \$0.06 in the corresponding period in 2012.

Our quarterly operating results have fluctuated in the past and are likely to do so in the future, and we believe that quarter-to-quarter comparisons of our operating results are not a good indication of our future performance.

Liquidity and Capital Resources

We have financed our operations from inception primarily through sales of common and preferred stock, contract and milestone payments to us under our drug discovery and development collaborations, target validation, database subscription and technology license agreements, government grants and contracts, and financing obtained under debt and lease arrangements. We have also financed certain of our research and development activities under our agreements with Symphony Icon, Inc. From our inception through March 31, 2013, we had received net proceeds of \$986.0 million from issuances of common and preferred stock. In addition, from our inception through March 31, 2013, we received \$456.4 million in cash payments from drug discovery and development collaborations, target validation, database subscription and technology license agreements, sales of compound libraries and reagents, and government grants and contracts, of which \$442.9 million had been recognized as revenues through March 31, 2013. As of March 31, 2013, we had \$197.2 million in cash, cash equivalents and investments. As of December 31, 2012, we had \$223.2 million in cash, cash equivalents and investments. We used cash of \$24.3 million in operations in the three months ended March 31, 2013. This consisted primarily of the consolidated net loss for the period of \$26.0 million and a net increase in other operating assets net of liabilities of \$2.5 million, partially offset by non-cash charges of \$2.1 million related to stock-based compensation expense, \$1.3 million related to the increase in fair value of the Symphony Icon purchase liability and \$0.8 million related to depreciation expense. Investing activities provided cash of \$29.1 million in the three months ended March 31, 2013, primarily due to net maturities of investments of \$29.9 million, partially offset by purchases of property and equipment of \$0.8 million. Financing activities used cash of \$1.0 million primarily due to repurchase of common stock of \$0.9 million and repayment of debt borrowings of \$0.4 million, partially offset by proceeds of \$0.2 million related to issuance of common stock.

Symphony Drug Development Financing Agreements. In June 2007, we entered into a series of related agreements providing for the financing of the clinical development of certain drug programs, including LX1032 and LX1033, along with any other pharmaceutical compositions modulating the same targets as those drug candidates. Under the financing arrangement, we licensed to Symphony Icon, Inc., a then wholly-owned subsidiary of Symphony Icon Holdings LLC, our intellectual property rights related to the programs and Holdings contributed \$45 million to Symphony Icon in order to fund the clinical development of the programs. We also issued and sold to Holdings shares of our common stock in exchange for \$15 million and received an exclusive option to acquire all of the equity of Symphony Icon, thereby allowing us to reacquire the programs.

Upon the recommendation of Symphony Icon's development committee, which was comprised of an equal number of representatives from us and Symphony Icon, Symphony Icon's board of directors had the right to require us to pay Symphony Icon up to \$15 million for Symphony Icon's use in the development of the programs in accordance with the specified development plan and related development budget. Through July 2010, Symphony Icon's board of directors requested us to pay Symphony Icon \$9.3 million under the agreement, all of which was paid prior to the exercise of the purchase option in July 2010.

In July 2010, we entered into an amended and restated purchase option agreement with Symphony Icon and Holdings and simultaneously exercised our purchase option. Pursuant to the amended terms of the purchase option, we paid Holdings \$10 million in July 2010 and issued 13,237,519 shares of common stock to designees of Holdings in July 2012 in satisfaction of an additional \$35 million base payment obligation.

We also agreed to make up to \$45 million in additional contingent payments, which will consist of 50% of any consideration we receive pursuant to any licensing transaction under which we grant a third party rights to commercialize LX1032, LX1033 or other pharmaceutical compositions modulating the same target as those drug candidates, which we refer to as the "LG103 programs," subject to certain exceptions. The contingent payments will be

due if and when we receive such consideration from such a licensing transaction. In the event we receive regulatory approval in the United States for the marketing and sale of any product resulting from the LG103 programs prior to entering into such a licensing transaction for the commercialization of such product in the United States, in lieu of any contingent payment from such a licensing transaction, we will pay Holdings the sum of \$15 million and the amount of certain expenses we incurred after our exercise of the purchase option which are attributable to the development of such product, reduced by up to 50% of such sum for the amount of any contingent payments paid prior to such United States regulatory approval attributable to any such licensing transaction outside

Table of Contents

of the United States with respect to such product. In the event we make any such payment upon United States regulatory approval, we will have no obligation to make subsequent contingent payments attributable to any such licensing transactions for the commercialization of such product outside the United States until the proceeds of such licensing transactions exceed 50% of the payment made as a result of such United States regulatory approval.

The contingent payments may be paid in cash or a combination of cash and common stock, in our discretion, provided that no more than 50% of any contingent payment will be paid in common stock.

Texas Institute for Genomic Medicine. In July 2005, we received an award from the Texas Enterprise Fund for the creation of a knockout mouse embryonic stem cell library containing 350,000 cell lines for the Texas Institute for Genomic

Medicine, or TIGM, using our proprietary gene trapping technology, which we completed in 2007. We also equipped TIGM

with the bioinformatics software required for the management and analysis of data relating to the library. The Texas Enterprise Fund made an additional award to the Texas A&M University System for the creation of facilities and infrastructure to house the library.

Under the terms of our award, we are responsible for the creation of a specified number of jobs beginning in 2012, reaching an aggregate of 1,616 new jobs in Texas by December 31, 2016. We will receive credits against those job obligations

based on funding received by TIGM and certain related parties from sources other than the State of Texas. We will also receive

credits against those jobs obligations for any surplus jobs we create. We may be required to repay the state a portion of the

award if we fail to meet those job obligations. Subject to these credits, if we fail to create the specified number of jobs, the

State may require us to repay \$2,415 for each job we fall short beginning in 2013. Our maximum aggregate exposure for such

payments, if we fail to create any new jobs, is approximately \$14.2 million, without giving effect to any credits to which we

may be entitled.

Facilities. In April 2004, we obtained a \$34.0 million mortgage on our facilities in The Woodlands, Texas. The mortgage loan has a ten-year term with a 20-year amortization and bears interest at a fixed rate of 8.23%. The mortgage had a principal balance outstanding of \$23.1 million as of March 31, 2013. A balloon payment of \$21.4 million is due in April 2014.

In May 2002, our subsidiary Lexicon Pharmaceuticals (New Jersey), Inc. leased a 76,000 square-foot laboratory and office space in Hopewell, New Jersey. Effective December 31, 2012, this lease was amended to decrease the space to approximately 42,000 square feet. The term of the amended lease extends until June 30, 2018. The amended lease provides for escalating yearly base rent payments starting at \$836,000 and increasing to \$941,000 in the final year of the lease. We are the guarantor of the obligations of our subsidiary under the lease.

Our future capital requirements will be substantial and will depend on many factors, including our ability to obtain drug discovery and development collaborations and other collaborations and technology license agreements, the amount and timing of payments under such agreements, the level and timing of our research and development expenditures, market acceptance of our products, the resources we devote to developing and supporting our products and other factors. Our capital requirements will also be affected by any expenditures we make in connection with license agreements and acquisitions of and investments in complementary technologies and businesses. We expect to devote substantial capital resources to continue our research and development efforts, to expand our support and product development activities, and for other general corporate activities. We believe that our current unrestricted cash

and investment balances and cash and revenues we expect to derive from drug discovery and development collaborations, other collaborations and technology licenses and other sources will be sufficient to fund our operations for at least the next 12 months. During or after this period, if cash generated by operations is insufficient to satisfy our liquidity requirements, we will need to sell additional equity or debt securities or obtain additional credit arrangements. Additional financing may not be available on terms acceptable to us or at all. The sale of additional equity or convertible debt securities may result in additional dilution to our stockholders.

Disclosure about Market Risk

We are exposed to limited market and credit risk on our cash equivalents which have maturities of three months or less at the time of purchase. We maintain a short-term investment portfolio which consists of U.S. Treasury bills, money market accounts, and certificates of deposit that mature three to 12 months from the time of purchase, which we believe are subject to limited market and credit risk. We currently do not hedge interest rate exposure or hold any derivative financial instruments in our investment portfolio.

We had approximately \$197.2 million in cash and cash equivalents and short-term investments as of March 31, 2013. We believe that the working capital available to us will be sufficient to meet our cash requirements for at least the next 12 months.

Table of Contents

We have operated primarily in the United States and substantially all sales to date have been made in U.S. dollars. Accordingly, we have not had any material exposure to foreign currency rate fluctuations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See “Disclosure about Market Risk” under “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations” for quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

Our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by us in the reports we file under the Securities Exchange Act is gathered, analyzed and disclosed with adequate timeliness, accuracy and completeness, based on an evaluation of such controls and procedures as of the end of the period covered by this report.

Subsequent to our evaluation, there were no significant changes in internal controls or other factors that could significantly affect internal controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

Table of Contents

Part II -- Other Information

Item 1. Legal Proceedings

We are from time to time party to claims and legal proceedings that arise in the normal course of our business and that we believe will not have, individually or in the aggregate, a material adverse effect on our results of operations, financial condition or liquidity.

Item 1A. Risk Factors

The following risks and uncertainties are important factors that could cause actual results or events to differ materially from those indicated by forward-looking statements. The factors described below are not the only ones we face and additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations.

Risks Related to Our Need for Additional Financing and Our Financial Results

We will need additional capital in the future and, if it is unavailable, we will be forced to significantly curtail or cease our operations. If it is not available on reasonable terms, we will be forced to obtain funds by entering into financing agreements on unattractive terms.

We have a history of net losses, and we expect to continue to incur net losses and may not achieve or maintain profitability.

- Our operating results have been and likely will continue to fluctuate, and we believe that period-to-period comparisons of our operating results are not a good indication of our future performance.

Risks Related to Discovery and Development of Our Drug Candidates

We have not proven our ability to successfully develop and commercialize drug candidates based on our drug target discoveries.

Clinical testing of our drug candidates in humans is an inherently risky and time-consuming process that may fail to demonstrate safety and efficacy, which could result in the delay, limitation or prevention of regulatory approval.

Risks Related to Regulatory Approval of Our Drug Candidates

Our drug candidates are subject to a lengthy and uncertain regulatory process that may not result in the necessary regulatory approvals, which could adversely affect our ability to commercialize products.

- If our potential products receive regulatory approval, we or our collaborators will remain subject to extensive and rigorous ongoing regulation.

Risks Related to Commercialization of Products

The commercial success of any products that we may develop will depend upon the degree of market acceptance of our products among physicians, patients, health care payors, private health insurers and the medical community.

If we are unable to establish sales and marketing capabilities or enter into agreements with third parties to market and sell our drug candidates, we may be unable to generate product revenues.

If we are unable to obtain adequate coverage and reimbursement from third-party payors for any products that we may develop, our revenues and prospects for profitability will suffer.

Current and future healthcare laws and regulations may negatively affect our revenues and prospects for profitability.

- Our competitors may develop products that make our products obsolete.

We may not be able to manufacture our drug candidates in commercial quantities, which would prevent us from commercializing our drug candidates.

Table of Contents

Risks Related to Our Relationships with Third Parties

We are dependent in many ways upon our collaborations with major pharmaceutical companies. If we are unable to establish new collaborations, if milestones are not achieved under our collaborations or if our collaborators' efforts fail to yield pharmaceutical products on a timely basis, our opportunities to generate revenues and earn royalties will be reduced.

Conflicts with our collaborators could jeopardize the success of our collaborative agreements and harm our product development efforts.

We rely on third parties to carry out drug development activities.

We lack the capability to manufacture materials for preclinical studies, clinical trials or commercial sales and rely on third parties to manufacture our drug candidates, which may harm or delay our product development and commercialization efforts.

Risks Related to Our Intellectual Property

If we are unable to adequately protect our intellectual property, third parties may be able to use our products and technologies, which could adversely affect our ability to compete in the market.

We may be involved in patent litigation and other disputes regarding intellectual property rights and may require licenses from third parties for our discovery and development and planned commercialization activities. We may not prevail in any such litigation or other dispute or be able to obtain required licenses.

We use intellectual property that we license from third parties. If we do not comply with these licenses, we could lose our rights under them.

We have not sought patent protection outside of the United States for some of our inventions, and some of our licensed patents only provide coverage in the United States. As a result, our international competitors could be granted foreign patent protection with respect to our discoveries.

We may be subject to damages resulting from claims that we, our employees or independent contractors have wrongfully used or disclosed alleged trade secrets of their former employers.

Risks Related to Employees, Advisors and Facilities Operations

The loss of key personnel or the inability to attract and retain additional personnel could impair our ability to expand our operations.

Our collaborations with outside scientists may be subject to restriction and change.

Because most of our operations are located at a limited number of locations, the occurrence of a disaster could significantly disrupt our business.

Risks Related to Environmental and Product Liability

We use hazardous chemicals and radioactive and biological materials in our business. Any claims relating to improper handling, storage or disposal of these materials could be time consuming and costly.

We may be sued for product liability.

Risks Related to Our Common Stock

Invus, L.P., Invus C.V. and their affiliates own a controlling interest in our outstanding common stock and may have interests which conflict with those of our other stockholders.

Invus has additional rights under our stockholders' agreement with Invus, L.P. which provides Invus with substantial influence over certain significant corporate matters.

Table of Contents

Our stock price may be extremely volatile.

We may engage in future acquisitions, which may be expensive and time consuming and from which we may not realize anticipated benefits.

Future sales of our common stock may depress our stock price.

If we are unable to meet Nasdaq continued listing requirements, Nasdaq may take action to delist our common stock.

For additional discussion of the risks and uncertainties that affect our business, see “Item 1A. Risk Factors” included in our annual report on Form 10-K for the year ended December 31, 2012 as filed with the Securities and Exchange Commission.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about our purchases of shares of our common stock during the three months ended March 31, 2013:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs ⁽⁴⁾
January 1-31, 2013	109,345	⁽¹⁾ \$2.11 ⁽³⁾	—	—
February 1-28, 2013	324,401	⁽²⁾ \$1.98 ⁽³⁾	—	—
March 1-31, 2013	—	\$—	—	—

Represents shares retained by us in satisfaction of the tax withholding obligations of recipients of restricted stock ⁽¹⁾units granted in February 2010 under our Equity Incentive Plan with respect to the vesting of such restricted stock units.

Represents shares retained by us in satisfaction of the tax withholding obligations of recipients of restricted stock ⁽²⁾units granted in February 2011 and February 2012 under our Equity Incentive Plan with respect to the vesting of such restricted stock units.

⁽³⁾ Represents the market price of our common stock on the date of vesting of such restricted stock units, calculated in accordance with the process for determination of fair market value under our Equity Incentive Plan.

In the future, we may grant additional equity securities under our Equity Incentive Plan for which the recipient's tax withholding obligations with respect to the grant or vesting of such securities may be satisfied by our retention of a portion of such securities. Further, for any such equity securities which are subject to vesting conditions, the ⁽⁴⁾number of equity securities which we may retain in satisfaction of the recipient's tax withholding obligations may be dependent on the continued employment of such recipient or other performance-based conditions. Accordingly, we cannot predict with any certainty either the total amount of equity securities or the approximate dollar value of such securities that we may purchase in future years.
