NEWS RELEASE

FOR IMMEDIATE RELEASE

**TRANSGLOBE ENERGY CORPORATION ANNOUNCES UPDATE
ON REPUBLIC OF YEMEN OPERATIONS**

Monday, January 27, 2003 Calgary, Alberta - TransGlobe Energy Corporation (TransGlobe or the Company) (TSX symbol "TGL"; OTC-BB symbol "TGLEF") announces the results from the An Naeem #3 exploration well on Block S-1, in the Republic of Yemen.

Block S-1, Yemen (25.0% working interest)

An Naeem #3, which commenced drilling on December 19, 2002, was drilled to a total depth of 1,623 meters. The well was drilled structurally down dip from the An Naeem #1 and An Naeem #2 gas wells to test a potential oil rim. The An Naeem #3 well encountered the Alif sandstone and tested natural gas at a rate of 3.8 million cubic feet per day (MMcfd) and 12

barrels of condensate per day on a restricted choke from an 8 meter (26 feet) perforated interval. Although the well successfully tested hydrocarbons in the targeted Alif formation, an oil rim was not encountered. The well was temporarily abandoned and suspended as a potential gas condensate producer. The rig is currently moving to the next drilling location at An Nagyah #3. The An Nagyah #3 well is an appraisal of the oil discovery made at An Nagyah #2, announced December 10, 2002.

This release includes certain statements that may be deemed to be forward-looking statements within the meaning of the US Private Securities Litigation Reform Act of 1995. All statements in this release, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects, are forward-looking statements. Although TransGlobe believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include oil and gas prices, exploitation and exploration successes, continued availability of capital and financing, and general economic, market or business conditions.
