## FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include, among other things, statements regarding:

- o our ability to diversify our operations;
- o our ability to implement our business plan of providing information to owners of distressed properties facing foreclosure and potential investors together;
  - o our ability to attract key personnel;
  - o our ability to operate profitably;
- o our ability to efficiently and effectively finance our operations, and/or purchase orders;
  - o inability to achieve future sales levels or other operating results;
    - o inability to raise additional financing for working capital;
    - o inability to efficiently manage our operations;
- o the inability of management to effectively implement our strategies and business plans;
  - o the unavailability of funds for capital expenditures and/or general working capital;
- o the fact that our accounting policies and methods are fundamental to how we report our financial condition and results of operations, and they may require management to make estimates about matters that are inherently uncertain;
  - o deterioration in general or regional economic conditions;
- o changes in U.S. GAAP or in the legal, regulatory and legislative environments in the markets in which we operate;
- o adverse state or federal legislation or regulation that increases the costs of compliance, or adverse findings by a regulator with respect to existing operations;

as well as other statements regarding our future operations, financial condition and prospects, and business strategies. These forward-looking statements are subject to certain risks and uncertainties that could cause our actual results to differ materially from those reflected in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this Annual Report on Form 10-K, and in particular, the risks discussed under the heading “Risk Factors” in Part I, Item 1A and those discussed in other documents we file with the Securities and Exchange Commission. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

PART I

ITEM 1. BUSINESS

References in the following discussion and throughout this annual report to “we”, “our”, “us”, “Subprime”, “the Company”, and similar terms refer to the Registrant, Subprime Advantage, Inc. unless otherwise stated or the context otherwise requires.

Business Development

Subprime Advantage, Inc. is a development stage company incorporated in the State of Nevada in December of 2009. We were formed to provide information to owners of distressed properties on the brink of foreclosure, as well as bring potential investors and sellers together in an informative, logical situation. In addition, the process of acquiring information on distressed properties, or properties with subprime mortgages, or other types of investment opportunities, we may locate properties which may be acquisition candidates for us.

Since our inception on December 17, 2009 through December 31, 2010, we have not generated any revenues and have incurred a net loss of \$60,664. Since December of 2009, our only business activity was the formation of our corporate entity, the development of our business model, and the acquisition of our first subprime real estate property. However, due to complications with negotiations with the lender, we exercised our rights of rescission and terminated the contract. As a result of the slumped housing market, we have considered the prospect of acquiring subprime real estate with natural resources, such as oil and gas. Additionally, we anticipate the commencement of generating revenues from our website ([www.subprimeadvantage.com](http://www.subprimeadvantage.com)) in the next twelve months, of which we can provide no assurance.

On November 5, 2010 we received notice from FINRA and our initial market maker that we were assigned the symbol SBPV to initiate trading on the Over-the-Counter Bulletin Board (OTC:BB). However, at this time, trading has yet to commence.

## OUR BUSINESS

### Business Development Summary

Subprime Advantage, Inc. is a development stage company incorporated in the State of Nevada in December of 2009. We were formed to engage in the business of providing information to the general public on subprime disadvantaged properties through the advertising media of the internet. In addition to our website, we have begun to take advantage of real estate investment opportunities, including the purchase and rental of properties affected by downturn in the real estate market. We have launched our initial site which is designed to become a source of information for distressed homeowners. During our initial month of formation we concentrated our energies on analyzing the viability of our business plan, and establishing our business model. Upon further development, our website will address the aspects of our business concept as set forth below. We commenced our business operations in December of 2009 through the posting of the initial page of our website ([www.SubprimeAdvantage.com](http://www.SubprimeAdvantage.com)).

Additionally, as our business model continues to evolve, we will continue our pursuit of properties which may or may not have subprime mortgages, should these opportunities arise. These properties would also be listed on our website.

We are attempting to build Subprime Advantage, Inc., into an internet information resource as well as a comprehensive consumer information website. Our principal goal is to earn revenues by uniting investors, lenders and sellers of subprime disadvantaged real estate online. We also intend to earn revenues through advertising and banner sales to businesses who could be of service to subprime mortgage holders. In order to generate revenues during the next twelve months, we must:

1. Enhance our existing website – We believe that using the internet for subprime disadvantaged homeowners as a classified marketplace and consumer information facility will provide us a base for operating our company. We have registered the domain name [www.SubprimeAdvantage.com](http://www.SubprimeAdvantage.com), and have developed a preliminary website, where we expect to expand the site to be more comprehensive. We have begun construction on the preliminary aspects of our website, and intend to have a fully developed website during the second quarter of 2011. Since we are newly formed, we have not contracted with a particular web-designer, and all construction of the current site has been performed in-house. Although we do have the capabilities to design in-house, the extensive nature of our planned website will require the use of outside consultants.

During the time we are finishing our website design, we will continue to research the internet and other media sources such as CNN, CNBC, the Wall Street Journal, as well as current websites and blogs, to help develop our content. Between the content spread throughout the internet and media sources such as Fox News, CNBC and CNN, print media such as the Wall Street Journal and Assisted Housing Alert magazine; informational content is readily available to be compiled and formatted for posting. We will also continue to monitor current regulations of State statutes and federal assistance programs which might change or become readily available to sellers and investors of subprime mortgages and properties.

One of the goals of Subprime Advantage is not only to create new content, but to compile content from the public domain of information into one easily navigatable website. There is a wealth of information available to both sellers and investors however at present is very time consuming to research items which are spread throughout different forms of media.

If as much of this informational content was placed into a website correctly, and paired with contacts to industry professionals within the requesters area or zip code, much of the work that's put into selling a subprime distressed or REO property could be simplified and benefit by both sellers and investors; saving time and money, by having the capability to research one site.

2. Develop and implement a marketing plan – Once we establish our presence on the internet, we intend to devote our efforts to developing and implementing a plan to market our services to homeowners and businesses. In order to promote our company and attract customers, we plan to advertise via the internet in the form of banner ads, link sharing programs and search engine placements. We also intend to form partnerships with realtors, investors and lending institutions to help promote the benefits of Subprime Advantage. At this time we have not formed such partnerships or agreements and are unaware of the costs associated with forming them. We expect to generate some revenues from Subprime, for sale by owner listings, as well as realtor listings, during the second quarter of 2011, however, during 2011 we expect to formalize and implement a marketing scheme to provide professionals and non-professionals, homeowners and investors, an additional marketing outlet.

3. Develop and implement a comprehensive consumer information website – In addition to providing a consumer (investors and sellers) and trade (real estate associated professionals) a classified marketplace, we intend to develop a consumer information website. We are intending to let investors and homeowners research the most detailed real estate information including buying and selling tips, investing tips, legal blogs on subprime issues, updates on laws and regulations, finance options, insurance and warranty programs, as well as tools for analyzing upfront payment scams.

By listing with Subprime Advantage, sellers will have a more educated audience. At this time we are assessing the possibility of hosting our own site, on premise, or outsourcing to a remote location and service. We have contacted consultants to help us devise the best possible solution to help us achieve our overall goal. We have also researched and mapped out possible sections for our website, some of which might include but not be limited to:

- Short sale/Pre-foreclosure listing;
- Foreclosure listing;
- Realtors who specialize in handling REO (1) properties;
- Links to possible lenders;
- Form letter examples and instruction guidelines;
- Federal statutes and regulations;
- State statutes and regulations-broken down by state; and
- RSS news feeds posting all of the latest news from agencies such as the Federal Reserve and IRS.

Subprime Advantage, Inc. commenced its business operations in December of 2009, and as a result of its recent commencement of business activities has limited start-up operations and generated no revenues. Our operations, to date, have been devoted primarily to startup and development activities.

Subprime Advantage, Inc. is a recently established business, with temporary offices at 501 West Broadway, Suite A-323, San Diego, California 92101. Our director, officer, and stockholder created the business as a result of determining the lack of sufficient information available to the subprime disadvantage homeowners.

4. Acquire Real Property- In addition to engaging in the business of providing information to the public on subprime disadvantaged properties, we intend to take advantage of investment opportunities in real estate. These properties may or may not carry subprime mortgages. The acquisition of these properties will be based upon current purchase price versus potential property values and the potential of rental income. Further consideration will be given to what state of disrepair the property is in at the time of the possible acquisition. As a company, our focus will be to acquire properties which are in good to excellent condition. These properties need to be complete structurally as well as maintain all as built fixtures. We will also take into consideration the properties' location. Subprime Advantage is focusing on acquiring properties within metro areas of a minimum of 500,000 inhabitants. Within these metro areas properties should have easy access to freeways, airports, schools and shopping/retail outlets. Our recent acquisition meets these requirements. Upon acquisition of the properties, if market conditions do not warrant a profitable resale, the properties will be offered for rent using conventional leasing terms. Properties held by Subprime will be managed in-house, until such time as inventory would warrant the use of an outside company with expertise in property management. In addition to conventional real estate, we are also reviewing real estate opportunities in natural resources such as oil and gas.

#### Business of Issuer

We are developing an online subprime disadvantaged property advertising platform, which will provide a method by which investors and sellers of subprime disadvantaged properties are brought together in an efficient format to browse, buy and sell properties, provide mortgages, and mortgage related information to a distinct and focused customer. We intend to initially limit our marketplace to individuals involved in the acquisition of, sale of, or providing professional advice to subprime related individuals. Our main focus is to be in a specialized service, and not compete with other listing sites such as [www.realtor.com](http://www.realtor.com). We believe that by limiting our classified internet marketplace to these individuals we initially stand a better chance of developing a marketplace for these individuals. The internet marketplace we are developing will be designed to give these investors and sellers more control over the entire process of buying and selling subprime disadvantaged properties by providing detailed information allowing them to make an informed buying, selling, or investment decision. Upon completion of our website, Subprime Advantage is intending to have a website which will be a fully automated, topically arranged, intuitive, and easy-to-use service which will support a buying, selling, and investing experience in which sellers list subprime disadvantaged properties for sale and investors provide offers on the properties.

One stop at [www.SubprimeAdvantage.com](http://www.SubprimeAdvantage.com) is intended to provide investors real estate research online before making the actual purchase. We are designing our website to allow investors to research detailed information including buying and selling tips, current mortgage rates, lender information, related tax information, title liens, changes in regulations and government assisted programs, as well as tools for subprime disadvantaged properties. Sellers will be able to list a property on [SubprimeAdvantage.com](http://SubprimeAdvantage.com), making it available to a potentially large online audience of investors.

We are developing an internet destination and marketplace in the United States for investors and sellers of subprime disadvantaged properties and for investors seeking information regarding current market conditions and other information, such as insurance, financing and current trends. Our goal is to utilize the power of the internet to aggregate in a single location an extensive network of real estate and mortgage industry participants and a comprehensive database of information on subprime disadvantage properties to create an open marketplace that is local, regional and national in nature.

By providing a digital marketplace, we will be able, upon full implementation, to bring investors, private sellers and other industry participants, such as lenders, real estate agents and national advertisers, together with purchase-minded investors at the moment when these investors are directly engaged in a search for subprime disadvantaged properties and related services.

Upon completion, we intend our website to allow investors to effectively navigate a large database of property listings in the United States, thereby optimizing their ability to find the property of their choice in their chosen geographic area. We also intend to provide one of the most comprehensive sources of real estate information, including a variety of decision tools, buying and selling tips, reviews, pricing and lender information, as well as financing and insurance options.

We believe that our website, upon full implementation, will generate leads (potential investors requesting a phone number, directions, photographs or an e-mail address) for sellers that allow them to precisely target purchasers of property in a manner which is more effective than traditional media. When lenders foreclose on a property, it becomes a very costly venture. Not only is the lender losing money from unpaid loans, property maintenance and management, they are losing money in all of the time involved. The goal of Subprime Advantage is to not only help out individual buyers and sellers, it is our goal to also assist lending institutions speed up the process by which they can turn inventoried properties. By putting the institutions directly in touch with qualified buyers, and bypassing the traditional means of advertising and showing, lenders will have the possibility of moving properties much quicker. Our website's database will give lenders access to registered investors. This will shorten the time needed to cultivate qualified leads and give lenders a tool in which to make the overall sales process more efficient and less time consuming.

Our business model is being built on multiple revenue streams from a variety of industry participants interested in marketing their services to our consumer audience. First and foremost sellers of distressed, short-sale or foreclosed properties will be able to list their home on a bi-weekly basis for a minimal fee of \$5.00 a week. We intend for there to be option at which, the lister will be able to upgrade their listing with enhanced options for additional fees. Realtors who specialize in REO properties will have the capability to have a basic listing for \$10.00 a month. For additional fees, enhanced listing services will also be available to realtors. Enhanced services are still being developed for both private sellers as well as realtors. At this time we have not finalized what will constitute the "enhanced" package, however we have determined the scope to include more listing space, enhanced features such as direct texting to mobile phone, mobile phone uploads and enhanced picture uploads. Other improvements and upgrades intend to be offered as our website comes online. Lending institutions will also be able to access and list on our site. They will be able to purchase banner advertising as well as sponsor forums and blogs, which they would have the option to lead the topic of the blog, or simply purchase banner advertising within the blog.

Our objective is to build and maintain a superior online marketplace for facilitating transactions between investors and sellers of subprime disadvantaged properties while allowing for improved communication and ease of use. After developing a position in the market for our service, the main thrust of our strategy is to enhance our market position by growing our database of property listings as well as, investors, sellers, and our database of information regarding the property searching patterns of investors, and the audience of users of our website.

Additionally, our business model includes the acquisition of properties which may or may not have subprime mortgages, should these opportunities arise. These properties would also be listed on our website. Our goal through property acquisition will be acquiring properties which will allow us to boost revenues as well as help promote our website.

Through our property acquisition we would intend to document the process of subprime property acquisitions and publish our findings on our website. Upon an upward turn in the market, our intention would be to sell the property, with the intention of increasing company revenues as well as company awareness. In the mid-term, properties acquired will be offered as rental units. Revenues from rental properties may allow our company to cover costs of property acquisition, taxes and possible association fees until such time the market would allow a profitable resale. Our goal is to only acquire properties which would have minimal expenses and allow us to maintain a monthly cash-flow through rental income. Our goal is to acquire properties which are in good to excellent and immediately livable condition. We do not wish to focus our time or efforts on refurbishing or reconditioning properties which have been abandoned or neglected by the previous owners. Currently, we have no properties available for rent. At this time and until such time as we have acquired enough properties where managing in-house would become too difficult, all properties will be managed by Subprime Advantage. If such a time would occur where in-house management would become too burdensome, we will interview and select from property management companies within the particular region of the property locations.

Aside from our interest in residential properties we have been introduced to properties such as oil and gas leases and other resources. As we grow we may be able to obtain the expertise needed to offer the services we are proposing. At this time however, we do not plan to hire any additional staff, contractors or experts to assist in the operations of the business. In the meantime, the website will be our strongest tool when finding the Real Estate we wish to list on our site. Individuals looking to buy or sell property will be able to find our contact information on the site. We also expect word-of-mouth advertising to be beneficial. The costs associated with developing and maintaining our website, current property acquisition and operations over the next 12 months are anticipated to be between \$5,600 and \$25,000.

#### The Online Subprime Disadvantaged Property Opportunity

Because of the size and fragmented nature of the subprime disadvantaged property markets and its reliance on the exchange of information, the internet provides an efficient platform for sellers to aggregate and disseminate information to investors as well as to expose both investors and sellers to an extensive range of buying and selling opportunities. Compared with traditional media, the internet provides significant advantages to private sellers of subprime disadvantaged properties in that they have the ability to target local investors more cost-effectively and more quickly differentiate the listings or services more effectively. This will allow not only sellers, but also investors and lenders to broaden the reach and size of their market.

The popularity and depth of sites such as Redfin ([www.redfin.com](http://www.redfin.com)) and Realtor.com ([www.realtor.com](http://www.realtor.com)) lead us to believe investors and purchasers of real estate are increasingly using the internet when making purchase decisions because of the inadequacy of available information from other sources and the convenience of searching a database of aggregated property information from the privacy of their home or office. While the internet substantially increases the amount of information available for researching and evaluating subprime disadvantaged property purchasing decisions and choices, this information is often not aggregated at a central, organized source.

## Our Solution

We believe that by providing a marketplace on the internet where investors and sellers of subprime disadvantaged properties can meet, educate themselves, as well as negotiate and control their purchase decisions with significant reductions in the costs associated with selling properties, especially in a down market. We intend to significantly improve the real estate purchasing and selling process for both investors and sellers. Our concept and solution differs from current realty based sites in that we are focusing only on distressed, short sale properties, as well as properties either in the process of foreclosure or have already completed the foreclosure process. A powerful internet marketplace can provide investors, private sellers, lenders and advertisers an effective environment for reaching an economically and geographically diverse group of targeted investors who have expressed interest in the subprime real estate markets. Our website is being designed to provide investors with a "one-stop" destination that incorporates all aspects of commerce and content related to subprime crisis. At this time we are not aware of another website focusing on this section of the real estate market. Our research in this matter has not brought any relevant websites focusing on this subject matter, however we cannot confirm another website doesn't exist or will not emerge in the future.

### 1. Development of Our Software

We are in the process of determining which computer hardware, networking and enterprise software solutions will help us grow our business. However, as a precondition to such determination, as a result of the magnitude of the process, we are categorizing out strategies in light of current budget constraints. We are developing corporate strategies, competitive strategies and growth strategies.

Since we are at the infancy of our business decisions we are required to meet the goals in developing a software solution for our business. Current factors under review by us in building our business strategy include:

Context of website- the type of data being utilized and the purpose for which it is used

Storage of Data- Where the data resides

Data Flow- how the data enters and moves through the organization

Workflow- how work activities interact with the use of the data

Stewardship- people responsible for managing the data

Continuous Monitoring- processes for regularly validating the data

Our decision on the implementation of a software solution is highly critical to the implementation of our goals. Our ability to attain our strategic goals is, in part, determined by the level of quality of the data we collect, store, and manage on a daily basis.

Although our concept is not new, go to craigslist.com, Facebook.com, MySpace.com. Our application of older more established concepts, as enumerated above, will be channeled to a different strategy and application, when complete. Since our strategy plan will be a living work product, although we intended to have a working website by the end of 2010, we acknowledged that the website will be continually upgraded as a result of either the successful or unsuccessful application of our strategy and our implementation.

## 2. Significant Benefits to Advertisers and Industry Professionals

If we are able to structure our website the way we envision in our business plan, we believe we will provide significant benefits to industry professionals such as:

- **Low Cost and Flexible Services.** We intend to provide seller listings and advertisements in a cost-effective manner, frequently reducing the costs associated with advertising with other real estate based services such as the standard 6% listing fees. Our website is being designed so that basic listings will be posted on our website without requiring binding contracts. Enhanced listings and other promotional products such as banner advertising will be able to be purchased for various fees, dependent upon on contract terms. We plan on developing a listing process and user-friendly interface which will allow sellers to update their listings and make changes as often as they wish, a flexibility and convenience not found in traditional advertising which is dependent upon fixed publishing and advertising schedules. Sellers will be able to access their listings to make these changes 24 hours a day, seven days a week through a password-protected system, and these changes will be generally posted on our website within a few hours.
- **Ability to Target Investors Interested in Subprime Real Estate Opportunities.** We find the ability to target specific listings investors and place them in the hands of truly interested parties will set our service apart from current MLS services. Upon our completion of acquiring a proprietary search engine and targeting, tracking and analysis software in the future, our website is anticipated to be able to display and monitor seller listings as well as advertisements which are most likely to be of interest to a specific consumer based upon their search criteria and zip code. As a result, both investors and sellers may experience a level of marketing precision with Subprime Advantage, Inc., that is unavailable through traditional newspaper, radio and television advertising.
- **Wide Range of Listing and Advertising Products.** We are also planning on our website to have targeted listing and advertising services together with, customer-driven search tools and functionality to facilitate effective presentation and matching of a seller's property and services with the desired features and criteria of prospective investors. In addition to posting basic listings on our website free of charge, sellers will be able to purchase a wide range of online listing and advertising products, including:
  - o enhanced listings, which provide a more prominent presentation of a seller's properties similar to bold listings in the Yellow Pages;
  - o website links, which enable visitors to link through to various lender's and tax information sites;

- o website design and hosting, which provide sellers with their own prominently listed internet address in the SubprimeAdvantage.com Seller Directory for maximum exposure and a searchable subprime disadvantaged property database;

- o banner advertising, which displays a seller's advertisement on a Web page as it is being viewed by a potential buyer determined by search criteria, including geography, amenities and listing price.

- Access to Database of Purchase Incentives and Government Sponsored Programs. Based upon the design of the software we are reviewing, we will also be able to collect, filter and report usable information on all of the programs sponsored by lenders as well as those funded and sponsored by the government. This will include information pertaining to first time investors as well as other "bail out" type incentives.

- Open, Non-Exclusive Marketplace. Our business plan takes into account that we may act as a neutral intermediary that facilitates the interaction and exchange of information between sellers and potential property investors, rather than competing with the sellers directly by taking title to property and then selling the property to users of our website. Sellers listing their property on our website are not precluded from also listing their properties on other websites or through more traditional advertising methods. As a result, we will offer sellers a non-exclusive channel to target potential investors without having to compete with us in the process. By enabling all types of sellers and styles of selling to participate in our open marketplace, we would make it easy for dealers to include Subprime Advantage, Inc. in their marketing mix.

### 3. Significant Benefits to Investors

- Flexible, Customer-Driven Search Process. Our website is intended to employ a specialized search engine, which will allow investors to quickly, conveniently and easily navigate through our listings of subprime disadvantaged properties to locate properties that match their specific search criteria, including variables such as asking price, potential lenders, amenities, and geographic location. Once an investor finds the desired property, the consumer will be provided with the seller's/agent's contact information as well as links to a wide range of detailed information about the property, including amenities, possible encumbrances, county tax records, comparable sales within the area, potential lenders, and information on the neighborhood. We are also planning the website to feature decision guide software, which will help our users choose the property which is right for them. By completing a simple "Custom Search" question-and-answer form, users will be guided to properties which match their desires and needs. In addition, the website would also enable investors to review real estate-related products and services easily from category to category (e.g. from insurance to finance) without needless backtracking. Moreover, the consumer data captured by our database would enable us to provide customized advertising messages to investors that may be based, for example, on the category of property inquiries they have made.

- Private Seller Listings. We will also serve sellers by enabling them, as private sellers, to list their subprime property for sale on our website at minimal charge. With this listing option, private sellers make their listings available to a potentially large and geographically diverse number of potential investors. In addition, private sellers would benefit from the ability of our website to more effectively target investors in their geographic area than more traditional media or MLS services.

#### 4. Significant Benefits to Other Industry Participants

- Vendors of Subprime Products and Services. We anticipate providing businesses that specialize in marketing goods and services to subprime disadvantaged property owners, access to a large and growing number of purchase-minded investors who, in many instances, may require legal services, insurance, financing, home owner's warranties, remodeling or other property based products and services. Investors seeking information are also often interested in, or may be specifically researching, information regarding competitive providers for their current property. Vendors of products and services may be able to benefit from the ability of our database and software to direct their products and services to a targeted audience, which may provide them with a competitive advantage and an opportunity to increase their revenues.
- National Advertisers. By utilizing the wide range of targeted marketing offerings of Subprime Advantage, Inc., national advertisers may be able to gain exposure to a targeted group when these investors are directly engaged in a search for information regarding subprime property products and services on our website. We intend to establish national advertising accounts with the real estate industry, however at this time no such contact has been established.

#### COMPETITIVE ADVANTAGES

In terms of the number of dealers, private sellers and subprime property investors, we do not anticipate an ability to create a competitive advantage over other well established sites for some time in the future.

#### STRATEGY

Our objective is to build and maintain an online marketplace for facilitating transactions between investors and sellers of subprime properties, while also providing a wide range of information specific to the needs of individuals who own properties with disadvantaged financing. In addition, we intend to take advantage of investment opportunities in real estate, which may arise as the result of our contacts generated through our website. We intend to accomplish our objective by pursuing the following strategic initiatives:

- Enhance and Broaden Services, Relevant E-Commerce Offerings and Content Offerings

We anticipate offering products and services such as expanded advertising and promotional opportunities, forms of enhanced listings, seller website services. We also plan to post referrals for home owner's insurance, home inspection and legal services. Our final design goal is to enhance and expand the selection criteria of client-driven search tools by allowing searches that include desired square footage, amenities, tax incentives, geographical locations, price range and property age to pinpoint even more effectively the property of the investor's choice. At this time, we have begun to compile a list of advertising and promotional opportunities as well as design requests to allow for enhanced client listings. We currently do not have the required software to provide for the type of searches we anticipate; however we have commenced the evaluation process. Although most of the costs associated with referral listings are nominal, enhanced search capabilities requires an extensively designed architecture. At this time we are still in the process of compiling the cost of implementation.

· Increase Brand Awareness and Consumer Traffic

We believe that building investor and seller awareness of Subprime Advantage, Inc., through the information and services that we offer is critical to our effort to build an internet marketplace destination for subprime properties. We intend to focus our consumer marketing efforts primarily on online advertising with selected high traffic internet portals and websites. Through the use of design consultants, which we have been in contact with, we have discussed how their expertise can get us within the top five search results on search engines such as Google and Metacrawler; by registering with the proper and most productive search terms. Our objective in the interim is to compile these terms, which comes at nominal cost to the business. Through implementation of the new website, we will focus our energies on marketing to realtors, lending institutions, private property owners. This can be done through direct mail, as well as attendance at seminars whose subject matter is the nature of our business. Attendance may range from purchasing sponsorships to guest speaking. Active marketing, such as direct mail, banner advertising or sponsorships vary greatly in costs, however some of these costs may be able to be accrued or traded for content/advertising on our site. We plan on beginning the active marketing of our website in the second quarter of 2011, upon completion of the beta testing.

· Leverage Our Business Model

Our business model revolves around facilitating the interaction between investors and sellers of subprime properties, as well as other real estate products and services. By combining an expansion of traffic to our website with an expansion of the size and information content of our listing database, we expect to continue to experience rapid growth in the generation of leads for sellers and other industry participants. Unlike other realty based websites, we are developing a scalable business model characterized by multiple revenue streams, a significant portion of which are recurring in nature:

- o subscription and advertising fees from real estate based services;
- o referral fee revenue from facilitating e-commerce transactions (such as financing, insurance, warranties, remodeling and other home improvement products);
- o listing fees from our online property listings,
- o fees from national advertising programs, promotions and services;; and
- o income from pay-per-click advertising such as Google AdSense.

At this time, with the initial website posted, we are ready to proceed with collecting fees based upon listings of realty based services as well as listings from parties with subprime properties. Upon the completion of the final website, we will aim to secure more lucrative revenue from national advertisers and ecommerce referral fees. We estimate the earliest this revenue stream would begin would be in the first and second quarters of 2011.

· Property Acquisitions

Part of our strategy involves utilizing the information and contacts generated through our own website to acquire real estate.

Services to Investors

We intend to develop our website into a “one-stop shop” for both sellers and investors with all of the information and tools they would need to cover both the sale and purchase of subprime properties.

Property Search, Selection and Listing

Our current website posts information concerning the company with a reference to sections being under construction. However, our proposed website will make foreclosed, subprime and short sale property search, selection and listing processes easy by providing a searchable database of property listings, a user-friendly online e listing form and access to an informational website. More specifically, we intend to provide investors with the following services:

- Searchable Subprime And Otherwise Distressed Property Listings. Search our listings database by square footage, amenities, encumbrances, price range, and geographic location and obtain contact information such as e-mail addresses, telephone numbers and maps with directions.
- "Sell a Property" Service. List a subprime property on our website at minimal cost by completing our online order.
- Property Histories. Perform a search to find out a particular property’s ownership, history of liens and county tax files as well as comparable sales and listings in the geographically searched area.
- Property Information and Consumer Tools. Our website will help investors select the right property for them based upon their individual preferences, price parameters and financial condition. We intend to provide investors with expert reviews and advice relating to the subprime real estate market. More specifically, we anticipate providing investors with the following services:
  - o Decision Guide. Complete a simple "Custom Search" question-and-answer form in our interactive decision guide to find out which property best fits the investor's desires, needs and budget.
  - o Pricing Guides. Obtain comparables for recent listings over the last year, as well as current listings within the geographically searched area.

### Services to Other Industry Participants

We intend to offer other industry participants the following services on our website:

- E-Commerce. We intend to provide, mortgage/finance companies, insurance companies, as well as other service based businesses that specialize in real estate based products and services the ability to reach purchase-minded, or service minded investors on our website in order to capture sales opportunities for which we receive commissions and advertising fees. More specifically, we intend to provide the following services:

- o Financing. Offer mortgage broker options and dedicate parts of the website to maintain current interest rates as well as other valuable information when helping investors choose the proper lender. We intend to establish financing alliances with lenders such as Wells Fargo, Bank of America, Citibank and Wachovia. We have not made contact with these product vendors at this time.

- o Insurance. We intend to set up an alliance for homeowner's insurance providers such as Allstate, State Farm and Farmer's Insurance; who could provide access to an agent in the investor's area, and who could answer the investor's insurance questions as well as providing insurance quotes. We have not made contacts with these carriers at this time.

### Additional Goods and Services

Remodeling. If we are successful with our website, we intend to provide national and regional industry contractors, who would be available to remodel recently acquired properties.

### Technology

In order to operate our website, we will be required to have a scalable user interface and transaction processing system that is designed around industry standard architectures and externally developed non-proprietary software. In other words, the system needs to be designed in a way which allows for expansion as well as provide a secure architecture for payment of fees and services. The system will be required to maintain operational data records regarding sellers, property listings and leads generated by our listings and e-commerce partners. The system will also be required to handle other aspects of the subprime property marketing process, including providing seller contact information and submitting insurance and finance inquiries, as well as other inquiries for various vendors.

The system will be required to have the capability to provide sellers, advertisers and vendors with online access to information relevant to their business or listing. For example, these vendors should be able to access a Subprime Advantage, Inc., extranet (Sellers.SubprimeAdvantage.com) to manage their subprime property inventory by adding, modifying or updating their listings, as well as uploading pictures of properties.

Our operations will be required to provide website services 24 hours a day, seven days a week with occasional short interruptions due to maintenance or system problems, such as power failures or equipment failures. We will be required to have two website hosting operations for redundancy and load distribution, with two separate locations. Both of these hosting facilities will be required to be state-of-the-art with multiple redundancies for power and network components. Additionally, at each facility, our systems will be required to have redundant units such as multiple Web servers and databases. These systems are expensive and cause us a capital outlay which we currently do not have.

#### Competition

Each of our property listings, real estate products and services competes against a variety of internet and offline providers. Barriers to entry on the internet are relatively low; however, most other websites do not currently offer our proposed unique blend of extensive subprime or foreclosed listings, real estate based products and services and relevant content information. We anticipate facing significant competition in the future from new websites that offer the same emphasis on subprime listings and services and existing websites that introduce competing services.

#### Advertising Media

Our subprime listing services, when available, will compete against a number of websites that offer property listings and a number of websites posting electronic classified ads. We will also be competing with traditional media companies such as newspapers, print magazines specializing in real estate listings as well as television infomercials. Many of these traditional media competitors either alone or as part of a consortium have established or have announced plans to establish online sites incorporating their classified listings.

#### Content Offerings

Our content/information offering will compete with both internet and offline content providers. There are a number of websites that provide similar content. In addition, print content providers such as magazines, news programs and newspapers also provide similar content.

We believe that the principal competitive factors in attracting investors, private sellers, real estate services providers and advertisers should include:

- o a large volume of website traffic;
- o the demographics of subprime property purchasing investors; and
- o the cost effectiveness of advertising on a website, including the ability to target advertising to specific audiences.

We believe that the principal competitive factors in attracting investors to our website will be:

- o breadth and depth of subprime disadvantaged property listings;
- o ease of use;
- o website functionality, responsiveness and information;
- o a positive experience for the consumer; and
- o quality of content, other service offerings and customer service.

#### Employees

We are a development stage company and currently have one part-time employee, Molly Country. Ms. Country serves as our President, Treasurer, director and founding shareholder. She currently devotes approximately 10-15 hours a week to Subprime Advantage. We look to Ms. Country for her entrepreneurial skills and talents. It is Ms. Country who provided us our business plan. For a discussion of Ms. Country's experience, please see "Director, Executive Officers, Promoters and Control Persons."

Initially, Ms. Country coordinated all of our business operations and provided the working capital to cover our initial expense.

Ms. Country is spending the time allocated to our business in handling the general business affairs of our company such as accounting issues, including review of materials presented to our auditors, working with our counsel in preparation of our periodic filings with the SEC, and developing our business plan and overseeing the technological aspects of our business, including the analysis of various software companies capable of generating the type of software we require.

We plan to use consultants, attorneys, accountants, and technology personnel, as necessary and do not plan to engage any additional full-time employees in the near future. We believe the use of non-salaried personnel allows us to expend our capital resources as a variable cost as opposed to a fixed cost of operations. In other words, if we have insufficient revenues or cash available, we are in a better position to only utilize those services required to generate revenues as opposed to having salaried employees. We may hire marketing employees based on the projected size of the market and the compensation necessary to retain qualified sales employees; however we do not intend to hire these individuals within the next twelve months. A portion of any employee compensation likely would include the right to acquire our stock, which would dilute the ownership interest of holders of existing shares of our common stock.

#### Available Information

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended. All of our reports are able to be reviewed through the SEC's Electronic Data Gathering Analysis and Retrieval System (EDGAR) which is publicly available through the SEC's website (<http://www.sec.gov>).

We intend to furnish to our stockholders annual reports containing financial statements audited by our independent certified public accountants and quarterly reports containing reviewed unaudited interim financial statements for the first three-quarters of each fiscal year. You may contact the Securities and Exchange Commission at (800) SEC-0330 or you may read and copy any reports, statements or other information that we file with the Securities and Exchange Commission at the Securities and Exchange Commission's public reference room at the following location:

Public Reference Room  
100 F. Street, N.W.  
Washington, D.C. 20549-0405  
Telephone: (800) SEC-0330

ITEM 1A. RISK FACTORS

In the normal course of business, our financial position will routinely be subjected to a variety of risks, including market risks associated with marketing, technology developments, competitive forces, and government regulatory actions. You should carefully consider the risks and uncertainties described in the sections below. Our actual results could differ materially from projected results due to some or all of the factors discussed below.

Risks Relating to Our Business and Marketplace

We are a development stage company organized in December 2009 and have recently commenced operations, which makes an evaluation of us extremely difficult. At this stage of our business operations, even with our good faith efforts, we may never become profitable or generate any significant amount of revenues, thus potential investors have a high probability of losing their investment.

We were incorporated in December of 2009 as a Nevada corporation. As a result of our start-up operations we have; (i) generated no revenues, (ii) accumulated deficits of \$60,664 as of December 31, 2010, and (iii) we have incurred losses of \$60,664 from our inception through the year ended December 31, 2010. We have been focused on organizational and start-up activities and business plan development. There is nothing at this time on which to base an assumption that our business operations will prove to be successful or that we will ever be able to operate profitably. Our future operating results will depend on many factors, including our ability to raise adequate working capital, demand for our products, the level of our competition and our ability to attract and maintain key management and employees.

Our auditor's have substantial doubt about our ability to continue as a going concern. Additionally, our auditor's report reflects the fact that the ability of the Company to continue as a going concern is dependent upon our ability to raise additional capital from the sale of common stock and, ultimately the achievement of significant operating revenues. If we are unable to continue as a going concern, you will lose your investment.

Although we have commenced the development of an interactive website, there is nothing at this time on which to base an assumption that our business operations will prove to be successful or that we will ever be able to operate profitably. Our future operating results will depend on many factors, including our ability to raise adequate working capital, demand for our service, the level of our competition and our ability to attract and maintain key management and employees which include skilled information technology experts. Additionally, our auditor's report reflects that the ability of Subprime Advantage, Inc., to continue as a going concern is dependent upon its ability to raise additional capital from the sale of common stock and, ultimately, the achievement of significant operating revenues. If we are unable to continue as a going concern, you will lose your investment. You should not invest in this offering unless you can afford to lose your entire investment.

We are significantly dependent on our officer and director, who has limited experience. The loss or unavailability to Subprime Advantage, Inc., of Ms. Country's services would have an adverse effect on our business, operations and prospects in that we may not be able to obtain new management under the same financial arrangements, which could result in a loss of your investment.

Our business plan is significantly dependent upon the abilities and continued participation of Molly Country, our president. It would be difficult to replace Ms. Country at such an early stage of development of Subprime Advantage, Inc. The loss by or unavailability to Subprime Advantage, Inc., of Ms. Country's services would have an adverse effect on our business, operations and prospects, in that our inability to replace Ms. Country could result in the loss of one's investment. There can be no assurance that we would be able to locate or employ personnel to replace Ms. Country, should her services be discontinued. In the event that we are unable to locate or employ personnel to replace Ms. Country, then, in that event we would be required to cease pursuing our business opportunity, which would result in a loss of your investment.

Ms. Country has no experience in running a public company. The lack of experience in operating a public company could impact our return on investment, if any.

As a result of our reliance on Ms. Country, and her lack of experience in operating a public company, or experience in our industry or in certain aspects of the business we intend to create, our investors are at risk in losing their entire investment. Ms. Country intends to hire personnel in the future, when sufficiently capitalized, who would have the experience required to manage our company, such management is not anticipated until the occurrence of future financing. Since this offering will not sufficiently capitalize our company, future offerings will be necessary to satisfy capital needs. Until such a future offering occurs, and until such management is in place, we are reliant upon Ms. Country to make the appropriate management decisions.

Ms. Country is involved with other businesses and there can be no assurance that she will continue to provide services to us.

As compared to many other public companies, we do not have the depth of managerial or technical personnel. Ms. Country is currently involved in other businesses.

Ms. Country's limited time devotion to Subprime Advantage, Inc., could have the effect on our operations of preventing us from being a successful business operation, which ultimately could cause a loss of your investment.

Ms. Country may in the future be involved with additional businesses and there can be no assurance that she will continue to provide services to us. Ms. Country currently devotes only a portion of her time to our activities.

Since one stockholder, beneficially owns the majority of our outstanding common shares, this single stockholder will retain the ability to control our management and the outcome of corporate actions requiring stockholder approval notwithstanding the overall opposition of our other stockholders. This concentration of ownership could discourage or prevent a potential takeover of our company that might negatively impact the value of your common shares.

Ms. Country owns approximately 52% of our outstanding common shares after completion of the offering. As a consequence of her stock ownership position, Ms. Country will retain the ability to elect a majority of our board of directors, and thereby control our management. This individual will also initially have the ability to control the outcome of corporate actions requiring stockholder approval, including mergers and other changes of corporate control, going private transactions, and other extraordinary transactions. The concentration of ownership by this individual could discourage investments in our company, or prevent a potential takeover of our company which will have a negative impact on the value of our securities.

As a result of Ms. Country's majority ownership of our outstanding common shares after this offering, Ms. Country controls our issuance of securities after the offering.

As a consequence of Ms. Country's controlling stock ownership position, acting alone she is able to authorize the issuance of securities that may dilute and otherwise adversely affect the rights of purchasers of stock in the offering. Additionally, she may authorize the issuance of these securities to anyone she wishes, including herself and her affiliates at prices significantly less than the offering price.

Because of competitive pressures from competitors with more resources, Subprime Advantage, Inc., may fail to implement its business model profitably.

The business of real estate is a very risky venture. Even though we believe a strong business plan is in place, our plan may fail due to a continued decrease in market values, as well as the continued effects of the current recession.

We will require additional financing in order to implement our business plan. In the event we are unable to acquire additional financing, we may not be able to implement our business plan resulting in a loss of revenues and ultimately the loss of your investment.

Due to our very recent start-up nature, we will have to incur the costs of website and information development. To fully implement our business plan we will require substantial additional funding. This initial offering, will only enable us to commence our initial website development, and will assist us in further developing our initial business operations, including the development of a web-based consulting and listing service, and will not be sufficient to allow us to expand our business meaningfully. Additionally, since the net offering proceeds have been earmarked for accounting, legal, and minimal working capital, we will not be capitalized sufficiently to hire or pay employees.

We will need to raise additional funds to expand our operations. We plan to raise additional funds through private placements, registered offerings, debt financing or other sources to maintain and expand our operations. Adequate funds for this purpose on terms favorable to us may not be available, and if available, on terms significantly more adverse to us than are manageable. Without new funding, we may be only partially successful or completely unsuccessful in implementing our business plan, and our stockholders will lose part or all of their investment.

If we fail to remain current on our reporting requirements, we could be removed from the OTC Bulletin Board which would limit the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market.

Companies trading on the OTC Bulletin Board, such as us, must be reporting issuers under Section 12 of the Securities Exchange Act of 1934, as amended, and must be current in their reports under Section 13, in order to maintain price quotation privileges on the OTC Bulletin Board. More specifically, NASD has enacted Rule 6530, which determines eligibility of issuers quoted on the OTC Bulletin Board by requiring an issuer to be current in its filings with the Commission. Pursuant to Rule 6530(e), if we file our reports late with the Commission three times in a two-year period or our securities are removed from the OTC Bulletin Board for failure to timely file twice in a two-year period then we will be ineligible for quotation on the OTC Bulletin Board. As a result, the market liquidity for our securities could be severely adversely affected by limiting the ability of broker-dealers to sell our securities and the ability of stockholders to sell their securities in the secondary market.

Because our common stock is deemed a low-priced “Penny” stock, an investment in our common stock should be considered high risk and subject to marketability restrictions.

Since our common stock is a penny stock, as defined in Rule 3a51-1 under the Securities Exchange Act, it will be more difficult for investors to liquidate their investment even if and when a market develops for the common stock. Until the trading price of the common stock rises above \$5.00 per share, if ever, trading in the common stock is subject to the penny stock rules of the Securities Exchange Act specified in rules 15g-1 through 15g-10. Those rules require broker-dealers, before effecting transactions in any penny stock, to:

- Deliver to the customer, and obtain a written receipt for, a disclosure document;
- Disclose certain price information about the stock;
- Disclose the amount of compensation received by the broker-dealer or any associated person of the broker-dealer;
- Send monthly statements to customers with market and price information about the penny stock; and
- In some circumstances, approve the purchaser’s account under certain standards and deliver written statements to the customer with information specified in the rules.

Consequently, the penny stock rules may restrict the ability or willingness of broker-dealers to sell the common stock and may affect the ability of holders to sell their common stock in the secondary market and the price at which such holders can sell any such securities. These additional procedures could also limit our ability to raise additional capital in the future.

Our internal controls may be inadequate, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Exchange Act Rule 13a-15(f), internal control over financial reporting is a process designed by, or under the supervision of, the principal executive and principal financial officer and effected by the board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that: (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of Subprime Advantage, Inc.; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Subprime Advantage, Inc., are being made only in accordance with authorizations of management and directors of Subprime Advantage, Inc., and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Subprime Advantage's assets that could have a material effect on the financial statements.

We have one individual performing the functions of all officers and directors. This individual caused the development of our internal control procedures and is responsible for monitoring and ensuring compliance with those procedures. As a result, our internal controls may be inadequate or ineffective, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public. Investors relying upon this misinformation may make an uninformed investment decision.

We have received three loans from Molly Country which incurs liabilities on the company.

In response to three separate loans, we have signed three promissory notes, all payable to Molly Country for \$3,000, \$5,000 and \$1,000 with 6% interest a year, for each note. They are all payable in one lump sum. The first note of \$3,000 is due on or before June 7, 2013, with the second note of \$5,000 will be due on or before July 13, 2013 and the third note of \$1,000 will be due on or before September 1, 2013. If at the time of re-payment we have insufficient funds, we will be in default and may seek to renegotiate the terms and may agree upon new notes with a higher or lower interest rate. Upon default, we may incur, and will be liable for, legal fees associated with the cost of collection. The \$3,000 has been designated to cover the payment of accounting and auditing fees. The \$5,000 has been designated to cover expenses associated with the property in Las Vegas. The \$1,000 has been utilized for general working capital.

The recent foreclosure freeze may likely have a material adverse impact on our business operations.

The recent "freeze" on home foreclosures will have a "cause and effect" relationship to the residential real estate market across the nation. The most damaging affects will be in the regions where prices increased the most in a period of economic growth prior to the "mortgage meltdown". As a result, our current and future property listings will most likely face an adverse impact because the property is located in Las Vegas, Nevada. This area is categorized as one where home values increased exponentially before the mortgage meltdown; therefore, this property could potentially be negatively affected.

The recent foreclosure freeze may also worry homebuyers with respect to the legality and legitimacy of the foreclosure process used by banks and other mortgage lenders.

Worried homebuyers may be concerned that homes are being foreclosed based on faulty data, amid allegations that documentation process was commonly found to contain unverified or false information to expedite the process. Consequently, foreclosure sales may become further depressed as prospective homebuyers opt for higher priced homes, due to concerns over the legitimacy of property titles and the right of home possession. This could potentially lead investors to take a more conservative investment approach, as former home owners and claimants will inevitably contest the legality of pending and previous completed foreclosures.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Office Premises

We currently maintain an office at 501 W. Broadway, Suite A-323, San Diego, CA 92101. Our officer provides office space at no cost to us. We do not believe that we will need to obtain additional office space at any time in the foreseeable future, approximately twelve months, until our business plan is more fully implemented.

As a result of our method of operations and business plan we do not require personnel other than Ms. Country to conduct our business. In the future we anticipate requiring additional office space and additional personnel; however, it is unknown at this time how much space or how many individuals will be required

ITEM 3. LEGAL PROCEEDINGS

We may, from time to time, be named as defendants in various judicial, regulatory, and arbitration proceedings in the future in the ordinary course of our business. The nature of such proceedings may involve large claims subjecting us to exposure, or may be routine customer complaints regarding less significant losses. We may also become subject to investigations or proceedings by governmental agencies, which can result in fines or other disciplinary action being imposed on us. Additionally, legal proceedings may be brought from time to time in the future. Although we do not believe that any currently pending matters will have a material, adverse effect on our business, in view of the inherent difficulty of predicting the outcome of legal proceedings, we cannot state with confidence what the eventual outcome of currently pending matters will be, what the timing of the ultimate resolution of these matters will be or what the eventual result in each pending matter will be.

PART II

ITEM MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER  
5. PURCHASES OF EQUITY SECURITIES

Market Information

On November 10, 2010, we were cleared for trading by the Financial Industry Regulatory Authority on the Over-the-Counter Bulletin Board under the symbol "SBPV." Our common stock is currently listed for trading on the Over-the-Counter Bulletin Board; however, trading has not commenced as of the date of this filing.

Holders of Common Stock

As of February 3, 2011, we had approximately 56 stockholders of record of the 1,158,000 shares outstanding.

Dividends

The payment of dividends is subject to the discretion of our Board of Directors and will depend, among other things, upon our earnings, our capital requirements, our financial condition, and other relevant factors. We have not paid or declared any dividends upon our common stock since our inception and, by reason of our present financial status and our contemplated financial requirements do not anticipate paying any dividends upon our common stock in the foreseeable future.

We have never declared or paid any cash dividends. We currently do not intend to pay cash dividends in the foreseeable future on the shares of common stock. We intend to reinvest any earnings in the development and expansion of our business. Any cash dividends in the future to common stockholders will be payable when, as and if declared by our Board of Directors, based upon the Board's assessment of:

- our financial condition;
  - earnings;
  - need for funds;
  - capital requirements;
- prior claims of preferred stock to the extent issued and outstanding; and
  - other factors, including any applicable laws.

Therefore, there can be no assurance that any dividends on the common stock will ever be paid.

Issuer Purchases of Equity Securities

The Company did not repurchase any of its equity securities during the fourth quarter ended December 31, 2010.

## Recent Sales of Unregistered Securities

### Use of Proceeds

On February 11, 2010, we filed a Registration Statement with the Securities and Exchange Commission wherein we registered 500,000 shares of our common stock. Our Registration went effective on August 16, 2010, and as of September 17, 2010 we had completed our offering through the sale of 500,000 shares of our common stock, resulting in gross proceeds of \$50,000.

The amount of expenses incurred in connection with the issuance and distribution of the securities is \$9,300. Of which include \$5,000 in legal fees, \$300 in copying costs, \$1,000 for SEC and state filing fees, \$2,000 for audit fees and \$1,000 for accounting fees

The net offering proceeds to the issuer after deducting the total expenses is \$40,700.

## ITEM 6. SELECTED FINANCIAL DATA

Not applicable.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Except for the historical information, the following discussion contains forward-looking statements that are subject to risks and uncertainties. We caution you not to put undue reliance on any forward-looking statements, which speak only as of the date of this report. Our actual results or actions may differ materially from these forward-looking statements for many reasons, including the risks described in "Risk Factors" and elsewhere in this annual report. Our discussion and analysis of our financial condition and results of operations should be read in conjunction with the financial statements and related notes and with the understanding that our actual future results may be materially different from what we currently expect.

### Business Development

Subprime Advantage, Inc. is a development stage company incorporated in the State of Nevada in December of 2009. We were formed to provide information to owners of distressed properties on the brink of foreclosure, as well as bring potential investors and sellers together in an informative, logical situation. In addition, the process of acquiring information on distressed properties, or properties with subprime mortgages, or other types of investment opportunities, we may locate properties which may be acquisition candidates for us.

Since our inception on December 17, 2009 through December 31, 2010, we have not generated any revenues and have incurred a net loss of \$60,664. Since December of 2009, our only business activity was the formation of our corporate entity, the development of our business model, and the acquisition of our first subprime real estate property. We anticipate the commencement of generating revenues from our website ([www.subprimeadvantage.com](http://www.subprimeadvantage.com)) in the next twelve months, of which we can provide no assurance.

On November 5, 2010, we received notice from FINRA and our initial market maker that we were assigned the symbol “SBPV” to initiate trading on the Over-the-Counter Bulletin Board (OTC:BB). However, at this time, trading has yet to commence.

On December 31, 2010, the Company exercised its right of rescission pursuant to the termination provision of the Subprime Real Estate Contract and terminated the agreement.

#### How We Plan To Generate Revenue

First and foremost sellers of distressed, short-sale or foreclosed properties will be able to list their home on a bi-weekly basis for a minimal fee. We intend for there to be an option at which, the subscriber will be able to upgrade their listing with enhanced options for additional fees. Realtors who specialize in REO properties will have the capability to have a basic listing for a nominal monthly fee. For additional fees, enhanced listing services will also be available to realtors.

Our Strategy is to derive most of our revenues from fees we receive from our advertisers, in addition to revenues generated from the sale of properties we may acquire, and through rental income received from investment properties.

We plan to recognize as revenue the fees charged advertisers each time a user clicks on one of the text-based ads that will appear next to the search results on our website. In addition, we have signed up with Google AdSense and are allowing Google to display ads on our webpage on a “pay-per-click” basis.

#### What Factors Do We Believe Will Influence The Success Of Our Advertising Programs

- Our minimum fee per click – Undetermined at this time
- The total number of advertisers
- The rate at which people click on advertisements
- The relevance, objectivity and quality of our search results

We are also seeking opportunities in other areas of real estate investment opportunities, such as natural resources—primarily negotiating with property owners for resources such as oil and gas.

Results of Operations for the Year Ended December 31, 2010 and 2009.

#### Revenue

In the year ended December 31, 2010, we did not generate any revenues. Since our inception on December 17, 2009 through December 31, 2010, we did not generate any revenues. We anticipate that the current economic recession and foreclosure freeze may have a material adverse affect on our continuing operations. Furthermore, the “foreclosure freeze” may present a cause and effect relationship whereby the demand for foreclosed homes declines due to publicity related to procedural errors committed by institutional lenders.

### Costs and Expenses

Operating expenses totaled \$44,041 during the year ended December 31, 2010. Operating expenses consisted of general and administrative, executive compensation and professional fees in the year ended December 31, 2010.

Professional fees totaled \$35,380 from the year ended December 31, 2010 and \$16,200 during the year ended December 31, 2009. The increase in professional fees was due to the legal, Edgar and accounting fees related to our efforts to become a public reporting company. During the year ended December 31, 2010, the transfer agent fees increased by \$2,798 as compared to the year ended December 31, 2009 due to initial setup and printing costs.

General and administrative expenses totaled \$3,661 from the year ended December 31, 2010 and \$163 during the year ended December 31, 2009. During the year ended December 31, 2010, the Company recorded a loss on deposit of \$1,000 related to an option on the real estate property. During December 2010, the Company and the seller of the property mutually agreed to terminate the option.

During the year ended December 31, 2010, the Company had executive compensation of \$5,000 of which \$2,000 was paid in cash and \$3,000 was donated services by Molly Country. During the year ended December 31, 2009, there was no executive compensation.

### Liquidity and Capital Resources

The following table summarizes total current assets, total current liabilities and working capital at December 31, 2010 compared to December 31, 2009.

	December 31, 2010	December 31, 2009	Increase / (Decrease)	
			\$	%
Current Assets	\$ 29,318	\$ 6,000	\$ 23,318	388.63%
Current Liabilities	\$ 7,244	\$ 1,363	\$ 5,881	431.47%
Working Capital	\$ 22,074	\$ 4,637	\$ 17,437	376.04%

Liquidity is a measure of a company's ability to meet potential cash requirements. We have historically met our capital requirements through the issuance of stock and by borrowings. In the future, we anticipate we will be able to provide the necessary liquidity we need by the revenues generated from operations.

Since inception, we have financed our cash flow requirements through issuance of common stock and related party notes payable. As we expand our activities, we may, and most likely will, continue to experience net negative cash flows from operations, pending receipt of listings or some form of advertising revenues. Additionally, we anticipate obtaining additional financing to fund operations through common stock offerings, to the extent available, or to obtain additional financing to the extent necessary to augment our working capital. In the future we need to generate sufficient revenues from product sales in order to eliminate or reduce the need to sell additional stock or obtain additional loans. There can be no assurance we will be successful in raising the necessary funds to execute our business plan.

During the year ended December 31, 2010, the current assets increased by \$23,318 when compared to December 31, 2009 due to the cash proceeds received through the issuance of common stock. The Company received a total of \$50,000 from investors from the offering.

During the twelve months ended December 31, 2010, the current liabilities increased by \$5,881 when compared to December 31, 2009 due to the delay in payments to vendors and interest accrued on related party notes payable. Approximately \$6,984 of the balance in accounts payable is due to two vendors for accounting fees, Edgar fees and legal fees.

On April 1, 2010, we entered into a contract for the acquisition of a property in Las Vegas, Nevada, for an agreed price of \$50,000, subject to a condition subsequent that we were able to negotiate, with the current lender, a substantial reduction in the principal balance due on the first deed of trust. As a result of our inability to negotiate an acceptable discount on the first deed of trust, on December 31, 2010, we exercised our rights of rescission pursuant to paragraph 3(b) of the termination provision of the Subprime Real Estate Installment Contract.

Additionally, we have considered shifting our focus of property acquisition to take advantage of real estate opportunities pertaining to resources, which initially include oil and gas properties and leases.

We anticipate that we will incur operating losses in the next twelve months. Our lack of operating history makes predictions of future operating results difficult to ascertain. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their early stage of development, particularly companies in new and rapidly evolving markets. Such risks for us include, but are not limited to, an evolving and unpredictable business model and the management of growth. To address these risks, we must, among other things, obtain a customer base, implement and successfully execute our business and marketing strategy, continually develop and upgrade our website, provide national and regional industry participants with an effective, efficient and accessible website on which to promote their products and services through the Internet, respond to competitive developments, and attract, retain and motivate qualified personnel. There can be no assurance that we will be successful in addressing such risks, and the failure to do so can have a material adverse effect on our business prospects, financial condition and results of operations.

#### Off-balance Sheet Arrangements

The Company has no off-balance sheet arrangements and does not anticipate entering into any such arrangements in the foreseeable future.

#### Critical Accounting Policies

General – The preparation of financial statements in accordance with accounting standards generally accepted in the United States requires management to make estimates and assumptions that affect both the recorded values of assets and liabilities at the date of the financial statements and the revenues recognized and expenses incurred during the reporting period. Our estimates and assumptions affect our recognition of deferred expenses, income taxes, the carrying value of our long-lived assets and our provision for certain contingencies. We evaluate the reasonableness of these estimates and assumptions continually based on a combination of historical information and other information that comes to our attention that may vary our outlook for the future. Actual results may differ from these estimates under different assumptions.

Going Concern– The financial statements have been prepared on the basis of a going concern, which contemplates that we will be able to realize assets and discharge liabilities in the normal course of business. Accordingly, they do not give effect to adjustments that would be necessary should we be required to liquidate its assets. For the period from inception (December 17, 2009) to December 31, 2010, we have incurred a net loss of \$60,664. The ability of the Company to meet its total liabilities of \$16,244 and to continue as a going concern is dependent upon the availability of future funding and upon achieving profitable operations. If we are unable to continue as a going concern, there is uncertainty relative to full recoverability of its assets.

#### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosure is not applicable because Subprime is a smaller reporting company.

#### ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See Index to Financial Statements and Financial Statement Schedules appearing on page F-1 through F-11 of this Form 10-K.

#### ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

We have had no disagreements with our independent auditors on accounting or financial disclosures.

#### ITEM 9A (T). CONTROLS AND PROCEDURES

##### Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the specified time periods. As of the end of the period covered by this report, Molly Country, our Principal Executive Officer and Principal Accounting Officer evaluated the effectiveness of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based on their evaluation, which disclosed no significant deficiencies or material weaknesses, Mrs. Country, concluded that our disclosure controls and procedures are effective in timely alerting them to material information required to be included in our periodic SEC filings and in ensuring that information required to be disclosed by us in the reports that we file or submit under the Act is accumulated and communicated to our management or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

##### Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The members of our board of directors serve for one year terms and are elected at the next annual meeting of stockholders, or until their successors have been elected. The officers serve at the pleasure of the board of directors.

Information as to our current directors and executive officers is as follows:

Name	Age	Position	Since
Molly Country	60	President, Treasurer and Director	December 2009

Duties, Responsibilities and Experience

Molly Country. President, Secretary, Treasurer and Director; is the founder of Subprime Advantage from December 17, 2009 to present. Ms. Country attended San Diego State University and graduated with a BA in Philosophy. In 1977, she received her Master in Science and Counseling from University of California San Diego. Over the last 20 years, which include the last five, Ms. Country has been a full-time Business Manager and Chief Operating Officer for Goodrich Excavation a small excavation company based in Lake Tahoe, CA. Goodrich Excavation handles new construction projects as well as snow removal for the Lake Tahoe area. Her duties include, but are not limited to, managing the operation budget, scheduling projects, accounting and payroll as well as employee management and marketing. Ms. Country also maintains all service schedules for company machinery including snow plows, front end loaders and tractor-trailers. Her skills in bookkeeping, payroll management, oversight of personnel and project cost analysis developed during her management experience at Goodrich Excavation have led us to the conclusion that she would be capable to serve as our Director. For further clarification, Goodrich Excavation is not a parent, subsidiary or other affiliate of Subprime Advantage Inc.

Compensation

Ms. Country, our Principal Executive Officer (PEO) has received \$2,000 as compensation for her time put forth in the formation of the corporation, as well as the design and launching of the initial website, property research and acquisition. During the year ended December 31, 2010, the Company had executive compensation of \$5,000 of which \$2,000 was paid in cash and \$3,000 was donated services by Molly Country.

Future Compensation

Ms. Country has agreed to provide services to us with minimal compensation until such time as either we have earnings from our revenue, if any, or when the \$100,000 is raised in Stage III of our plan of operation, at which time we will pay Ms. Country a minimum salary of \$25,000 per year.

#### Indemnification of Directors and Officers

Our Articles of Incorporation and Bylaws both provide for the indemnification of our officers and directors to the fullest extent permitted by Nevada law.

#### Limitation of Liability of Directors

Pursuant to the Nevada General Corporation Law, our Articles of Incorporation exclude personal liability for our Directors for monetary damages based upon any violation of their fiduciary duties as Directors, except as to liability for any breach of the duty of loyalty, acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, or any transaction from which a Director receives an improper personal benefit. This exclusion of liability does not limit any right which a Director may have to be indemnified and does not affect any Director's liability under federal or applicable state securities laws. We have agreed to indemnify our directors against expenses, judgments, and amounts paid in settlement in connection with any claim against a Director if he acted in good faith and in a manner he believed to be in our best interests.

#### Election of Directors and Officers

Directors are elected to serve until the next annual meeting of stockholders and until their successors have been elected and qualified. Officers are appointed to serve until the meeting of the Board of Directors following the next annual meeting of stockholders and until their successors have been elected and qualified.

#### Audit Committee

We do not have an Audit Committee; our board of directors performs some of the same functions of an Audit Committee, such as: recommending a firm of independent certified public accountants to audit the annual financial statements; reviewing the independent auditor's independence, the financial statements and their audit report; and reviewing management's administration of the system of internal accounting controls. The Company does not currently have a written audit committee charter or similar document.

We have no financial expert. We believe the cost related to retaining a financial expert at this time is prohibitive. Further, because of our start-up operations, we believe the services of a financial expert are not warranted.

#### Nominating Committee

We do not have a Nominating Committee or Nominating Committee Charter. Our board of directors performs some of the functions associated with a Nominating Committee. We have elected not to have a Nominating Committee in that we are a development stage company with limited operations and resources.

## ITEM 11. EXECUTIVE COMPENSATION

## Overview of Compensation Program

The Board of directors has responsibility for establishing, implementing and continually monitoring adherence with the Company's compensation philosophy. The Board ensures that the total compensation paid to the executives is fair, reasonable and competitive. We do not currently have a compensation committee.

## Compensation Philosophy and Objectives

The Board believes that the most effective executive compensation program is one that is designed to reward the achievement of specific annual, long-term and strategic goals by the Company, and which aligns executives' interests with those of the stockholders by rewarding performance above established goals, with the ultimate objective of improving stockholder value. As a result of the size of the Company and only having one executive officer, the Board evaluates both performance and compensation on an informal basis. Upon hiring additional executives, the Board intends to establish a Compensation Committee to evaluate both performance and compensation to ensure that the Company maintains its ability to attract and retain superior employees in key positions and that compensation provided to key employees remains competitive relative to the compensation paid to similarly-situated executives of our peer companies. To that end, the Board believes executive compensation packages provided by the Company to its executives, including the named executive officers, should include both cash and stock-based compensation that reward performance as measured against established goals.

## Role of Executive Officers in Compensation Decisions

The Board makes all compensation decisions for the Executives and approves recommendations regarding equity awards to all elected officers of the Company. Decisions regarding the non-equity compensation of other executive officers are made by management.

## SUMMARY COMPENSATION TABLE

The table below summarizes the total compensation paid or earned by our sole executive officer, Molly Country, since our inception December 31, 2010.

## SUMMARY COMPENSATION TABLE

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Molly Country, CEO/President/Treasurer/Director	2010	2,000	0	0	0	0	0	0	2,000
	2009	0	0	6,000	0	0	0	0	6,000

(1) Amount represents the estimated total fair market value of 600,000 shares of common stock issued for services as an employee, officer and director under ASC Topic 718.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table presents information, to the best of the Company's knowledge, about the beneficial ownership of its common stock on February 15, 2011, relating to the beneficial ownership of the Company's common stock by those persons known to beneficially own more than 5% of the Company's capital stock and by its directors and executive officers. The percentage of beneficial ownership after the offering for the following table is based on 1,158,000 shares of common stock outstanding.

"Beneficial ownership means the sole or shared power to vote or to direct the voting of, a security, or the sole or shared investment power with respect to a security (i.e., the power to dispose of or to direct the disposition of, a security). In addition, for purposes of this table, a person is deemed, as of any date, to have "beneficial ownership" of any security that such person has the right to acquire within 60 days from the date of this filing.

Name of Beneficial Owner	Number Of Shares	Percent Before Offering	Percent After Offering
Molly Country	600,000	91%	52%
Stoecklein Law Group	58,000	9%	5%

All Directors, Officers and 658,000 100% 57%  
Principle Stockholders as a  
Group

(1) Donald J. Stoecklein is the natural person that has voting and investment control over the shares beneficially owned by Stoecklein Law Group.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

On June 7, 2010, Molly Country, the sole Director of the Company, loaned the Company \$3,000. The loan bears a 6% interest rate and is due upon demand but cannot be demanded before June 2013. The \$3,000 was designated to cover the payment of accounting and auditing fees

On July 13, 2010, Ms. Country, made an additional loan to the Company \$5,000. The loan bears a 6% interest rate and is due upon demand but cannot be demanded before July 2013. The \$5,000 was designated to cover expenses associated with the property in Las Vegas

On September 1, 2010, Ms. Country, made an additional loan to the Company \$1,000. The loan bears a 6% interest rate and is due upon demand but cannot be demanded before September 2013. The \$1,000 was utilized for general working capital.

Director Independence

The Board of Directors has not made the determination if any of its Directors are considered independent directors in accordance with the director independence standards of the American Stock Exchange. Therefore, as of the date of this filing, each director should be considered as non-independent.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

We engaged De Joya Griffith & Company LLC, Certified Public Accountants & Consultants (“De Joya”) to serve as our independent auditors for the year ended December 31, 2010 and 2009.

(1) AUDIT FEES

The aggregate fees billed by De Joya for professional services rendered for the audits of our financial statements for 2010 and 2009, and for the review of the financial statements included in our quarterly reports on Form 10-Q filed with the SEC for 2010 were approximately \$8,000.

The aggregate fees billed for professional services rendered by De Joya Griffith & Company, LLC, CPA P.C., for the audit of our annual financial statements and review of the financial statements included in our quarterly reports on Form 10-Q or services that are normally provided in connection with statutory and regulatory filings with the SEC for 2009 were \$0.

(2) AUDIT-RELATED FEES

None.

(3) TAX FEES

None.

(4) ALL OTHER FEES

None.

(5) AUDIT COMMITTEE POLICIES AND PROCEDURES

We do not have an audit committee.

(6) If greater than 50 percent, disclose the percentage of hours expended on the principal accountant's engagement to audit the registrant's financial statements for the most recent year that were attributed to work performed by persons other than the principal accountant's full-time, permanent employees.

Not applicable.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

- (a)
- i. The financial statements listed in the “Index to Financial Statements” on page 41 are filed as part of this report.
  - ii. Financial statement schedules are omitted because they are not applicable or the required information is shown in the financial statements or notes thereto.

iii. Exhibits included or incorporated herein: See index to Exhibits.

(b) Exhibits

Exhibit Number	Exhibit Description	Filed herewith	Incorporated by reference

De Joya Griffith & Company, LLC

CERTIFIED PUBLIC ACCOUNTANTS & CONSULTANTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders  
Subprime Advantage, Inc.

We have audited the accompanying balance sheets of Subprime Advantage, Inc. (A Development Stage Company) as of December 31, 2010 and 2009, and the related statements of operations, stockholders' equity, and cash flows for the years ended December 31, 2010 and 2009 and from inception (December 17, 2009) to December 31, 2010. Subprime Advantage, Inc.'s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over the financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Subprime Advantage, Inc. (A Development Stage Company) as of December 31, 2010 and 2009, and the results of its operations and its cash flows for the years ended December 31, 2010 and 2009 and from inception (December 17, 2009) to December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company has suffered recurring losses from operations, which raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.
