**VECTREN UTILITY HOLDINGS, INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

1. Organization and Nature of Operations

Vectren Utility Holdings, Inc. (Utility Holdings or the Company), an Indiana corporation, serves as the intermediate holding company for Vectren Corporation's (Vectren) three operating public utilities: Indiana Gas Company, Inc. (Indiana Gas or Vectren North), Southern Indiana Gas and Electric Company (SIGECO or Vectren South), and the Ohio operations. Utility Holdings also has other assets that provide information technology and other services to the three utilities. Vectren is an energy holding company headquartered in Evansville, Indiana. Vectren and Utility Holdings are holding companies as defined by the Energy Policy Act of 2005.

Indiana Gas provides energy delivery services to approximately 562,000 natural gas customers located in central and southern Indiana. SIGECO provides energy delivery services to approximately 140,000 electric customers and approximately 112,000 gas customers located near Evansville in southwestern Indiana. SIGECO also owns and operates electric generation to serve its electric customers and optimizes those assets in the wholesale power market. Indiana Gas and SIGECO generally do business as Vectren Energy Delivery of Indiana. The Ohio operations provide energy delivery services to approximately 318,000 natural gas customers located near Dayton in west central Ohio. The Ohio operations are owned as a tenancy in common by Vectren Energy Delivery of Ohio, Inc. (VEDO), a wholly owned subsidiary, (53% ownership) and Indiana Gas (47% ownership). The Ohio operations generally do business as Vectren Energy Delivery of Ohio.

2. Basis of Presentation

The interim consolidated condensed financial statements included in this report have been prepared by the Company, without audit, as provided in the rules and regulations of the Securities and Exchange Commission. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted as provided in such rules and regulations. The Company believes that the information in this report reflects all adjustments necessary to fairly state the results of the interim periods reported. These consolidated condensed financial statements and related notes should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended December 31, 2005, filed March 2, 2006 on Form 10-K. Certain 2005 amounts have been reclassified to conform to the 2006 presentation. These reclassifications had no impact on reported net income. Because of the seasonal nature of the Company's utility operations, the results shown on a quarterly basis are not necessarily indicative of annual results.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

3. Subsidiary Guarantor and Consolidating Information

The Company's three operating utility companies, SIGECO, Indiana Gas, and VEDO, are guarantors of Utility Holdings' \$515.0 million in short-term credit facilities, of which \$227.6 million is outstanding at September 30, 2006, and Utility Holdings' \$700.0 million unsecured senior notes outstanding at September 30, 2006. The guarantees are full and unconditional and joint and several, and Utility Holdings has no subsidiaries other than the subsidiary guarantors. However, as described in Note 1, Utility Holdings does have operations other than those of the subsidiary guarantors. Pursuant to Article 3-10 of Regulation S-X, disclosure of the results of operations and balance sheets of

the subsidiary guarantors separate from the parent company's operations is required. Following are consolidating financial statements including information on the combined operations of the subsidiary guarantors separate from the other operations of the parent company.

Table of Contents

4. Transactions with Other Vectren Companies

Support Services and Purchases

Vectren provides corporate and general and administrative services to the Company including legal, finance, tax, risk management and human resources, which includes charges for share-based compensation and for pension and other postretirement benefits not directly charged to subsidiaries. These costs have been allocated using various allocators, primarily number of employees, number of customers and/or revenues. Allocations are based on cost. Utility Holdings received corporate allocations totaling \$17.7 million and \$20.4 million for the three months ended September 30, 2006 and 2005, respectively. Utility Holdings received corporate allocations totaling \$58.4 million and \$63.4 million for the nine months ended September 30, 2006 and 2005, respectively.

Purchases from Vectren Fuels

Vectren Fuels, Inc., a wholly owned subsidiary of Vectren, owns and operates coal mines from which SIGECO purchases fuel used for electric generation. The Company has a letter agreement on file with the IURC regarding the price of coal that is charged by Fuels to SIGECO. Amounts paid for such purchases for the three months ended September 30, 2006 and 2005, totaled \$28.9 million and \$25.7 million, respectively. Amounts paid for such purchases for the nine months ended September 30, 2006 and 2005, totaled \$91.4 million and \$74.0 million, respectively. Amounts owed to Vectren Fuels at September 30, 2006, and December 31, 2005, were \$4.7 million and \$5.7 million, respectively, and are included in *Payables to other Vectren companies*.

Purchases from Miller Pipeline

Effective July 1, 2006, Vectren Corporation purchased from Duke Energy Corporation (Duke) its 50% ownership in Miller Pipeline Corporation (Miller), making Miller a wholly owned subsidiary of Vectren Corporation. Miller, originally founded in 1953, performs natural gas and water distribution, transmission, and construction repair and rehabilitation primarily in the Midwest and the repair and rehabilitation of gas, water, and waste water facilities nationwide. Miller's customers include Vectren's utilities.

Amounts paid by Utility Holdings to Miller for purchases of utility plant and other services for the three months ended September 30, 2006 and 2005, totaled \$5.0 million and \$3.7 million, respectively. Amounts paid for the nine months ended September 30, 2006 and 2005, totaled \$13.5 million and \$10.1 million, respectively. Amounts owed to Miller at September 30, 2006, and December 31, 2005, for those purchases were \$2.1 million and \$2.0 million, respectively. As of September 30, 2006, amounts owed to Miller are included in *Payables to other Vectren companies*. As of December 31, 2005, amounts owed to Miller are included in *Accounts payable to affiliated companies*.

Share-Based Incentive Plans

On January 1, 2006, the Company adopted SFAS 123R "Share Based Compensation" (SFAS 123R) using the modified prospective method. Prior to the adoption of SFAS 123R, the Company accounted for these programs using APB Opinion 25, "Accounting for Stock Issued to Employees" (APB 25), and its related interpretations. The effect of the adoption of SFAS 123R was not material to the Company's operating results or financial condition.

Utility Holdings does not have share-based compensation plans separate from Vectren. An insignificant number of Utility Holdings' employees participate in Vectren's share-based compensation plans.

5. ProLiance Energy, LLC

ProLiance Energy, LLC (ProLiance), a nonutility energy marketing affiliate of Vectren and Citizens Gas and Coke Utility (Citizens Gas), provides services to a broad range of municipalities, utilities, industrial operations, schools, and healthcare institutions located throughout the Midwest and Southeast United States. ProLiance's customers include Vectren's utilities and nonutility gas supply operations as well as Citizens Gas. ProLiance's primary businesses include gas marketing, gas portfolio optimization, and other portfolio and energy management services.

Transactions with ProLiance

The Company contracted for approximately 71% of its natural gas purchases through ProLiance during the nine months ended September 30, 2006. In the period ended September 30, 2005, the Company contracted for all of its natural gas purchases through ProLiance. Purchases from ProLiance for resale and for injections into storage for the three months ended September 30, 2006 and 2005, totaled \$107.2 million and \$190.2 million, respectively, and for the nine months ended September 30, 2006 and 2005, totaled \$451.2 million and \$600.4 million, respectively. Amounts owed to ProLiance at September 30, 2006, and December 31, 2005, for those purchases were \$29.8 million and \$137.4 million, respectively, and are included in *Accounts payable to affiliated companies*. Amounts charged by ProLiance for gas supply services are established by supply agreements with each utility.

Table of Contents

The Company received regulatory approval on April 25, 2006, from the IURC for ProLiance to provide natural gas supply services to the Indiana utilities through March 2011.

ProLiance has not provided gas supply/portfolio administration services to VEDO since October 31, 2005. In response to a June 2005 PUCO order, VEDO solicited bids for those services and selected a third party provider using annual contracts since October 31, 2005.

6. Financing Activities

Subsequent Event

In October 2006, Utility Holdings issued \$100 million in 5.95% senior unsecured notes due October 1, 2036 (2036 Notes). The 30-year notes were priced at par. The 2036 Notes are guaranteed by Indiana Gas Company, Inc., Southern Indiana Gas and Electric Company and Vectren Energy Delivery of Ohio, Inc.

The 2036 Notes have no sinking fund requirements, and interest payments are due quarterly. The notes may be called by Utility Holdings, in whole or in part, at any time on or after October 1, 2011, at 100% of principal amount plus accrued interest. During the first and second quarters of 2006, Utility Holdings entered into several interest rate hedges with a \$100 million notional amount. Upon issuance of the notes, these instruments were settled resulting in the payment of approximately \$3.3 million, which was recorded as a *Regulatory asset* pursuant to existing regulatory orders. The value paid is being amortized as an increase to interest expense over the life of the issue.

The proceeds from the sale of the 2036 Notes, settlement of the hedging arrangements, and payments of issuance costs totaled approximately \$92.8 million. These proceeds were used to repay most of the \$100 million outstanding balance of Utility Holdings' 7.25% Senior Notes originally due October 15, 2031. These notes were redeemed on October 19, 2006 at par plus accrued interest.

Remarketing Transaction

At December 31, 2005, \$53.7 million of notes could be put to the Company in March of 2006, the date of their next remarketing. In March of 2006, the notes were successfully remarketed, and are now classified in *Long-term debt*. Prior to the remarketing, the notes had tax exempt interest rates ranging from 4.75% to 5.00%. After the remarketing, interest rates are reset every seven days using an auction process.

7. Commitments & Contingencies

The Company is party to various legal proceedings arising in the normal course of business. In the opinion of management, there are no legal proceedings, except those discussed herein, pending against the Company that are likely to have a material adverse effect on its financial position, results of operations or cash flows.

8. Environmental Matters

Clean Air Interstate Rule & Clean Air Mercury Rule

In March of 2005 USEPA finalized two new air emission reduction regulations. The Clean Air Interstate Rule (CAIR) is an allowance cap and trade program requiring further reductions in Nitrogen Oxides (NO_x) and Sulfur Dioxide (SO₂) emissions from coal-burning power plants. The Clean Air Mercury Rule (CAMR) is an allowance cap and trade program requiring further reductions in mercury emissions from coal-burning power plants. Both sets of regulations require emission reductions in two phases. The first phase deadline for both rules is 2010 (2009 for NO_x under CAIR), and the second phase deadline for compliance with the emission reductions required under CAIR is 2015, while the second phase deadline for compliance with the emission reduction requirements of CAMR is 2018. The Company is evaluating compliance options and fully expects to be in compliance by the required deadlines.

Table of Contents

In February 2006, the IURC approved a multi-emission compliance plan filed by the Company's utility subsidiary, SIGECO. Once the plan is implemented, SIGECO's coal-fired plants will be 100% scrubbed for SO₂, 90% scrubbed for NO_x, and mercury emissions will be reduced to meet the new mercury reduction standards. The order, as previously agreed to by the OUCC and Citizens Action Coalition, allows SIGECO to recover an approximate 8% return on up to \$110 million in capital investments through a rider mechanism which is updated every six months for actual costs incurred. The Company will also recover through a rider its operating expenses, including depreciation, once the equipment is placed into service. The order also stipulates that SIGECO study renewable energy alternatives and include a carbon forecast in future filings with regard to new generation and further environmental compliance plans, among other initiatives. As of September 30, 2006, the Company has made capital investments of approximately \$38.8 million related to this environmental requirement.

Manufactured Gas Plants

In the past, Indiana Gas, SIGECO, and others operated facilities for the manufacture of gas. Given the availability of natural gas transported by pipelines, these facilities have not been operated for many years. Under currently applicable environmental laws and regulations, Indiana Gas, SIGECO, and others may now be required to take remedial action if certain byproducts are found above the regulatory thresholds at these sites.

Indiana Gas has identified the existence, location, and certain general characteristics of 26 gas manufacturing and storage sites for which it may have some remedial responsibility. Indiana Gas has completed a remedial investigation/feasibility study (RI/FS) at one of the sites under an agreed order between Indiana Gas and the IDEM, and a Record of Decision was issued by the IDEM in January 2000. Although Indiana Gas has not begun an RI/FS at additional sites, Indiana Gas has submitted several of the sites to the IDEM's Voluntary Remediation Program (VRP) and is currently conducting some level of remedial activities, including groundwater monitoring at certain sites, where deemed appropriate, and will continue remedial activities at the sites as appropriate and necessary.

In conjunction with data compiled by environmental consultants, Indiana Gas has accrued the estimated costs for further investigation, remediation, groundwater monitoring, and related costs for the sites. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, Indiana Gas has recorded costs that it reasonably expects to incur totaling approximately \$20.4 million.

The estimated accrued costs are limited to Indiana Gas' proportionate share of the remediation efforts. Indiana Gas has arrangements in place for 19 of the 26 sites with other potentially responsible parties (PRP), which serve to limit Indiana Gas' share of response costs at these 19 sites to between 20% and 50%.

With respect to insurance coverage, Indiana Gas has received and recorded settlements from all known insurance carriers in an aggregate amount approximating \$20.4 million.

Environmental matters related to manufactured gas plants have had no material impact on results of operations or financial condition since costs recorded to date approximate PRP and insurance settlement recoveries. While Indiana Gas has recorded all costs which it presently expects to incur in connection with activities at these sites, it is possible that future events may require some level of additional remedial activities which are not presently foreseen.

In October 2002, the Company received a formal information request letter from the IDEM regarding five manufactured gas plants owned and/or operated by SIGECO and not currently enrolled in the IDEM's VRP. In response, SIGECO submitted to the IDEM the results of preliminary site investigations conducted in the mid-1990's. These site investigations confirmed that based upon the conditions known at the time, the sites posed no imminent and/or substantial risk to human health or the environment.

On October 6, 2003, SIGECO filed applications to enter four of the manufactured gas plant sites in IDEM's VRP. The remaining site is currently being addressed in the VRP by another Indiana utility. SIGECO added those four sites into

the renewal of the global Voluntary Remediation Agreement that Indiana Gas has in place with IDEM for its manufactured gas plant sites. That renewal was approved by the IDEM on February 24, 2004. On July 13, 2004, SIGECO filed a declaratory judgment action against its insurance carriers seeking a judgment finding its carriers liable under the policies for coverage of further investigation and any necessary remediation costs that SIGECO may accrue under the VRP program. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, SIGECO has recorded costs that it reasonably expects to incur totaling approximately \$5.9 million. With respect to insurance coverage, SIGECO has received and recorded settlements from insurance carriers in an aggregate amount approximating the costs it expects to incur. Environmental matters related to manufactured gas plants have had no material impact on results of operations or financial condition since costs recorded to date approximate insurance settlement recoveries. While SIGECO has recorded all costs which it presently expects to incur in connection with activities at these sites, it is possible that future events may require some level of additional remedial activities which are not presently foreseen.

Table of Contents

9. Rate & Regulatory Matters

Vectren South (Southern Indiana Gas & Electric) Base Rate Filings

On September 1, 2006, Vectren Energy Delivery of Indiana, Inc. filed petitions with the IURC to adjust its electric and gas base rates in its South service territory. In the electric petition, the Company seeks to increase its electric rates by approximately \$77 million to recover the nearly \$120 million additional investment in electric utility infrastructure since its last base rate increase in 1995 that is not currently included in rates charged to customers. The increase in rates is also required to support system growth, maintenance, and reliability as well as to recover costs deferred under previous IURC rate orders.

In addition, the Company seeks to increase its gas base (non-gas cost) rates by approximately \$10 million to cover the ongoing cost of operating and maintaining its natural gas distribution and storage system. In the Company's 2004 gas rate adjustment petition, its first such petition since 1995, Vectren requested a \$14.7 million increase but settled the case for \$5.7 million. Since 1995, the Company's investment in its natural gas delivery infrastructure has increased more than \$30 million.

These filings begin a process that may conclude in the late summer or early fall of 2007 and will include public hearings.

IGCC Certificate of Public Convenience and Necessity

On September 7, 2006, Vectren Energy Delivery of Indiana and Duke Energy Indiana, Inc. filed with the IURC a joint petition for a Certificate of Public Convenience and Necessity (CPCN) for the construction of new electric capacity. Specifically, the Company requested the IURC approve its construction and ownership of up to 20% of the Integrated Gasification Combined Cycle (IGCC) project. The Company's CPCN filing also seeks timely recovery of its 20% portion of the project's construction costs as well as operation and maintenance costs and additional incentives available for the construction of clean coal technology. Initial studies of plant design have already begun, and if the project moves forward as currently designed, plant construction is expected to begin in 2007 and continue through 2011.

Ohio and Indiana Lost Margin Recovery/Conservation Filings

In 2005, the Company filed conservation programs and conservation adjustment trackers in Ohio and Indiana designed to help customers conserve energy and reduce their annual gas bills. The programs would allow the Company to recover costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism. This mechanism is designed to allow the Company to recover the distribution portion of its rates from residential and commercial customers based on the level of customer revenues established in each utility's last general rate case.

Ohio

In 2006, a settlement agreement between the Office of the Ohio Consumers Counsel (OCC), the Ohio Partners for Affordable Energy and the Company that provided for at least two years of comprehensive energy efficiency programs for Ohio customers was filed with the PUCO. On September 13, 2006, the PUCO approved the conservation proposal but modified the settlement. It established a two year, \$2 million total, low-income conservation program to be paid by the Company and a sales reconciliation rider intended to be a recovery mechanism for the difference between the revenues actually collected by the Company and the revenues approved in the Company's most recent rate case. The OCC has filed a petition for rehearing. The Company is proceeding to implement this order, which is effective for periods beginning October 1, 2006.

Table of Contents

Indiana

In 2006, the Company and the Indiana Office of Utility Consumer Counselor (OUCC) filed a settlement agreement with the Indiana Utility Regulatory Commission (IURC) that provides for a 5 year energy efficiency program to be implemented. If approved, the settlement would allow the Company to recover the costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism that would provide for recovery of 85% of the difference between revenues actually collected by the Company and the revenues approved in the Company's most recent rate case. A hearing before the IURC occurred on July 18, post hearing briefs were completed in August, and an order is anticipated in the fourth quarter of 2006.

Gas Cost Recovery (GCR) Audit Proceedings

On June 14, 2005, the PUCO issued an order disallowing the recovery of approximately \$9.6 million of gas costs relating to the two year audit period ended November 2002. That audit period provided the PUCO staff its initial review of the portfolio administration arrangement between VEDO and ProLiance. The disallowance includes approximately \$1.3 million relating to pipeline refunds and penalties and approximately \$4.5 million of costs for winter delivery services purchased by VEDO to ensure reliability over the two year period. The PUCO also held that ProLiance should have credited to VEDO an additional \$3.8 million more than credits actually received for the right to use VEDO's gas transportation capacity periodically during the periods when it was not required for serving VEDO's customers. The PUCO also directed VEDO to either submit its receipt of portfolio administration services to a request for proposal process or to in-source those functions. During 2003, the Company recorded a reserve of \$1.1 million for this matter. An additional pretax charge of \$4.2 million was recorded in *Cost of gas sold* in 2005. The reserve reflects management's assessment of the impact of the PUCO decisions, an estimate of any current impact that decision may have on subsequent audit periods, and an estimate of a sharing in any final disallowance by Vectren's partner in ProLiance.

VEDO filed its request for rehearing on July 14, 2005, and on August 10, 2005, the PUCO granted rehearing to further consider the \$3.8 million portfolio administration issue and all interest on the findings, but denied rehearing on all other aspects of the case. On October 7, 2005, the Company filed an appeal with the Ohio Supreme Court requesting that the \$4.5 million disallowance related to the winter delivery service issue be reversed. On December 21, 2005, the PUCO granted in part VEDO's rehearing request, and reduced the \$3.8 million disallowance related to portfolio administration to \$1.98 million. The Company has appealed the \$1.98 million disallowance to the Ohio Supreme Court as well. Briefings of all matters were completed by July 31, 2006, and oral argument will occur in November 2006.

With respect to the most recent GCR audit covering the period of November 1, 2002 through October 31, 2005, the PUCO staff recommended a disallowance of approximately \$830,000 related solely to the retention of a reserve margin for the winter of 2002/2003. The Company had previously reserved for this result given the June 2005 PUCO order. VEDO is contesting the disallowance, and a hearing will occur in November 2006.

As a result of the June 2005 PUCO order, the Company has established an annual bidding process for VEDO's gas supply and portfolio administration services. Since November 1, 2005, the Company has used a third party provider for these services.

Commodity Prices

Commodity prices for natural gas purchases have remained above historic levels and have become more volatile. Subject to compliance with applicable state laws, the Company's utility subsidiaries are allowed recovery of such changes in purchased gas costs from their retail customers through commission-approved gas cost adjustment mechanisms, and margin on gas sales are not expected to be impacted. Nevertheless, it is possible regulators may disallow recovery of a portion of gas costs for a variety of reasons, including, but not limited to, a finding by the regulator that natural gas was not prudently procured. In addition, as a result of this near term change in the natural gas commodity price, the Company's utility subsidiaries have been experiencing, and may continue to experience,

changes in interest expense due to volatile working capital requirements; changes in uncollectible accounts expense and unaccounted for gas; and some level of price sensitive variability in volumes sold or delivered.

Table of Contents

10. Impact of Recently Issued Accounting Guidance

SFAS No. 158

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)" (SFAS 158). This statement requires an employer to recognize the overfunded or underfunded status of defined benefit pension plans and postretirement plans (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position and requires disclosure in the notes to financial statements certain additional information related to net periodic benefit cost for the next fiscal year. SFAS 158 defines the funded status of a defined benefit plan as its assets less its projected benefit obligation and defines the funded status of a postretirement plan as its assets less its accumulated postretirement benefit obligation. Calendar year-end companies such as Vectren are required to adopt the recognition and disclosure provisions of FAS 158 as of December 31, 2006. The measurement date provisions are not required to be adopted until 2008. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This statement does not require any new fair value measurements; however, the standard will impact how other fair value based GAAP is applied. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years with early adoption encouraged. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

FIN 48

In June 2006, the FASB issued FASB Interpretation No. 48 (FIN 48) "Accounting for Uncertainty in Income Taxes" an interpretation of SFAS 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of tax positions taken or expected to be taken in an income tax return. FIN 48 also provides guidance related to reversal of tax positions, balance sheet classification, interest and penalties, interim period accounting, disclosure and transition. The interpretation is effective for fiscal years beginning after December 15, 2006. The Company is currently assessing the impact this interpretation will have on its financial statements and results of operations.

11. Segment Reporting

The Company's operations consist of regulated operations and other operations that provide information technology and other support services to those regulated operations. The Company segregates its regulated operations into a Gas Utility Services operating segment and an Electric Utility Services operating segment. The Gas Utility Services segment provides natural gas distribution and transportation services to nearly two-thirds of Indiana and to west central Ohio. The Electric Utility Services segment provides electric distribution services primarily to southwestern Indiana, and includes the Company's power generating and marketing operations. The Company cross manages its regulated operations as separated between Energy Delivery, which includes the gas and electric transmission and distribution functions, and Power Supply, which includes the power generating and marketing operations. In total, regulated operations supply natural gas and /or electricity to over one million customers. For these regulated operations the Company uses after tax operating income as a measure of profitability, consistent with regulatory reporting requirements. For Utility Holdings' other operations, net income is used as the measure of profitability. In total, there are three operating segments as defined by SFAS 131 "Disclosure About Segments of an Enterprise and Related Information" (SFAS 131).

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Description of the Business

Vectren Utility Holdings, Inc. (Utility Holdings or the Company), an Indiana corporation, serves as the intermediate holding company for Vectren Corporation's (Vectren) three operating public utilities: Indiana Gas Company, Inc. (Indiana Gas or Vectren North), Southern Indiana Gas and Electric Company (SIGECO or Vectren South), and the Ohio operations. Utility Holdings also has other assets that provide information technology and other services to the three utilities. Vectren is an energy holding company headquartered in Evansville, Indiana. Vectren and Utility Holdings are holding companies as defined by the Energy Policy Act of 2005.

Indiana Gas provides energy delivery services to approximately 562,000 natural gas customers located in central and southern Indiana. SIGECO provides energy delivery services to approximately 140,000 electric customers and approximately 112,000 gas customers located near Evansville in southwestern Indiana. SIGECO also owns and operates electric generation to serve its electric customers and optimizes those assets in the wholesale power market. Indiana Gas and SIGECO generally do business as Vectren Energy Delivery of Indiana. The Ohio operations provide energy delivery services to approximately 318,000 natural gas customers located near Dayton in west central Ohio. The Ohio operations are owned as a tenancy in common by Vectren Energy Delivery of Ohio, Inc. (VEDO), a wholly owned subsidiary, (53% ownership) and Indiana Gas (47% ownership). The Ohio operations generally do business as Vectren Energy Delivery of Ohio.

Executive Summary of Consolidated Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto.

Earnings were \$6.5 million for the quarter compared to \$8.9 million in the prior year quarter. The \$2.4 million decrease results primarily from reduced wholesale power marketing earnings and electric usage declines due primarily to mild summer weather compared to the prior year. For the nine months ended September 30, 2006, earnings have decreased \$7.8 million primarily as a result of decreased wholesale power marketing earnings as well as a decline in gas utility customer usage, due largely to price sensitivity. Higher depreciation and interest costs have affected both quarterly and year to date results compared to the prior year periods. On a year to date basis, those increases were largely offset by margin increases associated with higher gas base rate revenues, a 2005 Ohio gas cost disallowance, and higher electric revenues associated with recovery of pollution control investments. Also offsetting these cost increases in both the quarter and year to date periods is a lower effective tax rate.

Management estimates the impact of cooler than normal weather on electric margin for the quarter to be \$0.9 million unfavorable and \$3.6 million unfavorable quarter over quarter. For the nine months, management estimates the impact of cooler than normal weather to be \$1.5 million unfavorable and \$3.6 million unfavorable for the year over year period.

Year to date, management estimates the effect of weather on all utilities was unfavorable approximately \$4 million after tax in 2006 and unfavorable approximately \$3 million after tax in 2005. The 2006 weather effect is net of the normal temperature adjustment (NTA) mechanism implemented in the Company's Indiana natural gas service territories in the fourth quarter of 2005.

The Company generates revenue primarily from the delivery of natural gas and electric service to its customers. The primary source of cash flow results from the collection of customer bills and the payment for goods and services

procured for the delivery of gas and electric services. The results are impacted by weather patterns in its service territory and general economic conditions both in its service territory as well as nationally.

The Company has in place a disclosure committee that consists of senior management as well as financial management. The committee is actively involved in the preparation and review of the Company's SEC filings.

-21-

Table of ContentsSignificant Fluctuations

Throughout this discussion, the terms Gas Utility margin and Electric Utility margin are used. Gas Utility margin is calculated as *Gas utility revenues* less the *Cost of gas sold*. Electric Utility margin is calculated as *Electric utility revenues* less the *Cost of fuel & purchased power*. The Company believes Gas Utility and Electric Utility margins are better indicators of relative contribution than revenues since gas prices and fuel costs can be volatile and are generally collected on a dollar-for-dollar basis from customers.

Margin generated from the sale of natural gas and electricity to residential and commercial customers is seasonal and impacted by weather patterns in the Company's service territories. The weather impact in the Company's Indiana gas utility service territories is mitigated by a normal temperature adjustment mechanism, which was implemented in the fourth quarter of 2005. Margin generated from sales to large customers (generally industrial, other contract, and firm wholesale customers) is primarily impacted by overall economic conditions. Margin is also impacted by the collection of state mandated taxes, which fluctuate with gas costs, as well as other tracked expenses and is also impacted by some level of price sensitivity in volumes sold or delivered. Electric generating asset optimization activities are primarily affected by market conditions, the level of excess generating capacity, and electric transmission availability. Following is a discussion and analysis of margin generated from regulated utility operations.

Gas Utility Margin (Gas utility revenues less Cost of gas sold)

Gas Utility margin and throughput by customer type follows:

<i>(In millions)</i>	Three Months		Nine Months	
	Ended September 30,		Ended September 30,	
	2006	2005	2006	2005
Gas utility revenues	\$ 116.8	\$ 136.8	\$ 848.6	\$ 839.5
Cost of gas sold	59.9	81.6	577.4	568.8
Total gas utility margin	\$ 56.9	\$ 55.2	\$ 271.2	\$ 270.7
Margin attributed to:				
Residential & Commercial	\$ 44.8	\$ 44.8	\$ 226.5	\$ 230.4
Industrial	9.5	9.1	34.2	34.4
Other	2.6	1.3	10.5	5.9
Sold & transported volumes in MMDth attributed to:				
To residential & commercial customers	7.0	6.8	63.7	75.3
To industrial customers	17.7	17.4	61.2	63.4
Total throughput	24.7	24.2	124.9	138.7

Even though warm weather and price sensitivity negatively impacted usage and tracked expenses recovered dollar for dollar in margin have decreased, gas utility margins are generally flat compared to the prior year periods. During the nine months ended September 30, 2006, margin decreases were offset by a full year of base rate increases implemented in the Company's Ohio service territory, a \$3.0 million disallowance of Ohio gas costs, and the effects of the normal temperature adjustment mechanism (NTA) implemented in the fourth quarter of 2005 in the Company's Indiana service territories.

For the nine months ended September 30, 2006, compared to 2005, management estimates that weather 16 percent warmer than normal and 8 percent warmer than prior year would have decreased margins \$6.3 million compared to the prior year, had the NTA not been in effect. Weather, net of the NTA, resulted in an approximate \$3.5 million year

over year increase to gas utility margin. Further, for the nine months ended September 30, 2006, margin associated with tracked expenses and revenue taxes decreased \$1.7 million. The average cost per dekatherm of gas purchased for the nine months ended September 30, 2006, was \$8.89 compared to \$7.79 in 2005.

-22-

Table of ContentsElectric Utility Margin (Electric utility revenues less Cost of fuel & purchased power)

Electric Utility margin by revenue type follows:

<i>(In millions)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Electric utility revenues	\$ 123.2	\$ 128.7	\$ 324.4	\$ 320.3
Cost of fuel & purchased power	46.8	48.1	115.8	110.3
Total electric utility margin	\$ 76.4	\$ 80.6	\$ 208.6	\$ 210.0
Residential & commercial	\$ 49.3	\$ 54.4	\$ 125.6	\$ 131.2
Industrial	18.9	18.0	53.4	49.6
Municipalities & other	6.6	4.9	18.9	14.1
Subtotal: retail & firm wholesale	\$ 74.8	\$ 77.3	\$ 197.9	\$ 194.9
Asset optimization	\$ 1.6	3.3	\$ 10.7	\$ 15.1

Electric volumes sold in GWh attributed to:

Residential & commercial customers	847.0	932.6	2,152.4	2,264.0
Industrial customers	674.7	684.9	1,983.9	1,954.9
Municipalities & other	182.9	205.2	494.7	533.3
Total retail & firm wholesale volumes sold	1,704.6	1,822.7	4,631.0	4,752.2

Retail & Firm Wholesale Margin

Electric retail and firm wholesale utility margins were \$74.8 million and \$197.9 million for the three and nine months ended September 30, 2006. This represents a \$2.5 million decrease in the quarter compared to the prior year and a year over year increase of \$3.0 million. The recovery of pollution control related investments and associated operating expenses and related depreciation increased margins \$0.2 million quarter over quarter and \$4.2 million year over year. Higher demand charges and other items increased industrial customer margin approximately \$0.9 million quarter over quarter and \$3.1 million year over year. These increases were partially offset by decreased residential and commercial usage. The decreased usage was due primarily to mild weather during the quarter. For the three and nine months ended September 30, 2006, the estimated decrease in margin due to below normal cooling weather was \$3.6 million when compared to the prior year periods. During the quarter, cooling degree days were 5% below normal, compared to the prior year when cooling degree days were 14% above normal.

Margin from Asset Optimization Activities

Periodically, generation capacity is in excess of that needed to serve native load and firm wholesale customers. The Company markets and sells this unutilized generating and transmission capacity to optimize the return on its owned assets. On an annual basis, a majority of the margin generated from these activities is associated with wholesale off-system sales, and beginning in April 2005, substantially all off-system sales occur into the MISO day-ahead market. Following is a reconciliation of asset optimization activity.

Table of Contents

<i>(In millions)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Beginning of Period Net Balance Sheet Position	\$ 2.1	\$ 3.2	\$ 1.3	\$ (0.6)
Statement of Income Activity				
Net mark-to-market gains/(losses)	(0.6)	(1.4)	(1.9)	1.4
Other unrealized gains/(losses)	0.7	-	0.7	-
Net realized gains	1.5	4.7	11.9	13.7
Asset optimization margin	1.6	3.3	10.7	15.1
Net cash received & other adjustments	(2.3)	(4.9)	(10.6)	(12.9)
End of Period Net Balance Sheet Position	\$ 1.4	\$ 1.6	\$ 1.4	\$ 1.6

For the three and nine month periods ended September 30, 2006, net asset optimization margins were \$1.6 million and \$10.7 million, which represents decreases of \$1.7 million quarter over quarter and \$4.4 million year over year. The decrease during the quarter is due to lower volumes sold off system and the effect lower wholesale prices have had on the Company's optimization portfolio. The decrease in volumes sold is due primarily to a planned outage in September of 2006. Additionally, the year to date period contains unfavorable mark to market impacts of approximately \$0.7 million compared to favorable impacts of \$1.4 million in 2005. Year to date off-system sales totaled 755.0 GWh in 2006, compared to 800.1 GWh in 2005. For the three months ended September 30, 2006 and 2005, volumes sold off system totaled 106.7 GWh and 252.1 GWh, respectively.

Operating Expenses*Other Operating*

For the three and nine months ended September 30, 2006, other operating expenses increased \$2.7 million and \$3.1 million, respectively. Bad debt expense in the Company's Indiana service territories increased \$0.3 million quarter over quarter and \$2.7 million year over year due in part to higher gas costs. Expenses recovered dollar for dollar in margin related to operating pollution control equipment, Indiana integrity management programs, and Ohio bad debt and percent of income payment plan expenses, increased quarterly expenses approximately \$1.1 million and year to date expenses \$0.4 million.

Depreciation & Amortization

Depreciation expense increased \$1.7 million and \$8.6 million for the three and nine month periods ended September 30, 2006. The increases are primarily driven by additions to plant in service. Depreciation expense associated with environmental compliance equipment increased depreciation expense year over year approximately \$2.4 million, and was generally flat quarter over quarter.

Taxes Other Than Income Taxes

Taxes other than income taxes increased \$0.4 million and \$1.3 million for the three and nine months ended September 30, 2006, respectively, compared to 2005. The increases are primarily attributable to property taxes, which have increased because of higher tax rates and higher levels of plant in service.

Interest Expense

For the three and nine months ended September 30, 2006, interest expense increased \$1.7 million and \$6.6 million, respectively, compared to the prior year periods. The increases are primarily driven by rising interest rates and also include the impact of permanent financing transactions completed in the fourth quarter of 2005 in which \$150 million in debt-related proceeds were received and used to retire short-term borrowings and other long-term debt.

Income Taxes

For the three and nine months ended September 30, 2006, federal and state income taxes decreased \$5.6 million and \$11.6 million, respectively, compared to the prior year periods. The decreases are primarily due to lower pre-tax income as compared to the prior year and impacts during the quarter reflective of final taxes reported on 2005 state and federal income tax returns. In addition, 2006 year to date income taxes reflect a \$1.5 million favorable impact for an Indiana tax law change that resulted in the recalculation of certain state deferred income tax liabilities.

Table of Contents

Environmental Matters

Clean Air Interstate Rule & Clean Air Mercury Rule

In March of 2005 USEPA finalized two new air emission reduction regulations. The Clean Air Interstate Rule (CAIR) is an allowance cap and trade program requiring further reductions in Nitrogen Oxides (NO_x) and Sulfur Dioxide (SO₂) emissions from coal-burning power plants. The Clean Air Mercury Rule (CAMR) is an allowance cap and trade program requiring further reductions in mercury emissions from coal-burning power plants. Both sets of regulations require emission reductions in two phases. The first phase deadline for both rules is 2010 (2009 for NO_x under CAIR), and the second phase deadline for compliance with the emission reductions required under CAIR is 2015, while the second phase deadline for compliance with the emission reduction requirements of CAMR is 2018. The Company is evaluating compliance options and fully expects to be in compliance by the required deadlines.

In February 2006, the IURC approved a multi-emission compliance plan filed by the Company's utility subsidiary, SIGECO. Once the plan is implemented, SIGECO's coal-fired plants will be 100% scrubbed for SO₂, 90% scrubbed for NO_x, and mercury emissions will be reduced to meet the new mercury reduction standards. The order, as previously agreed to by the OUCC and Citizens Action Coalition, allows SIGECO to recover an approximate 8% return on up to \$110 million in capital investments through a rider mechanism which is updated every six months for actual costs incurred. The Company will also recover through a rider its operating expenses, including depreciation, once the equipment is placed into service. The order also stipulates that SIGECO study renewable energy alternatives and include a carbon forecast in future filings with regard to new generation and further environmental compliance plans, among other initiatives. As of September 30, 2006, the Company has made capital investments of approximately \$38.8 million related to this environmental requirement.

Manufactured Gas Plants

In the past, Indiana Gas, SIGECO, and others operated facilities for the manufacture of gas. Given the availability of natural gas transported by pipelines, these facilities have not been operated for many years. Under currently applicable environmental laws and regulations, Indiana Gas, SIGECO, and others may now be required to take remedial action if certain byproducts are found above the regulatory thresholds at these sites.

Indiana Gas has identified the existence, location, and certain general characteristics of 26 gas manufacturing and storage sites for which it may have some remedial responsibility. Indiana Gas has completed a remedial investigation/feasibility study (RI/FS) at one of the sites under an agreed order between Indiana Gas and the IDEM, and a Record of Decision was issued by the IDEM in January 2000. Although Indiana Gas has not begun an RI/FS at additional sites, Indiana Gas has submitted several of the sites to the IDEM's Voluntary Remediation Program (VRP) and is currently conducting some level of remedial activities, including groundwater monitoring at certain sites, where deemed appropriate, and will continue remedial activities at the sites as appropriate and necessary.

In conjunction with data compiled by environmental consultants, Indiana Gas has accrued the estimated costs for further investigation, remediation, groundwater monitoring, and related costs for the sites. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, Indiana Gas has recorded costs that it reasonably expects to incur totaling approximately \$20.4 million.

The estimated accrued costs are limited to Indiana Gas' proportionate share of the remediation efforts. Indiana Gas has arrangements in place for 19 of the 26 sites with other potentially responsible parties (PRP), which serve to limit Indiana Gas' share of response costs at these 19 sites to between 20% and 50%.

With respect to insurance coverage, Indiana Gas has received and recorded settlements from all known insurance carriers in an aggregate amount approximating \$20.4 million.

Table of Contents

Environmental matters related to manufactured gas plants have had no material impact on results of operations or financial condition since costs recorded to date approximate PRP and insurance settlement recoveries. While Indiana Gas has recorded all costs which it presently expects to incur in connection with activities at these sites, it is possible that future events may require some level of additional remedial activities which are not presently foreseen.

In October 2002, the Company received a formal information request letter from the IDEM regarding five manufactured gas plants owned and/or operated by SIGECO and not currently enrolled in the IDEM's VRP. In response, SIGECO submitted to the IDEM the results of preliminary site investigations conducted in the mid-1990's. These site investigations confirmed that based upon the conditions known at the time, the sites posed no imminent and/or substantial risk to human health or the environment.

On October 6, 2003, SIGECO filed applications to enter four of the manufactured gas plant sites in IDEM's VRP. The remaining site is currently being addressed in the VRP by another Indiana utility. SIGECO added those four sites into the renewal of the global Voluntary Remediation Agreement that Indiana Gas has in place with IDEM for its manufactured gas plant sites. That renewal was approved by the IDEM on February 24, 2004. On July 13, 2004, SIGECO filed a declaratory judgment action against its insurance carriers seeking a judgment finding its carriers liable under the policies for coverage of further investigation and any necessary remediation costs that SIGECO may accrue under the VRP program. While the total costs that may be incurred in connection with addressing these sites cannot be determined at this time, SIGECO has recorded costs that it reasonably expects to incur totaling approximately \$5.9 million. With respect to insurance coverage, SIGECO has received and recorded settlements from insurance carriers in an aggregate amount approximating the costs it expects to incur. Environmental matters related to manufactured gas plants have had no material impact on the results of operations or financial condition since costs recorded to date approximate insurance settlement recoveries. While SIGECO has recorded all costs which it presently expects to incur in connection with activities at these sites, it is possible that future events may require some level of additional remedial activities which are not presently foreseen.

Rate & Regulatory Matters

Vectren South (Southern Indiana Gas & Electric) Base Rate Filings

On September 1, 2006, Vectren Energy Delivery of Indiana, Inc. filed petitions with the IURC to adjust its electric and gas base rates in its South service territory. In the electric petition, Vectren seeks to increase its electric rates by approximately \$77 million to recover the nearly \$120 million additional investment in electric utility infrastructure since its last base rate increase in 1995 that is not currently included in rates charged to customers. The increase in rates is also required to support system growth, maintenance, and reliability as well as to recover costs deferred under previous IURC rate orders.

In addition, Vectren seeks to increase its gas base (non-gas cost) rates by approximately \$10 million to cover the ongoing cost of operating and maintaining its natural gas distribution and storage system. In the Company's 2004 gas rate adjustment petition, its first such petition since 1995, Vectren requested a \$14.7 million increase but settled the case for \$5.7 million. Since 1995, the Company's additional investment in its natural gas delivery infrastructure has increased more than \$30 million.

These filings begin a process that may conclude in the late summer or early fall of 2007 and will include public hearings.

IGCC Certificate of Public Convenience and Necessity

On September 7, 2006, Vectren Energy Delivery of Indiana and Duke Energy Indiana, Inc. filed with the IURC a joint petition for a Certificate of Public Convenience and Necessity (CPCN) for the construction of new electric capacity.

Specifically, Vectren requested the IURC approve its construction and ownership of up to 20% of the Integrated Gasification Combined Cycle (IGCC) project. Vectren's CPCN filing also seeks timely recovery of its 20% portion of the project's construction costs as well as operation and maintenance costs and additional incentives available for the construction of clean coal technology. Initial studies of plant design have already begun, and if the project moves forward as currently designed, plant construction is expected to begin in 2007 and continue through 2011.

-26-

Table of Contents

Ohio and Indiana Lost Margin Recovery/Conservation Filings

In 2005, the Company filed conservation programs and conservation adjustment trackers in Ohio and Indiana designed to help customers conserve energy and reduce their annual gas bills. The programs would allow the Company to recover costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism. This mechanism is designed to allow the Company to recover the distribution portion of its rates from residential and commercial customers based on the level of customer revenues established in each utility's last general rate case.

Ohio

In 2006, a settlement agreement between the Office of the Ohio Consumers Counsel (OCC), the Ohio Partners for Affordable Energy and the Company that provided for at least two years of comprehensive energy efficiency programs for Ohio customers was filed with the PUCO. On September 13, 2006, the PUCO approved the conservation proposal but modified the settlement. It established a two year, \$2 million total, low-income conservation program to be paid by the Company and a sales reconciliation rider intended to be a recovery mechanism for the difference between the revenues actually collected by the Company and the revenues approved in the Company's most recent rate case. The OCC has filed a petition for rehearing. The Company is proceeding to implement this order, which is effective for periods beginning October 1, 2006.

Indiana

In 2006, the Company and the Indiana Office of Utility Consumer Counselor (OUCC) filed a settlement agreement with the Indiana Utility Regulatory Commission (IURC) that provides for a 5 year energy efficiency program to be implemented. If approved, the settlement would allow Vectren to recover the costs of promoting the conservation of natural gas through conservation trackers that work in tandem with a lost margin recovery mechanism that would provide for recovery of 85% of the difference between revenues actually collected by the Company and the revenues approved in the Company's most recent rate case. A hearing before the IURC occurred on July 18, post hearing briefs were completed in August, and an order is anticipated in the fourth quarter of 2006.

Gas Cost Recovery (GCR) Audit Proceedings

On June 14, 2005, the PUCO issued an order disallowing the recovery of approximately \$9.6 million of gas costs relating to the two year audit period ended November 2002. That audit period provided the PUCO staff its initial review of the portfolio administration arrangement between VEDO and ProLiance. The disallowance includes approximately \$1.3 million relating to pipeline refunds and penalties and approximately \$4.5 million of costs for winter delivery services purchased by VEDO to ensure reliability over the two year period. The PUCO also held that ProLiance should have credited to VEDO an additional \$3.8 million more than credits actually received for the right to use VEDO's gas transportation capacity periodically during the periods when it was not required for serving VEDO's customers. The PUCO also directed VEDO to either submit its receipt of portfolio administration services to a request for proposal process or to in-source those functions. During 2003, the Company recorded a reserve of \$1.1 million for this matter. An additional pretax charge of \$4.2 million was recorded in *Cost of gas sold* in 2005. The reserve reflects management's assessment of the impact of the PUCO decisions, an estimate of any current impact that decision may have on subsequent audit periods, and an estimate of a sharing in any final disallowance by Vectren's partner in ProLiance.

VEDO filed its request for rehearing on July 14, 2005, and on August 10, 2005, the PUCO granted rehearing to further consider the \$3.8 million portfolio administration issue and all interest on the findings, but denied rehearing on all other aspects of the case. On October 7, 2005, the Company filed an appeal with the Ohio Supreme Court requesting that the \$4.5 million disallowance related to the winter delivery service issue be reversed. On December 21, 2005, the PUCO granted in part VEDO's rehearing request, and reduced the \$3.8 million disallowance related to portfolio administration to \$1.98 million. The Company has appealed the \$1.98 million disallowance to the Ohio

Supreme Court as well. Briefings of all matters were completed by July 31, 2006, and oral argument will occur in November 2006.

With respect to the most recent GCR audit covering the period of November 1, 2002 through October 31, 2005, the PUCO staff recommended a disallowance of approximately \$830,000 related solely to the retention of a reserve margin for the winter of 2002/2003. The Company had previously reserved for this result given the June 2005 PUCO order. VEDO is contesting the disallowance, and a hearing will occur in November 2006.

-27-

Table of Contents

As a result of the June 2005 PUCO order, the Company has established an annual bidding process for VEDO's gas supply and portfolio administration services. Since November 1, 2005, the Company has used a third party provider for these services.

Commodity Prices

Commodity prices for natural gas purchases have remained above historic levels and have become more volatile. Subject to compliance with applicable state laws, the Company's utility subsidiaries are allowed recovery of such changes in purchased gas costs from their retail customers through commission-approved gas cost adjustment mechanisms, and margin on gas sales are not expected to be impacted. Nevertheless, it is possible regulators may disallow recovery of a portion of gas costs for a variety of reasons, including, but not limited to, a finding by the regulator that natural gas was not prudently procured. In addition, as a result of this near term change in the natural gas commodity price, the Company's utility subsidiaries have been experiencing, and may continue to experience, changes in interest expense due to volatile working capital requirements; changes in uncollectible accounts expense and unaccounted for gas; and some level of price sensitive variability in volumes sold or delivered.

Impact of Recently Issued Accounting Guidance

SFAS No. 158

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans-an amendment of FASB Statements No. 87, 88, 106, and 132(R)" (SFAS 158). This statement requires an employer to recognize the overfunded or underfunded status of defined benefit pension plans and postretirement plans (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position and requires disclosure in the notes to financial statements certain additional information related to net periodic benefit cost for the next fiscal year. SFAS 158 defines the funded status of a defined benefit plan as its assets less its projected benefit obligation and defines the funded status of a postretirement plan as its assets less its accumulated postretirement benefit obligation. Calendar year-end companies such as Vectren are required to adopt the recognition and disclosure provisions of FAS 158 as of December 31, 2006. The measurement date provisions are not required to be adopted until 2008. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This statement does not require any new fair value measurements; however, the standard will impact how other fair value based GAAP is applied. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years with early adoption encouraged. The Company is currently assessing the impact this statement will have on its financial statements and results of operations.

FIN 48

In June 2006, the FASB issued FASB Interpretation No. 48 (FIN 48) "Accounting for Uncertainty in Income Taxes" an interpretation of SFAS 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of tax positions taken or expected to be taken in an income tax return. FIN 48 also provides guidance related to reversal of tax positions, balance sheet classification, interest and penalties, interim period accounting, disclosure and transition. The interpretation is

effective for fiscal years beginning after December 15, 2006. The Company is currently assessing the impact this interpretation will have on its financial statements and results of operations.

Table of Contents

Financial Condition

Within Vectren's consolidated group, Utility Holdings funds the short-term and long-term financing needs of utility operations. Vectren does not guarantee Utility Holdings debt. Utility Holdings' outstanding long-term and short-term borrowing arrangements are jointly and severally guaranteed by Indiana Gas, SIGECO, and VEDO. The guarantees are full and unconditional and joint and several, and Utility Holdings has no subsidiaries other than the subsidiary guarantors. Information about the subsidiary guarantors as a group is included in Note 3 to the condensed consolidated financial statements. Utility Holdings' long-term and short-term obligations outstanding at September 30, 2006, totaled \$700.0 million and \$227.6 million, respectively. Additionally, prior to Utility Holdings formation, Indiana Gas and SIGECO funded their operations separately, and therefore, have long-term debt outstanding funded solely by their operations. Utility Holdings operations have historically funded almost all of Vectren's common stock dividends.

Utility Holdings' and Indiana Gas' credit ratings on outstanding senior unsecured debt at September 30, 2006, are A-/Baa1 as rated by Standard and Poor's Ratings Services (Standard and Poor's) and Moody's Investors Service (Moody's), respectively. SIGECO's credit ratings on outstanding secured debt are A/A3. Utility Holdings' commercial paper has a credit rating of A-2/P-2. The current outlook of both Moody's and Standard and Poor's is stable. These ratings and outlooks have not changed since December 31, 2005. A security rating is not a recommendation to buy, sell, or hold securities. The rating is subject to revision or withdrawal at any time, and each rating should be evaluated independently of any other rating. Standard and Poor's and Moody's lowest level investment grade rating is BBB- and Baa3, respectively.

The Company's consolidated equity capitalization objective is 45-55% of long-term capitalization. This objective may have varied, and will vary, depending on particular business opportunities, capital spending requirements, execution of long-term financing plans and seasonal factors that affect the Company's operations. The Company's equity component was 49% of long-term capitalization at both September 30, 2006 and December 31, 2005. Long-term capitalization includes long-term debt, including current maturities and debt subject to tender, as well as common shareholders' equity and any outstanding preferred stock.

Financing Transactions

2006 Long-term Debt Transactions

In October 2006, Utility Holdings issued \$100 million in 5.95% senior unsecured notes due October 1, 2036 (2036 Notes). The 30-year notes were priced at par. The 2036 Notes are guaranteed by Indiana Gas Company, Inc., Southern Indiana Gas and Electric Company and Vectren Energy Delivery of Ohio, Inc.

The 2036 Notes have no sinking fund requirements, and interest payments are due quarterly. The notes may be called by Utility Holdings, in whole or in part, at any time on or after October 1, 2011, at 100% of principal amount plus accrued interest. During the first and second quarters of 2006, Utility Holdings entered into several interest rate hedges with a \$100 million notional amount. Upon issuance of the notes, these instruments were settled resulting in the payment of approximately \$3.3 million, which was recorded as a *Regulatory asset* pursuant to existing regulatory orders. The value paid is being amortized as an increase to interest expense over the life of the issue.

The net proceeds from the sale of the 2036 Notes and settlement of the hedging arrangements totaled approximately \$92.8 million. These proceeds were used to repay most of the \$100 million outstanding balance of Utility Holdings' 7.25% Senior Notes originally due October 15, 2031. These notes were redeemed on October 19, 2006 at par plus accrued interest.

Remarketing Transaction

At December 31, 2005, \$53.7 million of notes could be put to the Company in March of 2006, the date of their next remarketing. In March of 2006, the notes were successfully remarketed, and are now classified in *Long-term debt*.

Prior to the remarketing, the notes had tax exempt interest rates ranging from 4.75% to 5.00%. After the remarketing, interest rates are reset every seven days using an auction process.

Table of Contents

Sources & Uses of Liquidity

Operating Cash Flow

The Company's primary and historical source of liquidity to fund working capital requirements has been cash generated from operations. Cash flow from operating activities was \$214.5 million and \$246.5 million for the nine months ended September 30, 2006 and 2005, respectively, a decrease of \$32.0 million. Net income before non-cash charges was relatively flat compared to the prior year, as lower net income was offset by higher depreciation and uncollectible accounts expense. Cash generated from changes in working capital accounts decreased \$18.2 million period over period, due in part to higher gas costs. Cash used for other assets and liabilities increased \$11.3 million compared to 2005 due in part to increased regulatory assets and increased utility plant removal costs.

Financing Cash Flow

Although working capital requirements are generally funded by cash flow from operations, the Company uses short-term borrowings to supplement working capital needs when accounts receivable balances are at their highest and gas storage is refilled. Additionally, short-term borrowings are required for capital projects and investments until they are permanently financed.

Cash flow required for financing activities was \$55.2 million for the nine months ended September 30, 2006 compared to \$120.3 million in 2005. The year over year change is primarily a function of changes in short-term borrowings.

Investing Cash Flow

Cash flow required for investing activities was \$168.1 million for the nine months ended September 30, 2006, an increase of \$39.4 million over the prior year. The increase is attributable to increased capital expenditures, including environmental compliance projects and electric transmission projects.

Available Sources of Liquidity

At September 30, 2006, the Company has \$520.0 million of short-term borrowing capacity, of which approximately \$292.4 million is available.

Planned Capital Expenditures & Investments

Capital expenditures for the remainder of 2006 are estimated to be approximately \$90.7 million.

Table of Contents**Forward-Looking Information**

A “safe harbor” for forward-looking statements is provided by the Private Securities Litigation Reform Act of 1995 (Reform Act of 1995). The Reform Act of 1995 was adopted to encourage such forward-looking statements without the threat of litigation, provided those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause the actual results to differ materially from those projected in the statement. Certain matters described in Management’s Discussion and Analysis of Results of Operations and Financial Condition are forward-looking statements. Such statements are based on management’s beliefs, as well as assumptions made by and information currently available to management. When used in this filing, the words “believe”, “anticipate”, “endeavor”, “estimate”, “expect”, “objective”, “projection”, “forecast”, “goal” and similar expressions are intended to identify forward-looking statements. In addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements, factors that could cause the Company’s actual results to differ materially from those contemplated in any forward-looking statements include, among others, the following:

- Factors affecting utility operations such as unusual weather conditions; catastrophic weather-related damage; unusual maintenance or repairs; unanticipated changes to fossil fuel costs; unanticipated changes to gas supply costs, or availability due to higher demand, shortages, transportation problems or other developments; environmental or pipeline incidents; transmission or distribution incidents; unanticipated changes to electric energy supply costs, or availability due to demand, shortages, transmission problems or other developments; or electric transmission or gas pipeline system constraints..
 - Increased competition in the energy environment including effects of industry restructuring and unbundling.
- Regulatory factors such as unanticipated changes in rate-setting policies or procedures, recovery of investments and costs made under traditional regulation, and the frequency and timing of rate increases.
- Financial or regulatory accounting principles or policies imposed by the Financial Accounting Standards Board; the Securities and Exchange Commission; the Federal Energy Regulatory Commission; state public utility commissions; state entities which regulate electric and natural gas transmission and distribution, natural gas gathering and processing, electric power supply; and similar entities with regulatory oversight.
- Economic conditions including the effects of an economic downturn, inflation rates, commodity prices, and monetary fluctuations.
- Increased natural gas commodity prices and the potential impact on customer consumption, uncollectible accounts expense, unaccounted for gas, and interest expense.
- Changing market conditions and a variety of other factors associated with physical energy and financial trading activities including, but not limited to, price, basis, credit, liquidity, volatility, capacity, interest rate, and warranty risks.
- Direct or indirect effects on our business, financial condition or liquidity resulting from a change in credit ratings, changes in interest rates, and/or changes in market perceptions of the utility industry and other energy-related industries.
- Employee or contractor workforce factors including changes in key executives, collective bargaining agreements with union employees, or work stoppages.
- Legal and regulatory delays and other obstacles associated with mergers, acquisitions, and investments in joint ventures.
- Costs and other effects of legal and administrative proceedings, settlements, investigations, claims, and other matters, including, but not limited to, those described in Management’s Discussion and Analysis of Results of Operations and Financial Condition.
- Changes in federal, state or local legislature requirements, such as changes in tax laws or rates, environmental laws and regulations.

The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of changes in actual results, changes in assumptions, or other factors affecting such statements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to various business risks associated with commodity prices, interest rates, and counter-party credit. These financial exposures are monitored and managed by the Company as an integral part of its overall risk management program. The Company's risk management program includes, among other things, the use of derivatives to mitigate risk. The Company also executes derivative contracts in the normal course of operations while buying and selling commodities to be used in operations and optimizing its generation assets.

The Company has in place a risk management committee that consists of senior management as well as financial and operational management. The committee is actively involved in identifying risks as well as reviewing and authorizing risk mitigation strategies.

These risks are not significantly different from the information set forth in Item 7A Quantitative and Qualitative Disclosures About Market Risk included in the Company's 2005 Form 10-K and are therefore not presented herein.

ITEM 4. CONTROLS AND PROCEDURES

Changes in Internal Controls over Financial Reporting

During the quarter ended September 30, 2006, there have been no changes to the Company's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

As of September 30, 2006, the Company conducted an evaluation under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer of the effectiveness and the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures, as defined by Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (Exchange Act), are effective at providing reasonable assurance that material information relating to the Company required to be disclosed by the Company in its filings under the Exchange Act is brought to their attention on a timely basis.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is party to various legal proceedings arising in the normal course of business. In the opinion of management, there are no legal proceedings pending against the Company that are likely to have a material adverse effect on its financial position or results of operations. See Notes 7, 8 and 9 of its unaudited consolidated condensed financial statements included in Part 1 Item 1 Financial Statements regarding the Clean Air Act and related legal proceedings.

ITEM 1A. RISK FACTORS

Other than the risk factors presented below, these risks are not significantly different from the information set forth in Item 1A Risk Factors included in the Vectren Utility Holdings, Inc. 2005 Form 10-K and are therefore not presented herein.

Catastrophic events could adversely affect our facilities and operations.

Catastrophic events such as fires, explosions, floods, earthquakes, terrorist acts or other similar occurrences could adversely affect our facilities and operations.

Table of Contents

The performance of Vectren's nonregulated businesses may impact our ability to access the debt markets and bank financing and may adversely affect the market price of the notes.

Execution of Vectren's coal mining and synfuel operations, gas marketing, performance contracting and utility infrastructure strategies and the success of its efforts to invest in and develop new opportunities in nonregulated business areas is subject to a number of risks. These risks include, but are not limited to: the effects of weather; the operation of performance contracting products; storage field and mining property development; coal mining industry regulation; creditworthiness of customers and joint venture partners; and factors associated with energy trading activities, including price, basis, credit liquidity, volatility, capacity and interest rate risks and changing market conditions. While Vectren's nonregulated businesses may not have a direct impact on our business, financial condition or results of operations, material adverse developments affecting these businesses may result in a downgrade in our credit ratings, limit our ability to access the debt markets, bank financing and commercial paper markets and, thus, our liquidity, and adversely affect the market price of the notes.

ITEM 6. EXHIBITS

Exhibits and Certifications

Exhibits

4.3 Form of Fifth Supplemental Indenture, among Vectren Utility Holdings, Inc., Indiana Gas Company, Inc., Southern Indiana Gas and Electric Company,
