Investment Company Act file number 811-22455

Cohen & Steers Select Preferred and Income Fund, Inc. (Exact name of registrant as specified in charter)

280 Park Avenue, New York, NY (Address of principal executive offices)

10017 (Zip code)

Adam M. Derechin

Cohen & Steers Capital Management, Inc.

280 Park Avenue

New York, New York 10017 (Name and address of agent for service)

Registrant s telephone number, including area code: (212) 832-3232

Date of fiscal year December 31

end:

Date of reporting period: June 30, 2011

Item 1. Reports to Stockholders.

#### To Our Shareholders:

We would like to share with you our report for the six months ended June 30, 2011. The net asset value (NAV) at that date was \$24.58 per common share. The Fund's common stock is traded on the New York Stock Exchange (NYSE) and its share price can differ from its NAV; at period end, the Fund's closing price on the NYSE was \$24.24.

The total returns, including income, for the Fund and its comparative benchmarks were:

	Six Months Ended
	June 30, 2011
Cohen & Steers Select Preferred and Income Fund at Market	
Value <sup>a</sup>	1.82%
Cohen & Steers Select Preferred and Income Fund at NAVa	7.98%
BofA Merrill Lynch Fixed Rate Preferred Index <sup>b</sup>	5.41%
Blended benchmark 50% BofA Merrill Lynch US Capital	
Securities	
Index/50% BofA Merrill Lynch Fixed Rate Preferred Index <sup>b</sup>	4.73%
S&P 500 Index <sup>b</sup>	6.02%

The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance results reflect the effects of leverage, resulting from borrowings under a credit agreement. Current total returns of the Fund can be obtained by visiting our Web site at cohenandsteers.com.

The Fund implements fair value pricing when the daily change in a specific U.S. market index exceeds a predetermined percentage. Fair value pricing adjusts the valuation of non-U.S. holdings to account for such index change following the close of foreign markets. This standard practice has been adopted by a majority of the fund industry to deter investors from arbitraging funds with a large percentage of non-U.S. holdings. In the event fair value pricing is implemented on the first and/or last day of a performance measurement period, the Fund's return may diverge from the relative performance of its benchmark index, which does not use fair value pricing. An investor cannot invest directly in an index.

- <sup>a</sup> As a closed-end investment company, the price of the Fund's NYSE-traded shares will be set by market forces and at times may deviate from the NAV per share of the Fund.
- <sup>b</sup> The BofA Merrill Lynch Fixed Rate Preferred Index is an unmanaged index of preferred securities. The BofA Merrill Lynch US Capital Securities Index is a subset of The BofA Merrill Lynch US Corporate Index including all fixed-to-floating rate, perpetual callable and capital securities. The S&P 500 Index is an unmanaged index of common stocks that is frequently used as a general measure of stock market performance.

1

Please note that distributions paid by the Fund to shareholders are subject to recharacterization for tax purposes and are taxable up to the amount of the Fund's investment company taxable income and net realized gains. Distributions in excess of the Fund's investment company taxable income and realized gains are a return of capital distributed from the Fund's assets.

#### Investment Review

Preferred securities had a positive total return in the six-month period ended June 30, 2011. The group performed well in the first few months of the year amid good earnings reports from the important financial sector and signs of an improving economy. However, macro conditions became more challenging: U.S. economic data began to disappoint, while markets again focused on Europe's sovereign debt problems and China's attempts to cool its growth. Preferreds nonetheless added to their year-to-date gains in the second quarter, when a flight to safety drove Treasury yields lower, to the benefit of fixed income assets broadly.

Preferreds within the financial sector modestly trailed the index. U.S. banks reported better-than-expected improvements in credit quality and capital ratios, although revenue trends generally remained weak, in part reflecting slow loan growth. Bank stocks also faced regulatory uncertainty: global capital requirements remained unclear, as did the profitability of certain business lines and even the possibility of dividing banking and capital markets operations in the U.K., for instance.

New contingent capital securities were greeted with healthy demand

A significant development in the preferred market in the period was the large, successful issuance of contingent capital securities (so-called "CoCos"). Markets focused more on this emerging asset class after Credit Suisse priced its large public deal at 7.875%. This type of preferred may convert into common shares if a company's core Tier 1 capital ratio falls below a certain level (in the case of Credit Suisse, a relatively high 7%). With many existing preferreds destined to lose their Tier 1 status under Basel 3, issuers may increasingly use CoCos as an alternative source of equity-like capital.

### Regulatory par call risk emerged

In May, regional bank Fifth Third exercised a par call on a trust preferred trading at a premium via "special event" language, taking the market by surprise. This awakened many to the risk that certain bank preferreds may be subject to near-term par calls as a result of changes to bank regulations. In this particular case, the issuer could call the security at par anytime following a proposed change of this nature. (Typically, there is a short, specified window in which to call such an issue after a special event.)

### Insurance and real estate preferreds outperformed

Insurance preferreds outperformed the index amid increased visibility on the potential redemption of existing issues. With rating agencies now providing less "equity credit" for more debt-like preferred securities, insurance companies may find these issues to be relatively expensive financing. Investors bid up securities that might be redeemed or that could benefit from less overall supply in the sector.

REIT preferreds also outperformed, reflecting a steady improvement in real estate fundamentals, low and declining capital costs and an increasing number of transactions that revealed rising property values. Preferreds issued by telecommunications and utility companies were not as strong, but still generated positive returns.

### Fund performance

The Fund had a positive total return in the period and outperformed its benchmark based on NAV. Security selection was favorable across most sectors, led by the banking group. Good performers included a potential Basel 3 compliant Tier 1 security issued by Intesa Sanpaolo; it received a lift as markets focused more on the nascent asset class. Farm Credit Bank, a high-coupon preferred that we consider defensive, also contributed to performance. In the telecommunications sector, we had an out-of-index position in Centaur Funding and an overweight in Qwest that performed well.

Other factors that helped relative performance included our overweight in the real estate sector and general underweight in banking preferreds. In addition, we had positioned the Fund defensively relative to regulatory par call risk and outperformed as markets focused on that risk.

Securities that detracted included an overweight in a MetLife preferred that underperformed the index. Our underweight in the finance sector also modestly hindered relative returns.

The Fund employs leverage as part of a yield-enhancement strategy. Leverage, which can increase total return in rising markets (just as it can have the opposite effect in declining markets), enhanced the Fund's performance for the period compared with its benchmarks, which are not leveraged.

### Our primary focus was on income

The Fund's return based on market price was positive, but lower than its NAV return. However, we met our primary investment objective of providing high current income. The Fund paid six distributions during the six months, and its distribution yield at the end of the period was 8.1% (based on the annualized distribution rate in the period and the June 30, 2001 market price).

### **Investment Outlook**

The most recent readings on global developed economies have led us to take a somewhat more cautious approach for instance, by reducing our allocation to banks that we believe are more vulnerable to a global slowdown. We have also increased allocations to less cyclical industries, including utilities and telecommunications companies.

We recognize that weak housing markets and government austerity programs have continued to weigh on growth, but still believe that the U.S. economy will not return to a recession. In the current environment, as growth may remain slower than in recent quarters, the Federal Reserve may delay interest rate hikes longer than previously expected, which would likely support preferreds and other fixed income classes.

Slower growth and uncertainties in Europe have made us more selective and generally more cautious in our investments. Nonetheless, preferred income spreads over government and corporate bonds remain well above average, and fundamentals continue to improve for many issuers. In addition, preferreds should remain an attractive alternative to other sources of income, many of which offer yields at or near all-time lows. We continue to see scope for good performance in the months ahead, but also believe active management will remain important to delivering value.

We expect new supply of preferreds to continue to arise mostly from non-bank issuers, in the U.S. and abroad, including REITs and other non-financial companies. Banks will likely remain on the sidelines until there is more regulatory clarity. We will continue to look for value in transactions priced around the globe and across various currencies.

Sincerely,

MARTIN COHEN ROBERT H. STEERS

Co-chairman Co-chairman

Our Leverage Strategy (Unaudited)

Our current leverage strategy utilizes borrowings up to the maximum permitted by the 1940 Act to provide additional capital for the Fund, with an objective of increasing the net income available for shareholders. As of June 30, 2011, leverage represented 30% of the Fund's managed assets.

It has been our philosophy to utilize interest rate swap transactions to seek to reduce the interest rate risk inherent in our utilization of leverage. Considering that borrowings have variable interest rate payments, we seek to lock in those rates on a significant portion of this additional capital through interest rate swap agreements (where we effectively convert our variable rate obligation to a fixed rate obligation for the term of the swap agreements). Specifically, as of June 30, 2011, we have fixed the rate on 85% of our borrowings at an average interest rate of 1.6% for an average remaining period of 3.1 years (when we first entered into the swaps, the average term was 3.5 years). Locking in a significant portion of our leveraging costs is designed to protect the dividend-paying ability of the Fund. The use of leverage increases the volatility of the Fund's net asset value in both up and down markets. However, we believe that locking in a portion of the Fund's leveraging costs for the term of the swap agreements partially protects the Fund's expenses from an increase in short-term interest rates although the strategy will increase expenses when the rate on the Fund's borrowings is below the weighted average rate on the swaps.

### Leverage Facts<sup>a</sup>

Leverage (as a % of managed assets)	30%
% Fixed Rate	85%
% Variable Rate	15%
Weighted Average Rate on Swaps	1.6%
	3.1
Weighted Average Term on Swaps	years
Current Rate on Borrowings <sup>b</sup>	1.1%

The Fund seeks to enhance its dividend yield through leverage. The use of leverage is a speculative technique and there are special risks and costs associated with leverage. The net asset value of the Fund's common shares may be reduced by the issuance and ongoing costs of leverage. So long as the Fund is able to invest in securities that produce a realized investment yield that is greater than the total cost of leverage, the leverage strategy will produce higher current net investment income for the common shareholders. On the other hand, to the extent that the total cost of leverage exceeds the incremental income gained from employing such leverage, the common shareholders would realize lower net investment income. In addition to the impact on net income, the use of leverage will have an effect of magnifying capital appreciation or depreciation for common shareholders. Specifically, in an up market, leverage will typically generate greater capital appreciation than if the Fund was not employing leverage. Conversely, in down markets, the use of leverage will generally result in greater capital depreciation than if the Fund had been unlevered. To the extent that the Fund is required or elects to reduce its leverage, the Fund may need to liquidate investments, including under adverse economic conditions which may result in capital losses potentially reducing returns to common shareholders. There can be no assurance that a leveraging strategy will be successful during any period in which it is employed.

### NOTES TO FINANCIAL STATEMENTS (Unaudited)

#### Note 1. Significant Accounting Policies

Cohen & Steers Select Preferred and Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on August 16, 2010 and is registered under the Investment Company Act of 1940, as amended, as a nondiversified, closed-end management investment company. The Fund's investment objective is high current income. The Fund had no operations until October 6, 2010 when it sold 4,200 shares to Cohen & Steers Capital Management, Inc. (the investment manager). Investment operations commenced on November 24, 2010.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Portfolio Valuation: Investments in securities that are listed on the New York Stock Exchange are valued, except as indicated below, at the last sale price reflected at the close of the New York Stock Exchange on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day or, if no asked price is available, at the bid price.

Securities not listed on the New York Stock Exchange but listed on other domestic or foreign securities exchanges are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined as reflected on the tape at the close of the exchange representing the principal market for such securities. If after the close of a foreign market, but prior to the close of business on the day the securities are being valued, market conditions change significantly, certain foreign securities may be fair valued pursuant to procedures established by the Board of Directors.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by the investment manager to be over-the-counter, are valued at the official closing prices as reported by sources as the Board of Directors deem appropriate to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day, or if no asked price is available, at the bid price. However, certain fixed-income securities may be valued on the basis of prices provided by a pricing service when such prices are believed by the investment manager, pursuant to delegation by the Board of Directors, to reflect the fair market value of such securities.

Securities for which market prices are unavailable, or securities for which the investment manager determines that the bid and/or asked price or a counterparty valuation does not reflect market value, will be valued at fair value pursuant to procedures approved by the Fund's Board of Directors. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

close of the exchange on which the security is principally traded. In these circumstances, the Fund determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include, but are not limited to, recent transactions in comparable securities, information relating to the specific security and developments in the markets. Interest rate swaps are valued utilizing quotes received from an outside pricing service.

The Fund's use of fair value pricing may cause the net asset value of Fund shares to differ from the net asset value that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security.

Short-term debt securities with a maturity date of 60 days or less are valued at amortized cost, which approximates value. Investments in open-end mutual funds are valued at their closing net asset value.

Fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. The hierarchy of inputs that are used in determining the fair value of the Fund's investments is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

The following is a summary of the inputs used as of June 30, 2011 in valuing the Fund's investments carried at value:

	Total	Quoted Prices In Active Market for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

Investments classified as Level 3 infrequently trade and have significant unobservable inputs. The Level 3 preferred securities have been fair valued utilizing inputs and assumptions which include book value, recent comparables in similar securities, as well as liquidity and market risk factors.

Security Transactions and Investment Income: Security transactions are recorded on trade date. Realized gains and losses on investments sold are recorded on the basis of identified cost. Interest income is recorded on the accrual basis. Discounts are accreted and premiums are amortized over the life of the respective securities. Dividend income is recorded on the ex-dividend date, except for certain dividends on foreign securities, which are recorded as soon as the Fund is informed after the ex-dividend date. The Fund records distributions received in excess of income from underlying investments as a reduction of cost of investments and/or an increase in realized gain. Such amounts are based on estimates if actual amounts are not available, and actual amounts of income, realized gain and return of capital may differ from the estimated amounts. The Fund adjusts the estimated amounts of the components of distributions (and consequently its net investment income) as an increase to unrealized appreciation/(depreciation) and realized gain/(loss) on investments as necessary once the issuers provide information about the actual composition of the distributions.

Foreign Currency Translations: The books and records of the Fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities, other assets and liabilities and foreign currency contracts are translated at the exchange rates prevailing at the end of the period; and (2) purchases, sales, income and expenses are translated at the exchange rates prevailing on the respective dates of such transactions. The resultant exchange gains and losses are recorded as realized and unrealized gain/loss on foreign exchange transactions. Pursuant to U.S. federal income tax regulations, certain foreign exchange gains/losses included in realized and unrealized gain/loss are included in or are a reduction of ordinary income for federal

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

income tax purposes. The Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the changes in the market prices of the securities.

Foreign Securities and Forward Foreign Currency Exchange Contracts: The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the ability to repatriate funds, less complete financial information about companies and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. issuers.

In connection with its investments in foreign securities, the Fund may be exposed to foreign currency risks associated with portfolio investments and therefore use forward foreign currency exchange contracts (forward contracts) to hedge or manage these exposures. Forward contracts represent obligations to purchase or sell foreign currency on a specified future date at a price fixed at the time the contracts are entered into. The risks include the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. Forward contracts are valued daily at the applicable forward rate. The resultant unrealized exchange gains and losses are recorded as unrealized foreign currency translation gains or losses. The Fund records realized gains or losses on delivery of the currency or at the time the forward contract is extinguished (compensated) by entering into a closing transaction prior to delivery.

Interest Rate Swaps: The Fund uses interest rate swaps in connection with borrowing under its credit agreement. The interest rate swaps are intended to reduce the risk that an increase in short-term interest rates could have on the performance of the Fund's common shares as a result of the floating rate structure of interest owed pursuant to the credit agreement. In these interest rate swaps, the Fund agrees to pay the other party to the interest rate swap (which is known as the counterparty) a fixed rate payment in exchange for the counterparty agreeing to pay the Fund a variable rate payment that is intended to approximate the Fund's variable rate payment obligation on the credit agreement. The payment obligation is based on the notional amount of the swap. Depending on the state of interest rates in general, the use of interest rate swaps could enhance or harm the overall performance of the common shares. The market value of interest rate swaps is based on pricing models that consider the time value of money, volatility, the current market and contractual prices of the underlying financial instrument. Unrealized appreciation is reported as an asset and unrealized depreciation is reported as a liability on the Statement of Assets and Liabilities. The change in value of swaps, including the accrual of periodic amounts of interest to be paid or received on swaps, is reported as unrealized appreciation or depreciation in the Statement of Operations. A realized gain or loss is recorded upon payment or receipt of a periodic payment or termination of swap agreements. Swap agreements involve, to varying degrees, elements of market and counterparty risk, and exposure to loss in excess of the related amounts reflected in the Statement of Assets and Liabilities. The Fund's

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that such amount is positive.

For each swap counterparty, the Fund entered into an International Swap and Derivatives Association Inc. Master Agreement and related annexes thereto ("ISDAs") which sets forth the general terms and conditions of the Fund's swap transactions.

Dividends and Distributions to Shareholders: Dividends from net investment income and capital gain distributions are determined in accordance with U.S. federal income tax regulations, which may differ from GAAP. Dividends from net investment income, if any, are declared and paid monthly. Net realized capital gains, unless offset by any available capital loss carryforward, are typically distributed to shareholders at least annually. Dividends and distributions to shareholders are recorded on the ex-dividend date and are automatically reinvested in full and fractional shares of the Fund in accordance with the Fund's Reinvestment Plan unless the shareholder has elected to have them paid in cash. Distributions paid by the Fund are subject to recharacterization for tax purposes.

Income Taxes: It is the policy of the Fund to continue to qualify as a regulated investment company, if such qualification is in the best interest of the shareholders, by complying with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies, and by distributing substantially all of its taxable earnings to its shareholders. Accordingly, no provision for federal income or excise tax is necessary. Dividend and interest income from holdings in non-U.S. securities is recorded net of non-U.S. taxes paid. Management has analyzed the Fund's tax positions taken on federal income tax returns as well as its tax positions in non-U.S. jurisdictions where it trades for all open tax years and has concluded that as of June 30, 2011, no additional provisions for income tax would be required in the Fund's financial statements. The Fund's tax positions for the tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service, state departments of revenue and by foreign tax authorities.

Note 2. Investment Management Fees, Administration Fees and Other Transactions with Affiliates

Investment Management Fees: The investment manager serves as the Fund's investment manager pursuant to an investment management agreement (the investment management agreement). Under the terms of the investment management agreement, the investment manager provides the Fund with day-to-day investment decisions and generally manages the Fund's investments in accordance with the stated policies of the Fund, subject to the supervision of the Board of Directors.

For the services under the investment management agreement, the Fund pays the investment manager a management fee, accrued daily and paid monthly, at an annual rate of 0.70% of the Fund's average daily managed asset value. Managed asset value is the net asset value of the common shares plus the amount of any borrowings used for leverage outstanding.

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Administration Fees: The Fund has entered into an administration agreement with the investment manager under which the investment manager performs certain administrative functions for the Fund and receives a fee, accrued daily and paid monthly, at the annual rate of 0.05% of the Fund's average daily managed assets. For the six months ended June 30, 2011, the Fund incurred \$101,114 in administration fees. Additionally, the Fund pays State Street Bank and Trust Company as co-administrator under a fund accounting and administration agreement.

*Directors' and Officers' Fees:* Certain directors and officers of the Fund are also directors, officers, and/or employees of the investment manager. The Fund does not pay compensation to any affiliated directors and officers except for the Chief Compliance Officer, who received \$3,305 from the Fund for the six months ended June 30, 2011.

#### Note 3. Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term investments, for the six months ended June 30, 2011, totaled \$262,206,790 and \$109,070,220 respectively.

#### Note 4. Income Tax Information

As of June 30, 2011, the federal tax cost and net unrealized appreciation on securities were as follows:

Cost for federal income tax purposes	\$ 4	412,466,504
Gross unrealized appreciation		9,966,906
Gross unrealized depreciation		(1,163,310)
Net unrealized appreciation	\$	8,803,596

#### Note 5. Capital Stock

The Fund is authorized to issue 250 million shares of common stock at a par value of \$0.001 per share.

On November 24, 2010, the Fund completed the initial public offering of 11,200,000 shares of common stock. Proceeds paid to the Fund amounted to \$266,840,000 after the deduction of underwriting commissions and offering expenses of \$13,160,000.

On December 14, 2010, the Fund completed a subsequent offering of 500,000 shares of common stock. Proceeds paid to the Fund amounted to \$11,912,500 after deduction of underwriting commissions and offering expenses of \$587,500.

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

On January 4, 2011, the Fund completed a subsequent offering of 278,295 shares of common stock. Proceeds paid to the Fund amounted to \$6,582,511 after deduction of underwriting commissions and offering expenses of \$374,864.

Additionally, the investment manager absorbed approximately \$91,000 in offering expenses related to both the initial and subsequent offering.

On December 14, 2010, the Board of Directors approved the delegation of its authority to management to effect repurchases, pursuant to management's discretion and subject to market conditions and investment considerations, of up to 10% of the Fund's common shares outstanding ("Share Repurchase Program") as of January 1, 2011 through the fiscal year ended December 31, 2011. During the six months ended June 30, 2011, the Fund did not effect any repurchases.

During the six months ended June 30, 2011, the Fund issued 15,521 shares of common stock for the reinvestment of dividends. During the period November 24, 2010 (commencement of operations) through December 31, 2010, the Fund issued no shares of common stock for the reinvestment of dividends.

#### Note 6. Borrowings

Effective January 6, 2011, the Fund has a revolving credit agreement (the credit agreement) with Bank of America, N.A. London Branch (BoA). The initial amount of the credit agreement was \$122,000,000. On May 23, 2011 the credit agreement was amended to increase the maximum commitment to \$129,000,000. The Fund pays a facility fee of 0.45% per annum on the unused portion of the credit agreement. The credit agreement has a 270-day rolling term that resets daily; however, if the Fund exceeds certain net asset value triggers, the credit agreement may be terminated. The Fund is required to pledge portfolio securities as collateral in an amount up to two times the loan balance outstanding and has granted a security interest in the securities pledged to, and in favor of, BoA as security for the loan balance outstanding. If the Fund fails to meet certain requirements, or maintain other financial covenants required under the credit agreement, the Fund may be required to repay immediately, in part or in full, the loan balance outstanding under the credit agreement necessitating the sale of portfolio securities at potentially inopportune times.

As of June 30, 2011, the Fund has outstanding borrowings of \$129,000,000. During the six months ended June 30, 2011, the Fund borrowed an average daily balance of \$119,308,571 at a weighted average borrowing cost of 1.13%.

#### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

#### Note 7. Derivative Investments

The following tables present the value of derivatives held at June 30, 2011 and the effect of derivatives held during the six months ended June 30, 2011, along with the respective location in the financial statements. The notional amount of outstanding interest rate swaps at June 30, 2011 is \$110,000,000. The average notional amount outstanding during the six months ended June 30, 2011 was \$88,000,000.

Statement of Asse	ets and Liabilities			
	As	ssets	Lia	bilities
Derivatives	Location	Fair Value	Location	Fair Value

		Realized	Change in Unrealized
Derivatives	Location	Loss	Depreciation
Interest rate	Net Realized and Unrealized		
contracts	Gain (Loss)	\$ (514,735)	\$ (1,682,719)

#### Note 8. Other

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent on claims that may be made against the Fund in the future and, therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

### Note 9. Subsequent Events

Events and transactions occurring after June 30, 2011 and through the date that the financial statements were issued, have been evaluated in the preparation of the financial statements and no additional disclosure is required.

# PROXY RESULTS (Unaudited)

Cohen & Steers Select Preferred and Income Fund, Inc. shareholders voted on the following proposals at the annual meeting held on April 28, 2011. The description of each proposal and number of shares voted are as follows:

#### **Common Shares**

	Shares Voted For	Authority Withheld
To elect Directors:		
Martin Cohen	11,332,224.532	236,570.107
Richard J. Norman	11,341,981.454	226,813.185
Frank K. Ross	11,342,381.454	226,413.185
George Grossman	11,336,416.294	232,378.345
Robert H. Steers	11,359,980.639	208,814.000

Willard H. Smith Jr.	11,315,862.776	252,931.863

#### AVERAGE ANNUAL TOTAL RETURNS

(periods ended June 30, 2011) (Unaudited)

Based on Net	Based on
Asset Value	Market Value
Since Inception	Since Inception
(11/24/10)	(11/24/10)
8.11%	1.84%

The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return will vary and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance results reflect the effect of leverage resulting from borrowings under a credit agreement. Current total returns of the Fund can be obtained by visiting our Web site at cohenandsteers.com.

#### DIVIDEND REINVESTMENT PLAN

We urge shareholders who want to take advantage of this plan and whose shares are held in 'Street Name' to consult your broker as soon as possible to determine if you must change registration into your own name to participate.

#### OTHER INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800-330-7348, (ii) on our Web site at cohenandsteers.com or (iii) on the Securities and Exchange Commission's Web site at http://www.sec.gov. In addition, the Fund's proxy voting record for the most recent 12-month period ended June 30 is available by August 31 of each year (i) without charge, upon request, by calling 800-330-7348 or (ii) on the SEC's Web site at http://www.sec.gov.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available (i) without charge, upon request by calling 800-330-7348, or (ii) on the SEC's Web site at http://www.sec.gov. In addition, the Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Please note that the distributions paid by the Fund to shareholders are subject to recharacterization for tax purposes and are taxable up to the amount of the Fund's investment company taxable income and net realized gains. Distributions in excess of the Fund's net investment company taxable income and realized gains are a return of capital distributed from the Fund's assets. To the extent this occurs, the Fund's shareholders of record will be notified of the estimated amount of capital returned to shareholders for each such distribution and this information will also be available at cohenandsteers.com. The final tax treatment of all distributions is reported

to shareholders on their 1099-DIV forms, which are mailed after the close of each calendar year. Distributions of capital decrease the Fund's total assets and, therefore, could have the effect of increasing the Fund's expense ratio. In addition, in order to make these distributions, the Fund may have to sell portfolio securities at a less than opportune time.

Notice is hereby given in accordance with Rule 23c-1 under the Investment Company Act of 1940 that the Fund may purchase, from time to time, shares of its common stock in the open market.

#### Change to Investment Policy

The Board of Directors approved revisions to the ratings criteria for determining whether a security is deemed investment grade or below investment grade. The determination of whether a security is deemed investment grade or below investment grade will be determined at the time of investment. A security will be considered to be investment grade if it is rated as such by one nationally recognized statistical rating organization (NRSRO) (for example minimum Baa3 or BBB- by Moody's or S&P) or, if unrated, is judged to be investment grade by the investment manager.

Cohen & Steers Privacy Policy

Facts	What Does Cohen & Steers Do With Your Personal Information?
Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include:  • Social Security number and account balances  • Transaction history and account transactions  • Purchase history and wire transfer instructions

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Cohen & Steers chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information For our everyday business purposes such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or reports to credit bureaus	Does Cohen & Steers share? Yes	Can you limit this sharing? No
For our marketing purposes to offer our products and services to you	Yes	No
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes information about your transactions and experiences	No	We don't share
For our affiliates' everyday business purposes information about your creditworthiness	No	We don't share
For our affiliates to market to you	No	We don't share
For non-affiliates to market to you	No	We don't share

How?

Cohen & Steers Privacy Policy (Continued)

Who we are Who is providing this notice?

Cohen & Steers Capital Management, Inc., Cohen & Steers Asia Limited, Cohen & Steers UK Limited, Cohen & Steers Europe SA, Cohen & Steers Securities, LLC, Cohen & Steers Private Funds, and Cohen & Steers Open and Closed-End Funds (collectively, "Cohen & Steers").

What we do How does Cohen & Steers protect my personal information?

To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. We restrict access to your information to those employees who need it to perform their jobs, and also require companies that provide services on our behalf to protect your information.

How does Cohen & Steers collect my personal information?

We collect your personal information, for example, when you

- Open an account or buy securities from us
- Provide account information or give us your contact information
- Make deposits or withdrawals from your account

We also collect your personal information from other companies.

Why can't I limit all sharing?

Federal law gives you the right to limit only

- sharing for affiliates' everyday business purposes information about your creditworthiness
- affiliates from using your information to market to you
- sharing for non-affiliates to market to you

State law and individual companies may give you additional rights to limit sharing.

**Definitions** 

Affiliates

Companies related by common ownership or control. They can be financial and nonfinancial companies.

• Cohen & Steers does not share with affiliates.

Non-affiliates

Companies not related by common ownership or control. They can be financial and

nonfinancial companies

• Cohen & Steers does not share with non-affiliates so they can market to you.

Joint marketing

A formal agreement between nonaffiliated financial companies that together market

financial products or services to you.

• Cohen & Steers does not jointly market.
