Dear Shareholder:

After a slow start, the U.S. economy expanded at an ever-increasing pace during the twelve-month fiscal period ended January 31, 2012. Companies registered robust profits and began to hire workers in increasing numbers, pushing the unemployment rate down to its lowest level in three years. The recovery was held back in part by political dysfunction in Washington and a variety of geopolitical worries, which at times sparked extraordinary market volatility.

Twelve Months in Review through January 31, 2012

Hans W. Kertess
Chairman

For the twelve-month fiscal period ended January 31, 2012:

- NFJ Dividend, Interest & Premium Strategy Fund rose 4.30% on net asset value (NAV) and 9.07 % on market price.
- AGIC Equity & Convertible Income Fund increased 0.87% on NAV and declined 4.85 % on market price.

Brian S. Shlissel
President & CEO

The Russell 3000 Index, a broad measure of U.S. stock market performance, was up 3.86% during the twelve-month period. The Russell 1000 Value Index, a measure of large-cap value-style stocks, rose 1.88% and the Russell 1000 Growth Index, a measure of growth style stocks, advanced 6.07% during the reporting period. Convertible securities, as reflected by the Bank of America Merrill Lynch All Convertibles Index, declined 1.80%.

As the fiscal year unfolded, U.S. gross domestic product (GDP), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, grew at an annualized rate of just 0.4%. The January to March 2011 period was marked by turmoil across much of the Middle East, and by an earthquake, tsunami and nuclear meltdown in Japan. Middle East unrest pushed oil prices higher, while Japan's catastrophe hampered a significant portion of the global supply chain. GDP accelerated from that point, growing at annualized rates of 1.3% between April and June 2011, 1.8% between July and September 2011 and 2.8% (preliminary estimate) between October and December 2011. The labor market also accelerated, as the U.S. unemployment rate dropped from 9.1% to 8.3% during the twelve-month reporting period. The jobless rate's reduction all occurred during the last five months of the fiscal year, a sign, perhaps, of just how quickly the economy is gathering momentum. The government indicated that private sector job creation in 2011 was the best since 2005.

The economic expansion meant continued strong operating results for U.S. corporations. The Commerce Department reported profits were approximately \$1.97 trillion (seasonally adjusted at annualized rates) between July and September 2011. Corporate strength was reflected in Federal Reserve (the Fed) data indicating non-financial companies holding in excess of \$2 trillion in cash and other liquid assets. Relative to total corporate assets, this was the highest level since 1963. Strong balance sheets, in turn, have triggered rising dividend payments by many companies. A recent report by Standard and Poor's forecasts that dividend payouts by S&P 500 firms would surpass the record \$247.9 billion set in 2008.

The Road Ahead

Despite the improving U.S. economy, actions taken by the Fed during the twelve-month period signify caution. The Fed extended its policy of maintaining low interest rates at least through late 2014 and began another effort to stimulate the economy by swapping \$400 billion in short-term Treasury securities in exchange for a similar amount of longer-term bonds. The lower long-term yields, the Fed intimated, could help breathe life into the housing market. Concerned with Europe's deepening sovereign debt crisis, the Fed warned of significant downside risks to the economic outlook, including strains in global financial markets.

NFJ Dividend, Interest & Premium Strategy Fund Fund Insights

January 31, 2012 (unaudited)

For the 12 months ended January 31, 2012, NFJ Dividend, Interest & Premium Strategy Fund (the Fund) returned 4.30% on net asset value and 9.07% on market price.

The U.S. stock market experienced periods of heightened volatility during the fiscal period. Despite several economic headwinds, geopolitical events, the devastating earthquake in Japan and the European sovereign debt crisis, the market posted a solid gain over the first three months of the period. During this time, investors generally focused on corporate profits that largely exceeded expectations. The market then fell sharply over the next five months, as investor risk appetite was often replaced with heightened risk aversion. The change in investor sentiment was triggered by a number of factors, including fears of a double-dip recession, Standard & Poor's downgrade of U.S. government securities and increased concerns of contagion from the escalating European sovereign debt crisis. However, the market then rallied over the last four months of the period. Improving economic data in the U.S. and hopes for a resolution to the European sovereign debt crisis bolstered investor sentiment and propelled the overall market higher. All told, the Russell 1000 Value Index returned 1.88% during the 12 months ended January 31, 2012.

Convertible Market Summary

Investor sentiment varied considerably throughout the reporting period. Significant macro events early in the period, including disaster in Japan, increasing oil prices due to the Middle East / North Africa turbulence and European sovereign debt woes, were notable headlines, but ultimately had no substantial impact on the convertibles market as a whole.

However, mid-period performance was the worst since the 2008 financial crisis. Political headlines and related macroeconomic uncertainty influenced markets. The sell-off in equity markets was driven by fears of a double dip recession in the U.S, S&P's U.S. credit rating downgrade and the potential for a Greek default. For the convertibles market in particular, every macro factor seemed to be inexorably important, and broadly discouraged

NFJ Dividend, Interest & Premium Strategy Fund Fund Insights

January 31, 2012 (unaudited) (continued)

any buying. Convertibles were readily available for sale regardless of solid second quarter earnings. Additionally, a decline in bond floor valuations had a negative impact on the convertibles market, while the lack of liquidity from the major banks and brokers exacerbated the decline.

Performance over the remaining months of the reporting period reversed and rebounded nicely into January month-end as U.S. recession fears waned and concerns around Europe's sovereign debt crisis eased. Corporate bond spreads tightened as prices rose. Bond prices rose to more accurately reflect the lack of balance sheet risk for the average issuer in the market. Besides a positive equity market, an increase in bond floor valuations had a positive impact on the convertibles market.

Based on these observations, it wasn't surprising that industry level performance was mixed for the period. Within the convertible universe, economically sensitive issuers, such as Transportation, Materials, Consumer Discretionary and Energy, underperformed for the period, while counter-cyclical sectors including Utilities, Health Care and Telecommunications issuers outperformed.

Levels of implied volatility, as measured by the Chicago Board Options Exchange Volatility Index (VIX), were relatively low for the first half of the reporting period, trading mostly in the teens and averaging at a level of 18.3. Increased levels of volatility were seen in March when the VIX peaked just below 30 after an earthquake hit Japan, leading to a nuclear crisis at the Fukushima Daiichi power plant. The VIX fell back to previous levels at the end of March, only to rise to 48 in August when sovereign debt issues in Europe worsened. Elevated levels of volatility continued through November, with the VIX averaging just above 30 for the second half of the period. The average volatility throughout the entire period was 24.4.

Portfolio specifics

The equity portion of the portfolio advanced, as both stock selection and sector allocation contributed positively to results. In terms of stock

NFJ Dividend, Interest & Premium Strategy Fund Fund Insights

January 31, 2012 (unaudited) (continued)

selection, the Fund's holdings in the Financials, Materials and Consumer Staples sectors were the most beneficial. This was somewhat offset by stock selection in the Industrials, Telecommunication Services and Energy sectors.

From a sector allocation perspective, an underweight to Financials and overweights to Consumer Staples and Materials contributed the most to the Fund's performance. Conversely, an underweight to Utilities, an overweight to Information Technology and an underweight to Consumer Discretionary detracted the most from results.

During the 12-month reporting period, the equity portion of the portfolio's largest overweights relative to the Russell 1000 Value Index were in the Energy, Information Technology and Materials sectors. Conversely, the largest relative underweights were in the Financials, Consumer Discretionary and utilities sectors.

The Fund's convertible positions in Health Care, Utilities, Technology and Consumer Staples rose by the greatest magnitude during the reporting period. Less volatile, defensive sectors benefited the most when the market abruptly rotated into counter-cyclical stocks as economic slowdown concerns weighed on investor sentiment. Additionally, drug manufacturing companies increased in value due to better-than-expected quarterly profits. Select technology companies rose on M&A activity as well as data points suggesting continued strong end market demand.

The Fund's weakest convertible performers were concentrated in cyclical sectors including Materials, Transportation, Industrials and Energy. Materials companies were off on fears that the weaker global economic outlook and higher input costs would impact future earnings. In general, Transportation companies underperformed due to economic slowdown concerns. Energy issuers were lower as weak macro data drove down energy prices and reduced investors' confidence in future earnings.

NFJ Dividend, Interest & Premium Strategy Fund

6 AGIC Equity & Convertible Income Fund Annual Report | 1.31.12

AGIC Equity & Convertible Income Fund Fund Insights

January 31, 2012 (unaudited)

For the 12 months ended January 31, 2012, AGIC Equity & Convertible Income Fund returned 0.87% on net asset value and -4.85% on market price.

Although market sentiment varied significantly throughout the reporting period, the net result for the equity and convertible markets combined was a positive. Significant macro events early in the period, including disaster in Japan, increasing oil prices due to the Middle East / North Africa turbulence and European sovereign debt woes, were notable headlines, but ultimately had no substantial impact on the markets as a whole.

However, mid-period performance was the worst since the 2008 financial crisis. Political headlines and related macroeconomic uncertainty influenced markets. The sell-off in equity markets was driven by fears of a double dip recession in the U.S, S&P's U.S. credit rating downgrade and the potential for a Greek default. For the convertibles market in particular, every macro factor seemed to be inexorably important, and broadly discouraged any buying. Equities and convertibles were readily available for sale regardless of solid second quarter earnings. Additionally, a decline in bond floor valuations had a negative impact on the convertible market, while the lack of liquidity from the major banks and brokers exacerbated the decline.

Performance over the remaining months of the reporting period reversed and rebounded nicely into January month-end as U.S. recession fears waned and concerns around Europe's sovereign debt crisis eased. Corporate bond spreads tightened as prices rose. Bond prices rose to more accurately reflect the lack of balance sheet risk for the average issuer in the market. Besides a positive equity market, an increase in bond floor valuations had a positive impact on the convertibles market.

Based on these observations, it wasn't surprising that industry level performance was mixed for the period. Among the equity and convertible universes, generally speaking, economically sensitive issuers, such as Transportation, Industrials, Energy and Materials, underperformed for the period, while counter-cyclical sectors including Utilities, Health Care and Consumer Staples issuers outperformed.

The Chicago Board Options Exchange Volatility Index (VIX) started the period in the high-teens, and then spiked dramatically at the end of July and

AGIC Equity & Convertible Income Fund Fund Insights

January 31, 2012 (unaudited) (continued)

into August corresponding to the fears of European sovereign debt issues and weak U.S. economic stats. The index peaked at 48.0 on August 8th and set the new high mark for the fiscal year. The VIX declined over the remaining months of the reporting period and ended January 2012 very close to where it started in February 2011.

Portfolio specifics

The Fund's equity positions in Health Care, Telecommunications and Consumer Staples rose by the greatest magnitude during the reporting period. Defensive sectors benefited the most when the market abruptly rotated into counter-cyclical stocks as economic slowdown concerns weighed on investor sentiment. Additionally, drug manufacturing companies were higher due to better-than-expected quarterly profits. The Telecommunications sector represented consistent operating certainty in a period of great uncertainty.

The Fund's weakest equity performers were in most economically sensitive holdings, including Energy, Materials and Financials. Energy issuers were lower as weak macro data drove down energy prices and reduced investors' confidence in future earnings. Materials companies were off on fears that the weaker global economic outlook and higher input costs would impact future earnings. Financials were pressured by regulatory concerns and overseas banking contagion fears.

Similar equity sector performance was evident among the Fund's convertible positions. In addition to Telecommunications and Health Care, Information Technology and Utilities issues were among the strongest performers. Select technology companies were higher on M&A activity as well as data suggesting continued strong end-market demand. Utilities companies rallied as investors rotated into less volatile, defensive issues.

The Fund's weakest convertible performers were concentrated in cyclical sectors including Energy, Transportation, Materials and Industrials. Industrial issuers were lower despite reporting positive quarterly profits and citing strong end demand. In general, Transportation companies underperformed due to economic slowdown concerns.

AGIC Equity & Convertible Income Fund
Performance & Statistics**

January 31, 2012 (unaudited) (continued)

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all income dividends, capital gain and return of capital distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about each Fund, market conditions, supply and demand for the Fund's shares, or changes in each Fund's dividends.

An investment in each Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets less liabilities divided by the number of shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current quarterly per share dividend (comprised of net investment income and net capital gains, if any) payable to shareholders by the market price per share at January 31, 2012.

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

1. Organization and Significant Accounting Policies

NFJ Dividend, Interest & Premium Strategy Fund and AGIC Equity & Convertible Income Fund (collectively referred to as the Funds) were organized as Massachusetts business trusts on August 20, 2003 and December 12, 2006, respectively. Prior to commencing operations on February 28, 2005 and February 27, 2007, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Funds' investment manager and is an indirect wholly-owned subsidiary of Allianz Asset Management of America L.P., (AAM) formerly Allianz Global Investors of America L.P. prior to December 31, 2011. AAM is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has authorized an unlimited amount of common shares with \$0.00001 par value.

NFJ Dividend, Interest & Premium Strategy's primary investment objective is to seek current income and gains, with a secondary objective of long-term capital appreciation. Under normal market conditions the Fund pursues its investment objectives by investing in a diversified portfolio of dividend-paying common stocks and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on equity indexes in an attempt to generate gains from option premiums.

AGIC Equity & Convertible Income's investment objective is to seek total return comprised of capital appreciation, current income and gains. Under normal market conditions the Fund pursues its objective by investing in a diversified portfolio of equity securities and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on the equity securities held by the Fund.

There is no guarantee that the Funds will meet their stated objectives.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the Funds' financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

In May 2011, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) to develop common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRSs). FASB concluded that the amendments in this ASU will improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and IFRSs. The ASU is effective prospectively for interim or annual periods beginning on or after December 15, 2011. The Funds' management is evaluating the implications of this change.

In December 2011, the FASB issued Accounting Standards Update No. 2011-11, "Disclosures About Offsetting Assets and Liabilities" which requires enhanced disclosures that will enable users to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments. The amendments are effective for fiscal years beginning on or after January 1, 2013. The Funds are currently evaluating the effect that the guidance may have on its financial statements.

The following is a summary of significant accounting policies consistently followed by the Funds:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available, or for which a development/event occurs that may significantly impact the value of a security are fair-valued, in good faith, pursuant to procedures approved by the Board of Trustees, or persons acting at their discretion pursuant to procedures approved

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

1. Organization and Significant Accounting Policies (continued)

by the Board of Trustees. The Funds' investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Synthetic convertible securities are valued based on quotations obtained from unaffiliated brokers who are the principal market-makers in such securities. Such valuations are derived by the brokers from proprietary models which are generally based on readily available market information including valuations of the common stock underlying the synthetic security. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold, and these differences could be material to each Fund's financial statements. Each Fund's net asset value (NAV) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

(b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- Level 1 – quoted prices in active markets for identical investments that the Funds have the ability to access
- Level 2 – valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges
- Level 3 – valuations based on significant unobservable inputs (including the Funds' own assumptions in determining the fair value of investments)

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used.

The valuation techniques used by the Funds to measure fair value during the year ended January 31, 2012 maximized the use of observable inputs and minimized the use of unobservable inputs. When fair-valuing securities AGIC Equity & Convertible Income utilized multi-dimensional relational pricing models.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with GAAP.

Equity Securities (Common and Preferred Stock) – Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized

as Level 3.

Convertible Bonds & Notes Convertible bonds and notes are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of convertible bonds and notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

28 NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Annual Report | 1.31.12

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

1. Organization and Significant Accounting Policies (continued)

Corporate Bonds & Notes Corporate bonds and notes are generally comprised of two main categories: investment grade bonds and high yield bonds. Investment grade bonds are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services based primarily on broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of corporate bonds and notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

Option Contracts Option contracts traded over the counter (OTC) are valued by independent pricing services based on pricing models that incorporate various inputs such as interest rates, credit spreads, currency exchange rates and volatility measurements for in-the-money, at-the-money, and out-of-the-money contracts based on a given strike price. To the extent that these inputs are observable, the values of OTC option contracts are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

The Funds policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at January 31, 2012 in valuing each Fund s assets and liabilities is listed below (refer to the Schedules of Investments for more detailed information on Investments in Securities):

NFJ Dividend, Interest & Premium Strategy:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 1/31/12

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

1. Organization and Significant Accounting Policies (continued)

A roll forward of fair value measurements using significant unobservable inputs (Level 3) for AGIC Equity & Convertible Income for the year ended January 31, 2012, was as follows:

	Beginning Balance 1/31/11	Purchases	Sales	Accrued Discounts (Premiums)	Net Realized Gain (Loss)	Net Change in Unrealized Appreciation/ Depreciation	Transfers into Level 3	Transfers out of Level 3	Ending Balance 1/31/12
Investments in Securities									
Assets									
Convertible Preferred Stock:									
Capital Markets	\$1,128,820		\$(1,213,650)		\$(4,038,525)	\$4,868,175			\$744,820

The net change in unrealized appreciation/depreciation of Level 3 investments which the AGIC Equity & Convertible Income held at January 31, 2012, was \$289,535. Net realized gain (loss) and net change in unrealized appreciation/depreciation are reflected on the Statements of Operations.

(c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Interest income adjusted for the accretion of discount and amortization of premium is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income over the lives of the respective securities. Dividend income is recorded on the ex-dividend date. Conversion premium is not amortized. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. These payments may initially be recorded as dividend income and may subsequently be reclassified as realized gains and/or return of capital upon receipt of information from the issuer. Payments received on synthetic convertible securities are generally included in dividends.

(d) Federal Income Taxes

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. The Funds' management has determined that its evaluation has resulted in no material impact on the Funds' financial statements at January 31, 2012. The Funds' federal tax returns for the prior three years remain subject to

examination by the Internal Revenue Service.

(e) Dividends and Distributions

The Funds declare quarterly dividends and distributions from net investment income and gains from option premiums and the sale of portfolio securities. The Funds record dividends and distributions on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in capital in excess of par.

(f) Convertible Securities

It is the Funds' policy to invest a portion of their assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments in convertible securities include features which render them more sensitive to price changes in their underlying securities. The value of structured/synthetic convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at risk of loss.

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

1. Organization and Significant Accounting Policies (continued)

depending on the performance of the underlying equity security. Consequently, the Funds are exposed to greater downside risk than traditional convertible securities, but still less than that of the underlying stock.

2. Principal Risk

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds are also exposed to other risks such as, but not limited to, interest rate and credit risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (i.e. yield) movements.

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

The market values of securities may decline due to general market conditions (market risk) which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater market price volatility than fixed income securities.

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Funds' Sub-Advisers, NFJ Investment Group LLC (NFJ) and Allianz Global Investors Capital LLC (AGIC), also affiliates of the Investment Manager, seek to minimize counterparty risks to each applicable Fund by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have received payment. Payment is made on the purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Funds held synthetic convertible securities with Lehman Brothers entities as counterparty at the time the relevant Lehman Brothers entity filed for protection or was placed in administration. On April 8, 2011, NFJ Dividend, Interest & Premium Strategy sold two synthetic convertible securities and AGIC Equity & Convertible Income sold one. The remaining Lehman security held in AGIC Equity & Convertible Income is being valued at the sale price obtained by NFJ Dividend, Interest & Premium Strategy.

3. Financial Derivative Instruments

Disclosure about derivatives and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivatives, and disclosure about credit-risk related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives which are accounted for as hedges and those that do not qualify for such accounting. Although the Funds sometimes use derivatives for hedging purposes, the Funds reflect derivatives at fair value and recognize changes in fair value through the Funds' Statements of Operations, and such derivatives do not qualify for hedge accounting treatment.

NFJ Dividend, Interest & Premium Strategy Fund
32 AGIC Equity & Convertible Income Fund Annual Report | 1.31.12

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

3. Financial Derivatives Instruments (continued)

Option Transactions

The Funds write (sell) call options on securities and indices to earn premiums, for hedging purposes, risk management purposes or otherwise as part of their investment strategies.

When an option is written, the premium received is recorded as an asset with an equal liability which is subsequently marked to market to reflect the market value of the option written. These liabilities are reflected as call options written in the Funds' Statements of Assets and Liabilities. Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions, as a realized loss. If a call option written is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss. In writing an option, the Funds bear the market risk of an unfavorable change in the price of the security underlying the written option. Exercise of a written option could result in the Funds purchasing a security at a price different from its current market value.

The following is a summary of the fair valuations of the Funds' derivatives categorized by risk exposure.

The effect of derivatives on the Funds' Statements of Assets and Liabilities at January 31, 2012:

Location	NFJ Dividend, Interest & Premium Strategy	AGIC Equity & Convertible Income
Liability derivatives:		
Call options written, at value, Market Price	\$(26,978,256)	\$(102,368)

The effect of derivatives on the Funds' Statements of Operations for the year ended January 31, 2012:

Location	NFJ Dividend, Interest & Premium Strategy	AGIC Equity & Convertible Income
Net realized gain (loss) on:		

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

Call options written, Market Price	\$49,866,503	\$831,407
Net change in unrealized appreciation/depreciation of:		
Call options written, Market Price	\$(7,793,106)	\$(405,320)

The average volume (measured at each fiscal quarter-end) of derivative activity during the year ended January 31, 2012 was:

	Call Options Written Contracts
NFJ Dividend, Interest & Premium Strategy	70,127
AGIC Equity & Convertible Income	7,879

4. Investment Manager/Sub-Advisers

Each Fund has an Investment Management Agreement (the Agreement) with the Investment Manager. Subject to the supervision of the Funds Board of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds investment activities, business affairs and administrative matters. Pursuant to its Agreement, NFJ Dividend, Interest & Premium Strategy pays the Investment Manager an annual fee, payable monthly, at the annual rate of 0.90% of its average daily total managed assets. Pursuant to its Agreement, AGIC Equity & Convertible Income pays the Investment Manager an annual fee, payable monthly, at the annual rate of 1.00% of its average daily total managed assets. Total managed assets refer to the total assets of each Fund (including borrowings that may be outstanding) minus accrued liabilities (other than liabilities representing borrowings).

The Investment Manager has retained its affiliates NFJ and AGIC (the Sub-Advisers), to manage NFJ Dividend, Interest & Premium Strategy. NFJ manages the equity component and AGIC manages the convertible and index option

NFJ Dividend, Interest & Premium Strategy Fund

January 31, 2012

4. Investment Manager/Sub-Advisers (continued)

strategy components. AGIC serves as the sole sub-adviser to AGIC Equity & Convertible Income. Subject to the supervision of the Investment Manager, NFJ and AGIC make all of NFJ Dividend, Interest & Premium Strategy's investment decisions in connection with their respective components of the Fund's investments. Subject to the supervision of the Investment Manager, AGIC is responsible for making all of AGIC Equity & Convertible Income's investment decisions. Pursuant to Sub-Advisory Agreements, the Investment Manager and not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Advisers in return for their services.

5. Investment in Securities

For the year ended January 31, 2012, purchases and sales of investments, other than short-term securities were:

	NFJ Dividend, Interest & Premium Strategy	AGIC Equity & Convertible Income
Purchases	\$841,754,386	\$503,884,440
Sales	872,045,049	517,467,548

(a) Transactions in call options written for the year ended January 31, 2012:

	Contracts	Premiums
NFJ Dividend, Interest & Premium Strategy:		
Options outstanding, January 31, 2011	83,350	\$14,849,891
Options written	434,360	92,330,078
Options terminated in closing purchase transactions	(99,700)	(20,792,427)
Options expired	(355,325)	(71,682,514)
Options outstanding, January 31, 2012	62,685	\$14,705,028
AGIC Equity & Convertible Income:		
Options outstanding, January 31, 2011	15,805	\$1,063,613
Options written	88,565	6,445,788
Options terminated in closing purchase transactions	(31,705)	(2,716,004)
Options expired	(67,905)	(4,565,221)
Options outstanding, January 31, 2012	4,760	\$228,176

6. Income Tax Information

The tax character of dividends and distributions paid were:

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

	<u>Year ended January 31, 2012</u>	<u>Year ended January 31, 2011</u>	<u>Year ended January 31, 2012</u>	<u>Year ended January 31, 2011</u>	<u>Year ended January 31, 2012</u>
	Ordinary Income (1)	Ordinary Income (1)	Long-term capital gains	Long-term Capital gains	Return of Capital
NFJ Dividend, Interest & Premium Strategy	\$132,863,766	\$85,071,892			\$37,280,018

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Notes to Financial Statements

January 31, 2012

6. Income Tax Information (continued)

Under the recently enacted Regulated Investment Company Modernization Act of 2010, the Funds will be permitted to carryforward capital losses incurred in taxable years beginning after December 22, 2010, for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long term capital losses rather than being considered all short-term capital losses.

At January 31, 2012 NFJ Dividend, Interest & Premium Strategy Fund had a capital loss carry over of \$190,255,948, which will expire in 2018.

During the year ended January 31, 2012, NFJ Dividend, Interest & Premium Strategy Fund utilized \$80,500,219 of available capital loss carry overs. Future realized gains offset by the capital loss carry-forwards are not required to be distributed to shareholders. However, under the Fund's distribution policy, as described in Note 1 (e), such gains may be distributed to shareholders in the year gains are realized. Any gains distributed may be taxable to shareholders as ordinary income.

In accordance with U.S. Treasury regulations, AGIC Equity & Convertible Income Fund elected to defer realized Long-term capital losses of \$322,365 arising after October 31, 2011.

For the fiscal year ended January 31, 2012, permanent book-tax adjustments were as follows:

	Dividends in Excess of Net Investment Income	Accumulated Net Realized Gain (Loss)	Paid-in-Capital in Excess of Par
NFJ Dividend, Interest & Premium Strategy (a)(b)(c)	\$2,771,297	\$78,022,592	\$(80,793,889)
AGIC Equity & Convertible Income (a)(c)	1,335,907	(1,335,907)	

These permanent book-tax differences were primarily attributable to:

(a) Treatment of convertible securities

(b) Reclassification of taxable overdistributions

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

(c) Treatment of investments in Real Estate Investment Trusts

Net investment income, net realized gains or losses and net assets were not affected by these adjustments.

At January 31, 2012, the aggregate cost basis and the net unrealized appreciation/depreciation of investments for federal income tax purposes were as follows:

	Federal Tax Cost Basis (2)	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Depreciation
NFJ Dividend, Interest & Premium Strategy	\$1,947,563,437	\$75,938,129	\$(294,301,118)	\$(218,362,989)
AGIC Equity & Convertible Income	532,639,044	909,791	(102,886,824)	(101,977,033)

(2) Differences between book and tax cost basis are primarily attributable to the differing treatment of convertible securities, investments in Real Estate Investment Trusts, and wash sale loss deferrals.

7. Subsequent Events

On March 9, 2012 the following quarterly dividends were declared to shareholders, payable March 29, 2012 to shareholders of record on March 19, 2012:

NFJ Dividend, Interest & Premium Strategy	\$0.45 per share
AGIC Equity & Convertible Income	\$0.28 per share

There were no other subsequent events that require recognition or disclosure. In preparing these financial statements, management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

NFJ Dividend, Interest & Premium Strategy Fund Financial Highlights

For a share outstanding throughout each year:

	Year ended January 31,				
	2012	2011	2010	2009	2008

AGIC Equity & Convertible Income Fund
Report of Independent Registered Public Accounting Firm**

To the Shareholders and Board of Trustees

NFJ Dividend, Interest & Premium Strategy Fund

AGIC Equity & Convertible Income Fund

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the NFJ Dividend, Interest & Premium Strategy Fund and AGIC Equity & Convertible Income Fund (the Funds) at January 31, 2012, the results of each of their operations for the year then ended, changes in each of their net assets for each of the two years in the period then ended, and their financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Funds management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at January 31, 2012 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund Tax Information (unaudited)

As required by the Internal Revenue Code, shareholders must be notified within 60 days of the Funds' fiscal year end January 31, 2012 regarding certain tax attributes of distributions made by each Fund.

During the year ended January 31, 2012, the following Fund distributed long-term capital gains in the amounts indicated:

	15% Long-Term Capital Gain	25% Long-Term Capital Gain
AGIC Equity & Convertible Income Fund	703,668	2,270

Under the Jobs and Growth Tax Relief Reconciliation Act of 2003, the following percentages of ordinary dividends paid during the fiscal year ended January 31, 2012, are designated as qualified dividend income (or the maximum amount allowable).

NFJ Dividend, Interest & Premium Strategy	40.52%
AGIC Equity & Convertible Income	34.85%

Corporate shareholders are generally entitled to take the dividend received deduction on the portion of a Fund's dividend distribution that qualifies under tax law. The percentage of the following Funds' ordinary income dividends paid during the fiscal year ended January 31, 2012, that qualify for the corporate dividend received deduction is set below (or the maximum amount allowable):

NFJ Dividend, Interest & Premium Strategy	33.44%
AGIC Equity & Convertible Income	34.03%

Since the Funds' tax year is not the calendar year, another notification will be sent with respect to calendar year 2012. In January 2013, shareholders will be advised on IRS Form 1099 DIV as to the federal tax status of dividends and distributions, received during calendar 2012. The amount that will be reported will be the amount to use on the shareholders 2012 federal income tax returns and may differ from the amount which must be reported in connection with the Funds' tax year ended January 31, 2012. Shareholders are advised to consult their tax advisers as to the federal, state and local tax status of the dividend income received from the Funds.

Annual Shareholder Meeting Results/Changes to the Board of Trustees/ Proxy Voting Policies & Procedures/Changes to NFJ Dividend, Interest & Premium Strategy Fund's Rebalancing Policy(unaudited)
(continued)

**NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund**

Changes to NFJ Dividend, Interest & Premium Strategy Fund's Rebalancing Policy:

Effective October 5, 2011, NFJ Dividend, Interest & Premium Strategy Fund changed its rebalancing policy. The Fund pursues its investment objectives, in part, by investing in a diversified portfolio of dividend-paying common stocks (the Equity Component) and income-producing convertible securities (the Convertible Component). Since inception, the Fund has observed a policy to rebalance its entire portfolio on an annual basis so that the Equity Component represents approximately 75% and the Convertible Component approximately 25% of its portfolio immediately after each rebalancing. In between annual rebalancings, the percentage of the Fund's assets represented by each component has varied based on relative investment performance, market fluctuations and other factors.

Under the Fund's revised rebalancing policy, on a date in January of each year to be determined by the Investment Manager, if the allocation of the Fund's assets falls outside the ranges of 70% to 80% for the Equity Component and 20% to 30% for the Convertible Component, the Investment Manager will cause a rebalancing of the Fund's portfolio such that each Component's allocation is adjusted back to a point within its range in relative percentages determined by the Investment Manager, based on input and recommendations from the Fund's sub-adviser responsible for that Component. In addition, the Investment Manager may, but is not required to, cause the Fund to rebalance the Components to any point within their respective ranges at any time during the course of a year (whether the Components are then outside their ranges or at some other point within their ranges), based on input and recommendations from the sub-advisers and in light of market conditions, investment outlook, cash positions, tax considerations and other factors. Under the new policy, the relative percentages of the Fund's assets represented by the Equity and Convertible Components may, however, vary outside of their ranges at any time and from time to time during the course of a year, and perhaps significantly, in relation to the relative investment performance of each Component, as well as market fluctuations and other factors.

**Matters Relating to the Trustees' Consideration of the
Investment Management & Portfolio Management
Agreements** (unaudited)

**NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund**

Reference is made to the section of the Funds' July 31, 2011 Semi-Annual Report (the July Semi-Annual Report) entitled Matters Relating to the Trustees' Consideration of the Investment Management & Portfolio Management Agreements, which discussed the material factors and conclusions that formed the basis for the Boards' approval, at their June 14-15, 2011 in-person meetings (the June 2011 contract review meeting), of the continuance of the Funds' Management Agreements with the Investment Manager (the Advisory Agreements) and Portfolio Management Agreements between the Investment Manager and the Sub-Advisers (the Sub-Advisory Agreements) for a one-year period commencing July 1, 2011.

Subsequent to the date of the June 2011 contract review meeting, it was discovered that there were certain inaccuracies in the information provided to the Boards by Morningstar Associates LLC (Morningstar) with respect to the performance and/or expense figures shown for the Funds and their related rankings among peer group funds. In consultation with the Investment Manager, Morningstar produced a revised version of the information correcting the identified inaccuracies, which was provided to the Trustees for their consideration at a meeting held on December 13-14, 2011.

In considering the revised information, the Trustees noted, among other differences, that the following information from the revised Morningstar materials differed from information summarized in the July Semi-Annual Report as having been considered by the Trustees at the June 2011 contract review meeting:

NFJ Dividend, Interest & Premium Strategy Fund

The Fund actually ranked seventh out of nine funds in actual management fees, not fifth out of ten funds.

AGIC Equity & Convertible Income Fund

The information from the revised Morningstar materials did not differ from information summarized in the July Semi-Annual Report with respect to the Fund as having been considered by the Trustees.

After considering the revised Morningstar information and taking into account the other information and factors considered as part of the June 2011 contract review meeting, the Trustees, including the non-interested Trustees, determined at their December 2011 meeting that the revised Morningstar information, if it had been considered at the time of the June 2011 contract review meeting, would not have changed their determination to approve the continuance of the Funds' Advisory Agreements and Sub-Advisory Agreements for a one-year period commencing July 1, 2011, as specified in the July Semi-Annual Report.

Privacy Policy (unaudited)

Our Commitment to You

We consider customer privacy to be a fundamental aspect of our relationship with shareholders and are committed to maintaining the confidentiality, integrity, and security of our current, prospective and former shareholders' personal information. To ensure our shareholders' privacy, we have developed policies that are designed to protect this confidentiality, while allowing shareholders' needs to be served.

Obtaining Personal Information

In the course of providing shareholders with products and services, we may obtain non-public personal information about shareholders, which may come from sources such as account applications and other forms, from other written, electronic or verbal correspondence, from shareholder transactions, from a shareholder's brokerage or financial advisory firm, financial adviser or consultant, and/or from information captured on our internet web sites.

Respecting Your Privacy

As a matter of policy, we do not disclose any personal or account information provided by shareholders or gathered by us to non-affiliated third parties, except as required for everyday business purposes, such as to process transactions or service a shareholder's account, or as otherwise permitted by law. As is common in the industry, non-affiliated companies may from time to time be used to provide certain services, such as preparing and mailing prospectuses, reports, account statements and other information, and gathering shareholder proxies. We may also retain non-affiliated financial services providers, such as broker-dealers, to market our shares and products and we may enter in joint-marketing agreements with them and other financial companies. We may also retain marketing and research service firms to conduct research on shareholder satisfaction. These companies may have access to a shareholder's personal and account information, but are permitted to use the information solely to provide the specific service or as otherwise permitted by law. We may also provide a shareholder's personal and account information to their respective brokerage or financial advisory firm, Custodian, and/or to their financial adviser or consultant.

Sharing Information with Third Parties

We reserve the right to disclose or report personal information to non-affiliated third parties, in limited circumstances, where we believe in good faith that disclosure is required under law to cooperate with regulators or law enforcement authorities, to protect our rights or property or upon reasonable request by any Fund in which a shareholder has chosen to invest. In addition, we may disclose information about a shareholder or shareholder's accounts to a non-affiliated third party only if we receive a shareholder's written request or consent.

Sharing Information with Affiliates

We may share shareholder information with our affiliates in connection with our affiliates' everyday business purposes, such as servicing a shareholder's account, but our affiliates may not use this information to market products and services to you except in conformance with applicable laws or regulations. The information we share includes information about our experiences and transactions with a shareholder and may include, for example, shareholder's participation in one of the Funds or in other investment programs, a shareholder's ownership of certain types of accounts (such as IRAs), or other data about a shareholder's transactions or accounts. Our affiliates, in turn, are not permitted to share

shareholder information with non-affiliated entities, except as required or permitted by law.

Procedures to Safeguard Private Information

We take seriously the obligation to safeguard shareholder non-public personal information. In addition to this policy, we have also implemented procedures that are designed to restrict access to a shareholder's non-public personal information only to internal personnel who need to know that information in order to provide products or services to such shareholders. In addition, we have physical, electronic and procedural safeguards in place to guard a shareholder's non-public personal information.

Disposal of Confidential Records

We will dispose of records, if any, that are knowingly derived from data received from a consumer reporting agency regarding a shareholder that is an individual in a manner that ensures the confidentiality of the data is maintained. Such records include, among other things, copies of consumer reports and notes of conversations with individuals at consumer reporting agencies.

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund
Dividend Reinvestment Plan (unaudited)

Automatic Dividend Reinvestment Plan

The Funds have adopted a Dividend Reinvestment Plan (the Plan) which allows common shareholders to reinvest Fund distributions in additional common shares of the Funds. BNY Mellon Investment Servicing (US) Inc. (the Plan Agent) serves as agent for common shareholders in administering the Plan. *It is important to note that participation in the Plan and automatic reinvestment of Fund distributions does not ensure a profit, nor does it protect against losses in a declining market.*

Automatic enrollment/voluntary participation. Under the Plan, common shareholders whose shares are registered with the Plan Agent (registered shareholders) are automatically enrolled as participants in the Plan and will have all Fund distributions of income, capital gains and returns of capital (together, distributions) reinvested by the Plan Agent in additional common shares of the Funds, unless the shareholder elects to receive cash. Registered shareholders who elect not to participate in the Plan will receive all distributions in cash paid by check and mailed directly to the shareholder of record (or if the shares are held in street or other nominee name, to the nominee) by the Plan Agent.

Participation in the Plan is voluntary. Participants may terminate or resume their enrollment in the Plan at any time without penalty by notifying the Plan Agent online at www.bnymellon.com/shareowner/equityaccess, by calling (800) 254-5197, by writing to the Plan Agent, BNY Mellon Investment Servicing (US) Inc., at P.O. Box 358035, Pittsburgh, PA 15252-8035, or, as applicable, by completing and returning the transaction form attached to a Plan statement. A proper notification will be effective immediately and apply to the Funds' next distribution if received by the Plan Agent at least ten (10) days prior to the record date for the distribution; otherwise, a notification will be effective shortly following the Funds' next distribution and will apply to the Funds' next succeeding distribution thereafter. If you withdraw from the Plan and so request, the Plan Agent will arrange for the sale of your shares and send you the proceeds, minus a transaction fee and brokerage commissions.

How shares are purchased under the Plan. For each Fund distribution, the Plan Agent will acquire common shares for participants either (i) through receipt of newly issued common shares from the Funds (newly issued shares) or (ii) by purchasing common shares of the Funds on the open market (open market purchases). If, on a distribution payment date, the net asset value per common share of the Funds (NAV) is equal to or less than the market price per common share plus estimated brokerage commissions (often referred to as a market premium), the Plan Agent will invest the distribution amount on behalf of participants in newly issued shares at a price equal to the greater of (i) NAV or (ii) 95% of the market price per common share on the payment date. If the NAV is greater than the market price per common share plus estimated brokerage commissions (often referred to as a market discount) on a distribution payment date, the Plan agent will instead attempt to invest the distribution amount through open market purchases. If the Plan Agent is unable to invest the full distribution amount in open market purchases, or if the market discount shifts to a market premium during the purchase period, the Plan Agent will invest any un-invested portion of the distribution in newly issued shares at a price equal to the greater of (i) NAV or (ii) 95% of the market price per share as of the last business day immediately prior to the purchase date (which, in either case, may be a price greater or lesser than the NAV per common share on the distribution payment date). No interest will be paid on distributions awaiting reinvestment.

Under the Plan, the market price of common shares on a particular date is the last sales price on the exchange where the shares are listed on that date or, if there is no sale on the exchange on that date, the mean between the closing bid and asked quotations for the shares on the exchange on that date. The NAV per common share on a particular date is the amount calculated on that date (normally at the close of regular trading on the New York Stock Exchange) in accordance with the Funds' then current policies.

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

Fees and expenses. No brokerage charges are imposed on reinvestments in newly issued shares under the Plan. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases. There are currently no direct service charges imposed on participants in the Plan, although the Funds reserves the right to amend the Plan to include such charges. The Plan Agent imposes a transaction fee (in addition to brokerage commissions that are incurred) if it arranges for the sale of your common shares held under the Plan.

NFJ Dividend, Interest & Premium Strategy Fund

44 AGIC Equity & Convertible Income Fund Annual Report | 1.31.12

NFJ Dividend, Interest & Premium Strategy Fund
AGIC Equity & Convertible Income Fund
Dividend Reinvestment Plan (unaudited) (continued)

Shares held through nominees. If your common shares are held through a broker, bank or other nominee (together, a nominee) and are not registered with the Plan Agent, neither you nor the nominee will be participants in or have distributions reinvested under the Plan. If you are a beneficial owner of common shares and wish to participate in the Plan, and your nominee is unable or unwilling to become a registered shareholder and a Plan participant on your behalf, you may request that your nominee arrange to have all or a portion of your shares re-registered with the Plan Agent in your name so that you may be enrolled as a participant in the Plan. Please contact your nominee for details or for other possible alternatives. Participants whose shares are registered with the Plan Agent in the name of one nominee firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

Tax consequences. Automatically reinvested dividends and distributions are taxed in the same manner as cash dividends and distributions *i.e.*, automatic reinvestment in additional shares does not relieve shareholders of, or defer the need to pay, any income tax that may be payable (or that is required to be withheld) on Fund dividends and distributions.

The Funds and the Plan Agent reserve the right to amend or terminate the Plan. Additional information about the Plan, as well as a copy of the full Plan itself, may be obtained from the Plan Agent, BNY Mellon Investment Servicing (US) Inc., P.O. Box 358035, Pittsburgh, PA 15252-8035; telephone number: (800) 254-5197; web site: www.bnymellon.com/shareowner/equityaccess.

ITEM 2. CODE OF ETHICS

(a) As of the end of the period covered by this report, the registrant has adopted a code of ethics (the Section 406 Standards for Investment Companies- Ethical Standards for Principal Executive and Financial Officers) that applies to the registrant's Principal Executive Officer and Principal Financial Officer; the registrant's Principal Financial Officer also serves as the Principal Accounting Officer. The registrant undertakes to provide a copy of such code of ethics to any person upon request, without charge, by calling 1-800-254-5197. The code of ethics are included as an Exhibit 99.CODE ETH here to.

(b) During the period covered by this report, there were not any amendments to a provision of the code of ethics adopted in 2 (a) above.

(c) During the period covered by this report, there were not any waivers or implicit waivers to a provision of the code of ethics adopted in 2(a) above.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT

The registrant's Board has determined that James A. Jacobson a member of the Board's Audit Oversight Committee is an audit committee financial expert, and that he is independent, for purposes of this Item.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES

a) Audit fees. The aggregate fees billed for each of the last two fiscal years (the Reporting Periods) for professional services rendered by the Registrant's principal accountant (the Auditor) for the audit of the Registrant's annual financial statements, or services that are normally provided by the Auditor in connection with the statutory and regulatory filings or engagements for the Reporting Periods, were \$67,000 in 2011 and \$69,345 in 2012.

b) Audit-Related Fees. There were no audit related fees billed for each of the last two fiscal years.

c) Tax Fees. The aggregate fees billed in the Reporting Periods for professional services rendered by the Auditor for tax compliance,

tax service and tax planning (Tax Services) were \$14,700 in 2011 and \$15,000 in 2012. These services consisted of review or preparation of U.S. federal, state, local and excise tax returns and calculation of excise tax distributions.

d) All Other Fees. There were no other fees billed in the Reporting Periods for products and services provided by the Auditor to the Registrant.

e) 1. Audit Committee Pre-Approval Policies and Procedures. The Registrant's Audit Committee has established policies and procedures for pre-approval of all audit and permissible non-audit services by the Auditor for the Registrant, as well as the Auditor's engagements related directly to the operations and financial reporting of the Registrant. The Registrant's policy is stated below.

NFJ Dividend, Interest & Premium Strategy Fund (the Fund)

AUDIT OVERSIGHT COMMITTEE POLICY FOR PRE-APPROVAL OF SERVICES PROVIDED BY THE INDEPENDENT ACCOUNTANTS

The Funds' Audit Oversight Committee (Committee) is charged with the oversight of the Funds' financial reporting policies and practices and their internal controls. As part of this responsibility, the Committee must pre-approve any independent accounting firm's engagement to render audit and/or permissible non-audit services, as required by law. In evaluating a proposed engagement by the independent accountants, the Committee will assess the effect that the engagement might reasonably be expected to have on the accountant's independence. The Committee's evaluation will be based on:

a review of the nature of the professional services expected to be provided,

the fees to be charged in connection with the services expected to be provided,

a review of the safeguards put into place by the accounting firm to safeguard independence, and

periodic meetings with the accounting firm.

POLICY FOR AUDIT AND NON-AUDIT SERVICES TO BE PROVIDED TO THE FUNDS

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

On an annual basis, the Funds' Committee will review and pre-approve the scope of the audits of the Funds and proposed audit fees and permitted non-audit (including audit-related) services that may be performed by the Funds' independent accountants. At least annually, the Committee will receive a report of all audit and non-audit services that were rendered in the previous calendar year pursuant to this Policy. In addition to the Committee's

pre-approval of services pursuant to this Policy, the engagement of the independent accounting firm for any permitted non-audit service provided to the Funds will also require the separate written pre-approval of the President of the Funds, who will confirm, independently, that the accounting firm's engagement will not adversely affect the firm's independence. All non-audit services performed by the independent accounting firm will be disclosed, as required, in filings with the Securities and Exchange Commission.

AUDIT SERVICES

The categories of audit services and related fees to be reviewed and pre-approved annually by the Committee are:

Annual Fund financial statement audits

Seed audits (related to new product filings, as required)

SEC and regulatory filings and consents

AUDIT-RELATED SERVICES

The following categories of audit-related services are considered to be consistent with the role of the Fund's independent accountants and services falling under one of these categories will be pre-approved by the Committee on an annual basis if the Committee deems those services to be consistent with the accounting firm's independence:

Accounting consultations

Fund merger support services

Agreed upon procedure reports

Other attestation reports

Comfort letters

Other internal control reports

Individual audit-related services that fall within one of these categories and are not presented to the Committee as part of the annual pre-approval process described above, may be pre-approved, if deemed consistent with the accounting firm's independence, by the Committee Chair (or any other Committee member who is a disinterested trustee under the Investment Company Act to whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$250,000. Any such pre-approval shall be reported to the full Committee at its next regularly scheduled meeting.

TAX SERVICES

The following categories of tax services are considered to be consistent with the role of the Funds' independent accountants and services falling under one of these categories will be pre-approved by the Committee on an annual basis if the Committee deems those services to be consistent with the accounting firm's independence:

Tax compliance services related to the filing or amendment of the following:

Federal, state and local income tax compliance; and, sales and use tax compliance

Timely RIC qualification reviews

Tax distribution analysis and planning

Tax authority examination services

Tax appeals support services

Accounting methods studies

Fund merger support service

Other tax consulting services and related projects

Individual tax services that fall within one of these categories and are not presented to the Committee as part of the annual pre-approval process described above, may be pre-approved, if deemed consistent with the accounting firm's independence, by the Committee Chairman (or any other Committee member who is a disinterested trustee under the Investment Company Act to whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$250,000. Any such pre-approval shall be reported to the full Committee at its next regularly scheduled meeting.

PROSCRIBED SERVICES

The Funds' independent accountants will not render services in the following categories of non-audit services:

Bookkeeping or other services related to the accounting records or financial statements of the Funds

Financial information systems design and implementation

Appraisal or valuation services, fairness opinions, or contribution-in-kind reports

Actuarial services

Internal audit outsourcing services

Management functions or human resources

Broker or dealer, investment adviser or investment banking services

Legal services and expert services unrelated to the audit

Any other service that the Public Company Accounting Oversight Board determines, by regulation, is impermissible

PRE-APPROVAL OF NON-AUDIT SERVICES PROVIDED TO OTHER ENTITIES WITHIN THE FUND COMPLEX

The Committee will pre-approve annually any permitted non-audit services to be provided to Allianz Global Investors Fund Management LLC or any other investment manager to the Funds (but not including any sub-adviser whose role is primarily portfolio management and is sub-contracted by the investment manager) (the Investment Manager) and any entity

controlling, controlled by, or under common control with the Investment Manager that provides ongoing services to the Funds (including affiliated sub-advisers to the Funds), provided, in each case, that the engagement relates directly to the operations and financial reporting of the Funds (such entities, including the Investment Manager, shall be referred to herein as the Accounting Affiliates). Individual projects that are not presented to the Committee as part of the annual pre-approval process, may be pre-approved, if deemed consistent with the accounting firm's independence, by the Committee Chairman (or any other Committee member who is a disinterested trustee under the Investment Company Act to whom this responsibility has been delegated) so long as the estimated fee for those services does not exceed \$250,000. Any such pre-approval shall be reported to the full Committee at its next regularly scheduled meeting.

Although the Committee will not pre-approve all services provided to the Investment Manager and its affiliates, the Committee will receive an annual report from the Funds' independent accounting firm showing the aggregate fees for all services provided to the Investment Manager and its affiliates.

DE MINIMUS EXCEPTION TO REQUIREMENT OF PRE-APPROVAL OF NON-AUDIT SERVICES

With respect to the provision of permitted non-audit services to a Fund or Accounting Affiliates, the pre-approval requirement is waived if:

(1) The aggregate amount of all such permitted non-audit services provided constitutes no more than (i) with respect to such services provided to the Fund, five percent (5%) of the total amount of revenues paid by the Fund to its independent accountant during the fiscal year in which the services are provided, and (ii) with respect to such services provided to Accounting Affiliates, five percent (5%) of the total amount of revenues paid to the Fund's independent accountant by the Fund and the Accounting Affiliates during the fiscal year in which the services are provided;

(2) Such services were not recognized by the Fund at the time of the engagement for such services to be non-audit services; and

(3) Such services are promptly brought to the attention of the Committee and approved prior to the completion of the audit by the Committee or by the Committee Chairman (or any other Committee member who is a disinterested trustee under the Investment Company Act to whom this Committee Chairman or other delegate shall be reported to the full Committee at its next regularly scheduled meeting.

e) 2. No services were approved pursuant to the procedures contained in paragraph (C) (7) (i) (C) of Rule 2-01 of Registration S-X.

f) Not applicable

g) Non-audit fees. The aggregate non-audit fees billed by the Auditor for services rendered to the Registrant, and rendered to the Adviser, for the 2011 Reporting Period was \$2,506,354 and the 2012 Reporting Period was \$3,082,563.

h) Auditor Independence. The Registrant's Audit Oversight Committee has considered whether the provision of non-audit services that were rendered to the Adviser which were not pre-approved is compatible with maintaining the Auditor's independence.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANT

The Fund has a separately designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The audit committee of the Fund is comprised of Deborah A. DeCotis, Bradford K. Gallagher, James A. Jacobson, Hans W. Kertess, William B. Ogden, IV and Alan Rappaport.

ITEM 6. SCHEDULE OF INVESTMENTS

(a) The registrant's Schedule of Investments is included as part of the report to shareholders filed under Item 1 of this form.

(b) Not applicable.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND

(the Trust)

PROXY VOTING POLICY

1. It is the policy of the Trust that proxies should be voted in the interest of its shareholders, as determined by those who are in the best position to make this determination. The Trust believes that the firms and/or persons purchasing and selling securities for the Trust and analyzing the performance of the Trust's securities are in the best position and have the information necessary to vote proxies in the best interests of the Trust and its shareholders, including in situations where conflicts of interest may arise between the interests of shareholders, on one hand, and the interests of the investment adviser, a sub-adviser and/or any other affiliated person of the Trust, on the other. Accordingly, the Trust's policy shall be to delegate proxy voting responsibility to those entities with portfolio management responsibility for the Trust.

2. The Trust delegates the responsibility for voting proxies to Allianz Global Investors Fund Management LLC (AGIFM), which will in turn delegate such responsibility to the sub-adviser of the particular Trust. AGIFM's Proxy Voting Policy Summary is attached as Appendix A hereto. A summary of the detailed proxy voting policies of the Trust's current sub-adviser is set forth in Appendix B attached hereto. Such summary may be revised from time to time to reflect changes to the sub-adviser's detailed proxy voting policies.

3. The party voting the proxies (i.e., the sub-adviser) shall vote such proxies in accordance with such party's proxy voting policies and, to the extent consistent with such policies, may rely on information and/or recommendations supplied by others.

4. AGIFM and the sub-adviser of the Trust with proxy voting authority shall deliver a copy of its respective proxy voting policies and any material amendments thereto to the applicable Board of the Trust promptly after the adoption or amendment of any such policies.

5. The party voting the proxy shall: (i) maintain such records and provide such voting information as is required for the Trust's regulatory filings including, without limitation, Form N-PX and the required disclosure of policy called for by Item 18 of Form N-2 and Item 7 of Form N-CSR; and (ii) shall provide such additional information as may be requested, from time to time, by the Board or the Trust's Chief Compliance Officer.

6. This Proxy Voting Policy Statement, the Proxy Voting Policy Summary of AGIFM and summaries of the detailed proxy voting policies of the sub-adviser of the Trust with proxy voting authority and how the Trust voted proxies relating to portfolio securities held during the most recent twelve month period ending June 30, shall be made available (i) without charge, upon request, by calling 1-800-254-5197; (ii) on the Trust's website at www.allianzinvestors.com; and (iii) on the Securities and Exchange Commission's (SEC's) website at <http://www.sec.gov>. In addition, to the extent required by applicable law or determined by the Trust's Chief Compliance Officer or Board of Trustees, the Proxy Voting Policy Summary of AGIFM and a summary of the detailed proxy voting policies of the sub-adviser with proxy voting authority shall also be included in the Trust's Registration Statements or Form N-CSR filings.

ALLIANZ GLOBAL INVESTORS FUND MANAGEMENT LLC (AGIFM)

1. It is the policy of AGIFM that proxies should be voted in the interest of the shareholders of the applicable fund, as determined by those who are in the best position to make this determination. AGIFM believes that the firms and/or persons purchasing and selling securities for the funds and analyzing the performance of the funds' securities are in the best position and have the information necessary to vote proxies in the best interests of the funds and their shareholders, including in situations where conflicts of interest may arise between the interests of shareholders, on one hand, and the interests of the investment adviser, a sub-adviser and/or any other affiliated person of the fund, on the other. Accordingly, AGIFM's policy shall be to delegate proxy voting responsibility to those entities with portfolio management responsibility for the funds.
 2. AGIFM, for each fund for which it acts as investment adviser, delegates the responsibility for voting proxies to the sub-adviser for the respective fund.
 3. The party voting proxies (e.g., the sub-adviser) vote the proxies in accordance with their proxy voting policies and, to the extent consistent with their policies, may rely on information and/or recommendations supplied by others.
 4. AGIFM and each sub-adviser of a fund will deliver a copy of their respective proxy voting policies and any material amendments thereto to the board of the relevant fund promptly after the adoption or amendment of any such policies.
 5. The party voting the proxy will: (i) maintain such records and provide such voting information as is required for such funds' regulatory filings including, without limitation, Form N-PX and the required disclosure of policy called for by Item 18 of Form N-2 and Item 7 of Form N-CSR; and (ii) will provide additional information as may be requested, from time to time, by the funds' respective boards or chief compliance officers.
 6. Summaries of the proxy voting policies for AGIFM and each sub-adviser of a fund advised by AGIFM and how each fund voted proxies relating to portfolio securities held during the most recent twelve month period ended June 30 will be available (i) without charge, upon request, by calling 1-800-254-5197; (ii) on the Allianz Global Investors Distributors Web site at www.allianzinvestors.com; and (iii) on the Securities and Exchange Commission's (SEC's) website at <http://www.sec.gov>. In addition, to the extent required by applicable law or determined by the relevant fund's board of directors/trustees or chief compliance officer, summaries of the detailed proxy voting policies of AGIFM, each sub-
-

adviser and each other entity with proxy voting authority for a fund advised by AGIFM shall also be included in the Registration Statement or Form N-CSR filings for the relevant fund.

Appendix B

Allianz Global Investors Capital LLC (AGI Capital)

Description of Proxy Voting Policy and Procedures

AGI Capital votes proxies on behalf of its clients pursuant to its written Proxy Policy Guidelines and Procedures (the "Proxy Guidelines"), unless a client requests otherwise. The Proxy Guidelines are designed to honor AGI Capital's fiduciary duties to its clients and protect and enhance its clients' economic welfare and rights.

The Proxy Guidelines are established by a Proxy Committee consisting of executive, investment, client services, legal/compliance and operations personnel. The Proxy Guidelines reflect AGI Capital's normal voting positions on specific corporate actions, including but not limited to those relating to social and corporate responsibility issues, stock option plans and other management compensation issues, changes to a portfolio company's capital structure and corporate governance. For example, AGI Capital generally votes for proposals to declassify boards and generally supports proposals that remove restrictions on shareholders' ability to call special meetings independently of management. Some issues will require a case-by-case analysis.

The Proxy Guidelines largely follow the recommendations of Glass, Lewis & Co. LLC ("Glass Lewis"), an investment research and proxy advisory firm. The Proxy Guidelines may not apply to every situation and AGI Capital may vote differently than specified by the Proxy Guidelines and/or contrary to Glass Lewis' recommendation if AGI Capital reasonably determines that to do so is in its clients' best interest. Any variance from the Proxy Guidelines is documented.

In the case of a potential conflict of interest, AGI Capital's Proxy Committee will review the voting decision to ensure that the voting decision has not been affected by the potential conflict.

Under certain circumstances, AGI Capital may in its reasonable discretion refrain from voting clients' proxies due to cost or other factors.

NFJ Investment Group LLC (NFJ)

Description of Proxy Voting Policy and Procedures

NFJ typically votes proxies as part of its discretionary authority to manage accounts, unless the client has explicitly reserved the authority for itself. When voting proxies, NFJ's primary objective is to make voting decisions solely in the best economic interests of its clients. NFJ will act in a manner that it deems prudent and diligent and which is intended to enhance the economic value of the underlying portfolio securities held in

its clients' accounts.

NFJ has adopted written Proxy Voting Policies and Procedures (the "Proxy Guidelines") that are reasonably designed to ensure that it is voting in the best interest of its clients. The Proxy Guidelines reflect NFJ's general voting positions on specific corporate actions, including but not limited to those relating to social and corporate responsibility issues, stock option plans and other management compensation issues, changes to a portfolio company's capital structure and corporate governance. For example, NFJ generally votes for proposals to declassify boards and generally opposes proposals to institute supermajority voting requirements relating to business combinations. In addition, because Proxy Guidelines cannot anticipate all situations and the surrounding facts of each proxy issue, some proxy issues may require a case-by-case analysis (whether or not required by the Proxy Guidelines) and may result in a vote being cast that will deviate from the Proxy Guidelines.

In accordance with the Proxy Guidelines, NFJ may review additional criteria associated with voting proxies and evaluate the expected benefit to its clients when making an overall determination on how or whether to vote the proxy. NFJ may vote proxies individually for an account or aggregate and record votes across a group of accounts, strategy or product. In addition, NFJ may refrain from voting a proxy on behalf of its clients' accounts in certain circumstances, for example, due to de-minimis holdings, impact on the portfolio, items relating to foreign issuers (including ADRs), timing issues related to the opening/closing of accounts and contractual arrangements with clients and/or their authorized delegate. For example, NFJ may refrain from voting a proxy of a foreign issuer due to logistical considerations that may have a detrimental effect on NFJ's ability to vote the proxy. These issues may include, but are not limited to: (i) proxy statements and ballots being written in a foreign language, (ii) untimely notice of a shareholder meeting, (iii) requirements to vote proxies in person, (iv) restrictions on a foreigner's ability to exercise votes, (v) restrictions on the sale of securities for a period of time in proximity to the shareholder meeting, or (vi) requirements to provide local agents with power of attorney to facilitate the voting instructions. Such proxies are voted on a best-efforts basis.

To assist in the proxy voting process, NFJ may retain an independent third party service provider to assist in providing research, analysis and voting recommendations on corporate governance issues and corporate actions as well as assist in the administrative process. The services provided offer a variety of proxy-related services to assist in NFJ's handling of proxy voting responsibilities.

Conflicts of Interest. NFJ may have conflicts of interest that can affect how it votes its clients' proxies. For example, NFJ or an affiliate may manage a pension plan whose management is sponsoring a proxy proposal. The Proxy Guidelines are designed to prevent material conflicts of interest from affecting the manner in which NFJ votes its clients' proxies. In order to ensure that all material conflicts of interest are handled appropriately while carrying out its obligation to vote proxies, NFJ's Proxy Committee has established procedures addressing how NFJ identifies and resolves any material conflicts of interest with its clients.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES

(a)(1)

As of March 30, 2012, the following individual has primary responsibility for the day-to-day implementation of the NFJ Dividend, Interest & Premium Strategy Fund (NFJ or the Fund):

Allianz Global Investors Capital (AGI Capital)

As of March 30, 2012, the following individual has primary responsibility for the day-to-day implementation of the **Convertible Component**.

Douglas G. Forsyth, CFA
Managing Director

Doug Forsyth has portfolio management and research responsibilities for the Income and Growth Strategies team and has been a Portfolio Manager since the Fund's inception (February 2005). Prior to joining AGI Capital via a predecessor affiliate in 1994, Mr. Forsyth was a securities analyst at AEGON USA. Mr. Forsyth was previously a research assistant at The University of Iowa, where he earned his B.B.A. in finance. He has over twenty years of investment industry experience.

As of March 30, 2012 the following individual has primary responsibility for the day-to-day implementation of the **Index Option Strategy**.

Stephen Bond-Nelson
Senior Vice President

Stephen Bond-Nelson has portfolio management and research responsibilities for the Structured Products team, and has been a Portfolio Manager since the Fund's inception (February 2005). Prior to joining AGI Capital via a predecessor affiliate in 1999, he was as a research analyst/ associate with Prudential Mutual Funds. He earned his M.B.A. from Rutgers University and his B.S. from Lehigh University. He has over nineteen years of investment industry experience.

NFJ Investment Group LLC (NFJ)

Edgar Filing: NFJ DIVIDEND, INTEREST & PREMIUM STRATEGY FUND - Form N-CSR

As of March 30, 2012, the following individuals constitute the team that has primary responsibility for the day-to-day implementation of the **Equity Component**, with Mr. Fischer serving as head of the team:

Ben J. Fischer, CFA

Managing Director

Mr. Fischer is a founding partner of NFJ Investment Group LLC, a member of the Management Board of AGI Capital and has been a Portfolio Manager of the Fund since

its inception in February 2005. He has forty-six years of experience in portfolio management, investment analysis and research. Prior to founding NFJ in 1989, he was chief investment officer (institutional and fixed income), senior vice president and senior portfolio manager at NationsBank which he joined in 1971. Prior to joining NationsBank, Mr. Fischer was a securities analyst at Chase Manhattan Bank and Clark, Dodge. He earned his B.A. in Economics, a J.D. from Oklahoma University, and an M.B.A. from New York University.

L. Baxter Hines

Vice President

Mr. Hines has over six years of experience in equity research and investment consulting and has been a Portfolio Manager of the Fund since May 2010. Prior to joining NFJ Investment Group LLC, an advisory affiliate of AGI Capital, in 2008, he was with the Teacher Retirement System of Texas and worked as a market data specialist for Reuters. Mr. Hines earned his M.B.A. from the University of Texas, McCombs School of Business, and his B.A. degree in Economics from the University of Virginia.

(a) (2) **AGI Capital**

The following summarizes information regarding each of the accounts, excluding the Fund, that were managed by the Portfolio Managers as of January 31, 2012 including accounts managed by a team, committee, or other group that includes the Portfolio Managers.

PM	Other RICs		Other Accounts		Other Pooled Investment Vehicles	
	#	AUM(\$million)	#	AUM(\$million)	#	AUM(\$million)
Douglas G. Forsyth, CFA	7	4,079.2	10	1,475.9	7	747.3*
Stephen Bond-Nelson	0	0	3	21.9	7	1,255.7**

*Of these other pooled investment vehicles, two accounts totaling \$335.3 million in assets pay an advisory fee that is based in part on the performance of the account.

**Of these other pooled investment vehicles, 7 accounts totaling \$1,255.7 in assets pay an advisory fee that is based in part on the performance of the account.

NFJ

The following summarizes information regarding each of the accounts, excluding the Fund, that were managed by the Portfolio Managers as of January 31, 2012 including accounts managed by a team, committee, or other group that includes the Portfolio Managers.

Portfolio Manager	Account Type	Number of accounts		Assets Under Management 01/31/12
Ben Fischer, CFA	Other investment companies	5	\$	165.7
	Other accounts	50	\$	10,193
	Registered Investment	23	\$	23,445.9
L. Baxter Hines	Other investment companies	2	\$	85.4
	Other accounts	37	\$	8,803.6
	Registered Investment	10	\$	13,388.2

AGI Capital

Like other investment professionals with multiple clients, a Portfolio Manager for a Fund may face certain potential conflicts of interest in connection with managing both the Fund and other accounts at the same time. The paragraphs below describe some conflicts faced by investment professionals at most major financial firms.

AGI Capital has adopted compliance policies and procedures that address certain of these potential conflicts. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance (performance fee accounts) may raise potential conflicts of interest by creating an incentive to favor higher-fee accounts. These potential conflicts may include, among others:

- The most attractive investments could be allocated to higher-fee accounts or performance fee accounts.
- The trading of higher-fee accounts could be favored as to timing and/or execution price. For example, higher-fee accounts could be permitted to sell securities earlier than other accounts when a prompt sale is desirable or to buy securities at an earlier and more opportune time.
- The investment management team could focus their time and efforts primarily on higher-fee accounts due to a personal stake in compensation.

When AGI Capital considers the purchase or sale of a security to be in the best interests of a Fund as well as other accounts, AGI Capital's trading desk may, to the extent permitted by applicable laws and regulations, aggregate the securities to be sold or purchased. Aggregation of trades may create the potential for unfairness to a Fund or another account if one account is favored over another in allocating the securities purchased or sold for example, by allocating a disproportionate amount of a security that is likely to increase in value to a favored account. AGI Capital considers many factors when allocating securities among accounts, including the account's investment style, applicable investment restrictions, availability of securities, available cash and other current holdings. AGI Capital attempts to allocate investment opportunities among accounts in a fair and equitable manner. However, accounts are not assured of participating equally or at all in particular investment allocations due to such factors as noted above.

Cross trades, in which one Investment Adviser account sells a particular security to another account (potentially saving transaction costs for both accounts), may also pose a potential conflict of interest when cross trades are effected in a manner perceived to favor one client over another. For example, if the Investment Advisor crosses a trade between performance fee account and a fixed fee account that result in a benefit to the performance fee account and a detriment to the fixed fee account. AGI Capital has adopted compliance procedures that provide that all cross trades are to be made at an independent current market price, as required by law.

Another potential conflict of interest may arise from the different investment objectives and strategies of a Fund and other accounts. For example, another account may have a shorter-term investment horizon or different investment objectives, policies or restrictions than a Fund. Depending on another account's objectives or other factors, a Portfolio Manager may give advice and make decisions that may differ from advice given, or the timing or nature of decisions made, with respect to a Fund. In addition, investment decisions are subject to suitability for the particular account involved. Thus, a particular security may not be bought or sold for certain accounts even though it was bought or sold for other accounts at the same time. More rarely, a particular security may be bought for one or more accounts managed by a Portfolio Manager when one or more other accounts are selling the security (including short sales). There may be circumstances when purchases or sales of portfolio securities for one or more accounts may have an adverse effect on other accounts. AGI Capital maintains trading policies designed to provide portfolio managers an opportunity to minimize the effect that short sales in one portfolio may have on holdings in other portfolios.

A Portfolio Manager who is responsible for managing multiple accounts may devote unequal time and attention to the management of those accounts. As a result, the Portfolio Manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by a particular Portfolio Manager have different investment strategies.

A Fund's Portfolio Manager(s) may be able to select or influence the selection of the broker/dealers that are used to execute securities transactions for the Fund. In addition to executing trades, some brokers and dealers provide AGI Capital with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise be available. These services may be more beneficial to certain funds or accounts than to others. In order to be assured of continuing to receive services considered of value to its clients, AGI Capital has adopted a brokerage allocation policy embodying the concepts of Section 28(e) of the Securities Exchange Act of 1934. AGI Capital allocates the payment of brokerage commissions is subject to the requirement that the Portfolio Manager determine in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided to the Fund.

A Fund's Portfolio Manager(s) may also face other potential conflicts of interest in managing a Fund, and the description above is not a complete description of every

conflict that could be deemed to exist in managing both the Fund and other accounts. In addition, a Fund's Portfolio Manager may also manage other accounts (including their personal assets or the assets of family members) in their personal capacity.

AGI Capital's investment personnel, including each Fund's Portfolio Manager, are subject to restrictions on engaging in personal securities transactions pursuant to Allianz Asset Management of America L.P.'s Codes of Ethics, which contain provisions and requirements designed to identify and address conflicts of interest between personal investment activities and the interests of the Fund. The Code of Ethics is designed to ensure that the personal securities transactions, activities and interests of the employees of the Investment Adviser will not interfere with (i) making decisions in the best interest of advisory clients (including the Funds) or (ii) implementing such decisions while, at the same time, allowing employees to invest for their own accounts.

Potential Conflict of Interest

Like other investment professionals with multiple clients, a portfolio manager for a Fund may face certain potential conflicts of interest in connection with managing both the Fund and other accounts at the same time. The paragraphs below describe some of these potential conflicts, which NFJ believes are faced by investment professionals at most major financial firms. NFJ, the Adviser and the Trustees have adopted compliance policies and procedures that attempt to address certain of these potential conflicts. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance (performance fee accounts), may raise potential conflicts of interest by creating an incentive to favor higher-fee accounts. These potential conflicts may include, among others:

- The most attractive investments could be allocated to higher-fee accounts or performance fee accounts.
- The trading of higher-fee accounts could be favored as to timing and/or execution price. For example, higher fee accounts could be permitted to sell securities earlier than other accounts when a prompt sale is desirable or to buy securities at an earlier and more opportune time.
- The investment management team could focus their time and efforts primarily on higher-fee accounts due to a personal stake in compensation.

A potential conflict of interest may arise when a Fund and other accounts purchase or sell the same securities. On occasions when a portfolio manager considers the purchase or sale of a security to be in the best interest of a Fund as well as other accounts, the NFJ's trading desk may, to the extent by applicable laws and regulations, aggregate the securities to be sold or purchased in order to obtain the best execution and lower brokerage commissions, if any. Aggregation of trades may create the potential for unfairness to a Fund or another account if one account is favored over another in allocating securities purchased or sold—for example, by allocating a disproportionate amount of a security that is likely to increase in value to a favored account.

Another potential conflict of interest may arise based on the different investment objectives and strategies of a Fund and other accounts. For example, another account may have a shorter-term investment horizon or different investment objective, policies or restrictions than a Fund. Depending on another account's objectives or other factors, a portfolio manager may give advice and make decisions that may differ from advice given, or the timing or nature of decision made, with respect to a Fund. In addition, investment decisions are the product of many factors in addition to basic suitability for the particular account involved. Thus, a particular security may be bought or sold for certain accounts even though it could have been bought or sold for other accounts at the same time. More rarely, a particular security may be bought for one or more accounts managed by a portfolio manager when one or more other accounts are selling the security. There may be circumstances when purchased or sales of portfolio securities for one or more accounts may have an adverse effect on other accounts.

Portfolio managers are responsible for managing multiple funds and/or accounts with unequal time and attention to the management of those funds and/or accounts. As a result, the portfolio manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by a particular portfolio manager have different investment strategies.

A Fund's portfolio managers may be able to select or influence the selection of the brokers and dealers that are used to execute securities transactions for the Funds. In addition to executing trades, some brokers and dealers provide portfolio managers with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise been available. These services may be more beneficial to certain funds or accounts than to others. Although the payment of brokerage commissions is subject to the requirement that the portfolio manager determine in good faith and the commissions are reasonable in relation to the value of the brokerage and research services provided to the Fund and NFJ's other clients, a portfolio manager's decision as to the selection of brokers and dealers could yield disproportionate costs and benefits among the funds and/or accounts that he or she manages.

A Fund's portfolio managers may also face other potential conflicts of interest in managing a Fund, and the description above is not a complete description of every conflict that could be deemed to exist in managing both the Funds and other accounts. In addition, a Fund's portfolio manager may also manage other accounts (including their personal assets or the assets of family members) in their personal capacity. The management of these accounts may also involve certain of the potential conflicts described above. Front-running could also exist if a portfolio manager transacted in his own account prior to placing an order for a Fund or other clients. NFJ's investment personnel, including each Fund's portfolio manager, are subject to restrictions on engaging in personal securities transactions, pursuant to a Code of Ethics adopted by NFJ, which contain provisions and requirements designed to identify and address certain conflicts of interest between personal investments activities and the interest of the Funds.

As part of NFJ's Compliance Program, NFJ has established a Compliance Committee, a Best Execution Committee, a Proxy Voting Committee and a Pricing Committee to help develop policies and procedures that help NFJ avoid, mitigate, monitor and oversee areas that could present potential conflicts of interest.

(a) (3) **AGI Capital**

As of January 31, 2012, the following explains the compensation structure of each individual (as listed in the Prospectus) that shares primary responsibility for day-to-day portfolio management of the Fund (for the purposes of this section, "Portfolio Managers"):

AGI Capital's compensation plan is designed specifically to be aligned with the interests of our clients. We aim to provide rewards for exceptional investment performance and build an enduring firm with a long-term culture of shared success. To that end, in addition to competitive base salaries, we offer both short- and long-term incentive plans.

Compensation and Investment Performance

Short-term incentive pools for investment teams are annual discretionary bonuses funded by the firm's revenue and allocated based on the performance of the strategies and the teams. The percentage allocated to an investment team is adjusted to reflect performance relative to the benchmark over a one-, three-, and five-year period (the timeframe may vary depending on the strategy). The team pools are then subjectively allocated to team members based on individual contributions to client accounts. This revenue sharing arrangement directly aligns compensation with investment performance.

Long-Term Incentive Plan

A Long-Term Incentive plan provides rewards to certain key staff and executives of Allianz Global Investors' companies to promote long-term growth and profitability. The plan is based on the operating earnings growth of Allianz Global Investors in the U.S. and globally. The plan has a three-year vesting schedule and is paid in cash upon vesting.

Overall, we believe that competitive compensation is essential to retaining top industry talent. With that in mind, we continually reevaluate our compensation policies against industry benchmarks. Our goal is to offer portfolio managers and analysts compensation and benefits in the top quartile for comparable experience, as measured by industry benchmarks surveyed by independent firms including McLagan Partners.

NEI

The following information is provided as of January 31, 2012.

Our compensation plan is designed specifically to be aligned with the interests of our clients. We aim to provide rewards for exceptional investment performance and build an enduring firm with a long-term culture of shared success. To that end, in addition to competitive base salaries, we offer both short- and long-term incentive plans.

Compensation and Investment Performance

The short-term incentive pools for the NFJ investment team are annual discretionary bonuses directly related to the revenue of the investment business and the performance of the investment strategies relative to their individual benchmarks over a five-year period. The percentage allocated to the investment team increases based on the number of strategies outperforming. The pool is then subjectively allocated to team members based on individual contributions. This revenue sharing arrangement directly aligns compensation with investment performance.

Long-Term Incentive Plan

A Long-Term Incentive plan provides rewards to certain key staff and executives of Allianz Global Investors companies to promote long-term growth and profitability. The plan is based on the operating earnings growth of Allianz Global Investors in the U.S. and globally. The plan has a three-year vesting schedule and is paid in cash upon vesting.

Overall, we believe that competitive compensation is essential to retaining top industry talent. With that in mind, we continually reevaluate our compensation policies against industry benchmarks. Our goal is to offer portfolio managers and analysts compensation and benefits in the top quartile for comparable experience, as measured by industry benchmarks surveyed by independent firms such as McLagan and ECS (Watson Wyatt Data Services).

(a)(4)

The following summarizes the dollar range of securities each portfolio manager for the Fund beneficially owned of the Fund that he managed as of January 31, 2012.

NFJ Dividend Interest and Premium Strategy

	PM Ownership
Doug Forsyth, CFA	None
