## Use of Non-GAAP Financial Information

In addition to reporting financial results in accordance with generally accepted accounting principles (GAAP), Radware uses non-GAAP measures of net income and earnings per share, which are adjustments from results based on GAAP to exclude stock-based compensation expenses, in accordance with ASC No. 718, amortization of intangible assets, acquisition-related expenses and exchange rate differences, net on balance sheet items included in finance

income. Such exchange rate differences may vary from period to period due to changes in exchange rates driven by general market conditions or other circumstances outside of the normal course of Radware's operations. Management believes that exclusion of these charges allows comparisons of operating results that are consistent across past, present and future periods. Radware's management believes the non-GAAP financial information provided in this release is useful to investors for the purpose of understanding and assessing Radware's ongoing operations. The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for results prepared in accordance with GAAP. A reconciliation of the non-GAAP financial measures discussed in this press release, to the most directly comparable GAAP financial measures, is included with the financial information contained in this press release. Management uses both GAAP and non-GAAP information in evaluating and operating business internally and, as such, has determined that it is important to provide this information to investors.
