Report on review of condensed

interim accounting information

To the Board of Directors and Stockholders

Vale S.A.

Introduction

We have reviewed the accompanying balance sheet of Vale S.A. (the Company) as of March 31, 2012, and the related statements of income, comprehensive income, changes in equity and cash flows for three-month period then ended.

We have also reviewed the accompanying consolidated balance sheet of Vale S.A. and its subsidiaries (Consolidated) as of March 31, 2012, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for three-month period then ended.

Management is responsible for the preparation of the Company condensed interim accounting information in accordance with the accounting standard CPC 21, Interim Financial Reporting, issued by the Brazilian Accounting Pronouncements Committee (CPC), and the consolidated condensed interim accounting information in accordance with accounting standard CPC 21 and International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB). Our responsibility is to express a conclusion on these condensed interim accounting information based on our review.

Scope of review

Edgar Filing: Vale S.A. - Form 6-K

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - *Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the condensed interim

accounting information of the Company

Based on our review, nothing has come to our attention that causes us to believe that the condensed interim accounting information of the Company referred to above is not prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the interim financial information.

Conclusion on the consolidated

condensed interim accounting information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated condensed interim accounting information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the interim financial information.

Other matters interim statements

of value added

We have also reviewed the Company and the consolidated interim statements of value added for the three-month period ended March 31, 2012, presented as supplementary information. These statements have been submitted to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they are not properly prepared, in all material respects, in relation to the condensed interim accounting information taken as a whole.

2 - Basis of presentation

The financial statements have been prepared considering historical cost as the basis of value and adjusted to reflect the financial assets available for sale, and financial assets and liabilities (including derivative instruments) measured at fair value against income. The financial statements for the periods of three months ended March 31, 2012, December 31, 2011, March 31, 2011 are unaudited. However, the interim financial statements follow the principles, methods and standards in relation to those adopted at the close of last fiscal year ended December 31, 2011 and therefore should be read in conjunction therewith.

In preparing the interim financial statements the use of estimates is required to account for certain assets, liabilities and transactions. Consequently, the Company's interim financial statements include various estimates regarding useful lives of fixed assets, provisions for losses on assets, contingencies, operating provisions and other similar evaluations. The actual results of operations for the quarterly periods are not necessarily an indication of expected results for the fiscal year to end on December 31, 2012.

a) Consolidated interim financial statements

The consolidated financial statements of the company have been prepared and are presented according to the Accounting Pronouncements Committee - CPC 21 (R1) Interim Statements, equivalent to International Accounting Standard IAS 34 - Interim Financial Reporting.

Table of Contents**b) Parent company interim financial statements**

The interim financial statements of the individual parent have been prepared under the Accounting Pronouncements Committee - CPC 21 (R1) Interim Statements are presented with the consolidated interim financial statements.

In the case of Vale, CPC 21 applied to individual interim financial statements differs from IAS 34, applied to the separate financial statements, only in the valuation of investments by the equity method in subsidiaries and affiliates, as according to IAS 34, cost or fair value would be used.

c) Transactions and balances in foreign exchange

Operations with other currencies are translated into the functional currency of the parent company, Brazilian Reals (BRL or R\$), using the actual exchange rate on the transaction dates (or, if unavailable, the first available exchange rate). The foreign exchange gains and losses resulting from the settlement of these transactions and from the translation by exchange rates at the end of the year, relating to monetary assets and liabilities in other currencies, are recognized in the statement of income as financial expense or income.

The quotations of major currencies that impact our operations were:

The tax contingencies refer mainly to discussion relating to the recovery of Income Tax and Social Contribution, calculated based on the equity method in foreign subsidiaries.

Table of Contents**19 - Asset retirement obligation**

The Company uses various judgments and assumptions when measuring the obligations related to the discontinuation of the use of assets. The accrued amount is not deducted from the potential costs covered by insurance or indemnities, because their recovery is considered uncertain.

Long term interest rates used to discount to present value and update the provision to March 31, 2012 and December 31, 2011 were 5.82% p.y. and 5.82% p.y. respectively. The liability is periodically updated based on these discount rates plus the inflation index (IGPM) for the period in reference.

The variation in the provision for asset retirement is demonstrated as follows:

Vale has tax incentives for the partial reduction of income tax due, the amount equivalent to the portion assigned by tax law to transactions in the north and northeast relating to iron pellets (from 2011), railroad, manganese, copper and potassium. The incentive is calculated based on the profit tax on activity (called operating income), takes into account the allocation of operating profit encouraged by the level of production during the periods specified as a benefit for each product, and in general are for 10 years and in the case of the Company, expire by 2020. An amount equal to the tax saving should be appropriated to a profit reserve in equity, and may not be distributed as dividends to stockholders.

Besides this, part of the income tax can be reinvested in the purchase of equipment in encouraged operation, subject to subsequent approval by the regulatory agency in the encouragement area Amazon Development Superintendence (SUDAM) and the Northeast Development Superintendence (SUDENE). When his reinvestment is approved, tax relief is also appropriated a revenue reserve, where distribution as dividends to stockholders is impeded.

The Company also has tax incentives related to production of nickel from New Caledonia Valley (VNC). These incentives include tax holidays, total income tax during the construction phase of the project, and also for a period of 15 years beginning in the first year of commercial production as defined by applicable law, followed by 5.50% years. In addition, VNC is eligible for certain exemptions from indirect taxes such as import tax during the construction phase and throughout the commercial life of the project. Some of these tax benefits, including temporary tax incentives, are subject to an earlier end, should the project achieve a specified cumulative rate of return. The VNC is subject to taxation of a portion of income commencing on the first year of commercial production is achieved, as defined by applicable law. Until now, there was no taxable income generated in New Caledonia. The Company also received tax incentives for projects in Mozambique, Oman and Malaysia.

The Company is subject to revision of income tax by tax authorities for up to five years in companies operating in Brazil, ten years for operations in Indonesia and up to seven years for companies with operations in Canada.

c) Long-term incentives Plan

In order to encourage the vision of stockholder, in addition to increasing the ability to retain executives and strengthen the culture of sustained performance, the Board of Directors approved a Long-term incentive plan for some of the executives of the Company, covering cycles of three years.

Under the terms of the plan, participants may allocate a portion of their annual bonus to the plan. The part of the bonus allocated to the plan is used by the executive to purchase preferred shares of Vale, through a predefined financial institution on market conditions and without any benefit provided by Vale.

The shares purchased by the executive have no restrictions and may, in accordance with criteria for each participant, to be sold at any time. However, the shares must be retained for a period of three years and executives must keep their employment with the Valley during this period. The participant is thus to be entitled to receive from the Valley, a cash payment equivalent to the amount of shares held based on market quotations. The total number of shares subject to the plan on March 31, 2012 and December 31, 2011 are 4,880,468 and 3,012,538, respectively.

Additionally, certain executives eligible for long-term incentive have the opportunity to receive at the end of a cycle of three years a monetary value equivalent to market value of a number of actions based on assessment of their careers and performance factors measured as an indicator of total return to shareholders.

Liabilities are measured at fair value on the date of each issuance of the report, based on market rates.

Compensation costs incurred are recognized by the defined vesting period of three years. On March 31, 2012, December 31, 2011 and March 31, 2011, we recognized a liability of R\$ 109,324, R\$ 203,645 and R\$ 206,184, respectively, in the result.

23 - Fair Value Estimative

Due to the short-term cycle, it is assumed that the fair value of cash and cash equivalents balances, short-term investments, accounts receivable and accounts payable are close to their book values. For measurement and determination of fair value, the Company uses various methods including market approaches, income or cost, in order to estimate the value that market participants would use when pricing the asset or liability. The financial assets and liabilities recorded at fair value should be classified and disclosed in accordance with the following levels:

Level 1 Unadjusted quoted prices on an active, liquid and visible market for identical assets or liabilities that are accessible at the measurement date;

Level 2 - Quoted prices (adjusted or unadjusted) for identical or similar assets or liabilities on active markets; and

Level 3 - Assets and liabilities, where quoted prices, do not exist, or where prices or valuation techniques are supported by little or no market activity, unobservable or illiquid.

The tables below present the assets and liabilities of the parent and the consolidated company measured at fair value on March 31, 2012 and December 31, 2011.

a) Methods and Techniques of Evaluation

i. Assets and liabilities at fair value through profits or loss

Comprise derivatives not designated as hedges and stockholders debentures.

• Derivatives designated or not as hedge

The financial instruments were evaluated by calculating their present value through the use of curves that impact the instrument on the dates of verification. The curves and prices used in the calculation for each group of instruments are detailed in the market curves .

The pricing method used in the case of European options is the Black & Scholes model. In this model, the fair value of the derivative is a function of volatility and price of the underlying asset, the exercise price of the option, the interest rate and period to maturity. In the case of options when the income is a function of the average price of the underlying asset over a

Table of Contents

period of life of the option, called Asian, we use the model of Turnbull & Wakeman. In this model, besides the factors that influence the option price in the Black-Scholes model, is considered the forming period of the average price.

In the case of swaps, both the present value of the active tip and the passive tip are estimated by discounting cash flows by the interest rate of the currency in which the swap is denominated. The difference between the present value of active tip and passive tip of swap generates its fair value.

In the case of swaps tied to TJLP Long-Term Interest Rate, the calculation of fair value considers the TJLP constant, that is, projections of future cash flows in Brazilian Real are made considering the last TJLP disclosed.

Contracts for the purchase or sale of products, inputs and costs of selling with future settlement are priced using the forward curves for each product. Typically, these curves are obtained in the stock exchange where the products are traded, such as the London Metals Exchange-LME), the Commodity Exchange-COMEX or other providers of market prices. When there is no price for the desired maturity, Vale uses interpolation between the available maturities.

• **Stockholders Debentures**

Comprise the debentures issued on behalf of the privatization process (see note 27(b)), whose fair values are measured based on market approach, and its reference prices are available on the secondary market.

ii. **Assets available-for-sales**

Comprise the assets that are not held-to-maturity, for strategic reasons. Comprise investments that are valued based on quoted prices in active markets where available, or internal assessments based on expected future cash flows of the assets.

b) **Fair value measurement compared to book value**

Edgar Filing: Vale S.A. - Form 6-K

For the loans allocated in the level 1, the evaluation method used to estimate the fair value of debt is the market approach to the contracts listed on the secondary market. And for the loans allocated in the level 2, the fair value for both fixed-indexed rate debt and floating rate is determined from the discounted cash flow using the future values of the Libor rate and the curve of Vale's Bonds (income approach).

The fair values and carrying amounts of non-current loans (net of interest) are shown in the table below:

The Stockholders Equity is represented by common and preferred non-redeemable shares without par value. Preferred shares have the same rights as common shares, with the exception of voting for election of members of the Board of Directors. The Board of Directors may, regardless of changes to bylaws, issue new shares (authorized capital), including the capitalization of profits and reserves to the extent authorized.

In March 31 2012, the capital was R\$75,000,000 corresponding to 5,365,304,100 (3,256,724,482 common and 2,108,579,618 preferred) shares with no par value.

Edgar Filing: Vale S.A. - Form 6-K

The notes pay a quarterly coupon and are entitled to an additional remuneration equivalent to the cash distribution paid to ADS holders. These notes were classified as a capital instrument, mainly due to the fact that neither the Company nor the holders have the option to settle the operation, whether fully or partially, with cash, and the conversion is mandatory. Consequently, they were recognized as a specific component of shareholders' equity, net of financial charges.

The funds linked to future mandatory conversion, net of financial charges, are equivalent to the maximum of common shares and preferred shares as reported below. All the shares are currently held in treasury.

| Series | Maximum amount of shares | | Amount (thousands of reais) | |

Additional information about derivatives financial instruments

Value at Risk computation methodology

The Value at Risk of the positions was measured using a delta-Normal parametric approach, which considers that the future distribution of the risk factors - and its correlations - tends to present the same statistic properties verified in the historical data. The value at risk of Vale's derivatives current positions was estimated considering one business day time horizon and a 95% confidence level.

Contracts subjected to margin calls

Vale has contracts subject to margin calls only for part of nickel trades executed by its wholly-owned subsidiary Vale Canada Ltd. The total cash amount as of March 31, 2012 is not relevant.

Table of Contents

Initial Cost of Contracts

The financial derivatives negotiated by Vale and its controlled companies described in this document didn't have initial costs (initial cash flow) associated.

The following tables show as of March 31, 2012, the derivatives positions for Vale and controlled companies with the following information: notional amount, fair value, value at risk, gains or losses in the period and the fair value for the remaining years of the operations per each group of instruments.

BRL/USD Exchange Rate Adopted in Fair Value Calculation

According with accounting principles, the fair values of derivative instruments originally negotiated in American dollar were transform in BRL values with the objective of publish in the Vale's official currency using PTAX (sell) published by BACEN to April 02, 2012, that is 1.8314.

Protection program for the Real denominated debt indexed to CDI

- **CDI vs. USD fixed rate swap** In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian Reais linked to CDI to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to CDI.
- **CDI vs. USD floating rate swap** In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian Reais linked to CDI to U.S. Dollars. In those swaps, Vale pays floating rates in U.S. Dollars (Libor - London Interbank Offered Rate) and receives payments linked to CDI.

Protection program for the real denominated debt indexed to TJLP

- **TJLP vs. USD fixed rate swap** In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows of the loans with Banco Nacional de Desenvolvimento Econômico e Social (BNDES) from TJLP(1) to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to TJLP.

(1) Due to TJLP derivatives market liquidity constraints, some swap trades were done through CDI equivalency.

Foreign Exchange cash flow hedge

- **Brazilian Real fixed rate vs. USD fixed rate swap** In order to reduce the cash flow volatility, Vale entered into swap transactions to mitigate the foreign exchange exposure that arises from the currency mismatch between the revenues denominated in U.S. Dollars and the disbursements and investments denominated in Brazilian Reals.

Protection program for Euro denominated debt

- **EUR fixed rate vs. USD fixed rate swap:** In order to hedge the cash flow volatility, Vale entered into a swap transaction to convert the cash flows from loans in Euros linked to fixed rate to U.S. Dollars linked to fixed rate. Vale receives fixed rates in Euros and pays fixed rates in U.S. Dollars. This trade was used to convert the cash flow of a debt in Euros, with an outstanding notional amount of 750 million, issued in 2010 by Vale.

Table of Contents**Commodity Derivative Positions**

The Company's cash flow is also exposed to several market risks associated to global commodities price volatilities. To offset these volatilities, Vale contracted the following derivatives transactions:

Nickel Sales Hedging Program

In order to reduce the cash flow volatility in 2012, hedging transactions were implemented. These transactions fixed the prices of part of the sales in the period.

Nickel Fixed Price Program

In order to maintain the exposure to Nickel price fluctuations, we entered into derivatives to convert to floating prices all contracts with clients that required a fixed price. These trades aim to guarantee that the prices of these operations would be the same of the average prices negotiated in LME in the date the product is delivered to the client. It normally involves buying Nickel forwards (Over-the-Counter) or futures (exchange negotiated). Those operations are usually reverted before the maturity in order to match the settlement dates of the commercial contracts in

which the prices are fixed. Whenever the Nickel Sales Hedging Program is executed, the Nickel Fixed Price Program is interrupted.

Nickel Purchase Protection Program

In order to reduce the cash flow volatility and eliminate the mismatch between the pricing of the purchased nickel (concentrate, cathode, sinter and others) and the pricing of the final product sold to our clients, hedging transactions were implemented. The items purchased are raw materials utilized to produce refined Nickel. The trades are usually implemented by the sale of nickel forward or future contracts at LME or over-the-counter operations.

Table of Contents**Copper Scrap Purchase Protection Program**

This program was implemented in order to reduce the cash flow volatility due to the quotation period mismatch between the pricing period of copper scrap purchase and the pricing period of final products sale to the clients, as the copper scrap combined with other raw materials or inputs of Vale's wholly-owned subsidiary, Vale Canada Ltd, to produce copper. This program usually is implemented by the sale of forwards or futures at LME or Over-the-Counter operations.

Embedded Derivative Positions

The Company's cash flow is also exposed to several market risks associated to contracts that contain embedded derivatives or derivative-like features. From Vale's perspective, it may include, but is not limited to, commercial contracts, procurement contracts, rental contracts, bonds, insurance policies and loans. The following embedded derivatives were observed in 2012:

Raw material and intermediate products purchase

Edgar Filing: Vale S.A. - Form 6-K

Nickel concentrate and raw materials purchase agreements, in which there are provisions based on nickel and copper future prices behavior. These provisions are considered as embedded derivatives.

We present below the sensitivity analysis for all derivatives outstanding positions as of March 31, 2012 given predefined scenarios for market risk factors behavior. The scenarios were defined as follows:

- Fair Value: the fair value of the instruments as at March 30th , 2012;
- Scenario I: unfavorable change of 25% - Potential losses considering a shock of 25% in the market risk factors used for MtM calculation that negatively impacts the fair value of Vale s derivatives positions;
- Scenario II: favorable change of 25% - Potential profits considering a shock of 25% in the market curves used for MtM calculation that positively impacts the fair value of Vale s derivatives positions;
- Scenario III: unfavorable change of 50% - Potential losses considering a shock of 50% in the market curves used for MtM calculation that negatively impacts the fair value of Vale s derivatives positions;
- Scenario IV: favorable change of 50% - Potential profits considering a shock of 50% in the market curves used for MtM calculation that positively impacts the fair value of Vale s derivatives positions;

Financial counterparties ratings

Derivatives transactions are executed with financial institutions that we consider to have a very good credit quality. The exposure limits to financial institutions are proposed annually for the Executive Risk Committee and approved by the Executive Board. The financial institutions credit risk tracking is performed making use of a credit risk valuation methodology which considers, among other information, published ratings provided by international rating agencies. In the table below, we present the ratings in foreign currency published by Moody's and S&P agencies for the financial institutions that we had outstanding trades as of March 31, 2012.

29 - Commitments

a) Nickel project New Caledonia

The construction and installation of our processing plant for nickel and cobalt in New Caledonia, we provide significant assurance to our financing agreements, which are listed below.

In connection with the Girardin tax law arrangement sponsored by the french government which gives advantage to financial leasing operations, Vale warrants to BNP Paribas, a tax investors according to French law, certain payments due by VNC. Vale also committed that the assets associated with the finance lease would be determined by the Girardin Act substantially completed by December 31, 2011. Due to the delay in the start-up operations of the VNC, Vale has proposed an extension of this deadline to December 31, 2012. The French government and tax investors formally agreed to this extension. The likelihood of the guarantee is sought is remote.

Sumic Nickel Netherlands BV (Sumic), which owns 21% of the shares of VNC has an option to sell is worth 25%, 50% or 100% of its shares of VNC to set the cost of the initial project development of nickel cobalt, as defined by the VNC funding in local currency and converted to U.S. dollars at exchange rates specific funding in the form of Girardin, shareholder loans and capital contributions by shareholders to the VNC, exceed the limit of R\$8.4 billion (equivalent to US\$4.6 billion) and an agreement is not reached on how to proceed with the project. On May 27, 2010, the limit was reached. Vale agreed with Sumic a further extension of the sales option for 1 January 2012 and is in the process of finalizing a further extension to the beginning of the discussion and decision of choice for March 1, 2012. Currently, the Company discusses with Sumic about continued participation in the VNC, and expects to reach a resolution during the third quarter of 2012, following a process that occurs more than five months.

Moreover, throughout our operations, we have letters of credit and guarantees amounting to R\$1.4 billion (equivalent to US\$762 million) that are associated with items such as environmental claims, asset retirement obligations, insurance, electricity commitments, benefits post-retirement agreements, community service and import and export commitments.

b) Participative Debentures

At the time of privatization in 1997, Vale debentures issued to existing shareholders, including the Brazilian Government. The terms of the debentures were established to ensure that the pre-privatization shareholders, participate in possible future benefits that could be obtained from the exploitation of certain mineral resources.

A total of 388,559,056 debentures were issued at a par value of R\$0.01 (one cent real), whose value will be adjusted according to the variation of the General Market Price (IGP-M), as defined in the Indenture. In March 31, 2012 and December 31, 2011 the value of these debentures at fair value totaled R\$2,495,995 and R\$2,674,090, respectively.

The debenture holders are entitled to receive awards, payable semiannually, equivalent to a percentage of net revenues of certain mineral resources as the indenture. In April 2012, compensation was paid to these debentures in the amount of R\$ 11,399.

c) Operational lease
