Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR
Letter from the president
Dear Shareholder,
We are pleased to provide the annual report of Western Asset Premier Bond Fund for the twelve-month reporting period ended December 31, 2012. Please read on for a detailed look at prevailing economic and market conditions during the Fund s reporting period and to learn how those conditions have affected Fund performance.

Recent regulations adopted by the Commodity Futures Trading Commission (the CFTC) require operators of registered investment companies, including closed-end funds, to register as commodity pool operators unless the fund limits its investments in commodity interests. Effective December 31, 2012, your Fund s manager has claimed the exclusion from the definition of commodity pool operator. More information about the CFTC rules and their effect on the Fund is included later in this report on page 48.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website, www.lmcef.com. Here you can gain immediate access to market and investment information, including:

• Fund prices and performance,
Market insights and commentaries from our portfolio managers, and
• A host of educational resources.
We look forward to helping you meet your financial goals.
Sincerely,
R. Jay Gerken, CFA
President

Investment commentary

Economic review

The U.S. economy continued to grow over the twelve months ended December 31, 2012, but it did so at an uneven pace. U.S. gross domestic product (GDP) igrowth, as reported by the U.S. Department of Commerce, was 2.0% in the first quarter of 2012. The economy then slowed in the second quarter, as GDP growth was a tepid 1.3%. Economic growth accelerated to 3.1% in the third quarter, partially due to increased private inventory investment, higher federal government spending and moderating imports. However, this was a temporary uptick, as the Commerce Department s initial estimate showed that fourth quarter GDP contracted 0.1%. This was the first negative reading since the second quarter of 2009, and was driven by a reversal of the above factors, as private inventory investment and federal government spending weakened.

While there was some improvement in the U.S. job market, unemployment remained elevated throughout the reporting period. When the period began, unemployment, as reported by the U.S. Department of Labor, was 8.3%. Unemployment then generally declined and was 7.8% in September 2012, the lowest rate since January 2009, but still high by historical standards. The unemployment rate then rose to 7.9% in October, before falling to 7.8% in November, where it remained in December. The number of longer-term unemployed continued to be a headwind for the economy, as roughly 39% of the 12.2 million people without a job have been out of work for more than six months.

Meanwhile, the housing market brightened, as sales generally improved and home prices continued to rebound. According to the National Association of Realtors (NAR), while existing-home sales dipped 1.0%% on a seasonally adjusted basis in December 2012 versus the previous month, they were still 12.8% higher than in December 2011. In addition, the NAR reported that the median existing-home price for all housing types was \$180,800 in December 2012, up 11.5% from December 2011. This marked the tenth consecutive month that home prices rose compared to the same period a year earlier. Furthermore, the inventory of homes available for sale fell 8.5% in December, which represents a 4.4 month supply at the current sales pace. This represents the lowest inventory since May 2005.

The manufacturing sector expanded during much of the reporting period, although it experienced several soft patches. Based on the Institute for Supply Management s PMI (PMI) ii, after expanding 34 consecutive months, the PMI fell to 49.7 in June 2012, which represented the first contraction in the manufacturing sector since July 2009 (a reading below 50 indicates a contraction, whereas a reading above 50 indicates an expansion). Manufacturing continued to contract in July and August before ticking up to 51.5 in September and 51.7 in October. The PMI fell back to contraction territory with a reading of 49.5 in November, its lowest level since July 2009. However, manufacturing again expanded in December, with the PMI increasing to 50.7.

The Federal Reserve Board (Fed) iii took a number of actions as it sought to meet its dual mandate of fostering maximum employment and price stability. As has been the case since December 2008, the Fed kept the federal funds rateiv at a historically low range between zero and 0.25%. In January 2012, the Fed extended the period it expects to keep rates on

IV Western Asset Premier Bond Fund	
Investment commentary (cont d)	
hold until at least through late 2014. At its June 2012 meeting, the Fed announced that it would continue its program of purchasing longer-terr Treasury securities and selling an equal amount of shorter-term Treasury securities (often referred to as Operation Twist) until the end of 2 In September, the Fed announced a third round of quantitative easing (QE3), which involves purchasing \$40 billion each month of agency mortgage-backed securities on an open-end basis. In addition, the Fed further extended the duration that it expects to keep the federal funds ra on hold, until at least mid-2015. Finally, at its meeting in December, the Fed announced that it would continue purchasing \$40 billion per mor of agency mortgage-backed securities, as well as initially purchasing \$45 billion a month of longer-term Treasuries. The Fed also said that it would keep the federal funds rate on holdas long as the unemployment rate remains above 6.5%, inflation between one and two years ahea projected to be no more than a half percentage point above the Committee s 2.0% longer-run goal, and longer-term inflation expectations continue to be well anchored.	012. ite nth
As always, thank you for your confidence in our stewardship of your assets.	
Sincerely,

i Gross domestic product (GDP) is the market value of all final goods and services produced within a country in a given period of	time.
The Institute for Supply Management s PMI is based on a survey of purchasing executives who buy the raw materials for manufactuat more than 350 companies. It offers an early reading on the health of the manufacturing sector.	ring

- The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.
- The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.

Western Asset Premier Bond Fund 2012 Annual Report

1

Fund overview

Q. What is the Fund s investment strategy?

A. The Fund s investment objective is to provide current income and capital appreciation by investing primarily in a diversified portfolio of investment grade bonds. Under normal market conditions, the Fund expects to invest substantially all (but at least 80%) of its total managed assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities, and at least 65% of its total managed assets in bonds that, at the time of purchase, are of investment grade quality. The Fund may invest up to 35% of its total managed assets in bonds of below investment grade quality at the time of purchase. The Fund may invest in securities or instruments other than bonds (including preferred stock) and may invest up to 10% of its total managed assets in instruments denominated in currencies other than the U.S. dollar. The Fund expects that the average effective duration of its portfolio will range between 3.5 and seven years, although this target duration may change from time to time.

At Western Asset Management Company (Western Asset), the Fund's adviser, we utilize a fixed-income team approach, with decisions derived from interaction among various investment management sector specialists. The sector teams are comprised of Western Asset's senior portfolio management personnel, research analysts and an in-house economist. Under this team approach, management of client fixed-income portfolios will reflect a consensus of interdisciplinary views within the Western Asset organization. The individuals responsible for development of investment strategy, day-to-day portfolio management, oversight and coordination of the Fund are Stephen A. Walsh, Michael C. Buchanan, Paul Jablansky and Christopher F. Kilpatrick.

O. What were the overall market conditions during the Funds reporting period?

A. The spread sectors (non-Treasuries) overcame several periods of heightened risk aversion and outperformed equal-durationii Treasuries over the twelve months ended December 31, 2012. To a great extent, demand for the spread sectors was robust during the first two months of the reporting period. This was due to several factors, including signs that the U.S. economy was gathering momentum and some progress in the European sovereign debt crisis. However, fears that the economy may be experiencing a soft patch and contagion fears from Europe led to flights to quality during portions of March, April and May 2012. The spread sectors then generally rallied over the last seven months of the period as investor sentiment was largely positive.

Short-term U.S. Treasury yields fluctuated in 2012, but ended the year where they began. In contrast, 10-year Treasury yields fell from 1.89% to 1.78% during the twelve months ended December 31, 2012. When the period began, two-year Treasury yields were 0.25%. They moved as low as 0.21% on January 17, 2012 and as high as 0.41% on March 20, 2012. Ten-year Treasury yields were 1.89% at the beginning of the period and peaked at 2.39% on March 19, 2012. On July 25, 2012, ten-year Treasuries closed at an all-time low of 1.43%. Yields then moved higher due to some positive developments in Europe and additional Federal Reserve Board (Fed) iii actions to stimulate the economy. When the reporting period

	2	Western	Asset	Premier	Bond	Fund	2012	Annual	Report
--	---	---------	-------	---------	------	------	------	--------	--------

Fund overview (cont d)

ended on December 31, 2012, two-year Treasury yields were 0.25% and ten-year Treasury yields were 1.78%.

All told, the Barclays U.S. Aggregate Indexiv returned 4.22% for the twelve months ended December 31, 2012. Comparatively, riskier fixed-income securities, including high-yield bonds produced superior results. Over the fiscal year, the Barclays U.S. Corporate High Yield 2% Issuer Cap Indexv gained 15.78%. During this period, as measured by the Barclays U.S. Corporate High Yield 2% Issuer Cap Index, lower-quality CCC-rated bonds outperformed higher-quality BB-rated securities, as they returned 18.34% and 14.49%, respectively.

Q. How did we respond to these changing market conditions?

A. A number of adjustments were made to the Fund during the reporting period as valuations changed. We increased the Fund s allocations to investment grade Financials and U.S. and European high-yield corporate bonds, emerging markets and cash. In contrast, we reduced our largest allocation to strong performing non-agency mortgage-backed securities (MBS) with valuations becoming less compelling as the year progressed. By the end of the period, we eliminated the Fund s small municipal bond position and reduced our modest position in commercial mortgage-backed securities (CMBS).

During the reporting period, we utilized leverage in the Fund. This contributed to results given the market s positive results. We ended the period with leverage as a percentage of gross assets of roughly 29%, a reduction of nearly 3% from the beginning of the year.

During the reporting period, the Fund held credit default swaps in an attempt to generate incremental returns from relative value trades in the CMBS sector. These derivative instruments modestly contributed to performance. Currency forwards were used to hedge the Fund s currency risk and manage our exposure to the euro. The gains or losses in our currency hedges are intended to offset the gains or declines in the value of our euro bonds when translated back to U.S. dollars. Currency forwards contributed to performance. All told, derivatives had a small positive impact to the Fund s net performance during the reporting period.

Performance review

For the twelve months ended December 31, 2012, Western Asset Premier Bond Fund returned 24.90% based on its net asset value (NAV) vi and 6.16% based on its New York Stock Exchange (NYSE) market price per share. The Funds unmanaged benchmarks, the Barclays U.S. Corporate High Yield Indexvii and the Barclays U.S. Credit Indexviii, returned 15.81% and 9.39%, respectively, for the same period. The Lipper Corporate Debt Closed-End Funds BBB-Rated Category Averageix returned 15.61% over the same time frame. Please note that Lipper performance returns are based on each funds NAV.

During the twelve-month period, the Fund made distributions to shareholders totaling 1.32 per share. The performance table shows the Fund s twelve-month total return based on its

All figures represent past performance and are not a guarantee of future results.

* Total returns are based on changes in NAV or market price, respectively.

Total return assumes the reinvestment of all distributions at NAV.

Total return assumes the reinvestment of all distributions in additional shares in accordance with the Fund s Dividend Reinvestment Plan.

Q. What were the leading contributors to performance?

A. The largest contributor to the Fund s absolute performance during the reporting period was its allocation to non-agency MBS. The sector was supported by continued signs of improvement in the housing market and positive supply/demand technicals. The Fund was well positioned within the sector, as we held a diverse portfolio of seasoned issuers, primarily floating rate, with lower dollar prices. We also favored lower duration exposure.

Our U.S. high-yield and investment-grade and European corporate credit allocations contributed positively to performance. A number of the Fund s holdings were standouts and benefited results, including our allocations to Wind Acquisition Finance SA, Sprint Capital Corp. and Citigroup Inc. Wind Acquisition Finance SA is Italy s third largest wireless and second largest fixed-line service provider. The company is controlled by the Russian multinational corporation, Vimplecom. We felt investors were overly discounting Italian sovereign risk, mediocre fundamental performance and their relatively weak balance sheet, while overlooking Wind Acquisition Finance s strong ownership structure and the actions of the European Union to stabilize the region. We increased exposure to the issuer at distressed levels during the reporting period and the bonds rallied significantly. Bonds issued by Sprint Nextel Corp. (and Sprint Capital Corporation) rallied given their attractive valuation, as well as an improved outlook for the wireless competitive landscape and the pricing environment. In addition, B- rated Sprint Nextel s board agreed to terms of an acquisition by Japan s investment grade rated Softbank toward the end of the reporting period, sending Sprint Nextel s bonds even higher. We increased our exposure to Citigroup Inc. in May 2012, based on attractive valuations and our expectations for stable fundamental results and an improving balance sheet. Citigroup bonds and preferred shares performed very well during the period.

Our emerging market sovereign and corporate allocations contributed positively to performance and we added to this exposure toward the end of the reporting period. A specific standout was our allocation to the Republic of Venezuela. Venezuela sovereign bonds, which began the period at cheap valuations, benefited from higher oil prices and increased expectations that President Chavez would not be re-elected. While Chavez was re-elected in October 2012, it was not enough to offset the country sovereign bond s

4 Western Asset Premier Bond Fund 2012 Annual Report
Fund overview (cont d)
earlier strong results.
Q. What were the leading detractors from performance?
A. The Fund performed very well during the reporting period. However, there were a few issuer allocations that detracted from results, including our exposures to NewPage Corp. and Edison Mission Energy. NewPage Corp. is the largest North American maker of coated papers. We began the period with NewPage Corp. in bankruptcy and we had a relatively constructive outlook for our small position in its senior secured first-lien bonds. In addition, based on our research we felt that there would be a favorable recovery. However, as the period progressed, the company s fundamental performance continued to deteriorate and we reduced our position in July 2012 at roughly 72% of face value. We should have exited the position completely because NewPage Corp. bonds traded lower as spread sectors continued to rally. We exited the position at roughly 51% of face value in November 2012. Edison Mission Energy operates primarily coal fired electricity plants. These plants did not perform well during the period, which negatively impacted the company s fundamental performance. Low natural gas prices and fears that the current administration may enact tougher coal standards sent the bond s prices lower. We exited the position in August 2012 at a loss and the bonds have since fallen further following our sale.
Looking for additional information?
The Fund is traded under the symbol WEA and its closing market price is available in most newspapers under the NYSE listings. The daily NAV is available on-line under the symbol XWEAX on most financial websites.
Barron s and the Wall Street Journal s Monday edition both carry closed-end fund tables that provide additional information. In addition, the Fund issues a quarterly press release that can be found on most major financial websites as well as www.lmcef.com.

RISKS: Bonds are subject to a variety of risks, including interest rate, credit and inflation risks. As interest rates rise, bond prices fall, reducing the value of a fixed-income investment s price. The Fund may invest in high-yield bonds, which are rated below investment grade and carry more risk than higher-rated securities. To the extent that the Fund invests in asset-backed, mortgage-backed or mortgage-related securities, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities. Leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder s risk of loss. The Fund may invest, to a limited extent, in foreign securities, including emerging markets, which involve additional risks. The Fund may make significant investments in derivative instruments. Derivative

Western Asset Premier Bond Fund 2012 Annual Report

5

instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance.

Portfolio holdings and breakdowns are as of December 31, 2012 and are subject to change and may not be representative of the portfolio managers current or future investments. Please refer to pages 9 through 25 for a list and percentage breakdown of the Fund s holdings.

The mention of sector breakdowns is for informational purposes only and should not be construed as a recommendation to purchase or sell any securities. The information provided regarding such sectors is not a sufficient basis upon which to make an investment decision. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies discussed should consult their financial professional. Portfolio holdings are subject to change at any time and may not be representative of the portfolio managers—current or future investments. The Fund—s top five sector holdings (as a percentage of net assets) as of December 31, 2012 were: Asset-Backed Securities (30.2%), Collateralized Mortgage Obligations (23.2%), Financials (12.9%), Short-term Investments (12.6%) and Consumer Discretionary (11.8%). The Fund—s portfolio composition is subject to change at any time.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

- i Effective duration measures the expected sensitivity of market price to changes in interest rates, taking into account the effects of structural complexities. (For example, some bonds can be prepaid by the issuer.)
- Duration is the measure of the price sensitivity of a fixed-income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.
- The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, frethployment, stable prices and a sustainable pattern of international trade and payments.
- iv The Barclays U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgage- and asset-backed issues, rated investment grade or higher, and having at least one year to maturity.
- v The Barclays U.S. Corporate High Yield 2% Issuer Cap Index is an index of the 2% Issuer Cap component of the Barclays U.S. Corporate High Yield Index, which covers the U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market. The Caa Component is comprised of Caa-rated securities included in this Index.
- vi Net asset value (NAV) is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total investments) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund s market price as determined by supply of and demand for the Fund s shares.

- vii The Barclays U.S. Corporate High Yield Index covers the universe of fixed-rate, non-investment grade debt, including corporate and non-corporate sectors. Pay-in-kind (PIK) bonds, Eurobonds and debt issues from countries designated as emerging markets are excluded, but Canadian and global bonds (SEC registered) of issuers in non-emerging market countries are included. Original issue zero coupon bonds, step-up coupon structures and 144-A securities are also included.
- viii The Barclays U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are investment grade (rated Baa3/BBB- or higher).
- Lipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. Returns are based on the twelve-month period ended December 31, 2012, including the reinvestment of all distributions, including returns of capital, if any, calculated among the 12 funds in the Fund s Lipper category.
