NetSuite Inc.
(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	94-3310471 (I.R.S. Employer Identification No.)
---	---

2955 Campus Drive, Suite 100 San Mateo, California (Address of principal executive offices) (650) 627-1000 (Registrant's telephone number, including area code)	94403-2511 (Zip Code)
---	--------------------------

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, \$0.01 par value (Title of class)	New York Stock Exchange, Inc. (Name of each exchange on which registered)
--	--

Securities registered pursuant to Section 12(g) of the Act:
None

Edgar Filing: NETSUITE INC - Form 10-K

Indicate by check mark if the Registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The aggregate market value of the Common Stock held by non-affiliates, based upon the closing sale price of the Common Stock on June 30, 2011, as reported by the New York Stock Exchange, was approximately \$1,007.6 million. Shares of Common Stock held by each officer, director, and holder of 5% or more of the outstanding Common Stock have been excluded in that such persons may be deemed to be affiliates. This calculation does not reflect a determination that persons are affiliates for any other purposes.

On February 21, 2012, 69,465,302 shares of the registrant's Common Stock, \$0.01 par value, were issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive proxy statement for its fiscal 2012 Annual Meeting of Stockholders to be filed within 120 days of the Registrant's fiscal year ended December 31, 2011 are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated.

Item 1. Business

Overview

NetSuite Inc. ("NetSuite" or the "Company" is the industry's leading provider of cloud-based financials/ Enterprise Resource Planning ("ERP") software suites. In addition to financials/ERP software suites, we offer a broad suite of applications, including accounting, Customer Relationship Management ("CRM"), Professional Services Automation ("PSA") and Ecommerce that enable companies to manage most of their core business operations in our single integrated suite. Our "real-time dashboard" technology provides an easy-to-use view into up-to-date, role-specific business information. We also offer customer support and professional services related to implementing and supporting our suite of applications. We deliver our suite over the Internet as a subscription service using the software-as-a-service ("SaaS") model.

Our revenue has grown from \$17.7 million during the year ended December 31, 2004 to \$236.3 million during the year ended December 31, 2011. For the years ended December 31, 2011, 2010 and 2009 the percentage of our revenue generated outside of United States was 27%, 26% and 24%, respectively.

Industry Background

The 1990s saw the widespread adoption among large enterprises of packaged business management software applications that automated a variety of departmental functions, such as accounting, finance, order and inventory management, human resources, professional services, sales and customer support. These sophisticated applications required significant cash outlays for the initial purchase and for ongoing maintenance and support. In addition, these applications were internally managed and maintained, requiring large staffs to support complex information technology infrastructures. Most importantly, the applications generally were provided by multiple vendors, with each application providing only a departmental view of the enterprise. To gain an enterprise-wide view, organizations attempted to tie together their various incompatible packaged applications through long, complex and costly integration efforts. Many of these attempts failed, in whole or in part, often after significant delay and expense. As a consequence, many large enterprises have transitioned from multiple point products to comprehensive, integrated business management suites, such as those offered by Oracle Corporation ("Oracle") and SAP AG ("SAP"), as their core business management platforms.

Medium-sized businesses and departments of large enterprises have application software requirements that are similar, in many respects, to large enterprises because their core business processes are substantially similar to those of large enterprises. These requirements include the integration of back-office activities, such as managing payroll and tracking inventory; front-office activities, including order management and customer support; and, increasingly, sophisticated Ecommerce capabilities.

Medium-sized businesses are generally less capable than large enterprises of performing the costly, complex and time-consuming integration of multiple point products from one or more vendors. As a result, medium-sized businesses can frequently derive greater benefits from a comprehensive business suite. Suites designed for, and broadly adopted by, large enterprises to provide a comprehensive, integrated platform for managing these core business processes, however, generally are not well suited to medium-sized businesses due to the complexity and cost of such applications.

Medium-sized businesses have begun to benefit from the development of the cloud computing delivery model. Cloud computing uses the Internet to deliver software applications from a centrally hosted computing facility to end users through a web browser. Cloud computing eliminates the costs associated with installing and maintaining applications within the customer's information technology infrastructure. Cloud applications are generally licensed for a monthly, quarterly or annual subscription fee, as opposed to on-premise enterprise applications that typically require the payment of a much larger, upfront license fee. As a result, cloud applications require substantially less initial and ongoing investment in software, hardware and implementation services and lower ongoing support and maintenance, making them substantially more cost effective to run for medium-sized businesses.

To date, the cloud computing software model has been applied to a variety of types of business software applications, including CRM, security, accounting, human resources management, messaging and others, and it has been adopted by a wide variety of businesses.

While cloud applications have enabled medium-sized businesses to benefit from enterprise-class capabilities, most are still point products that require extensive, costly and time-consuming integration to work with other applications. Medium-sized businesses generally have been unable to purchase a comprehensive business management application suite at an affordable cost that enables them to run their businesses using a single system of record, provides real-time views of their operations and can be readily customized and rapidly implemented. We believe NetSuite was the first company to provide a cloud integrated suite of business management applications that addresses the needs of medium-sized businesses in the comprehensive manner that Oracle and SAP address the similar needs of large enterprises.

Our Solution

Our comprehensive business management application suite provides an integrated solution for running the core functions of a business. All elements of our application suite share the same customer and transaction data, enabling seamless, cross-departmental business process automation and real-time monitoring of core business metrics.

Businesses can deploy our solution as a business management suite, or deploy specific applications such as financials/ERP, CRM, PSA or Ecommerce that can be integrated with existing application investments. In addition, our financials/ERP, CRM, PSA and Ecommerce capabilities provide users with real-time visibility and appropriate application functionality through dashboards tailored to their particular job function and access rights.

Because our offering is delivered as a cloud-based solution via the Internet, it is available wherever a user has Internet access, whether on a personal computer or a mobile device. The key advantages of our application suite for our customers are:

One Integrated Solution for Running a Business. Our integrated business application suite provides the functionality required to automate the core operations of medium-sized businesses, as well as divisions of large companies. This unified approach to managing a business enables companies to create cross-functional business processes; extend access to appropriate customers, partners, suppliers or other relevant constituencies; and efficiently share and disseminate information in real time. Our suite is designed to be easy to use, while also providing in depth functionality to meet the needs of our most sophisticated customers. Our customers can use our application suite to manage mission-critical business processes, including complex financials/ERP (finance, accounting, inventory and payroll), CRM (sales, order management, marketing and customer support), PSA (projects, resources, time, expense and billing) and Ecommerce (hosting, online stores and website analytics) functions. We also have tailored our offering to meet the specific needs of customers in the wholesale/distribution, services and software industries, to better serve those customers' distinct business requirements and accelerate the implementation of our offerings for customers in those industries.

Role-Based Application Functionality and Real-Time Business Intelligence. Users access our suite through a role-based user interface, or dashboard, that delivers specific application functionality and information appropriate for each user's job responsibilities in a format familiar to them. For example, the dashboard for a salesperson would deliver functionality for managing contacts, leads and forecasts, while the dashboard for a warehouse manager would deliver capabilities appropriate for managing shipping, receiving and returns. These dashboards also incorporate sophisticated business intelligence tools that enable users to track key performance indicators, analyze operational data to identify trends, issues and opportunities and make decisions that can improve the performance of their business, all in real time.

Cloud Delivery Model. We deliver our suite over the Internet as a subscription service via the cloud, eliminating the need for customers to buy and maintain on-premise hardware and software. Our suite is designed to achieve levels of reliability, scalability and security for our customers that have typically only been available to large enterprises with substantial information technology resources. Our architecture enables us to maintain very high levels of availability, scale easily as our customers grow and provide a safe and secure environment for their business-critical data and applications.

Flexible Deployment. As larger organizations increasingly choose cloud computing software to take advantage of the resulting cost savings and business efficiencies, our solution can also be rapidly deployed as a standalone financials/ERP solution rather than as a business management suite. This flexible deployment allows businesses to use our cloud-based financials/ERP capabilities within line of business and integrate it with their existing CRM, PSA and Ecommerce investments, or grow into the suite over time. Additionally, global enterprises with entrenched enterprise-class financials/ERP investments at their corporate headquarters can deploy NetSuite OneWorld using a "two-tier" approach. In this case, NetSuite OneWorld is deployed across subsidiaries, divisions or countries allowing the organization to standardize its previously heterogeneous on-premise financials/ERP investments on a cloud-based solution with all the cost savings and rapid deployment options the cloud enables.

Low Total Cost of Ownership. Our suite incorporates the functionality of multiple applications, thereby eliminating the costs associated with attempting to integrate disparate applications, whether managed on-premise or delivered on-demand. Our on-demand delivery model and our application's ease of use and configurability significantly reduce implementation costs for hardware, software and services and the need for dedicated information technology personnel. Customers typically subscribe to our application suite for a quarterly or annual fee based on the number of users and the solutions they elect to deploy. Our subscription fees are generally significantly less than typical upfront costs to purchase perpetual licenses, and our on-demand delivery system eliminates ongoing maintenance and upgrade charges.

Rapid Implementation. Because we offer a relatively comprehensive application suite that incorporates the functionality of multiple applications, we generally significantly reduce the time and risk associated with

implementing and integrating multiple point products. Our cloud delivery model enables remote implementations and eliminates many of the steps associated with on-premise installations, such as purchasing and setting up hardware. In addition to our industry-specific offerings, our professional services organization is organized along customers' industries; therefore, knowledge gained through an implementation with one customer may be applied to other customers within that industry, speeding implementations. Customers can implement our offerings themselves, engage our professional services organization or utilize the services of our partners.

Ease of Customization and Configuration. We enable users to customize our application suite to the particular needs of their businesses. Our application suite can be configured by end users without software programming expertise. In contrast to traditional on-premise applications, as new versions of our application suite become available, each customer's customizations and configurations are maintained with little or no additional effort or expense required.

Our Business Strategy

Our goal is to enhance our position as a leading provider of cloud-based financials/ERP software suites for medium-sized businesses. The key elements of our strategy include:

Expanding Our Leadership in Cloud-Based, Integrated Business Suites. We believe we were the first software vendor to integrate front-office, back-office and Ecommerce management capabilities into a single cloud-based software suite. We intend to improve our position in the cloud-based applications market by continuing to provide high-quality offerings that encompass the enterprise-class functionality and ease-of-use our customers require. We also intend to leverage our position as our customers' primary business management platform to add new and enhanced functionality that will help them run their businesses more efficiently and expand our presence within their organizations.

Further Penetrate Global Enterprises. We believe there is a substantial opportunity to increase the presence of cloud-based financials/ERP solutions within global enterprises through a "two-tier" deployment model. Under a "two-tier" approach, a global business retains its existing investment in enterprise-class on-premise financials/ERP applications at headquarters, but selects a different solution that is more cost effective to deploy and manage throughout its subsidiaries. We believe NetSuite OneWorld "OneWorld" provides an ideal

solution for this approach to global financials/ERP deployment, given that it provides multi-subsi-dary, multi-currency and multi-tax intelligence in real-time with local control for in-country operations, while being deployed as a cloud application for fast and cost-effective delivery.

Tailoring Our Offering to Customers' Specific Industries. While we provide a general purpose suite applicable to all businesses, we believe that tailoring our application to customers' specific industries has been and will continue to be important to our growth. We currently offer industry-specific editions of our service for wholesale/distribution, manufacturing, services, Ecommerce, media/publishing and software companies. We will continue to enhance the capabilities of our application by further tailoring the functionality for these and other industries.

Growing Our Customer Base and Expanding Use of Our Service Within Existing Accounts. We intend to broaden our offerings and expand our direct and indirect sales efforts to grow our customer base. In addition, we seek to increase ongoing subscription revenue from our existing customers by broadening their use of our suite, thereby increasing the number of users and modules deployed.

Fostering the Continued Development of the NetSuite Partner Network. We provide tools and programs to foster the development of a network of value-added resellers, or VARs, systems integrators and independent software vendors. In addition to programs that enable our partners to resell our suite, our SuiteCloud Platform allows these partners to extend our platform by developing products of their own, including industry-specific versions of our application suite. We intend to continue to enhance our platform and establish distribution models to bring these new solutions to market.

Addressing the Multinational Business Requirements of our Clients. Medium-sized businesses are increasingly seeking global business opportunities, in large part by leveraging the Internet. We believe that there is significant opportunity to address the needs of medium-sized businesses with multinational business operations, and we currently offer a localized version of our suite in a number of countries and languages. We will continue to extend our application offerings to support the requirements of multinational medium-sized businesses.

Our Offerings

Our main offering is NetSuite, which is designed to provide the core business management capabilities that most of our customers require. NetSuite, OneWorld and NetSuite CRM+ are designed for use by most types of businesses. NetSuite OpenAir ("OpenAir") is designed for use specifically by professional services businesses. In addition, we offer industry-specific configurations for use by wholesale/distribution, services and software companies. We also sell additional cloud-based application modules that customers can purchase to obtain additional functionality required for their specific business needs.

NetSuite. NetSuite is targeted at medium-sized businesses and divisions of large companies and provides a single platform for financials/ERP, CRM, PSA and Ecommerce capabilities. It contains a broad array of features that enable users to do their individual jobs more effectively. In addition, because all users are transacting business on the same database system, NetSuite can easily automate processes across departments. For example, when a sales representative enters an order, upon approval it automatically appears on the warehouse manager's dashboard as an item to be shipped and, once the item has been shipped, it automatically appears on the finance manager's dashboard as an item to be billed. Each customer can automate its key business functions across all departments, including sales, marketing, service, finance, inventory, order fulfillment, purchasing and employee management. As with all of our offerings, users access the application and data through a role-based user interface, or dashboard, tailored to deliver specific functionality and information appropriate for their position.

NetSuite OneWorld. OneWorld is targeted at global businesses and divisions of large companies operating in multinational and multi-subsi-dary environments. OneWorld allows users to utilize our single platform for financials/ERP, CRM, PSA and Ecommerce capabilities in multi-currency environments across multiple subsidiaries and legal entities. OneWorld provides the ability to manage multiple companies or legal entities, with potentially different currencies, taxation rules, and reporting requirements, within a single NetSuite account. OneWorld has global CRM capabilities that allow for management of multi-currency quotas, forecasts, commission payments, sales tax calculations and real-time reporting for everyone in a global sales organization from the local sales rep, to the regional vice president to the head of worldwide sales. Additionally, growing companies typically employ multiple sales channels for their global sales operations so OneWorld allows for automation of common sales channels

employed internationally including direct sales, distribution partner networks and Ecommerce. Additionally, marketing and customer support operations can also be managed globally using OneWorld so processes such as lead routing and trouble ticket assignment can easily be handled across regions or in-country, with global customer visibility and real-time measurement of marketing and service operational performance.

NetSuite CRM+. NetSuite CRM+ is targeted at a wide range of companies, including companies larger than our traditional medium-sized business customers. Medium-sized businesses may use NetSuite CRM+ as an entry point into the entire suite, while larger enterprises often implement it as an alternative to more limited CRM offerings. This application provides traditional sales force automation, marketing automation, customer support and service management functionality. NetSuite CRM+ contrasts with competitive CRM products by also incorporating order management and many other financials/ERP and Ecommerce capabilities without requiring additional integration. This provides users with a more comprehensive, real-time view of customer interactions than can be provided by traditional, stand-alone CRM products, whether on-premise or on-demand. NetSuite CRM+ also offers incentive management, project tracking, website hosting and analytics and partner relationship management.

NetSuite OpenAir PSA. OpenAir is a Professional Services Automation (PSA) solution that is used by professional services organizations and is targeted to some of the world's largest companies with thousands of employees. OpenAir provides a clear view into the services organization's performance and profitability with dashboards and reports. With OpenAir's project accounting functionality, professional services organizations can efficiently monitor and manage projects' revenues, expenses and profitability over the lifetime of the project. This solution provides resource management functionality to improve resource utilization, and delivers web-based project management that improves on-time project delivery and drives project success rates. OpenAir provides online and mobile time and expense management and enables services professionals to improve their productivity by entering their expenses while on the road. OpenAir can be deployed either as a stand-alone PSA software solution, integrated with NetSuite, or integrated with an existing enterprise CRM or financials/

ERP system.

Add-On Modules. We also offer advanced capabilities that are part of our integrated suite, but are typically sold separately. These modules allow our customers to specifically augment aspects of our suite to enhance its relevance to their businesses.

NetSuite Industry Editions. We have configured NetSuite to meet the requirements of selected industries. Our current editions serve companies in the wholesale/distribution, manufacturing, services, Ecommerce and software industries. Within each edition, we offer advanced industry specific functionality to complement our core NetSuite offering, templates of best practices, and dedicated sales and professional services teams with industry-specific expertise.

SuiteCloud Platform. SuiteCloud is our technology platform that allows customers, partners and developers to tailor and extend our suite to meet specific company, vertical and industry requirements for personalization, business processes and best practices. It allows partners to rapidly develop and distribute cloud-based products of their own, including industry-specific versions of our application suite. NetSuite provides partners building on SuiteCloud with a website – SuiteApp.com – that enables them to market and distribute their value-added solutions to NetSuite. Our application development and customization environment is designed to continue to operate across version upgrades.

Sales and Marketing

Sales. We generate sales through both direct and indirect approaches, with most selling done over the phone. Our direct sales team consists of professionals in various locations across the United States, Europe and the Asia-Pacific region. Within these regions, our direct sales organization focuses on selling to medium-sized businesses and divisions of large companies. Indirect sales are generated through our relationships with channel partners in North America, Latin America, Europe and the Asia-Pacific region.

Our sales process typically begins with the generation of a sales lead from a marketing program or customer referral. After the lead is qualified, our sales personnel conduct focused web-based demonstrations along with initial price discussions. Members of our professional services team are engaged as needed to offer insight around aspects of the implementation. Our sales cycle typically ranges from one to six months, but can vary based on the specific application, the size and complexity of the potential customer's information technology environment and other factors.

Marketing. We tailor our marketing efforts around relevant application categories, customer sizes and customer industries. As part of our marketing strategy, we have established a number of key programs and initiatives including online and search engine advertising, email campaigns and web seminars, product launch events, trade show and industry event sponsorship and participation, marketing support for channel partners, and referral programs.

Service and Support

Professional Services. We have developed repeatable, cost-effective consulting and implementation services to assist our customers with integrating and importing data from other systems, changing their business processes to take advantage of the enhanced capabilities enabled by our integrated suite, implementing those new business processes within their organization and configuring and customizing our application suite for their business processes and requirements.

Our consulting and implementation methodology leverages the nature of our cloud-based software architecture, the industry-specific expertise of our professional services employees and the design of our platform to simplify, streamline and expedite the implementation process. We generally employ a joint staffing model for implementation projects whereby we involve the customer more actively in the implementation process than traditional software companies. We believe this better prepares our customers to support the application throughout their use of our service. In addition, because our service is cloud-based, our professional services employees can remotely configure our application for most customers based on telephonic consultations. Our consulting and implementation services are generally offered on a fixed price basis. Our network of partners also provides professional services to our customers.

Client Support. Our technical support organization, with personnel in Canada and Asia, offers support 24 hours a day, seven days a week. Our system allows for skills-based and time zone-based routing to address general and technical inquiries across all aspects of our suite. For our direct customers, we offer tiered customer support programs depending upon the service needs of our customers' deployments. Support contracts typically have a one-year term.

For customers purchasing through resellers, primary product support is provided by our resellers, with escalation support provided by us.

Training. We offer a variety of training services through our training resource, NetSuite University, to facilitate the successful adoption of our suite throughout the customer's organization.

Operations, Technology and Development

Our customers rely on our application suite to run their businesses and, as a result, we need to ensure the availability of our service. We have developed our infrastructure with the goal of maximizing the availability of our applications, which are hosted on a highly-scalable network located in secure third-party facilities. We host the NetSuite applications and serve our customers primarily from our California-based data center facilities, which we operate in conjunction with SAVVIS Communications Corporation ("SAVVIS"). We also have a Massachusetts-based back-up data center facility, which we operate in conjunction with SAVVIS. Our OpenAir applications are hosted from a Massachusetts-based data center, which we also operate in conjunction with SAVVIS. Our QuickArrow applications are hosted from a Texas-based data center, which we operate in conjunction with Sunguard. Our hosting operations incorporate industry-standard hardware, the Linux open-source operating system and Oracle databases and application servers into a flexible, scalable architecture. Elements of our application suite's infrastructure can be replaced or added with no interruption in service, helping to ensure that the failure of any single device will not cause a broad service outage.

Our single-instance, multi-tenant architecture allows us to provide our customers with enterprise-class capabilities, high quality of service, scalability and security, all at an affordable price. Our architecture enables us to host multiple smaller customers on a single x86 server while preserving the ability to migrate any customer to its own server without interruption or alteration when the customers' growth and business needs require it. In addition to the enhanced flexibility and scalability our architecture provides, it also is designed to work on inexpensive, industry-standard hardware, thereby providing us a significant cost advantage that is reflected in the pricing we are able to offer our customers.

Unlike other SaaS companies that deploy major new releases to all customers at once, we roll out all major releases and many upgrades of our application suite to only a portion of our customer base at any one time. This "phased release process" is designed to allow us to mitigate the impact of major changes and new releases, ensuring that any potential issues affect only a portion of our customers before they are addressed.

The combination of our hosting infrastructure, flexible architecture and phased release process enables us to offer a service-level commitment to our customers of 99.5% uptime per period, excluding designated periods of maintenance. Under the terms of this commitment, we offer to credit a full month's service fees for any period where we do not meet this service level.

Product development expenses were \$43.5 million, \$35.0 million and \$28.6 million during the years ended December 31, 2011, 2010 and 2009, respectively. In developing our service offerings, we rely on customer feedback and spend significant time with our customers in formal user testing sessions as well as less formal "ride-alongs" and customer roundtables. We use the NetSuite service to track customer interest in service enhancements and actual work done on these enhancements. We develop our offerings using Java and the Oracle database on the server and Asynchronous JavaScript and XML on the client with a goal of making our service scalable, high performance, robust and easy to use. Finally, we expose many of our internal development tools to third party developers via SuiteFlex to allow extensions to the service that mirror the built-in capabilities we develop internally. Our use of the Oracle database is pursuant to various software license agreements with Oracle USA, Inc., an affiliate of Oracle. Lawrence J. Ellison, who beneficially owns a majority of our common stock, is the Chief Executive Officer, a principal stockholder and a director of Oracle. See Note 19 to our Consolidated Financial Statements for a further description of this software license agreement.

Customers

Our customers are diverse in size and type across a wide variety of industries, with a focus on medium-sized businesses and divisions of large companies. In 2011, the top 10 industries in which our customers operated, as measured by our recognized revenue, were as follows: Distribution & Wholesale; Professional, Consulting and Other Services; Computer Software; Ecommerce & Retail; Manufacturing; Computer & IT Services; Telecommunications Services; Financial Services; Healthcare Services; and Education. We had customers in approximately 80 countries in 2011. No single customer accounted for more than 3% of our revenue in 2011, 2010 or 2009.

Competition

We compete with a broad array of financials/ERP, CRM, PSA and Ecommerce companies. Our markets are highly competitive, fragmented and subject to rapid changes in technology. Many of our potential customers are seeking their first packaged financials/ERP, CRM, PSA or Ecommerce application and, as such, evaluate a wide range of alternatives during their purchase process. Although we believe that none of our larger competitors currently offer a cloud-based comprehensive business management suite, we face significant competition within each of our markets from companies with broad product suites and greater name recognition and resources than we have, as well as smaller companies focused on specialized solutions. In addition, some of our larger competitors have announced plans to launch new products that could compete more closely with our cloud-based application suite. Internationally, we face competition from local companies as well as larger competitors, each of which has products tailored for those local markets. To a lesser extent, we compete with internally developed and maintained solutions. Our current principal competitors include Epicor Software Corporation, Intuit Inc., Microsoft Corporation, SAP AG, The Sage Group plc and salesforce.com, inc.

We believe the principal competitive factors in our markets include:

Edgar Filing: NETSUITE INC - Form 10-K

- service breadth and functionality;
 - service performance, security and reliability;
 - ability to tailor and customize services for a specific company, vertical or industry;
 - ease of use;
 - speed and ease of deployment, integration and configuration;
 - total cost of ownership, including price and implementation and support costs;
 - sales and marketing approach; and
 - financial resources and reputation of the vendor.
-

We believe that we compete favorably with most of our competitors on the basis of each of the factors listed above, except that certain of our competitors have greater sales, marketing and financial resources, more extensive geographic presence and greater name recognition than we do. In addition, although we have extended the number of applications we have introduced for specific vertical markets, we may be at a disadvantage in certain vertical markets compared to certain of our competitors. We may face future competition in our markets from other large, established companies, as well as from emerging companies. In addition, we expect that there is likely to be continued consolidation in our industry that could lead to increased price competition and other forms of competition.

Intellectual Property

Our success depends upon our ability to protect our core technology and intellectual property. To accomplish this, we rely on a combination of intellectual property rights, including trade secrets, patents, copyrights and trademarks, as well as customary contractual protections. We view our trade secrets and know-how as a significant component of our intellectual property assets, as we have spent years designing and developing our cloud-based, integrated application suite, which we believe differentiates us from our competitors.

As of December 31, 2011, we had seven U.S. and no foreign issued patents. We also had various pending U.S. patent applications. We do not know whether any of our pending patent applications will result in the issuance of patents or whether the examination process will require us to narrow our claims. There can be no assurances that our patents, or our pending patent applications even if granted, will provide us with protection.

We have a number of registered and unregistered trademarks. We maintain a policy requiring our employees, consultants and other third parties to enter into confidentiality and proprietary rights agreements and to control access to software, documentation and other proprietary information.

In addition, we license third-party technologies that are incorporated into some elements of our services. Licenses of third-party technologies may not continue to be available to us at a reasonable cost, or at all. The steps we have taken to protect our intellectual property rights may not be adequate. Third parties may infringe or misappropriate our proprietary rights. Competitors may also independently develop technologies that are substantially equivalent or superior to the technologies we employ in our services. Failure to protect our proprietary rights adequately could significantly harm our competitive position and operating results.

The software and technology industries are characterized by the existence of a large number of patents, copyrights, trademarks and trade secrets and by frequent litigation based on allegations of infringement or other violations of intellectual property rights. As we face increasing competition, the possibility of intellectual property rights claims against us grows. Many of our service agreements require us to indemnify our customers for certain third-party intellectual property infringement claims, which would increase our costs as a result of defending those claims and might require that we pay damages if there were an adverse ruling in any such claims. We, and certain of our customers, have in the past received correspondence from third parties alleging that certain of our services, or customers' use of our services, violate these third parties' patent rights. These types of correspondence and future claims could harm our relationships with our customers and might deter future customers from subscribing to our services.

With respect to any intellectual property rights claim against us or our customers, we may have to pay damages or stop using technology found to be in violation of a third party's rights. We may have to seek a license for the technology, which may not be available on reasonable terms, significantly increase our operating expenses or require us to restrict our business activities in one or more respects. The technology also may not be available for license to us at all. As a result, we may be required to develop alternative non-infringing technology, which could require significant effort and expense.

Employees

As of December 31, 2011, we had 1,265 employees. We also engage a number of independent contractors and consultants. None of our employees is represented by a labor union with respect to his or her employment with us. We have not experienced any work stoppages, and we consider our relations with our employees to be good. Our future success will depend upon our ability to attract and retain qualified personnel. Competition for qualified personnel remains intense, and we may not be successful in retaining our key employees or attracting skilled personnel.

Available Information

Edgar Filing: NETSUITE INC - Form 10-K

You can obtain copies of our Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and other filings with the Securities and Exchange Commission ("SEC"), and all amendments to these filings, free of charge from our Web site at <http://www.netsuite.com/investors> as soon as reasonably practicable following our filing of any of these reports with the SEC. You can also obtain copies free of charge by contacting our Investor Relations department at our corporate headquarters. The information found on our website is not a part of this or any other report we file with or furnish to the SEC.

You can also read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC 20549. You can obtain additional information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains a website (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, including us.

Executive Officers of the Registrant

Our current executive officers, and their ages and positions as of February 24, 2012, are set forth below:

Name	Age	Position(s)
Zachary Nelson	50	President, Chief Executive Officer and Director
Evan M. Goldberg	45	Chief Technology Officer and Chairman of the Board
James McGeever	45	Chief Operating Officer
Ronald Gill	46	Chief Financial Officer
James Ramsey	39	Executive Vice President, Worldwide Sales
Douglas P. Solomon	45	Senior Vice President, General Counsel and Secretary
Timothy Dilley	52	Executive Vice President, Worldwide Services and Chief Customer Officer

Zachary Nelson has served as a director since July 2002 and as our President and Chief Executive Officer since January 2003. Prior to that, Mr. Nelson served as our President and Chief Operating Officer from July 2002 to January 2003. Previously he served as senior executive at Network Associates, Inc., Oracle Corporation and Sun Microsystems, Inc. He holds B.S. and M.A. degrees from Stanford University.

Evan M. Goldberg co-founded our company in 1998 and has served as Chairman of our Board of Directors and as our Chief Technology Officer since January 2003. From October 1998 through January 2003, Mr. Goldberg held various positions with us, including President and Chief Executive Officer and Chief Technology Officer. Prior to joining us, Mr. Goldberg founded mBed Software, Inc., a software company focused on multimedia tools for website developers, where he served as Chief Executive Officer from November 1995 to September 1998. From August 1987 to November 1995, Mr. Goldberg held various positions in product development at Oracle Corporation, including Vice President of Development in the New Media Division. Mr. Goldberg holds a B.A. from Harvard College.

James McGeever has served as our Chief Operating Officer since July 2010. Prior to that, Mr. McGeever served as Chief Financial Officer from June 2000 to July 2010. From January 2000 to June 2000, Mr. McGeever served as our Director of Finance. Prior to joining us, Mr. McGeever was the controller of Clontech Laboratories, Inc., a privately held biotechnology company from 1998 to 2000 and the corporate controller at Photon Dynamics, Inc., a capital equipment maker from 1994 to 1998. Mr. McGeever holds a B.Sc. from the London School of Economics. Mr. McGeever has qualified as a chartered accountant in the United Kingdom.

Ronald Gill has served as Chief Financial Officer since July 2010. Prior to that, Mr. Gill served as Senior Vice President, Finance from August 2007 to July 2010. Prior to joining our company in August 2007, Mr. Gill was Vice President, Finance at Hyperion Solutions Corporation, a provider of performance management software from August 2006 until July 2007. Hyperion Solutions Corporation was acquired by Oracle Corporation in April 2007. From 2004 until May 2006, Mr. Gill was the Chief Controller, Product and Technology Group at SAP. Mr. Gill holds a B.A. from Baylor University and a Master of International Business Studies degree from the University of South Carolina.

James Ramsey has served as our Senior Vice President, Worldwide Sales and Distribution since February 2009. Mr. Ramsey served as our Senior Vice President, Worldwide Sales from January 2008 until February 2009. From September 2003 to December 2007, Mr. Ramsey held several positions with us, including Senior Vice President of the Americas. Prior to joining NetSuite, Mr. Ramsey worked for Oracle from July 1995 to September 2003. Mr. Ramsey held various positions in the sales organization at Oracle including Director of Midmarket Sales Canada and Central U.S., and Director of the West. Mr. Ramsey holds a B.A. degree in Psychology from the University of Denver.

Douglas P. Solomon has served as our Senior Vice President, General Counsel and Secretary since July 2008. Mr. Solomon served as our Vice President, Legal & Corporate Affairs from November 2006 to July 2008 and has been our Secretary since January 2007. Prior to joining us, Mr. Solomon served in senior legal and management roles at Openwave Systems Inc., a software company, from April 2000 through March 2006, including Vice President,

Legal & Corporate Affairs. He holds a B.A. from the University of Michigan and a J.D. from Harvard Law School. Timothy Dilley has served as our Executive Vice President, Worldwide Services and Chief Customer Officer since December 2006. Prior to joining us, Mr. Dilley served as Senior Vice President of Global Customer Services at Informatica Corporation, an enterprise software company, from December 1998 until December 2006. He holds a B.S. from California State University at Fresno.

Item 1A.

Risk Factors

A description of the risks and uncertainties associated with our business is set forth below. If any of such risks and uncertainties actually occurs, our business, financial condition or operating results could differ materially from the plans, projections and other forward-looking statements included in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this report and in our other public filings. In addition, if any of the following risks and uncertainties, or if any other risks and uncertainties, actually occurs, our business, financial condition or operating results could be harmed substantially, which could cause the market price of our stock to decline, perhaps significantly.

Risks Related to Our Business

Continued adverse economic conditions or reduced investments in cloud-based applications and information technology spending may harm our business.

Our business depends on the overall demand for cloud-based applications and information technology spending and on the economic health and general willingness of our current and prospective customers to make capital commitments. If the conditions in the U.S. and global economic environment remain uncertain or continue to be volatile, or if they deteriorate further, our business, operating results, and financial condition may be materially adversely affected. Continued weak or volatile economic conditions, or a reduction in spending for cloud-based applications and information technology even if economic conditions improve, would likely harm our business and operating results in a number of ways, including longer sales cycles, extended payment terms, lower prices for our products and services, reduced sales, and lower customer retention rates.

We have a history of losses, and we may not achieve profitability in the future.

We have not been profitable on a generally accepted accounting principles ("GAAP") basis during any quarterly or annual period since our formation. We experienced a net loss of \$32.0 million for the year ended December 31, 2011. As of that date, our accumulated deficit was \$343.5 million. We expect to make significant future expenditures related to the development and expansion of our business. As a result of these increased expenditures, we will have to generate and sustain increased revenue to achieve and maintain future profitability. While historically our revenue has grown, this growth may not be sustainable and we may not achieve sufficient revenue to achieve or maintain profitability. We may incur significant losses in the future for a number of reasons, including due to the other risks described in this Annual Report, and we may encounter unforeseen expenses, difficulties, complications and delays and other unknown factors. Accordingly, we may not be able to achieve or maintain profitability and we may continue to incur significant losses for the foreseeable future.

Our customers are medium sized businesses and divisions of large companies, which may result in increased costs as we attempt to reach, acquire and retain customers.

We market and sell our application suite to medium-sized businesses and divisions of large companies. To grow our revenue quickly, we must add new customers, sell additional services to existing customers and encourage existing customers to renew their subscriptions. However, selling to and retaining medium-sized businesses can be more difficult than selling to and retaining large enterprises because medium-sized business customers:

- are more price sensitive;
- are more difficult to reach with broad marketing campaigns;
- have high churn rates in part because of the nature of their businesses;
- often lack the staffing to benefit fully from our application suite's rich feature set; and
- often require higher sales, marketing and support expenditures by vendors that sell to them per revenue dollar generated for those vendors.

If we are unable to cost effectively market and sell our service to our target customers, our ability to grow our revenue quickly and become profitable will be harmed.

Our business depends substantially on customers renewing, upgrading and expanding their subscriptions for our services. Any decline in our customer renewals, upgrades and expansions would harm our future operating results. We sell our application suite pursuant to service agreements that are generally one year in length. Our customers have no obligation to renew their subscriptions after their subscription period expires, and they may not renew their subscriptions at the same or higher levels. Moreover, under specific circumstances, our customers have the right to cancel their service agreements before they expire. In addition, in the first year of a subscription, customers often purchase a higher level of professional services than they do in renewal years. As a result, our ability to grow is dependent in part on customers purchasing additional subscriptions and modules after the first year of their subscriptions. We have limited historical data with respect to rates of customer subscription renewals, upgrades and expansions so we may not accurately predict future trends in customer renewals. Our customers' renewal rates may decline or fluctuate because of several factors, including their satisfaction or dissatisfaction with our services, the prices of our services, the prices of services offered by our competitors or reductions in our customers' spending levels due to the macroeconomic environment or other factors. If our customers do not

renew their subscriptions for our services, renew on less favorable terms, or do not purchase additional functionality or subscriptions, our revenue may grow more slowly than expected or decline and our profitability and gross margin may be harmed.

Our services are delivered primarily out of a single data center. Any disruption of service at this facility could interrupt or delay our ability to deliver our service to our customers.

We host our services, serve our customers and support our operations primarily from California-based data centers, which we operate in conjunction with SAVVIS. Our OpenAir applications are hosted from a Massachusetts based data center, which we also operate in conjunction with SAVVIS. Our QuickArrow applications are hosted from a Texas-based data center, which we operate in conjunction with Sunguard. We do not have sole control over the operations of these facilities. These facilities are vulnerable to damage or interruption from earthquakes, hurricanes, floods, fires, cybersecurity attacks, terrorist attacks, power losses, telecommunications failures and similar events. The occurrence of a natural disaster or an act of terrorism, a decision to close the facilities without adequate notice or other unanticipated problems could result in lengthy interruptions in our services. In particular, our California-based data facilities are located in an area known for seismic activity, increasing our susceptibility to the risk that an earthquake could significantly harm the operations of these facilities. The facilities also could be subject to break ins, computer viruses, sabotage, intentional acts of vandalism and other misconduct.

Our data center facilities providers have no obligations to renew their agreements with us on commercially reasonable terms, or at all. If we are unable to renew our agreements with the facilities providers on commercially reasonable terms or if in the future we add additional data center facility providers, we may experience costs or downtime in connection with the transfer to, or the addition of, new data center facilities.

Any errors, defects, disruptions or other performance problems with our services could harm our reputation and may damage our customers' businesses. Interruptions in our services might reduce our revenue, cause us to issue credits to customers, subject us to potential liability, cause customers to terminate their subscriptions and harm our renewal rates.

We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service.

Because we deliver our application suite as a service, errors or defects in the software applications underlying our service, or a failure of our hosting infrastructure, may make our service unavailable to our customers. Since our customers use our suite to manage critical aspects of their business, any errors, defects, disruptions in service or other performance problems with our suite, whether in connection with the day to day operation of our suite, upgrades or otherwise, could damage our customers' businesses. If we have any errors, defects, disruptions in service or other performance problems with our suite, customers could elect not to renew, or delay or withhold payment to us, we could lose future sales or customers may make warranty claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or costly litigation.

The market for cloud-based applications may develop more slowly than we expect.

Our success will depend, to a large extent, on the willingness of medium-sized businesses to accept cloud-based services for applications that they view as critical to the success of their business. Many companies have invested substantial effort and financial resources to integrate traditional enterprise software into their businesses and may be reluctant or unwilling to switch to a different application or to migrate these applications to cloud-based services.

Other factors that may affect market acceptance of our application include:

- the security capabilities, reliability and availability of cloud-based services;
- customer concerns with entrusting a third party to store and manage their data, especially confidential or sensitive data;
- our ability to minimize the time and resources required to implement our suite;
- our ability to maintain high levels of customer satisfaction;
- our ability to implement upgrades and other changes to our software without disrupting our service;
- the level of customization or configuration we offer;
-

our ability to provide rapid response time during periods of intense activity on customer websites;
and
the price, performance and availability of competing products and services.

The market for these services may not develop further, or may develop more slowly than we expect, either of which would harm our business.

If our security measures are breached and unauthorized access is obtained to a customer's data, we may incur significant liabilities, our service may be perceived as not being secure and customers may curtail or stop using our suite.

The services we offer involve the storage of large amounts of our customers' sensitive and proprietary information. If our security measures are breached as a result of third party action, employee error, malfeasance or otherwise, and someone obtains unauthorized access to our customers' data, we could incur significant liability to our customers and to individuals or businesses whose information was being stored by our customers, our business may suffer and our reputation will be damaged. Because techniques used to obtain unauthorized access to, or to sabotage, systems change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate

preventive measures. If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed and we could lose sales and customers. Such an actual or perceived breach could also cause a significant and rapid decline in our stock price.

We provide service-level commitments to our customers, which could cause us to issue credits for future services if the stated service levels are not met for a given period and could significantly harm our revenue.

Our customer agreements provide service-level commitments. If we are unable to meet the stated service-level commitments or suffer extended periods of unavailability for our service, we may be contractually obligated to provide these customers with credits for future services. Our revenue could be significantly impacted if we suffer unscheduled downtime that exceeds the allowed downtimes under our agreements with our customers. In light of our historical experience with meeting our service-level commitments, we do not currently have any liabilities on our balance sheet for these commitments. Our service-level commitment to all customers is 99.5% uptime per period, excluding scheduled maintenance. The failure to meet this level of service availability may require us to credit qualifying customers for the value of an entire month of their subscription fees, not just the value of the subscription fee for the period of the downtime. As a result, a failure to deliver services for a relatively short duration could cause us to issue these credits to all qualifying customers. Any extended service outages could harm our reputation, revenue and operating results.

Assertions by a third party that we infringe its intellectual property, whether successful or not, could subject us to costly and time consuming litigation or expensive licenses.

The software and technology industries are characterized by the existence of a large number of patents, copyrights, trademarks and trade secrets and by frequent and an increasing amount of litigation based on allegations of infringement or other violations of intellectual property rights. As we continue to grow, the possibility of intellectual property rights claims against us may increase. Our technologies may not be able to withstand any third party claims or rights against their use. Additionally, although we have licensed from other parties proprietary technology covered by patents, we cannot be certain that any such patents will not be challenged, invalidated or circumvented. Furthermore, many of our service agreements require us to indemnify our customers for certain third party intellectual property infringement claims, which could increase our costs as a result of defending such claims and may require that we pay damages if there were an adverse ruling related to any such claims. These types of claims could harm our relationships with our customers, may deter future customers from subscribing to our services or could expose us to litigation for these claims. Even if we are not a party to any litigation between a customer and a third party, an adverse outcome in any such litigation could make it more difficult for us to defend our intellectual property in any subsequent litigation in which we are a named party.

Any intellectual property rights claim against us or our customers, with or without merit, could be time consuming, expensive to litigate or settle and could divert management attention and financial resources. An adverse determination also could prevent us from offering our suite to our customers and may require that we procure or develop substitute services that do not infringe.

For any intellectual property rights claim against us or our customers, we may have to pay damages, license fees and/or stop using technology found to be in violation of a third party's rights. We may have to seek a license for the technology. Such license may not be available on reasonable terms, if at all, and may significantly increase our operating expenses or may require us to restrict our business activities and limit our ability to deliver certain products and services. As a result, we may also be required to develop alternative non infringing technology, which could require significant effort and expense and/or cause us to alter our product and service offerings which could negatively affect our business.

Our success depends in large part on our ability to protect and enforce our intellectual property rights.

We rely on a combination of patent, copyright, service mark, trademark and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish and protect our proprietary rights, all of which provide only limited protection. We cannot assure you that any patents will issue from our currently pending patent applications in a manner that gives us the protection that we seek, if at all, or that any future patents issued to us will not be challenged, invalidated or circumvented. We do not have any issued patents and currently have eight patent applications pending. Any patents that may issue in the future from pending or future patent applications may not provide sufficiently broad protection or they may not prove to be enforceable in actions against alleged infringers. Also, we cannot assure you that any future service mark or trademark registrations will be issued for pending or future applications or that any registered service marks or trademarks will be enforceable or provide adequate protection of our proprietary rights.

We endeavor to enter into agreements with our employees and contractors and agreements with parties with whom we do business to limit access to and disclosure of our proprietary information. The steps we have taken, however, may not prevent unauthorized use or the reverse engineering of our technology. Moreover, others may independently develop

technologies that are competitive to ours or infringe our intellectual property. Enforcement of our intellectual property rights also depends on our successful legal actions against these infringers, but these actions may not be successful, even when our rights have been infringed.

Furthermore, effective patent, trademark, service mark, copyright and trade secret protection may not be available in every country in which our services are available. In addition, the legal standards relating to the validity, enforceability and scope of protection of intellectual property rights in Internet related industries are uncertain and still evolving.

We have experienced rapid growth in recent periods. If we fail to manage our growth effectively, we may be unable to execute our business plan, maintain high levels of service or address competitive challenges adequately.

We have increased our annual revenue from \$17.7 million during the year ended December 31, 2004 to \$236.3 million during the year ended December 31, 2011. We have increased our number of full time employees from 296 as of December 31, 2004 to 1,265 as of December 31, 2011.

Our expansion has placed, and our anticipated growth may continue to place, a significant strain on our managerial, administrative, operational, financial and other resources. We intend to further expand our overall business, customer base, headcount and operations. We also intend to continue expanding our operations internationally. Creating a global organization and managing a geographically dispersed workforce will require substantial management effort and significant additional investment in our infrastructure. We will be required to continue to improve our operational, financial and management controls and our reporting procedures and we may not be able to do so effectively. As such, we may be unable to manage our expenses effectively in the future, which may negatively impact our gross margin or operating expenses in any particular quarter.

Our quarterly and annual operating results may fluctuate in the future. As a result, we may fail to meet or exceed the expectations of research analysts or investors, which could cause our stock price to decline.

Our quarterly and annual operating results may fluctuate as a result of a variety of factors, many of which are outside of our control. A decline in general macroeconomic conditions could adversely affect our customers' ability or willingness to purchase our application suite, which could adversely affect our operating results or financial outlook. Fluctuations in our quarterly operating annual results or financial outlook may also be due to a number of additional factors, including the risks and uncertainties discussed elsewhere in this report.

Fluctuations in our operating results could cause our stock price to decline rapidly, may lead analysts to change their long term model for valuing our common stock, may impact our ability to retain or attract key personnel, or may cause other unanticipated issues. If our operating results or financial outlook fall below the expectations of research analysts or investors, the price of our common stock could decline substantially.

We believe that our revenue and operating results may vary significantly in the future and that period to period comparisons of our operating results may not be meaningful. You should not rely on the results of one quarter as an indication of future performance.

Our limited operating history makes it difficult to evaluate our current business and future prospects, and may increase the risk of your investment.

Our company has been in existence since 1998, and much of our growth has occurred since 2004, with our revenue increasing from \$17.7 million during the year ended December 31, 2004 to \$236.3 million during the year ended December 31, 2011. Our limited operating history may make it difficult to evaluate our current business and our future prospects. We have encountered and will continue to encounter risks and difficulties frequently experienced by growing companies in rapidly changing industries. If we do not address these risks successfully, our business may be harmed.

The markets in which we compete are intensely competitive, and if we do not compete effectively, our operating results may be harmed.

The markets for financials/ERP, CRM, PSA and Ecommerce applications are intensely competitive and rapidly changing with relatively low barriers to entry. With the introduction of new technologies and market entrants, we expect competition to intensify in the future. In addition, pricing pressures and increased competition generally could

result in reduced sales, reduced margin or the failure of our service to achieve or maintain more widespread market acceptance. Often we compete to sell our application suite against existing systems that our potential customers have already made significant expenditures to install. Competition in our market is based principally upon service breadth and functionality; service performance, security and reliability; ability to tailor and customize services for a specific company, vertical or industry; ease of use of the service; speed and ease of deployment, integration and configuration; total cost of ownership, including price and implementation and support costs; professional services implementation; and financial resources of the vendor.

We face competition from both traditional software vendors and SaaS providers. Our principal competitors include Epicor Software Corporation, Intuit Inc., Microsoft Corporation, SAP, The Sage Group plc and salesforce.com, inc. Many of our actual and potential competitors enjoy substantial competitive advantages over us, such as greater name recognition, longer operating histories, more varied products and services and larger marketing budgets, as well as substantially greater financial,

technical and other resources. In addition, many of our competitors have established marketing relationships and access to larger customer bases, and have major distribution agreements with consultants, system integrators and resellers. If we are not able to compete effectively, our operating results will be harmed.

Our brand name and our business may be harmed by aggressive marketing strategies of our competitors.

Because of the early stage of development of our markets, we believe that building and maintaining brand recognition and customer goodwill is critical to our success. Our efforts in this area have, on occasion, been complicated by the marketing efforts of our competitors, which may include incomplete, inaccurate and false statements about our company and our services that could harm our business. Our ability to respond to our competitors' misleading marketing efforts may be limited under certain circumstances by legal prohibitions on permissible public communications by us as a public company.

Many of our customers are price sensitive, and if the prices we charge for our services are unacceptable to our customers, our operating results will be harmed.

Many of our customers are price sensitive, and we have limited experience with respect to determining the appropriate prices for our services. As the market for our services matures, or as new competitors introduce new products or services that compete with ours, we may be unable to renew our agreements with existing customers or attract new customers at the same price or based on the same pricing model as previously used. As a result, it is possible that competitive dynamics in our market may require us to change our pricing model or reduce our prices, which could harm our revenue, gross margin and operating results.

If we are unable to develop new services or sell our services into new markets, our revenue growth will be harmed and we may not be able to achieve profitability.

Our ability to attract new customers and increase revenue from existing customers will depend in large part on our ability to enhance and improve our existing application suite and to introduce new services and sell into new markets. The success of any enhancement or new service depends on several factors, including the timely completion, introduction and market acceptance of the enhancement or service. Any new service we develop or acquire may not be introduced in a timely or cost effective manner and may not achieve the broad market acceptance necessary to generate significant revenue. Any new markets into which we attempt to sell our application, including new vertical markets and new countries or regions, may not be receptive. If we are unable to successfully develop or acquire new services, enhance our existing services to meet customer requirements or sell our services into new markets, our revenue will not grow as expected and we may not be able to achieve profitability.

Because we are a global organization and our long term success depends, in part, on our ability to expand the sales of our services to customers located outside of the United States, our business is susceptible to risks associated with international sales and operations.

We currently maintain offices outside of the United States and have sales personnel or independent consultants in several countries. Approximately one quarter of our employees are located in an office in the Philippines. We have limited experience operating in foreign jurisdictions and are rapidly building our international operations. Managing a global organization is difficult, time consuming and expensive. Our inexperience in operating our business outside of the United States increases the risk that any international expansion efforts that we may undertake will not be successful. In addition, conducting international operations subjects us to new risks that we have not generally faced in the United States. These risks include:

- localization of our services, including translation into foreign languages and adaptation for local practices and regulatory requirements;
- lack of familiarity with and unexpected changes in foreign regulatory requirements;
- longer accounts receivable payment cycles and difficulties in collecting accounts receivable;
- difficulties in managing and staffing international operations;
- fluctuations in currency exchange rates;
- potentially adverse tax consequences, including the complexities of foreign value added tax systems and restrictions on the repatriation of earnings;
- dependence on certain third parties, including channel partners with whom we do not have extensive experience;
- the burdens of complying with a wide variety of foreign laws and legal standards;

increased financial accounting and reporting burdens and complexities;
political, social and economic instability abroad, terrorist attacks and security concerns in general; and
reduced or varied protection for intellectual property rights in some countries.

Operating in international markets also requires significant management attention and financial resources. The investment and additional resources required to establish operations and manage growth in other countries may not produce desired levels of revenue or profitability.

We rely on third party software, including Oracle database software, that may be difficult to replace or could cause errors or failures of our service that could lead to lost customers or harm to our reputation.

We rely on software licensed from third parties to offer our service, including database software from Oracle. This software may not continue to be available to us on commercially reasonable terms, or at all. Any loss of the right to use any of

this software could result in delays in the provisioning of our service until equivalent technology is either developed by us, or, if available, is identified, obtained and integrated, which could harm our business. Any errors or defects in third party software could result in errors or a failure of our service which could harm our business.

If we fail to maintain proper and effective internal controls, our ability to produce accurate and timely financial statements could be impaired and investors' views of us could be harmed.

Ensuring that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate financial statements on a timely basis is a costly and time consuming effort that needs to be re evaluated frequently. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with GAAP. Although we have completed the process of documenting, reviewing and improving our internal controls and procedures for compliance with Section 404 of the Sarbanes Oxley Act of 2002, for the fiscal year ended December 31, 2011, there can be no assurances that control deficiencies will not be identified in the future.

Implementing any additional required changes to our internal controls may distract our officers and employees, entail substantial costs to modify our existing processes and add personnel and take significant time to complete. These changes may not, however, be effective in maintaining the adequacy of our internal controls. Any failure to maintain that adequacy, or as consequent inability to produce accurate financial statements on a timely basis, could increase our operating costs and harm our business. In addition, investors' perceptions that our internal controls are inadequate or that we are unable to produce accurate financial statements on a timely basis may harm our stock price and make it more difficult for us to effectively market and sell our service to new and existing customers.

Our business is subject to changing regulations regarding corporate governance and public disclosure that will increase both our costs and the risk of noncompliance.

As a public company, we incur significant legal, accounting and other expenses associated with compliance with applicable laws, rules, regulations and listing requirements. In addition, the Sarbanes-Oxley Act, the Dodd-Frank Act, and rules subsequently implemented by the SEC and The New York Stock Exchange, have imposed a variety of compliance requirements on public companies, including requiring changes in corporate governance practices. In addition, the SEC and the U.S. Congress may continue to increase the scope of applicable disclosure and corporate governance-related rules. Our management and other personnel may need to devote a substantial amount of time to the compliance requirements associated with being a public company. Moreover, these laws, rules and regulations have increased and may continue to increase the scope, complexity and cost of our corporate governance, reporting and disclosure practices.

Because we recognize subscription revenue over the term of the applicable agreement, the lack of subscription renewals or new service agreements may not be reflected immediately in our operating results.

The majority of our quarterly revenue is attributable to service agreements entered into during previous quarters. A decline in new or renewed service agreements in any one quarter will not be fully reflected in our revenue in that quarter but will harm our revenue in future quarters. As a result, the effect of significant downturns in sales and market acceptance of our services in a particular quarter may not be fully reflected in our operating results until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, because revenue from new customers must be recognized over the applicable subscription term.

Material defects or errors in the software we use to deliver our services could harm our reputation, result in significant costs to us and impair our ability to sell our services.

The software applications underlying our services are inherently complex and may contain material defects or errors, particularly when first introduced or when new versions or enhancements are released. We have from time to time found defects in our service, and new errors in our existing service may be detected in the future. Any defects that cause interruptions to the availability of our services could result in:

- a reduction in sales or delay in market acceptance of our services;
- sales credits or refunds to our customers;
- loss of existing customers and difficulty in attracting new customers;
- diversion of development resources;
- harm to our reputation; and
- increased warranty and insurance costs.

After the release of our services, defects or errors may also be identified from time to time by our internal team and by our customers. The costs incurred in correcting any material defects or errors in our services may be substantial and could harm our operating results.

Government regulation of the Internet and Ecommerce is evolving, and unfavorable changes or our failure to comply with regulations could harm our operating results.

As Internet commerce continues to evolve, increasing regulation by federal, state or foreign agencies becomes more likely. For example, we believe increased regulation is likely in the area of data privacy, and laws and regulations applying to the solicitation, collection, processing or use of personal or consumer information could affect our customers' ability to use and share data, potentially reducing demand for financials/ERP, CRM, PSA and Ecommerce solutions and restricting our ability to store, process and share our customers' data. In addition, taxation of services provided over the Internet or other charges imposed by government agencies or by private organizations for accessing the Internet may also be imposed. Any regulation imposing greater fees for Internet use or restricting information exchanged over the Internet could result in a decline in the use of the Internet and the viability of Internet based services, harming our business and operating results.

Privacy concerns and laws or other domestic or foreign regulations may reduce the effectiveness of our application suite and harm our business.

Our customers can use our service to store personal or identifying information regarding their customers and contacts. Federal, state and foreign government bodies and agencies, however, have adopted or are considering adopting laws and regulations regarding the collection, use and disclosure of personal information obtained from consumers and other individuals. The costs of compliance with, and other burdens imposed by, such laws and regulations that are applicable to the businesses of our customers may limit the use and adoption of our service and reduce overall demand for it.

In addition to government activity, privacy advocacy groups and the technology and other industries are considering various new, additional or different self regulatory standards that may place additional burdens on us. If the gathering of personal information were to be curtailed, financials/ERP, CRM, PSA and Ecommerce solutions would be less effective, likely reducing demand for our service and harming our business.

Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and harm our operating results.

A change in accounting standards or practices could harm our operating results and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may harm our operating results or the way we conduct our business.

Unanticipated changes in our effective tax rate could harm our future operating results.

We are subject to income taxes in the United States and various foreign jurisdictions, and our domestic and international tax liabilities are subject to the allocation of expenses in differing jurisdictions. Our tax rate is affected by changes in the mix of earnings and losses in countries with differing statutory tax rates, certain non deductible expenses arising from the requirement to expense stock options and the valuation of deferred tax assets and liabilities, including our ability to utilize our net operating losses. Increases in our effective tax rate could harm our operating results.

We may be unable to integrate acquired businesses and technologies successfully or to achieve the expected benefits of such acquisitions. We may acquire or invest in additional companies, which may divert our management's attention, result in additional dilution to our stockholders and consume resources that are necessary to sustain our business.

We have undertaken acquisitions in the past and may continue to evaluate and consider potential strategic transactions, including acquisitions and dispositions of businesses, technologies, services, products and other assets in the future. An acquisition, investment or business relationship may result in unforeseen operating difficulties and expenditures. In particular, we may encounter difficulties assimilating or integrating the businesses, technologies, products, personnel or operations of the acquired companies, particularly if the key personnel of the acquired company choose not to work for us, the company's software is not easily adapted to work with ours or we have difficulty retaining the customers of any acquired business due to changes in management or otherwise. Acquisitions may also disrupt our business, divert our resources and require significant management attention that would otherwise be available for development of our business. Moreover, the anticipated benefits of

any acquisition, investment or business relationship may not be realized or we may be exposed to unknown liabilities.

We may in the future seek to acquire or invest in additional businesses, products, technologies or other assets. We also may enter into relationships with other businesses to expand our service offerings or our ability to provide service in foreign jurisdictions, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing or investments in other companies. Negotiating these transactions can be time consuming, difficult and expensive, and our ability to close these transactions may often be subject to approvals that are beyond our control. Consequently, these transactions, even if undertaken and announced, may not close. For one or more of those transactions, we may:

- issue additional equity securities that would dilute our stockholders;
- use cash that we may need in the future to operate our business;
- incur debt on terms unfavorable to us or that we are unable to repay;
- incur large charges or substantial liabilities;
- encounter difficulties retaining key employees of the acquired company or integrating diverse software codes or business cultures; and
- become subject to adverse tax consequences, substantial depreciation or deferred compensation charges.

Any of these risks could harm our business and operating results.

We rely on our management team and need additional personnel to grow our business, and the loss of one or more key employees or our inability to attract and retain qualified personnel could harm our business.

Our success and future growth depends to a significant degree on the skills and continued services of our management team, especially Zachary Nelson, our President and Chief Executive Officer, and Evan M. Goldberg, our Chief Technology Officer and Chairman of the Board. We do not maintain key man insurance on any members of our management team, including Messrs. Nelson and Goldberg. Our future success also depends on our ability to attract, retain and motivate highly skilled technical, managerial, sales, marketing and service and support personnel, including members of our management team. Competition for sales, marketing and technology development personnel is particularly intense in the software and technology industries. As a result, we may be unable to successfully attract or retain qualified personnel. Our inability to attract and retain the necessary personnel could harm our business.

Risks Related to Ownership of our Common Stock

Lawrence J. Ellison or members of his family, and related entities, beneficially own a majority of our outstanding shares of common stock, which may limit our other stockholders' ability to influence or control certain of our corporate actions. This concentration of ownership may also reduce the market price of our common stock and impair a takeover attempt of us.

Entities beneficially owned by Lawrence J. Ellison held an aggregate of approximately 46% of our common stock as of December 31, 2011. Further, Mr. Ellison, his family members, trusts for their benefit, and related entities together beneficially owned an aggregate of approximately 53% of our common stock as of that date. Mr. Ellison is able to exercise control over approval of significant corporate transactions, including a change of control or liquidation. In addition, if the voting restrictions that apply to NetSuite Restricted Holdings LLC, the investment entity to which Mr. Ellison has transferred his shares, lapse or are amended, Mr. Ellison will be able to exercise control over additional corporate matters, including elections of our directors. So long as Mr. Ellison continues to be either an officer or director of Oracle, these voting restrictions cannot be changed without the approval of an independent committee of Oracle's board of directors. Mr. Ellison's interests and investment objectives may differ from our other stockholders. Mr. Ellison is also the Chief Executive Officer, a principal stockholder and a director of Oracle. Oracle supplies us with database software on which we rely to provide our service and is also a potential competitor of ours. Our Board of Directors adopted resolutions which renounce and provide for a waiver of the corporate opportunity doctrine as it relates to Mr. Ellison. As a result, Mr. Ellison will have no fiduciary duty to present corporate

opportunities to us. In addition, Mr. Ellison's indirect majority interest in us could discourage potential acquirers or result in a delay or prevention of a change in control of our company or other significant corporate transactions, even if a transaction of that sort would be beneficial to our other stockholders or in our best interest.

Our failure to raise additional capital or generate the cash flows necessary to expand our operations and invest in our application services could reduce our ability to compete successfully.

We may need to raise additional funds, and we may not be able to obtain additional debt or equity financing on favorable terms, if at all. If we raise additional equity financing, our stockholders may experience significant dilution of their ownership interests and the per share value of our common stock could decline. If we engage in debt financing, we may be required to accept terms that restrict our ability to incur additional indebtedness and force us to maintain specified liquidity or other ratios. If we need additional capital and cannot raise it on acceptable terms, we may not be able to, among other things:

- develop or enhance our application and services;
- continue to expand our product development, sales and marketing organizations;
- acquire complementary technologies, products or businesses;
- expand operations, in the United States or internationally;
- hire, train and retain employees; or
- respond to competitive pressures or unanticipated working capital requirements.

Future sales of shares by existing stockholders could cause our stock price to decline.

If our existing stockholders sell or otherwise dispose of, or indicate an intention to sell or dispose of, substantial amounts of our common stock in the public market, the trading price of our common stock could decline. As of December 31, 2011, we had a total of 68,785,296 shares of our common stock outstanding. Although shares that are held by NetSuite Restricted Holdings LLC are subject to certain restrictions on disposition and a portion of the remaining shares are subject to our Insider Trading Compliance Policy during certain periods of each quarter, substantially all of the shares held by parties other than NetSuite Restricted Holdings LLC, representing 54% of our outstanding shares as of December 31, 2011, are freely tradable, subject to our quarterly black-out periods that apply to shares held by our directors, officers, employees and consultants. If a significant number of these shares are sold, or if it is perceived that they will be sold, in the public market, the trading price of our common stock could decline.

Anti takeover provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation, amended and restated bylaws and Delaware law contain provisions that could have the effect of rendering more difficult or discouraging an acquisition deemed undesirable by our Board of Directors. Our corporate governance documents include provisions:

- authorizing blank check preferred stock, which could be issued with voting, liquidation, dividend and other rights superior to our common stock;
- limiting the liability of, and providing indemnification to, our directors and officers;
- limiting the ability of our stockholders to call and bring business before special meetings and to take action by written consent in lieu of a meeting;
- requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our Board of Directors;
- controlling the procedures for the conduct and scheduling of board and stockholder meetings;
- providing the Board of Directors with the express power to postpone previously scheduled annual meetings and to cancel previously scheduled special meetings;
- limiting the determination of the number of directors on our board and the filling of vacancies or newly created seats on the board to our Board of Directors then in office; and
- providing that directors may be removed by stockholders only for cause.

These provisions, alone or together, could delay hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation law, which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock. Under Section 203, our majority stockholder, which is beneficially owned by Lawrence J. Ellison, and our current stockholders associated with members of Mr. Ellison's family are not subject to the prohibition from engaging in such business combinations.

Any provision of our amended and restated certificate of incorporation or bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

Item 1B. Unresolved Staff Comments
None.

Item 2. Properties
Our corporate headquarters is located in San Mateo, California and comprises approximately 80,000 square feet of space leased. In December 2011, we extended the San Mateo office lease term seven years from August 2012 to August 2019. We also have facilities in Denver, Boston, Austin, New York, Chicago, Pennsylvania, Canada, Australia, the Czech Republic, Hong Kong, Japan, the Philippines, Singapore and the United Kingdom.

We believe that our existing properties are in good condition and are suitable for the conduct of our business. As our existing leases expire and as we continue to expand our operations, we believe that suitable space will be available to us on commercially reasonable terms.

Item 3. Legal Proceedings

From time to time, we are involved in various legal proceedings arising from the normal course of business activities. We are not presently a party to any litigation the outcome of which, we believe, if determined adversely to us, would individually or in the aggregate have a material adverse effect on our business, operating results or financial condition.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock has been quoted on the New York Stock Exchange under the symbol "N". The following table sets forth for the indicated periods the high and low sales prices of our common stock as reported by the New York Stock Exchange.

For the quarters ended	High	Low
2011:		
December 31, 2011	\$47.73	\$26.00
September 30, 2011	42.64	27.01
June 30, 2011	39.40	27.95
March 31, 2011	\$31.16	25.34
2010:		
December 31, 2010	\$27.11	\$19.35
September 30, 2010	24.10	12.41
June 30, 2010	16.25	12.64
March 31, 2010	\$17.82	\$12.13

We have never paid any cash dividends on our common stock. Our Board of Directors currently intends to retain any future earnings to support operations and to finance the growth and development of our business and does not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination related to our dividend policy will be made at the discretion of our board.

As of December 31, 2011, there were 129 registered stockholders of record of our common stock.

The graph set forth below compares the cumulative total stockholder return on our common stock between December 20, 2007 (the date of our initial public offering) and December 31, 2011, with the cumulative total return of (i) the Nasdaq Composite Index and (ii) the Nasdaq Computer Index, over the same period. This graph assumes the investment of \$100 on December 20, 2007 in our common stock, the Nasdaq Composite Index and the Nasdaq Computer Index, and assumes the reinvestment of dividends, if any. The graph assumes the initial value of our common stock on December 20, 2007 was the IPO price of \$26.00 per share.

	December 20, 2007	December 31, 2007	December 31, 2008	December 31, 2009	December 31, 2010	December 31, 2011
NetSuite	\$ 100	\$ 151	\$ 32	\$ 61	\$ 96	\$ 156
Nasdaq Composite Index	\$ 100	\$ 100	\$ 60	\$ 86	\$ 100	\$ 99
Nasdaq Computer Index	\$ 100	\$ 101	\$ 54	\$ 92	\$ 108	\$ 108

The comparisons shown in the graph are based upon historical data. We caution that the stock price performance shown in the graph above is not necessarily indicative of, nor is it intended to forecast, the potential future performance of our common stock.

Item 6. Selected Financial Data

The following selected condensed consolidated financial data should be read in conjunction with our audited consolidated financial statements and related notes thereto and with Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this Annual Report. The consolidated statement of operations data for the years ended December 31, 2011, 2010 and 2009 and the selected condensed consolidated balance sheet data as of December 31, 2011 and 2010 are derived from, and are qualified by reference to, the audited consolidated financial statements included in this Annual Report. The condensed consolidated statement of operations data for the fiscal years ended December 31, 2008 and 2007 and the consolidated balance sheet data as of December 31, 2009, 2008 and 2007 are derived from audited consolidated financial statements which are not included in this Annual Report.

Operating loss	(30,188)	(25,565)	(23,522)	(18,369)	(23,580)
Other income / (expenses), net, net loss attributable to noncontrolling interest and income taxes	(1,819)	(1,901)	218	2,505	(326)
Net loss attributable to NetSuite Inc. common stockholders	\$(32,007)	\$(27,466)	\$(23,304)	\$(15,864)	\$(23,906)
Net loss per NetSuite Inc. common share	\$(0.48)	\$(0.43)	\$(0.38)	\$(0.26)	\$(2.45)
Weighted average number of shares used in computing net loss per common share	66,919	63,772	61,941	60,385	9,774

(1) Includes stock-based compensation expense, amortization of acquisition-related intangibles, transaction costs for business combinations and costs associated with the settlement of a patent dispute as follows:

	Year ended December 31,				
	2011	2010	2009	2008	2007
Cost of revenue:					
Subscription and support	\$3,568	\$3,598	\$2,792	\$1,480	\$259
Professional services and other	4,138	3,802	2,497	1,508	1,444
Operating expenses:					
Product development	12,015	9,723	6,641	3,629	10,376
Sales and marketing	13,437	10,249	7,078	3,375	2,540
General and administrative	9,662	8,565	7,677	3,386	3,605
Total stock-based compensation expense, amortization of intangible assets and transaction costs for business combinations	\$42,820	\$35,937	\$26,685	\$13,378	\$18,224

In January 2009, we adopted Statement of Financial Accounting Standards ("FASB") 141(R), "Business Combinations" (FASB ASC Topic 805), which requires transaction costs for business combinations to be recorded as current period expenses. In prior years, such costs were included as part of consideration paid for the acquisition.

In April 2010, we adopted FASB ASC 2009-13, "Accounting standards for multiple-element revenue arrangements" (FASB ASC Topic 605). Under ASC 2009-13, we recognize professional services revenue based on a percentage-of-completion method for both single and multiple-element arrangements. In prior years, we recognized

professional services in multiple-element arrangements over the contract period.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Annual Report on Form 10-K contains "forward-looking statements" that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. Such forward-looking statements include any expectation of earnings, revenues or other financial items; any statements of the plans, strategies and objectives of management for future operations; factors that may affect our operating results; statements concerning new products or services; statements related to future capital expenditures; statements related to future economic conditions or performance; statements as to industry trends and other matters that do not relate strictly to historical facts or statements of assumptions underlying any of the foregoing. These statements are often identified by the use of words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," or "will," and similar expressions or variations. Such forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to those discussed in the section titled "Risk Factors" included in Item 1A of Part I of this Annual Report on Form 10-K, and the risks discussed in our other SEC filings.

We urge you to consider these factors carefully in evaluating the forward-looking statements contained in this Annual Report on Form 10-K. These statements are based on the beliefs and assumptions of our management based on information currently available to management. The forward-looking statements included in this Annual Report are made only as of the date of this Annual Report on Form 10-K. All subsequent written or oral forward-looking statements attributable to our company or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. We do not undertake, and specifically disclaim, any obligation to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements except as required by law.

Overview

We are the industry's leading provider of cloud-based financials/ERP software suites. In addition to financials/ERP software suites, we offer a broad suite of applications, including accounting, CRM, PSA and Ecommerce, that enable companies to manage most of their core business operations in our single integrated suite. Our "real-time dashboard" technology provides an easy-to-use view into up-to-date, role-specific business information. We also offer customer support and professional services related to implementing and supporting our suite of applications. We deliver our suite over the Internet as a SaaS model.

In 1999, we released our first application, NetLedger, which focused on accounting applications. We then released Ecommerce functionality in 2000 and CRM and sales force automation functionality in 2001. In 2002, we released our next generation suite under the name NetSuite to which we have regularly added features and functionality. In 2008, we acquired OpenAir, and in 2009 we acquired QuickArrow Inc. ("QuickArrow"), both of which offer professional services automation and project portfolio management products.

Our headquarters are located in San Mateo, California. We were incorporated in California in September 1998 and reincorporated in Delaware in November 2007. We conduct our business worldwide, with international locations in

Canada, Europe, Asia and Australia.

Key Components of Our Results of Operations

Revenue

Our revenue has grown from \$17.7 million during the year ended December 31, 2004 to \$236.3 million during the year ended December 31, 2011.

We generate sales directly through our sales team and, to a lesser extent, indirectly through channel partners. We sell our service to customers across a broad spectrum of industries, and we have tailored our service for wholesalers/distributors,

manufacturers, e-tailers, services companies and software companies. The primary target customers for our service are medium-sized businesses and divisions of large companies. An increasing percentage of our customers and our revenue have been derived from larger businesses within this market. For the year ended December 31, 2011, we did not have any single customer that accounted for more than 3% of our revenue.

We are pursuing a number of strategies that we believe will enable us to continue to grow. The goals of those strategic objectives are to continue to move up-market, to increase the use of NetSuite as a platform; and to extend the verticalization of our product line. Although we have made progress toward our goals in recent periods, there are still many areas where we believe that we can continue to grow. To achieve these goals, we are focused on the following initiatives:

- Growth of sales of OneWorld, our platform for ERP, CRM, PSA and Ecommerce capabilities in multi-currency environments across multiple subsidiaries and legal entities, which supports the needs of large, standalone companies, and divisions of large enterprises;
- Strengthening our offerings for targeted industries such as wholesale/distribution, manufacturing, e-tail, retail, technology and professional services by adding deeper verticalized functionality; and
- Developing our SuiteCloud ecosystem to enable third parties to extend our offerings with their vertical expertise or horizontal solution.

We experience competitive pricing pressure when our products are compared with solutions that address a narrower range of customer needs or are not fully integrated (for example, when compared with Ecommerce or CRM stand-alone solutions). In addition, since we sell primarily to medium-sized businesses, we also face pricing pressure in terms of the more limited financial resources or budgetary constraints of many of our target customers. We do not currently experience significant pricing pressure from competitors that offer a similar cloud-based integrated business management suite.

We sell our application suite pursuant to subscription agreements. The duration of these agreements is generally one year. We rely in part on a large percentage of our customers to renew their agreements to drive our revenue growth. Our customers have no obligation to renew their subscriptions after the expiration of their subscription period.

We generally invoice our customers in advance in annual or quarterly installments, and typical payment terms provide that our clients pay us within 30 to 60 days of invoice. Amounts that have been invoiced where the customer has a legal obligation to pay are recorded in accounts receivable and deferred revenue. As of December 31, 2011, we had deferred revenue of \$111.7 million.

Backlog was approximately \$95.3 million and \$48.1 million as of December 31, 2011 and 2010, respectively. Of the \$95.3 million in backlog as of December 31, 2011, \$67.6 million is short-term backlog and \$27.7 million is long-term backlog. The \$48.1 million in backlog as of December 31, 2010 included \$41.5 million in short-term backlog and \$6.6 million in long-term backlog. Backlog represents future billings under our subscription agreements that have not been invoiced or have not been recorded as deferred revenue. We expect that the amount of backlog may change from year-to-year for several reasons, including specific timing and duration of large customer subscription agreements, varying billing cycles of non-cancelable subscription agreements, the specific timing of customer renewals, foreign currency fluctuations, the timing of when unbilled deferred revenue is to be recognized as revenue and changes in customer financial circumstances. For multi-year subscription agreements billed annually, the associated backlog is typically high at the beginning of the contract period, zero immediately prior to expiration and increases if the agreement is renewed. Low backlog attributable to a particular subscription agreement is typically associated with an impending renewal and is not an indicator of the likelihood of renewal or future revenue of that customer.

Accordingly, we expect that the amount of backlog may change from year to year depending in part upon the number of subscription agreements in particular stages in their renewal cycle. Such fluctuations are not reliable indicators of future revenues.

Our subscription agreements provide service level commitments of 99.5% uptime per period, excluding scheduled maintenance. The failure to meet this level of service availability may require us to credit qualifying customers up to

the value of an entire month of their subscription and support fees. In light of our historical experience with meeting our service-level commitments, we do not currently have any liabilities on our balance sheet for these commitments.

Revenue by geographic region, based on the billing address of the customer, was as follows for the periods presented:

	Year ended December 31,			
	2011	2010	2009	
	(dollars in thousands)			
United States	\$ 172,527	\$ 143,607	\$ 126,049	
International	63,799	49,542	40,491	
Total revenue	\$ 236,326	\$ 193,149	\$ 166,540	
Percentage of revenue generated outside of the United States	27	% 26	% 24	%

In 2006, our company and NetSuite KK entered into share purchase agreements, development fund agreements and preferred reseller agreement with TCI, MJS and Inspire Corporation, unrelated Japanese firms. Pursuant to the Share Purchase Agreement, those firms acquired a 28% ownership interest in NetSuite KK. In December 2009, we purchased TCI's 20% ownership equity in NetSuite KK for \$3.0 million. Then, in 2010, we purchased the remaining outstanding ownership equity in NetSuite KK from MJS and Inspire Corporation for aggregate consideration of \$1.4 million. In 2011, we did not recognize any revenue related to the distribution agreements. During the years ended December 31, 2010 and 2009, we recognized \$220,000 and \$2.1 million, respectively, in distribution revenue related to these agreements. Prior to our purchase of the remaining outstanding equity of NetSuite KK, given our majority ownership interest, the accounts of NetSuite KK were consolidated with our accounts, and a noncontrolling interest was recorded for the other investors' interests in the net assets and operations of NetSuite KK to the extent of the noncontrolling investors' individual investments. See Note 9 to our Consolidated Financial Statements for a further description of NetSuite KK.

Employees

As of December 31, 2011, our headcount was 1,265 employees including 384 employees in sales and marketing, 514 employees in operations, professional services, training and customer support, 239 employees in product development, and 128 employees in a general and administrative capacity.

Cost of Revenue

Cost of revenue primarily consists of costs related to hosting our application suite, providing customer support, data communications expenses, personnel and related costs of operations, professional services and training personnel, stock-based compensation, software license fees, costs associated with website development activities, allocated overhead, intangible asset amortization expense associated with capitalized internal use software and acquired developed technology and related plant and equipment depreciation and amortization expenses. The cost associated with providing professional services is significantly higher as a percentage of revenue than the cost associated with delivering our software services due to the labor costs associated with providing professional services.

We allocate overhead such as rent, information technology costs and employee benefit costs to all departments based on headcount. As such, general overhead expenses are reflected in cost of revenue and each operating expense category.

We expect cost of revenue to remain constant as a percentage of revenue over time; however, it could fluctuate period to period depending on the growth of our professional services business and any associated increased costs relating to the delivery of professional services and the timing of significant expenditures.

Operating Expenses

Product Development

Product development expenses primarily consist of personnel and related costs for our product development employees and executives, including salaries, stock-based compensation, employee benefits and allocated overhead. Our product development efforts have been devoted primarily to increasing the functionality and enhancing the ease of use of our cloud-based application suite as well as localizing our product for international use. A key component of

our strategy is to expand our business internationally. This will require us to conform our application to comply with local regulations and languages, causing us to incur additional expenses related to translation and localization of our application for use in other countries.

In 2012, we expect product development expenses to increase in absolute dollars, but remain flat as a percentage of revenue as we continue to extend our service offerings in other countries and as we expand and enhance our application suite technologies. Such expenses may vary due to the timing of these offerings and technologies.

Sales and Marketing

Sales and marketing expenses primarily consist of personnel and related costs for our sales and marketing employees and executives, including wages, benefits, bonuses, commissions and training, stock-based compensation, commissions paid to our channel partners, the cost of marketing programs such as on-line lead generation, promotional events, webinars and other meeting costs, amortization of intangible assets related to tradename and customer relationships, and allocated overhead. We market and sell our application suite worldwide through our direct sales organization and indirect distribution channels such as strategic resellers. We capitalize and amortize our direct and channel sales commissions over the period the related revenue is recognized. The commission expense for customer renewals is at lower rates than for sales to new customers. We expect our commission expense to increase in terms of dollars based on our expected revenue growth.

We believe we have sufficient sales and marketing staff to meet our revenue goals for 2012. We expect to continue to invest in sales and marketing to pursue new customers and expand relationships with existing customers. As such, we expect our sales and marketing expenses to increase in terms of absolute dollars, but remain flat as a percentage of total revenue in 2012.

General and Administrative

General and administrative expenses primarily consist of personnel and related costs for executive, finance, human resources and administrative personnel, stock-based compensation, legal and other professional fees and other corporate expenses and allocated overhead.

In 2012, we expect our general and administrative expenses to increase in terms of absolute dollars, but decline as a percentage of total revenue as we continue to expand our business.

Income Taxes

Since inception, we have incurred annual operating losses and, accordingly, have not recorded a provision for income taxes for any of the periods presented other than provisions for minimum and foreign income taxes.

Critical Accounting Policies and Judgments

Our consolidated financial statements are prepared in accordance with GAAP in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances changes in the accounting estimates are reasonably likely to occur from period-to-period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial position, results of operations and cash flows will be affected.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application, while in other cases, significant judgment is required in selecting among available alternative accounting standards that allow different accounting treatment for similar transactions. We consider these policies requiring significant management judgment to be critical accounting policies. These critical accounting policies are:

- Revenue recognition;
- Internal use software and website development costs;
- Deferred commissions;
- Accounting for stock-based compensation; and
- Goodwill and other intangible assets.

A description of our critical accounting policies and judgments for those areas are presented below. In addition, please refer to the Notes to Consolidated Financial Statements for further discussion of our accounting policies.

Revenue Recognition

We generate revenue from two sources: (1) subscription and support services; and (2) professional services and other. Subscription and support revenue includes subscription fees from customers accessing our cloud-based application suite and support fees from customers purchasing support. Our arrangements with customers do not provide the customer with the right to take possession of the software supporting the cloud-based application service at any time. Professional services and other revenue include fees from consultation services to support the business process mapping, configuration, data migration, integration and training. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue or

revenue, depending on whether the revenue recognition criteria have been met.

For the most part, subscription and support agreements are entered into for 12 months. In aggregate, more than 90% of the professional services component of the arrangements with customers is performed within 300 days of entering into a contract with the customer.

The subscription agreements provide service-level commitments of 99.5% uptime per period, excluding scheduled maintenance. The failure to meet this level of service availability may require us to credit qualifying customers up to the value of an entire month of their subscription and support fees. In light of our historical experience with meeting our service-level commitments, we do not currently have any liabilities on our balance sheet for these commitments. We commence revenue recognition when all of the following conditions are met:

- there is persuasive evidence of an arrangement;
- the service is being provided to the customer;
- the collection of the fees is reasonably assured; and
- the amount of fees to be paid by the customer is fixed or determinable.

In most instances, revenue from a new customer acquisition is generated under sales agreements with multiple elements, comprised of subscription and support fees from customers accessing our cloud-based application suite and professional services associated with consultation services. We evaluate each element in a multiple-element arrangement to determine whether it represents a separate unit of accounting. An element constitutes a separate unit of accounting when the delivered item has standalone value and delivery of the undelivered element is probable and within our control. Subscription and support have standalone value because we routinely sell it separately. Professional services have standalone value because we have sold professional services separately and there are several third party vendors that routinely provide similar professional services to our customers on a standalone basis. In October 2009, the FASB amended the accounting standards for multiple-element revenue arrangements (“ASU 2009-13”) to:

- provide updated guidance on whether multiple deliverables exist, how the elements in an arrangement should be separated, and how the consideration should be allocated;
- require an entity to allocate revenue in an arrangement using estimated selling prices (“ESP”) of each element if a vendor does not have vendor-specific objective evidence of selling price (“VSOE”) or third-party evidence of selling price (“TPE”); and
- eliminate the use of the residual method and require a vendor to allocate revenue using the relative selling price method.

We early adopted this accounting guidance on April 1, 2010, for applicable arrangements entered into or materially modified after January 1, 2010 (the beginning of our fiscal year).

Prior to our adoption of ASU 2009-13, we were not able to establish VSOE or TPE for all of the undelivered elements. As a result, we typically recognized subscription and support, and professional services revenue ratably over the contract period, and allocated subscription and support revenue and professional services revenue based on the contract price.

As a result of the adoption of ASU 2009-13, we allocate revenue to each element in an arrangement based on a selling price hierarchy. The selling price for a deliverable is based on its VSOE, if available, TPE, if VSOE is not available, or ESP, if neither VSOE nor TPE is available. We have been unable to establish VSOE or TPE for the elements of our sales arrangements. Therefore, we establish the ESP for each element primarily by considering the weighted average of actual sales prices of professional services when sold on a standalone basis and subscription and support including various add-on modules when sold together without professional services, and other factors such as gross margin objectives, pricing practices and growth strategy. The consideration allocated to subscription and support is recognized as revenue over the contract period. We have established processes to determine ESP, allocate revenue in multiple arrangements using ESP, and make reasonably dependable estimates of the percentage-of-completion method for professional services.

The consideration allocated to professional services and other is recognized as revenue on a percentage-of-completion method. The total arrangement fee for a multiple element arrangement is allocated based on the relative ESP of each element unless the fee allocated to the subscription and support under this method is less than the fee subject to refund if the performance conditions are not met. In most multiple element arrangements, the relative ESP of the subscription and support is less than the contractual amounts subject to the performance conditions. In these instances, pursuant to ASU 2009-13, since the professional services are generally completed prior to completion of the subscription and support, the allocation of the fee for subscription and support is at least equal to the contractual amounts subject to the performance conditions.

Prior to adoption of ASU 2009-13, in multiple element arrangements where we determined that a subset of professional services was essential to the customers use of the subscription services (“Essential Professional Services Arrangements”), we deferred the commencement of revenue recognition for the entire arrangement until we have delivered the essential professional services component or made a determination that the remaining professional services were no longer essential to the customer. With the adoption of ASU 2009-13, we recognize revenue for subscription and support services in such arrangement over the contract period commencing when the subscription service is made available to the customer and for professional services on a percentage-of-completion method.

For single element sales agreements, subscription and support revenue is recognized ratably over the contract term beginning on the provisioning date of the contract. Prior to April 1, 2010, professional services revenue generated under single element sales agreements, was immaterial and therefore was recognized when fully delivered. As of April 1, 2010, the date of adoption of ASU 2009-13, we recognized professional services revenue based on a percentage-of-completion method for both single and multiple element arrangements since we now separate the professional services revenue from subscription and support revenue. Cost related to professional services is recognized as incurred.

Internal Use Software and Website Development Costs

The costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental, are capitalized until the software is substantially complete and ready for its intended use. Capitalization ceases upon completion of all substantial testing. We also capitalize costs related to specific upgrades and enhancements when it is probable the expenditures will result in additional functionality. Capitalized costs are recorded as part of property and equipment. Training costs are expensed as incurred. Internal use software is amortized on a straight line basis over its estimated useful life, generally three years. Management evaluates the useful lives of these assets on an annual basis and tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets. There were no impairments to internal use software during the years ended December 31, 2011, 2010 or 2009. We capitalized \$1.3 million, \$96,000 and \$287,000 in internal use software during the years ended December 31, 2011, 2010 and 2009, respectively.

Deferred Commissions

We capitalize commission costs that are incremental and directly related to the acquisition of customer contracts. Commission costs are accrued and capitalized upon execution of the sales contract by the customer. Payments to sales personnel are made shortly after the receipt of the related customer payment. Deferred commissions are amortized over the term of the related non-cancelable customer contract and are recoverable through the related future revenue streams. We believe this is the preferable method of accounting as the commission costs are so closely related to the revenue from the customer contracts that they should be expensed over the same period that the related revenue is recognized. We capitalized commission costs of \$44.4 million, \$27.6 million and \$19.7 million during the years ended December 31, 2011, 2010 and 2009, respectively.

Accounting for Stock-Based Compensation

We recognize the fair value of stock-based compensation in financial statements over the requisite service period of the individual grants, which generally equals a four year vesting period. We recognize compensation expense for stock option awards, restricted stock awards, restricted stock unit awards and performance share unit awards on a straight-line basis over the requisite service period. Estimates are used in determining the fair value of stock option awards using a Black-Scholes model. The fair value of restricted stock, restricted stock units and performance share units is generally determined based on the intrinsic value of the award on the grant date. Our 2011 performance share unit grants include a market condition performance criteria so we used a Monte Carlo simulation model to determine their fair value. Changes in the estimates used to determine the fair value of share-based equity compensation instruments could result in changes to our compensation charges. Additionally, our 2011 performance share unit grants vest 1/12 per quarter with the initial vesting event on February 15, 2012.

In recent years, we have awarded more restricted stock, restricted stock units and performance share units than granted stock options. Consequently, our restricted stock, restricted stock units and performance share units stock-based compensation expense represents a larger portion of total stock-based compensation expense recorded in our financial statements than stock options.

As a result of our stock-based compensation activity, we recorded \$38.3 million, \$31.3 million and \$20.7 million of stock-based compensation during the years ended December 31, 2011, 2010 and 2009, respectively.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired. We allocated a portion of the purchase price of the acquisition of our acquired businesses to intangible assets, including customer relationships, developed technology and tradenames that are being amortized over their estimated useful lives of one

to seven years. We also allocated a portion of the purchase price to tangible assets and assessed the liabilities to be recorded as part of the purchase price. The estimates we made in allocating the purchase price to tangible and intangible assets, and in assessing liabilities recorded as part of the purchase, involved the application of judgment and the use of estimates and these could significantly affect our operating results and financial position.

We review the carrying value of goodwill for impairment annually and whenever events or changes in circumstances indicate that the carrying value of goodwill may exceed its fair value. We evaluate impairment by comparing the estimated fair value of the reporting unit to its carrying value. We estimate fair value based on our market capitalization and the market multiples of revenue and gross profit for publicly traded peer companies. Actual results may differ materially from these estimates. The estimates we make in determining the fair value of the reporting unit involve the application of judgment potentially affecting the timing and size of any future impairment charges. Impairment of our goodwill could significantly affect our operating results and financial position. Based on our most recent assessment, there was no goodwill impairment.

We continually evaluate whether events or circumstances have occurred that indicate that the estimated remaining useful life of our long-lived assets, including intangible assets, may warrant revision or that the carrying value of these assets may be impaired. Any write-downs are treated as permanent reductions in the carrying amount of the assets. We must use

judgment in evaluating whether events or circumstances indicate that useful lives should change or that the carrying value of assets has been impaired. Any resulting revision in the useful life or the amount of impairment also requires judgment. Any of these judgments could affect the timing or size of any future impairment charges. Revision of useful lives or impairment charges could significantly affect our operating results and financial position. There were no revisions to the useful lives of intangible assets or impairment of goodwill during the years ended December 31, 2011, 2010 or 2009.

Results of Operations

Revenue and Cost of Revenue

Our revenue, cost of revenue, gross profit and gross margin was as follows for the periods presented:

	Year ended December 31,			
	2011	2010	2009	
	(dollars in thousands)			
Revenue:				
Subscription and support	\$ 199,579	\$ 163,964	\$ 139,121	
Professional services and other	36,747	29,185	27,419	
Total revenue	236,326	193,149	166,540	
Cost of revenue (1):				
Subscription and support	33,083	26,908	24,570	
Professional services and other	37,777	34,741	31,535	
Total cost of revenue	70,860	61,649	56,105	
Gross profit	\$ 165,466	\$ 131,500	\$ 110,435	
Gross margin	70	% 68	% 66	%

(1) Includes stock-based compensation expense and amortization of intangible assets

of:

Cost of revenue:

Subscription and support	\$ 3,568	\$ 3,598	\$ 2,792
Professional services and other	4,138	3,802	2,497
	\$ 7,706	\$ 7,400	\$ 5,289

2011 compared to 2010

Revenue for the year ended December 31, 2011 increased \$43.2 million, or 22%, compared to the same period in 2010.

Subscription and support revenue: Subscription and support revenue for the year ended December 31, 2011 increased \$35.6 million, or 22%, compared to the same period in 2010. The increase was primarily the result of a \$32.4 million increase in revenue resulting from the acquisition of new customers including the continued adoption of OneWorld, and a \$3.2 million increase in revenue from existing customers. Additionally, subscriptions and support revenue increased during the year due to an increase in customer usage and an increase in the average selling price on deals for new customers.

Professional services and other revenue: Professional services and other revenue for the year ended December 31, 2011 increased \$7.6 million, or 26%, compared to the same period in 2010. The increase was primarily the result of a \$25.2 million increase in revenue resulting from the acquisition of new customers. The increase in professional services and other revenue was partially offset by a \$17.6 million decrease in revenue from existing customers related to services purchased in connection with the initial implementation of our product in 2010 that did not recur for those customers in 2011. Additionally, our customer demand and consulting rates for professional services also increased in 2011.

Revenue generated outside of the United States was \$63.8 million, or 27%, of our revenue during the year ended December 31, 2011, as compared to \$49.5 million, or 26%, during the same period in 2010. Revenue generated

outside the United States increased primarily due to our increased international sales efforts particularly in Australia. Cost of revenue for the year ended December 31, 2011 increased \$9.2 million, or 15%, compared to the same period in 2010.

Subscription and support cost of revenue: Subscription and support cost of revenue for the year ended December 31, 2011 increased \$6.2 million, or 23%, compared to the same period in 2010. The increase was primarily the result of a \$3.0 million increase in personnel costs which resulted from an increase in headcount and wages, a \$1.8 million increase in data center expenses resulting from enhancements to our product delivery infrastructure, a \$1.2 million increase in depreciation

expense associated with new equipment and a \$664,000 increase in overhead expenses partially offset by a \$567,000 decrease in amortization of intangibles. The increase in personnel costs includes a \$510,000 increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees.

Professional services and other cost of revenue: Professional services and other cost of revenue for the year ended December 31, 2011 increased \$3.0 million, or 9%, compared to the same period in 2010. The increase was primarily the result of a \$1.9 million increase in personnel costs which resulted from an increase in wages and other personnel costs and a \$1.4 million increase in external consultants costs which resulted from an increase in customer demand for our professional services. These cost increases were partially offset by a \$300,000 net decrease in other expenses. The increase in personnel costs includes a \$336,000 increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees. For the years ended December 31, 2011 and 2010, our professional services and other costs of revenue was greater than the professional services and other revenue. We view professional services as an investment in customer success to ensure that we continue to secure recurring subscription and support revenue.

Our gross margin was 70% during the year ended December 31, 2011 and 68% for the same period in 2010. The increase in our gross margin resulted primarily from an increase in demand for our professional services which were more profitable in 2011 compared to 2010 as a result of higher consulting rates. 2010 compared to 2009

Revenue for the year ended December 31, 2010 increased \$26.6 million, or 16%, compared to the same period in 2009.

Subscription and support revenue: Subscription and support revenue for the year ended December 31, 2010 increased \$24.8 million, or 18%, compared to the same period in 2009. The increase was primarily the result of a \$17.3 million increase in revenue resulting from the acquisition of new customers including the continued adoption of OneWorld, and a \$7.5 million increase in revenue from existing customers.

Subscription and support revenue for the year ended December 31, 2010 includes a \$972,000 increase in revenue from adoption of ASU 2009-13.

Professional services and other revenue: Professional services and other revenue for the year ended December 31, 2010 increased \$1.8 million, or 6%, compared to the same period in 2009. The increase was primarily the result of a \$10.7 million increase in revenue resulting from the acquisition of new customers. The increase in professional services and other revenue was partially offset by a \$7.9 million decrease in revenue from existing customers related to services purchased in connection with the initial implementation of our product in 2009 that did not recur for those customers in 2010 and a \$1.1 million decrease in revenue from one of our expired Japanese distribution rights agreements. The changes described above include a \$2.6 million increase in revenue from adoption of ASU 2009-13 and a \$516,000 increase in revenue from single element arrangements as a result of recognizing revenues on a percentage-of-completion basis instead of when fully delivered.

Revenue generated outside of the United States was \$49.5 million, or 26%, of our revenue during the year ended December 31, 2010, as compared to \$40.5 million, or 24%, during the same period in 2009.

Cost of revenue for the year ended December 31, 2010 increased \$5.5 million, or 10%, compared to the same period in 2009.

Subscription and support cost of revenue: Subscription and support cost of revenue for the year ended December 31, 2010 increased \$2.3 million, or 10%, compared to the same period in 2009. The increase was primarily the result of a \$1.1 million increase in data center expenses resulting from an increase in capacity, a \$683,000 increase in depreciation expense, and a \$467,000 increase in amortization of intangibles.

Professional services and other cost of revenue: Professional services and other cost of revenue for the year ended December 31, 2010 increased \$3.2 million, or 10%, compared to the same period in 2009. The increase was primarily the result of a \$4.3 million increase in personnel costs partially offset by a decrease of a \$1.1 million in external consultants and overhead allocation. The increase in personnel costs includes a \$1.4 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees. For the years ended December 31, 2010 and 2009 our professional services and other cost of revenue was greater than the professional

services and other revenue. We view professional services as an investment in customer success to ensure that we continue to get recurring subscription and support revenue.

Our gross margin was 68% during the year ended December 31, 2010 and 66% for the same period in 2009. The increase in revenue associated with the adoption of ASU 2009-13 impacted our margins positively in 2010 as our revenue increased without a corresponding increase in our cost of revenue since our cost of revenue is recognized as incurred and would have been the same without the increase in revenue. The increase in revenue was partially offset by an increase in personnel costs, an increase in infrastructure cost associated with our new data center and the effect of foreign exchange rates moving unfavorably against the United States dollar.

Operating Expenses

Operating expenses were as follows for the periods presented:

	Year ended December 31, 2011		2010		2009			
	Amount	% of revenue	Amount	% of revenue	Amount	% of revenue		
(dollars in thousands)								
Operating expenses (1):								
Product development	\$43,531	18 %	\$35,019	18 %	\$28,577	17 %		
Sales and marketing	120,172	51 %	92,814	48 %	76,165	46 %		
General and administrative	31,951	14 %	29,232	15 %	29,215	18 %		
Total operating expenses	\$195,654	83 %	\$157,065	81 %	\$133,957	80 %		

- (1) Includes stock-based compensation expense, amortization of acquisition-related intangible assets, transaction costs for business combinations and costs associated with the settlement of a patent dispute as follows:

	Year ended December 31, 2011		2010		2009	
	(dollars in thousands)					
Product development	\$12,015		\$9,723		\$6,641	
Sales and marketing	13,437		10,249		7,078	
General and administrative	9,662		8,565		7,677	
Total	\$35,114		\$28,537		\$21,396	

2011 compared to 2010

Product development expenses: Product development expenses for the year ended December 31, 2011 increased \$8.5 million, or 24%, as compared to the same period in 2010. The increase was primarily the result of a \$9.0 million increase in personnel costs and a \$1.1 million increase in overhead allocations and other costs, partially offset by a \$1.5 million decrease in outside professional services and an increase in the capitalization of internal software development costs during the year. The increase in personnel costs includes a \$2.3 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees. Personnel costs also increased during 2011 due to an increase in headcount and wages.

Sales and marketing expenses: Sales and marketing expenses for the year ended December 31, 2011 increased \$27.4 million, or 29%, as compared to the same period in 2010. The increase was primarily the result of a \$24.5 million increase in personnel costs, a \$2.2 million increase in overhead costs allocations and a \$704,000 increase in marketing and other costs. The increase in personnel costs related primarily to an increase in headcount, commission expenses related to an increase in sales and a \$3.5 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees.

General and administrative expenses: General and administrative expenses for the year ended December 31, 2011 increased \$2.7 million, or 9%, when compared to the same period in 2010. The increases resulted primarily from a \$2.4 million increase in personnel costs resulting from an increase in wages and other payroll related costs and \$720,000 in costs associated with the settlement of a patent dispute. (See Note 7. in Notes to our Consolidated Financial Statements) The increase in personnel costs includes a \$400,000 increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees.

2010 compared to 2009

Product development expenses: Product development expenses for the year ended December 31, 2010 increased \$6.4 million, or 23%, as compared to the same period in 2009. The increase was primarily the result of a \$5.5 million increase in personnel costs and a \$911,000 increase in outside professional services and overhead allocation. The increase in personnel costs includes a \$3.2 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees.

Sales and marketing expenses: Sales and marketing expenses for the year ended December 31, 2010 increased \$16.6 million, or 22%, as compared to the same period in 2009. The increase was primarily the result of an \$11.1 million increase in personnel costs, a \$3.9 million increase in marketing expenses, a \$1.0 million increase in outside professional services and overhead allocation and a \$527,000 increase in amortization of intangibles. The increase in personnel costs related primarily to increases in payroll, commission expenses and a \$2.7 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees.

General and administrative expenses: General and administrative expenses for the year ended December 31, 2010 slightly increased when compared to the same period in 2009. The increases resulted primarily from a \$4.1 million increase in personnel costs. The increase in personnel costs includes a \$2.9 million increase in stock-based compensation resulting from the issuance of equity awards to both existing and new employees. These increases were offset by a \$2.0 million decrease in acquisition related costs, a \$1.1 million decrease in bad debt expense, and a \$1.0 million decrease in outside professional services and overhead allocation.

Non-operating items, including interest income and expense, other income / (expense), income taxes and the effect of net loss attributable to noncontrolling interest were as follows for the periods presented:

	Year ended December 31,				2009			
	2011	2010	2011	2010	2009	2009	2009	2009
	Amount	% of revenue	Amount	% of revenue	Amount	% of revenue	Amount	% of revenue
	(dollars in thousands)							
Interest income	167	—	% 209	—	% 565	—	%	
Interest expense	(181)) —	% (129)) —	% (190)) —	%

2011 compared to 2010

Net other expense for the year ended December 31, 2011 decreased \$581,000 as compared to the same period in 2010. The decrease in net other expense is primarily related to a write-off of a loan for a principal amount of \$250,000 to a partner in 2010 and foreign currency gains during 2011.

Our provision for income taxes increased \$391,000 during the year ended December 31, 2011 as compared to the same period in 2010 primarily due to foreign income tax.

2010 compared to 2009

Interest income for the year ended December 31, 2010 decreased \$356,000 as compared to the same period in 2009. The decrease is primarily related to a decrease on interest rates paid on cash equivalents invested in money market mutual funds.

Net other expense for the year ended December 31, 2010 increased \$290,000 as compared to the same period in 2009. The increase in net other expense is primarily related to a write-off of a loan for a principal amount of \$250,000 to a partner.

Noncontrolling interest for the year ended December 31, 2010 decreased \$794,000 as compared to the same period in 2009. The decrease is primarily related to the repurchase of NetSuite KK equity stake.

Our provision for income taxes increased \$740,000 during the year ended December 31, 2010 as compared to the same period in 2009 due to the increasing profitability in certain foreign jurisdictions and reserves for certain foreign tax matters. Our provision for income tax is primarily related to our international entities. We expect our net operating loss carryforwards to offset any domestic earnings for the foreseeable future.

Quarterly Results of Operations

The following tables set forth our unaudited quarterly condensed consolidated statements of operations data for each of the eight quarters ended December 31, 2011. The data has been prepared on the same basis as the audited consolidated financial statements and related notes included in this Annual Report on Form 10-K and you should read the following tables in conjunction with such financial statements. The table includes all necessary adjustments, consisting only of normal recurring adjustments that we consider necessary for a fair presentation of this data. The results of historical periods are not necessarily indicative of future results.

Liquidity and Capital Resources

As of December 31, 2011, our primary sources of liquidity were our cash and cash equivalents totaling \$141.4 million and \$39.1 million in accounts receivable, net of allowance.

In the year ended December 31, 2011, cash flows from operations generated \$36.3 million of cash. Although we have had positive operating cash flows for eleven consecutive quarters ended December 31, 2011, the possibility remains that we could return to a position of negative operating cash outflows in a future period. Despite the possibility of such fluctuations in operating cash outflows, management believes its current cash and cash equivalents are sufficient for the next 12 months and into the foreseeable future thereafter to meet our operating cash flow needs.

We intend to use our cash for general corporate purposes, including potential future acquisitions or other transactions. Further, we expect to incur additional expenses in connection with our international expansion. We believe that our cash and cash equivalents are adequate to fund those anticipated activities.

While we believe that our uncommitted current working capital and anticipated cash flows from operations will be adequate to meet our cash needs for daily operations and capital expenditures for at least the next 12 months, we may elect to raise additional capital through the sale of additional equity or debt securities, obtain a credit facility or sell certain assets. If additional funds are raised through the issuance of additional debt securities, these securities could have rights, preferences and privileges senior to holders of common stock, and terms of any debt could impose restrictions on our operations. The sale of additional equity or convertible debt securities could result in additional dilution to our stockholders and additional financing may not be available in amounts or on terms acceptable to us. As we believe that our cash and cash equivalents are adequate to fund our operating and investing cash flow needs for at least the next 12 months, we have not found it necessary to reassess our capacity to generate cash from financing cash flows in the current economic climate. If additional financing becomes necessary and we are unable to obtain the additional funds, we may be required to reduce the scope of our planned product development and marketing efforts, potentially harming our business, financial condition and operating results. In the meantime, we intend to continue to manage our cash in a manner designed to ensure that we have adequate cash and cash equivalents to fund our operations as well as future acquisitions, if any.

Restricted cash consisting of letters of credit for our facility lease agreements is included in long-term other assets which totaled \$494,000 and \$508,000 at December 31, 2011 and 2010, respectively.

As of December 31, 2011, we had an accumulated deficit of \$343.5 million. We have funded this deficit primarily through the net proceeds raised from the sale of our capital stock.

Our cash flow activities were as follows for the periods presented:

	Year ended December 31,		
	2011	2010	2009
	(in thousands)		
Net cash provided by operating activities	\$36,273	\$18,232	\$4,746
Net cash used in investing activities	(11,252)) (6,463) (28,715
Net cash provided by / (used in) financing activities	12,175	(3,888) (3,223
Effect of exchange rate changes on cash and cash equivalents	(46) 62	(91
Net change in cash and cash equivalents	\$37,150	\$7,943	\$(27,283

2011 compared to 2010

Cash provided by operating activities was driven by sales of our application suite and costs incurred to deliver that service. The timing of our billings and collections relating to our sales and the timing of the payment of our liabilities have a significant impact on our cash flows. Cash flows from operations increased during the year ended December 31, 2011 as compared to the same period in 2010 primarily as a result of an increase in deferred revenue resulting from an increase in billings associated with the increase in bookings. This increase was offset by the increase in deferred commission resulting from an the increase in sales activity.

Cash used in investing activities during the year ended December 31, 2011 was related to capital expenditures for property and equipment, consisting of the purchase of software licenses, computer equipment, leasehold improvements and furniture and fixtures as we develop and enhance our infrastructure. Cash used in investing activities during the year ended December 31, 2011 increased primarily due to the acquisition of a small on-demand software company and developed product technology related to an on-line property, plant and equipment solution. We also increased our capital expenditures for property and equipment and capitalized costs for internal use software. The net cash provided by financing activities during the year ended December 31, 2011 increased primarily due an increase in proceeds from the issuance of common stock as a result of the exercise of stock options. During the year ended December 31, 2010, financing activities included a payment for the purchase of the remaining ownership equity in NetSuite KK, payments to acquire shares upon vesting of RSUs to settle employee withholding liability and payments on capital leases.

2010 compared to 2009

Cash provided by operating activities was driven by sales of our application suite and costs incurred to deliver that service. The timing of our billings and collections relating to our sales and the timing of the payment of our liabilities have a significant impact on our cash flows. Cash flows from operations increased during the year ended December 31, 2010 as compared to the same period in 2009 primarily as a result of an increase in revenue and deferred revenue. Cash used in investing activities during the year ended December 31, 2010 was primarily related to capital expenditures for property and equipment, consisting of the purchase of software licenses, computer equipment, leasehold improvements and furniture and fixtures as we expanded our infrastructure. Cash used in investing activities decreased significantly during the year ended December 31, 2010 compared to the same period in the prior year due to a reduction in business acquisition activity.

Cash used in financing activities for the year ended December 31, 2010 was primarily related to payments to settle employee tax withholding liabilities in connection with the vesting of restricted stock, payments on capital leases and purchase of noncontrolling interests partially offset by the proceeds from the issuance of common stock from the exercise of stock options. During the year ended December 31, 2010, financing activities included a \$1.4 million payment for the purchase of the remaining ownership equity in NetSuite KK.

Contractual Obligations

We generally do not enter into long-term minimum purchase commitments. Our principal commitments consist of obligations under capital leases for equipment, notes payable used for purchase of equipment, operating leases primarily for office space, and other purchase obligations consisting of maintenance support contracts on leased or

owned equipment and other general purchase obligations. The following table summarizes our commitments to settle contractual obligations in cash as of December 31, 2011, for the next five years and thereafter.

	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 Years
	(dollars in thousands)				
Capital lease obligations	\$1,771	\$761	\$1,010	\$—	\$—
Debt obligations	4,227	2,211	2,016	—	—
Total accrued contractual obligations	5,998	2,972	3,026	—	—
Operating lease obligations	35,413	6,710	10,318	7,874	10,511
Purchase obligations	15,506	7,781	7,725	—	—
Total off-balance sheet contractual obligations	50,919	14,491	18,043	\$7,874	\$10,511
Total contractual obligations	\$56,917	\$17,463	\$21,069	\$7,874	\$10,511

Off-Balance Sheet Arrangements

During the years ended December 31, 2011, 2010 and 2009, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off balance sheet arrangements or other contractually narrow or limited purposes.

Recent Accounting Pronouncements

See Note 2. in Notes to our Consolidated Financial Statements "Significant Accounting Policies".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Sensitivity

We had cash and cash equivalents of \$141.4 million at December 31, 2011. These amounts were held primarily in money market funds.

Cash and cash equivalents are held for working capital purposes, and restricted cash amounts are held as security against various lease obligations. Due to the short-term nature of these investments, we believe that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in interest rates. Declines in interest rates, however, will reduce future interest income.

Foreign Currency Risk

Our results of operations and cash flows are subject to fluctuations due to changes in foreign currency exchange rates, particularly changes in the British Pound Sterling, Canadian Dollar, Australian Dollar, Philippine Peso and the Czech Koruna. Our revenue is generally denominated in the local currency of the contracting party. The majority of our invoicing relates to sales occurring in the United States and therefore is denominated in U.S. dollars. We have an increasing percentage of sales denominated in foreign currencies including, but not limited to, the local currencies of Australia, the United Kingdom and Canada. Our expenses are incurred primarily in the United States, Canada, the Philippines, Australia and the United Kingdom, with a small portion of expenses incurred in other countries where our international sales and operations offices are located. Our results of operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates. During the year ended December 31, 2011, the U.S. dollar decreased against the foreign currencies that our invoicing and operational expenses are denominated in by approximately 5% when compared to the same period in the prior year. For the year ended December 31, 2011, the fluctuation in foreign currency rates positively affected our income by approximately \$277,000. Even though the U.S. dollar declined against foreign currencies during 2011 compared to the same period in the prior year, the effect on our income was positive because year 2011 revenue denominated in foreign currencies exceeded expenses denominated in foreign currencies resulting in a net gain related to the changes in the foreign currency rate.

During the year ended December 31, 2011, we continued a hedging program initiated in 2008 to limit the exposure of foreign currency risk resulting from the revaluation of foreign denominated assets and liabilities through the use of forward exchange contracts. See "Balance Sheet Hedging - Hedging of Foreign Currency Assets and Liabilities" in Note

6 under the heading “Notes to the Consolidated Financial Statements” of Part 1, Item 1, “Financial Statements” herein for further disclosures.

Fair Value of Financial Instruments

We do not have a material exposure to market risk with respect to investments, as our investments consist primarily of money market funds that invest primarily in highly liquid investments with maturities of two months or less. We do not use derivative financial instruments for speculative or trading purposes. However, this does not preclude our adoption of specific hedging strategies in the future.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

NetSuite, Inc.:

We have audited the accompanying consolidated balance sheets of NetSuite Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of operations, total equity, and cash flows for each of the years in the three-year period ended December 31, 2011. In connection with our audits of the consolidated financial statements, we have also audited financial statement Schedule II, as set forth in Item 15(b). We also have audited NetSuite Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). NetSuite Inc.'s management is responsible for these consolidated financial statements and financial statement schedule, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule and an opinion on NetSuite Inc.'s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of NetSuite Inc. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. Also in our opinion, NetSuite Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

As discussed in note 2 to the consolidated financial statements, NetSuite Inc. changed its method of accounting for revenue arrangements with multiple deliverables as of January 1, 2010 resulting from the adoption of a new accounting pronouncement.

NetSuite Inc.

Notes to Consolidated Financial Statements

Note 1. Organization

NetSuite Inc. ("the Company") is the industry's leading provider of cloud-based financials/ERP software suites. In addition to financials/ERP software suites, NetSuite offers a broad suite of applications, including accounting, CRM, PSA and Ecommerce that enable companies to manage most of their core business operations in its single integrated suite. The Company's "real-time dashboard" technology provides an easy-to-use view into up-to-date, role-specific business information. The Company also offers customer support and professional services related to implementing and supporting its suite of applications. The Company delivers its suite over the Internet as a subscription service using the software-as-a-service ("SaaS") model. The Company's headquarters are located in San Mateo, California and conducts its business worldwide, with international locations in Canada, Europe, Asia, and Australia.

Note 2. Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its majority and wholly-owned subsidiaries. Intercompany balances and transactions have been eliminated.

As of December 31, 2011 and 2010, the Company owned 100% of NetSuite Kabushiki Kaisha ("NetSuite KK"), a Japanese corporation. In 2010, the Company purchased the remaining outstanding equity in NetSuite KK for aggregate consideration of \$1.4 million. Prior to the Company's purchase of the remaining outstanding equity of NetSuite KK, given the Company's majority ownership interest, the accounts of NetSuite KK were consolidated with the accounts of the Company, and a noncontrolling interest was recorded for the other investors' interests in the net assets and operations of NetSuite KK to the extent of the noncontrolling investors' individual investments.

Recent Accounting Standards

In September 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update, Testing Goodwill for Impairment (the revised standard). The revised standard is intended to reduce the cost and complexity of the annual goodwill impairment test by providing entities an option to perform a "qualitative" assessment to determine whether further impairment testing is necessary. The revised standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted provided that the entity has not yet performed its 2011 annual impairment test or issued its financial statements. An entity has the option to first assess qualitative factors to determine whether it is necessary to perform the current two-step test. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. The Company plans to adopt this update in the first quarter of fiscal year 2012. The Company does not expect the adoption of this update to have an impact on its consolidated results of operations and financial condition.

In June 2011, the FASB issued Accounting Standards Update, Presentation of Comprehensive Income. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. Instead, an entity will be required to present either a continuous statement of net income and other comprehensive income or two separate but consecutive statements and will result in presentation changes for our consolidated financial statements. The updated guidance is effective on a retrospective basis for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. Early adoption is permitted. The Company plans to adopt this update in the first quarter of fiscal year 2012. The Company does not anticipate adoption to have a material impact on its consolidated financial statements.

In December 2010, the FASB issued Accounting Standards Update, Disclosure of Supplementary Pro Forma Information for Business Combinations (Topic 805) - Business Combinations, to improve consistency in how the pro forma disclosures are calculated. Additionally, the update enhances the disclosure requirements and requires description of the nature and amount of any material, nonrecurring pro forma adjustments directly attributable to a business combination. The guidance is effective for the Company in the first quarter of fiscal 2012 and should be applied prospectively to business combinations for which the acquisition date is after the effective date. Early adoption is permitted. The Company plans to adopt this update in the first quarter of fiscal year 2012. The Company does not anticipate adoption to have a material impact on its consolidated financial statements.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NetSuite Inc.

Notes to Consolidated Financial Statements

Segments

The Company's chief operating decision maker is its Chief Executive Officer ("CEO"), who reviews financial information presented on a consolidated basis, accompanied by information about revenue by geographic region. Accordingly, the Company has determined that it has a single reportable segment, specifically, the provision of cloud-based business management application suites.

Revenue Recognition

The Company generates revenue from two sources: (1) subscription and support; and (2) professional services and other. Subscription and support revenue includes subscription fees from customers accessing its cloud-based application suite and support fees from customers purchasing support. Arrangements with customers do not provide the customer with the right to take possession of the software supporting the cloud-based application service at any time. Professional services and other revenue include fees from consultation services to support the business process mapping, configuration, data migration, integration and training. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue or revenue, depending on whether the revenue recognition criteria have been met.

For the most part, subscription and support agreements are entered into for 12 months. In aggregate, more than 90% of the professional services component of the arrangements with customers is performed within 300 days of entering into a contract with the customer.

The subscription agreements provide service level commitments of 99.5% uptime per period, excluding scheduled maintenance. The failure to meet this level of service availability may require the Company to credit qualifying customers up to the value of an entire month of their subscription and support fees. In light of the Company's historical experience with meeting its service level commitments, the Company does not currently have any liabilities on its balance sheet for these commitments.

The Company commences revenue recognition when all of the following conditions are met:

- There is persuasive evidence of an arrangement;
- The service is being provided to the customer;
- The collection of the fees is reasonably assured; and
- The amount of fees to be paid by the customer is fixed or determinable.

In most instances, revenue from new customer acquisition is generated under sales agreements with multiple elements, comprised of subscription and support fees from customers accessing its cloud-based application suite and professional services associated with consultation services. The Company evaluates each element in a multiple-element arrangement to determine whether it represents a separate unit of accounting. An element constitutes a separate unit of accounting when the delivered item has standalone value and delivery of the undelivered element is probable and within the Company's control. Subscription and support have standalone value because they are routinely sold separately by the Company. Professional services have standalone value because the Company has sold professional services separately and there are several third party vendors that routinely provide similar professional services to its customers on a standalone basis.

In October 2009, the FASB amended the accounting standards for multiple-element revenue arrangements ("ASU 2009-13") to:

- provide updated guidance on whether multiple deliverables exist, how the elements in an arrangement should be separated, and how the consideration should be allocated;

- require an entity to allocate revenue in an arrangement using estimated selling prices (“ESP”) of each element if a vendor does not have vendor-specific objective evidence of selling price (“VSOE”) or third-party evidence of selling price (“TPE”); and
- eliminate the use of the residual method and require a vendor to allocate revenue using the relative selling price method.

The Company early adopted this accounting guidance on April 1, 2010, for applicable arrangements entered into or materially modified after January 1, 2010 (the beginning of the Company’s fiscal year).

Prior to the adoption of ASU 2009-13, the Company was not able to establish VSOE or TPE for any of the undelivered elements. As a result, the Company typically recognized subscription and support, and professional services revenue ratably over the contract period, and allocated subscription and support revenue and professional services revenue based on the contract price.

NetSuite Inc.
Notes to Consolidated Financial Statements

As a result of the adoption of ASU 2009-13, the Company allocates revenue to each element in an arrangement based on a selling price hierarchy. The selling price for a deliverable is based on its VSOE, if available, TPE, if VSOE is not available, or ESP, if neither VSOE nor TPE is available. As the Company has been unable to establish VSOE or TPE for the elements of its arrangements, the Company establishes the ESP for each element primarily by considering the weighted average of actual sales prices of professional services sold on a standalone basis and subscription and support including various add-on modules when sold together without professional services, and other factors such as gross margin objectives, pricing practices and growth strategy. The consideration allocated to subscription and support is recognized as revenue over the contract period. The consideration allocated to professional services is recognized as revenue on a percentage-of-completion method. The Company has established processes to determine ESP, allocate revenue in multiple arrangements using ESP, and make reasonably dependable estimates of the percentage-of-completion method for professional services.

The total arrangement fee for a multiple element arrangement is allocated based on the relative ESP of each element unless the fee allocated to the subscription and support under this method is less than the fee subject to refund if the performance conditions are not met. In these instances, since the professional services are generally completed prior to completion of the subscription and support, the allocation of the fee for subscription and support is at least equal to the contractual amounts subject to the performance conditions.

Prior to adoption of ASU 2009-13, in multiple element arrangements where the Company determined that a subset of professional services was essential to the customers use of the subscription services (“Essential Professional Services Arrangements”), the Company deferred the commencement of revenue recognition for the entire arrangement until it had delivered the essential professional services component or made a determination that the remaining professional services were no longer essential to the customer. With the adoption of ASU 2009-13, the Company recognizes revenue for subscription and support services in such an arrangement over the contract period commencing when the subscription service is made available to the customer and for professional services on a percentage-of-completion method.

For single element sales agreements, subscription and support revenue is recognized ratably over the contract term beginning on the provisioning date of the contract. Prior to April 1, 2010, professional services revenue generated under single element sales agreements was immaterial and therefore was recognized when fully delivered. As of April 1, 2010, the date of adoption of ASU 2009-13, the Company recognizes professional services revenue based on percentage-of-completion method for both single and multiple element arrangements since the Company can now separate the professional services revenue from subscription and support revenue.

Sales and other taxes collected from customers to be remitted to government authorities are excluded from revenues.

Deferred Revenue

Deferred revenue consists of billings or payments received in advance of revenue recognition and is recognized as the revenue recognition criteria are met. The Company generally invoices its customers annually or in monthly or quarterly installments. Accordingly, the deferred revenue balance does not represent the total contract value of annual or multi-year, non-cancelable subscription agreements. Deferred revenue that will be recognized during the succeeding 12 month period is recorded as current deferred revenue, and the remaining portion is recorded as non-current deferred revenue.

Cost of Revenue

Cost of revenue primarily consists of costs related to hosting the Company's cloud-based application suite, providing customer support, data communications expenses, salaries and benefits of operations and support personnel, software license fees, costs associated with website development activities, allocated overhead, amortization expense associated with capitalized internal use software and intangible assets and property and equipment depreciation.

Deferred Commissions

The Company capitalizes commission costs that are incremental and directly related to the acquisition of customer contracts. Commission costs are accrued and capitalized upon execution of the sales contract by the customer. Payments to partners and sales personnel are made shortly after the receipt of the related customer payment. Deferred commissions are amortized over the term of the related non-cancelable customer contract and are recoverable through the related future revenue streams. The Company capitalized commission costs of \$44.4 million, \$27.6 million and \$19.7 million during the years ended December 31, 2011, 2010 and 2009, respectively. Commission amortization expense was \$34.7 million, \$23.5 million and \$19.9 million during the years ended December 31, 2011, 2010 and 2009, respectively.

Internal Use Software and Website Development Costs

The Company capitalizes certain development costs incurred in connection with its internal use software and website. These capitalized costs are primarily related to the integrated business management application suite that is hosted by the Company and accessed by its customers on a subscription basis. Costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental, are capitalized until the software is substantially complete and ready for its intended use. Capitalization ceases upon completion of all substantial testing. The Company also capitalizes costs related to specific upgrades and enhancements when it is probable the expenditures will result in additional functionality. Capitalized costs are recorded as part of property and equipment. Maintenance and training costs are expensed as incurred. Internal use software is amortized on a straight line basis over its estimated useful life, generally three years. Management evaluates the useful lives of these assets on an annual

NetSuite Inc.

Notes to Consolidated Financial Statements

basis and tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets. There were no impairments to internal software during the years ended December 31, 2011, 2010 and 2009. The Company capitalized \$1.3 million, \$96,000 and \$287,000 in internal use software during the years ended December 31, 2011, 2010 and 2009, respectively. Included in the 2011 capitalized development costs is \$448,000 in stock-based compensation costs. Capitalized stock-based compensation costs in 2010 and 2009 were negligible. Amortization expense totaled \$302,000, \$221,000 and \$260,000 during the years ended December 31, 2011, 2010 and 2009, respectively. The net book value of capitalized internal use software at December 31, 2011 and 2010 was \$1.3 million and \$372,000, respectively.

Income Taxes

The Company accounts for income taxes under the asset and liability approach. Deferred income taxes reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and amounts recognized for income tax reporting purposes, net operating loss carryforwards and other tax credits measured by applying currently enacted tax laws. Valuation allowances are provided when necessary to reduce deferred tax assets to an amount that is more likely than not to be realized.

Compliance with income tax regulations requires the Company to make decisions relating to the transfer pricing of revenue and expenses between each of its legal entities that are located in several countries. The Company's determinations include many decisions based on management's knowledge of the underlying assets of the business, the legal ownership of these assets, and the ultimate transactions conducted with customers and other third parties. The calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in multiple tax jurisdictions. The Company may be periodically reviewed by domestic and foreign tax authorities regarding the amount of taxes due. These reviews may include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. In evaluating the exposure associated with various filing positions, the Company records estimated reserves when it is more likely than not that an uncertain tax position will not be sustained upon examination by a taxing authority. Such estimates are subject to change. See Note 16 for information regarding the impact of the Company's accounting for uncertainty in income taxes.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with a remaining maturity of three months or less to be cash equivalents. Cash equivalents are comprised of investments in money market mutual funds. Cash and cash equivalents are recorded at cost, which approximates fair value.

Goodwill and Other Intangible Assets

The Company records goodwill when consideration paid in a purchase acquisition exceeds the fair value of the net tangible assets and the identified intangible assets acquired. Goodwill is not amortized, but rather is tested for impairment annually or more frequently if facts and circumstances warrant a review. The Company has determined that there is a single reporting unit for the purpose of goodwill impairment tests. For purposes of assessing the impairment of goodwill, the Company annually estimates the fair value of the reporting unit and compared this amount to the carrying value of the reporting unit. If the Company determines that the carrying value of the reporting unit exceeds its fair value, an impairment charge would be required. During the fourth quarter of fiscal 2011, the Company completed its annual impairment test of goodwill. Based upon that evaluation the Company determined that its goodwill was not impaired at December 31, 2011.

Other intangible assets, consisting of developed technology, tradename and customer relationships, are stated at cost less accumulated amortization. All other intangible assets have been determined to have definite lives and are amortized on a straight-line basis over their estimated remaining economic lives, ranging from one to seven years. Amortization expense related to developed technology is included in cost of subscription and support revenue while amortization expense related to tradenames and customer relationships is included in sales and marketing expense.

Long-lived Assets

The Company continually monitors events and changes in circumstances that could indicate that carrying amounts of its long-lived assets, including property and equipment and intangible assets may not be recoverable. When such events or changes in circumstances occur, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through their undiscounted expected future cash flow. If the future undiscounted cash flow is less than the carrying amount of these assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets. The Company did not recognize any impairment charges on its long-lived assets during the years ended December 31, 2011, 2010 and 2009.

Leases

The Company leases worldwide facilities and certain other equipment under non-cancelable lease agreements. The terms of certain lease agreements provide for rental payments on a graduated basis. The Company recognizes rent expense on a straight line basis over the lease period and accrues for rent expense incurred but not paid.

Under certain leases, the Company also receives reimbursements for leasehold improvements. These reimbursements are lease incentives which are recognized as a liability and are amortized on a straight line basis over the term of the lease as a component of minimum rental expense. The leasehold improvements are included in property, plant and equipment and are amortized over the shorter of the estimated useful life of the improvements or the lease term.

NetSuite Inc.

Notes to Consolidated Financial Statements

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed on a straight-line basis over the estimated asset lives. The estimated useful lives by asset classification are generally as follows:

Asset classification	Estimated useful life in years
Office equipment	3
Furniture and fixtures	5
Computers	3
Software, perpetual license	3 to 7
Software, license with stated term	Term of the license

Amortization of leasehold improvements is computed on a straight-line basis over the shorter of the lease term or the estimated useful lives of the assets.

Upon retirement or disposition of property and equipment, the cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is recognized in other income.

Warranties and Indemnification

The Company's cloud-based application service is typically warranted to perform in a manner consistent with general industry standards that are reasonably applicable and materially in accordance with the Company's on-line help documentation under normal use and circumstances.

The Company includes service level commitments to its customers warranting certain levels of uptime reliability and performance and permitting those customers to receive credits in the event that the Company fails to meet those levels. To date, the Company has not incurred any material costs as a result of such commitments and has not accrued any liabilities related to such obligations in the accompanying consolidated financial statements.

The Company has also agreed to indemnify its directors and executive officers for costs associated with any fees, expenses, judgments, fines and settlement amounts incurred by any of these persons in any action or proceeding to which any of those persons is, or is threatened to be, made a party by reason of the person's service as a director or officer, including any action by the Company, arising out of that person's services as the Company's director or officer or that person's services provided to any other company or enterprise at the Company's request. The Company maintains director and officer insurance coverage that may enable the Company to recover a portion of any future amounts paid.

The Company's arrangements include provisions indemnifying customers against liabilities if our products infringe a third-party's intellectual property rights. The Company has not incurred any costs as a result of such indemnifications and has not accrued any liabilities related to such obligations in the accompanying consolidated financial statements.

Concentration of Credit Risk and Significant Customers and Suppliers

Financial instruments potentially exposing the Company to concentration of credit risk consist primarily of cash and cash equivalents, restricted cash and trade accounts receivable. The Company maintains an allowance for doubtful accounts receivables balance. The allowance is based upon historical loss patterns, the number of days that billings are past due and an evaluation of the potential risk of loss associated with problem accounts. The Company generally charges off uncollectible accounts receivable balances when accounts are 120 days past-due based on the account's contractual terms. Credit risk arising from accounts receivable is mitigated due to the large number of customers comprising the Company's customer base and their dispersion across various industries. At December 31, 2011 and 2010, there were no customers that represented more than 10% of the net accounts receivable balance. There were no customers that individually exceeded 10% of the Company's revenue in any of the periods presented. At December 31, 2011 and 2010, long-lived assets located outside the United States were not significant.

NetSuite Inc.

Notes to Consolidated Financial Statements

Revenue by geographic region, based on the billing address of the customer, was as follows for the periods presented:

	Year ended December 31,		
	2011	2010	2009
	(dollars in thousands)		
United States	\$ 172,527	\$ 143,607	\$ 126,049
International	63,799	49,542	40,491
Total revenue	\$ 236,326	\$ 193,149	\$ 166,540

Percentage of revenue generated outside of the United States	27	% 26	% 24	%
--	----	------	------	---

No single country outside the United States represented more than 10% of revenue during the years ended December 31, 2011, 2010 or 2009.

Certain Significant Risks and Uncertainties

The Company participates in a dynamic high technology industry and believes that changes in any of the following areas could have a material adverse effect on the Company's future financial position, results of operations or cash flows; advances and trends in new technologies and industry standards; pressures resulting from new applications offered by competitors; changes in certain strategic relationships or customer relationships; litigation or claims against the Company based on intellectual property, patent, product, regulatory or other factors; risk associated with changes in domestic and international economic or political conditions or regulations; availability of necessary product components; and the Company's ability to attract and retain employees necessary to support its growth.

Foreign Currency Translation

The U.S. dollar is the reporting currency for all periods presented. The financial information for entities outside the United States is measured in their functional currency which, depending on circumstances, may either be the local currency or the U.S. dollar. The Company translates its financial statements of consolidated entities whose functional currency is not the U.S. dollar into U.S. dollars. The Company translates its assets and liabilities at the exchange rate in effect as of the financial statement date and translates statement of operations accounts using the average exchange rate for the period. Exchange rate differences resulting from translation adjustments are accounted for as a component of accumulated other comprehensive income. Gains or losses, whether realized or unrealized, due to transactions in foreign currencies are reflected in the consolidated statements of operations under the line item other income / (expense). The Company recognized net foreign currency losses of \$102,000, \$371,000 and \$312,000 during the years ended December 31, 2011, 2010 and 2009, respectively.

Advertising Expense

Advertising costs are expensed as incurred. For the years ended December 31, 2011, 2010 and 2009, advertising expense was \$3.5 million, \$3.2 million and \$1.9 million, respectively.

Stock-Based Compensation

The Company uses the fair value method for recording stock-based compensation for new awards granted, modified, repurchased or cancelled. The Company recognizes compensation costs for stock option grants, restricted awards and restricted stock unit awards on a straight-line basis over the requisite service period for the entire awards. The Company recognizes compensation expense related to performance share awards based on the accelerated method which recognizes a larger portion of the expense during the beginning of the vesting period than in the end of the vesting period.

Under the 2007 Equity Incentive Plan (the "2007 Plan"), the Company has granted selected executives and other key employees performance share units ("PSUs"), which are restricted stock units ("RSUs"), whose vesting is contingent upon meeting certain company-wide performance goals and or market-based performance goals. Unforfeited PSUs generally will vest in three equal annual tranches over the service period. However, the 2011 PSU grants vest 1/12 per quarter with the initial vesting event on February 15, 2012. The fair value and the related stock-based compensation

expense of performance-based PSUs are determined based on the value of the underlying shares on the date of grant and recognized over the vesting term. Management estimates the probable number of PSUs that will be granted until the achievement of the performance goals is known by year end. The fair value of market-based PSUs on the date of grant (measurement date) is calculated using a Monte Carlo simulation model that estimates the distribution of the potential outcomes of the PSU grants based on simulated future stock prices of the peer group.

The Company accounts for compensation expense related to stock options granted to consultants and other non-employees based on the fair values estimated using the Black-Scholes model on the date of grant and re-measured at each reporting date over the performance period. The compensation expense is amortized using the straight-line method over the related service term.

NetSuite Inc.
Notes to Consolidated Financial Statements

The Company issues new shares of its common stock upon the exercise of stock options and the vesting of restricted stock, RSUs and PSUs.

Net Loss Per Common Share

Basic net loss per common share is computed by dividing net loss attributable to NetSuite Inc. common stockholders by the weighted-average number of common shares outstanding during the period less the weighted-average number of unvested common shares subject to the Company's right of repurchase. Diluted net loss per common share is computed by giving effect to all potentially dilutive common shares, including options, common stock subject to repurchase and warrants. Basic and diluted net loss per common share was the same for all periods presented as the impact of all potentially dilutive securities outstanding was anti-dilutive.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss is comprised of foreign currency translation gains and losses, net of tax, and an accumulated pension liability for employees located in the Philippines of \$130,000.

Note 3. Business Combination

On August 2, 2011, the Company completed the purchase of substantially all of the assets of a small private company ("SPC") that provides on-demand software. Accordingly, the assets and operating results of SPC are reflected in the Company's condensed consolidated financial statements from the date of acquisition. As consideration on the closing date, the Company paid \$1.1 million in cash and issued 38,102 shares of the Company's common stock valued at \$1.4 million on the closing date. Additional consideration of \$375,000 in cash is being withheld for a year following the close of the transaction as protection against certain losses the Company may incur in the event of certain breaches of representations and warranties covered in the purchase agreement. Third-party costs associated with this transaction were negligible. The Company will integrate SPC's technology into its product suite to enhance the functionality of its suite.

Under the acquisition method of accounting, the Company allocated the purchase price to the identifiable assets based on their estimated fair value at the date of acquisition. To determine the value of the intangible assets, the Company made various estimates and assumptions. Critical estimates in valuing the intangible assets include but are not limited to the expected costs to recreate the assets. The excess of the purchase price over the total identifiable assets has been recorded as goodwill.

The allocation of the SPC consideration to the assets acquired was as follows:

	(dollars in thousands)
Developed technology	\$2,513
Customer relationships	183
Unbilled receivables	47
Goodwill	157
Total purchase price	\$2,900
Cash	\$1,500
Fair value common stock issued	1,400
Total purchase price	\$2,900

The Company will amortize the developed technology and customer relationships intangible assets ratably on a straight-line basis over a four year term. The SPC's operating results are not material for pro forma disclosure.

Business Combinations - Acquisition of QuickArrow

On July 24, 2009, the Company acquired all of the outstanding share capital of QuickArrow Inc. ("QuickArrow"), for initial aggregate consideration of approximately \$19.4 million (the "QuickArrow Consideration") gross of acquired cash. Transaction costs of \$1.7 million were expensed as part of the acquisition and were included in general and administrative operating expenses. QuickArrow develops and markets cloud computing solutions for professional services businesses. This acquisition has advanced NetSuite's creation of a next-generation cloud computing application suite for services-based companies. As a result of the transaction, QuickArrow became a wholly-owned subsidiary of the Company. The results of QuickArrow's operations have been included in the consolidated financial statements since July 24, 2009, the date of the closing of the acquisition.

NetSuite Inc.
Notes to Consolidated Financial Statements

The Company has recorded goodwill in its consolidated financial statements in connection with the acquisition of QuickArrow. Goodwill represents the excess of the purchase price over the fair value of the underlying acquired net tangible and intangible assets. This amount represents buyer-specific value resulting from synergies that are not included in the fair values of assets that would not be available to another likely marketplace buyer. The factors that contributed to the recognition of goodwill in the acquisition of QuickArrow included increased revenues and profits resulting from the potential to cross-sell NetSuite's fully integrated application suite to QuickArrow's clients.

The allocation of the QuickArrow Consideration to the net assets acquired was as follows:

	(dollars in thousands)
Tangible assets:	
Cash and cash equivalents	\$ 710
Accounts receivable	932
Other current assets	143
Property and equipment	502
Total tangible assets	2,287
Goodwill	7,098
Intangible assets:	
Developed technology	3,324
Tradename	259
Customer relationships	7,492
Total goodwill and intangible assets	18,173
Liabilities assumed:	
Accounts payable and accrued liabilities	(1,012)
Total liabilities assumed	(1,012)
Net assets acquired	\$ 19,448

The estimated economic lives of intangible assets are four years for developed technology, seven years for customer relationships and one year for tradenames. During 2010, the Company completed its analysis of the net operating loss tax attributes assumed in the acquisition of QuickArrow Inc. in July 2009. This analysis resulted in an adjustment to the purchase price allocation due to the Company reversing an income tax accrual of \$503,000 with a corresponding reduction in goodwill. Additionally in 2010, goodwill was reduced by \$196,000 related to certain QuickArrow Inc. sales and use tax adjustments.

Pro forma financial statements for the Company reflecting the acquisition of QuickArrow have not been included as the amounts are not material to the consolidated financial results of the Company.

Note 4. Cash and Cash Equivalents

Cash equivalents are comprised of investments in money market mutual funds. Cash and cash equivalents are recorded at cost, which approximates fair value.

	December 31,	
	2011	2010
	(dollars in thousands)	
Cash	\$ 69,096	\$ 32,042
Money Market Mutual Funds	72,352	72,256
Total cash and cash equivalents	\$ 141,448	\$ 104,298

Restricted cash totaled \$494,000 and \$508,000 as of December 31, 2011 and December 31, 2010, respectively, and is included in long-term other assets. These restricted cash accounts secure letters of credit applied against certain of the

Company's facility lease agreements.

The Company maintains cash balances at several banks. Accounts located in the United States are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. Certain operating cash accounts may exceed the FDIC limits.

Note 5. Fair Value Measurements

49

The Company measures certain financial assets at fair value on a recurring basis based on a fair value hierarchy that requires it to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of inputs that may be used to measure fair value:

- Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities;

- quoted prices in markets with insufficient volume or infrequent transactions (less active markets); or
- model-derived valuations in which all significant inputs are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

- Level 3 - Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

The fair value of the Company's investments in certain money market funds is their face value. Such instruments are classified as Level 1 and are included in cash and cash equivalents. The Company considers all highly liquid investments purchased with a remaining maturity of three months or less to be cash equivalents.

The fair value of the Company's foreign currency forward contracts is based on foreign currency rates quoted by banks or foreign currency dealers and other public data sources. Such instruments are classified as Level 2 and are included in other current assets and liabilities.

For certain other financial instruments, including accounts receivable, accounts payable and other current liabilities, the carrying amounts approximate their fair value due to the relatively short maturity of these balances.

As of December 31, 2011, financial assets stated at fair value on a recurring basis were comprised of money market funds included within cash and equivalents and foreign exchange forward contracts included within other current assets and liabilities. The fair value of these financial assets was determined using the following inputs as of December 31, 2011 and 2010:

	December 31, 2011				December 31, 2010			
	Fair value measurements at reporting date using				Fair value measurements at reporting date using			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
	(dollars in thousands)							
Assets:								
Money market funds	\$72,352	\$—	\$—	\$72,352	\$72,256	\$—	\$—	\$72,256
Foreign exchange contracts	—	15	—	15	—	—	—	—
Total	\$72,352	\$15	\$—	\$72,367	\$72,256	\$—	\$—	\$72,256
Liabilities:								
Foreign exchange contracts	\$—	\$242	\$—	\$242	\$—	\$243	\$—	\$243
Total	\$—	\$242	\$—	\$242	\$—	\$243	\$—	\$243

Note 6. Hedging Activity

Balance Sheet Hedging - Hedging of Foreign Currency Assets and Liabilities

During the year ended December 31, 2011, the Company hedged certain of its nonfunctional currency denominated assets and liabilities to reduce the risk that earnings would be adversely affected by changes in exchange rates. The notional amount of derivative instruments acquired during the period was \$44.3 million. The Company accounts for derivative instruments as other current assets and liabilities on the balance sheet and measures them at fair value with changes in the fair value recorded as other income / (expense). These derivative instruments do not subject the

Company to material balance sheet risk due to exchange rate movements because gains and losses on these derivatives are intended to offset gains and losses on the assets and liabilities being economically hedged.

As of December 31, the Company had the following outstanding foreign exchange forward contracts:

	December 31, 2011		December 31, 2010	
	Notional Value Sold	Notional Value Purchased	Notional Value Sold	Notional Value Purchased
	(US dollars in thousands)			
British pound	\$5,998	\$574	\$2,048	\$976
Australian dollar	3,873	80	4,056	1,324
Japanese yen	390	—	3,480	—
Canadian dollar	881	934	1,658	227
Euro	472	—	410	194
Czech crown	250	—	—	—
New Zealand dollar	—	—	52	—
Total	\$11,864	\$1,588	\$11,704	\$2,721

The fair value of the derivative instruments reported on the Company's Consolidated Balance Sheet were as follows:

Derivatives and forward contracts	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	December 31, 2011 Fair Value	December 31, 2010 Fair Value	Balance Sheet Location	December 31, 2011 Fair Value	December 31, 2010 Fair Value
	(US dollars in thousands)					
Foreign exchange contracts	Other current assets	\$15	\$—	Other current liabilities	\$242	\$243
Total		\$15	\$—		\$242	\$243

The effect of derivative instruments on the Statement of Operations was as follows for the periods presented:

Location of net gain (loss) recognized in income on derivatives	Amount of net gain (loss) recognized in income on derivatives during the
