GLAMIS GOLD LTD.

Notes to Unaudited Interim Consolidated Financial Statements Three months ended March 31, 2001

1. GENERAL

In the opinion of management, the accompanying unaudited consolidated balance sheet and consolidated statements of operations, deficit and cash flows contain all adjustments, consisting only of normal recurring accruals, necessary to present fairly, in all material respects, the financial position of Glamis Gold Ltd. (the "Company") as of March 31, 2001 and December 31, 2000 and the results of its operations and its cash flows for the three month periods ended March 31, 2001 and 2000.

These unaudited interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and related footnotes included in the Company's annual report filed on Form 10-K for the year ended December 31, 2000. Certain of the comparative figures have been reclassified to conform with the current period's presentation.

The financial statements are prepared using the same accounting policies and methods of application as those disclosed in note 2 to the Company's consolidated financial statements for the year ended December 31, 2000 except as described in note 5. They have been prepared in accordance with accounting principles generally accepted in Canada which conform, in all material respects, with accounting principles generally accepted in the United States, except as described in note 6 hereof. All amounts are stated in U.S. dollars unless otherwise specified.

4. CHANGES IN ACCOUNTING POLICIES

REVENUE RECOGNITION

During the fourth quarter of 2000, as a result of the U.S. Securities and Exchange Commission's Staff Accounting Bulletin 101, the Company changed its method of recognizing revenues from gold sales and has restated the amounts previously reported for revenues, cost of goods sold, depreciation and depletion, and net income (loss) for the first quarter of 2000. The net effect of this change for the three months ended March 31, 2000 was to increase the loss by \$0.1 million.

EARNINGS PER SHARE

Effective January 1, 2001, diluted earnings per share have been calculated using the new standards set by the Canadian Institute of Chartered Accountants, which are consistent with the treasury stock method promulgated by U.S. generally accepted accounting principles. Although retroactively applied, there is no effect on the 2000 comparative amounts as the Company incurred a loss during the quarter ended March 31, 2000.

7

8

5. DIFFERENCES BETWEEN CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

Accounting in these unaudited interim consolidated financial statements under Canadian and U.S. generally accepted accounting principles is substantially the same except as noted below.

In accounting for investments in equity securities and accounting for derivatives, these differences have no material effect on the amounts presented in the consolidated financial statements as at March 31, 2001 or December 31, 2000, or for the three months ended March 31, 2001 or 2000.

In accounting for income taxes, the future income tax provision provided in connection with the excess purchase price attributable to the San Martin

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

property on the change of accounting policy for income taxes adopted January 1, 2000 was recorded as an adjustment to deficit under Canadian generally accepted accounting principles. Under U.S. rules, this provision would have increased the value attributed to the San Martin property, which would have increased the depreciation and depletion charges for the three months ended March 31, 2001 by \$0.1 million.

In accounting for long-lived assets, U.S. accounting principles require that the crusher system held for resale be reclassified from property, plant and equipment into assets held for resale.

8

9

GLAMIS GOLD LTD.

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FINANCIAL REVIEW

Glamis Gold Ltd.'s (the "Company's") focus on acquiring and developing low-cost production resulted in a Company average total cash cost of production of \$174 per ounce of gold during the first quarter of 2001. The Company completed the first quarter of 2001 with a profit of \$0.4 million (\$0.01 per share). This compares to a loss of \$1.8 million (\$0.02 per share) in the first quarter of 2000. The largest factor in the Company's improved performance is the commencement of production at the San Martin Mine in Honduras. Production of 22,391 ounces of gold at a total cash cost of production of \$122 per ounce of gold from San Martin helped the Company achieve the low total cash cost per ounce of \$174 and provide \$1.8 million in cash flow from operations during the first quarter of 2001. The results in the first quarter 2001 were achieved despite market prices for gold that averaged \$263 per ounce, \$27 per ounce less than during the first quarter of 2000.

The Company's performance in the first quarter of 2000 was hampered by production problems at the Dee Mine (since closed) where total cash costs of production of \$431 per ounce during the first quarter drove the Company's total cash cost per ounce up to \$231, resulting in a loss of \$1.8 million and cash flow from operations of \$0.1 million.

LIQUIDITY AND CAPITAL RESOURCES

The Company had working capital of \$19.5 million at March 31, 2001, a decrease of \$1.0 million from December 31, 2000. Long term liabilities were \$20.8 million at March 31, 2001, consisting of reserves for future reclamation costs of \$12.7 million (\$13.0 million at December 31, 2000) and reserves for future income taxes of \$8.1 million (\$8.3 million at December 31, 2000). The Company continues to have no long-term debt.

Capital expenditures totaled \$5.5 million for the first quarter of 2001 compared to \$8.9 million during the same period in 2000. The expansion at the San Martin Mine accounted for \$3.3 million, deferred stripping at the Rand Mine was \$1.2 million, and completion of the buy-in at Minera San Xavier (the Cerro San Pedro Project) accounted for \$0.7 million. During the first quarter of 2000, the San Martin Mine construction accounted for \$7.7 million of the capital expenditures. Deferred stripping at Rand (\$0.5 million) and Marigold (\$0.3 million) were the other significant items in 2000. All capital expenditures during 2000 and to

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

date in 2001 were financed from the Company's working capital. The Company currently plans to finance all capital expenditures during 2001 from internal funds.

During the first three months of 2001 the Company's operations provided \$1.8 million in cash compared to \$0.1 million in cash provided during the first quarter of 2000. The Company's producing properties provided \$4.6 million during the first quarter of 2001 compared to \$3.6 million during the first quarter of 2000, despite the average price per ounce received for gold declining from \$296 to \$262 in the respective quarters. Comparative production highlights of the first three months of 2001 and 2000 respectively are as follows:

9

Dee (2)	--	--	\$431	
Picacho (2)	--	--	\$180	

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

- (1) Marigold is 66.7% owned.
- (2) The Daisy, Dee and Picacho mines are currently in reclamation.

RAND MINE, CALIFORNIA

The mine produced 13,901 ounces of gold for the three months ended March 31, 2001 compared to 22,907 ounces produced for a comparable period in 2000. A planned stripping campaign negatively impacted production, which is expected to increase during the balance of the year. Management expects Rand to produce approximately 75,000 ounces of gold this year. Total cash costs of production this quarter were \$228 per ounce. A major stripping program in 2000 also impacted ounces produced during the first quarter a year ago, although higher production resulted in the total cash cost being lower at \$173 per ounce.

SAN MARTIN MINE, HONDURAS

The San Martin Mine began commercial production in January 2001. During the first quarter of 2001 the mine produced 22,391 ounces of gold at a total cash cost of \$122 per ounce. Expansion of the mine has already begun. The Company expended \$3.3 million on capital projects during the first quarter, primarily for the Phase 2 leach pad construction. This work is scheduled to be complete during the second quarter 2001.

10

11

MARIGOLD MINE, NEVADA

The 66.7%-owned Marigold Mine produced 12,797 ounces of gold for the Company's account during the first quarter of 2001 compared to 13,521 ounces of gold during the same period in 2000. The total cash cost per ounce of production was \$208 in 2001 compared to \$196 in 2000. However, total cash cost of production for the first quarter of 2001 was budgeted at \$213 per ounce. Including severance payments made as a result of a planned staffing reduction that accounted for \$7 per ounce of the costs, this was a strong performance by Marigold. Marigold continues its outstanding safety record, completing 9.2 years without a lost-time accident.

The Final Environmental Impact Statement in support of expanded mining and processing areas at Marigold was released in March 2001 by the Bureau of Land Management, and recommended the Marigold proposal as the preferred alternative. The Company expects a Record of Decision approving this project during 2001.

PROJECTS

CERRO SAN PEDRO PROJECT, SAN LUIS POTOSI, MEXICO

At the Cerro San Pedro Project, acquired as part of the May, 2000 purchase of Cambior de Mexico (renamed Glamis de Mexico), the Company completed its buy-in of 50% of the project in January 2001. Capital expenditures of \$0.4 million during the first quarter consisted primarily of construction of the new La Zapitilla village and on-going project development. Preparation of a comprehensive action plan for the structural stabilization and monitoring program of the San Pedro Apostol church (a historic landmark) began in April.

IMPERIAL PROJECT, CALIFORNIA

On March 12, 2001, the Company filed an appeal of the Record of Decision issued by the U.S. Department of the Interior on January 16, 2001 denying the Company's

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

plan of operations for the Imperial Project. The appeal was filed in the United States District Court for the District of Columbia and challenges the Record of Decision on grounds that it violates (i) existing law, including the Federal Land Policy and Management Act of 1976, the General Mining Law and the California Desert Protection Act of 1994, (ii) various of the rules, regulations and policies of the Department of the Interior and the Bureau of Land Management, and (iii) the Establishment Clause of the United States Constitution. The Company cannot predict the outcome of this litigation or when a final decision may be rendered. As a result of the negative Record of Decision issued on January 16, 2001, the Company wrote off the carrying value (\$14.3 million) of the Imperial Project, effective December 31, 2000.

EXPLORATION

The Company had \$0.3 million in exploration expenses during the first quarter of 2001 compared to \$0.8 million in the same period in 2000. Of the \$0.3 million, \$0.1 million related to write-offs of small projects in El Salvador acquired as part of Mar-West Resources in 1998. The Company plans to close its exploration office in El Salvador this year. The focus of the Company's exploration in Central America this year will be at San Martin. A 4,600 meter drilling program is planned for the Palo Alto area and Rosa pit. Drilling began in February and is ongoing. Additional soil-sampling programs are also in progress.

11

12

Little activity was scheduled at other prospects. At the Viento Frio property in Panama, permits to drill were received in March and drilling is planned to begin in May. At the Millennium Project at Marigold, drilling began in February and continues. Drilling is planned for reserve expansion as well as to facilitate the permitting portion of the project.

RECLAMATION ACTIVITIES

DEE MINE, NEVADA

The Dee Mine produced 2,194 ounces of gold in the first quarter of 2001. The proceeds of the gold sales were credited against reclamation expenditures. The Dee Mine, which has worked 8 years without a lost-time accident, continues with reclamation and closure activities. Final closure reports for heaps #1 and #3 were submitted to the regulatory agencies.

DAISY MINE, NEVADA

The Daisy Mine produced 450 ounces of gold during the quarter, the proceeds of which were credited against reclamation expenditures. Both the Bureau of Land Management ("BLM") and the Nevada Division of Environmental Protection conducted inspections during the quarter, with no concerns noted. The BLM returned late in March to review the Final Permanent Closure Plan. The mine is expected to complete closure and reclamation this year.

PICACHO MINE, CALIFORNIA

Reclamation continues and is expected to be complete in 2001. All material/solution testing is scheduled to be completed and submitted to the California Regional Water Quality Control Board by the end of April.

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

FORWARD-LOOKING STATEMENTS

Safe Harbor Statement under the United States Private Securities Litigation Reform Act of 1995: Except for the statements of historical fact contained herein, the information presented constitutes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including but not limited to those with respect to the price of gold, the timing and amount of estimated future production, costs of production, capital expenditures, reserve determination, costs and timing of the development of new deposits, the Company's hedging practices, permitting time lines, and the timing and possible outcome of pending litigation involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the actual results of current exploration activities, actual results of current reclamation activities, conclusions of economic evaluations, changes in project parameters as plans continue to be refined, future prices of gold, as well as those factors discussed in the section entitled "Other Considerations" in the Company's Form 10-K. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

12

13

ITEM 3 QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

As noted in Item 7 "Other Risks" in the Company's Form 10-K, the Company is subject to changes in metals prices that directly impact its profitability and cash flows. Because the markets in which the Company sells its products set prices outside of the Company's control, in appropriate circumstances, it is possible to reduce the impact of negative price movements through hedging transactions. These hedging transactions utilize so-called "derivatives," the value of which is "derived" from movements in the prices or rates associated with the underlying product.

The Company's hedging policies give the Company discretion to protect its cash flows by use of forward contracts, spot deferred contracts, and options, in any combination. The Company continuously monitors any open positions with respect to the unrealized gains and losses.

During 1999, in light of falling gold prices and the prospect of committing significant funds to the new San Martin project in Honduras, the Company opted to protect its cash flows during the construction and start-up phases at San Martin from further weakness in the gold market by entering into a moderate hedging program. In 2000, and to date in 2001, the Company has not entered into any new hedge programs.

The Company also invests cash balances in short-term investments that are subject to interest rate fluctuations. Because these investments are in highly liquid, short-term instruments, any impact of an interest rate change would not be material.

The table below sets forth the positions of the Company at March 31, 2001 and December 31, 2000. Fair values are estimated based on market quotations of the variables based on contracted maturity dates.

PART II - OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS:

1) On November 3, 2000, the Company was served with a lawsuit commenced by American Mine Services, Inc., et al ("AMS") in the Nevada State District Court in Elko, Nevada. The suit involved a contract between a subsidiary of the Company and AMS for underground contract mining at the Dee Mine that was terminated by the Company for non-performance in November 1999. The complaint alleges damages for breach of contract in the amount of \$417,960.

Edgar Filing: GLAMIS GOLD LTD - Form 10-Q

The Company has answered the complaint and filed a counterclaim for breach of contract by AMS. Initial discovery proceedings have begun in the case. The Company cannot predict the outcome of this litigation or when a final determination will be made.

2) On March 12, 2001, the Company filed an appeal of the Record of Decision issued by the U.S. Department of the Interior on January 16, 2001 denying the Company's plan of operations for the Imperial Project. The appeal was filed in the United States District Court for the District of Columbia and challenges the Record of Decision on grounds that it violates (I) existing law, including the Federal Land Policy and Management Act of 1976, the General Mining Law and the California Desert Protection Act of 1994, (ii) various of the rules, regulations and policies of the Department of the Interior and the Bureau of Land Management, and (iii) the Establishment Clause of the United States Constitution. The Company cannot predict the outcome of this litigation or when a final decision may be rendered.

ITEM 2 CHANGES IN SECURITIES: None

ITEM 3 DEFAULTS UPON SENIOR SECURITIES: None

ITEM 4 SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS:

The Company held its Annual General Meeting on May 3, 2001. At the meeting, 9 shareholders holding 3,329 shares were present in person and 721 shareholders holding 56,278,677 shares were represented by proxy.

At the meeting, all shares present in person or by proxy voted in favor of the following:

1) The election of Directors:

NOMINEE	IN FAVOR	AGAINST	WITHHELD	ABSTAIN	NOT VOTED
A. Dan Rovig	55,859,100	0	33,773	385,804	0
