The accompanying notes to unaudited condensed consolidated financial statements

APPLIED DNA SCIENCES , Inc.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
March 31, 2003

NOTE - SUMMARY OF ACCOUNTING POLICIES

General

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Accordingly, the results from operations for the six-month period ended March 31, 2003 , are not necessarily indicative of the results that may be expected for the year ended September 30, 2003. The unaudited condensed consolidated financial statements should be read in conjunction with consolidated September 30, 2002 financial statements and footnotes thereto included in the as filed on SEC Form 8-K dated October 21, 2002, as amended.

Business and Basis of Presentation

On September 16, 2002, Applied DNA Sciences, Inc. (the "Company") was incorporated under the laws of the State of Nevada. The Company is in the development stage, as defined by Statement of Financial Accounting Standards No. 7 ("SFAS No. 7") and its efforts have been principally devoted to developing DNA embedded biotechnology security solutions in the United States. To date, the Company has generated no sales revenues, has incurred expenses and has sustained losses. Consequently, its operations are subject to all the risks inherent in the establishment of a new business enterprise. For the period from inception through March 31, 2003, the Company has accumulated losses of \$608,628.

The consolidated financial statements include the accounts of the Company, and its wholly owned subsidiary ProHealth Medical Technologies, Inc. Significant company transactions have been eliminated in Consolidation.

Reclassification

Certain prior period amounts have been reclassified for comparative purposes.

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

NOTE B- ACQUISITION

On October 21, 2002, the Company entered into a Plan and Agreement of Reorganization ("Merger") with ProHealth Medical Technologies, Inc. ("ProHealth") an inactive publicly registered shell corporation with no significant assets or operations. For accounting purposes, the Company shall be the surviving entity. The transaction is accounted for using the purchase method of accounting. The total purchase price and carrying value of net assets acquired of was \$ 880. From November 1988 until the date of the merger, ProHealth was an inactive corporation with no significant assets and liabilities

Effective with the Merger , all previously outstanding common stock, preferred stock, options and warrants owned by the Company's shareholders were exchanged

for an aggregate of 11,000,000 shares of ProHealth common stock. The value of the stock that was issued was the historical cost of the ProHealth's net tangible assets, which did not differ materially from their fair value. In accordance with Accounting Principles Board Opinion No. 16, the Company is the acquiring entity.

Effective with the Merger, ProHealth changed its name to Applied DNA Sciences, Inc.

ITEM 2. MANagements DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS FOR THE SIX MONTHS ENDED MARCH 31, 2003

The following discussion should be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto, included elsewhere within this report. The quarterly report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements using terminology such as "can", "may", "believe", "designated to", "will", "expect", "plan", "anticipate", "estimate", "potential" or "continue", or the negative thereof or other comparable terminology regarding beliefs, plans, expectations or intentions regarding the future. Forward looking statements involve risks and uncertainties and actual results could differ materially from those discussed in forward-looking statements. All forward looking statements and risk factors included in this document are made as of the date hereof, based on information available to the Company as of the date thereof, and the Company assumes no obligations to update any forward-looking statement or risk factor, unless the Company is required to do so by law.

Plan of Operation

The Company presently does not have any available credit, bank financing or other external sources of liquidity. Due to historical operating losses, the Company's operations have not been a source of liquidity. The Company will need to obtain additional capital in order to expand operations and become profitable. The Company intends to pursue the granting of sub-licenses outside the United States, and if successful, the granting of sub-licenses would constitute a substantial additional source of liquidity and capital. In order to obtain capital, the Company may need to sell additional shares of its common stock or borrow funds from private lenders. There can be no assurance that the Company will be successful in obtaining additional funding and granting of sub-licenses outside the United States.

During the six months ended March 31, 2003, the Company's priorities were to

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

recruit and build its team, organize its new infrastructure and to develop a successful strategy how best to exploit its Biowell license agreement, therefore no revenues were anticipated, planned or received, expenses of \$597,016 were incurred stemming from general, selling, and administrative expenses; \$445,466 of these expenses were paid with 2,192,310 shares of the Company's common stock to consultants for management services rendered. Although the management of the Company is of the opinion that continuing to develop and finance the Company's present business of providing DNA anti-counterfeit technology may ultimately be successful, management nevertheless expects that the Company will need substantial additional capital before the Company's operations can be fully implemented.

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2003, we had a working capital deficit of \$ 144,162 . As a result of our operating losses from our inception through March 31, 2003, we generated a cash flow deficit of (\$53,627) from operating activities. We met our cash requirements during this period from advances of \$61,480 from the Company's officer and principal shareholders, and from the exercise of previously issued options which contributed proceeds of \$18,000.

While we have raised capital to meet our working capital and financing needs in the past, additional financing is required in order to meet our current and projected cash flow deficits from operations and development. We are seeking financing in the form of equity in order to provide the necessary working capital. We currently have no commitments for financing. There is no guarantee that we will be successful in raising the funds required.

By adjusting its operations and development to the level of capitalization , management believes it has sufficient capital resources to meet projected cash flow deficits through the next twelve months . However, if thereafter, we are not successful in generating sufficient liquidity from operations or in raising sufficient capital resources, on terms acceptable to us, this could have a material adverse effect on our business, results of operations , liquidity and financial condition.

The effect of inflation on the Company's revenue and operating results was not significant. The Company's operations are located in North America and there are no seasonal aspects that would have a material effect on the Company's financial condition or results of operations.

The Company's independent certified public accountant has stated in his report included in the Company's October 21, 2002 Form 8-K, as amended, that the Company has incurred operating losses from its inception , and that the Company is dependent upon management's ability to develop profitable operations. These factors among others may raise substantial doubt about the Company's ability to continue as a going concern.

PRODUCT RESEARCH AND DEVELOPMENT

We do not anticipate incurring material research and development costs during the next twelve months.

ACQUISITION OF PLANT AND EQUIPMENT AND OTHER ASSETS

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

We do not anticipate the sale of any material property , plant or equipment during the next 12 months. We do not anticipate the acquisition of any material property, plant or equipment during the next 12 months.

NUMBER OF EMPLOYEES

From our inception through the period ended March 31, 2003 , we have relied on the services of outside consultants for services and have no employees. In order for us to attract and retain quality personnel, we anticipate we will have to offer competitive salaries to future employees. We anticipate that it may become desirable to add additional full and or part time employees to discharge certain critical functions during the next 12 months. This projected increase in personnel is dependent upon our ability to generate revenues and obtain sources of financing. There is no guarantee that we will be successful in raising the funds required or generating revenues sufficient to fund the projected increase in the number of employees. As we continue to expand, we will incur additional cost for personnel.

TRENDS, RISKS AND UNCERTAINTIES

We have sought to identify what we believe to be the most significant risks to our business, but we cannot predict whether, or to what extent, any of such risks may be realized nor can we guarantee that we have identified all possible risks that might arise. Investors should carefully consider all of such risk factors before making an investment decision with respect to our Common Stock.

RISKS

Applied DNA Sciences, Inc., is a small company entering a technical and specialized scientific industry. The Company's growth will depend upon the working capital and financial support, which we are in the process of seeking. The Company will need substantial additional capital to expand and compete. While the management team has strong contacts in the geographic and product territories, the Company is small with limited assets and a limited operating history and may, as a result, have difficulties securing large enough and increasing financial commitments from potential investors. Thus the Company may be subject to the high risks associated with start-up companies and small business.

The Company relies on a small number of key individuals to implement plans and operations. Although the Company may obtain key person life insurance coverage on the Company's key individuals, the Company has not done so at this time. Should for some reason their services become unavailable, the Company will be required to retain other qualified personnel.

Reductions or delays in research and development budgets and in government funding may negatively impact the Company's sales. Future clients may include researchers at pharmaceutical and biotechnology companies, academic institutions and government and private laboratories. Fluctuations in the research and development budgets of these researchers and their organizations could have a significant effect on demand for the Company's products. Research and development budgets fluctuate due to numerous factors that are outside the Company's control and are difficult to predict, including changes in available

resources, spending priorities and institutional budgetary policies. The Company's business could be seriously damaged by any decrease in life science research and development expenditures by pharmaceutical and biotechnological companies, academic institutions or government and private laboratories. Although the level of research funding has increased during the past several years, we cannot assure that this trend will continue. Government funding of

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

research and development is subject to the political process, which is inherently fluid and unpredictable. Also government proposals to reduce or eliminate budgetary deficits have sometimes included reduced allocations to the US National Institute of Health and other government agencies that fund research and development activities. Also, our potential customers receive funds from approved grants at particular times of the year, as determined by the federal government. Grants have, in the past, been frozen for extended periods or have otherwise become unavailable to various institutions without advance notice. The timing of receipt of grant funds affects the timing of purchase decisions by our customers and, as a result, can cause fluctuations in our sales and operating results.

The Company regards trademarks, trade secrets and other intellectual property as a component of its success, The Company relies on trademark law and trade secret protection and confidentiality and /or license agreements with consultants, customers, partners and others to protect our intellectual property. Effective trademark and trade secret protection may not be available in every country in which the Company's products are available. The Company cannot be certain that the Company has taken adequate steps to protect its intellectual property, especially in countries where the laws may not protect the Company's rights as fully as in the United States. In addition, the Company's third party confidentiality agreements can be breached and, if they are, there may not be adequate remedy available to the Company. If the Company's trade secrets become known, the Company may lose its competitive edge.

The Company may be unable to protect its trademarks, trade secrets and other intellectual property rights that are important to its business. The Company regards its trademarks, trade secrets and other intellectual property as a component of its success. The Company relies on trademark law and trade secret protection and confidentiality and/or license agreements with consultants, employees, customers, partners and others to protect our intellectual property.

Litigation as regards the Company intellectual property or other subject matters could harm the Company's business. Litigation regarding patents and other intellectual property rights is extensive in the biotechnology industry. The Company is aware that patents have been applied for, and in some cases issued to others, claiming technologies that are closely related to Applied DNA Sciences, Inc. As a result, and in part due to the ambiguities and evolving nature of intellectual property law, the Company periodically receives notices of potential infringements of patents held by others. Although to date the Company has successfully resolved these types of claims, the Company may not be able to do so in the future. In the event of an intellectual property dispute, the Company may be forced to litigate. This litigation could involve proceedings declared by the U.S. Patent and Trademark Office or the International Trade Commission, as well as proceedings brought directly by affected third parties. Intellectual property litigation can be extremely expensive, and these expenses, as well as the consequences should the Company not prevail, could seriously harm the Company's business, If a third party claimed an intellectual property right to technology the Company uses, the Company might need to discontinue an important product or product line, alter its products and processes, pay license fees or cease its affected business activities, Although the Company might under these circumstances attempt to obtain a license to this intellectual property, it may not be able to do so on favorable terms, or at all.

In addition to intellectual property litigation, other substantial, complex or extended litigation could result in large expenditures for the Company and distraction of its management. For example, law suits by employees, shareholders, collaborators or distributors could be very costly and substantially disrupt the Company's business. Disputes from time to time with companies or individuals are not uncommon in the industry and the Company cannot assure that it will always be able to resolve them out of court.

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

The Company's growth depends upon the ability to undertake sales in current markets and to expand sales nationally to additional market segments and to Europe. There can be no certainty that the Company's efforts to increase and expand sales can be accomplished on a profitable basis. The expansion to other delivery methods and to other venues will depend on a number of factors, most notably the timely and successful promotion and sale of the Company's products and related services. The Company's inability to expand sales, in a timely manner, would have a material adverse effect on its business, operating results and its financial condition.

ITEM 3. CONTROLS AND PROCEDURES

The Company's management including the Chief Executive Officer, President and Chief Financial Officer, have evaluated, within 90 days prior to the filing of this quarterly report, the effectiveness of the design, maintenance and operation of the Company's disclosure controls and procedures. Management determined that the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports that it files under the Exchange Act is accurate and is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and regulations.

Disclosure controls and procedures, no matter how well designed and implemented, can provide only reasonable assurance of achieving an entity's disclosure objectives. The likelihood of achieving such objectives is affected by limitations inherent in disclosure controls and procedures. These include the fact that human judgment in decision making can be fully faulty and that breakdowns in internal control can occur because of human failures such as errors or mistakes or intentional circumvention of the established process.

There have been no significant changes in internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation thereof, including any corrective actions with regard to significant deficiencies and material weaknesses.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

ITEM 2. CHANGES IN SECURITIES

NONE

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

NONE

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

NONE

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

ITEM 5. OTHER INFORMATION

The Company holds an option to buy back 8,500,000 shares from Glen Little for \$100,000. Glen Little was the President of ProHealth Medical Technologies, Inc.

Mr. Little has agreed to return the 8,500,000 shares to the Company for cancellation in exchange for an interest bearing \$100,000 Convertible Capital Note. This transaction should be completed before June 30, 2003.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits

99.1 Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 -- Chief Executive Officer (filed herewith).

99.2 Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 --Chief Financial Officer (filed herewith).

(b) Reports on Form 8-K filed during the three months ended March 31, 2003

On February 5, 2003, a Current Report was filed on Form 8-K disclosing the change in the Company's fiscal year-end to September 30. On April 17, 2003, another Current Report was filed on Form 8-K disclosing a press release regarding the fact that the Company's DNA-based Textile Marker System selected as one of three technologies as a key solution for U.S. textile manufacturers and the customs service to combat illegal textile imports.

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

CERTIFICATION

Edgar Filing: APPLIED DNA SCIENCES INC - Form 10QSB/A

I, Lawrence Lee, Chief Executive Officer, and, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of Applied DNA Sciences, Inc.;

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have: a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared; b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions): a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
