Monroe Capital Corporation

**Common Stock
Preferred Stock
Warrants
Subscription Rights
Debt Securities**

We are a specialty finance company focused on providing financing primarily to lower middle-market companies in the United States and Canada. We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended. Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity investments. We use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies.

We invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Below investment grade securities are often referred to as high yield or junk. In addition, many of the debt securities we hold do not fully amortize prior to maturity, which heightens the risk that we may lose all or a part of our investment.

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$200,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities (consisting of debentures, notes or other evidence of indebtedness), subscription rights or debt securities, which we refer to, collectively, as the securities. We may sell our common stock through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus.

Monroe Capital BDC Advisors, LLC serves as our investment advisor. Monroe Capital Management Advisors, LLC serves as our administrator. Each of Monroe Capital BDC Advisors, LLC and Monroe Capital Management Advisors, LLC is affiliated with Monroe Capital, LLC, a leading lender to middle-market companies.

Our common stock is listed on The Nasdaq Global Select Market under the symbol MRCC. If our shares trade at a discount to our net asset value, it may increase the risk of loss for purchasers in this offering. On June 16, 2016, the last reported sale price of our stock on The Nasdaq Global Select Market was \$14.18 per share. Our net asset value as of March 31, 2016 was \$14.45 per share.

Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value. If our shares trade at a discount to our net asset value, it will likely increase the risk of loss for purchasers in this offering. On June 24, 2015, our stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of twelve months subject to certain conditions. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. In addition, continuous sales of common stock below net asset value may have a negative impact on total returns and could have a negative impact on the market price of our shares of common stock. See Risk Factors and Sales of Common Stock Below Net Asset Value.

An investment in our securities is subject to risks, including a risk of total loss of investment. In addition, the companies in which we invest are subject to special risks. We are an emerging growth company under the federal securities laws and are subject to reduced public company reporting requirements. Substantially all of the debt instruments in which we invest (i) have and will have variable interest rate provisions that may make it more difficult for borrowers to make debt repayments to us in a rising interest rate environment and (ii) will likely have a principal amount outstanding at maturity, that may lead to a substantial loss to us if the borrower is unable to refinance or repay. See Risk Factors beginning on page 12 to read about factors you should consider, including the risk of leverage, before investing in our securities.

This prospectus and the accompanying prospectus supplement, if any, contain important information you should know before investing. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission, or the SEC. This information is available free of charge by contacting us at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, Attention: Investor Relations, by calling us collect at (312) 258-8300, or on our website at www.monroebdc.com. The SEC also maintains a website at www.sec.gov that contains such information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

The date of this prospectus is _____, 2016

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC using the shelf registration process.

Under the shelf registration process, we may offer from time to time up to \$200,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities (consisting of debentures, notes or other evidence of indebtedness) on the terms to be determined at the time of the offering. We may sell our common stock through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus.

The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement, together with any exhibits, before you make an investment decision.

You should rely only on the information contained in this prospectus. We have not, and the underwriters have not, authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and the underwriters are not, making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate only as of the date on the front cover of this prospectus. Our business, financial condition, results of operations, cash flows and prospects may have changed since that date. We will update these documents to reflect material changes only as required by law.

TABLE OF CONTENTS

SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read this entire prospectus carefully, including, in particular, the more detailed information set forth under Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations.

As used in this prospectus, except as otherwise indicated, the terms:

we, us and our refer to Monroe Capital Corporation, a Maryland corporation;

MC Advisors refers to Monroe Capital BDC Advisors, LLC, our investment advisor and a Delaware limited liability company;

MC Management refers to Monroe Capital Management Advisors, LLC, our administrator and a Delaware limited liability company;

Monroe Capital refers to Monroe Capital LLC, a Delaware limited liability company, and its subsidiaries and affiliates;

MRCC SBIC refers to Monroe Capital Corporation SBIC, LP, a Delaware limited partnership, our wholly-owned subsidiary that operates as a small business investment company pursuant to a license received from the United States Small Business Administration; and

LIBOR refers to the one-month, three-month or six-month London Interbank Offered Rate as reported by the British Bankers Association. Unless stated otherwise herein, LIBOR refers to the one-month rate.

Monroe Capital Corporation

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended, or the 1940 Act, and that has elected to be treated as a regulated investment company, or RIC, for tax purposes under the U.S. Internal Revenue Code of 1986, as amended, or the Code, commencing with our taxable year ended December 31, 2012. We provide customized financing solutions to lower middle-market companies in the United States and Canada focused primarily on senior secured, junior secured and unitranche (a combination of senior secured and junior secured debt in the same facility) and, to a lesser extent, unsecured subordinated debt and equity, including equity co-investments in preferred and common stock and warrants.

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity investments. We seek to use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies. We believe that our primary focus on lending to lower middle-market companies offers several advantages as compared to lending to larger companies, including more attractive economics, lower leverage, more comprehensive and restrictive covenants, more expansive events of default, relatively small debt facilities that provide us with enhanced influence over our borrowers, direct access to borrower management and improved information flow.

In this prospectus, the term middle-market generally refers to companies having annual revenue of between \$20 million and \$500 million and/or annual earnings before interest, taxes, depreciation and amortization, or EBITDA, of between \$3 million and \$50 million. Within the middle-market, we consider companies having annual revenues of less than \$250 million and/or EBITDA of less than \$25 million to be in the lower middle-market.

Our Investment Advisor

Our investment activities are managed by our investment advisor, MC Advisors. MC Advisors is responsible for sourcing potential investments, conducting research and due diligence on prospective investments and their private equity sponsors, analyzing investment opportunities, structuring our investments

1

TABLE OF CONTENTS

and managing our investments and portfolio companies on an ongoing basis. MC Advisors was organized in February 2011 and is a registered investment adviser under the Investment Advisers Act of 1940, as amended, or the Advisers Act.

Under the investment advisory and management agreement with MC Advisors, or the Investment Advisory Agreement, we pay MC Advisors a base management fee and an incentive fee for its services. See Management and Other Agreements Investment Advisory Agreement Management and Incentive Fee for a discussion of the base management fee and incentive fee payable by us to MC Advisors. While not expected to review or approve each investment, our independent directors will periodically review MC Advisors' services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate.

MC Advisors seeks to capitalize on the significant deal origination, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of Monroe Capital's investment professionals.

The senior management team of Monroe Capital, including Theodore L. Koenig and Aaron D. Peck, provides investment services to MC Advisors pursuant to a staffing agreement, or the Staffing Agreement, between MC Management, an affiliate of Monroe Capital, and MC Advisors. Messrs. Koenig and Peck have developed a broad network of contacts within the investment community and average more than 20 years of experience investing in debt and equity securities of lower middle-market companies. In addition, Messrs. Koenig and Peck have extensive experience investing in assets that constitute our primary focus and have expertise in investing throughout all periods of the economic cycle. MC Advisors is an affiliate of Monroe Capital and is supported by experienced investment professionals of Monroe Capital under the terms of the Staffing Agreement. Monroe Capital's core team of investment professionals has an established track record in sourcing, underwriting, executing and monitoring transactions. From Monroe Capital's formation in 2004 through March 31, 2016, Monroe Capital's investment professionals invested in over 900 loan and related investments with an aggregate principal value of over \$5.0 billion.

In addition to their roles with Monroe Capital and MC Advisors, Messrs. Koenig and Peck serve as our interested directors. Mr. Koenig has more than 25 years of experience in structuring, negotiating and closing transactions on behalf of asset-backed lenders, commercial finance companies, financial institutions and private equity investors at organizations including Monroe Capital, which Mr. Koenig founded in 2004, and Hilco Capital LP, where he led investments in over 20 companies in the lower middle-market. Mr. Peck has more than 20 years of public company management, leveraged finance and commercial lending experience at organizations including Deerfield Capital Management LLC, Black Diamond Capital Management LLC and Salomon Smith Barney Inc. See Management Biographical Information Interested Directors.

Messrs. Koenig and Peck are joined on the investment committee of MC Advisors by Michael J. Egan and Jeremy T. VanDerMeid, each of whom is a senior investment professional at Monroe Capital. Mr. Egan has more than 25 years of experience in commercial finance, credit administration and banking at organizations including Hilco Capital, The CIT Group/Business Credit, Inc., The National Community Bank of New Jersey (The Bank of New York) and KeyCorp. Mr. VanDerMeid has more than 15 years of lending and corporate finance experience at organizations including Morgan Stanley Investment Management, Dymas Capital Management Company, LLC and Heller Financial. See Management Biographical Information Investment Committee.

About Monroe Capital

Monroe Capital, a Delaware limited liability company that was founded in 2004, is a leading lender to middle-market companies. As of March 31, 2016, Monroe Capital had approximately \$3.2 billion in assets under management.

Monroe Capital has maintained a continued lending presence in the lower middle-market throughout the most recent economic downturn. The result is an established lending platform that we believe generates consistent primary and secondary deal flow from a network of proprietary relationships and additional deal flow from a diverse portfolio of over 400 current investments. From Monroe Capital's formation in 2004 through March 31, 2016, Monroe Capital's investment professionals invested in over 900 loans and related investments with an aggregate principal value of over \$5.0 billion. The senior investment team of Monroe Capital averages more than 20 years of experience and has developed a proven investment

TABLE OF CONTENTS

and portfolio management process that has performed through multiple market cycles. In addition, Monroe Capital's investment professionals are supported by administrative and back-office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management.

Market Opportunity

We invest primarily in senior, unitranche and junior secured debt issued to lower middle-market companies in the United States and, to a lesser extent and in accordance with the limitations on foreign investments in the 1940 Act, Canada. We believe that U.S. and Canadian lower middle-market companies comprise a large, growing and fragmented market that offers attractive financing opportunities. We believe that there exists a large number of prospective lending opportunities for lenders, which should allow us to generate substantial investment opportunities and build an attractive portfolio of investments. See Business.

Investment Strategy

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation primarily through investments in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity. We also seek to invest opportunistically in attractively priced, broadly syndicated loans, which should enhance our geographic and industry portfolio diversification and increase our portfolio's liquidity. To achieve our investment objective, we utilize the following investment strategy:

Attractive Current Yield. We believe our sourcing network allows us to enter into transactions with attractive yields and investment structures. Based on current market conditions and our pipeline of new investments, we expect our target directly originated senior and unitranche secured debt will have an average maturity of three to five years and interest rates of 8% to 13%, and we expect our target directly originated junior secured debt and unsecured subordinated debt will have an average maturity of four to seven years and interest rates of 10% to 15%. In addition, based on current market conditions and our pipeline of new investments, we expect that our target debt investments will typically have a variable coupon (with a LIBOR floor) and may include payment-in-kind, or PIK, interest (interest that is not received in cash, but added to the principal balance of the loan), and that we will typically receive upfront closing fees of 1% to 4%. We may also receive warrants or other forms of upside equity participation. Our transactions are generally secured and supported by a lien on all assets and/or a pledge of company stock in order to provide priority of return and to influence any corporate actions. Although we will target investments with the characteristics described in this paragraph, we cannot assure you that our new investments will have these characteristics and we may enter into investments with different characteristics as the market dictates. For a description of the characteristics of our current investment portfolio, see Management's Discussion and Analysis of Financial Condition and Results of Operations Portfolio and Investment Activity. Until investment opportunities can be found, we may invest our undeployed capital in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. See Use of Proceeds.

Sound Portfolio Construction. We strive to exercise discipline in portfolio creation and management and to implement effective governance throughout our business. Monroe Capital has been, and MC Advisors, which is comprised by substantially the same investment professionals who have operated Monroe Capital, is, and we believe will continue to be, conservative in the underwriting and structuring of covenant packages in order to enable early intervention in the event of weak financial performance by a portfolio company. We seek to pursue lending opportunities selectively and to maintain a diversified portfolio. We believe that exercising disciplined portfolio

management through continued intensive account monitoring and timely and relevant management reporting allows us to mitigate risks in our debt investments. In addition, we have implemented rigorous governance processes through segregation of duties, documented policies and procedures and independent oversight and review of transactions, which we believe helps us to maintain a low level of non-performing loans. We believe that Monroe Capital's proven process of thorough origination, conservative underwriting, due diligence and structuring, combined with careful account management and diversification, enabled it to protect investor capital, and we believe MC Advisors follows and will follow the same philosophy and processes in originating, structuring and managing our portfolio investments.

3

TABLE OF CONTENTS

Predictability of Returns. Beyond conservative structuring and protection of capital, we seek a predictable exit from our investments. We seek to invest in situations where there are a number of potential exit options that can result in full repayment or a modest refinance of our investment. We seek to structure the majority of our transactions as secured loans with a covenant package that provides for full or partial repayment upon the completion of asset sales and restructurings. Because we seek to structure these transactions to provide for contractually determined, periodic payments of principal and interest, we are less likely to depend on merger and acquisition activity or public equity markets to exit our debt investments. As a result, we believe that we can achieve our target returns even in a period when public markets are depressed.

Competitive Strengths

We believe that we represent an attractive investment opportunity for the following reasons:

Deep, Experienced Management Team. We are managed by MC Advisors, which has access through the Staffing Agreement to Monroe Capital's experienced team comprised of approximately 60 professionals, including six senior partners that average more than 20 years of direct lending experience. We are led by our Chairman and Chief Executive Officer, Theodore L. Koenig, and Aaron D. Peck, our Chief Financial Officer and Chief Investment Officer.

This extensive experience includes the management of investments with borrowers of varying credit profiles and transactions completed in all phases of the credit cycle. Monroe Capital's senior investment professionals provide us with a difficult-to-replicate sourcing network and a broad range of transactional, financial, managerial and investment skills. This expertise and experience is supported by administrative and back office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management. From Monroe Capital's formation in 2004 through March 31, 2016, Monroe Capital's investment professionals invested in more than 900 loan and related investments with an aggregate principal value of over \$5.0 billion.

Differentiated Relationship-Based Sourcing Network. We believe Monroe Capital's senior investment professionals benefit from extensive relationships with commercial banks, private equity firms, financial intermediaries, management teams and turn-around advisors. We believe that this broad sourcing network differentiates us from our competitors and offers us a diversified origination approach that does not rely on a single channel and offers us consistent deal flow throughout the economic cycle. We also believe that this broad network allows us to originate a substantial number of non-private equity-sponsored investments.

Extensive Institutional Platform for Originating Middle-Market Deal Flow. Monroe Capital's broad network of relationships and significant origination resources enable us to review numerous lending opportunities, permitting us to exercise a high degree of selectivity in terms of loans to which we ultimately commit. Monroe Capital estimates that it reviewed approximately 1,700 investment opportunities during 2015. Monroe Capital's over 900 previously executed transactions, over 400 of which are with current borrowers, offer us another source of deal flow, as these debt investments reach maturity or seek refinancing. As of March 31, 2016, Monroe Capital had a pipeline of over 250 transactions for an aggregate potential deal volume of greater than \$5.0 billion for all funds under management. We are also positioned to benefit from Monroe Capital's established brand name, strong track record in partnering with industry participants and reputation for closing deals on time and as committed. Monroe Capital's senior investment professionals are complemented by extensive experience in capital markets transactions, risk management and portfolio monitoring.

Disciplined, Credit-First Underwriting Process. Monroe Capital has developed a systematic underwriting process that applies a consistent approach to credit review and approval, with a focus on evaluating credit first and then appropriately assessing the risk-reward profile of each loan. MC Advisors' assessment of credit outweighs pricing and

other considerations, as we seek to minimize potential credit losses through effective due diligence, structuring and covenant design. MC Advisors seeks to customize each transaction structure and financial covenant to reflect risks identified through the underwriting and due diligence process. We also seek to actively manage our origination and credit underwriting activities through personal visits and calls on all parties involved with an investment, including the management team, private equity sponsor, if any, or other lenders.

Established Credit Risk Management Framework. We seek to manage our credit risk through a well-defined portfolio strategy and credit policy. In terms of credit monitoring, MC Advisors assigns each loan

TABLE OF CONTENTS

to a particular portfolio management professional and maintains an internal credit rating analysis for all loans. MC Advisors then employs ongoing review and analysis, together with monthly investment committee meetings to review the status of certain complex and challenging loans and a comprehensive quarterly review of all loan transactions. MC Advisors' investment professionals also have significant turnaround and work-out experience, which gives them perspective on the risks and possibilities throughout the entire credit cycle. We believe this careful approach to investment and monitoring enables us to identify problems early and gives us an opportunity to assist borrowers before they face difficult liquidity constraints. By anticipating possible negative contingencies and preparing for them, we believe that we diminish the probability of underperforming assets and loan losses.

Credit Facility

We have a credit facility with ING Capital LLC, or the Lender, as agent, which currently consists of a revolving line of credit of \$160.0 million, which may be increased to up to \$300.0 million pursuant to an accordion feature.

We may make draws under the revolver from time-to-time through December 2019 to make or purchase additional investments or for general working capital purposes until the maturity date of the credit facility, or the earliest to occur of (a) December 14, 2020, subject to extension as mutually agreed by us and the Lender, (b) the termination of the facility in accordance with its terms or (c) any other date mutually agreed to by us and the Lender. The revolving credit facility is secured by a lien on all of our assets, including cash on hand, but excluding the assets of our wholly-owned subsidiary, MRCC SBIC. The material terms of the credit facility are as follows:

total borrowing capacity currently equal to \$160.0 million and up to \$300.0 million pursuant to an accordion feature, subject to, among other things, availability under a defined borrowing base, which varies based on our portfolio characteristics and certain eligibility criteria and concentration limits, as well as valuation methodologies; an interest rate equal to, at our election, (a) LIBOR plus 3.00% per annum, with a further step-down to LIBOR plus 2.75% when equity capitalization exceeds \$225.0 million or (b) a fluctuating daily rate equal to 2.00% per annum plus the greater of the prime rate, the federal funds rate plus 0.5% or three-month LIBOR plus 1.0%; and customary financial covenants and negative covenants and events of default.

As of March 31, 2016, we had \$134.7 million outstanding under our revolving credit facility and availability of \$25.3 million.

MRCC SBIC

On February 28, 2014, our wholly-owned subsidiary, MRCC SBIC received a license from the U.S. Small Business Administration (SBA) to operate as a Small Business Investment Company (SBIC) under Section 301(c) of the Small Business Investment Company Act of 1958. MRCC SBIC commenced operations on September 16, 2013. As of March 31, 2016, MRCC SBIC had \$20.0 million in regulatory and leveragable capital and \$40.0 million in SBA-guaranteed debentures outstanding. On April 13, 2016, MRCC SBIC was approved by the SBA for an additional \$75.0 million in SBA-guaranteed debentures.

We have received exemptive relief from the SEC to permit us to exclude the debt of our SBIC subsidiary guaranteed by the SBA from the definition of senior securities for the purposes of the 200% asset coverage ratio we are required to maintain under the 1940 Act.

Operating and Regulatory Structure

Our investment activities are managed by MC Advisors under the direction of our board of directors, a majority of whom are independent of us, MC Advisors and our and its respective affiliates.

As a business development company, we are required to comply with certain regulatory requirements. For example, while we are permitted to finance investments using leverage, which may include the issuance of notes, other borrowings and shares of preferred stock, our ability to use leverage is limited in significant

5

TABLE OF CONTENTS

respects. See Regulation. Any decision on our part to use leverage will depend upon our assessment of the attractiveness of available investment opportunities in relation to the costs and perceived risks of such leverage. The use of leverage to finance investments creates certain risks and potential conflicts of interest. See Risk Factors Risks Relating to our Business and Structure We maintain a revolving credit facility and may use other borrowed funds to make investments or fund our business operations, which exposes us to risks typically associated with leverage and increases the risk of investing in us.

Also, as a business development company, we are generally prohibited from acquiring assets other than qualifying assets unless, after giving effect to any acquisition, at least 70% of our total assets are qualifying assets. Qualifying assets generally include securities of eligible portfolio companies, cash, cash equivalents, U.S. government securities and high-quality debt instruments maturing in one year or less from the time of investment. Under the rules of the 1940 Act, eligible portfolio companies include (a) private domestic operating companies, (b) public domestic operating companies whose securities are not listed on a national securities exchange (*e.g.*, The Nasdaq Global Market) or registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and (c) public domestic operating companies having a market capitalization of less than \$250 million. Public domestic operating companies whose securities are quoted on the over-the-counter bulletin board or through Pink Sheets LLC are not listed on a national securities exchange and therefore are eligible portfolio companies. See Regulation. Additionally, to the extent we invest in the securities of companies domiciled in or with their principal places of business outside of the United States, we seek to limit those investments to companies domiciled or with their principal place of business in Canada. Any investments in Canadian companies will not be qualifying assets, meaning that in accordance with the 1940 Act, we cannot invest more than 30% of our assets in Canadian securities and other non-qualifying assets.

We have elected to be treated for U.S. federal income tax purposes as a RIC under the Code. In order to continue to qualify to be treated as a RIC, we must satisfy certain source of income, asset diversification and distribution requirements. See Material U.S. Federal Income Tax Considerations.

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, MC Advisors has agreed to offer us the right to participate in all investment opportunities that it determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors. These offers are subject to the exception that, in accordance with MC Advisors' conflict of interest and allocation policies, we might not participate in each individual opportunity but are entitled, on an overall basis, to participate equitably with other entities sponsored or managed by MC Advisors and its affiliates.

Affiliates of MC Advisors manage other assets in various structures, including three closed-end funds, two small business investment companies and seven private funds that also have an investment strategy focused primarily on senior, unitranche, and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity to lower middle-market companies. In addition, MC Advisors and/or its affiliates may manage other entities in the future with an investment strategy that has the same or similar focus as ours. To the extent we compete with entities managed by MC Advisors or any of its affiliates for a particular investment opportunity, MC Advisors seeks to allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates, (b) the requirements of the Advisers Act and (c) MC Advisors' internal conflict of interest and allocation policies.

MC Advisors and/or its affiliates may in the future sponsor or manage investment funds, accounts or other investment vehicles with similar or overlapping investment strategies, and MC Advisors has put in place a conflict-resolution

policy that addresses the co-investment restrictions set forth under the 1940 Act. MC Advisors seeks to ensure an equitable allocation of investment opportunities when we are able to invest alongside other accounts managed by MC Advisors and its affiliates. When we invest alongside such other accounts as permitted, such investments will be made consistent with MC Advisors' allocation policy. Under this allocation policy, a fixed percentage of each opportunity, which may vary based on asset class and from time to time, will be offered to us and similar eligible accounts, as periodically determined by MC Advisors and approved by our board of directors, including a majority of our independent directors. The allocation

6

TABLE OF CONTENTS

policy provides that allocations among us and other accounts will generally be made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors, including a majority of our independent directors. It is our policy to base our determinations as to the amount of capital available for investment on such factors as the amount of cash on hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors, or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. In situations where co-investment with other entities sponsored or managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, MC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. MC Advisors will make these determinations based on its policies and procedures, which will generally require that such opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods. We and MC Advisors have received exemptive relief from the SEC to permit greater flexibility to negotiate the terms of co-investments if our board of directors determines that it would be advantageous for us to co-invest with other funds managed by MC Advisors or its affiliates in a manner consistent with our investment objectives, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. See [Related Party Transactions and Certain Relationships](#).

Corporate History and Additional Information

We were incorporated under the laws of Maryland on February 9, 2011. Our principal executive offices are located at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, and our telephone number is (312) 258-8300. We maintain a website at www.monroebdc.com and make all of our periodic and current reports, proxy statements and other information available, free of charge, on or through our website. Information on our website is not incorporated into or part of this prospectus. You may also obtain such information free of charge by contacting us in writing at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, attention: Investor Relations.

We have filed with the SEC a registration statement on Form N-2, of which this prospectus is a part, under the Securities Act of 1933, as amended, or the Securities Act. This registration statement contains additional information about us and the securities being offered by this prospectus. We also file periodic reports, current reports, proxy statements and other information with the SEC. This information is available at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549 and on the SEC's website at www.sec.gov. Information on the operation of the SEC's public reference room may be obtained by calling the SEC at 1-800-SEC-0330.

Implications of Being an Emerging Growth Company

As a company with less than \$1.0 billion in revenue during our last fiscal year, we qualify as an emerging growth company as defined in the Jumpstart our Business Startups Act of 2012, or the JOBS Act. As an emerging growth company, we may take advantage of specified reduced reporting requirements and are relieved of certain other significant requirements that are otherwise generally applicable to public companies including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a non-binding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. If some investors find our securities less attractive as a result, there may be a less active trading market for our securities and the prices of our securities may be more volatile.

In addition, Section 7(a)(2)(B) of the Securities Act and Section 13(a) of the Exchange Act, as amended by Section 102(b) of the JOBS Act, provide that an emerging growth company can take advantage of the extended transition period for complying with new or revised accounting standards. However, pursuant to Section 107 of the JOBS Act, we are choosing to opt out of such extended transition period, and as a result, we will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Our decision to opt out of the extended transition period for complying with new or revised accounting standards is irrevocable.

7

TABLE OF CONTENTS

We may take advantage of these provisions until December 31, 2017 or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than \$1.0 billion in annual revenues, have more than \$700 million in market value of our common stock held by non-affiliates or issue more than \$1.0 billion of non-convertible debt over a three-year period.

Sale of Common Stock Below NAV

We may offer, and have in the past offered, shares of our common stock at a discount from our most recently determined net asset value per share pursuant to authority granted by our stockholders on June 24, 2015, June 27, 2014 and July 9, 2013. Our board of directors has in the past determined that it would be in our and our stockholders best interests to issue shares of our common stock below net asset value. See **Risk Factors** and **Sales of Common Stock Below Net Asset Value**.

Risk Factors

The value of our assets, as well as the market price of our shares will fluctuate. Our investments may be risky, and you may lose all or part of your investment in us. A material portion of our portfolio may have exposure to specific industries. See **Risk Factors** beginning on page 12 of this prospectus for a more detailed discussion of the material risks you should carefully consider before deciding to invest in our common stock.

TABLE OF CONTENTS**FEES AND EXPENSES**

The following table is intended to assist you in understanding the costs and expenses that an investor in our common stock will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and actual amounts and percentages may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by you, us, the Company or Monroe Capital Corporation, that we will pay fees or expenses, stockholders will indirectly bear such fees or expenses as investors in Monroe Capital Corporation.

Stockholder transaction expenses:		
Sales load (as a percentage of offering price)		% ⁽¹⁾
Offering expenses (as a percentage of offering price)		% ⁽²⁾
Dividend reinvestment plan expenses		% ⁽³⁾
Total stockholder transaction expenses (as a percentage of offering price)		% ⁽²⁾
Estimated annual expenses (as a percentage of net assets attributable to common stock):		
Base management fee	3.22	% ⁽⁴⁾
Incentive fees payable under the Investment Advisory Agreement	3.74	% ⁽⁵⁾
Interest payments on borrowed funds	3.63	% ⁽⁶⁾
Other expenses (estimated)	1.76	% ⁽⁷⁾
Total annual expenses (estimated)	12.35	% ⁽⁸⁾

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters or agents, a corresponding prospectus supplement will disclose the applicable sales load.
- The related prospectus supplement will disclose the estimated amount of total offering expenses (which may include offering expenses borne by third parties on our behalf), the offering price and the offering expenses borne by us as a percentage of the offering price.
- (2) The expenses of the dividend reinvestment plan are included in other expenses. See Dividend Reinvestment Plan.
- Our base management fee is 1.75% of our total assets (which includes assets purchased with borrowed amounts but does not include cash and cash equivalents). For the purposes of this table, we have assumed that the base management fee will remain at 1.75% as set forth in the Investment Advisory Agreement. We may from time to time decide it is appropriate to change the terms of the Investment Advisory Agreement. Under the 1940 Act, any material change to the Investment Advisory Agreement generally must be submitted to our stockholders for approval. The base management fee percentage is calculated as a percentage of net assets attributable to common stockholders, rather than total assets, including assets that have been funded with borrowed monies, because common stockholders bear all of this cost. The base management fee in the table above assumes the base management fee remains consistent with fees incurred for the three months ended March 31, 2016 of \$1.5 million, based on average total assets (excluding cash) for the period of \$353.9 million, as a percentage of our average net assets for the period of \$186.2 million. See Management and Other Agreements Investment Advisory Agreement.
- Estimated assuming that annual incentive fees earned by MC Advisors remains consistent with the incentive fees earned for the three months ended March 31, 2016 of \$1.7 million, as a percentage of our average net assets of \$186.2 million for the period.

The incentive fee consists of two parts:

The first part of the incentive fee, payable quarterly in arrears, equals 20% of our pre-incentive fee net investment income (including interest that is accrued but not yet received in cash), subject to a 2% quarterly (8% annualized) hurdle rate and a catch-up provision measured as of the end of each calendar quarter. Under this provision, in any

calendar quarter, MC Advisors receives no incentive fee until our net investment income equals the hurdle rate of 2% but then receives, as a catch-up, 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, MC Advisors will receive 20% of our pre-incentive fee net investment income as if a hurdle rate did not apply. The

9

TABLE OF CONTENTS

first component of the incentive fee will be computed and paid on income that includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with PIK interest, preferred stock with PIK dividends and zero coupon securities, accrued income that we have not yet received in cash. Since the hurdle rate is fixed, as interest rates rise, it will be easier for the MC Advisors to surpass the hurdle rate and receive an incentive fee based on net investment income. The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income will be payable except to the extent that

20% of the cumulative net increase in net assets resulting from operations over the then current and 11 preceding calendar quarters exceeds the cumulative incentive fees accrued and/or paid for the 11 preceding calendar quarters. In other words, any ordinary income incentive fee that is payable in a calendar quarter will be limited to the lesser of (i) 20% of the amount by which our pre-incentive fee net investment income for such calendar quarter exceeds the 2% hurdle, subject to the catch-up provision, and (ii) (x) 20% of the cumulative net increase in net assets resulting from operations for the then current and 11 preceding calendar quarters *minus* (y) the cumulative incentive fees accrued and/or paid for the 11 preceding calendar quarters. For the foregoing purpose, the cumulative net increase in net assets resulting from operations is the sum of our pre-incentive fee net investment income, base management fees, realized gains and losses and unrealized appreciation and depreciation for the then current and 11 preceding calendar quarters.

The second part of the incentive fee, payable annually in arrears, equals 20% of our realized capital gains on a cumulative basis from inception through the end of the fiscal year, if any (or upon the termination of the Investment Advisory Agreement, as of the termination date), computed net of all realized capital losses on a cumulative basis and unrealized capital depreciation, less the aggregate amount of any previously paid capital gain incentive fees. We will accrue (but not pay) an expense for potential payment of capital gain incentive fees with respect to any unrealized appreciation on our portfolio.

See Management and Other Agreements Investment Advisory Agreement.

We may borrow funds from time to time to make investments to the extent we determine that it is appropriate to do so. The costs associated with any outstanding borrowings are indirectly borne by our investors. The table assumes borrowings are consistent with the average borrowings for the three months ended March 31, 2016 of \$171.6 million, no preferred stock issued or outstanding and average net assets of \$186.2 million. For the three months ended March 31, 2016, we had interest expense of \$1.7 million (including fees for unused portions of

(6) commitments). The weighted average interest rate of our revolving credit facility (excluding debt issuance costs) was 3.72% and the weighted average interest rate on our SBA-guaranteed debentures (excluding debt issuance costs) was 3.28% during the three months ended March 31, 2016. Although we do not have any current plans to issue debt securities or preferred stock in the next twelve months, we may issue debt securities or preferred stock, subject to our compliance with applicable requirements under the 1940 Act.

Includes our estimated overhead expenses, including payments under the Administration Agreement based on our allocable portion of overhead and other expenses incurred by MC Management. The table above assumes other

(7) expenses remain consistent with the \$0.8 million incurred during the three months ended March 31, 2016 and average net assets for the period of \$186.2 million.

(8) Total annual expenses as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. We calculate the total annual expenses percentage as a percentage of net assets (defined as total assets less indebtedness and after taking into account any incentive fees payable during the period), rather than the total assets, including assets that have been purchased with borrowed amounts. The terms of our indebtedness may be found in Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Borrowings. If the total annual expenses percentage were calculated instead as a percentage of consolidated total assets, our total annual expenses would be 6.33% of consolidated total assets. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage ratio,

as defined in the 1940 Act, equals at least 200% of total assets after such borrowing. We have received exemptive relief from the SEC to permit us to exclude the debt of our SBIC subsidiary guaranteed by the SBA from the definition of senior securities for the purposes of the 200% asset coverage ratio. We have included our estimated leverage expenses (consistent with the assumptions in footnote (7)) in total annual expenses.

10

TABLE OF CONTENTS**Example**

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage, that none of our assets are cash or cash equivalents and that our annual operating expenses would remain at the levels set forth in the table above. Transaction expenses are not included in the following example:

You would pay the following expenses on a \$1,000 investment	1 Year	3 Years	5 Years	10 Years
Assuming a 5% annual return (assumes no return from net realized capital gains or net unrealized capital appreciation)	\$ 86	\$ 259	\$ 431	\$ 862
Assuming a 5% annual return (assumes entire return is from realized capital gains and thus subject to the capital gains incentive fee)	\$ 96	\$ 290	\$ 486	\$ 988

This table is to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. The example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. As incentive fees vary based on the character of the 5% return, the example above provides (i) expenses assuming no return from capital gains (therefore not meeting the hurdle rate for the first part of the incentive fee) and (ii) expenses assuming the entire return is from realized capital gains (resulting in a capital gains incentive fee). For the three months ended March 31, 2016, 27.15% of our return was comprised of realized and unrealized capital gains. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, if our board of directors authorizes and we declare a cash distribution, participants in our dividend reinvestment plan who have not otherwise elected to receive cash will receive a number of shares of our common stock, determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See [Dividend Reinvestment Plan](#) for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

TABLE OF CONTENTS

RISK FACTORS

Investing in our securities involves a number of significant risks. Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus and the applicable prospectus supplement, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us may also impair our operations and performance. If any of the following events occurs, our business, financial condition, results of operations and cash flows could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment. The risk factors described below are the principal risk factors associated with an investment in us as well as those factors generally associated with an investment company with investment objectives, investment policies, capital structure or trading markets similar to ours.

Risks Relating to Our Business and Structure

We have a limited operating history as a business development company and a RIC, and MC Advisors has limited experience managing a business development company or a RIC; we may not be able to operate our business successfully or generate sufficient revenue to make or sustain distributions to our stockholders.

We were incorporated in February 2011 and have a limited operating history as a stand-alone entity. Because of our limited operating history, we have limited historical results of operations on which you might otherwise rely for evaluating our business, results of operations and prospects. You should evaluate our business, results of operations and prospects in light of the risks and difficulties we may encounter, including the risk that we will not achieve our investment objective.

Prior to our initial public offering in October 2012, we had not operated as a business development company or qualified to be treated as a RIC, and MC Advisors had not previously managed us or any business development company or RIC. As a result, we have limited operating results under these regulatory frameworks that can demonstrate to you either their effect on our business or our ability to manage our business under these frameworks. We are subject to the business risks and uncertainties associated with recently formed entities of these types, including the risk that we will not achieve our investment objective, or that we will not maintain our qualification to be treated as a RIC, and that the value of your investment could decline substantially.

The 1940 Act and the Code impose numerous constraints on the operations of business development companies and RICs that do not apply to other investment vehicles managed by affiliates of MC Advisors. Business development companies are required, for example, to invest at least 70% of their total assets in qualifying assets, which generally include securities of U.S. private or thinly traded public companies, cash, cash equivalents, U.S. government securities and other high-quality debt instruments that mature in one year or less from the date of investment. Any failure to comply with the requirements imposed on business development companies by the 1940 Act could cause the SEC to bring an enforcement action against us and/or expose us to claims of private litigants. In addition, upon approval of a majority of our stockholders, we may elect to withdraw our status as a business development company. If we decide to withdraw our election, or if we otherwise fail to qualify, or maintain our qualification, as a business development

company, we may be subject to the substantially greater regulation under the 1940 Act as a closed-end investment company. Compliance with such regulations would significantly decrease our operating flexibility, and could significantly increase our costs of doing business. Moreover, qualification for treatment as a RIC requires satisfaction of source-of-income, asset diversification and distribution requirements. None of us, MC Advisors or any of our or their respective affiliates has any experience operating under these constraints, which may hinder our ability to take advantage of attractive investment opportunities and to achieve our investment objective.

We depend upon MC Advisors' senior management for our success, and upon its access to the investment professionals of Monroe Capital and its affiliates.

We do not have any internal management capacity or employees. We depend on the investment expertise, skill and network of business contacts of the senior investment professionals of MC Advisors, who evaluate, negotiate, structure, execute, monitor and service our investments in accordance with the terms of the

TABLE OF CONTENTS

Investment Advisory Agreement. Our success depends to a significant extent on the continued service and coordination of the senior investment professionals of MC Advisors, particularly Messrs. Koenig, Peck, Egan and VanDerMeid. These individuals may have other demands on their time now and in the future, and we cannot assure you that they will continue to be actively involved in our management. Each of these individuals is an employee of MC Management and is not subject to an employment contract. The departure of any of these individuals or competing demands on their time in the future could have a material adverse effect on our ability to achieve our investment objective.

MC Advisors evaluates, negotiates, structures, closes and monitors our investments in accordance with the terms of the Investment Advisory Agreement. We can offer no assurance, however, that MC Advisors' senior investment professionals will continue to provide investment advice to us. If these individuals do not maintain their existing relationships with Monroe Capital and its affiliates and do not develop new relationships with other sources of investment opportunities, we may not be able to grow our investment portfolio or achieve our investment objective. In addition, individuals with whom Monroe Capital's senior investment professionals have relationships are not obligated to provide us with investment opportunities. Therefore, we can offer no assurance that such relationships will generate investment opportunities for us.

MC Advisors, an affiliate of Monroe Capital, provides us with access to Monroe Capital's investment professionals. MC Advisors also depends upon Monroe Capital to obtain access to deal flow generated by the investment professionals of Monroe Capital and its affiliates. The Staffing Agreement provides that MC Management will make available to MC Advisors experienced investment professionals and access to the senior investment personnel of Monroe Capital for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. We are not a party to this Staffing Agreement and cannot assure you that MC Management will fulfill its obligations under the agreement. Furthermore, the Staffing Agreement may be terminated by either party without penalty upon 60 days written notice to the other party. If MC Management fails to perform or terminates the agreement, we cannot assure you that MC Advisors will enforce the Staffing Agreement or that such agreement will not be terminated by either party or that we will continue to have access to the investment professionals of Monroe Capital and its affiliates or their information and deal flow.

The investment committee that oversees our investment activities is provided by MC Advisors under the Investment Advisory Agreement. MC Advisors' investment committee consists of Messrs. Koenig, Peck, Egan and VanDerMeid.

The loss of any member of MC Advisors' investment committee or of other Monroe Capital senior investment professionals would limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition and results of operations.

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors and investment professionals. Any inability of MC Advisors to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon the senior investment professionals of MC Advisors to maintain their relationships with financial institutions, sponsors and investment professionals, and we rely to a significant extent upon these relationships to provide us with potential investment opportunities. If the senior investment professionals of MC Advisors fail to maintain such relationships, or to develop new relationships with other sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the senior investment professionals

We depend upon MC Advisors' senior management for our success, and upon its access to the investment professionals

of MC Advisors have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

Our financial condition and results of operation depend on our ability to manage our business effectively.

Our ability to achieve our investment objective and grow depends on our ability to manage our business. This depends, in turn, on MC Advisors' ability to identify, invest in and monitor companies that meet our investment criteria. The achievement of our investment objectives depends upon MC Advisors' execution of our investment process, its ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. MC Advisors has substantial responsibilities under the Investment Advisory Agreement. The senior origination professionals and other personnel of MC Advisors and

TABLE OF CONTENTS

its affiliates may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

Any failure to manage our growth effectively could have a material adverse effect on our business, financial condition, results of operations and prospects. Our results of operations depend on many factors, including the availability of opportunities for investment, readily accessible short and long-term funding alternatives in the financial markets and economic conditions. Furthermore, if we cannot successfully operate our business or implement our investment policies and strategies, it could negatively impact our ability to pay dividends or other distributions and you may lose all or part of your investment.

There may be conflicts related to obligations that MC Advisors senior investment professionals and members of its investment committee have to other clients.

The senior investment professionals and members of the investment committee of MC Advisors serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of investment funds, accounts or other investment vehicles sponsored or managed by MC Advisors or its affiliates. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in our best interests or in the best interest of our stockholders. For example, Messrs. Koenig, Egan and VanDerMeid have and will continue to have, and Mr. Peck may have, management responsibilities for other investment funds, accounts or other investment vehicles sponsored or managed by affiliates of MC Advisors.

In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our stockholders. MC Advisors seeks to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy.

Affiliates of MC Advisors manage other assets in three closed-end funds, two small business investment companies and seven private funds that also have an investment strategy focused primarily on senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt to lower middle-market companies. None of these funds are registered with the SEC. In addition, although we are currently the only entity managed by MC Advisors, MC Advisors and/or its affiliates may manage other entities in the future with an investment strategy that has the same or similar focus as ours.

Monroe Capital and its affiliates seek to allocate investment opportunities among eligible accounts made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors, including our independent directors. It is the policy of Monroe Capital and its affiliates to base the determinations as to the amount of capital available for investment on such factors as the amount of cash on hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors, or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. In situations where co-investment with other entities sponsored or managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, MC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. MC Advisors will make these determinations based on its policies and procedures which require that such opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods. However, there can be no assurance that we will be able to participate in all investment opportunities that are suitable

Our financial condition and results of operation depend on our ability to manage our business effectively. 31

to us.

MC Advisors or its investment committee may, from time to time, possess material nonpublic information, limiting our investment discretion.

The managing members and the senior origination professionals of MC Advisors and the senior professionals and members of MC Advisors' investment committee may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material nonpublic information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have a material adverse effect on us.

TABLE OF CONTENTS

Our incentive fee structure may create incentives for MC Advisors that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we pay management and incentive fees to MC Advisors. Management fees are based on our total assets (which include assets purchased with borrowed amounts but exclude cash and cash equivalents). As a result, investors in our common stock invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on our total assets, including assets purchased with borrowed amounts but excluding cash and cash equivalents, MC Advisors benefits when we incur debt or otherwise use leverage. This fee structure may encourage MC Advisors to cause us to borrow money to finance additional investments or to maintain leverage when it would otherwise be appropriate to pay off our indebtedness. Under certain circumstances, the use of borrowed money may increase the likelihood of default, which would disfavor our stockholders. Our board of directors is charged with protecting our interests by monitoring how MC Advisors addresses these and other conflicts of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each investment, our independent directors periodically review MC Advisors' services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, MC Advisors or its affiliates may from time to time have interests that differ from those of our stockholders, giving rise to a conflict.

The part of the incentive fee payable to MC Advisors that relates to our net investment income is computed and paid on income that may include interest income that has been accrued but not yet received in cash. This fee structure may be considered to involve a conflict of interest for MC Advisors to the extent that it may encourage MC Advisors to favor debt financings that provide for deferred interest, rather than current cash payments of interest. MC Advisors may have an incentive to invest in PIK interest securities in circumstances where it would not have done so but for the opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because MC Advisors is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued. In addition, the part of the incentive fee payable to MC Advisors that relates to our net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Any net investment income incentive fee would not be subject to repayment.

Our incentive fee may induce MC Advisors to make certain investments, including speculative investments.

MC Advisors receives an incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, MC Advisors may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The Investment Advisory Agreement with MC Advisors and the Administration Agreement with MC Management were not negotiated on an arm's length basis and may not be as favorable to us as if they had been negotiated with an unaffiliated third-party.

MC Advisors or its investment committee may, from time to time, possess material nonpublic information, and may be in a position to trade securities on the basis of such information.

We negotiated the Investment Advisory Agreement and the Administration Agreement with related parties. Consequently, their terms, including fees payable to MC Advisors, may not be as favorable to us as if they had been negotiated with an unaffiliated third-party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights and remedies under these agreements because of our desire to maintain our ongoing relationship with MC Advisors and MC Management. Any such decision, however, would breach our fiduciary obligations to our stockholders.

TABLE OF CONTENTS

Our ability to enter into transactions with our affiliates is restricted, which may limit the scope of investments available to us.

We are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Any person that owns, directly or indirectly, five percent or more of our outstanding voting securities is our affiliate for purposes of the 1940 Act, and we are generally prohibited from buying or selling any security from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits certain joint transactions with certain of our affiliates, which could include investments in the same portfolio company, without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to any person who owns more than 25% of our voting securities or certain of that person's affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC. As a result of these restrictions, we may be prohibited from buying or selling any security (other than any security of which we are the issuer) from or to any portfolio company of a private equity fund managed by MC Advisors or its affiliates without the prior approval of the SEC, which may limit the scope of investment opportunities that would otherwise be available to us.

We may, however, co-invest with MC Advisors and its affiliates' other clients in certain circumstances where doing so is consistent with applicable law and SEC staff interpretations. For example, we may co-invest with such accounts consistent with guidance promulgated by the SEC staff permitting us and such other accounts to purchase interests in a single class of privately placed securities so long as certain conditions are met, including that MC Advisors, acting on our behalf and on behalf of other clients, negotiates no term other than price. We may also co-invest with MC Advisors' affiliates' other clients as otherwise permissible under regulatory guidance, applicable regulations, exemptive relief granted to us by the SEC on October 15, 2014 and MC Advisors' allocation policy, which the investment committee of MC Advisors maintains in writing. Under this allocation policy, a fixed percentage of each opportunity, which may vary based on asset class and from time to time, is offered to us and similar eligible accounts, as periodically determined by MC Advisors and approved by our board of directors, including our independent directors. The allocation policy further provides that allocations among us and these other accounts are generally made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors. It is our policy to base our determinations as to the amount of capital available for investment based on such factors as: the amount of cash on-hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. However, we can offer no assurance that investment opportunities will be allocated to us fairly or equitably in the short-term or over time.

In situations where co-investment with other funds managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer or where the different investments could be expected to result in a conflict between our interests and those of other MC Advisors' clients, MC Advisors must decide which client will proceed with the investment. MC Advisors makes these determinations based on its policies and procedures, which generally require that such opportunities be offered to eligible accounts on an alternating basis that will be fair and equitable over time. Moreover, except in certain circumstances, we are unable to invest in any issuer in which a fund managed by MC Advisors or its affiliates has previously invested. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates.

We may also be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of the majority of the members of our board of directors who are not interested persons and,

Our ability to enter into transactions with our affiliates is restricted, which may limit the scope of investments available

in some cases, prior approval by the SEC. The SEC has interpreted the business development company regulations governing transactions with affiliates to prohibit certain joint transactions between entities that share a common investment adviser.

TABLE OF CONTENTS

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

We compete with a number of specialty and commercial finance companies to make the types of investments that we make in middle-market companies, including business development companies, traditional commercial banks, private investment funds, regional banking institutions, small business investment companies, investment banks and insurance companies. Additionally, with increased competition for investment opportunities, alternative investment vehicles such as hedge funds may seek to invest in areas they have not traditionally invested in or from which they had withdrawn during the economic downturn, including investing in middle-market companies. As a result, competition for investments in lower middle-market companies has intensified, and we expect that trend to continue. Many of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. These characteristics could allow our competitors to consider a wider variety of investments, establish more relationships and offer better pricing and more flexible structuring than we offer. We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we are forced to match our competitors' pricing, terms and structure, however, we may not be able to achieve acceptable returns on our investments or may bear substantial risk of capital loss. A significant part of our competitive advantage stems from the fact that the lower middle-market is underserved by traditional commercial and investment banks, and generally has less access to capital. A significant increase in the number and/or the size of our competitors in this target market could force us to accept less attractive investment terms.

Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a business development company or the source of income, asset diversification and distribution requirements we must satisfy to maintain our RIC status. The competitive pressures we face may have a material adverse effect on our business, financial condition and results of operations. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

We will be subject to corporate-level federal income tax if we are unable to qualify or maintain qualification as a RIC under Subchapter M of the Code.

We have elected to be treated as a RIC under Subchapter M of the Code commencing with our taxable year ended December 31, 2012 and for succeeding tax years; however, no assurance can be given that we will be able to qualify for and maintain RIC status. To qualify as a RIC under the Code and to be relieved of federal taxes on income and gains distributed to our stockholders, we must meet certain requirements, including source-of-income, asset diversification and distribution requirements. The annual distribution requirement applicable to RICs is satisfied if we distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. In addition, we will be subject to a 4% nondeductible federal excise tax to the extent that we do not satisfy certain additional minimum distribution requirements on a calendar year basis. To the extent we use debt financing, we will be subject to certain asset coverage ratio requirements under the 1940 Act and may be subject to financial covenants under loan and credit agreements, each of which could, under certain circumstances, restrict us from making annual distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify and maintain our qualification for the tax benefits available to RICs and, thus, may be subject to corporate-level federal income tax on our entire taxable income without regard to any distributions made by us. To qualify and maintain our qualification as a RIC, we must also meet certain asset

diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments will be in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to qualify as a RIC for any reason and become subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distributions to stockholders and the amount of our distributions and the amount of funds available for new

TABLE OF CONTENTS

investments. Such a failure would have a material adverse effect on us and our stockholders. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

An extended continuation of the disruption in the capital markets and the credit markets could negatively affect our business.

As a business development company, it will be necessary for us to maintain our ability to raise additional capital for investment purposes. Without sufficient access to the capital markets or credit markets, we may be forced to curtail our business operations or we may not be able to pursue new business opportunities. The capital markets and the credit markets have experienced periods of extreme volatility and disruption and, accordingly, there has been and will continue to be uncertainty in the financial markets in general. Ongoing disruptive conditions in the financial industry and the impact of new legislation in response to those conditions could restrict our business operations and could adversely impact our results of operations and financial condition.

We access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. A reduction in the availability of new capital could limit our ability to pursue new business opportunities and grow our business. In addition, we are required to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to qualify for the tax benefits available to RICs. As a result, these earnings will not be available to fund new investments. An inability to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which may have an adverse effect on the value of our securities.

We may need to raise additional capital to grow because we must distribute most of our income.

We may need additional capital to fund new investments and grow our portfolio of investments. We intend to access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. A reduction in the availability of new capital could limit our ability to grow. In addition, we are required to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to maintain our qualification as a RIC. As a result, these earnings are not available to fund new investments. An inability to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which may have an adverse effect on the value of our securities.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as original issue discount, or through contracted PIK interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Original issue discount, which could be significant relative to our overall investment activities, or increases in loan balances as a result of contracted PIK arrangements, will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash.

That part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash, such as original issue discount and PIK interest. If we pay a net investment income incentive fee on interest that has been accrued, but not yet received in cash, it will increase the basis of our investment in that loan, which will reduce the capital gain incentive fee that we would otherwise pay in the future. Nevertheless, if we pay a net investment income incentive fee on interest that has been accrued but not yet received, and if that portfolio company defaults on such a loan, it is possible that accrued interest previously included in the calculation of the incentive fee will become uncollectible.

TABLE OF CONTENTS

Because we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirements applicable to RICs. In such a case, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations and sourcings to meet these distribution requirements. If we are not able to obtain such cash from other sources, we may fail to qualify for the tax benefits available to RICs and thus be subject to corporate-level income tax.

See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

Regulations governing our operation as a business development company affect our ability to and the way in which we raise additional capital.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a business development company to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of total assets less all liabilities and indebtedness not represented by senior securities, immediately after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. In addition, issuance of securities could dilute the percentage ownership of our current stockholders in us.

No person or entity from which we borrow money will have a veto power or a vote in approving or changing any of our fundamental policies. If we issue preferred stock, the preferred stock would rank senior to common stock in our capital structure, preferred stockholders would have separate voting rights on certain matters and might have other rights, preferences or privileges more favorable than those of our common stockholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in your best interest. Holders of our common stock will directly or indirectly bear all of the costs associated with offering and servicing any preferred stock that we issue.

In addition, any interests of preferred stockholders may not necessarily align with the interests of holders of our common stock and the rights of holders of shares of preferred stock to receive dividends would be senior to those of holders of shares of our common stock.

As a business development company, we generally are not able to issue our common stock at a price below net asset value per share without first obtaining the approval of our stockholders and our independent directors. If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, then percentage ownership of our stockholders at that time would decrease, and you might experience dilution. We have stockholder approval to sell our common stock below net asset value through June 24, 2016. We may seek further stockholder approval to sell shares below net asset value in the future.

We maintain a revolving credit facility and may use other borrowed funds to make investments or fund our business operations, which exposes us to risks typically associated with leverage and increases the risk of investing in us.

We maintain a revolving credit facility and may borrow money, including through the issuance of debt securities or preferred stock, to leverage our capital structure, which is generally considered a speculative investment technique. As a result:

Regulations governing our operation as a business development company affect our ability to and the way in which we

our common stock is exposed to an increased risk of loss because a decrease in the value of our investments would have a greater negative impact on the value of our common stock than if we did not use leverage; if we do not appropriately match the assets and liabilities of our business, adverse changes in interest rates could reduce or eliminate the incremental income we make with the proceeds of any leverage;

19

TABLE OF CONTENTS

our ability to pay distributions on our common stock may be restricted if our asset coverage ratio, as provided in the 1940 Act, is not at least 200% and any amounts used to service indebtedness or preferred stock would not be available for such distributions;

any credit facility is subject to periodic renewal by its lenders, whose continued participation cannot be guaranteed; our revolving credit facility with ING Capital LLC, as agent, is, and any other credit facility we may enter into would be, subject to various financial and operating covenants, including that our portfolio of investments satisfies certain eligibility and concentration limits as well as valuation methodologies;

such securities would be governed by an indenture or other instrument containing covenants restricting our operating flexibility;

we bear the cost of issuing and paying interest or distributions on such securities, which costs are entirely borne by our common stockholders; and

any convertible or exchangeable securities that we issue may have rights, preferences and privileges more favorable than those of our common stock.

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on Our Portfolio (Net of Expenses) ⁽¹⁾				
	-10%	-5%	0%	5%	10%
Corresponding return to common stockholder ⁽²⁾	-22.81 %	-13.08 %	-3.35 %	6.38 %	16.11 %

(1) The assumed return on our portfolio is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance.

(2) Assumes \$360.0 million in total assets, \$175.0 million in debt outstanding, \$185.0 million in net assets and an average cost of funds of 3.5%, which was the weighted average interest rate of borrowings on our revolving credit facility and SBA-guaranteed debentures as of March 31, 2016. The interest rate on our revolving credit facility is a variable rate. See Summary Credit Facility.

Pending legislation may allow us to incur additional leverage.

Under the 1940 Act, as a business development company we are generally not permitted to incur indebtedness unless immediately after such borrowing we have an asset coverage for total borrowings of at least 200%. Recent legislation introduced in the U.S. House of Representatives, if passed, would modify this section of the 1940 Act to increase the amount business development companies may borrow by reducing the asset coverage percentage from 200% to 150%. As a result, if this or similar legislation were to pass, we may be able to incur additional indebtedness in the future and therefore risks related to incurring indebtedness may increase.

We are subject to risks associated with our revolving credit facility.

Our revolving credit facility, as amended, imposes certain conditions that may limit the amount of our distributions to stockholders. Distributions payable in our common stock under our dividend reinvestment plan are not limited by the revolving credit facility. Distributions in cash or property other than our common stock are generally limited to 115% of the amount of distributions required to maintain our status as a RIC. We are required under the revolving credit facility to maintain our status as a RIC.

The revolving credit facility requires us to comply with certain financial and operational covenants, including asset and interest coverage ratios, a minimum net worth and minimum number of portfolio investments. For example, the revolving credit facility requires that we maintain an asset coverage ratio of at least 2.10 to 1 at all times and a consolidated interest coverage ratio of at least 2.50 to 1 as of the last day of

TABLE OF CONTENTS

any fiscal quarter. We may divert cash to pay the lenders in amounts sufficient to cause these tests to be satisfied. Our compliance with these covenants depends on many factors, some of which, such as market conditions, are beyond our control.

Our ability to sell our investments is also limited under the revolving credit facility. Under the revolving credit facility, the sale of any portfolio investment may not cause our covered debt amount to exceed our borrowing base. As a result, there may be times or circumstances during which we are unable to sell investments, pay distributions or take other actions that might be in our best interests.

Availability of borrowings under the revolving credit facility is linked to the valuation of the collateral pursuant to a borrowing base mechanism. As such, declines in the fair market value of our investments which are collateral to the revolving credit facility may reduce availability under our revolving credit facility.

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money to make investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we use debt to finance our investments. In periods of rising interest rates, our cost of funds would increase, which could reduce our net investment income. We expect that our long-term fixed-rate investments will be financed primarily with issuances of equity and long-term debt securities. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

You should also be aware that a rise in the general level of interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to MC Advisors.

We are exposed to risks associated with changes in interest rates.

Interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could have an adverse impact on our net investment income while an increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates and increase our interest expense, thereby decreasing our net income. An increase in interest rates available to investors could also make investment in our common stock less attractive unless we are able to increase our dividend rate. In addition, a significant increase in market interest rates could also result in an increase in our non-performing assets and a decrease in the value of our portfolio because our floating-rate loan portfolio companies may be unable to meet higher payment obligations.

MRCC SBIC is subject to SBA regulations.

Under current SBA regulations, a licensed SBIC can invest in entities that have a tangible net worth not exceeding \$19.5 million and an average annual net income after U.S. federal income taxes not exceeding \$6.5 million for the two most recent fiscal years. In addition, a licensed SBIC must invest 25.0% of its capital in those entities that have a tangible net worth not exceeding \$6.0 million and an average annual net income after U.S. federal income taxes not exceeding \$2.0 million for the two most recent fiscal years. The SBA regulations also provide alternative size standard

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net

criteria to determine eligibility, which depend on the industry in which the business is engaged and are based on either the number of employees or the gross sales. The SBA regulations permit licensed SBICs to make long term loans to small businesses, invest in the equity securities of such businesses and provide them with consulting and advisory services. The SBA also places certain limitations on the financing terms of investments by SBICs in portfolio companies and prohibits SBICs from providing funds for certain purposes or to businesses in certain prohibited industries. Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA staff to determine its compliance with the relevant SBA regulations. Compliance with these SBA requirements may cause

TABLE OF CONTENTS

MRCC SBIC to forego attractive investment opportunities that are not permitted under the SBA regulations, and may cause MRCC SBIC to make investments it otherwise would not make in order to remain in compliance with these regulations.

Failure to comply with the SBA regulations could result in the loss of the SBIC license and the resulting inability to participate in the SBA debenture program. The SBA prohibits, without prior SBA approval, a change of control of an SBIC or transfers that would result in any person (or a group of persons acting in concert) owning 10.0% or more of a class of capital stock of a licensed SBIC. Current SBA regulations provide the SBA with certain rights and remedies if an SBIC violates their terms. Remedies for regulatory violations are graduated in severity depending on the seriousness of capital impairment or other regulatory violations. For minor regulatory infractions, the SBA issues a warning. For more serious infractions, the use of SBA debentures may be limited or prohibited, outstanding debentures can be declared to be immediately due and payable, restrictions on distributions and making new investments may be imposed and management fees may be required to be reduced. In severe cases, the SBA may require the removal of a general partner of an SBIC or its officers, directors, managers or partners, or the SBA may obtain appointment of a receiver for the SBIC.

SBA regulations limit the amount that may be borrowed from the SBA by an SBIC.

The SBA regulations currently limit the amount that is available to be borrowed by any SBIC and guaranteed by the SBA to 300.0% of an SBIC's regulatory capital or \$150.0 million, whichever is less. For two or more SBICs under common control (commonly referred to as a family of funds), the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million (prior to December 18, 2015, this limitation was \$225.0 million). As we have other affiliated SBICs in operation, MRCC SBIC was historically limited to a maximum of \$40.0 million in borrowings. Pursuant to the increase in the family of funds limitation, we submitted a commitment application to the SBA and on April 13, 2016 were approved for \$75.0 million in additional SBA debentures for MRCC SBIC. In order for MRCC SBIC to gain access to the entirety of the \$75.0 million in SBA debentures, we would be required to contribute to MRCC SBIC an additional \$37.5 million in leveragable and regulatory capital. If MRCC SBIC borrows the maximum amount from the SBA and thereafter requires additional capital, our cost of capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms.

Moreover, there can be no assurance that MRCC SBIC will continue to receive SBA debenture funding. Receipt of SBA debenture funding depends upon an SBIC's continued compliance with SBA regulations and policies and the availability of funding. The amount of SBA debenture funding available to SBICs depends upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient SBA debenture funding available at the times desired by MRCC SBIC.

The debentures issued by MRCC SBIC to the SBA have a maturity of ten years and bear interest semi-annually at fixed rates. MRCC SBIC will need to generate sufficient cash flow to make required debt payments to the SBA. If MRCC SBIC is unable to generate such cash flow, the SBA, as a debt holder, will have a superior claim to our assets over our stockholders in the event it liquidates or the SBA exercises its remedies under such debentures as the result of a default by MRCC SBIC.

MRCC SBIC, as an SBIC, is limited in its ability to make distributions to us, which could result in us being unable to meet the minimum distribution requirements to maintain our status as a RIC.

In order to maintain our status as a RIC, we are required to distribute to our stockholders on an annual basis 90.0% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses. For this purpose, our taxable income includes the income of MRCC SBIC (and any other entities that are disregarded as separate from us for U.S. federal income tax purposes). MRCC SBIC's ability to make distributions to us may be limited by the Small Business Investment Act of 1958. As a result, in order to maintain our status as a RIC, we may be required to make distributions attributable to MRCC SBIC's income without receiving any corresponding cash distributions from it with respect to such income. We can make no assurances that MRCC SBIC will be able to make, or not be limited in making, distributions to us. If we are unable to satisfy the annual distribution requirements, we may fail to maintain our status as a RIC, which

TABLE OF CONTENTS

would result in the imposition of corporate-level U.S. federal income tax on our entire taxable income without regard to any distributions made by us. See We will be subject to corporate-level U.S. federal income tax if we are unable to qualify or maintain qualification as a RIC under Subchapter M of the Code.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a business development company, which would have a material adverse effect on our business, financial condition and results of operations.

As a business development company, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See Regulation Qualifying Assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could be found to be in violation of the 1940 Act provisions applicable to business development companies and possibly lose our status as a business development company, which would have a material adverse effect on our business, financial condition and results of operations.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.

Under the 1940 Act, we are required to carry our portfolio investments at market value or if there is no readily available market value, at fair value as determined by our board of directors. Many of our portfolio investments may take the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable, and we value these securities at fair value as determined in good faith by our board of directors, including to reflect significant events affecting the value of our securities. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

- a comparison of the portfolio company's securities to publicly traded securities;
- the enterprise value of a portfolio company;
- the nature and realizable value of any collateral;
- the portfolio company's ability to make payments and its earnings and discounted cash flow;
- the markets in which the portfolio company does business; and

changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

We expect that most of our investments (other than cash and cash equivalents) will be classified as Level 3 in the fair value hierarchy and require disclosures about the level of disaggregation along with the inputs and valuation techniques we use to measure fair value. This means that our portfolio valuations are based on unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of fair value of our portfolio investments require significant management judgment or estimation. Even if observable market data is available, such information may be the result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimers materially reduces the reliability of such information. We employ the services of one or more independent service providers to review the valuation of

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a business development

these securities. The types of factors that the board of directors may take into account in determining the fair value of our investments generally include, as appropriate, comparison to publicly traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair

TABLE OF CONTENTS

value may differ materially from the values that would have been used if a ready market for these securities existed. Due to this uncertainty in the value of our portfolio investments, a fair value determination may cause net asset value on a given date to materially understate or overstate the value that we may ultimately realize upon one or more of our investments. As a result, investors purchasing shares of our common stock based on an overstated net asset value would pay a higher price than the value of the investments might warrant. Conversely, investors selling shares during a period in which the net asset value understates the value of investments will receive a lower price for their shares than the value the investment portfolio might warrant.

We adjust quarterly the valuation of our portfolio to reflect the determination of our board of directors of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our consolidated statements of operations as net change in unrealized appreciation (depreciation) on investments.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including our ability or inability to make investments in companies that meet our investment criteria, the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our business strategy.

We and our portfolio companies are subject to regulation at the local, state and federal level. New legislation may be enacted or new interpretations, rulings or regulations could be adopted, including those governing the types of investments we or our portfolio companies are permitted to make, any of which could have a material adverse effect on our business. In particular, on July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, became law. The scope of the Dodd-Frank Act impacts many aspects of the financial services industry, and it requires the development and adoption of many implementing regulations over the next several years.

The effects of the Dodd-Frank Act on the financial services industry will depend, in large part, upon the extent to which regulators exercise the authority granted to them and the approaches taken in implementing regulations. While the impact of the Dodd-Frank Act on us and our portfolio companies may not be known for an extended period of time, the Dodd-Frank Act, including future rules implementing its provisions and the interpretation of those rules, along with other legislative and regulatory proposals directed at the financial services industry or affecting taxation that are proposed or pending in the U.S. Congress, may negatively impact the operations, cash flows or financial condition of us or our portfolio companies, impose additional costs on us or our portfolio companies, intensify the regulatory supervision of us or our portfolio companies or otherwise adversely affect our business or the business of our portfolio companies. In addition, if we do not comply with applicable laws and regulations, we could lose any licenses that we then hold for the conduct of our business and may be subject to civil fines and criminal penalties.

Additionally, changes to the laws and regulations governing our operations, including those associated with RICs, may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities or result in the imposition of corporate-level taxes on us. Such changes could result in material differences to the strategies and plans set forth herein and may shift our investment focus from the areas of expertise of MC Advisors to other types of investments in which MC Advisors may have little or no expertise or experience. Any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment.

TABLE OF CONTENTS

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse.

Our board of directors has the authority, except as otherwise prohibited by the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval. However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a business development company. Under Maryland law, we also cannot be dissolved without prior stockholder approval except by judicial action. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and the price value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

MC Advisors can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

MC Advisors has the right to resign under the Investment Advisory Agreement without penalty at any time upon 60 days written notice to us, whether we have found a replacement or not. If MC Advisors resigns, we may not be able to find a new investment advisor or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by MC Advisors and its affiliates. Even if we were able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

MC Management can resign on 60 days notice from its role as our administrator under the Administration Agreement, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

MC Management has the right to resign under the Administration Agreement without penalty upon 60 days written notice to us, whether we have found a replacement or not. If MC Management resigns, we may not be able to find a new administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and administrative activities is likely to suffer if we are unable to identify and reach an agreement with a service provider or individuals with the expertise possessed by MC Management. Even if we were able to retain a comparable service provider or individuals to perform such services, whether internal or external, their

integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

We are an emerging growth company, and we do not know if such status will make our common stock less attractive to investors.

We currently are, and expect to remain, an emerging growth company, as defined in the Jumpstart Our Business Startups Act, or the JOBS Act, signed into law on April 5, 2012, until the earliest of:

the last day of our fiscal year ending December 31, 2017;

the year in which our total annual gross revenues first exceed \$1.0 billion;

the date on which we have, during the prior three-year period, issued more than \$1.0 billion in non-convertible debt;

and

25

TABLE OF CONTENTS

the last day of a fiscal year in which we (1) have an aggregate worldwide market value of our common stock held by non-affiliates of \$700 million or more, computed at the end of each fiscal year as of the last business day of our most recently completed second fiscal quarter, and (2) have been an Exchange Act reporting company for at least one year (and filed at least one annual report under the Exchange Act).

We currently take advantage of some or all of the reduced regulatory and disclosure requirements permitted by the JOBS Act and, as a result, some investors may consider our common stock less attractive, which could reduce the market value of our common stock. For example, while we are an emerging growth company, we will take advantage of exemption from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that our independent registered public accounting firm provide an attestation report on the effectiveness of our internal control over financial reporting and the extended transition period available to emerging growth companies to comply with new or revised accounting standards until those standards are applicable to private companies. As a result, our consolidated financial statements may not be comparable to the financial statements of issuers who are required to comply with the effective dates for new or revised accounting standards that are applicable to public companies. This may increase the risk that material weaknesses or other deficiencies in our internal control over financial reporting go undetected.

Efforts to comply with the Sarbanes-Oxley Act involve significant expenditures, and non-compliance with the Sarbanes-Oxley Act may adversely affect us and the market price of our common stock.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, and other rules implemented by the SEC.

We are subject to the Sarbanes-Oxley Act, and the related rules and regulations promulgated by the SEC. Under current SEC rules, our management is required to report on its internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act and rules and regulations of the SEC thereunder. We are required to review on an annual basis our internal controls over financial reporting, and on a quarterly and annual basis to evaluate and disclose changes in our internal controls over financial reporting. As a result, we expect to continue to incur associated expenses, which may negatively impact our financial performance and our ability to make distributions. This process also will result in a diversion of our management's time and attention. We cannot be certain as to the timing of completion of our evaluation, testing and remediation actions or the impact of the same on our operations and may not be able to ensure that the process is effective or that the internal controls are or will be effective in a timely manner.

There can be no assurance that our quarterly reviews and annual audits will not identify additional material weaknesses. In the event that we are unable to maintain or achieve compliance with the Sarbanes-Oxley Act and related rules, our value and results of operations may be adversely affected. As a result, we expect to incur significant associated expenses, which may negatively impact our financial performance and our ability to make distributions.

As an emerging growth company, we are following certain permitted corporate governance practices instead of the otherwise applicable SEC and Nasdaq requirements, which may result in less protection than is accorded to investors in a non-emerging growth company.

As an emerging growth company, we are permitted and intend to follow certain permitted corporate governance practices instead of those otherwise required by the SEC and under the listing requirements of the Nasdaq Global Select Market. Following our emerging growth company governance practices as opposed to the requirements that

We are an emerging growth company, and we do not know if such status will make our common stock less attractive

would otherwise apply to a company listed on the Nasdaq Global Select Market may provide less protection to you than what is accorded to investors under the Listing Rules of the Nasdaq Stock Market applicable to non-emerging growth company issuers.

TABLE OF CONTENTS

The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning, could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions.

If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

We may incur lender liability as a result of our lending activities.

In recent years, a number of judicial decisions have upheld the right of borrowers and others to sue lending institutions on the basis of various evolving legal theories, collectively termed lender liability. Generally, lender liability is founded on the premise that a lender has either violated a duty, whether implied or contractual, of good faith and fair dealing owed to the borrower or has assumed a degree of control over the borrower resulting in the creation of a fiduciary duty owed to the borrower or its other creditors or stockholders. We may be subject to allegations of lender liability, which could be time-consuming and expensive to defend and result in significant liability.

We may incur liability as a result of providing managerial assistance to our portfolio companies.

In the course of providing significant managerial assistance to certain portfolio companies, certain of our management and directors may serve as directors on the boards of such companies. To the extent that litigation arises out of investments in these companies, our management and directors may be named as defendants in such litigation, which could result in an expenditure of our funds, through our indemnification of such officers and directors, and the diversion of management time and resources.

We may be subject to claims for rescission or damages in connection with certain sales of shares of our common stock.

On May 9, 2014, the SEC declared effective our shelf registration statement. Between August 13, 2015 and December 9, 2015, we sold 558,146 shares of common stock through our at-the-market (ATM) program at an average purchase price of \$14.86 per share, for gross proceeds of approximately \$8.3 million. During that period, prospective investors were provided with a prospectus supplement containing our audited financial statements as of and for the year ended December 31, 2014 as required by the Securities Act, however, financial information in the base prospectus had not

been updated by post-effective amendment as technically required by an undertaking contained in the registration statement. Because we provided investors with all material information via a prospectus supplement properly filed with the SEC, and sales that were part of the offering were transacted on a securities exchange at market prices, we do not believe that a violation of Section 5 under the Securities Act occurred. However, purchasers of those shares could assert that they have rescission rights or claims for damages. We believe that the likelihood of purchasers asserting and prevailing on such claims is remote, and in the extremely unlikely case of a successful claim, that any estimated damages (calculated net of distributions paid) would be immaterial.

TABLE OF CONTENTS

MC Advisors may not be able to achieve the same or similar returns as those achieved by our senior management and investment teams while they were employed at prior positions.

The track record and achievements of the senior investment professionals of Monroe Capital are not necessarily indicative of future results that will be achieved by MC Advisors. As a result, MC Advisors may not be able to achieve the same or similar returns as those achieved by the senior investment professionals of Monroe Capital.

Risks Related to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may decrease the value of collateral securing some of our loans and the value of our equity investments and could lead to financial losses in our portfolio and a corresponding decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of its loans and foreclosure on its assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. It is possible that we could become subject to a lender liability claim, including as a result of actions taken if we or MC Advisors render significant managerial assistance to the borrower.

Furthermore, if one of our portfolio companies were to file for bankruptcy protection, even though we may have structured our investment as senior secured debt, depending on the facts and circumstances, including the extent to which we or MC Advisors provided managerial assistance to that portfolio company or otherwise exercise control over it, a bankruptcy court might re-characterize our debt as a form of equity and subordinate all or a portion of our claim to claims of other creditors.

Current market conditions have materially and adversely affected debt and equity capital markets in the United States and around the world.

In the past, the global capital markets experienced periods of disruption resulting in increasing spreads between the yields realized on riskier debt securities and those realized on securities perceived as being risk-free and a lack of liquidity in parts of the debt capital markets, significant write-offs in the financial services sector relating to subprime mortgages and the re-pricing of credit risk in the broadly syndicated market. These events, along with the deterioration of the housing market, illiquid market conditions, declining business and consumer confidence and the failure of major financial institutions in the United States, led to a general decline in economic conditions. This economic decline materially and adversely affected the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and to financial firms in particular. If such a period of disruption were to occur in the future, to the extent that we wish to use debt to fund our investments, the debt capital that will be

available to us, if at all, may be at a higher cost, and on terms and conditions that may be less favorable, than what we expect, which could negatively affect our financial performance and results. A prolonged period of market illiquidity may cause us to reduce the volume of loans we originate and/or fund below historical levels and adversely affect the value of our portfolio investments, which could have a material and adverse effect on our business, financial condition, and results of operations. The spread between the yields realized on riskier debt securities and those realized on securities perceived as being risk-free has begun to widen recently. If such spread widening were to continue or if there were further deterioration of market conditions, these events could materially and adversely affect our business.

TABLE OF CONTENTS

Our investments in leveraged portfolio companies may be risky, and you could lose all or part of your investment.

Investment in leveraged companies involves a number of significant risks. Leveraged companies, including lower middle-market companies, in which we invest may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold. Such developments may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees that we may have obtained in connection with our investment. In addition, our junior secured loans are generally subordinated to senior loans. As such, other creditors may rank senior to us in the event of an insolvency.

Our portfolio companies will likely consist primarily of lower middle-market, privately owned companies, which may present a greater risk of loss than loans to larger companies.

Our portfolio consists, and will most likely continue to consist, primarily of loans to lower middle-market, privately owned companies. Compared to larger, publicly traded firms, these companies generally have more limited access to capital and higher funding costs, may be in a weaker financial position and may need more capital to expand, compete and operate their business. In addition, many of these companies may be unable to obtain financing from public capital markets or from traditional sources, such as commercial banks. Accordingly, loans made to these types of borrowers may entail higher risks than loans made to companies that have larger businesses, greater financial resources or are otherwise able to access traditional credit sources on more attractive terms.

Investing in lower middle-market companies involves a number of significant risks, including that lower middle-market companies:

may have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;

are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

typically have more limited access to the capital markets, which may hinder their ability to refinance borrowings; will be unable to refinance or repay at maturity the unamortized loan balance as we structure our loans such that a significant balance remains due at maturity;

generally have less predictable operating results, may be particularly vulnerable to changes in customer preferences or market conditions, depend on one or a limited number of major customers;

may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position; and

generally have less publicly available information about their businesses, operations and financial condition. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and may lose all or part of our investment.

Any of these factors or changes thereto could impair a portfolio company's financial condition, results of operation, cash flow or result in other adverse events, such as bankruptcy, any of which could limit a portfolio company's ability to make scheduled payments on loans from us. This, in turn, may lead to their inability to make payments on outstanding borrowings, which could result in losses in our loan portfolio and a decrease in our net interest income

and book value.

Loans may become nonperforming for a variety of reasons.

A nonperforming loan may require substantial debt work-out negotiations or restructuring that may entail a substantial reduction in the interest rate and/or a substantial write-down of the principal of such loan.

TABLE OF CONTENTS

Because of the unique and customized nature of a loan agreement and the private syndication of a loan, certain loans may not be purchased or sold as easily as publicly traded securities, and, historically, the trading volume in the loan market has been small relative to other markets. Loans may encounter trading delays due to their unique and customized nature, and transfers of interests in loans may require the consent of an agent or borrower.

The lack of liquidity in our investments may adversely affect our business.

All of our assets may be invested in illiquid securities, and a substantial portion of our investments in leveraged companies will be subject to legal and other restrictions on resale or will otherwise be less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments when desired. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded these investments. As a result, we do not expect to achieve liquidity in our investments in the near-term. However, to maintain the election to be regulated as a business development company and qualify as a RIC, we may have to dispose of investments if we do not satisfy one or more of the applicable criteria under the respective regulatory frameworks. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we or MC Advisors have material nonpublic information regarding such portfolio company.

Price declines and illiquidity in the corporate debt markets may adversely affect the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a business development company, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by our board of directors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. We record decreases in the market values or fair values of our investments as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets may result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio may reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse effect on our business, financial condition and results of operations.

Our portfolio companies may prepay loans, which prepayment may reduce stated yields if capital returned cannot be invested in transactions with equal or greater expected yields.

The loans underlying our portfolio may be callable at any time, and many of them can be repaid with no premium to par. It is not clear at this time when or if any loan might be called. Whether a loan is called will depend both on the continued positive performance of the portfolio company and the existence of favorable financing market conditions that allow such company the ability to replace existing financing with less expensive capital. As market conditions change frequently, it is unknown when, and if, this may be possible for each portfolio company. Risks associated with owning loans include the fact that prepayments may occur at any time, sometimes without premium or penalty, and that the exercise of prepayment rights during periods of declining spreads could cause us to reinvest prepayment proceeds in lower-yielding instruments. In the case of some of these loans, having the loan called early may reduce the achievable yield for our company below the stated yield to maturity described elsewhere in this prospectus if the capital returned cannot be invested in transactions with equal or greater expected yields.

Loans may become nonperforming for a variety of reasons.

Our portfolio may be exposed in part to one or more specific industries, which may subject us to a risk of significant loss in a particular investment or investments if there is a downturn in that particular industry.

Our portfolio may be exposed in part to one or more specific industries. A downturn in any particular industry in which we are invested could significantly impact the aggregate returns we realize. As of March 31, 2016, our investments in the healthcare and pharmaceuticals industry represented approximately 14.2% of the fair value of our portfolio and our investments in the non-durable consumer goods industry represented approximately 14.0% of the fair value of our portfolio. If an industry in which we have significant

TABLE OF CONTENTS

investments suffers from adverse business or economic conditions, as these industries have to varying degrees, a material portion of our investment portfolio could be affected adversely, which, in turn, could adversely affect our financial position and results of operations.

To the extent original issue discount and payment-in-kind interest constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments include original issue discount, or OID, components and may include PIK interest components. To the extent original issue discount constitutes a portion of our income, we are exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash, including the following:

We must include in income each year a portion of the OID that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. Because any OID or other amounts accrued will be included in investment company taxable income for the year of the accrual, we may be required to make a distribution to our stockholders in order to satisfy our annual distribution requirements, even though we will not have received any corresponding cash amount. As a result, we may have to sell some of our investments at times or at prices that would not be advantageous to us, raise additional debt or equity capital or forgo new investment opportunities.

The higher yield of OID instruments reflect the payment deferral and credit risk associated with these instruments. Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

OID instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of the collateral.

OID instruments generally represent a significantly higher credit risk than coupon loans.

OID income received by us may create uncertainty about the source of our cash distributions to stockholders. For accounting purposes, any cash distributions to stockholders representing OID or market discount income are not treated as coming from paid-in capital, even though the cash to pay them comes from the offering proceeds. Thus, although a distribution of OID or market discount interest comes from the cash invested by the stockholders, Section 19(a) of the 1940 Act does not require that stockholders be given notice of this fact by reporting it as a return of capital.

The deferral of PIK interest has a negative impact on liquidity, as it represents non-cash income that may require distribution of cash dividends to stockholders in order to maintain our RIC status. In addition, the deferral of PIK interest also increases the loan-to-value (LTV) ratio at a compounding rate, thus, increasing the risk that we will absorb a loss in the event of foreclosure.

OID and market discount instruments create the risk of non-refundable incentive fee payments to MC Advisors based on non-cash accruals that we may not ultimately realize.

We have not yet identified the portfolio company investments we will acquire using the proceeds of an offering.

We have not yet identified potential investments for our portfolio that we may acquire with the proceeds of an offering. Privately negotiated investments in illiquid securities or private middle-market companies require substantial due diligence and structuring, and we cannot assure you that we will achieve our anticipated investment pace. You will be unable to evaluate any future portfolio company investments prior to purchasing our securities. Additionally,

To the extent original issue discount and payment-in-kind interest constitute a portion of our income, we will be exposed

MC Advisors will select our investments subsequent to the closing of an offering, and our stockholders will have no input with respect to such investment decisions. These factors increase the uncertainty, and thus the risk, of investing in our securities.

Pending investment in portfolio companies, we will invest the net proceeds of offerings in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the

TABLE OF CONTENTS

date of investment. We expect these temporary investments to earn yields substantially lower than the income that we expect to receive in respect of investments. As a result, any distributions we make during this period may be substantially smaller than the distributions that we would expect to pay when our portfolio is fully invested.

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we are not limited by the 1940 Act with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. Our portfolio is and may in the future be concentrated in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code, we do not have fixed guidelines for diversification. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. As a result, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

We may hold the debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings.

Leveraged companies may experience bankruptcy or similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by a portfolio company may adversely and permanently affect the portfolio company. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor's return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in seeking to:

increase or maintain in whole or in part our position as a creditor or equity ownership percentage in a portfolio company;

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we are not limited

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or
preserve or enhance the value of our investment.

We have discretion to make follow-on investments, subject to the availability of capital resources and the provisions of the 1940 Act. Failure on our part to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to

TABLE OF CONTENTS

make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our level of risk, because we prefer other opportunities or because we are inhibited by compliance with business development company requirements or the desire to maintain our RIC status. Our ability to make follow-on investments may also be limited by MC Advisors' allocation policy.

Because we do not hold controlling equity interests in the majority of our portfolio companies, we may not be able to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

Although we may do so in the future, we do not currently hold controlling equity positions in the majority of our portfolio companies. Our debt investments may provide limited control features such as restrictions, for example, on the ability of a portfolio company to assume additional debt, or to use the proceeds of our investment for other than certain specified purposes. Control under the 1940 Act is presumed at more than 25% equity ownership, and may also be present at lower ownership levels where we provide managerial assistance. When we do not acquire a controlling equity position in a portfolio company, we may be subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

Defaults by our portfolio companies will harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize such portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

In addition, many of our investments will likely have a principal amount outstanding at maturity, which could result in a substantial loss to us if the borrower is unable to refinance or repay.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We generally seek to invest capital in senior, unitranche and junior secured loans and, to a lesser extent, unsecured subordinated debt and equity. The portfolio companies in which we invest usually have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying senior creditors, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share any distributions on an equal and ratable basis with other

Because we do not hold controlling equity interests in the majority of our portfolio companies, we may not be able to

creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Additionally, certain loans that we make to portfolio companies may be secured on a second-priority basis by the same collateral securing senior secured debt of such companies. The first-priority liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by first-priority liens on the collateral will generally control the liquidation of, and be entitled to receive proceeds from, any realization of the collateral to repay

TABLE OF CONTENTS

their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second-priority liens after payment in full of all obligations secured by the first-priority liens on the collateral. If such proceeds were not sufficient to repay amounts outstanding under the loan obligations secured by the second-priority liens, then, to the extent not repaid from the proceeds of the sale of the collateral, we will only have an unsecured claim against the portfolio company's remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of such senior debt. Under a typical intercreditor agreement, at any time that obligations that have the benefit of the first-priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the first-priority liens:

- the ability to cause the commencement of enforcement proceedings against the collateral;
- the ability to control the conduct of such proceedings;
- the approval of amendments to collateral documents;
- releases of liens on the collateral; and
- waivers of past defaults under collateral documents.

We may not have the ability to control or direct such actions, even if our rights are adversely affected.

We may also make unsecured loans to portfolio companies, meaning that such loans will not benefit from any interest in collateral of such companies. Liens on such portfolio companies' collateral, if any, will secure the portfolio company's obligations under its outstanding secured debt and may secure certain future debt that is permitted to be incurred by the portfolio company under its secured loan agreements. The holders of obligations secured by such liens will generally control the liquidation of, and be entitled to receive proceeds from, any realization of such collateral to repay their obligations in full before us. In addition, the value of such collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of such collateral would be sufficient to satisfy our unsecured loan obligations after payment in full of all secured loan obligations. If such proceeds were not sufficient to repay the outstanding secured loan obligations, then our unsecured claims would rank equally with the unpaid portion of such secured creditors' claims against the portfolio company's remaining assets, if any.

We may also make subordinated investments that rank below other obligations of the obligor in right of payment. Subordinated investments are generally more volatile than secured loans and are subject to greater risk of default than senior obligations as a result of adverse changes in the financial condition of the obligor or in general economic conditions. If we make a subordinated investment in a portfolio company, the portfolio company may be highly leveraged, and its relatively high LTV ratio may create increased risks that its operations might not generate sufficient cash flow to service all of its debt obligations.

Investments in securities of foreign companies, if any, may involve significant risks in addition to the risks inherent in U.S. investments.

We may make investments in securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies, including changes in exchange control regulations, political and social instability, expropriation and imposition of foreign taxes. In addition, any investments that we make that are denominated in a foreign currency will be subject to the risk that the value of a particular

Investments in securities of foreign companies, if any, may involve significant risks in addition to the risks inherent in

currency will change in relation to one or more other currencies. Factors such as trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments may affect currency values. We may employ hedging techniques to minimize these risks, but we cannot assure you that we will, in fact, hedge currency risk, or, that if we do, such strategies will be effective.

TABLE OF CONTENTS

We may be subject to risks associated with syndicated loans.

From time to time, our investments may consist of syndicated loans. Under the documentation for such loans, a financial institution or other entity typically is designated as the administrative agent and/or collateral agent. This agent is granted a lien on any collateral on behalf of the other lenders and distributes payments on the indebtedness as they are received. The agent is the party responsible for administering and enforcing the loan and generally may take actions only in accordance with the instructions of a majority or two-thirds in commitments and/or principal amount of the associated indebtedness. In most cases, we do not expect to hold a sufficient amount of the indebtedness to be able to compel any actions by the agent. Accordingly, we may be precluded from directing such actions unless we act together with other holders of the indebtedness. If we are unable to direct such actions, we cannot assure you that the actions taken will be in our best interests.

There is a risk that a loan agent may become bankrupt or insolvent. Such an event would delay, and possibly impair, any enforcement actions undertaken by holders of the associated indebtedness, including attempts to realize upon the collateral securing the associated indebtedness and/or direct the agent to take actions against the related obligor or the collateral securing the associated indebtedness and actions to realize on proceeds of payments made by obligors that are in the possession or control of any other financial institution. In addition, we may be unable to remove the agent in circumstances in which removal would be in our best interests. Moreover, agented loans typically allow for the agent to resign with certain advance notice.

The disposition of our investments may result in contingent liabilities.

A significant portion of our investments involve private securities. In connection with the disposition of an investment in private securities, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through our return of distributions previously made to us.

We may be subject to additional risks if we engage in hedging transactions and/or invest in foreign securities.

The 1940 Act generally requires that 70% of our investments be in issuers each of whom, in addition to other requirements, is organized under the laws of, and has its principal place of business in, any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands or any other possession of the United States. Our investment strategy does not contemplate a significant number of investments in securities of non-U.S. companies other than Canadian companies. We expect that these investments would focus on the same investments that we intend to make in U.S. middle-market companies and, accordingly, would be complementary to our overall strategy and enhance the diversity of our holdings.

Engaging in either hedging transactions or investing in foreign securities would entail additional risks to our stockholders. We could, for example, use instruments such as interest rate swaps, caps, collars and floors and, if we were to invest in foreign securities, we could use instruments such as forward contracts or currency options and borrow under a credit facility in currencies selected to minimize our foreign currency exposure. In each such case, we generally would seek to hedge against fluctuations of the relative values of our portfolio positions from changes in market interest rates or currency exchange rates. Hedging against a decline in the values of our portfolio positions would not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of the

positions declined. However, such hedging could establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions could also limit the opportunity for gain if the values of the underlying portfolio positions increased. Moreover, it might not be possible to hedge against an exchange rate or interest rate fluctuation that was so generally anticipated that we would not be able to enter into a hedging transaction at an acceptable price. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the U.S. Commodity Futures Trading Commission.

While we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates could result in poorer overall

TABLE OF CONTENTS

investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged could vary. Moreover, for a variety of reasons, we might not seek to establish a perfect correlation between the hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation could prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it might not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities would likely fluctuate as a result of factors not related to currency fluctuations.

We may not realize gains from our equity investments.

We may make investments in the future that include warrants or other equity or equity-related securities. In addition, we may from time to time make non-control, equity co-investments in companies in conjunction with private equity sponsors. Our goal is ultimately to realize gains upon our disposition of such equity interests.

However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience. We also may be unable to realize any value if a portfolio company does not have a liquidity event, such as a sale of the business, recapitalization or public offering, which would allow us to sell the underlying equity interests. We often seek puts or similar rights to give us the right to sell our equity securities back to the portfolio company issuer. We may be unable to exercise these put rights for the consideration provided in our investment documents if the issuer is in financial distress.

Risks Relating to Offerings Pursuant to this Prospectus

Investing in our securities may involve an above-average degree of risk.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and a higher risk of volatility or loss of principal. Our investments in portfolio companies may be highly speculative and aggressive and, therefore, an investment in our securities may not be suitable for someone with lower risk tolerance.

Shares of closed-end investment companies, including business development companies, often trade at a discount to their net asset value.

Shares of closed-end investment companies, including business development companies, may trade at a discount from net asset value. This characteristic of closed-end investment companies and business development companies is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our common stock will trade at, above or below net asset value.

Investors in our equity securities may not receive distributions or our distributions may not grow over time and a portion of our distributions may be a return of capital.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution.

We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be adversely affected by the impact of one or more of the risk factors described in this prospectus. For example, due to the asset coverage test applicable to us under the 1940 Act as a business development company, we may be limited in our ability to make distributions. To the extent that we make distributions to stockholders that include a return of capital, that portion of the distribution essentially constitutes a return of the stockholders' investment. Although such return of capital may not be taxable, such distribution may decrease the investor's basis in our common stock and increase an investor's tax liability for capital gains upon the future sale of the stock.

If we sell common stock at a discount to our net asset value per share, stockholders who do not participate in such sale will experience immediate dilution in an amount that may be material.

The issuance or sale by us of shares of our common stock at a price per share, after offering expenses and commission, that is a discount to net asset value poses a risk of dilution to our stockholders. In particular,

TABLE OF CONTENTS

stockholders who do not purchase additional shares at or below the discounted price in proportion to their current ownership will experience an immediate decrease in net asset value per share (as well as in the aggregate net asset value of their shares if they do not participate at all). These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we experience in our assets, potential earning power and voting interests from such issuance or sale. In addition, such sales may adversely affect the price at which our common stock trades.

We may not be able to pay distributions, our distributions may not grow over time and/or a portion of our distributions may be a return of capital.

We have paid and intend to continue to pay distributions to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to sustain a specified level of cash distributions or make periodic increases in cash distributions. Our ability to pay distributions might be adversely affected by, among other things, the impact of one or more of the risk factors described in this prospectus. In addition, the inability to satisfy the asset coverage test applicable to us as a business development company could limit our ability to pay distributions. All distributions will be paid at the discretion of our board of directors and will depend on our earnings, our financial condition, maintenance of our RIC status, compliance with applicable business development company regulations and such other factors as our board of directors may deem relevant from time to time. We cannot assure you that we will continue to pay distributions to our stockholders.

When we make distributions, we will be required to determine the extent to which such distributions are paid out of current or accumulated earnings and profits. Distributions in excess of current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of an investor's basis in our stock and, assuming that an investor holds our stock as a capital asset, thereafter as a capital gain.

We may choose to pay a portion of our dividends in our own stock, in which case you may be required to pay tax in excess of the cash you receive.

We have adopted a dividend reinvestment plan that provides for reinvestment of our dividends and other distributions on behalf of our stockholders, unless a stockholder elects to receive cash pursuant to such plan. See Dividend Reinvestment Plan. We may distribute taxable dividends that are payable in part in our stock. Taxable stockholders receiving such dividends will be required to include the full amount of the dividend as ordinary income (or as long-term capital gain or qualified dividend income to the extent such distribution is properly reported as such) to the extent of our current and accumulated earnings and profits for federal income tax purposes. The tax rate for ordinary income will vary depending on a stockholder's particular characteristics. For individuals, the top marginal federal ordinary income tax rate is 39.6%. To the extent distributions paid by us to non-corporate stockholders (including individuals) are attributable to dividends from U.S. corporations and certain qualified foreign corporations, such distributions generally will be eligible for a maximum qualified dividend federal tax rate of 20%. However, in this regard, it is anticipated that distributions paid by us will generally not be attributable to such dividends and, therefore, generally will not qualify for the preferential federal tax rate. Distributions of our net capital gains (which is generally our realized net long-term capital gains in excess of realized net short-term capital losses) properly reported by us as capital gain dividends will be taxable to a U.S. stockholder as long-term capital gains currently at a maximum federal tax rate of 20%. See Material U.S. Federal Income Tax Consequences for a more detailed discussion.

As a result of receiving dividends in the form of our common stock, a U.S. stockholder may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to

If we sell common stock at a discount to our net asset value per share, stockholders who do not participate in such sales

the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold federal tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in shares of our common stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of shares of our common stock.

TABLE OF CONTENTS

In addition, as discussed above, our loans may contain a PIK interest provision. The PIK interest, computed at the contractual rate specified in each loan agreement, is added to the principal balance of the loan and recorded as interest income. To avoid the imposition of corporate-level tax, we will need to make sufficient distributions, a portion of which may be paid in shares of our common stock, regardless of whether our recognition of income is accompanied by a corresponding receipt of cash.

Provisions of the Maryland General Corporation Law and our charter and bylaws could deter takeover attempts and have an adverse effect on the price of our common stock.

The Maryland General Corporation Law and our charter and bylaws contain provisions that may discourage, delay or make more difficult a change in control of us or the removal of our directors. See Description of Our Capital Stock Certain Provisions of the Maryland General Corporation Law and Our Charter and Bylaws. We are subject to the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our board of directors has adopted a resolution exempting from the Maryland Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board of directors, including approval by a majority of our independent directors. If the resolution exempting business combinations is repealed or our board of directors does not approve a business combination, the Maryland Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt acquisitions of our stock by any person from the Maryland Control Share Acquisition Act. If we amend our bylaws to subject the acquisition of our stock to the Maryland Control Share Acquisition Act, we would only do so to the extent consistent with the provisions of Section 18(i) of the 1940 Act and related SEC staff guidance.

We have adopted certain measures that may make it difficult for a third-party to obtain control of us, including provisions of our charter classifying our board of directors in three staggered terms and authorizing our board of directors to classify or reclassify shares of our capital stock in one or more classes or series and to cause the issuance of additional shares of our stock. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for our securities may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

significant volatility in the market price and trading volume of securities of business development companies or other companies in our sector, which is not necessarily related to the operating performance of these companies;
changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;
loss of RIC or business development company status;
the ability of MRCC SBIC, or any other SBIC subsidiary we may form, to obtain and maintain an SBIC license;
changes or perceived changes in earnings or variations in operating results;
changes or perceived changes in the value of our portfolio of investments;
changes in accounting guidelines governing valuation of our investments;
any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
departure of MC Advisors key personnel;

Provisions of the Maryland General Corporation Law and our charter and bylaws could deter takeover attempts and

operating performance of companies comparable to us;

TABLE OF CONTENTS

general economic trends and other external factors; and
loss of a major funding source.

We may allocate the net proceeds from our offerings in ways with which you may disagree.

We will have significant flexibility in investing the proceeds of offerings pursuant to this prospectus and may use the proceeds from such offerings in ways with which you may disagree or for purposes other than those contemplated at the time of the offering. We will also pay operating expenses, and may pay other expenses such as due diligence expenses of potential new investments, from net proceeds.

Our stockholders will experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are automatically reinvested in shares of our common stock. As a result, our stockholders that do not participate in our dividend reinvestment plan will experience dilution in their ownership percentage of our common stock over time.

Holders of any preferred stock that we may issue will have the right to elect members of the board of directors and have class voting rights on certain matters.

The 1940 Act requires that holders of shares of preferred stock must be entitled as a class to elect two directors at all times and to elect a majority of the directors if dividends on such preferred stock are in arrears by two years or more, until such arrearage is eliminated. In addition, certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock, including changes in fundamental investment restrictions and conversion to open-end status and, accordingly, preferred stockholders could veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies, might impair our ability to maintain our qualification as a RIC for U.S. federal income tax purposes.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering. In addition, if the subscription price is less than our net asset value per share, then you will experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than the net asset value per share of our common stock, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of a rights offering or what proportion of

the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

These dilutive effects may be exacerbated if we were to conduct multiple subscription rights offerings, particularly if such offerings were to occur over a short period of time. In addition, subscription rights offerings and the prospect of future subscription rights offerings may create downward pressure on the secondary market price of our common stock due to the potential for the issuance of shares at a price below our net asset value, without a corresponding change to our net asset value.

If we issue preferred stock, debt securities or convertible debt securities, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock, debt securities or

TABLE OF CONTENTS

convertible debt would likely cause the net asset value and market value of our common stock to become more volatile. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock or debt securities. Any decline in the net asset value of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of our common stock than if we were not leveraged through the issuance of preferred stock. This decline in net asset value would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios which may be required by the preferred stock, debt securities, convertible debt or units or of a downgrade in the ratings of the preferred stock, debt securities, convertible debt or units or our current investment income might not be sufficient to meet the dividend requirements on the preferred stock or the interest payments on the debt securities. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock, debt securities or convertible debt. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, debt securities, convertible debt or any combination of these securities. Holders of preferred stock, debt securities or convertible debt may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

The trading market or market value of our publicly issued debt securities may fluctuate.

If we issue publicly issued debt securities, they may or may not have an established trading market. We cannot assure you that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

- the time remaining to the maturity of these debt securities;
- the outstanding principal amount of debt securities with terms identical to these debt securities;
- the ratings assigned by national statistical ratings agencies;
- the general economic environment;
- the supply of debt securities trading in the secondary market, if any;
- the redemption or repayment features, if any, of these debt securities;
- the level, direction and volatility of market interest rates generally; and
- market rates of interest higher or lower than rates borne by the debt securities.

You should also be aware that there may be a limited number of buyers when you decide to sell your debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect your return on any debt securities that we may issue.

If your debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if your debt securities

If we issue preferred stock, debt securities or convertible debt securities, thenet asset value and market value of our

are subject to mandatory redemption, we may also be required to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In this circumstance, you may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as your debt securities being redeemed.

TABLE OF CONTENTS

Our credit ratings, if any, may not reflect all risks of an investment in our debt securities or any convertible debt securities.

Our credit ratings, if any, will be an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of any publicly issued debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed herein about the market value of, or trading market for, any publicly issued debt securities.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

As of June 16, 2016 we had 13,008,007 shares of common stock outstanding. Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

The issuance of subscription rights, warrants or convertible debt that are exchangeable for our common stock, will cause your interest in us to be diluted as a result of any such rights, warrants or convertible debt offering.

Stockholders who do not fully exercise rights, warrants or convertible debt issued to them in any offering of subscription rights, warrants or convertible debt to purchase our common stock should expect that they will, at the completion of the offering, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights, warrants or convertible debt. We cannot state precisely the amount of any such dilution in share ownership because we do not know what proportion of the common stock would be purchased as a result of any such offering.

In addition, if the subscription price, warrant price or convertible debt price is less than our net asset value per share of common stock at the time of such offering, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any such decrease in net asset value is not predictable because it is not known at this time what the subscription price, warrant price, convertible debt price or net asset value per share will be on the expiration date of such offering or what proportion of our common stock will be purchased as a result of any such offering. The risk of dilution is greater if there are multiple rights offerings. However, our board of directors will make a good faith determination that any offering of subscription rights, warrants or convertible debt would result in a net benefit to existing stockholders.

TABLE OF CONTENTS

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about us, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions.

Words such as anticipates, expects, intends, plans, believes, seeks, estimates, would, should, variations of these words and similar expressions are intended to identify forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements including:

our inexperience operating a business development company and RIC and the inexperience of MC Advisors managing a business development company and RIC;

- our dependence on key personnel;
- our ability to maintain or develop referral relationships;
- the ability of MC Advisors to identify, invest in and monitor companies that meet our investment criteria;
- our contractual arrangements and relationships with third parties;
- actual and potential conflicts of interest with MC Advisors and its affiliates;
- possession of material nonpublic information;
- potential divergent interests of MC Advisors and our stockholders arising from our incentive fee structure;
- restrictions on affiliate transactions;
- competition for investment opportunities;
- our ability to maintain our qualification as a RIC and as a business development company;
- the impact of a protracted decline in the liquidity of credit markets on our business and portfolio investments;
- the adequacy of our financing sources;
- the timing, form and amount of any payments, dividends or other distributions from our portfolio companies;
- our use of leverage;
- changes in interest rates;
- SBA regulations affecting MRCC SBIC or any other wholly-owned SBIC subsidiary;
- uncertain valuations of our portfolio investments;
- fluctuations in our quarterly operating results;
- our ability to issue securities at a discount to net asset value per share;
- changes in laws or regulations applicable to us; and
- general economic conditions and their impact on the industries in which we invest.

We have based the forward-looking statements included in this prospectus on information available to us on the date of this prospectus. Actual results could differ materially from those anticipated in our forward-looking statements, and future results could differ materially from historical performance. You should

TABLE OF CONTENTS

not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus.

However, we will update this prospectus to reflect any material changes to the information contained herein.

You should understand that, under Sections 27A(b)(2)(B) of the Securities Act and Section 21E(b)(2)(B) of the Exchange Act, the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 do not apply to statements made in connection with any offering of securities pursuant to this prospectus or in periodic reports we file under the Exchange Act.

TABLE OF CONTENTS

USE OF PROCEEDS

Unless otherwise specified in a prospectus supplement, we intend to use all or substantially all of the net proceeds from the sale of our securities to invest in portfolio companies directly in accordance with our investment objective and strategies and for general corporate purposes. We will also pay operating expenses, including management and administrative fees, and may pay other expenses from the net proceeds of any offering of our securities.

We anticipate that we will use substantially all of the net proceeds of an offering for the above purposes within approximately six months after the completion of any offering of our securities, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. It may take more or less time for us to identify, negotiate and enter into investments and fully deploy any proceeds we raise, and we cannot assure you that we will achieve our targeted investment pace.

Until such appropriate investment opportunities can be found, we will invest the net proceeds of any offering of our securities primarily in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. Our ability to achieve our investment objective may be limited to the extent that the net proceeds from an offering, pending full investment, are held in lower yielding interest-bearing deposits or other short-term instruments. See Regulation Temporary Investments for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective.

The prospectus supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

TABLE OF CONTENTS

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock began trading on The Nasdaq Global Market under the ticker symbol MRCC on October 25, 2012. Prior to that date, there was no established trading market for our common stock. Our common stock is now traded on the Nasdaq Global Select Market. Our common stock has historically traded both above and below net asset value (NAV).

The following table sets forth the high and low closing sales prices of our common stock, the closing sales price as a percentage of our NAV and the dividends declared by us for each fiscal quarter since our shares began trading.

	NAV ⁽¹⁾	Closing Sales Price		Premium (Discount) of High Sales Price to NAV ⁽²⁾	Premium (Discount) of Low Sales Price to NAV ⁽²⁾	Declared Distributions ⁽³⁾
		High	Low			
Year ending December 31, 2016

Fourth Quarter ⁽⁹⁾	\$ 14.54	\$ 15.30	\$ 14.59	5.2 %	0.3 %	\$ 0.34 (10)

NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per (1) share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low closing sales price divided by the quarter end NAV.

(3)

Represents the distribution declared in the specified quarter. We have adopted an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, stockholders cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions. See Dividend Reinvestment Plan.

(4) Our management monitors available taxable earnings, including net investment income and realized capital gains, to determine if a tax return of capital may occur for the year. To the extent that our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to our stockholders. The tax character of distributions will be determined at the end of the fiscal year.

(5) NAV calculation is not yet available. The tax character of distributions will be determined at the end of

45

TABLE OF CONTENTS

the fiscal year. However, if the character of such distributions were determined as of March 31, 2016 and 2015, none of the distributions for the three months ended March 31, 2016 and 2015 would have been characterized as a tax return of capital to the Company's stockholders.

(6) There was no return of capital for tax purposes for the year ended December 31, 2015.

(7) There was no return of capital for tax purposes for the year ended December 31, 2014.

(8) Includes a return of capital for tax purposes of approximately \$0.21 per share for the year ended December 31, 2013.

(9) From October 24, 2012 (initial public offering) to December 31, 2012.

(10) Includes a return of capital for tax purposes of approximately \$0.20 per share for the year ended December 31, 2012.

To the extent we have income available, we intend to make quarterly distributions to our stockholders. Our quarterly distributions, if any, are determined by our board of directors. Any distributions to our stockholders are declared out of assets legally available for distribution.

We have elected to be treated as a RIC under the Code, beginning with the taxable year ending December 31, 2012, and intend to qualify annually thereafter. To obtain and maintain RIC tax treatment, we must distribute at least 90% of our net ordinary income and net short-term capital gains in excess of our net long-term capital losses, if any. In order to avoid certain excise taxes imposed on RICs, we currently intend to distribute during each calendar year an amount at least equal to the sum of: (a) 98% of our net ordinary income for such calendar year; (b) 98.2% of our net capital gains in excess of capital losses for the one-year period ending on October 31 of the calendar year; and (c) any net ordinary income and net capital gains for preceding years that were not distributed during such years and on which we previously paid no U.S. federal income tax.

We currently intend to distribute net capital gains (i.e., net long-term capital gains in excess of net short-term capital losses), if any, at least annually out of the assets legally available for such distributions. However, we may decide in the future to retain such capital gains for investment and elect to treat such gains as deemed distributions to you. If this happens, you will be treated for U.S. federal income tax purposes as if you had received an actual distribution of the capital gains that we retain and reinvested the net after tax proceeds in us. In this situation, you would be eligible to claim a tax credit (or, in certain circumstances, a tax refund) equal to your allocable share of the tax we paid on the capital gains deemed distributed to you. See Material U.S. Federal Income Tax Considerations. We cannot assure you that we will achieve results that will permit us to continue to pay any cash distributions, and if we issue senior securities, we will be prohibited from making distributions if doing so would cause us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if such distributions are limited by the terms of any of our borrowings.

Our management monitors available taxable earnings, including net investment income and realized capital gains, to determine if a tax return of capital may occur for the year. To the extent that our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to our stockholders. The tax character of distributions will be determined at the end of the fiscal year. A return of capital distribution is not a distribution from earnings and profits, but is rather a return of the money initially invested and while it may not be currently taxable, it lowers the stockholder's basis in the stock, which may result in higher capital gains when the stockholder's investment in us is ultimately sold.

Unless you elect to receive your dividends in cash, we intend to make such distributions in additional shares of our common stock under our dividend reinvestment plan. Although distributions paid in the form of additional shares of our common stock will generally be subject to U.S. federal, state and local taxes in the same manner as cash distributions, investors participating in our dividend reinvestment plan will not receive any corresponding cash distributions with which to pay any such applicable taxes. If you hold shares of our common stock in the name of a broker or financial intermediary, you should contact such broker or financial intermediary regarding your election to

receive distributions in cash in lieu of shares of our common stock. Any dividends reinvested through the issuance of shares through our dividend reinvestment plan will increase our assets on which the base management fee and the incentive fee are determined and paid to MC Advisors. See Dividend Reinvestment Plan.

TABLE OF CONTENTS**SELECTED CONSOLIDATED FINANCIAL DATA**

The following selected consolidated financial data as of and for the years ended December 31, 2015, 2014, 2013, 2012 and for the period from February 9, 2011 (date of inception) to December 31, 2011 are derived from our consolidated financial statements that have been audited by RSM US LLP, our independent registered public accounting firm. We derived the selected consolidated financial data as of and for the three months ended March 31, 2016 and 2015 from our unaudited interim consolidated financial statements. In the opinion of the Company, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation have been made. Interim results are subject to variation and are not indicative of the results of operations to be expected for a full fiscal year. This consolidated financial data should be read in conjunction with our consolidated financial statements and related notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus.

TABLE OF CONTENTS

- (1) For historical periods prior to October 24, 2012, the Company had no operations and therefore information provided does not include financial results prior to October 24, 2012.
- (2) Includes a return of capital for tax purposes of zero, zero, \$0.21, and \$0.20 for the years ended December 31, 2015, 2014, 2013 and 2012 respectively.
- (3) The weighted average annualized effective yield at period end is based upon the par value of our debt investments and the cost basis of our preferred equity investments.
Reflects the adoption Financial Accounting Standards Board Accounting Standards Update (ASU) 2015-03, *Interest Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs* (ASU 2015-03). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the statements of assets and liabilities as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The Company adopted ASU 2015-03 during the quarter ended March 31, 2016 and the consolidated statement of assets and liabilities for December 31, 2015 was revised to reflect this presentation.

TABLE OF CONTENTS

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our financial statements and related notes thereto. The following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to factors discussed under Risk Factors and Special Note Regarding Forward-Looking Statements appearing elsewhere in the prospectus.

Overview

Monroe Capital Corporation is an externally managed, closed-end, non-diversified management investment company that has elected to be treated as a business development company (BDC) under the 1940 Act. In addition, for tax purposes, we have elected to be treated as a regulated investment company (RIC) under the subchapter M of the Internal Revenue Code of 1986, as amended (the Code). We were incorporated under the Maryland General Corporation Law on February 9, 2011. We are a specialty finance company focused on providing financing solutions primarily to lower middle-market companies in the United States and Canada. We provide customized financing solutions focused primarily on senior secured, junior secured and unitranche (a combination of senior secured and junior secured debt in the same facility) debt and, to a lesser extent, unsecured subordinated debt and equity, including equity co-investments in preferred and common stock, and warrants.

Our shares are currently listed on the NASDAQ Global Select Market under the symbol MRCC .

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, subordinated debt and equity investments. We seek to use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies. Our investments in senior, unitranche, junior secured debt and other investments generally will range between \$2.0 million and \$18.0 million each, although this investment size may vary proportionately with the size of our capital base. As of March 31, 2016, our portfolio included approximately 58.9% senior secured debt, 16.2% unitranche secured debt, 18.8% junior secured debt and 6.1% equity securities, compared to December 31, 2015, when our portfolio consisted of 55.9% senior secured debt, 20.0% unitranche secured debt, 18.6% junior secured debt and 5.5% equity securities. We expect that the companies in which we invest may be leveraged, often as a result of leveraged buy-outs or other recapitalization transactions, and, in certain cases, will not be rated by national ratings agencies. If such companies were rated, we believe that they would typically receive a rating below investment grade (between BB and CCC under the Standard & Poor's system) from the national rating agencies.

While our primary focus is to maximize current income and capital appreciation through debt investments in thinly traded or private U.S. companies, we may invest a portion of the portfolio in opportunistic investments in order to seek to enhance returns to stockholders. Such investments may include investments in high-yield bonds, distressed debt, private equity or securities of public companies that are not thinly traded and securities of middle-market companies located outside of the United States. We expect that these public companies generally will have debt securities that are non-investment grade.

On February 28, 2014, our wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP (MRCC SBIC), a Delaware limited partnership, received a license from the Small Business Administration (SBA) to operate as a Small Business Investment Company (SBIC) under Section 301(c) of the Small Business Investment Act of 1958. MRCC SBIC commenced operations on September 16, 2013. As of March 31, 2016, MRCC SBIC had \$20.0 million in regulatory and leveragable capital and \$40.0 million in SBA-guaranteed debentures outstanding. On April 13, 2016, MRCC SBIC was approved by the SBA for an additional \$75.0 million in SBA-guaranteed debentures. See *SBA Debentures* below for more information.

TABLE OF CONTENTS

Investment income

We generate interest income on the debt investments in portfolio company investments that we originate or acquire. Our debt investments, whether in the form of senior, junior or unitranche secured debt, typically have an initial term of three to seven years and bear interest at a fixed or floating rate. In some instances we receive payments on our debt investment based on scheduled amortization of the outstanding balances. In addition, we receive repayments of some of our debt investments prior to their scheduled maturity date. In some cases, our investments provide for deferred interest of payment-in-kind (PIK) interest. In addition, we may generate revenue in the form of commitment, origination, amendment, structuring or due diligence fees, fees for providing managerial assistance and consulting fees. Loan origination fees, original issue discount and market discount or premium are capitalized, and we accrete or amortize such amounts as interest income. We record prepayment premiums and prepayment gains (losses) on loans as interest income. Interest and dividend income is recorded on the accrual basis to the extent we expect to collect such amounts. In addition, we also generate dividend income on preferred equity securities, common equity securities and LLC interests in accordance with our revenue recognition policies.

Expenses

Our primary operating expenses include the payment of fees to MC Advisors under the Investment Advisory and Management Agreement (management and incentive fees), and the payment of fees to Monroe Capital Management Advisors, LLC (MC Management) for our allocable portion of overhead and other expenses under the Administration Agreement and other operating costs. See Note 6 to our consolidated financial statements and *Related Party Transactions* below for additional information on our Investment Advisory and Management Agreement and Administration agreement. Our expenses also include interest expense on our revolving credit facility, our SBA-guaranteed debentures and our secured borrowings. We bear all other out-of-pocket costs and expenses of our operations and transactions.

Net gain (loss) on investments and secured borrowings

We recognize realized gains or losses on investments based on the difference between the net proceeds from the disposition and the cost basis of the investment or derivative instrument without regard to unrealized gains or losses previously recognized. We record current period changes in fair value of investments and secured borrowings within net change in unrealized appreciation (depreciation) on investments and net change in unrealized (appreciation) depreciation on secured borrowings, respectively, in the consolidated statements of operations.

Portfolio and Investment Activity

During the three months ended March 31, 2016, we invested \$4.9 million in one new portfolio company and \$21.4 million in 13 existing portfolio companies and had \$26.8 million in aggregate amount of sales and principal repayments, resulting in net repayments of \$0.5 million for the period.

During the three months ended March 31, 2015, we invested \$30.5 million in four new portfolio companies and \$5.9 million in five existing portfolio companies and had \$17.7 million in aggregate amount of sales and principal repayments, resulting in net investments of \$18.7 million for the period.

The following table shows the composition of the investment portfolio (in thousands) and associated yield data:

March 31, 2016

Portfolio Asset Quality

MC Advisors portfolio management staff closely monitors all credits, with senior portfolio managers covering agented and more complex investments. MC Advisors segregates our capital markets investments by industry. The MC

Advisors monitoring process and projections developed by Monroe Capital both have daily, weekly, monthly and quarterly components and related reports, each to evaluate performance against historical, budget and underwriting expectations. MC Advisors analysts will monitor performance using standard industry software tools to provide consistent disclosure of performance. MC Advisors also monitors our investment exposure using a proprietary trend analysis tool. When necessary, MC Advisors will update our internal risk ratings, borrowing base criteria and covenant compliance reports.

TABLE OF CONTENTS

As part of the monitoring process, MC Advisors regularly assesses the risk profile of each of our investments and rates each of them based on an internal proprietary system that uses the categories listed below, which we refer to as MC Advisors' investment performance rating. For any investment rated in grades 3, 4 or 5, MC Advisors will increase its monitoring intensity and prepare regular updates for the investment committee, summarizing current operating results and material impending events and suggesting recommended actions. MC Advisors monitors and, when appropriate, changes the investment ratings assigned to each investment in our portfolio. In connection with our valuation process, MC Advisors reviews these investment ratings on a quarterly basis, and our board of directors (the Board) reviews and affirms such ratings. A definition of the rating system follows:

Investment Performance Risk Rating	Summary Description
Grade 1	Includes investments exhibiting the least amount of risk in our portfolio. The issuer is performing above expectations or the issuer's operating trends and risk factors are generally positive.
Grade 2	Includes investments exhibiting an acceptable level of risk that is similar to the risk at the time of origination. The issuer is generally performing as expected or the risk factors are neutral to positive.
Grade 3	Includes investments performing below expectations and indicates that the investment's risk has increased somewhat since origination. The issuer may be out of compliance with debt covenants; however, scheduled loan payments are generally not past due.
Grade 4	Includes an issuer performing materially below expectations and indicates that the issuer's risk has increased materially since origination. In addition to the issuer being generally out of compliance with debt covenants, scheduled loan payments may be past due (but generally not more than six months past due). For grade 4 investments, we intend to increase monitoring of the issuer.
Grade 5	Indicates that the issuer is performing substantially below expectations and the investment risk has substantially increased since origination. Most or all of the debt covenants are out of compliance or payments are substantially delinquent. Investments graded 5 are not anticipated to be repaid in full and we will reduce the fair market value of the loan to the amount we expect to recover.

Our investment performance risk ratings do not constitute any rating of investments by a nationally recognized statistical rating organization or reflect or represent any third-party assessment of any of our investments.

In the event of a delinquency or a decision to rate an investment grade 4 or grade 5, the applicable analyst, in consultation with a member of the investment committee, will develop an action plan. Such a plan may require a meeting with the borrower's management or the lender group to discuss reasons for the default and the steps management is undertaking to address the under-performance, as well as required amendments and waivers that may be required. In the event of a dramatic deterioration of a credit, MC Advisors intends to form a team or engage outside advisors to analyze, evaluate and take further steps to preserve its value in the credit. In this regard, we would expect to explore all options, including in a private equity sponsored investment, assuming certain responsibilities for the private equity sponsor or a formal sale of the business with oversight of the sale process by us. Several of Monroe Capital's professionals are experienced in running work-out transactions and bankruptcies.

TABLE OF CONTENTS

The following table shows the distribution of our investments on the 1 to 5 investment performance rating scale as of March 31, 2016 (dollars in thousands):

Investment Performance Rating	Investments at Fair Value	Percentage of Total Investments
1	\$	%
2	304,963	88.8
3	31,067	9.0
4	7,438	2.2
5		
Total	\$ 343,468	100.0 %

The following table shows the distribution of our investments on the 1 to 5 investment performance rating scale as of December 31, 2015 (dollars in thousands):

Investment Performance Rating	Investments at Fair Value	Percentage of Total Investments
1	\$	%
2	315,358	92.5
3	19,208	5.6
4	6,525	1.9
5		
Total	\$ 341,091	100.0 %

Results of Operations

Operating results were as follows (dollars in thousands):

	Three months ended March 31,	
	2016	2015
Total investment income	\$ 11,539	\$ 8,081
Total expenses	5,752	3,914
Net investment income	5,787	4,167
Net realized gain (loss) on investments	587	
Net change in unrealized appreciation (depreciation) on investments	1,542	(330)
Net change in unrealized (appreciation) depreciation on secured borrowings	28	39
Net increase (decrease) in net assets resulting from operations	\$ 7,944	\$ 3,876

Investment Income

The composition of our investment income was as follows (dollars in thousands):

	Three months ended	
	March 31,	
	2016	2015
Interest income	\$ 8,604	\$ 7,049
Dividend income	1,862	
Fee income	331	567
Prepayment gain (loss)	377	267
Accretion of discounts and amortization of premium	365	198
Total investment income	\$ 11,539	\$ 8,081

54

TABLE OF CONTENTS

The increase in investment income of \$3.5 million during the three months ended March 31, 2016, as compared to the three months ended March 31, 2015, is primarily due to increases in average outstanding loan balances and increases in dividend income.

Operating Expenses

The composition of our operating expenses was as follows (dollars in thousands):

	Three months ended March 31,	
	2016	2015
Interest and other debt financing expenses	\$ 1,691	\$ 1,103
Base management fees	1,500	1,068
Incentive fees	1,740	1,042
Professional fees	207	238
Administrative service fees	328	271
General and administrative expenses	251	157
Directors fees	35	35
Total operating expenses	\$ 5,752	\$ 3,914

The composition of our interest and other debt financing expenses was as follows (dollars in thousands):

	Three months ended March 31,	
	2016	2015
Interest expense revolving credit facility	\$ 1,128	\$ 706
Interest expense SBA debentures	326	162
Amortization of deferred financing costs	182	167
Interest expense secured borrowings	37	56
Other	18	12
Total interest and other debt financing expenses	\$ 1,691	\$ 1,103

The increase in expenses of \$1.8 million during the three months ended March 31, 2016, as compared to the three months ended March 31, 2015, is primarily due to an increase in base management fees due to the growth in invested assets and increased incentive fees resulting from improvement in performance. Increases in interest expense also contributed to the increase in expenses during the three months ended March 31, 2016 as a result of additional borrowings (including SBA-guaranteed debentures) required to support the growth of the portfolio.

Net Realized Gain (Loss) on Investments

During the three months ended March 31, 2016 and 2015, we had sales of investments of \$0.6 million and zero, respectively, resulting in net realized gain (loss) on investments of \$0.6 million and zero of realized gains (losses), respectively.

Net Change in Unrealized Appreciation (Depreciation) on Investments and Secured Borrowings

For the three months ended March 31, 2016 and 2015, our investments had \$1.5 million and (\$0.3) million of net change in unrealized appreciation (depreciation), respectively. For the three months ended March 31, 2016 and 2015, our secured borrowings had \$0.03 million and \$0.04 million of net change in unrealized (appreciation) depreciation, respectively.

Net Increase (Decrease) in Net Assets Resulting from Operations

For the three months ended March 31, 2016 and 2015, the net increase in net assets from operations was \$7.9 million and \$3.9 million, respectively. Based on the weighted average shares of common stock outstanding for the three months ended March 31, 2016 and 2015, our per share net increase in net assets resulting from operations was \$0.61 and \$0.41, respectively. The \$4.1 million increase during the three months

TABLE OF CONTENTS

ended March 31, 2016, as compared to three months ended March 31, 2015, is the result of a \$1.6 million increase in net investment income primarily due to portfolio growth and increases in dividend income and a \$2.5 million increase in net gain (loss) on investments and secured borrowings, primarily due to net unrealized gains on the mark-to-market of our portfolio of investments.

Liquidity and Capital Resources

As of March 31, 2016, we had \$5.8 million in cash, \$14.7 million in cash at MRCC SBIC, \$134.7 million of total debt outstanding on our revolving credit facility and \$40.0 million in outstanding SBA-guaranteed debentures. We had \$25.3 million available for additional borrowings on our revolving credit facility and zero in available SBA-guaranteed debentures. See *Borrowings* below for additional information.

Cash Flows

For the three months ended March 31, 2016 and 2015, we experienced a net increase (decrease) in cash of \$0.5 million and (\$0.8) million, respectively. For the three months ended March 31, 2016, operating activities provided \$0.4 million, primarily as a result of net income from operations, partially offset by net cash outflows for the settlement of open trades. For the three months ended March 31, 2015, we used \$15.1 million in operating activities, primarily as a result of purchases of portfolio investments, partially offset by sales of and principal repayments on portfolio investments. During the three months ended March 31, 2016 and 2015, investing activities utilized \$6.2 million and \$3.7 million, respectively, due to changes in the restricted cash balance at MRCC SBIC. During the three months ended March 31, 2016, we generated \$6.3 million from financing activities primarily net borrowings on our revolving credit facility, partially offset by distributions to stockholders. During the three months ended March 31, 2015, we generated \$18.0 million from financing activities, principally from SBA-guaranteed debenture borrowings, net borrowings on our revolving credit facility and proceeds from shares sold under our ATM program, partially offset by distributions to stockholders.

Capital Resources

As a BDC, we distribute substantially all of our net income to our stockholders and have an ongoing need to raise additional capital for investment purposes. We intend to generate additional cash primarily from future offerings of securities, future borrowings and cash flows from operations, including income earned from investments in our portfolio companies. On both a short-term and long-term basis, our primary use of funds will be to invest in portfolio companies and make cash distributions to our stockholders.

As a BDC, we are generally not permitted to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our Board, including independent directors, determines that such sale is in the best interests of us and our stockholders, and if our stockholders have approved such sales. On June 24, 2015, our stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of one year, subject to certain limitations. As of March 31, 2016 and December 31, 2015, we had 13,008,007 and 13,008,007 shares outstanding, respectively.

On June 24, 2015, our stockholders approved a proposal to authorize us to issue warrants, options or rights to subscribe to, convert to, or purchase our common stock in one or more offerings. This is a standing authorization and does not require annual re-approval by our stockholders.

Stock Issuances: On February 6, 2015, we entered into an ATM securities offering program with MLV & Co. LLC and JMP Securities LLC through which we may sell, by means of ATM offerings from time to time, up to \$50.0 million of our common stock. During the three months ended March 31, 2016, we did not make any sales of our common stock under the ATM program.

Borrowings

Revolving Credit Facility: As of March 31, 2016 and December 31, 2015, we had \$134.7 million and \$123.7 million outstanding, respectively, under our revolving credit facility with ING Capital LLC, as agent, to finance the purchase of our assets. As of March 31, 2016, the maximum amount we were able to borrow

TABLE OF CONTENTS

under the revolving credit facility is \$160.0 million and this maximum borrowing can be increased to \$300.0 million pursuant to an accordion feature (subject to maintaining 200% asset coverage, as defined by the 1940 Act). The maturity date on the facility is December 14, 2020.

The revolving credit facility is secured by a lien on all of our assets, including cash on hand, but excluding the assets of our wholly-owned subsidiary, MRCC SBIC. Our ability to borrow under the revolving credit facility is subject to availability under a defined borrowing base, which varies based on our portfolio characteristics and certain eligibility criteria and concentration limits, as well as required valuation methodologies. We may make draws under the revolving credit facility to make or purchase additional investments through December 2019 and for general working capital purposes until the maturity date of the revolving credit facility. Borrowings under the revolving credit facility bear interest, at our election, at an annual rate of LIBOR (one-month, two-month, three-month or six-month at our discretion based on the term of the borrowing) plus 3.00%, with a further step-down to LIBOR plus 2.75% when net worth exceeds \$225.0 million or at a daily rate equal to 2.00% per annum plus the greater of the prime interest rate, the federal funds rate plus 0.5% or LIBOR plus 1.0%. In addition to the stated interest rate on borrowings under the revolving credit facility, we are required to pay a fee of 0.5% per annum on any unused portion of the revolving credit facility if the unused portion of the facility is less than 65% of the then available maximum borrowing or a fee of 1.0% per annum on any unused portion of the revolving credit facility if the unused portion of the facility is greater than or equal to 65% of the then available maximum borrowing. As of March 31, 2016 and December 31, 2015, all of the outstanding borrowings were accruing at an interest rate of 3.4% and 3.4% (based on one-month LIBOR), respectively. The weighted average interest rate of our revolving credit facility borrowings (excluding debt issuance costs) for the three months ended March 31, 2016 and March 31, 2015 was 3.5% and 3.5%, respectively. The weighted average fee rate on our unused portion of the revolving credit facility for the three months ended March 31, 2016 and March 31, 2015 was 0.5% and 0.5%, respectively.

Our ability to borrow under the revolving credit facility is subject to availability under the borrowing base, which permits us to borrow up to 70% of the fair market value of our portfolio company investments depending on the type of the investment we hold and whether the investment is quoted. Our ability to borrow is also subject to certain concentration limits, and our continued compliance with the representations, warranties and covenants given by us under the facility. The revolving credit facility contains certain financial and restrictive covenants, including, but not limited to, our maintenance of: (1) a minimum consolidated total net assets at least equal to the greater of (a) 40% of the consolidated total assets on the last day of each quarter or (b) \$120.0 million plus 65% of the net proceeds to us from sales of our securities after December 14, 2015; (2) a ratio of total assets (less total liabilities other than indebtedness) to total indebtedness of not less than 2.1 times; and (3) a ratio of earnings before interest and taxes to interest expense of at least 2.5 times. The credit facility also requires us to undertake customary indemnification obligations with respect to ING Capital LLC and other members of the lending group and to reimburse the lenders for expenses associated with entering into the credit facility. The revolving credit facility also has customary provisions regarding events of default, including events of default for nonpayment, change in control transactions at both Monroe Capital Corporation and MC Advisors, failure to comply with financial and negative covenants, and failure to maintain our relationship with MC Advisors. If we incur an event of default under the revolving credit facility and fail to remedy such default under any applicable grace period, if any, then the entire revolving credit facility could become immediately due and payable, which would materially and adversely affect our liquidity, financial condition, results of operations and cash flows.

Our revolving credit facility also imposes certain conditions that may limit the amount of our distributions to stockholders. Distributions payable in our common stock under the DRIP are not limited by the revolving credit facility. Distributions in cash or property other than common stock are generally limited to 115% of the amount of distributions required to maintain our status as a RIC.

SBA Debentures: On February 28, 2014, our wholly-owned subsidiary, MRCC SBIC, received a license from the SBA to operate as a SBIC under Section 301(c) of the Small Business Investment Act of 1958, as amended. MRCC SBIC commenced operations on September 16, 2013.

TABLE OF CONTENTS

The SBIC license allows MRCC SBIC to obtain leverage by issuing SBA-guaranteed debentures, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA-guaranteed debentures are non-recourse, interest only debentures with interest payable semi-annually and have a ten year maturity. The principal amount of SBA-guaranteed debentures is not required to be paid prior to maturity but may be prepaid at any time without penalty. The interest rate of SBA-guaranteed debentures is fixed on a semi-annual basis (pooling date) at a market-driven spread over U.S. Treasury Notes with 10-year maturities. The SBA, as a creditor, has a superior claim to MRCC SBIC's assets over our stockholders in the event we liquidate MRCC SBIC or the SBA exercises its remedies upon an event of default. As of March 31, 2016, MRCC SBIC had \$20.0 million in regulatory capital and leveragable capital and \$40.0 million in SBA-guaranteed debentures outstanding. As of December 31, 2015, MRCC SBIC had \$20.0 million in regulatory and leveragable capital and \$40.0 million in SBA-guaranteed debentures outstanding.

As of March 31, 2016 and December 31, 2015, MRCC SBIC had the following SBA-guaranteed debentures outstanding (dollars in thousands):

Maturity Date	Interest Rate	Amount
September 2024	3.4 %	\$ 12,920
March 2025	3.3 %	14,800
March 2025	2.9 %	7,080
September 2025	3.6 %	5,200
Total		\$ 40,000

SBA regulations currently limit the amount that an individual SBIC may borrow to a maximum of \$150.0 million when it has at least \$75.0 million in regulatory capital, receives a leverage commitment from the SBA and has been through an audit examination by the SBA subsequent to licensing. The SBA also historically limited a related group of SBICs (commonly referred to as a family of funds) to a maximum of \$225.0 million in total borrowings. On December 18, 2015, this family of funds limitation was raised to \$350.0 million in total borrowings. As we have other affiliated SBICs already in operation, MRCC SBIC was historically limited to a maximum of \$40.0 million in borrowings. Pursuant to the increase in the family of funds limitation, we submitted a commitment application to the SBA and on April 13, 2016 were approved for \$75.0 million in additional SBA-guaranteed debentures for MRCC SBIC. In order for MRCC SBIC to gain access to the entirety of the \$75.0 million in SBA-guaranteed debentures, we would be required to contribute to MRCC SBIC an additional \$37.5 million in leveragable and regulatory capital.

Secured Borrowings: Certain partial loan sales do not qualify for sale accounting under ASC Topic 860 Transfers and Servicing (ASC Topic 860) because these sales do not meet the definition of a participating interest, as defined in the guidance, in order for sale treatment to be allowed. Participations or other partial loan sales which do not meet the definition of a participating interest remain as an investment on the accompanying consolidated statements of assets and liabilities and the portion sold is recorded as a secured borrowing in the liabilities section of the consolidated statements of assets and liabilities. For these partial loan sales, the interest earned on the entire loan balance is recorded within interest income and the interest earned by the buyer in the partial loan sale is recorded within interest and other debt financing expenses in the accompanying consolidated statements of operations.

As of March 31, 2016, secured borrowings at fair value totaled \$2.2 million and the fair value of the loans that are associated with these secured borrowings was \$11.4 million. As of December 31, 2015, secured borrowings at fair value totaled \$2.5 million and the fair value of the loans that are associated with these secured borrowings was \$11.8 million. These secured borrowings were created as a result of our completion of partial loan sales of three unitranche loan assets totaling \$10.0 million during the year ended December 31, 2013, that did not meet the definition of a participating interest. As a result, sale treatment was not allowed and these partial loan sales were treated as secured

borrowings. No such partial loan sales occurred during the year ended December 31, 2015 and the three months ended March 31, 2016. During the three months ended March 31, 2016 and 2015, repayments on secured borrowings totaled \$0.2 million and \$0.2 million, respectively. The weighted average interest rate on our secured borrowings was approximately 5.9% and 5.8% as of March 31, 2016 and December 31, 2015, respectively.

TABLE OF CONTENTS

Distribution Policy

Our Board will determine the timing and amount, if any, of our distributions. We intend to pay distributions on a quarterly basis. In order to avoid corporate-level tax on the income we distribute as a RIC, we must distribute to our stockholders at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, on an annual basis out of the assets legally available for such distributions. In addition, we also intend to distribute any realized net capital gains (i.e., realized net long-term capital gains in excess of realized net short-term capital losses) at least annually out of the assets legally available for such distributions. Distributions to stockholders for the three months ended March 31, 2016 totaled \$4.6 million (\$0.35 per share). Distributions to stockholders for the three months ended March 31, 2015 totaled \$3.4 million (\$0.35 per share). The tax character of such distributions is determined at the end of the fiscal year. However, if the character of such distributions were determined as of March 31, 2016 and 2015, no portion of these distributions would have been characterized as a tax return of capital to stockholders.

We have adopted an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, our stockholders cash distributions will be automatically reinvested in additional shares of our common stock unless a stockholder specifically opts out of our dividend reinvestment plan. If a stockholder opts out, that stockholder will receive cash distributions. Although distributions paid in the form of additional shares of our common stock will generally be subject to U.S. federal, state and local taxes in the same manner as cash distributions, stockholders participating in our dividend reinvestment plan will not receive any corresponding cash distributions with which to pay any such applicable taxes.

Related Party Transactions

We have a number of business relationships with affiliated or related parties, including the following:

We have an Investment Advisory and Management Agreement with MC Advisors, an investment advisor registered with the SEC, to manage our day-to-day operating and investing activities. We pay MC Advisors a fee for its services under the Investment Advisory and Management Agreement consisting of two components a base management fee and an incentive fee. See Note 6 to our consolidated financial statements and Significant Accounting Estimates and Critical Accounting Policies *Capital Gains Incentive Fee* for additional information.

We have an Administration Agreement with MC Management to provide us with the office facilities and administrative services necessary to conduct our day-to-day operations. See Note 6 to our consolidated financial statements for additional information.

Theodore L. Koenig, our Chief Executive Officer and Chairman of our Board is also a manager of MC Advisors and the President and Chief Executive Officer of MC Management. Aaron D. Peck, our Chief Financial Officer and Chief Investment Officer, serves as a director on our Board and is also a managing director of MC Management.

We have a license agreement with Monroe Capital LLC, under which Monroe Capital LLC has agreed to grant us a non-exclusive, royalty-free license to use the name Monroe Capital for specified purposes in our business.

In addition, we have adopted a formal code of ethics that governs the conduct of our Advisor s officers, directors and employees. Our officers and directors also remain subject to the duties imposed by both the 1940 Act and Maryland General Corporation Law.

Commitments and Contingencies and Off-Balance Sheet Arrangements

The following table shows our significant contractual payment obligations for repayment as of December 31, 2015 (dollars in thousands):

	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Revolving credit facility	\$ 123,700	\$	\$	\$ 123,700	\$
SBA debentures payable	40,000				40,000
Unfunded commitments ⁽¹⁾	20,703	20,703			
Total contractual obligations ⁽²⁾	\$ 184,403	\$ 20,703	\$	\$ 123,700	\$ 40,000

59

TABLE OF CONTENTS

Unfunded commitments represent all amounts unfunded as of December 31, 2015, consisting of approximately \$12.8 million in underdrawn revolvers, \$1.9 million in capital expenditure loans and \$6.0 million in delayed draw (1) commitments. These amounts may or may not be funded to the borrowing party now or in the future. The unfunded commitments relate to loans with various maturity dates, but we are showing this amount in the less than one year category as this entire amount was eligible for funding to the borrowers as of December 31, 2015.

(2) Total contractual obligations excludes \$2.5 million of secured borrowings. See Liquidity and Capital Resources Borrowings Secured Borrowings.

We may become a party to financial instruments with off-balance sheet risk in the normal course of our business to meet the financial needs of our portfolio companies. These instruments may include commitments to extend credit and involve, to varying degrees, elements of liquidity and credit risk in excess of the amount recognized in the consolidated statements of assets and liabilities.

Commitments and Contingencies

As of March 31, 2016 and December 31, 2015, we had \$20.5 million and \$20.7 million in outstanding commitments to fund investments under the underdrawn revolvers, capital expenditure loans and delayed draw commitments. Additionally, we have entered into certain contracts with other parties that contain a variety of indemnifications. Our maximum exposure under these arrangements is unknown. However, we have not experienced claims or losses pursuant to these contracts and believe the risk of loss related to such indemnifications to be remote.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Market Trends

We have identified the following trends that may affect our business:

Target Market: We believe that small and middle-market companies in the United States with annual revenues between \$10 million and \$2.5 billion represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have generated a significant number of investment opportunities for investment funds managed or advised by Monroe Capital, and we believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements: We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to U.S. middle-market companies (1) is generally more labor intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (2) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market and (3) may also require more extensive ongoing monitoring by the lender.

Demand for Debt Capital: We believe there is a large pool of uninvested private equity capital for middle-market companies. We expect private equity firms will seek to leverage their investments by combining equity capital with senior secured loans and mezzanine debt from other sources, such as us.

Competition from Other Lenders: We believe that many traditional bank lenders, in recent years, de-emphasized their service and product offerings to middle-market businesses in favor of lending to large corporate clients and managing capital market transactions. In addition, many commercial banks face significant balance sheet constraints as they seek to build capital and meet future regulatory capital requirements. These factors may result in opportunities for alternative funding sources to middle-market companies and therefore drive increased new investment opportunities for us. Conversely, there is increased competitive pressure in the business development company and investment company marketplace for senior and subordinated debt which could result in lower yields for increasingly riskier assets.

TABLE OF CONTENTS

Pricing and Deal Structures: We believe that the volatility in global markets over the last several years and current macroeconomic issues such as a weakened U.S. economy has reduced access to, and availability of, debt capital to middle-market companies, causing a reduction in competition and generally more favorable capital structures and deal terms. Recent capital raises in the business development company and investment company marketplace have created increased competition; however, we believe that current market conditions may continue to create favorable opportunities to invest at attractive risk-adjusted returns.

Recent Developments

On April 29, 2016, we amended our revolving credit facility to, among other things, allow us to make additional equity contributions to MRCC SBIC.

On June 1, 2016, the Board declared a quarterly dividend of \$0.35 per share payable on June 30, 2016 to holders of record on June 15, 2016.

Significant Accounting Estimates and Critical Accounting Policies

Revenue Recognition

We record interest income on an accrual basis to the extent that we expect to collect such amounts. For loans and debt securities with contractual PIK interest, we do not accrue PIK interest if the portfolio company valuation indicates that such PIK interest is not collectible. We do not accrue as a receivable interest on loans and debt securities if we have reason to doubt our ability to collect such interest. Loan origination fees, original issue discount and market discount or premium is capitalized, and we then amortize such amounts using the effective interest method as interest income over the life of the investment. Upon the prepayment of a loan or debt security, any unamortized premium or discount or loan origination fees are recorded as interest income. We record prepayment premiums on loans and debt securities as interest income when we receive such amounts.

Dividend income on preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are payable by the portfolio company and are expected to be collected. Dividend income on common equity securities is recorded on the record date for private portfolio companies. Each distribution received from limited liability company (LLC) and limited partnership (LP) investments is evaluated to determine if the distribution should be recorded as dividend income or a return of capital. Generally, we will not record distributions from equity investments in LLCs and LPs as dividend income unless there are sufficient accumulated tax-basis earnings and profits in the LLC or LP prior to the distribution. Distributions that are classified as a return of capital are recorded as a reduction in the cost basis of the investment.

Valuation of Portfolio Investments

As a business development company, we generally invest in illiquid securities including debt and, to a lesser extent, equity securities of middle-market companies. Under procedures established by our Board, we value investments for which market quotations are readily available and within a recent date at such market quotations. We obtain these market values from an independent pricing service or at the mean between the bid and ask prices obtained from at least two brokers or dealers (if available, otherwise by a principal market maker or a primary market dealer). When doing so, we determine whether the quote obtained is sufficient in accordance with generally accepted accounting

principles in the United States (GAAP) to determine the fair value of the security. Debt and equity securities that are not publicly traded or whose market prices are not readily available or whose market prices are not regularly updated are valued at fair value as determined in good faith by our Board. Such determination of fair values may involve subjective judgments and estimates. Investments purchased within 60 days of maturity are valued at cost plus accreted discount, or minus amortized premium, which approximates fair value. With respect to unquoted or thinly-traded securities, our Board, together with our independent valuation firms, values each investment considering, among other measures, discounted cash flow models, comparisons of financial ratios of peer companies that are public and other factors.

Our Board is ultimately and solely responsible for determining the fair value of the portfolio investments that are not publicly traded, whose market prices are not readily available on a quarterly basis in good faith or any other situation where portfolio investments require a fair value determination.

TABLE OF CONTENTS

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, our Board uses the pricing indicated by the external event to corroborate and/or assist us in our valuation. Because we expect that there will not be a readily available market for many of the investments in our portfolio, we expect to value many of our portfolio investments at fair value as determined in good faith by our Board using a documented valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material.

With respect to investments for which market quotations are not readily available, our Board undertakes a multi-step valuation process each quarter, as described below:

the quarterly valuation process begins with each portfolio company or investment being initially evaluated and rated by the investment professionals responsible for the credit monitoring of the portfolio investment;

preliminary valuation conclusions are then documented and discussed with senior management;

our Board engages one or more independent valuation firm(s) to conduct fair value appraisals of material investments for which market quotations are not readily available. These fair value appraisals for material investments are received at least once in every calendar year for each portfolio company investment, but are generally received quarterly;

our audit committee of the Board reviews the preliminary valuations of MC Advisors and of the independent valuation firm(s) and responds and supplements the valuation recommendations to reflect any comments; and our Board discusses these valuations and determines the fair value of each investment in the portfolio in good faith, based on the input of MC Advisors, the independent valuation firm(s) and the audit committee.

Valuation of Secured Borrowings

We have elected the fair value option under ASC Topic 825 *Financial Instruments* (ASC Topic 825) relating to accounting for debt obligations at their fair value for our secured borrowings, which arose due to partial loan sales which did not meet the criteria for sale treatment under ASC Topic 860. Due to the absence of a liquid trading market for these secured borrowings, they are valued by calculating the net present value of the future expected cash flow streams using an appropriate risk-adjusted discount rate model. The discount rate considers projected performance of the related loan investment, applicable market yields and leverage levels, credit quality, prepayment penalties and comparable company analysis. We will consult with an independent valuation firm relative to the fair value of its secured borrowings at least once in every calendar year.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

We measure realized gains or losses by the difference between the net proceeds from the sale and the amortized cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. Net change in unrealized appreciation or depreciation reflects the change in portfolio investment values during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized. We report changes in the fair value of secured borrowings that are measured at fair value as a component of the net change in unrealized (appreciation) depreciation on secured borrowings in the consolidated statements of operations.

Capital Gains Incentive Fee

Pursuant to the terms of the Investment Advisory and Management Agreement with MC Advisors, the incentive fee on capital gains earned on liquidated investments of our portfolio is determined and payable in arrears as of the end of each calendar year (or upon termination of the investment advisory and administrative services agreement). This fee equals 20.0% of our incentive fee capital gains (i.e., our realized capital gains on a cumulative basis from inception, calculated as of the end of the applicable period, net of all realized

TABLE OF CONTENTS

capital losses and unrealized capital depreciation on a cumulative basis), less the aggregate amount of any previously paid capital gains incentive fees. On a quarterly basis, we accrue for the capital gains incentive fee by calculating such fee as if it were due and payable as of the end of such period.

While the Investment Advisory and Management Agreement with MC Advisors neither includes nor contemplates the inclusion of unrealized gains in the calculation of the capital gains incentive fee, pursuant to an interpretation of an American Institute for Certified Public Accountants Technical Practice Aid for investment companies, we include unrealized gains in the calculation of the capital gains incentive fee expense and related accrued capital gains incentive fee. This accrual reflects the incentive fees that would be payable to MC Advisors if our entire portfolio was liquidated at its fair value as of the consolidated statement of asset and liabilities date even though MC Advisors is not entitled to an incentive fee with respect to unrealized gains unless and until such gains are actually realized.

During the three months ended March 31, 2016, we accrued \$0.2 million in capital gains incentive fees. During the three months ended March 31, 2015, we did not accrue any capital gains incentive fees based on the performance of our portfolio.

New Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers* (ASC Topic 606) (ASU 2014-09). The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: Step 1: Identify the contract(s) with a customer. Step 2: Identify the performance obligations in the contract. Step 3: Determine the transaction price. Step 4: Allocate the transaction price to the performance obligations in the contract. Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

ASU 2014-09 also specified the accounting for some costs to obtain or fulfill a contract with a customer. In addition, ASU 2014-09 requires that an entity disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The initial effective date of ASU 2014-09 was for fiscal periods beginning after December 15, 2016.

However, in August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers* (ASC Topic 606): *Deferral of the Effective Date*, which deferred the effective date to fiscal periods beginning after December 15, 2017. Management is currently evaluating the impact these changes will have on our consolidated financial statements and disclosures.

In February 2015, the FASB issued ASU 2015-02, *Consolidation (ASC Topic 810): Amendments to the Consolidation Analysis* (ASU 2015-02). ASU 2015-02 significantly changes the consolidation analysis required under GAAP and ends the deferral granted to investment companies from applying the variable interest entity guidance. ASU 2015-02 is effective for interim and annual reporting periods in fiscal years that begin after December 15, 2015 and early adoption is permitted. We have adopted ASU 2015-02 and the adoption did not have a material impact on our consolidated financial statements and disclosures.

In April 2015, the FASB issued ASU No. 2015-03, *Interest Imputation of Interest* (Subtopic 835-30): *Simplifying the Presentation of Debt Issuance Costs* (ASU 2015-03). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the statements of assets and liabilities as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt

issuance costs are not affected by the amendments in this ASU. ASU 2015-03 is effective for fiscal years that begin after December 15, 2015 and early adoption is permitted. We have adopted ASU 2015-03 and the revised presentation is reflected in our consolidated financial statements for the periods presented.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments *Overall* (Subtopic 825-10): *Recognition and Measurement of Financial Assets and Financial Liabilities* (ASU 2016-01). ASU 2016-01 retains many current requirements for the classification and measurement of financial instruments; however, it significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair

TABLE OF CONTENTS

value. ASU 2016-01 also amends certain disclosure requirements associated with the fair value of financial instruments. This guidance is effective for annual and interim periods beginning after December 15, 2017, and early adoption is not permitted for public business entities. Management is currently evaluating the impact these changes will have on our consolidated financial statements and disclosures.

Quantitative and Qualitative Disclosures about Market Risk

We are subject to financial market risks, including changes in interest rates. The majority of the loans in our portfolio have floating interest rates, and we expect that our loans in the future may also have floating interest rates. These loans are usually based on a floating LIBOR and typically have interest rate re-set provisions that adjust applicable interest rates under such loans to current market rates on a monthly or quarterly basis. The majority of the loans in our current portfolio have interest rate floors which have effectively converted the loans to fixed rate loans in the current interest rate environment. In addition, our credit facility has a floating interest rate provision and we expect that other credit facilities into which we enter in the future may have floating interest rate provisions.

Assuming that the consolidated statement of financial condition as of March 31, 2016 were to remain constant and that we took no actions to alter our existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates.

Change in Interest Rates	Increase (decrease) in interest income (in thousands)	Increase (decrease) in interest expense	Net increase (decrease) in net investment income
Down 25 basis points	\$ (39)	\$ (337)	\$ 298
Up 100 basis points	1,841	1,359	482
Up 200 basis points	4,962	2,729	2,233
Up 300 basis points	8,096	4,100	3,996

Although we believe that this analysis is indicative of our existing sensitivity to interest rate changes, it does not adjust for changes in the credit market, credit quality, the size and composition of the assets in our portfolio and other business developments, including borrowing under the credit facility or other borrowings that could affect net increase in net assets resulting from operations, or net income. Accordingly, we can offer no assurances that actual results would not differ materially from the analysis above.

We may in the future hedge against interest rate fluctuations by using standard hedging instruments such as futures, options and forward contracts to the extent permitted under the 1940 Act and applicable commodities laws. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to the investments in our portfolio with fixed interest rates or interest rate floors.

Senior Securities

Information about our senior securities is shown in the following table as of December 31, 2015 and for the years indicated in the table (dollars in thousands). This annual information has been derived from our audited consolidated financial statements for each respective period, which have been audited by RSM US LLP, our independent registered public accounting firm and are included elsewhere in this prospectus. RSM US LLP's report on the senior securities

table as of December 31, 2015 is attached as an exhibit to the registration statement of which this prospectus is a part.

Class and Year	Total Amount Outstanding Exclusive of Treasury Securities	Asset Coverage per Unit ⁽¹⁾	Involuntary Liquidating Preference per Unit ⁽²⁾	Average Market Value per Unit ⁽³⁾
Revolving Credit Facility				
December 31, 2015	\$ 123,700	\$ 2,512		N/A
December 31, 2014	82,300	2,675		N/A
December 31, 2013	76,000	2,922		N/A

64

TABLE OF CONTENTS

Class and Year	Total Amount Outstanding Exclusive of Treasury Securities	Asset Coverage per Unit ⁽¹⁾	Involuntary Liquidating Preference per Unit ⁽²⁾	Average Market Value per Unit ⁽³⁾
December 31, 2012	55,000	2,521		N/A
Secured borrowings ⁽⁴⁾				
December 31, 2015 ⁽⁵⁾	\$ 2,535	\$ 122,592		N/A
December 31, 2014 ⁽⁶⁾	4,134	53,259		N/A
December 31, 2013 ⁽⁷⁾	7,997	27,772		N/A
December 31, 2012				N/A
Total				
December 31, 2015	\$ 126,235	\$ 2,462		N/A
December 31, 2014	86,434	2,547		N/A
December 31, 2013	83,997	2,644		N/A
December 31, 2012	55,000	2,521		N/A

The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by senior securities (1) representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the Asset Coverage per Unit. On October 2, 2014, we received exemptive relief from the SEC to permit us to exclude the debt of MRCC SBIC guaranteed by the SBA from our 200% asset coverage test under the 1940 Act.

The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer (2) in preference to any security junior to it. The in this column indicates that the SEC expressly does not require this information to be disclosed for certain types of senior securities.

(3) Not applicable, as senior securities are not registered for public trading.

Certain partial loan sales do not qualify for sale accounting under ASC Topic 860 *Transfers and Servicing* (ASC Topic 860) because these sales do not meet the definition of a participating interest, as defined in the guidance, in (4) order for sale treatment to be allowed. Participations or other partial loan sales which do not meet the definition of a participating interest remain as an investment on the accompanying consolidated statements of assets and liabilities and the portion sold is recorded as a secured borrowing in the liabilities section of the consolidated statements of assets and liabilities. Amounts presented in this table represent the par amount outstanding.

(5) The secured borrowings have a weighted averaged stated interest rate of 5.75%, a weighted average years to maturity of 2.0 years and a fair value as of December 31, 2015 of \$2,476.

(6) The secured borrowings have a weighted averaged stated interest rate of 5.45%, a weighted average years to maturity of 3.0 years and a fair value as of December 31, 2014 of \$4,008.

(7) The secured borrowings have a weighted averaged stated interest rate of 4.33%, a weighted average years to maturity of 4.0 years and a fair value as of December 31, 2013 of \$7,943.

TABLE OF CONTENTS

BUSINESS

General

We are an externally managed, closed-end, non-diversified management investment company that has elected to be treated as a business development company under the 1940 Act and has elected to be treated as a RIC for tax purposes under Subchapter M of the Code commencing with our taxable year ended December 31, 2012. We provide customized financing solutions to lower middle-market companies in the United States and Canada focused primarily on senior secured, junior secured and unitranche (a combination of senior secured and junior secured debt in the same facility) debt and, to a lesser extent, unsecured subordinated debt and equity, including equity co-investments in preferred and common stock and warrants.

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, unsecured debt and equity investments. Unitranche debt is an instrument that combines both senior and junior secured debt into one facility. Unitranche debt is often used to finance leveraged buyouts and generally has an interest rate higher than that of typical senior debt, but lower than typical junior debt. Our unitranche loans will also expose us to the risks associated with second lien and subordinated loans to the extent we invest in the last-out tranche. We seek to use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies. We believe that our primary focus on lending to lower middle-market companies offers several advantages as compared to lending to larger companies, including more attractive economics, lower leverage, more comprehensive and restrictive covenants, more expansive events of default, relatively small debt facilities that provide us with enhanced influence over our borrower, direct access to borrower management and improved information flow.

Since the consummation of our initial public offering, we have grown the fair value of our portfolio of investments to approximately \$343.5 million at March 31, 2016. Our portfolio at March 31, 2016 consists of 53 different portfolio companies and holdings include senior secured, junior secured and unitranche debt and equity securities. As of March 31, 2016, we have borrowed \$134.7 million under our revolving credit facility and drawn \$40.0 million in SBA-guaranteed debentures to finance the purchase of our assets.

Our investments in senior, unitranche, junior secured debt and other investments generally will range between \$2.0 million and \$18.0 million each, although this investment size may vary proportionately with the size of our capital base. As of March 31, 2016, our portfolio included approximately 58.9% senior secured debt, 16.2% unitranche secured debt, 18.8% junior secured debt and 6.1% equity securities. We expect that the companies in which we invest may be leveraged, often as a result of leveraged buy-outs or other recapitalization transactions, and, in certain cases, will not be rated by national ratings agencies. If such companies were rated, we believe that they would typically receive a rating below investment grade (between BB and CCC under the Standard & Poor's system) from the national rating agencies.

While our primary focus is to maximize current income and capital appreciation through debt investments in thinly traded or private U.S. companies, we may invest a portion of the portfolio in opportunistic investments in order to seek to enhance returns to stockholders. Such investments may include investments in high-yield bonds, distressed debt, private equity or securities of public companies that are not thinly traded and securities of middle-market companies located outside of the United States. We expect that these public companies generally will have debt securities that are non-investment grade.

Our Advisor

Our investment activities are managed by our investment advisor, MC Advisors. MC Advisors is responsible for sourcing potential investments, conducting research and due diligence on prospective investments and their private equity sponsors, analyzing investment opportunities, structuring our investments and managing our investments and portfolio companies on an ongoing basis. MC Advisors was organized in February 2011 and is a registered investment adviser under the Advisers Act.

Under the Investment Advisory Agreement, we pay MC Advisors a base management fee and an incentive fee for its services. See [Management and Other Agreements](#) [Investment Advisory Agreement](#) [Management Fee](#) for a discussion of the base management fee and incentive fee payable by us to MC Advisors. While not

TABLE OF CONTENTS

expected to review or approve each investment, our independent directors will periodically review MC Advisors services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate.

MC Advisors seeks to capitalize on the significant deal origination, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of Monroe Capital's investment professionals.

The senior management team of Monroe Capital, including Theodore L. Koenig and Aaron D. Peck, provides investment services to MC Advisors pursuant to the Staffing Agreement. Messrs. Koenig and Peck have developed a broad network of contacts within the investment community and average more than 20 years of experience investing in debt and equity securities of lower middle-market companies. In addition, Messrs. Koenig and Peck have extensive experience investing in assets that will constitute our primary focus and have expertise in investing throughout all periods of the current economic cycle. MC Advisors is an affiliate of Monroe Capital and is supported by experienced investment professionals of Monroe Capital under the terms of the Staffing Agreement. Monroe Capital's core team of investment professionals has an established track record in sourcing, underwriting, executing and monitoring transactions. From Monroe Capital's formation in 2004 through March 31, 2016, Monroe Capital's investment professionals invested in over 900 loan and related investments with an aggregate principal value of over \$5.0 billion.

In addition to their roles with Monroe Capital and MC Advisors, Messrs. Koenig and Peck serve as our interested directors. Mr. Koenig has more than 25 years of experience in structuring, negotiating and closing transactions on behalf of asset-backed lenders, commercial finance companies, financial institutions and private equity investors at organizations including Monroe Capital, which Mr. Koenig founded in 2004, and Hilco Capital LP, where he led investments in over 20 companies in the lower middle-market. Mr. Peck has more than 19 years of public company management, leveraged finance and commercial lending experience at organizations, including Deerfield Capital Management LLC, Black Diamond Capital Management LLC and Salomon Smith Barney Inc. See Management Biographical Information Interested Directors.

Messrs. Koenig and Peck are joined on the investment committee of MC Advisors by Michael J. Egan and Jeremy T. VanDerMeid, each of whom is a senior investment professional at Monroe Capital. Mr. Egan has more than 25 years of experience in commercial finance, credit administration and banking at organizations including Hilco Capital, The CIT Group/Business Credit, Inc., The National Community Bank of New Jersey (The Bank of New York) and KeyCorp. Mr. VanDerMeid has more than 15 years of credit and lending experience at organizations including Morgan Stanley Investment Management, Dymas Capital Management Company and Heller Financial. See Management Biographical Information Investment Committee.

About Monroe Capital

Monroe Capital, a Delaware limited liability that was founded in 2004, is a leading lender to middle-market companies. As of March 31, 2016, Monroe Capital had approximately \$3.2 billion in assets under management.

Monroe Capital has maintained a continued lending presence in the lower middle-market throughout the most recent economic downturn. The result is an established lending platform that we believe generates consistent primary and secondary deal flow from a network of proprietary relationships and additional deal flow from a diverse portfolio of over 400 current investments. From Monroe Capital's formation in 2004 through March 31, 2016, Monroe Capital's investment professionals invested in more than 900 loan and related investments with an aggregate principal value of over \$5.0 billion. The senior investment team of Monroe Capital averages more than 20 years of experience and has developed a proven investment and portfolio management process that has performed through multiple market cycles.

In addition, Monroe Capital's investment professionals are supported by administrative and back-office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management.

TABLE OF CONTENTS

Portfolio Composition

Our investments generally range in size from \$2.0 million to \$18.0 million. We may also selectively invest in or purchase larger positions, and we generally expect that the size of our larger positions will increase in proportion to the size of our capital base. Pending such investments, we may reduce debt or invest in cash, cash equivalents, U.S. government securities and other high-quality debt investments with a maturity of one year or less. In the future, we may adjust opportunistically the percentage of our assets held in various types of loans, our principal loan sources and the industries to which we have greatest exposure, based on market conditions, the credit cycle, available financing and our desired risk/return profile. The companies in which we invest may be leveraged, often as a result of leveraged buy-outs or other recapitalization transactions, and, in certain cases, will not be rated by national ratings agencies. If such companies were rated, we believe that they would typically receive a rating below investment grade (between BB and CCC under the Standard & Poor's system) from the national ratings agencies. See *Portfolio Companies* for a description of our current portfolio of investments.

While our primary focus is to maximize current income and capital appreciation through debt investments in thinly traded or private U.S. companies, we may invest a portion of the portfolio in opportunistic investments in order to seek to enhance returns to stockholders. Such investments may include investments in high-yield bonds, distressed debt, private equity or securities of public companies that are not thinly traded and securities of middle-market companies located outside of the United States. We expect that these public companies generally will have debt securities that are non-investment grade.

Market Opportunity

We invest primarily in senior, unitranche and junior secured debt issued to lower middle-market companies in the United States and, to a lesser extent and in accordance with the limitations on foreign investments in the 1940 Act, Canada. We believe that U.S. and Canadian lower middle-market companies comprise a large, growing and fragmented market that offers attractive financing opportunities. In addition, each of the factors set forth below suggests a large number of prospective lending opportunities for lenders, which should allow us to generate substantial investment opportunities and build an attractive portfolio of investments.

Significant Universe of Potential Borrowers. According to the U.S. Census Bureau in its 2012 economic census, the most recent figures published by the U.S. Census Bureau, there were approximately 42,600 companies in the United States with annual revenues between \$50 million and \$2.5 billion, compared with approximately 1,350 companies with revenues greater than \$2.5 billion. In addition, we have substantial relationships with commercial banks across the United States. We will have the opportunity to provide debt financing to their networks of middle-market clients while the banks can maintain their client relationships by providing deposit and cash management services. We believe that these relationships, coupled with an extensive network of financial intermediaries, will generate substantial originations in non-private equity-sponsored investments.

Reduced Competition from Bank Lenders. We believe that many commercial and investment banks have, in recent years, de-emphasized their service and product offerings to middle-market businesses in favor of lending to large corporate clients and managing capital markets transactions. In addition, these lenders may be constrained in their ability to underwrite and hold bank loans for middle-market issuers as they seek to meet existing and future regulatory capital requirements. We believe these factors may result in opportunities for alternative funding sources to middle-market companies and therefore more market opportunities for us.

Robust Demand for Debt Capital. We believe there is a large pool of uninvested private equity capital available to acquire or recapitalize middle-market companies. We expect that private equity firms will be active investors in middle-market companies and that these private equity firms will seek to supplement their investments with senior secured and junior debt and equity co-investments from other sources, such as us. Although not our primary deal source, private equity firms are one of the many origination channels through which we may source our new loan originations.

TABLE OF CONTENTS

Middle-Market Lending Requirements. We believe that several factors render many U.S. financial institutions ill-suited to lend to lower middle-market companies. For example, based on the experience of our management team, lending to lower middle-market companies (a) is generally more labor intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information regarding such companies, (b) requires due diligence and underwriting practices, including greater and more sustained interaction with management and more detailed and tailored financial analysis, consistent with the demands and economic limitations of the middle-market and (c) may also require more extensive ongoing monitoring by the lender. This dynamic is particularly true with respect to non-private equity-sponsored companies because many middle-market focused business development companies and other finance companies rely substantially on private equity-backed companies for deal flow. As a result, middle-market companies, and non-private equity-sponsored and lower middle-market companies in particular, have historically been served by a limited segment of the lending community.

Attractive Deal Structure and Terms. In general, based on the experiences of our management team, we believe that lower middle-market companies have less leverage on their balance sheets than large companies. Due to their smaller size, such companies also typically utilize less complicated financing arrangements, leaving them with simpler capital structures than larger companies. These loans also typically involve a small lending group, or club, which facilitates communication among the group, information flow, heightened oversight and monitoring and direct access to borrowers' management teams as well as opportunities to obtain board seats or board observation rights with borrowers. Club transactions allow lenders in this market to customize covenant and default provisions in loan documents tailored to suit the individual borrowers. We believe this results in a better fit for borrowers, easier monitoring and improved overall performance for these investments. Also, we believe that as a percentage of financing transactions into which they enter, lower middle-market companies generally offer more attractive economics than large companies in terms of interest rate, upfront fees and prepayment penalties.

Market Environment. We believe following the credit crisis, as part of the path of economic recovery, there has been increased competition for new middle-market investments due to some new non-bank finance companies that have entered the market and due to improving financial performance of middle-market companies. However, we believe that the scale and strong market position of Monroe Capital will continue to allow us to find investment opportunities with attractive risk-adjusted returns.

Investment Strategy

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation primarily through investments in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity. We also seek to invest opportunistically in attractively-priced broadly syndicated loans, which should enhance our geographic and industry portfolio diversification and increase our portfolio's liquidity. To achieve our investment objective, we utilize the following investment strategy:

Attractive Current Yield. We believe our sourcing network allows us to enter into transactions with attractive yields and investment structures. Based on current market conditions and our pipeline of new investments, we expect our target directly originated senior and unitranche secured debt will have an average maturity of three to five years and interest rates of 8% to 13%, and we expect our target directly originated junior secured debt and unsecured subordinated debt will have an average maturity of four to seven years and interest rates of 10% to 15%. In addition, based on current market conditions and our pipeline of new investments, we expect that our target debt investments will typically have a variable coupon (with a LIBOR floor) and may include PIK interest (interest that is not received in cash, but added to the principal balance of the loan), and that we will typically receive upfront closing fees of 1% to 4%. We may also receive warrants or other forms of upside equity participation. Our transactions will generally be

secured and supported by a lien on all assets and/or a pledge of company stock in order to provide priority of return and to influence any corporate actions. Although we will target investments with the characteristics described in this paragraph, we cannot assure you that our new investments will have these characteristics and we may enter into investments with different characteristics as the market dictates. For a description of the characteristics of our current investment portfolio, see Management's Discussion and Analysis of Financial Condition and Results of Operations Portfolio and Investment Activity. Until investment opportunities can be found, we may invest

TABLE OF CONTENTS

our undeployed capital in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. See Use of Proceeds.

Sound Portfolio Construction. We strive to exercise discipline in portfolio creation and management and to implement effective governance throughout our business. Monroe Capital has been, and we believe that MC Advisors, which is comprised by substantially the same investment professionals who have operated Monroe Capital, is and will be, conservative in the underwriting and structuring of covenant packages in order to enable early intervention in the event of weak financial performance by a portfolio company. We seek to pursue lending opportunities selectively and to maintain a diversified portfolio. We believe that exercising disciplined portfolio management through continued intensive account monitoring and timely and relevant management reporting allows us to mitigate risks in our debt investments. In addition, we have implemented rigorous governance processes through segregation of duties, documented policies and procedures and independent oversight and review of transactions, which we believe helps us to maintain a low level of non-performing loans. We believe that Monroe Capital's proven process of thorough origination, conservative underwriting, due diligence and structuring, combined with careful account monitoring and diversification, enables it to protect investor capital and we believe MC Advisors follows and will follow the same philosophy and processes in originating, structuring and managing our portfolio investments.

Predictability of Returns. Beyond conservative structuring and protection of capital, we seek a predictable exit from our investments. We seek to invest in situations where there are a number of potential exit options that can result in full repayment or a modest refinance of our investment. We seek to structure the majority of our transactions as secured loans with a covenant package that provides for full or partial repayment upon the completion of asset sales and restructurings. Because we seek to structure these transactions to provide for contractually determined, periodic payments of principal and interest, we are less likely to depend on mergers and acquisition activity or public equity markets to exit our debt investments. As a result, we believe that we can achieve our target returns even in a period when public markets are depressed.

Competitive Strengths

We believe that we represent an attractive investment opportunity for the following reasons:

Deep, Experienced Management Team. We are managed by MC Advisors, which has access through the Staffing Agreement to Monroe Capital's experienced team comprised of approximately 60 professionals, including six senior partners that average more than 20 years of direct lending experience. We are led by our Chairman and Chief Executive Officer, Theodore L. Koenig, and Aaron D. Peck, our Chief Financial Officer and Chief Investment Officer.

This extensive experience includes management of investments with borrowers of varying credit profiles and transactions completed in all phases of the credit cycle. Monroe Capital's senior investment professionals provide us with a difficult-to-replicate sourcing network and a broad range of transactional, financial, managerial and investment skills. This expertise and experience is supported by administrative and back office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management.

From Monroe Capital's formation through March 31, 2016, Monroe Capital's investment professionals invested in more than 900 loan and related investments with an aggregate principal value of over \$5.0 billion.

Differentiated Relationship-Based Sourcing Network. We believe Monroe Capital's senior investment professionals benefit from extensive relationships with commercial banks, private equity firms, financial intermediaries, management teams and turn-around advisors. We believe that this broad sourcing network differentiates us from our competitors and offers us a diversified origination approach that does not rely on a single origination channel and

offers us consistent deal flow throughout in the economic cycle. We also believe that this broad network allows us to originate a substantial number of non-private equity-sponsored investments.

70

TABLE OF CONTENTS

Extensive Institutional Platform for Originating Middle-Market Deal Flow. Monroe Capital's broad network of relationships and significant origination resources enable us to review numerous lending opportunities, permitting us to exercise a high degree of selectivity in terms of loans to which we ultimately commit. Monroe Capital estimates that it reviewed approximately 1,700 investment opportunities during 2015. Monroe Capital's over 900 previously executed transactions, over 400 of which are with current borrowers, offer us another source of deal flow, as these debt investments reach maturity or seek refinancing. As of March 31, 2016, Monroe Capital had a pipeline of over 250 transactions for an aggregate potential deal volume of greater than \$5.0 billion for all funds under management. We are also positioned to benefit from Monroe Capital's established brand name, strong track record in partnering with industry participants and reputation for closing deals on time and as committed. Monroe Capital's senior investment professionals are complemented by extensive experience in capital markets transactions, risk management and portfolio monitoring.

Disciplined, Credit-First Underwriting Process. Monroe Capital has developed a systematic underwriting process that applies a consistent approach to credit review and approval, with a focus on evaluating credit first and then appropriately assessing the risk-reward profile of each loan. MC Advisors' assessment of credit will outweigh pricing and other considerations, as we seek to minimize potential credit losses through effective due diligence, structuring and covenant design. MC Advisors seeks to customize each transaction structure and financial covenant to reflect risks identified through the underwriting and due diligence process. We also seek to actively manage our origination and credit underwriting activities through personal visits and calls on all parties involved with an investment, including the management team, private equity sponsors, if any, or other lenders.

Established Credit Risk Management Framework. We seek to manage our credit risk through a well-defined portfolio strategy and credit policy. In terms of credit monitoring, MC Advisors assigns each loan to a particular portfolio management professional and maintain an internal credit rating analysis for all loans. MC Advisors then employs ongoing review and analysis, together with monthly investment committee meetings to review the status of certain complex and challenging loans and a comprehensive quarterly review of all loan transactions. MC Advisors investment professionals also have significant turnaround and work-out experience, which gives them perspective on the risks and possibilities throughout the entire credit cycle. We believe this careful approach to investment and monitoring enables us to identify problems early and gives us an opportunity to assist borrowers before they face difficult liquidity constraints. By anticipating possible negative contingencies and preparing for them, we believe that we diminish the probability of underperforming assets and loan losses.

Investment Process Overview

We view our investment process as consisting of four distinct phases described below:

Origination. MC Advisors seeks to develop investment opportunities through extensive relationships with regional banks, private equity firms, financial intermediaries, management teams and other turn-around advisors. Monroe Capital has developed this network since its formation in 2004. MC Advisors manages these leads through personal visits and calls by its senior deal professionals. It is these professionals' responsibility to identify specific opportunities, refine opportunities through due diligence regarding the underlying facts and circumstances and utilize innovative thinking and flexible terms to solve the financing issues of prospective clients. Monroe Capital's origination professionals are broadly dispersed throughout North America, with eight offices in the United States and one office in Canada. Certain of Monroe Capital's originators are responsible for covering a specified target market based on geography and others focus on specialized industry verticals. We believe MC Advisors' origination professionals experience is vital to enable us to provide our borrowers with innovative financing solutions. We further believe that their strength and breadth of relationships across a wide range of markets will generate numerous financing

opportunities and enable us to be highly selective in our lending activities. In sourcing new transactions, MC Advisors seeks opportunities to work with borrowers domiciled in the United States and Canada and typically focuses on industries in which Monroe Capital has previous lending experience.

TABLE OF CONTENTS

Due Diligence. For each of our investments, MC Advisors prepares a comprehensive new business presentation, which summarizes the investment opportunity and its due diligence and risk analysis, all from the perspective of strengths, weaknesses, opportunities and threats presented by the opportunity. This presentation assesses the borrower and its management, including products and services offered, market position, sales and marketing capabilities and distribution channels; key contracts, customers and suppliers, meetings with management and facility tours; background checks on key executives; customer calls; and an evaluation of exit strategies. MC Advisors' presentation typically evaluates historical financial performance of the borrower and includes projections, including operating trends, an assessment of the quality of financial information, capitalization and liquidity measures and debt service capacity. The financial analysis also includes sensitivity analysis against management projections and an analysis of potential downside scenarios, particularly for cyclical businesses. MC Advisors seeks to also review the dynamics of the borrower's industry and assess the maturity, market size, competition, technology and regulatory issues confronted by the industry. Finally MC Advisors' new business presentation includes all relevant third-party reports and assessments, including, as applicable, analyses of the quality of earnings of the prospective borrower, a review of the business by industry experts and third-party valuations. In general, these analyses and reviews are more likely to be completed in agented or club deals in which MC Advisors will have greater access to the borrower and its management team. MC Advisors also includes in this due diligence, if relevant, field exams, collateral appraisals and environmental reviews, as well as a review of comparable private and public transactions.

Underwriting. MC Advisors uses the systematic, consistent approach to credit evaluation developed in house by Monroe Capital with a particular focus on determining the value of a business in a downside scenario. In this process, the senior investment professionals at MC Advisors bring to bear extensive lending experience with emphasis on lessons learned from the past two credit cycles. We believe that the extensive credit and debt work-out experience of Monroe Capital's senior management enables us to anticipate problems and minimize risks. Monroe Capital's underwriting professionals work closely with its origination professionals to identify individual deal strengths, risks and any risk mitigants. MC Advisors preliminarily screens transactions based on cash flow, enterprise value and asset-based characteristics, and each of these measures is developed on a proprietary basis using thorough credit analysis focused on sustainability and predictability of cash flow to support enterprise value, barriers to entry, market position, competition, customer and supplier relationships, management strength, private equity sponsor track record and industry dynamics. For asset-based transactions, MC Advisors seeks to understand current and future collateral value, opening availability and ongoing liquidity. MC Advisors documents this analysis through a new business presentation thoroughly reviewed by at least one member of its investment committee prior to proposing a formal term sheet. We believe this early involvement of the investment committee ensures that our resources and those of third parties are deployed appropriately and efficiently during the investment process and lowers execution risk for our clients. With respect to transactions reviewed by MC Advisors, we expect that only approximately 10% of our sourced deals will reach the formal term sheet stage.

Credit Approval/Investment Committee Review. MC Advisors employs a standardized, structured process developed by Monroe Capital when evaluating and underwriting new investments for our portfolio. MC Advisors' investment committee considers its comprehensive new business presentation to approve or decline each investment. This committee includes Messrs. Koenig, Peck, Egan and VanDerMeid. The committee is committed to providing a prompt turnaround on investment decisions. Each meeting to approve an investment requires a quorum of at least three members of the investment committee, and each investment must receive unanimous approval by such members of the investment committee.

TABLE OF CONTENTS

The following chart illustrates the stages of MC Advisors' evaluation process:

Execution. We believe Monroe Capital has developed a strong reputation for closing deals as proposed, and we intend to continue this tradition. Through MC Advisors' consistent approach to credit evaluation and underwriting, we seek to close deals as fast or faster than competitive financing providers while maintaining the discipline with respect to credit, pricing and structure necessary to ensure the ultimate success of the financing. Upon completion of final documentation, a loan will typically be funded upon the initialing of the new business presentation and closing memo by our appropriate senior officers and confirmation of the flow of funds and wire transfer mechanics.

Monitoring. We benefit from the portfolio management system already in place at Monroe Capital. This monitoring includes meetings on at least a monthly basis between the responsible analyst and our portfolio company to discuss market activity and current events. MC Advisors' portfolio management staff closely monitors all credits, with senior portfolio managers covering agented and more complex investments. MC Advisors' segregates our capital markets investments by industry. MC Advisors' monitoring process and projections developed by Monroe Capital both have daily, weekly, monthly and quarterly components and related reports, each to evaluate performance against historical, budget and underwriting expectations. MC Advisors' analysts monitor performance using standard industry software tools to provide consistent disclosure of performance. MC Advisors also monitors our investment exposure daily using a proprietary trend analysis tool. When necessary, MC Advisors updates our internal risk ratings, borrowing base criteria and covenant compliance reports.

As part of the monitoring process, MC Advisors regularly assesses the risk profile of each of our investments and rates each of them based on an internal proprietary system that uses the following categories, which we refer to as MC Advisors' investment performance rating. For any investment rated in grades 3, 4 or 5, MC Advisors will increase its monitoring intensity and prepare regular updates for the investment committee, summarizing current operating results and material impending events and suggesting recommended actions. MC Advisors monitors and, when appropriate, changes the investment ratings assigned to each

TABLE OF CONTENTS

investment in our portfolio. In connection with our valuation process, MC Advisors reviews these investment ratings on a quarterly basis, and our board of directors reviews and affirms such ratings. A definition of the rating system follows:

Investment Performance Rating	Summary Description
Grade 1	Includes investments exhibiting the least amount of risk in our portfolio. The issuer is performing above expectations or the issuer's operating trends and risk factors are generally positive.
Grade 2	Includes investments exhibiting an acceptable level of risk that is similar to the risk at the time of origination. The issuer is generally performing as expected or the risk factors are neutral to positive.
Grade 3	Includes investments performing below expectations and indicates that the investment's risk has increased somewhat since origination. The issuer may be out of compliance with debt covenants; however, scheduled loan payments are generally not past due.
Grade 4	Includes an issuer performing materially below expectations and indicates that the issuer's risk has increased materially since origination. In addition to the issuer being generally out of compliance with debt covenants, scheduled loan payments may be past due (but generally not more than six months past due). For grade 4 investments, we intend to increase monitoring of the issuer.
Grade 5	Indicates that the issuer is performing substantially below expectations and the investment risk has substantially increased since origination. Most or all of the debt covenants are out of compliance or payments are substantially delinquent. Investments graded 5 are not anticipated to be repaid in full, and we will reduce the fair market value of the loan to the amount we expect to recover.

Our investment performance ratings do not constitute any ratings of investments by a nationally recognized statistical rating organization or represent or reflect any third-party assessment of any of our investments.

In the event of a delinquency or a decision to rate a loan grade 4 or grade 5, the applicable analyst, in consultation with a member of the investment committee, develops an action plan. Such a plan may require a meeting with the borrower's management or the lender group to discuss reasons for the default and the steps management is undertaking to address the under-performance, as well as required amendments and waivers that may be required. In the event of a dramatic deterioration of a credit, MC Advisors forms a team or engages outside advisors to analyze, evaluate and take further steps to preserve its value in the credit. In this regard, we would expect to explore all options, including in a private equity sponsored investment, assuming certain responsibilities for the private equity sponsor or a formal sale of the business with oversight of the sale process by us. Several of Monroe Capital's professionals are experienced in running debt work-out transactions and bankruptcies.

The following table shows the distribution of our investments on the 1 to 5 investment performance rating scale at fair value:

Investment Performance Rating	As of March 31, 2016		As of December 31, 2015	
	Investments at	Percentage of Total	Investments at	Percentage of Total

Edgar Filing: MONROE CAPITAL Corp - Form POS 8C

TABLE OF CONTENTS

Investment Structure

We structure our investments, which typically have maturities of three to seven years, as follows:

Senior Secured Loans. We structure senior secured loans to obtain security interests in the assets of the portfolio company borrowers that serve as collateral in support of the repayment of such loans. This collateral may take the form of first-priority liens on the assets of the portfolio company borrower. Our senior secured loans may provide for moderate loan amortization in the early years of the loan, with the majority of the amortization deferred until loan maturity.

Unitranche Loans. We structure our unitranche loans as senior secured loans. We obtain security interests in the assets of these portfolio companies that serve as collateral in support of the repayment of these loans. This collateral may take the form of first-priority liens on the assets of a portfolio company. Unitranche structures combine characteristics of traditional first lien senior secured as well as second lien and subordinated loans and our unitranche loans will expose us to the risks associated with second lien and subordinated loans to the extent we invest in the last-out tranche. Unitranche loans typically provide for moderate loan amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity. Unitranche loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. In many cases we, together with our affiliates, are the sole or majority lender of our unitranche loans, which can afford us additional influence with a borrower in terms of monitoring and, if necessary, remediation in the event of underperformance.

Junior Secured Loans. We structure junior secured loans to obtain a security interest in the assets of these portfolio companies that serves as collateral in support of the repayment of such loans. This collateral may take the form of second priority liens on the assets of a portfolio company. These loans typically provide for moderate loan amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity.

Preferred Equity. We generally structure preferred equity investments to combine features of equity and debt. We may obtain a security interest in the assets of these portfolio companies that serves as collateral in support of the repayment of such preferred equity, which takes a priority to common shareholders. Preferred equity interests generally have a stated dividend rate and may not have a fixed maturity date.

Warrants and Equity Co-Investment Securities. In some cases, we may also receive nominally priced warrants or options to buy a minority equity interest in the portfolio company in connection with a loan. As a result, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put, or right to sell such securities back to the issuer, upon the occurrence of specified events. In other cases, we may make a minority equity co-investment in the portfolio company in connection with a loan.

We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its operating results. We seek to limit the downside potential of our investments by:

selecting investments that we believe have a very low probability of loss; requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk; and

negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances.

75

TABLE OF CONTENTS

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Competition

We compete with a number of specialty and commercial finance companies to make the types of investments that we make in middle-market companies, including business development companies, traditional commercial banks, private investment funds, regional banking institutions, small business investment companies, investment banks and insurance companies. Additionally, with increased competition for investment opportunities, alternative investment vehicles such as hedge funds may invest in areas they have not traditionally invested in or from which they had withdrawn during the recent economic downturn, including investing in middle-market companies. As a result, competition for investments in lower middle-market companies has intensified, and we expect that trend to continue. Many of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us.

We use the expertise of the investment professionals of MC Advisors to assess investment risks and determine appropriate pricing and terms for investments in our loan portfolio. In addition, we expect that the relationships of the senior professionals of MC Advisors will enable us to learn about, and compete effectively for, investment opportunities with attractive middle-market companies, independently or in conjunction with the private equity clients of MC Advisors. For additional information concerning the competitive risks we face, see Risk Factors Risks Relating to Our Business and Structure We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

Information Technology

We utilize a number of industry standard practices and software packages to secure, protect, manage and back up all corporate data. We outsource our information technology function to monitor and maintain our systems efficiently.

Also, we conduct a daily backup of our systems to ensure the security and stability of the network. Our system provider performs this backup off site.

Staffing and Administration

We do not currently have any employees. MC Management, an affiliate of Monroe Capital, provides access to Monroe Capital's investment professionals and the administrative services necessary for us to operate pursuant to the Staffing Agreement and the Administration Agreement. The Staffing Agreement provides us with access to investment opportunities, which we refer to in the aggregate as deal flow, generated by Monroe Capital and its affiliates in the ordinary course of their businesses and commits the members of MC Advisors' investment committee to serve in that capacity. Mr. Koenig serves as our Chairman and Chief Executive Officer and also currently serves as the managing member and a partner of each of MC Advisors, Monroe Capital and MC Management. Mr. Peck serves as our Chief Financial Officer and Chief Investment Officer and is an employee of Monroe Capital and performs his function as Chief Financial Officer pursuant to the Staffing Agreement.

In addition, under the Administration Agreement, MC Management furnishes us with office facilities and equipment and provides us clerical, bookkeeping, recordkeeping and other administrative services at such facilities. MC Management performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records we are required to maintain and preparing our reports to our stockholders and reports filed with the SEC. MC Management also assists us in determining and publishing our net asset value, oversees the preparation and filing of our tax returns, prints and disseminates reports to our stockholders and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others.

MC Management may retain third parties to assist in providing administrative services to us. To the extent that MC Management outsources any of its functions, we pay the fees associated with such functions

TABLE OF CONTENTS

on a direct basis without profit to MC Management. We reimburse MC Management for the allocable portion (subject to the review and approval of our board of directors) of MC Management's overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs. Amounts payable to MC Management in any quarter through the quarter ending December 31, 2013 were limited to the greater of (i) 0.375% of our average invested assets for such quarter and (ii) \$375,000. MC Management also provides on our behalf significant managerial assistance to those portfolio companies to which we are required to provide such assistance.

Properties

We do not own any real estate or other physical properties materially important to our operation. The principal executive offices of Monroe Capital are located in at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606. Monroe Capital and its affiliates currently have additional offices, and/or company representatives in New York, New York; Los Angeles, California; San Francisco, California; Atlanta, Georgia; Boston, Massachusetts; Charlotte, North Carolina; Dallas, Texas; and Toronto, Canada. Our administrator furnishes us office space, and we reimburse it for such costs on an allocated basis.

Legal Proceedings

We, MC Advisors and MC Management are not subject to any material legal proceedings.

TABLE OF CONTENTS

PORTFOLIO COMPANIES

The following table sets forth certain information as of March 31, 2016, for each portfolio company in which we had a debt or equity investment. Other than equity investments, we expect that our only formal relationships with our portfolio companies will be the managerial assistance we may provide, and the board observation or participation rights we may receive. Except as identified in a footnote below, we do not control and are not an affiliate of any of our portfolio companies, as each term is defined in the 1940 Act. In general, under the 1940 Act, we would control a portfolio company if we owned more than 25.0% in voting securities and would be an affiliate of a portfolio company if we owned 5.0% or more of its voting securities.

78

TABLE OF CONTENTS

79

TABLE OF CONTENTS

80

TABLE OF CONTENTS

81

TABLE OF CONTENTS

All of our investments are issued by eligible U.S. portfolio companies, as defined in the Investment Company Act (a) of 1940 (the 1940 Act) except for InMobi Pte, Ltd. which is an international company headquartered in California.

All investments are non-controlled/non-affiliate company investments, unless otherwise noted.

The majority of the investments bear interest at a rate that may be determined by reference to London Interbank (b) Offered Rate (LIBOR or L) or Prime Rate (Prime or P) which reset daily, monthly, quarterly, or semiannually. For each such investment the Company has provided the spread over LIBOR or Prime and the current contractual interest rate in effect at March 31, 2016. Certain investments are subject to a LIBOR or Prime interest rate floor.

Because there is no readily available market value for these investments, the fair value of these investments is (c) determined in good faith by our board of directors as required by the Investment Company Act of 1940. (See Note 4 in the accompanying notes to the consolidated financial statements.)

82

TABLE OF CONTENTS

- For these unitranche loans, we own a senior last-out tranche, which can result in an effective yield that is higher (d) than the listed interest rate. The effective yield on the unitranche loans in the portfolio ranged from 7.8% to 16.0% with a weighted average annualized effective yield of 11.0% as of March 31, 2016.
- (e) A portion of this loan (principal of \$4,619) is held in the Company's wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP and is therefore not collateral to the Company's revolving credit facility.
- (f) All or a portion of this commitment was unfunded at March 31, 2016. As such, interest is earned only on the funded portion of this commitment.
- As defined in the 1940 Act, the Company is deemed to be an Affiliated Person of the portfolio company as it owns five percent or more of the portfolio company's voting securities. See Note 5 in the accompanying notes to the (g) consolidated financial statements for additional information on transactions in which the issuer was an Affiliated Person (but not a portfolio company that the Company is deemed to control).
- (h) All of this loan is held in the Company's wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP and is therefore not collateral to the Company's revolving credit facility.
- (i) A portion of this loan (principal of \$2,466) is held in the Company's wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP and is therefore not collateral to the Company's revolving credit facility.
- (j) This delayed draw loan requires that certain financial covenants be met by the portfolio company prior to any fundings.
- This investment is treated as a non-qualifying investment under Section 55(a) of the 1940 Act. Under the 1940 Act, the Company may not acquire any non-qualifying asset unless, at the time the acquisition is made, qualifying assets (k) represent at least 70% of the Company's total assets. As of March 31, 2016, non-qualifying assets totaled 1.79% of the Company's total assets.
- (l) A portion of this loan (principal of \$4,132) is held in the Company's wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP and is therefore not collateral to the Company's revolving credit facility.
- As defined in the 1940 Act, the Company is deemed to be both an Affiliated Person of and to Control this (m) portfolio company as it owns more than 25% percent of the portfolio company's voting securities. See Note 5 in the accompanying notes to the consolidated financial statements for additional information on transactions in which the issuer was both an Affiliated Person and a portfolio company that the Company is deemed to Control.
- (n) The sale of a portion of this loan does not qualify for sale accounting under ASC Topic 860 Transfers and Servicing, and therefore, the entire unitranche loan asset remains in the Consolidated Schedule of Investments.
- (o) A portion of this loan (principal of \$5,500) is held in the Company's wholly-owned subsidiary, Monroe Capital Corporation SBIC, LP and is therefore not collateral to the Company's revolving credit facility.
- (p) Represents less than 5% ownership of the portfolio company's voting securities.
- The PIK portion of the interest rate for Landpoint, LLC is structured as a guaranteed fee paid upon the termination (q) of the commitment. The fee accrues at 2.25% per annum and is subject to a minimum payment upon termination of \$338.
- (r) This position is currently on non-accrual status.
- A portion of the PIK interest rate for TRG, LLC is structured as a guaranteed fee paid upon the termination of the (s) commitment. The fee accrues at 2.01% per annum and is subject to an estimated minimum payment upon termination of \$1,407.
- (t) The PIK portion of the interest rate for Gracelock Industries, LLC is structured as a fee paid upon the termination of the commitment. The fee accrues at 2.55% per annum.
- (u) Represents a non-income producing security.
- (v) This position includes a PIK dividend and is currently on non-accrual status.
n/a not applicable

Set forth below is a description of each portfolio company in which we have made an investment that represents greater than 5.0% of our total assets as of March 31, 2016. Because of the relative size of our investments in these companies, we are exposed to a greater degree to the risks associated with these companies.

Rockdale Blackhawk, LLC is a healthcare provider based in central Texas. The company's healthcare system consists of hospitals, free-standing surgery centers, imaging centers, outpatient clinics, laboratory services and other healthcare services. The company was founded in 2007 and is headquartered in Milam County, Texas.

TABLE OF CONTENTS

MANAGEMENT

Our business and affairs are managed under the direction of our board of directors. The board of directors consists of seven members, four of whom are not interested persons of us, MC Advisors or their respective affiliates as defined in Section 2(a)(19) of the 1940 Act. We refer to these individuals as our independent directors. Our board of directors elects our officers, who serve at the discretion of the board of directors. The responsibilities of our board of directors include oversight of our investment activities, quarterly valuation of our assets, oversight of our financing arrangements and corporate governance activities.

Oversight of our investment activities extends to oversight of the risk management processes employed by MC Advisors as part of its day-to-day management of our investment activities. The board of directors anticipates reviewing enterprise risk management processes at both regular and special board meetings throughout the year, consulting with appropriate representatives of MC Advisors as necessary and periodically requesting the production of risk management reports or presentations. The goal of the board of directors risk oversight function is to ensure that the risks associated with our investment activities are accurately identified, thoroughly investigated and responsibly addressed. Investors should note, however, that the board of directors oversight function cannot eliminate all risks or ensure that particular events do not adversely affect the value of investments.

The board of directors has established an audit committee, a nominating and corporate governance committee and a compensation committee, and may establish additional committees from time to time as necessary. The scope of each committee's responsibilities is discussed in greater detail below. Theodore L. Koenig, an interested person of Monroe Capital Corporation, serves as Chairman of the board of directors. The board of directors believes that it is in the best interests of our investors for Mr. Koenig to lead the board of directors because of his broad experience with the day-to-day management and operation of other investment funds and his significant background in the financial services industry, as described below. The board of directors does not have a lead independent director. However, Thomas J. Allison, the chairman of the audit committee, is an independent director and acts as a liaison between the independent directors and management between meetings of the board of directors and is involved in the preparation of agendas for board and committee meetings. The board of directors believes that its leadership structure is appropriate in light of the characteristics and circumstances of Monroe Capital Corporation because the structure allocates areas of responsibility among the individual directors and the committees in a manner that enhances effective oversight. The board of directors also believes that its size creates a highly efficient governance structure that provides ample opportunity for direct communication and interaction between MC Advisors and the board of directors.

Board of Directors

Under our charter and bylaws, our directors are divided into three classes. At each annual meeting, directors will be elected for staggered terms of three years, with the term of office of only one of these three classes of directors expiring each year. Each director will hold office for the term to which he or she is elected and until his or her successor is duly elected and qualifies.

TABLE OF CONTENTS**Directors**

Information regarding the board of directors is as follows:

Name	Age	Position	Director Since	Term Expires
Interested Directors				
Theodore L. Koenig	57	Chairman of the board of directors and Chief Executive Officer	2011	2018
Aaron D. Peck	45	Director, Chief Financial Officer and Chief Investment Officer	2012	2017
Jeffrey D. Steele	56	Director	2012	2018
Independent Directors				
Thomas J. Allison	64	Director	2013	2016
Jeffrey A. Golman	60	Director	2012	2017
Robert S. Rubin	60	Director	2012	2016
Jorde M. Nathan	53	Director	2013	2017

The address for each of our directors is c/o Monroe Capital Corporation, 311 South Wacker Drive, Suite 6400, Chicago, IL 60606.

Biographical Information

The board of directors has determined that each of the directors is qualified to serve as our director, based on a review of the experience, qualifications, attributes and skills of each director, including those described below. The board of directors has determined that each director has significant experience in the investment or financial services industries and has held management, board or oversight positions in other companies and organizations. For the purposes of this presentation, our directors have been divided into two groups – independent directors and interested directors.

Interested directors are interested persons as defined in the 1940 Act.

Independent Directors

Thomas J. Allison has served on our board of directors and as our Audit Committee Chairperson since April 2013. Mr. Allison is currently trustee of American Optical Services, a director of Silver Airways and is a director of PTC Alliance Group Holdings, a global manufacturer of steel tubing. From February to August 2014, Mr. Allison was Chairman of the Board and President of Forge Group, Inc., a mining services company. From 2006 until his retirement in 2012, Mr. Allison served as Executive Vice President and Senior Managing Director of Mesirow Financial Consulting, LLC, a full-service financial and operational advisory consulting firm headquartered in Chicago. At Mesirow, Mr. Allison managed complex turnaround situations and advised on major reorganizations and insolvencies. He also served as CEO, CFO or CRO for several clients. From 2002 to 2006, Mr. Allison served as National Practice Leader of the restructuring practice of Huron Consulting Group. From 1988 to 2002, he served in a variety of roles at Arthur Andersen, LLC, including Partner-in-Charge, Central Region Restructuring Practice. Earlier in his career, Mr. Allison served in various capacities at Coopers & Lybrand, an accounting firm, First National Bank of Chicago and the Chicago Police Department. Mr. Allison has previously served as Chairman of the Association for Certified Turnaround Professionals, Chairman and Director of the Turnaround Management Association, is a Fellow in the American College of Bankruptcy and has taught as a guest lecturer at Northwestern University and DePaul

University. Mr. Allison received his bachelor of science in commerce and his master of business administration from DePaul University. Mr. Allison's extensive turnaround and restructuring experience, financial leadership and corporate finance experience provide our board of directors with valuable industry knowledge and practical insight.

Jeffrey A. Golman has served on our board of directors since our initial public offering in October 2012 and is our nominating and corporate governance committee chairperson and a member on our audit committee. Since 2001, Mr.

Golman has served as Vice Chairman and head of Investment Banking of Mesirow Financial, Inc., a diversified financial services firm headquartered in Chicago. Prior to his time with Mesirow Financial, Mr. Golman co-founded GGW Management Partners, LLC, a management-oriented investment group formed in partnership with Madison

TABLE OF CONTENTS

Dearborn Partners, Willis Stein & Partners and The Pritzker Organization, and was Managing Director with Lazard Frères & Co., LLC from 1989 to 1999. From 1981 to 1988, Mr. Golman worked with Salomon Brothers Chicago Banking Group, rising to the level of Vice President. Prior to that time, Mr. Golman practiced corporate and tax law in Chicago. Mr. Golman is a director of the Cystic Fibrosis Foundation Leadership Council's Greater Illinois Chapter. Mr. Golman is also a member of The Economic Club of Chicago, a member of the University of Illinois Foundation and a member of the Development Council of B.U.I.L.D., Inc. (Broader Urban Involvement and Leadership Development), a non-profit organization which helps at-risk youth realize their potential and contributes to the stability, safety and well-being of our communities. Mr. Golman also serves in an advisory position and as a member of the Law Board of Northwestern University School of Law. Mr. Golman received his bachelor of science in accounting from the University of Illinois in Champaign-Urbana and received his juris doctor from Northwestern University. Mr. Golman brings extensive capital markets and middle market investment banking experience to our board.

Jorde M. Nathan has served on our board of directors and as a member of our nominating and corporate governance committee since April 2013. Mr. Nathan was a Managing Director of Barclays Bank, a major global financial services provider, from 2008 until his retirement in 2012. From 1993 until 2008, Mr. Nathan was employed by Lehman Brothers Inc., and served as a Managing Director of distressed, high yield and leverage loan sales and trading. From 1985 to 1993, Mr. Nathan served in various capacities as a First Scholar at The First National Bank of Chicago, ultimately serving as head of trading for bank loans. Mr. Nathan graduated Phi Beta Kappa with an AB degree in Chinese Language and Economics from Amherst College and earned his master of business administration from the University of Chicago. Mr. Nathan is a member of the national board and serves as chairman of the central region of the Friends of Israel Defense Forces. Mr. Nathan's significant capital markets and leveraged loan experience provides our board of directors with industry knowledge and practical insight.

Robert S. Rubin has served on our board of directors since our initial public offering in October 2012 and is our compensation committee chairperson, a member of our audit committee and a member of our nominating and corporate governance committee. Mr. Rubin is currently managing principal of the Diamond Group, an investment group that operates various companies and partnerships engaged in asset management and real estate investments. Since 1999, Mr. Rubin has been Managing Principal of the Diamond Group and its various affiliates. Mr. Rubin was formerly Vice Chairman of the board of Diamond Bancorp, Inc. in Chicago. From 1997 to 1998, Mr. Rubin founded and ran a boutique derivatives advisory firm called Prospect Park Capital Advisors, and from 1991 to 1997 co-founded and ran Horizon Advisors, a hedge fund and commodity trading advisor. From 1986 to 1991, Mr. Rubin worked at Nomura Securities in the Global Syndicate and New Products Department, where he co-founded and served on the board of Nomura Capital Services Inc., the first Japanese dealer in derivative products. From 1983 to 1986, Mr. Rubin worked at First National Bank of Chicago (now a part of JPMorgan Chase Bank, N.A.). Mr. Rubin currently serves on the boards of the Parsons Water Fund and Aleh Negev, which supports facilities for developmentally disabled children and adults in Israel. Mr. Rubin received his bachelor of arts from Harvard College in 1978 and his master of business administration from the University of Chicago in 1986. Mr. Rubin brings extensive capital markets, risk management and business operating experience to our board.

Interested Directors

Theodore L. Koenig has served as our chairman of the board and chief executive officer since our formation in February 2011 and as chairman of MC Advisors' investment committee since our initial public offering in October 2012. Additionally, Mr. Koenig is the chief executive officer and a manager of MC Advisors. Since founding Monroe Capital in 2004, Mr. Koenig has served continuously as its President and Chief Executive Officer. Prior to founding Monroe Capital, Mr. Koenig served as the President and Chief Executive Officer of Hilco Capital LP from 1999 to

2004, where he invested in distressed debt, junior secured debt and unsecured subordinated debt transactions. From 1986 to 1999, Mr. Koenig was a partner with the Chicago-based corporate law firm, Holleb & Coff. Mr. Koenig is a past President of the Indiana University Kelley School of Business Alumni Club of Chicago. He currently serves as director of the Commercial Finance Association and is a member of the Turnaround Management Association and the Association for Corporate Growth. Mr. Koenig also serves on the Dean's Advisory Council, Kelley School of Business; Board of Overseers, Chicago-Kent School of Law; and as Vice Chairman of the Board of Trustees of Allendale School, a non-profit residential and educational facility for emotionally troubled children in the greater

TABLE OF CONTENTS

Chicago area. He is also a Certified Public Accountant. Mr. Koenig received a bachelor of science in accounting, with high honors, from Indiana University and earned a juris doctor, with honors, from Chicago Kent College of Law. Mr. Koenig's depth of experience investing in a variety of debt transactions as well as his legal background provides our board of directors with valuable experience, insight and perspective.

Aaron D. Peck has served on our board of directors and as a member of MC Advisors' investment committee since our initial public offering in October 2012. Additionally, Mr. Peck serves as our Chief Financial Officer, Chief Investment Officer and Corporate Secretary. Mr. Peck has been a managing director of Monroe Capital since September 2012, where he is responsible for portfolio management and strategic initiatives and co-leads Monroe Capital's specialty financing lending practice. From 2002 to 2003 and from 2004 to June 2011, Mr. Peck worked in various capacities at Deerfield Capital Management LLC, including serving as its Co-Chief Investment Officer and as Managing Director of its Middle Market Lending Group. He also helped establish and served as chief portfolio manager for Deerfield Capital Corp. (f/k/a Deerfield Triarc Capital Corp.), a publicly-traded externally-managed specialty finance hybrid mortgage REIT. For Deerfield Capital Corp., Mr. Peck was the primary point of contact for institutional and retail investors, equity research analysts, investment bankers and lenders. Mr. Peck also served as a member of Deerfield Capital's Executive Committee, Investment Committee and Risk Management Committee. From 2003 to 2004, Mr. Peck served as Senior Director of AEG Investors LLC and led the company's efforts in acquiring distressed middle market loans. From 2001 to 2002, Mr. Peck was a senior research analyst at Black Diamond Capital Management LLC. Prior to that, Mr. Peck worked in leveraged credit at several investment firms including Salomon Smith Barney, Merrill Lynch, ESL Investments and Lehman Brothers. Mr. Peck received his bachelor of science in commerce from the University of Virginia, McIntire School of Commerce and received a master of business administration with honors from The University of Chicago, Graduate School of Business. Mr. Peck's extensive experience in public company management, capital markets, risk management and financial services gives the board of directors valuable industry knowledge, expertise and insight.

Jeffrey D. Steele has served on our board of directors since our initial public offering in October 2012. Mr. Steele currently serves as President-Specialized Lending of The Private Bank, a commercial bank headquartered in Chicago, where he has worked since 2007. Mr. Steele was a founding member of The Private Bank's Transitional Management Team, and is currently a member on the bank's Executive Committee and Loan Committee, where his responsibilities include operations, compliance, bank-wide performance and credit approval. From 1992 to 2007, Mr. Steele worked in various capacities at LaSalle Bank, N.A., including serving as Group Senior Vice President from 2001 to 2007. From 1982 to 1992, he served in a variety of roles at National Boulevard Bank of Chicago, including Vice President and Co-Head of Commercial Banking. Mr. Steele has previously served as a board member of the Better Government Association in Chicago and has taught as a guest lecturer at Indiana University Kelley School for Business and the University of Iowa Tippie College of Business. Mr. Steele received his bachelor of science in finance from Indiana University and completed a graduate program in banking management at the Stonier Graduate School of Banking. Mr. Steele brings extensive middle market commercial banking and corporate finance experience to our board of directors.

Audit Committee

Thomas J. Allison, Jeffrey A. Golman and Robert S. Rubin serve as members of our audit committee. Mr. Allison serves as chairman of the audit committee. The members of the audit committee are independent directors, each of whom meets the independence standards established by the SEC and The Nasdaq Stock Market for audit committees and is independent for purposes of the 1940 Act. Our board of directors has determined that each of the members of our audit committee is an audit committee financial expert as that term is defined under Item 407 of Regulation S-K of the Exchange Act. The audit committee is responsible for approving our independent accountants, reviewing with our independent accountants the plans and results of the audit engagement, approving professional services provided by

our independent accountants, reviewing the independence of our independent accountants and reviewing the adequacy of our internal accounting controls. The audit committee is also responsible for aiding our board of directors in fair value pricing debt and equity securities that are not publicly traded or for which current market values are not readily available. The board of directors and audit committee will utilize the services of independent valuation firms to help

87

TABLE OF CONTENTS

them determine the fair value of these securities. The audit committee charter is available on our corporate website. The audit committee met five times in 2015.

Nominating and Corporate Governance Committee

The members of the nominating and corporate governance committee are Jeffrey A. Golman, Jorde M. Nathan and Robert S. Rubin, each of whom is independent for purposes of the 1940 Act and the Nasdaq corporate governance regulations. Mr. Golman serves as chairman of the nominating and corporate governance committee. The nominating and corporate governance committee is responsible for selecting, researching and nominating directors for election by our stockholders, selecting nominees to fill vacancies on the board or a committee of the board, developing and recommending to the board a set of corporate governance principles and overseeing the evaluation of the board and our management. The nominating and corporate governance committee charter is available on our corporate website. The nominating and corporate governance committee met one time in 2015.

The nominating and corporate governance committee considers nominees to the board of directors recommended by a stockholder, if such stockholder complies with the advance notice provisions of our bylaws. Our bylaws provide that a stockholder who wishes to nominate a person for election as a director at a meeting of stockholders must deliver written notice to our corporate secretary. This notice must contain, as to each nominee, all of the information relating to such person as would be required to be disclosed in a proxy statement meeting the requirements of Regulation 14A under the Exchange Act, and certain other information set forth in the bylaws. In order to be eligible to be a nominee for election as a director by a stockholder, such potential nominee must deliver to our corporate secretary a written questionnaire providing the requested information about the background and qualifications of such person and a written representation and agreement that such person is not and will not become a party to any voting agreements, any agreement or understanding with any person with respect to any compensation or indemnification in connection with service on the board of directors, and would be in compliance with all of our publicly disclosed corporate governance, conflict of interest, confidentiality and stock ownership and trading policies and guidelines.

Compensation Committee

The members of the compensation committee are Robert S. Rubin, Thomas J. Allison and Jorde M. Nathan, each of whom is independent for purposes of the 1940 Act and the Nasdaq corporate governance regulations. Mr. Rubin serves as chairman of the compensation committee. However, our executive officers are paid by MC Advisors and do not receive any direct compensation from us. The Investment Advisory Agreement, which provides for the compensation payable to MC Advisors, is separately approved by a majority of the independent directors in accordance with Nasdaq Marketplace Rule 5605(d) and Section 15(c) of the 1940 Act. The compensation committee charter is available on our corporate website. The compensation committee met one time in 2015.

Compensation of Executive Officers

Our executive officers do not receive any direct compensation from us. We do not currently have any employees and do not expect to have any employees. Our day-to-day investment operations are managed by MC Advisors. Services necessary for our business are provided by individuals who are employees of an affiliate of MC Advisors, pursuant to the terms of our Investment Advisory Agreement and our administration agreement. Each of our executive officers is an employee of an affiliate of MC Advisors. We reimburse MC Management, as administrator, for its allocable portion of expenses incurred by it in performing its obligations under the administration agreement, including its allocable portion of the cost of our officers and their respective staffs, and we reimburse MC Advisors for certain expenses under the Investment Advisory Agreement.

TABLE OF CONTENTS**Compensation of Directors**

Each independent director and each interested director who is not an employee of MC Advisors or any of its affiliates, receives an annual retainer of \$20,000 for serving on the board of directors and a \$1,000 fee for each meeting attended. The chair of our audit committee receives a \$15,000 annual retainer and the chair of our nominating and corporate governance committee receives a \$5,000 annual retainer. Mr. Steele, who is not an employee of us, MC Advisors or its affiliates, is the only interested director that currently receives director compensation. Interested Directors that are employees of MC Advisors or its affiliates do not receive additional compensation for service as a member of our board of directors. We also reimburse each of the above directors for all reasonable and authorized business expenses in accordance with our policies as in effect from time-to-time.

The following table shows information regarding the compensation received by our directors, none of whom is an employee of the Company, for the fiscal year ended December 31, 2015. No compensation is paid by us to interested directors, other than to Mr. Steele, who is not an employee of us or MC Advisors. There are no executive officers of the Company who are not directors.

Name	Fees Earned or Paid in Cash	Total
Independent Directors		
Thomas J. Allison	\$ 41,000	\$ 41,000
Jeffrey A. Golman	\$ 31,000	\$ 31,000
Jorde M. Nathan	\$ 25,000	\$ 25,000
Robert S. Rubin	\$ 26,000	\$ 26,000
Interested Directors		
Jeffrey D. Steele	\$ 25,000	\$ 25,000
Theodore L. Koenig	\$ None	\$ None
Aaron D. Peck	\$ None	\$ None

Investment Committee

The investment committee of MC Advisors responsible for our investments meets regularly to consider our investments, direct our strategic initiatives and supervise the actions taken by MC Advisors on our behalf. In addition, the investment committee reviews and determines whether to make prospective investments identified by MC Advisors and monitors the performance of our investment portfolio. The investment committee consists of Messrs. Koenig, Peck, Egan and VanDerMeid.

Information regarding members of MC Advisors investment committee who are not also our directors is as follows:

Michael J. Egan has more than 25 years of experience in commercial finance, credit administration and banking. Mr. Egan joined Monroe Capital in 2004 and is responsible for credit policies and procedures along with portfolio and asset management. Mr. Egan also served as Executive Vice President and Chief Credit Officer of Hilco Capital from 1999 to 2004. Prior to joining Hilco Capital LP, Mr. Egan was with The CIT Group/Business Credit, Inc. for a ten-year period beginning in 1989, where he served as Senior Vice President and Regional Manager for the Midwest U.S. Region responsible for all credit, new business and operational functions. Prior to joining The CIT Group, Mr. Egan was a commercial lending officer with The National Community Bank of New Jersey (The Bank of New York) and a credit analyst with KeyCorp, where he completed a formal management and credit training program.

Jeremy T. VanDerMeid has more than 15 years of lending and corporate finance experience and is responsible for portfolio management, capital markets and all trading functions for Monroe Capital. Prior to joining Monroe Capital in 2007, Mr. VanDerMeid was with Morgan Stanley Investment Management in the Van Kampen Senior Loan Group. Mr. VanDerMeid managed a portfolio of bank loans for Van Kampen and also led the firm's initiative to increase its presence with middle-market lenders and private equity firms. Prior to his work at Morgan Stanley, he worked for Dymas Capital and Heller Financial where he originated, underwrote, and managed various middle-market debt transactions.

TABLE OF CONTENTS**Portfolio Management**

Each investment opportunity requires the consensus and receives the unanimous approval of MC Advisors' investment committee. Follow-on investments in existing portfolio companies require the investment committee's approval beyond that obtained when the initial investment in the company was made. In addition, the investment committee oversees any temporary investments, such as those in cash equivalents, U.S. government securities and other high quality debt investments that mature in one year or less. The day-to-day management of investments approved by the investment committee is overseen by the investment committee. Biographical information with respect to the investment committee is set forth under Biographical Information, Interested Directors and Investment Committee.

Each of Messrs. Koenig, Peck, Egan and VanDerMeid has ownership and financial interests in, and may receive compensation and/or profit distributions from, MC Advisors. None of Messrs. Koenig, Peck, Egan and VanDerMeid receives any direct compensation from us.

The table below shows the dollar range of shares of our common stock beneficially owned by each member of the investment committee of MC Advisors responsible for our investments as of the end of our most recently completed fiscal year.

Investment Committee of MC Advisors	Dollar Range of Equity Securities in Monroe Capital Corporation ⁽¹⁾⁽²⁾
Theodore L. Koenig	over \$1,000,000
Aaron D. Peck	\$50,001 - \$100,000
Michael J. Egan	\$100,001 - \$500,000
Jeremy T. VanDerMeid	\$10,001 - \$50,000

(1) Dollar ranges are as follows: None, \$1 - \$10,000, \$10,001 - \$50,000, \$50,001 - \$100,000, \$100,001 - \$500,000; \$500,001 - \$1,000,000 or over \$1,000,000.

(2) The dollar range of equity securities beneficially owned by the members of our investment committee is based on a stock price of \$13.09 per share as of December 31, 2015.

Messrs. Koenig, Egan and VanDerMeid are also primarily responsible for the day-to-day management of 12 other pooled investment vehicles and other accounts in which their affiliates may receive incentive fees, with a total amount of approximately \$2.8 billion of capital under management as of December 31, 2015.

TABLE OF CONTENTS

MANAGEMENT AND OTHER AGREEMENTS

MC Advisors is located at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606. MC Advisors is a registered investment adviser under the Advisers Act. Subject to the overall supervision of our board of directors and in accordance with the 1940 Act, MC Advisors manages our day-to-day operations and provides investment advisory services to us. Under the terms of the Investment Advisory Agreement, MC Advisors:

determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;

assists us in determining what securities we purchase, retain or sell;

identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and

executes, closes, services and monitors the investments we make.

MC Advisors' services under the Investment Advisory Agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired.

Investment Advisory Agreement

Management and Incentive Fee

Under the Investment Advisory Agreement with MC Advisors and subject to the overall supervision of our board of directors, MC Advisors provides investment advisory services to us. For providing these services, MC Advisors receives a fee from us, consisting of two components—a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.75% of average invested assets (calculated as total assets excluding cash) and is payable quarterly in arrears.

The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the preceding quarter subject to a total return requirement. Pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees such as commitment, origination, structuring, diligence and consulting fees or other fees that we receive from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, any expenses payable under the Administration Agreement, and any interest expense and dividends paid on any outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with PIK interest, preferred stock with PIK dividends and zero-coupon securities, accrued income that we have not yet received in cash. MC Advisors is not under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued interest that we never actually receive.

The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income will be payable except to the extent 20.0% of the cumulative net increase in net assets resulting from operations over the then-current and 11 preceding quarters exceeds the cumulative incentive fees accrued and/or paid for the 11 preceding quarters. Therefore, any ordinary income incentive fee that is payable in a calendar quarter will be limited to the lesser of (i) 20% of the amount by which our pre-incentive fee net investment income for such calendar quarter exceeds the 2% hurdle described below, subject to the catch-up provision, and (ii) (x) 20% of the cumulative net increase in net assets resulting from operations for the then current

and 11 preceding calendar quarters minus (y) the cumulative incentive fees accrued and/or paid for the 11 preceding calendar quarters. For the foregoing purpose, the cumulative net increase in net assets resulting from operations is the amount, if positive, of the sum of our pre-incentive fee net investment income, base management fees, realized gains and losses and unrealized appreciation and depreciation for the then current and 11 preceding calendar quarters.

Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. If any distributions from portfolio companies are characterized as a return of capital, such returns of capital would affect the capital gains incentive fee to the extent a gain or loss is realized. Because of the structure of the incentive fee, it is possible that we may pay

TABLE OF CONTENTS

an incentive fee in a quarter where we incur a loss. For example, if we receive pre-incentive fee net investment income in excess of the hurdle rate (as defined below) for a quarter, we will pay the applicable incentive fee even if we have incurred a loss in that quarter due to realized and unrealized capital losses.

Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period) at the end of the immediately preceding calendar quarter, is compared to a fixed hurdle rate of 2% per quarter (8% annually). If market interest rates rise, we may be able to invest our funds in debt instruments that provide for a higher return, which would increase our pre-incentive fee net investment income and make it easier for MC Advisors to surpass the fixed hurdle rate and receive an incentive fee based on such net investment income.

We pay MC Advisors an incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

no incentive fee in any calendar quarter in which the pre-incentive fee net investment income does not exceed the hurdle rate of 2% (8% annually);
100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5% in any calendar quarter. We refer to this portion of our pre-incentive fee net investment income (which exceeds the hurdle rate but is less than 2.5%) as the catch-up provision. The catch-up is meant to provide MC Advisors with 20% of the pre-incentive fee net investment income as if a hurdle rate did not apply if this net investment income exceeds 2.5% in any calendar quarter; and 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.5% in any calendar quarter.
These calculations are adjusted for any share issuances or repurchases during the quarter.

The following is a graphical representation of the calculation of the income-related portion of the incentive fee:

**Quarterly Incentive Fee Based on Pre-Incentive Fee
Net Investment Income**

**Pre-incentive fee net investment income (expressed as
a percentage of the value of net assets)**

**Percentage of pre-incentive fee net investment income
allocated to income-related portion
of incentive fee**

These calculations will be appropriately prorated for any period of less than three months and adjusted for any share issuances or repurchases during the current quarter.

The second part of the incentive fee is a capital gains incentive fee that is determined and payable in arrears as of the end of each fiscal year (or upon termination of the investment advisory and management agreement, as of the

Percentage of pre-incentive fee net investment income allocated to income-related portion of incentive fee 170

termination date), and equals 20% of our realized capital gains as of the end of the fiscal year. In determining the capital gains incentive fee payable to MC Advisors, we calculate the cumulative aggregate realized capital gains and cumulative aggregate realized capital losses since our inception, and the aggregate unrealized capital depreciation as of the date of the calculation, as applicable, with respect to each of the investments in our portfolio. For this purpose, cumulative aggregate realized capital gains, if any, equals the sum of the differences between the net sales price of each investment, when sold, and the amortized cost of such investment. Cumulative aggregate realized capital losses equals the sum of the amounts by which the net sales price of each investment, when sold, is less than the amortized cost of such investment since our inception. Aggregate unrealized capital depreciation equals the sum of the difference, if negative, between the valuation of each investment as of the applicable calculation date and the amortized cost of such investment.

TABLE OF CONTENTS

At the end of the applicable year, the amount of capital gains that serves as the basis for our calculation of the capital gains incentive fee equals the cumulative aggregate realized capital gains less cumulative aggregate realized capital losses, less aggregate unrealized capital depreciation, with respect to our portfolio of investments. If this number is positive at the end of such year, then the capital gains incentive fee for such year equals 20% of such amount, less the aggregate amount of any capital gains incentive fees paid in respect of our portfolio in all prior years.

Examples of Quarterly Incentive Fee Calculation

Example 1: Income Related Portion of Incentive Fee before Total Return Requirement Calculation

Alternative 1

Assumptions

Investment income (including interest, dividends, fees, etc.) = 1.25%
 Hurdle rate⁽¹⁾ = 2%
 Management fee⁽²⁾ = 0.4375%
 Other expenses (legal, accounting, custodian, transfer agent, etc.) = 0.2%
 Pre-incentive fee net investment income
 (investment income (management fee + other expenses)) = 0.6125%

Pre-incentive fee net investment income does not exceed hurdle rate, therefore there is no income-related incentive fee.

Alternative 2

Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.0%
 Hurdle rate⁽¹⁾ = 2%
 Management fee⁽²⁾ = 0.4375%
 Other expenses (legal, accounting, custodian, transfer agent, etc.) = 0.2%
 Pre-incentive fee net investment income
 (investment income (management fee + other expenses)) = 2.3625%
 Incentive fee = 100% × Pre-incentive fee net investment income (subject to catch-up⁽³⁾)

$$= 100\% \times (2.3625\% - 2\%)$$

$$= 0.3625\%$$

Pre-incentive fee net investment income exceeds the hurdle rate, but does not fully satisfy the catch-up provision, therefore the income-related portion of the incentive fee is 0.3625%.

Alternative 3

Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.5%

Hurdle rate⁽¹⁾ = 2%

Management fee⁽²⁾ = 0.4375%

Other expenses (legal, accounting, custodian, transfer agent, etc.) = 0.2%

Pre-incentive fee net investment income

(investment income - (management fee + other expenses)) = 2.8625%

Incentive fee = 100% × Pre-incentive fee net investment income (subject to catch-up⁽³⁾)

Incentive fee = 100% × catch-up + (20% × (Pre-incentive fee net investment income - 2.5%))

TABLE OF CONTENTS

$$\text{Catch-up} = 2.5\% - 2\%$$

$$= 0.5\%$$

$$\text{Incentive fee} = (100\% \times 0.5\%) + (20\% \times (2.8625\% - 2.5\%))$$

$$= 0.5\% + (20\% \times 0.3625\%)$$

$$= 0.5\% + 0.0725\%$$

$$= 0.5725\%$$

Pre-incentive fee net investment income exceeds the hurdle rate, and fully satisfies the catch-up provision, therefore the income related portion of the incentive fee is 0.56%.

(1) Represents 8.0% annualized hurdle rate.

(2) Represents 1.75% annualized base management fee.

The catch-up provision is intended to provide our investment advisor with an incentive fee of 20% on all pre-incentive fee net investment income as if a hurdle rate did not apply when our net investment income exceeds 2.5% in any fiscal quarter.

Example 2: Income Portion of Incentive Fee with Total Return Requirement Calculation:

Assumptions

Hurdle rate⁽¹⁾ = 2%

Management fee⁽²⁾ = 0.4375%

Other expenses (legal, accounting, transfer agent, etc.) = 0.2%

Cumulative incentive compensation accrued and/or paid for preceding 11 calendar quarters = \$9 million

Alternative 1

Additional Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.50%

Pre-incentive fee net investment income

(investment income - (management fee + other expenses)) = 2.8625%

20.0% of cumulative net increase in net assets resulting from operations over current and preceding 11 calendar quarters = \$8 million

Although our pre-incentive fee net investment income exceeds the hurdle rate of 2.0% (as shown in Alternative 3 of Example 1 above), no incentive fee is payable because 20.0% of the cumulative net increase in net assets resulting from operations over the then current and 11 preceding calendar quarters did not exceed the cumulative income and capital gains incentive fees accrued and/or paid for the preceding 11 calendar quarters.

Alternative 2

Additional Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.50%
Pre-incentive fee net investment income
(investment income (management fee + other expenses)) = 2.8625%.
20% of cumulative net increase in net assets resulting from operations over
current and preceding 11 calendar quarters = \$10 million

Because our pre-incentive fee net investment income exceeds the hurdle rate of 2.0% and because 20.0% of the cumulative net increase in net assets resulting from operations over the then current and 11 preceding calendar quarters exceeds the cumulative income and capital gains incentive fees accrued and/or paid for the preceding 11 calendar quarters, an incentive fee would be payable, as shown in Alternative 3 of Example 1 above.

- (1) Represents 8.0% annualized hurdle rate.
(2) Represents 1.75% annualized management fee.

TABLE OF CONTENTS

Example 3: Capital Gains Portion of Incentive Fee(*):

Alternative 1:

Assumptions

Year 1: \$20 million investment made in Company A (Investment A), and \$30 million investment made in Company B (Investment B)

Year 2: Investment A sold for \$50 million and fair market value (FMV) of Investment B determined to be \$32 million

Year 3: FMV of Investment B determined to be \$25 million

Year 4: Investment B sold for \$31 million

The capital gains portion of the incentive fee would be:

Year 1: None

Year 2: Capital gains incentive fee of \$6 million (\$30 million realized capital gains on sale of Investment A multiplied by 20%)

Year 3: None (\$5 million (20% multiplied by (\$30 million cumulative capital gains less \$5 million cumulative capital depreciation)) less \$6 million (previous capital gains fee paid in Year 2)

Year 4: Capital gains incentive fee of \$200,000 (\$6.2 million (\$31 million cumulative realized capital gains multiplied by 20%) less \$6 million (capital gains incentive fee taken in Year 2)

Alternative 2

Assumptions

Year 1: \$20 million investment made in Company A (Investment A), \$30 million investment made in Company B (Investment B) and \$25 million investment made in Company C (Investment C)

Year 2: Investment A sold for \$50 million, FMV of Investment B determined to be \$25 million and FMV of Investment C determined to be \$25 million

Year 3: FMV of Investment B determined to be \$27 million and Investment C sold for \$30 million

Year 4: FMV of Investment B determined to be \$35 million

Year 5: Investment B sold for \$20 million

The capital gains incentive fee, if any, would be:

Year 1: None

Year 2: \$5 million capital gains incentive fee (20% multiplied by \$25 million (\$30 million realized capital gains on Investment A less unrealized capital depreciation on Investment B)

Year 3: \$1.4 million capital gains incentive fee⁽¹⁾ (\$6.4 million (20% multiplied by \$32 million (\$35 million cumulative realized capital gains less \$3 million unrealized capital depreciation)) less \$5 million capital gains incentive fee received in Year 2

Year 4: None

Year 5: None (\$5 million (20% multiplied by \$25 million (cumulative realized capital gains of \$35 million less realized capital losses of \$10 million)) less \$6.4 million cumulative capital gains incentive fee paid in Year 2 and Year 3⁽²⁾)

The hypothetical amounts of returns shown are based on a percentage of our total net assets and assume no leverage.

*There is no guarantee that positive returns will be realized and actual returns may vary from those shown in this example.

TABLE OF CONTENTS

As illustrated in Year 3 of Alternative 1 above, if we were to be wound up on a date other than our fiscal year end (1) of any year, we may have paid aggregate capital gains incentive fees that are more than the amount of such fees that would be payable if we had been wound up on the fiscal year end of such year.

As noted above, it is possible that the cumulative aggregate capital gains fee received by our investment advisor (2) (\$6.4 million) is effectively greater than \$5 million (20% of cumulative aggregate realized capital gains less net realized capital losses or net unrealized depreciation (\$25 million)).

Payment of Our Expenses

All investment professionals of MC Advisors and/or its affiliates, when and to the extent engaged in providing investment advisory and management services to us, and the compensation and routine overhead expenses of personnel allocable to these services to us, are provided and paid for by MC Advisors and not by us. We bear all other out-of-pocket costs and expenses of our operations and transactions, including, without limitation:

- organization and offering;
- calculating our net asset value (including the cost and expenses of any independent valuation firm);
- fees and expenses incurred by MC Advisors payable to third parties, including agents, consultants or other advisors, in monitoring financial and legal affairs for us and in conducting research and due diligence on prospective investments and equity sponsors, analyzing investment opportunities, structuring our investment and monitoring our investments and portfolio companies on an ongoing basis (although none of MC Advisors' duties will be subcontracted to sub-advisors);
- interest payable on debt, if any, incurred to finance our investments;
- offerings of our common stock and other securities;
- investment advisory fees;
- administration fees and expenses, if any, payable under the Administration Agreement (including payments under the Administration Agreement between us and MC Management based upon our allocable portion of MC Management's overhead in performing its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs);
- transfer agent, dividend agent and custodial fees and expenses;
- federal and state registration fees;
- all costs of registration and listing our shares on any securities exchange;
- federal, state and local taxes;
- independent directors' fees and expenses;
- costs of preparing and filing reports or other documents required by the SEC or other regulators;
- costs of any reports, proxy statements or other notices to stockholders, including printing costs;
- fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;
- direct costs and expenses of administration, including printing, mailing, long distance telephone, copying, secretarial and other staff, independent auditors and outside legal costs;
- proxy voting expenses; and
- all other expenses incurred by us or MC Management in connection with administering our business.

TABLE OF CONTENTS

Duration and Termination

Unless terminated earlier as described below, the Investment Advisory Agreement will continue in effect from year to year if approved annually by our board of directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, and, in either case, if also approved by a majority of our directors who are not interested persons. The Investment Advisory Agreement automatically terminates in the event of its assignment, as defined in the 1940 Act, by MC Advisors and may be terminated by either party without penalty upon not less than 60 days written notice to the other. The holders of a majority of our outstanding voting securities may also terminate the Investment Advisory Agreement without penalty. See Risk Factors Risks Relating to Our Business and Structure We depend upon MC Advisors senior management for our success, and upon its access to the investment professionals of Monroe Capital and its affiliates and Risk Factors Risks Relating to Our Business and Structure MC Advisors can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

Indemnification

The Investment Advisory Agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, MC Advisors and its affiliates respective officers, directors, members, managers, stockholders and employees are entitled to indemnification from us from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Investment Advisory Agreement, except where attributable to gross negligence, willful misconduct, bad faith or reckless disregard of such person s duties under the Investment Advisory Agreement.

Administration Agreement

Pursuant to an Administration Agreement, MC Management furnishes us with office facilities and equipment and provides us clerical, bookkeeping and record keeping and other administrative services at such facilities. Under the Administration Agreement, MC Management performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records that we are required to maintain and preparing reports to our stockholders and reports filed with the SEC. MC Management also assists us in determining and publishing our net asset value, oversees the preparation and filing of our tax returns, prints and disseminates reports to our stockholders and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Under the Administration Agreement, MC Management also provides managerial assistance on our behalf to those portfolio companies that have accepted our offer to provide such assistance.

Payments under the Administration Agreement are equal to an amount based upon our allocable portion (subject to the review and approval of our board of directors) of MC Management s overhead in performing its obligations under the Administration Agreement, including rent and our allocable portion of the cost of our officers, including our chief financial officer and chief compliance officer and their respective staffs. Unless terminated earlier as described below, the Administration Agreement will continue in effect from year to year with the approval of our board of directors. The Administration Agreement may be terminated by either party without penalty upon 60 days written notice to the other party. MC Management may retain third parties to assist in providing administrative services to us. To the extent that MC Management outsources any of its functions, we pay the fees associated with such functions on a direct basis without profit to MC Management. We reimburse MC Management for the allocable portion (subject to the review

and approval of our board of directors) of MC Management's overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs. Under the Administration Agreement, amounts payable quarterly for administrative expenses covered under the Administration Agreement to MC Management were limited to the greater of (i) 0.375% of our average assets for such quarter and (ii) \$375,000 through December 31, 2013. For the years ended December 31, 2015, 2014 and 2013, we incurred \$2.9 million, \$2.9 million and

TABLE OF CONTENTS

\$2.4 million in administrative expenses (included within professional fees, administrative service fees and general and administrative expenses on the consolidated statements of operations) under the Administration Agreement, respectively, of which \$1.1 million, \$0.9 million and \$0.5 million, respectively, was related to MC Management overhead and salary allocation and paid directly to MC Management.

Indemnification

The Administration Agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, MC Management and its affiliates' respective officers, directors, members, managers, stockholders and employees are entitled to indemnification from us from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Administration Agreement, except where attributable to gross negligence, willful misconduct, bad faith or reckless disregard of such person's duties under the Administration Agreement.

License Agreement

We have entered into a license agreement with Monroe Capital under which Monroe Capital has agreed to grant us a non-exclusive, royalty-free license to use the name Monroe Capital. Under this agreement, we have a right to use the Monroe Capital name for so long as MC Advisors or one of its affiliates remains our investment advisor. Other than with respect to this limited license, we have no legal right to the Monroe Capital name. This license agreement will remain in effect for so long as the Investment Advisory Agreement with MC Advisors is in effect.

Staffing Agreement

We do not have any internal employees. We depend on the diligence, skill and network of business contacts of the senior investment professionals of MC Advisors to achieve our investment objective. MC Advisors is an affiliate of Monroe Capital and depends upon access to the investment professionals and other resources of Monroe Capital and Monroe Capital's affiliates to fulfill its obligations to us under the Investment Advisory Agreement. MC Advisors also depends upon Monroe Capital to obtain access to deal flow generated by the professionals of Monroe Capital and its affiliates. Under the Staffing Agreement, MC Management provides MC Advisors with the resources necessary to fulfill these obligations. The Staffing Agreement provides that MC Management will make available to MC Advisors experienced investment professionals and access to the senior investment personnel of Monroe Capital for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. The Staffing Agreement also includes a commitment that the members of MC Advisors' investment committee serve in such capacity. The Staffing Agreement remains in effect until terminated and may be terminated by either party without penalty upon 60 days' written notice to the other party. Services under the Staffing Agreement are provided to MC Advisors on a direct cost reimbursement basis, and such fees are not our obligation.

Board Approval of the Investment Advisory Agreement and Staffing Agreement

At a meeting of our board of directors held on October 22, 2015, the board, including our directors who are not interested persons as defined in the 1940 Act, voted unanimously to approve and continue the Investment Advisory

Agreement for another annual period in accordance with the requirements of the 1940 Act. The approval included consideration and approval of the specific individuals provided through the Staffing Agreement between MC Advisors and MC Management that comprise our investment committee. In its consideration of the Investment Advisory Agreement, our board of directors focused on information it had received relating to, among other things: (a) the nature, quality and extent of the advisory and other services to be provided to us by MC Advisors; (b) comparative data with respect to advisory fees or expense ratios paid by other business development companies with similar investment objectives; (c) our projected operating expenses; (d) the projected profitability of MC Advisors; (e) information about the services to be performed and the personnel performing such services under the Investment Advisory Agreement and the Staffing Agreement; and (f) the organizational capability and financial condition of MC Advisors and its affiliates.

TABLE OF CONTENTS

In reaching a decision to approve and continue the Investment Advisory Agreement and investment committee, our board of directors reviewed a significant amount of information and considered, among other things:

Nature, Quality and Extent of Services. Our board of directors reviewed information about the services to be performed and the personnel performing such services under the Investment Advisory Agreement and Staffing Agreement, including the specific approval of the members of the investment committee to be provided pursuant to the Staffing Agreement. Our board of directors considered the nature, extent and quality of the investment selection process employed by MC Advisors and the experience of the members of the investment committee. Our board of directors concluded that the services to be provided under the Investment Advisory Agreement are consistent with those of comparable business development companies described in the available market data.

The reasonableness of the fees paid to MC Advisors. Our board of directors considered comparative data based on publicly available information on other business development companies with respect to services rendered and the advisory fees (including the management fees and incentive fees) of other business development companies as well as our projected operating expenses and expense ratio compared to other business development companies. Our board of directors also considered the profitability of MC Advisors. Based upon its review, our board of directors concluded that the fees to be paid under the Investment Advisory Agreement are reasonable compared to other business development companies, and engaged in further discussion of the merits of increasing compensation to MC Advisors based on our investment performance.

Investment Performance. Our board of directors reviewed our investment performance as well as comparative data with respect to the investment performance of other externally managed business development companies. Our board of directors concluded that MC Advisors was delivering results consistent with our investment objective and that our investment performance was superior when compared to comparable business development companies over the most recently completed period.

Economies of Scale. Our board of directors addressed the potential for MC Advisors to realize economies of scale in managing our assets, and determined that at this time they did not expect economies of scale to be realized by MC Advisors.

In view of the variety of factors that our board of directors considered in connection with its evaluation of the Investment Advisory Agreement, it is not practical to quantify, rank or otherwise assign relative weights to the specific factors our board of directors considered in reaching its decision. Our board of directors did not undertake to make any specific determination as to whether any particular factor, or any aspect of any particular factor, was favorable or unfavorable to the ultimate determination of our board of directors. Rather, our board of directors based its approval on the totality of information presented to, and reviewed by, it. In considering the factors discussed above, individual directors may have given different weights to different factors.

Based on the information reviewed and the discussions detailed above, our board of directors, including all of the directors who are not interested persons as defined in the 1940 Act, concluded that the investment advisory fee rates and terms are fair and reasonable in relation to the services provided and approved the Investment Advisory Agreement and its continuation as being in the best interests of our stockholders. MC Advisors bears all expenses related to the services and personnel provided pursuant to the Staffing Agreement.

TABLE OF CONTENTS

RELATED PARTY TRANSACTIONS AND CERTAIN RELATIONSHIPS

We have entered into agreements with MC Advisors, in which our senior management and members of MC Advisors investment committee have ownership and financial interests. Members of our senior management and members of the investment committee also serve as principals of other investment managers affiliated with MC Advisors that do, and may in the future, manage investment funds, accounts or other investment vehicles with investment objectives similar to ours. Our senior management team holds equity interests in MC Advisors. In addition, our executive officers and directors and the principals of MC Advisors and members of the investment committee serve or may serve as officers, directors or principals of entities that operate in the same, or related, line of business as we do or of investment funds, accounts or other investment vehicles managed by our affiliates. These investment funds, accounts or other investment vehicles may have investment objectives similar to our investment objectives.

We may compete with other entities managed by MC Advisors and its affiliates for capital and investment opportunities. As a result, we may not be given the opportunity to participate in certain investments made by investment funds, accounts or other investment vehicles managed by MC Advisors or its affiliates or by members of the investment committee. However, in order to fulfill its fiduciary duties to each of its clients, MC Advisors intends to allocate investment opportunities in a manner that is fair and equitable over time and is consistent with MC Advisors' allocation policy so that we are not disadvantaged in relation to any other client. See **Risks** **Risks Relating to Our Business and Structure**. There may be conflicts related to obligations that MC Advisors' senior investment professionals and members of its investment committee have to other clients. MC Advisors has agreed with our board of directors that allocations among us and other investment funds affiliated with MC Advisors will be made based on capital available for investment in the asset class being allocated. We expect that our available capital for investments will be determined based on the amount of cash on hand, existing commitments and reserves, if any, and the targeted leverage level and targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors or as imposed by applicable laws, rules, regulations or interpretations.

Policies and Procedures for Managing Conflicts

Affiliates of MC Advisors manage other assets in three closed-end funds, two small business investment companies and seven private funds that also have an investment strategy focused primarily on senior, unitranche and junior secured debt and to a lesser extent, unsecured subordinated debt to lower middle-market companies. In addition, MC Advisors manages our wholly-owned SBIC subsidiary, MRCC SBIC, as the manager of MRCC SBIC's general partner, and it may manage other entities in the future with an investment focus similar to ours. To the extent that we compete with entities managed by MC Advisors or any of its affiliates for a particular investment opportunity, MC Advisors will allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) its internal conflict of interest and allocation policies, (b) the requirements of the Advisers Act and (c) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates. MC Advisors' allocation policies are intended to ensure that we may generally share equitably with other investment funds or other investment vehicles managed by MC Advisors or its affiliates in investment opportunities, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer which may be suitable for us and such other investment funds or other investment vehicles.

MC Advisors and/or its affiliates may in the future sponsor or manage investment funds, accounts, or other investment vehicles with similar or overlapping investment strategies and have put in place a conflict-resolution policy that addresses the co-investment restrictions set forth under the 1940 Act. MC Advisors will seek to ensure an equitable

allocation of investment opportunities when we are able to invest alongside other accounts managed by MC Advisors and its affiliates. We received exemptive relief from the SEC on October 15, 2014 that permits greater flexibility relating to co-investments, subject to certain conditions. When we invest alongside such other accounts as permitted under the 1940 Act, pursuant to SEC staff interpretation, and by our exemptive relief from the SEC that would permit greater flexibility relating to co-investments, such investments will be made consistent with such relief and MC Advisors' allocation policy. Under this allocation policy, a fixed percentage of each opportunity, which may vary based on asset class and from time to time, will be offered to us and similar eligible accounts, as periodically determined by MC Advisors and approved by our board of directors, including a majority of our independent

100

TABLE OF CONTENTS

directors. The allocation policy provides that allocations among us and other accounts will generally be made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors, including a majority of our independent directors. It is our policy to base our determinations as to the amount of capital available for investment on such factors as the amount of cash on hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors, or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. In situations where co-investment with other entities sponsored or managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, MC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. MC Advisors will make these determinations based on its policies and procedures which will generally require that such opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods.

Co-Investment Opportunities

We have in the past and expect in the future to co-invest on a concurrent basis with other affiliates, unless doing so is impermissible with existing regulatory guidance, applicable regulations and our allocation procedures. Certain types of negotiated co-investments may be made only if we receive an order from the SEC permitting us to do so. We received exemptive relief from the SEC on October 15, 2014 that permits greater flexibility relating to co-investment, subject to certain conditions. When we invest alongside such other accounts as permitted under the 1940 Act, pursuant to SEC staff interpretation, and by our exemptive relief from the SEC that would permit greater flexibility relating to co-investments, such investments will be made consistent with such relief and MC Advisors' allocation policy.

Material Nonpublic Information

Our senior management, members of MC Advisors' investment committee and other investment professionals from MC Advisors may serve as directors of, or in a similar capacity with, companies in which we invest or in which we are considering making an investment. Through these and other relationships with a company, these individuals may obtain material nonpublic information that might restrict our ability to buy or sell the securities of such company under the policies of the company or applicable law.

Investment Advisory Agreement

We have entered into an Investment Advisory Agreement with MC Advisors and pay MC Advisors a management fee and incentive fee. The incentive fee is computed and paid on income that we may not have yet received in cash. This fee structure may create an incentive for MC Advisors to invest in certain types of securities that may have a high degree of risk. Additionally, we rely on investment professionals from MC Advisors to assist our board of directors with the valuation of our portfolio investments. MC Advisors' management fee and incentive fee are based on the value of our investments and there may be a conflict of interest when personnel of MC Advisors are involved in the valuation process for our portfolio investments. See Management and Other Agreements Investment Advisory Agreement. The base management fees under the Investment Advisory Agreement for the years ended December 31, 2015, 2014 and 2013 totaled \$5.1 million, \$4.1 million and \$2.8 million, respectively. The incentive fees under the Investment Advisory Agreement for the years ended December 31, 2015, 2014 and 2013 totaled \$4.7 million, \$3.5 million and \$1.5 million, respectively.

Administration Agreement

We have entered into an administration agreement, pursuant to which MC Management furnishes us with office facilities, equipment and clerical, bookkeeping, recordkeeping and other administrative services at such facilities.

Under our administration agreement, MC Management performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records which we are required to maintain and preparing reports to our stockholders and reports filed with the SEC.

TABLE OF CONTENTS

License Agreement

We have entered into a license agreement with Monroe Capital under which Monroe Capital has agreed to grant us a non-exclusive, royalty-free license to use the name Monroe Capital for specified purposes in our business. Under this agreement, we have a right to use the Monroe Capital name, subject to certain conditions, for so long as MC Advisors or one of its affiliates remains our investment advisor. Other than with respect to this limited license, we have no legal right to the Monroe Capital name.

102

TABLE OF CONTENTS**CONTROL PERSONS AND PRINCIPAL STOCKHOLDERS**

As of June 16, 2016, no person will be deemed to control us, as such term is defined in the 1940 Act. The following table sets forth information with respect to the beneficial ownership of our common stock by:

each person known to us to own, of record or beneficially, more than 5% of the outstanding shares of our common stock;

each of our directors and each executive officers; and
all of our directors and executive officers as a group.

Beneficial ownership is determined in accordance with the federal securities laws and includes voting or investment power with respect to the securities and has been determined in accordance with Rule 13d-3 of the Exchange Act.

Percentage of ownership is based on 13,008,007 shares of our common stock issued and outstanding as of June 16, 2016. The address for each of our directors is c/o Monroe Capital Corporation, 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606.

Name and Address	Number of Shares Beneficially Owned	Percentage of Class
Interested Directors:		
Theodore L. Koenig	203,133	1.6 %
Aaron D. Peck	4,775	*
Jeffrey D. Steele	11,575	*
Independent Directors:		
Thomas J. Allison	9,898	*
Jeffrey A. Golman	2,000	*
Jorde M. Nathan	none	n/a
Robert S. Rubin	23,174	*
All officers and directors as a group (7 persons)	254,555	2.0 %
Advisors Asset Management, Inc. ⁽¹⁾	1,358,023	10.4 %
William Blair & Company, LLC ⁽²⁾	740,071	5.7 %

* Represents less than 1.0%.

The address for Advisors Asset Management, Inc. is 18925 Base Camp Road, Monument, Colorado 80132. The number of shares beneficially owned is based on a Schedule 13G/A filed by Advisors Asset Management, Inc. on February 10, 2016, which Schedule 13G/A reflects voting power over 1,358,023 shares by Advisors Asset Management, Inc.

The address for William Blair & Company, LLC. is 222 W. Adams St., Chicago, IL 60606. The number of shares beneficially owned is based on a Schedule 13G/A filed by William Blair & Company, LLC on March 22, 2016, which Schedule 13G/A reflects voting power over 38,903 shares by William Blair & Company, LLC.

The following table sets out the dollar range of our equity securities beneficially owned by each of our directors as of December 31, 2015. We are not part of a family of investment companies, as that term is defined in the 1940 Act.

Name of Director

	Dollar Range of Equity Securities in Monroe Capital Corporation ⁽¹⁾⁽²⁾
Interested Directors:	
Theodore L. Koenig	over \$100,000
Aaron D. Peck	\$50,001 \$100,000
Jeffrey D. Steele	over \$100,000
Independent Directors:	
Thomas J. Allison	over \$100,000
Jeffrey A. Golman	\$10,001 \$50,000
Jorde M. Nathan	none
Robert S. Rubin	over \$100,000

(1) Dollar ranges are as follows: none, \$1 \$10,000, \$10,001 \$50,000, \$50,001 \$100,000, or over \$100,000.

(2) The dollar range of equity securities beneficially owned by the members of our board of directors is based on \$13.09 per share, which was the closing stock price on December 31, 2015.

103

TABLE OF CONTENTS

DETERMINATION OF NET ASSET VALUE

The net asset value per share of our outstanding shares of common stock is determined quarterly by dividing the value of total assets minus liabilities by the total number of shares outstanding. We calculate the value of our total assets in accordance with the following procedures.

Investments for which market quotations are readily available and within a recent date are valued at such market quotations. We may also obtain indicative prices with respect to certain of our investments from pricing services or brokers or dealers in order to value such investments. We expect that there will not be a readily available market value within a recent date for many of our investments; those debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value as determined in good faith by our board of directors using a documented valuation policy and a consistently applied valuation process.

Our board of directors is ultimately and solely responsible for determining the fair value of the portfolio investments that are not publicly traded, whose market prices are not readily available on a quarterly basis in good faith or any other situation where portfolio investments require a fair value determination.

With respect to investments for which market quotations are not readily available or for which no indicative prices from pricing services or brokers or dealers have been received, our board of directors undertakes a multi-step valuation process each quarter, as described below:

the quarterly valuation process begins with each portfolio company or investment being initially evaluated and rated by the investment professionals responsible for the credit monitoring of the portfolio investment;

preliminary valuation conclusions are then documented and discussed with the investment committee;

our board of directors engages one or more independent valuation firm(s) to conduct fair value appraisals of material investments for which market quotations are not readily available. These fair value appraisals for material investments are received at least once in every calendar year for each portfolio company investment, but are generally received quarterly;

our audit committee of the board of directors reviews the preliminary valuations of MC Advisors and of the independent valuation firm(s) and responds and supplements the valuation recommendations to reflect any comments; and

our board of directors discusses these valuations and determines the fair value of each investment in the portfolio in good faith based on the input of MC Advisors, the independent valuation firm(s) and the audit committee.

The valuation technique utilized in the determination of fair value is affected by a wide variety of factors including the type of investment, whether the investment is new and not yet established in the marketplace, and other characteristics

particular to the transaction. Management generally uses the yield approach to determine fair value of debt investments, as long as it is appropriate. If there is deterioration in credit quality or a debt investment is in work-out status, management may consider other factors in determining the fair value, including the value attributable to the debt investment from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis. The types of factors that may be taken into account in the determination of the fair value of our investments include, as relevant, the markets in which the portfolio company does business, overall market conditions, changes in the interest rate environment and the credit markets generally, comparisons to publicly traded securities, the enterprise value of the portfolio company, the portfolio company's financial performance and ability to make scheduled payments, the nature and net realizable value of any collateral and other relevant factors. See Note 4 to the accompanying consolidated financial statements for additional information on the determination of fair value.

TABLE OF CONTENTS

We report our investments at fair value with changes in value reported through our consolidated statements of operations under the caption unrealized appreciation (depreciation) on investments. In determining fair value, we are required to assume that portfolio investments are to be sold in the principal market to market participants, or in the absence of a principal market, the most advantageous market, which may be a hypothetical market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. The market in which we can exit portfolio investments with the greatest volume and level activity is considered our principal market.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our consolidated financial statements express the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our consolidated financial statements.

105

TABLE OF CONTENTS

SALES OF COMMON STOCK BELOW NET ASSET VALUE

On June 24, 2015, our stockholders authorized us, subject to approval of our board of directors and certain limitations set forth below, to sell or otherwise issue shares of our common stock at a discount from net asset value per share for a period of twelve months. In order to sell shares pursuant to this authorization a majority of our directors who have no financial interest in the sale or issuance and a majority of our independent directors must (a) find that the sale or issuance is in our best interests and in the best interests of our stockholders, and (b) in consultation with any underwriter or underwriters of the offering, make a good faith determination as of a time either immediately prior to the first solicitation by us or on our behalf of firm commitments to purchase such shares, or immediately prior to the issuance of such shares, that the price at which such shares are to be sold or otherwise issued is not less than a price which closely approximates the market value of such shares, less any distributing commission or discount. Any offering of common stock below net asset value per share will be designed to raise capital for investment in accordance with our investment objective.

In making a determination that an offering below net asset value per share is in our and our stockholders' best interests, our board of directors would consider a variety of factors, including:

The effect that an offering below net asset value per share would have on our stockholders, including the potential dilution they would experience as a result of the offering;

The amount per share by which the offering price per share and the net proceeds per share are less than the most recently determined net asset value per share;

The relationship of recent market prices of our common stock to net asset value per share and the potential impact of the offering on the market price per share of our common stock;

Whether the estimated offering price would closely approximate the market value of our shares, less distributing commissions or discounts, and would not be below current market price;

The potential market impact of being able to raise capital in the current financial market;

The nature of any new investors anticipated to acquire shares in the offering;

The anticipated rate of return on and quality, type and availability of investments;

The leverage available to us, both before and after the offering and other borrowing terms; and

The potential investment opportunities available relative to the potential dilutive effect of additional capital at the time of the offering.

Our board of directors will also consider the fact that a sale of shares of common stock at a discount will benefit MC Advisors, as MC Advisors will earn additional investment management fees on the proceeds of such offerings, as it would from the offering of any of our other securities or from the offering of common stock at premium to net asset value per share.

Sales or other issuances by us of our common stock at a discount from net asset value pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering.

The following three headings and accompanying tables explain and provide hypothetical examples on the impact of an offering at a price less than net asset value per share on three different sets of investors:

existing stockholders who do not purchase any shares in the offering;

existing stockholders who purchase a relatively small amount of shares in the offering or a relatively large amount of shares in the offering; and

new investors who become stockholders by purchasing shares in the offering.

106

TABLE OF CONTENTS

Impact on Existing Stockholders who do not Participate in the Offering

Our existing stockholders who do not participate in an offering below net asset value per share or who do not buy additional shares in the secondary market at the same or lower price we obtain in the offering (after expenses and commissions) face the greatest potential risks. These stockholders will experience an immediate decrease (often called dilution) in the net asset value of the shares they hold and their net asset value per share. These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we will experience in our assets, potential earning power and voting interests due to the offering. These stockholders may also experience a decline in the market price of their shares, which often reflects, to some degree, announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following table illustrates the level of net asset value dilution that would be experienced by a nonparticipating stockholder in four different hypothetical common stock offerings of different sizes and levels of discount from net asset value per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

The examples assume that Company XYZ has 1,000,000 shares of common stock outstanding, \$15,000,000 in total assets and \$5,000,000 in total liabilities. The current net asset value and net asset value per share are thus \$10,000,000 and \$10.00. The table illustrates the dilutive effect on nonparticipating Stockholder A of (1) an offering of 50,000 shares (5% of the outstanding shares) at \$9.50 per share after offering expenses and commissions (a 5% discount from net asset value); (2) an offering of 100,000 shares (10% of the outstanding shares) at \$9.00 per share after offering expenses and commissions (a 10% discount from net asset value); (3) an offering of 200,000 shares (20% of the outstanding shares) at \$8.00 per share after offering expenses and commissions (a 20% discount from net asset value); and (4) an offering of 330,000 shares (33% of the outstanding shares) at \$0.01 per share after offering expenses and commissions (effectively a 100% discount from net asset value). Because we are not limited as to the amount of discount from net asset value at which we can offer shares, the fourth example on the following table (at an offering price of \$0.01 per share) is included, however, we will not offer shares at a 100% discount to net asset value. The acronym NAV stands for net asset value.

TABLE OF CONTENTS**Impact on Existing Stockholders who Participate in the Offering**

Our existing stockholders who participate in an offering below net asset value per share or who buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after expenses and commissions) will experience the same types of net asset value dilution as the nonparticipating stockholders, albeit at a lower level, to the extent they purchase less than the same percentage of the discounted offering as their interest in our shares immediately prior to the offering. The level of net asset value dilution will decrease as the number of shares such stockholders purchase increases. Existing stockholders who buy more than such percentage will experience net asset value dilution but will, in contrast to existing stockholders who purchase less than their proportionate share of the offering, experience an increase (often called accretion) in net asset value per share over their investment per share and will also experience a disproportionately greater increase in their participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to the offering. The level of accretion will increase as the excess number of shares such stockholder purchases increases. Even a stockholder who over participates will, however, be subject to the risk that we may make additional discounted offerings in which such stockholder does not participate, in which case such a stockholder will experience net asset value dilution as described above in such subsequent offerings. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and the level of discounts increases.

The following table illustrates the level of dilution and accretion in the hypothetical 20% discount offering from the prior table (Example 3) for a stockholder that acquires shares equal to (1) 50% of its proportionate share of the offering (i.e., 1,000 shares, which is 0.5% of an offering of 200,000 shares) rather than its 1.0% proportionate share and (2) 150% of such percentage (i.e. 3,000 shares, which is 1.5% of an offering of 200,000 shares rather than its 1.0% proportionate share). The prospectus supplement pursuant to which any discounted offering is made will include a table for these examples based on the actual number of shares in such offering and the actual discount from the most recently determined net asset value per share. It is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

Impact on New Investors

Investors who are not currently stockholders and who participate in an offering below net asset value but whose investment per share is greater than the resulting net asset value per share due to selling compensation and expenses paid by the issuer will experience an immediate decrease, albeit small, in the net asset value of their shares and their net asset value per share compared to the price they pay for their shares. Investors who are not currently stockholders and who participate in an offering below net asset value per share and whose investment per share is also less than the resulting net asset value per share due to selling compensation and expenses paid by the issuer being significantly less than the discount per share will experience an immediate increase in the net asset value of their shares and their net asset value per share compared to the price they pay for their shares. These investors will experience a disproportionately greater participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests. These investors will, however, be subject to the risk that we may make additional discounted offerings in which such new stockholder does not participate, in which case such new stockholder will experience dilution as described above in such subsequent offerings. These investors may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following table illustrates the level of dilution or accretion for new investors that would be experienced by a new investor in the same hypothetical 5%, 10%, 20% and 100% discounted offerings as described in the first table above.

The illustration is for a new investor who purchases the same percentage (1.0%) of the shares in the offering as Stockholder A in the prior examples held immediately prior to the offering. The prospectus supplement pursuant to which any discounted offering is made will include a table for these examples based on the actual number of shares in such offering and the actual discount from the most recently determined net asset value per share. It is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

TABLE OF CONTENTS

DIVIDEND REINVESTMENT PLAN

We have adopted a dividend reinvestment plan that provides for reinvestment of our dividends and other distributions on behalf of our stockholders, unless a stockholder elects to receive cash as provided below. As a result, if our board of directors authorizes, and we declare, a cash dividend or other distribution, then our stockholders who have not opted out of our dividend reinvestment plan will have their cash distribution automatically reinvested in additional shares of our common stock, rather than receiving the cash distribution.

No action is required on the part of a registered stockholder to have their cash dividend or other distribution reinvested in shares of our common stock. A registered stockholder may elect to receive an entire distribution in cash by notifying American Stock Transfer & Trust, LLC, the plan administrator and our transfer agent and registrar, in writing so that such notice is received by the plan administrator no later than the record date for distributions to stockholders. The plan administrator will set up an account for shares acquired through the plan for each stockholder who has not elected to receive dividends or other distributions in cash and hold such shares in non-certificated form. Upon request by a stockholder participating in the plan, received in writing not less than 10 days prior to the record date, the plan administrator will, instead of crediting shares to the participant's account, issue a certificate registered in the participant's name for the number of whole shares of our common stock and a check for any fractional share.

Those stockholders whose shares are held by a broker or other financial intermediary may receive dividends and other distributions in cash by notifying their broker or other financial intermediary of their election.

We intend to use primarily newly issued shares to implement the plan, whether our shares are trading at a premium or at a discount to net asset value. However, we reserve the right to purchase shares in the open market in connection with our implementation of the plan. The number of shares to be issued to a stockholder is determined by dividing the total dollar amount of the distribution payable to such stockholder by the market price per share of our common stock at the close of regular trading on The Nasdaq Global Select Market on the date for such distribution. Market price per share on that date will be the closing price for such shares on The Nasdaq Global Select Market or, if no sale is reported for such day, at the average of their reported bid and asked prices. The number of shares of our common stock to be outstanding after giving effect to payment of the dividend or other distribution cannot be established until the value per share at which additional shares will be issued has been determined and elections of our stockholders have been tabulated.

There will be no brokerage charges or other charges to stockholders who participate in the plan. The plan administrator's fees will be paid by us. If a participant elects by written notice to the plan administrator to have the plan administrator sell part or all of the shares held by the plan administrator in the participant's account and remit the proceeds to the participant, the plan administrator is authorized to deduct a \$15.00 transaction fee plus a \$0.10 per share brokerage commissions from the proceeds.

Stockholders who receive dividends and other distributions in the form of stock are subject to the same U.S. federal, state and local tax consequences as are stockholders who elect to receive their distributions in cash; however, since their cash dividends will be reinvested, such stockholders will not receive cash with which to pay any applicable taxes on reinvested dividends. A stockholder's basis for determining gain or loss upon the sale of stock received in a dividend or other distribution from us will be equal to the total dollar amount of the distribution payable to the stockholder. Any stock received in a dividend or other distribution will have a new holding period for tax purposes commencing on the day following the day on which the shares are credited to the U.S. stockholder's account.

Participants may terminate their accounts under the plan by notifying the plan administrator via its website at www.amstock.com, by filling out the transaction request form located at bottom of their statement and sending it to the plan administrator.

The plan may be terminated by us upon notice in writing mailed to each participant at least 30 days prior to any record date for the payment of any dividend by us. All correspondence concerning the plan should be directed to the plan administrator by mail at Post Office Box 922, Wall Street Station, New York, New York 10269-0560, or by the Plan Administrator s Interactive Voice Response System at 1 (888) 430-5746.

TABLE OF CONTENTS

If you withdraw or the plan is terminated, you will receive the number of whole shares in your account under the plan and a cash payment for any fraction of a share in your account.

If you hold your common stock with a brokerage firm that does not participate in the plan, you will not be able to participate in the plan and any dividend reinvestment may be effected on different terms than those described above. In addition, if you hold your common stock with a brokerage firm that participates in the plan, you may not be able to transfer the shares to another broker and continue to participate in the plan. Consult your financial advisor for more information.

112

TABLE OF CONTENTS

MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion is a general summary of the material U.S. federal income tax considerations applicable to us and to an investment in our shares of common stock. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. For example, we have not described certain considerations that may be relevant to certain types of holders subject to special treatment under U.S. federal income tax laws, including stockholders subject to the alternative minimum tax, tax-exempt organizations, insurance companies, dealers in securities, pension plans and trusts, financial institutions, U.S. stockholders (as defined below) whose functional currency is not the U.S. dollar, persons who mark-to-market shares of our common stock and persons who hold our shares as part of a straddle, hedge or conversion transaction. This summary assumes that investors hold our common stock as capital assets (within the meaning of the Code). The discussion is based upon the Code, Treasury regulations, and administrative and judicial interpretations, each as of the date of this prospectus and all of which are subject to change, possibly retroactively, which could affect the continuing validity of this discussion. We have not sought and will not seek any ruling from the Internal Revenue Service, or the IRS, regarding any offering of our securities. This summary does not discuss any aspects of U.S. estate or gift tax or foreign, state or local tax. It does not discuss the special treatment under U.S. federal income tax laws that could result if we invested in tax-exempt securities or certain other investment assets.

For purposes of this discussion, a U.S. stockholder means a beneficial owner of shares of our common stock that is for U.S. federal income tax purposes:

a citizen or individual resident of the United States;
a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;
an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
a trust if either a U.S. court can exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of its substantial decisions or the trust was in existence on August 20, 1996, was treated as a U.S. person prior to that date, and has made a valid election to be treated as a U.S. person.

For purposes of this discussion, a Non-U.S. stockholder means a beneficial owner of shares of our common stock that is not a U.S. stockholder.

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds shares of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A prospective investor that is a partner in a partnership that will hold shares of our common stock should consult its tax advisors with respect to the purchase, ownership and disposition of shares of our common stock.

Tax matters are very complicated and the tax consequences to an investor of an investment in our shares of common stock will depend on the facts of his, her or its particular situation. We urge investors to consult their own tax advisors regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty, and the effect of any possible changes in the tax laws.

Election to Be Taxed as a RIC

As a BDC, we have elected to be treated as a RIC under Subchapter M of the Code. As a RIC, we generally will not have to pay corporate-level federal income taxes on any ordinary income or capital gains that we timely distribute to our stockholders as dividends. To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements (as described below). In addition, we must distribute to our stockholders, for each taxable year, at least 90% of our investment company taxable income, which is generally our net ordinary income plus the excess of realized net short-term capital gains over realized net long-term capital losses (the Annual Distribution Requirement).

113

TABLE OF CONTENTS

Generally, we would expect these distributions to be taxable to our stockholders as ordinary income and not to be eligible for reduced maximum tax rates associated with qualified dividends.

Taxation as a RIC

If we continue to:

qualify as a RIC; and
satisfy the Annual Distribution Requirement;

then we will not be subject to U.S. federal income tax on the portion of our investment company taxable income and net capital gains, defined as net long-term capital gains in excess of net short-term capital losses, we distribute to stockholders. We will be subject to U.S. federal income tax at the regular corporate rates on any net income or net capital gain not distributed (or deemed distributed) to our stockholders.

We will be subject to a 4% nondeductible federal excise tax on our undistributed income unless we distribute in a timely manner an amount at least equal to the sum of (a) 98% of our ordinary income for each calendar year, (b) 98.2% of our capital gain net income (both long-term and short-term) for the one-year period ending October 31 in that calendar year and (c) any income realized, but not distributed, in the preceding years (the Excise Tax Avoidance Requirement). For this purpose, however, any ordinary income or capital gain net income retained by us that is subject to corporate income tax for the tax year ending in that calendar year will be considered to have been distributed by year end. For the years ended December 31, 2015, 2014 and 2013 we recorded \$0.1 million, \$0.1 million and zero within general and administrative expenses on our consolidated statements of operations for U.S. federal excise tax.

In order to qualify as a RIC for federal income tax purposes, we must, among other things:

meet the Annual Distribution Requirement;

qualify to be treated as a business development company under the 1940 Act at all times during each taxable year; derive in each taxable year at least 90% of our gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale of stock or other securities, or other income derived with respect to our business of investing in such stock or securities, and net income derived from interests in qualified publicly traded partnerships (partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends and other permitted RIC income) (the 90% Income Test); and

diversify our holdings so that at the end of each quarter of the taxable year: at least 50% of the value of our assets consists of cash, cash equivalents, U.S. government securities, securities of other RICs, and other securities if such other securities of any one issuer do not represent more than 5% of the value of our assets or more than 10% of the outstanding voting securities of the issuer (which for these purposes includes the equity securities of a qualified publicly traded partnership); and no more than 25% of the value of our assets is invested in the securities, other than U.S. government securities or securities of other RICs, of one issuer or of two or more issuers that are controlled, as determined under applicable tax rules, by us and that are engaged in the same or similar or related trades or businesses or in the securities of one or more qualified publicly traded partnerships (the Diversification Tests).

To the extent that we invest in entities treated as partnerships for federal income tax purposes (other than a qualified publicly traded partnership), we generally must include the items of gross income derived by the partnerships for purposes of the 90% Income Test, and the income that is derived from a partnership (other than a qualified publicly traded partnership) will be treated as qualifying income for purposes of the 90% Income Test only to the extent that such income is attributable to items of income of the partnership which would be qualifying income if realized by us

directly. In addition, we generally must take into account our

TABLE OF CONTENTS

proportionate share of the assets held by partnerships (other than a qualified publicly traded partnership) in which we are a partner for purposes of the Diversification Tests.

In order to prevent our receipt of income that would not satisfy the 90% Income Test, we may establish one or more special purpose corporations to hold assets from which we do not anticipate earning dividend, interest or other qualifying income under the 90% Income Test. Any investments held through a special purpose corporation would generally be subject to federal income taxes and other taxes, and therefore would be expected to achieve a reduced after-tax yield.

We may be required to recognize taxable income in circumstances in which we do not receive a corresponding payment in cash. For example, if we hold debt obligations that are treated under applicable tax rules as having original issue discount (such as debt instruments with payment-in-kind interest or, in certain cases, increasing interest rates or issued with warrants), we must include in income each year a portion of the original issue discount that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. We may also have to include in our income other amounts that we have not yet received in cash, such as deferred loan origination fees that are paid after origination of the loan or are paid in non-cash compensation such as warrants or stock. We anticipate that a portion of our income may constitute original issue discount or other income required to be included in taxable income prior to receipt of cash.

Because any original issue discount or other amounts accrued will be included in our investment company taxable income for the year of the accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement, even though we will not have received any corresponding cash amount. As a result, we may have difficulty meeting the Annual Distribution Requirement. We may have to sell some of our investments at times and/or at prices we do not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities for this purpose. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus become subject to corporate-level federal income tax.

Gain or loss realized by us from warrants acquired by us as well as any loss attributable to the lapse of such warrants generally will be treated as capital gain or loss. Such gain or loss generally will be long-term or short-term, depending on how long we held a particular warrant.

Our investments in non-U.S. securities may be subject to non-U.S. income, withholding and other taxes. In that case, our yield on those securities would be decreased. Stockholders will generally not be entitled to claim a credit or deduction with respect to non-U.S. taxes paid by us.

If we purchase shares in a passive foreign investment company, (a PFIC), we may be subject to federal income tax on a portion of any excess distribution or gain from the disposition of such shares even if such income is distributed as a taxable dividend by us to our stockholders. Additional charges in the nature of interest may be imposed on us in respect of deferred taxes arising from such distributions or gains. If we invest in a PFIC and elect to treat the PFIC as a qualified electing fund (a QEF) under the Code, in lieu of the foregoing requirements, we will be required to include in income each year a portion of the ordinary earnings and net capital gain of the QEF, even if such income is not distributed to us. Alternatively, we can elect to mark-to-market at the end of each taxable year our shares in a PFIC; in that case, we will recognize as ordinary income any increase in the value of such shares and as ordinary loss any decrease in such value to the extent it does not exceed prior increases included in income. Under either election, we may be required to recognize in a year income in excess of our distributions from PFICs and our proceeds from dispositions of PFIC stock during that year, and such income will be taken into account for purposes of the Annual Distribution Requirement and the 4% federal excise tax.

Under Section 988 of the Code, gain or loss attributable to fluctuations in exchange rates between the time we accrue income, expenses, or other liabilities denominated in a foreign currency and the time we actually collect such income or pay such expenses or liabilities is generally treated as ordinary income or loss. Similarly, gain or loss on foreign currency forward contracts and the disposition of debt denominated in a foreign currency, to the extent attributable to fluctuations in exchange rates between the acquisition and disposition dates, are also treated as ordinary income or loss.

TABLE OF CONTENTS

If we use leverage, we may be subject to certain financial covenants that could limit our ability to make distributions to our stockholders. In addition, under the 1940 Act, we are not permitted to make distributions to our stockholders while our debt obligations and other senior securities are outstanding unless certain asset coverage tests are met. If we are unable to make sufficient distributions to satisfy the Annual Distribution Requirement, we may fail to qualify as a RIC.

Although we do not expect to do so, we will be authorized (subject to our financial covenants and 1940 Act asset coverage tests) to borrow funds and to sell assets in order to satisfy the Annual Distribution Requirement and to eliminate or minimize our liability for federal income tax and the 4% federal excise tax. However, our ability to dispose of assets to make distributions may be limited by (1) the illiquid nature of our portfolio and/or (2) other requirements relating to our status as a RIC, including the Diversification Tests. If we dispose of assets in order to meet the Annual Distribution Requirement or to avoid the 4% federal excise tax, we may make such dispositions at times that, from an investment standpoint, are not advantageous.

If we fail to satisfy the Annual Distribution Requirement or otherwise fail to qualify as a RIC in any taxable year, and certain relief provisions are not available, we will be subject to tax in that year on all of our taxable income, regardless of whether we make any distributions to our stockholders. In that case, all of such income will be subject to corporate-level federal income tax, reducing the amount available to be distributed to our stockholders. See Failure to Qualify as a RIC.

As a RIC, we are not allowed to carry forward or carry back a net operating loss for purposes of computing our investment company taxable income in other taxable years. We generally are permitted to carry forward for an indefinite period any capital losses not used to offset capital gains. However, future transactions that we engage in may cause our ability to use any capital loss carryforwards, and unrealized losses once realized, to be limited under Section 382 of the Code.

Certain of our investment practices may be subject to special and complex federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower taxed long-term capital gain and qualified dividend income into higher taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause us to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions, and (vii) produce income that will not be qualifying income for purposes of the 90% Income Test. We will monitor our transactions and may make certain tax elections in order to mitigate the effect of these provisions.

As described above, to the extent that we invest in equity securities of entities that are treated as partnerships for federal income tax purposes, the effect of such investments for purposes of the 90% Income Test and the Diversification Tests will depend on whether or not the partnership is a qualified publicly traded partnership (as defined in the Code). If the partnership is a qualified publicly traded partnership, the net income derived from such investments will be qualifying income for purposes of the 90% Income Test and will be securities for purposes of the Diversification Tests. If the partnership, however, is not treated as a qualified publicly traded partnership, then the consequences of an investment in the partnership will depend upon the amount and type of income and assets of the partnership allocable to us. The income derived from such investments may not be qualifying income for purposes of the 90% Income Test and, therefore, could adversely affect our qualification as a RIC. We intend to monitor our investments in equity securities of entities that are treated as partnerships for federal income tax purposes to prevent our disqualification as a RIC.

Failure to Qualify as a RIC

If we fail the 90% Income Test or the Diversification Tests for any taxable year or quarter of such taxable year, we may nevertheless continue to qualify as a RIC for such year if certain relief provisions of the Code apply (which, among other things may require us to pay certain corporate-level federal taxes or to dispose of certain assets). If we are unable to qualify for treatment as a RIC and are unable to cure the failure, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. In the event of such a failure to qualify, distributions, including distributions of net long-term capital gain, would generally be taxable to our

TABLE OF CONTENTS

stockholders as ordinary dividend income (currently generally eligible for the 20% maximum rate in the case of U.S. individual stockholders) to the extent of our current and accumulated earnings and profits. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends received deduction. Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of the stockholder's tax basis, and any remaining distributions would be treated as a capital gain. If we fail to qualify as a RIC for two or more taxable years, to qualify as a RIC in a subsequent year we may be subject to regular corporate tax on any net built-in gains with respect to certain of our assets (i.e., the excess of the aggregate gains, including items of income, over aggregate losses that would have been realized with respect to such assets if we had been liquidated) that we elect to recognize on requalification or when recognized over the next ten years.

The remainder of this discussion assumes that we qualify as a RIC and have satisfied the Annual Distribution Requirement.

Taxation of U.S. Stockholders

Whether an investment in shares of our common stock is appropriate for a U.S. stockholder will depend upon that person's particular circumstances. An investment in shares of our common stock by a U.S. stockholder may have adverse tax consequences. The following summary generally describes certain federal income tax consequences of an investment in shares of our common stock by taxable U.S. stockholders and not by U.S. stockholders that are generally exempt from federal income taxation. U.S. stockholders should consult their own tax advisors before making an investment in our common stock.

Distributions by us generally are taxable to U.S. stockholders as ordinary income or capital gains. Distributions of our investment company taxable income (which is, generally, our net ordinary income plus net short-term capital gains in excess of net long-term capital losses) will be taxable as ordinary income to U.S. stockholders to the extent of our current or accumulated earnings and profits, whether paid in cash or reinvested in additional shares of our common stock. To the extent such distributions paid by us to non-corporate stockholders (including individuals) are attributable to dividends from U.S. corporations and certain qualified foreign corporations, such distributions generally will be eligible for a maximum federal tax rate of either 15% or 20% (depending on whether the stockholder's income exceeds certain threshold amounts). However, in this regard, it is anticipated that distributions paid by us will generally not be attributable to dividends and, therefore, generally will not qualify for the preferential federal tax rate. Distributions of our net capital gains (which is generally our realized net long-term capital gains in excess of realized net short-term capital losses) properly reported by us as capital gain dividends will be taxable to a U.S. stockholder as long-term capital gains (currently generally at a maximum federal tax rate of either 15% or 20% (depending on whether the stockholder's income exceeds certain threshold amounts)) in the case of individuals, trusts or estates, regardless of the U.S. stockholder's holding period for his, her or its common stock and regardless of whether paid in cash or reinvested in additional common stock. Distributions in excess of our earnings and profits first will reduce a U.S. stockholder's adjusted tax basis in such stockholder's common stock and, after the adjusted basis is reduced to zero, will constitute capital gains to such U.S. stockholder. Stockholders receiving dividends or distributions in the form of additional shares of our common stock purchased in the market should be treated for U.S. federal income tax purposes as receiving a distribution in an amount equal to the amount of money that the stockholders receiving cash dividends or distributions will receive, and should have a cost basis in the shares received equal to such amount. Stockholders receiving dividends in newly issued shares of our common stock will be treated as receiving a distribution equal to the value of the shares received, and should have a cost basis of such amount.

Although we currently intend to distribute any net long-term capital gains at least annually, we may in the future decide to retain some or all of our net long-term capital gains but designate the retained amount as a deemed

distribution. In that case, among other consequences, we will pay tax on the retained amount, each U.S. stockholder will be required to include their share of the deemed distribution in income as if it had been distributed to the U.S. stockholder, and the U.S. stockholder will be entitled to claim a credit equal their allocable share of the federal corporate income tax paid on the deemed distribution by us. The amount of the deemed distribution net of such tax will be added to the U.S. stockholder's tax basis for their common stock. Since we expect to pay federal corporate income tax on any retained capital gains at our regular federal corporate income tax rate, and since that rate is currently in excess of the maximum federal income tax rate

TABLE OF CONTENTS

currently payable by individuals on long-term capital gains, the amount of federal corporate income tax that individual stockholders will be treated as having paid and for which they will receive a credit will exceed the federal income tax they owe on the retained net capital gain. Such excess generally may be claimed as a credit against the U.S. stockholder's other federal income tax obligations or may be refunded to the extent it exceeds a stockholder's liability for federal income tax. A stockholder that is not subject to federal income tax or otherwise required to file a federal income tax return would be required to file a federal income tax return on the appropriate form in order to claim a refund for the taxes we paid. In order to utilize the deemed distribution approach, we must provide written notice to our stockholders prior to the expiration of 60 days after the close of the relevant taxable year. We cannot treat any of our investment company taxable income as a deemed distribution.

For purposes of determining (a) whether the Annual Distribution Requirement is satisfied for any year and (b) the amount of capital gain dividends paid for that year, we may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the taxable year in question. If we make such an election, the U.S. stockholder will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by us in October, November or December of any calendar year, payable to stockholders of record on a specified date in such a month and actually paid during January of the following year, will be treated as if it had been received by our U.S. stockholders on December 31 of the year in which the dividend was declared.

We will have the ability to declare a large portion of a distribution in shares of our common stock to satisfy the Annual Distribution Requirement. If a portion of such distribution is paid in cash and certain requirements are met, the entire distribution to the extent of our current and accumulated earnings and profits will be treated as a dividend for federal income tax purposes. As a result, U.S. stockholders will be taxed on the distribution as if the entire distribution was cash distribution, even though most of the distribution was paid in shares of our common stock.

If an investor purchases shares of our common stock shortly before the record date of a distribution, the price of the shares of our common stock will include the value of the distribution and the investor will be subject to tax on the distribution even though it represents a return of their investment.

A U.S. stockholder generally will recognize taxable gain or loss if the stockholder sells or otherwise disposes of their shares of our common stock. Any gain arising from such sale or disposition generally will be treated as long-term capital gain or loss if the stockholder has held their shares of common stock for more than one year. Otherwise, it would be classified as short-term capital gain or loss. However, any capital loss arising from the sale or disposition of shares of our common stock held for six months or less will be treated as long-term capital loss to the extent of the amount of capital gain dividends received, or undistributed capital gain deemed received, with respect to such shares.

In addition, all or a portion of any loss recognized upon a disposition of shares of our common stock may be disallowed if other shares of our common stock are purchased (whether through reinvestment of distributions or otherwise) within 30 days before or after the disposition. In such a case, the basis of the common stock acquired will be increased to reflect the disallowed loss.

In general, individual U.S. stockholders currently are subject to a maximum federal income tax rate of either 15% or 20% (depending on whether the stockholder's income exceeds certain threshold amounts) on their net capital gain, i.e., the excess of realized net long-term capital gain over realized net short-term capital loss for a taxable year, including a long-term capital gain derived from an investment in our shares of common stock. Such rate is lower than the maximum rate on ordinary income currently payable by individuals. Corporate U.S. stockholders currently are subject to federal income tax on net capital gain at the maximum 35% rate also applied to ordinary income. Non-corporate stockholders with net capital losses for a year (*i.e.*, net capital losses in excess of net capital gains) generally may deduct up to \$3,000 of such losses against their ordinary income each year; any net capital losses of a non-corporate

stockholder in excess of \$3,000 generally may be carried forward and used in subsequent years as provided in the Code. Corporate stockholders generally may not deduct any net capital losses for a year, but may carryback such losses for three years or carry forward such losses for five years.

TABLE OF CONTENTS

In addition, individuals with income in excess of \$200,000 (\$250,000 in the case of married individuals filing jointly) and certain estates and trusts are subject to an additional 3.8% tax on their net investment income, which generally includes net income from interest, dividends, annuities, royalties, and rents, and net capital gains (other than certain amounts earned from trades or businesses).

We will provide estimated guidance of the tax characteristics of any distributions we make in our periodic reports filed with the SEC. We will send to each of our U.S. stockholders, as promptly as possible after the end of each calendar year, a notice detailing, on a per share and per distribution basis, the amounts includible in such U.S. stockholder's taxable income for such year as ordinary income and as long-term capital gain. In addition, the federal tax status of each year's distributions generally will be reported to the IRS. Distributions may also be subject to additional state, local and foreign taxes depending on a U.S. stockholder's particular situation. Dividends distributed by us generally will not be eligible for the dividends-received deduction or the lower tax rates applicable to certain qualified dividends.

We may be required to withhold federal income tax (backup withholding) currently at a rate of 28% from all taxable distributions to any non-corporate U.S. stockholder (a) who fails to furnish us with a correct taxpayer identification number or a certificate that such stockholder is exempt from backup withholding or (b) with respect to whom the IRS notifies us that such stockholder has failed to properly report certain interest and dividend income to the IRS and to respond to notices to that effect. An individual's taxpayer identification number is his or her social security number. Any amount withheld under backup withholding is allowed as a credit against the U.S. stockholder's federal income tax liability and may entitle such stockholder to a refund, provided that proper information is timely provided to the IRS.

If a U.S. stockholder recognizes a loss with respect to shares of our common stock of \$2 million or more for an individual stockholder or \$10 million or more for a corporate stockholder, the stockholder must file with the IRS a disclosure statement on Form 8886. Direct stockholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, stockholders of a RIC are not exempted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. U.S. stockholders should consult their tax advisors to determine the applicability of these regulations in light of their specific circumstances.

Taxation of Non-U.S. Stockholders

Whether an investment in the shares of our common stock is appropriate for a Non-U.S. stockholder will depend upon that person's particular circumstances. An investment in the shares of our common stock by a Non-U.S. stockholder may have adverse tax consequences. Non-U.S. stockholders should consult their tax advisors before investing in our common stock.

If the distributions are effectively connected with a U.S. trade or business of the Non-U.S. stockholder, or, if an income tax treaty applies, attributable to a permanent establishment in the United States, in which case the distributions will be subject to federal income tax at the rates applicable to U.S. persons, we will not be required to withhold federal tax if the Non-U.S. stockholder complies with applicable certification and disclosure requirements. Special certification requirements apply to a Non-U.S. stockholder that is a foreign partnership or a foreign trust, and such entities are urged to consult their own tax advisors.

Distributions of our investment company taxable income to Non-U.S. stockholders that are not effectively connected with a U.S. trade or business carried on by the Non-U.S. stockholder, will generally be subject to withholding of

federal income tax at a rate of 30% (or lower rate provided by an applicable treaty) to the extent of our current and accumulated earnings and profits. Under a provision applicable for taxable years beginning before January 1, 2014, properly designated dividends received by a Non-U.S. stockholder are generally exempt from U.S. federal withholding tax when they (a) were paid in respect of our qualified net interest income (generally, our U.S. source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which we are at least a 10% stockholder, reduced by expenses that are allocable to such income), or (b) were paid in connection with our qualified short-term capital gains (generally, the excess of our net short-term capital gain over our long-term capital loss for such taxable year). Although this provision is no longer in effect, Congress has in the past retroactively reinstated these provisions and it is possible they will do so again. We emphasize that there is no assurance that Congress will take such action, but only note the possibility since it has occurred

TABLE OF CONTENTS

previously when this provision expired. If the provision is reinstated and depending on the circumstances, we may designate all, some or none of our potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains, or treat such dividends, in whole or in part, as ineligible for this exemption from withholding.

In order to qualify for this exemption from withholding, a Non-U.S. stockholder must comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or an acceptable substitute or successor form). In the case of shares held through an intermediary, the intermediary could withhold even if we designate the payment as qualified net interest income or qualified short-term capital gain.

Non-U.S. stockholders should contact their intermediaries with respect to the application of these rules to their accounts.

Actual or deemed distributions of our net capital gains to a Non-U.S. stockholder, and gains realized by a Non-U.S. stockholder upon the sale of our common stock, will not be subject to federal withholding tax and generally will not be subject to federal income tax unless the distributions or gains, as the case may be, are effectively connected with a U.S. trade or business of the Non-U.S. stockholder and, if an income tax treaty applies, are attributable to a permanent establishment maintained by the Non-U.S. stockholder in the United States or, in the case of an individual Non-U.S. stockholder, the stockholder is present in the United States for 183 days or more during the year of the sale or capital gain dividend and certain other conditions are met.

If we distribute our net capital gains in the form of deemed rather than actual distributions (which we may do in the future), a Non-U.S. stockholder will be entitled to a federal income tax credit or tax refund equal to the stockholder's allocable share of the tax we pay on the capital gains deemed to have been distributed. In order to obtain the refund, the Non-U.S. stockholder must obtain a U.S. taxpayer identification number and file a federal income tax return even if the Non-U.S. stockholder would not otherwise be required to obtain a U.S. taxpayer identification number or file a federal income tax return. For a corporate Non-U.S. stockholder, distributions (both actual and deemed), and gains realized upon the sale of our common stock that are effectively connected with a U.S. trade or business may, under certain circumstances, be subject to an additional branch profits tax at a 30% rate (or at a lower rate if provided for by an applicable treaty). Accordingly, an investment in the shares of our common stock may not be appropriate for a Non-U.S. stockholder.

We will have the ability to declare a large portion of a distribution in shares of our common stock to satisfy the Annual Distribution Requirement. If a portion of such distribution is paid in cash and certain requirements are met, the entire distribution to the extent of our current and accumulated earnings and profits will be treated as a dividend for federal income tax purposes. As a result, Non-U.S. stockholders will be taxed on the distribution as if the entire distribution was cash distribution, even though most of the distribution was paid in shares of our common stock.

The tax consequences to a Non-U.S. stockholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Non-U.S. stockholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in shares of our common stock.

A Non-U.S. stockholder who is a non-resident alien individual, and who is otherwise subject to withholding of federal income tax, may be subject to information reporting and backup withholding of federal income tax on dividends unless the Non-U.S. stockholder provides us or the dividend paying agent with an IRS Form W-8BEN (or an acceptable substitute form) or otherwise meets documentary evidence requirements for establishing that it is a Non-U.S. stockholder or otherwise establishes an exemption from backup withholding.

Effective July 1, 2014, we are required to withhold U.S. tax (at a 30% rate) on payments of dividends and (effective January 1, 2017) we will be required to withhold U.S. tax on payment of redemption proceeds made to certain non-U.S. entities that fail to comply with extensive new reporting and withholding requirements designed to inform

the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Stockholders may be requested to provide additional information to the funds to enable the funds to determine whether withholding is required.

Non-U.S. persons should consult their own tax advisors with respect to the U.S. federal income tax and withholding tax, and state, local and foreign tax consequences of an investment in the shares of our common stock, including the possible application of the U.S. estate tax.

TABLE OF CONTENTS**DESCRIPTION OF OUR CAPITAL STOCK**

The following description is based on relevant portions of the Maryland General Corporation Law and on our charter and bylaws. This summary is not necessarily complete, and we refer you to the Maryland General Corporation Law and our charter and bylaws for a more detailed description of the provisions summarized below.

Capital Stock

As of the date of this prospectus, our authorized stock consists of 100,000,000 shares of stock, par value \$0.001 per share, and no shares of preferred stock. Our common stock is listed on The Nasdaq Global Select Market under the ticker symbol MRCC. There are no outstanding options or warrants to purchase our stock. No stock has been authorized for issuance under any equity compensation plan. Under Maryland law, our stockholders generally are not personally liable for our debts or obligations.

The following are our outstanding classes of securities as of June 16, 2016:

(1) Title of Class	(2) Amount Authorized	(3) Amount Held by Us or for Our Account	(4) Amount Outstanding Exclusive of Amounts Shown Under (3)
Common Stock	100,000,000	0	13,008,007

Under our charter, our board of directors is authorized to classify and reclassify any unissued shares of stock into other classes or series of stock and authorize the issuance of the shares of stock without obtaining stockholder approval. As permitted by the Maryland General Corporation Law, our charter provides that the board of directors, without any action by our stockholders, may amend the charter from time to time to increase or decrease the aggregate number of shares of stock or the number of shares of stock of any class or series that we have authority to issue.

Common Stock

All shares of our common stock have equal rights as to earnings, assets, voting, and dividends and other distributions and, when they are issued, will be duly authorized, validly issued, fully paid and nonassessable. Distributions may be paid to the holders of our common stock if, as and when authorized by our board of directors and declared by us out of funds legally available therefor. Shares of our common stock have no preemptive, exchange, conversion or redemption rights and are freely transferable, except where their transfer is restricted by federal and state securities laws or by contract. In the event of our liquidation, dissolution or winding up, each share of our common stock would be entitled to share ratably in all of our assets that are legally available for distribution after we pay all debts and other liabilities and subject to any preferential rights of holders of our preferred stock, if any preferred stock is outstanding at such time. Each share of our common stock is entitled to one vote on all matters submitted to a vote of stockholders, including the election of directors. Except as provided with respect to any other class or series of stock, the holders of our common stock possess exclusive voting power.

Preferred Stock

Our charter authorizes our board of directors to classify and reclassify any unissued shares of stock into other classes or series of stock, including preferred stock. The cost of any such reclassification would be borne by our existing common stockholders. Prior to issuance of shares of each class or series, the board of directors is required by Maryland law and by our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series. Thus, the board of directors could authorize the issuance of shares of preferred stock with terms and conditions which could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. You should note, however, that any issuance of preferred stock must comply with the requirements of the 1940 Act. The 1940 Act limits our flexibility as to certain rights and preferences of the preferred stock that our charter may provide and requires, among other things, that (1) immediately after issuance and before any dividend or other distribution is made with respect to

our

TABLE OF CONTENTS

common stock and before any purchase of common stock is made, such preferred stock together with all other senior securities must not exceed an amount equal to 50% of our total assets after deducting the amount of such dividend, distribution or purchase price, as the case may be, and (2) the holders of shares of preferred stock, if any are issued, must be entitled as a class to elect two directors at all times and to elect a majority of the directors if and so long as dividends on such preferred stock are in arrears by two full years or more. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock. For example, holders of preferred stock would vote separately from the holders of common stock on a proposal to cease operations as a business development company. We believe that the availability for issuance of preferred stock will provide us with increased flexibility in structuring future financings and acquisitions. However, we do not currently have any plans to issue preferred stock.

Limitation on Liability of Directors and Officers; Indemnification and Advance of Expenses

Maryland law permits a Maryland corporation to include in its charter a provision limiting the liability of its directors and officers to the corporation and its stockholders for money damages except for liability resulting from (a) actual receipt of an improper benefit or profit in money, property or services or (b) active and deliberate dishonesty established by a final judgment as being material to the cause of action. Our charter contains such a provision which eliminates directors' and officers' liability to the maximum extent permitted by Maryland law, subject to the requirements of the 1940 Act.

Our charter authorizes us, to the maximum extent permitted by Maryland law and subject to the requirements of the 1940 Act, to indemnify any present or former director or officer or any individual who, while serving as our director or officer and at our request, serves or has served another corporation, real estate investment trust, partnership, joint venture, trust, employee benefit plan or other enterprise as a director, officer, partner or trustee, from and against any claim or liability to which that person may become subject or which that person may incur by reason of his or her service in any such capacity and to pay or reimburse their reasonable expenses in advance of final disposition of a proceeding. Our bylaws obligate us, to the maximum extent permitted by Maryland law and subject to the requirements of the 1940 Act, to indemnify any present or former director or officer or any individual who, while serving as our director or officer and at our request, serves or has served another corporation, real estate investment trust, partnership, joint venture, trust, employee benefit plan or other enterprise as a director, officer, partner or trustee and who is made, or threatened to be made, a party to the proceeding by reason of his or her service in that capacity from and against any claim or liability to which that person may become subject or which that person may incur by reason of his or her service in any such capacity and to pay or reimburse his or her reasonable expenses in advance of final disposition of a proceeding. Our bylaws also provide that, to the maximum extent permitted by Maryland law, with the approval of our board of directors and provided that certain conditions described in our bylaws are met, we may pay certain expenses incurred by any such indemnified person in advance of the final disposition of a proceeding upon receipt of an undertaking by or on behalf of such indemnified person to repay amounts we have so paid if it is ultimately determined that indemnification of such expenses is not authorized under our bylaws. In accordance with the 1940 Act, we will not indemnify any person for any liability to which such person would be subject by reason of such person's willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

Maryland law requires a corporation (unless its charter provides otherwise, which our charter does not) to indemnify a director or officer who has been successful, on the merits or otherwise, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service in that capacity. Maryland law permits a corporation to indemnify its present and former directors and officers, among others, against judgments, penalties, fines, settlements and reasonable expenses actually incurred by them in connection with any proceeding to which they

may be made, or threatened to be made, a party by reason of their service in those or other capacities unless it is established that (a) the act or omission of the director or officer was material to the matter giving rise to the proceeding and (1) was committed in bad faith or (2) was the result of active and deliberate dishonesty, (b) the director or officer actually received an improper personal benefit in money, property or services or (c) in the case of any criminal proceeding, the director or officer had reasonable cause to believe that the act or omission was unlawful. However, under Maryland law, a Maryland corporation may not indemnify for an adverse judgment in a suit by or in the right of the corporation or for a judgment of liability on the basis that a personal benefit was improperly received

TABLE OF CONTENTS

unless, in either, case a court orders indemnification, and then only for expenses. In addition, Maryland law permits a corporation to advance reasonable expenses to a director or officer in advance of final disposition of a proceeding upon the corporation's receipt of (a) a written affirmation by the director or officer of his or her good faith belief that he or she has met the standard of conduct necessary for indemnification by the corporation and (b) a written undertaking by him or her or on his or her behalf to repay the amount paid or reimbursed by the corporation if it is ultimately determined that the standard of conduct was not met.

We have entered into indemnification agreements with our directors. The indemnification agreements provide our directors the maximum indemnification permitted under Maryland law and the 1940 Act.

Our insurance policy does not currently provide coverage for claims, liabilities and expenses that may arise out of activities that our present or former directors or officers have performed for another entity at our request. There is no assurance that such entities will in fact carry such insurance. However, we note that we do not expect to request our present or former directors or officers to serve another entity as a director, officer, partner or trustee unless we can obtain insurance providing coverage for such persons for any claims, liabilities or expenses that may arise out of their activities while serving in such capacities.

Certain Provisions of the Maryland General Corporation Law and Our Charter and Bylaws

The Maryland General Corporation Law and our charter and bylaws contain provisions that could make it more difficult for a potential acquirer to acquire us by means of a tender offer, proxy contest or otherwise. These provisions are expected to discourage certain coercive takeover practices and inadequate takeover bids and to encourage persons seeking to acquire control of us to negotiate first with our board of directors. We believe that the benefits of these provisions outweigh the potential disadvantages of discouraging any such acquisition proposals because, among other things, the negotiation of such proposals may improve their terms.

Classified Board of Directors

Our board of directors is divided into three classes of directors serving staggered three-year terms. Directors of each class are elected to serve for three-year terms and until their successors are duly elected and qualify and each year one class of directors is elected by the stockholders. A classified board may render a change in control of us or removal of our incumbent management more difficult. We believe, however, that the longer time required to elect a majority of a classified board of directors will help to ensure the continuity and stability of our management and policies.

Election of Directors

Our charter and bylaws provide that the affirmative vote of the holders of a plurality of the outstanding shares of stock entitled to vote in the election of directors cast at a meeting of stockholders duly called and at which a quorum is present will be required to elect a director. There is no cumulative voting in the election of directors. Pursuant to our charter, our board of directors may amend the bylaws to alter the vote required to elect directors.

Number of Directors; Vacancies; Removal

Our charter provides that the number of directors will be set by the board of directors in accordance with our bylaws. Our bylaws provide that a majority of our entire board of directors may at any time increase or decrease the number of

directors. However, unless our bylaws are amended, the number of directors may never be less than one or more than twelve. Our charter provides that, at such time as we have at least three independent directors and our common stock is registered under the Exchange Act, we elect to be subject to the provision of Subtitle 8 of Title 3 of the Maryland General Corporation Law regarding the filling of vacancies on the board of directors. Accordingly, at such time, except as may be provided by the board of directors in setting the terms of any class or series of preferred stock, any and all vacancies on the board of directors may be filled only by the affirmative vote of a majority of the remaining directors in office, even if the remaining directors do not constitute a quorum, and any director elected to fill a vacancy will serve for the remainder of the full term of the directorship in which the vacancy occurred and until a successor is elected and qualifies, subject to any applicable requirements of the 1940 Act.

TABLE OF CONTENTS

Our charter provides that a director may be removed only for cause, as defined in our charter, and then only by the affirmative vote of at least two-thirds of the votes entitled to be cast in the election of directors.

Action by Stockholders

Under the Maryland General Corporation Law, stockholder action can be taken only at an annual or special meeting of stockholders or by unanimous written consent in lieu of a meeting (unless the charter provides for stockholder action by less than unanimous written consent, which our charter does not). These provisions, combined with the requirements of our bylaws regarding the calling of a stockholder-requested special meeting of stockholders discussed below, may have the effect of delaying consideration of a stockholder proposal until the next annual meeting.

Advance Notice Provisions for Stockholder Nominations and Stockholder Proposals

Our bylaws provide that with respect to an annual meeting of stockholders, nominations of persons for election to the board of directors and the proposal of business to be considered by stockholders may be made only (1) pursuant to our notice of the meeting, (2) by the board of directors or (3) by a stockholder who is entitled to vote at the meeting and who has complied with the advance notice procedures of our bylaws. With respect to special meetings of stockholders, only the business specified in our notice of the meeting may be brought before the meeting. Nominations of persons for election to the board of directors at a special meeting may be made only (1) pursuant to our notice of the meeting, (2) by the board of directors or (3) provided that the board of directors has determined that directors will be elected at the meeting, by a stockholder who is entitled to vote at the meeting and who has complied with the advance notice provisions of the bylaws.

The purpose of requiring stockholders to give us advance notice of nominations and other business is to afford our board of directors a meaningful opportunity to consider the qualifications of the proposed nominees and the advisability of any other proposed business and, to the extent deemed necessary or desirable by our board of directors, to inform stockholders and make recommendations about such qualifications or business, as well as to provide a more orderly procedure for conducting meetings of stockholders. Although our bylaws do not give our board of directors any power to disapprove stockholder nominations for the election of directors or proposals recommending certain action, they may have the effect of precluding a contest for the election of directors or the consideration of stockholder proposals if proper procedures are not followed and of discouraging or deterring a third-party from conducting a solicitation of proxies to elect its own slate of directors or to approve its own proposal without regard to whether consideration of such nominees or proposals might be harmful or beneficial to us and our stockholders.

Calling of Special Meetings of Stockholders

Our bylaws provide that special meetings of stockholders may be called by our board of directors and certain of our officers. Additionally, our bylaws provide that, subject to the satisfaction of certain procedural and informational requirements by the stockholders requesting the meeting, a special meeting of stockholders will be called by the secretary of the corporation upon the written request of stockholders entitled to cast not less than a majority of all the votes entitled to be cast at such meeting.

Approval of Extraordinary Corporate Action; Amendment of Charter and Bylaws

Under Maryland law, a Maryland corporation generally cannot dissolve, amend its charter, merge, sell all or substantially all of its assets, engage in a share exchange or engage in similar transactions outside the ordinary course of business, unless approved by the affirmative vote of stockholders entitled to cast at least two-thirds of the votes entitled to be cast on the matter. However, a Maryland corporation may provide in its charter for approval of these matters by a lesser percentage, but not less than a majority of all of the votes entitled to be cast on the matter. Our charter generally provides for approval of charter amendments and extraordinary transactions by the stockholders entitled to cast at least a majority of the votes entitled to be cast on the matter. Our charter also provides that certain charter amendments, any proposal for our conversion, whether by charter amendment, merger or otherwise, from a closed-end company to an open-end company and any proposal for our liquidation or dissolution requires the approval of the stockholders entitled to cast at least 80% of the votes entitled to be cast on such matter. However, if such amendment or proposal is approved by 75% or more of our continuing directors (in addition to approval by our board of directors),

TABLE OF CONTENTS

such amendment or proposal may be approved by a majority of the votes entitled to be cast on such a matter. The continuing directors are defined in our charter as (1) our current directors, (2) those directors whose nomination for election by the stockholders or whose election by the directors to fill vacancies is approved by a majority of our current directors then on the board of directors or (3) any successor directors whose nomination for election by the stockholders or whose election by the directors to fill vacancies is approved by a majority of continuing directors or the successor continuing directors then in office.

Our charter and bylaws provide that the board of directors will have the exclusive power to adopt, alter, amend or repeal any provision of our bylaws and to make new bylaws.

No Appraisal Rights

Except with respect to appraisal rights arising in connection with the Maryland Control Share Acquisition Act discussed below, as permitted by the Maryland General Corporation Law, our charter provides that stockholders will not be entitled to exercise appraisal rights unless a majority of the board of directors shall determine such rights apply.

Control Share Acquisitions

The Maryland General Corporation Law provides that control shares of a Maryland corporation acquired in a control share acquisition have no voting rights except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter (the Control Share Acquisition Act). Shares owned by the acquiror, by officers or by directors who are employees of the corporation are excluded from shares entitled to vote on the matter. Control shares are voting shares of stock which, if aggregated with all other shares of stock owned by the acquiror or in respect of which the acquiror is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of voting power:

one-tenth or more but less than one-third;
one-third or more but less than a majority; or
a majority or more of all voting power.

The requisite stockholder approval must be obtained each time an acquiror crosses one of the thresholds of voting power set forth above. Control shares do not include shares the acquiring person is then entitled to vote as a result of having previously obtained stockholder approval. A control share acquisition means the acquisition of control shares, subject to certain exceptions.

A person who has made or proposes to make a control share acquisition may compel the board of directors of the corporation to call a special meeting of stockholders to be held within 50 days of demand to consider the voting rights of the shares. The right to compel the calling of a special meeting is subject to the satisfaction of certain conditions, including an undertaking to pay the expenses of the meeting. If no request for a meeting is made, the corporation may itself present the question at any stockholders meeting.

If voting rights are not approved at the meeting or if the acquiring person does not deliver an acquiring person statement as required by the statute, then the corporation may redeem for fair value any or all of the control shares, except those for which voting rights have previously been approved. The right of the corporation to redeem control shares is subject to certain conditions and limitations, including, as provided in our bylaws compliance with the 1940 Act. Fair value is determined, without regard to the absence of voting rights for the control shares, as of the date of the last control share acquisition by the acquirer or of any meeting of stockholders at which the voting rights of the shares are considered and not approved. If voting rights for control shares are approved at a stockholders meeting and the

acquirer becomes entitled to vote a majority of the shares entitled to vote, all other stockholders may exercise appraisal rights. The fair value of the shares as determined for purposes of appraisal rights may not be less than the highest price per share paid by the acquirer in the control share acquisition.

The Control Share Acquisition Act does not apply (a) to shares acquired in a merger, consolidation or share exchange if the corporation is a party to the transaction or (b) to acquisitions approved or exempted by the charter or bylaws of the corporation. Our bylaws contain a provision exempting from the Control Share

TABLE OF CONTENTS

Acquisition Act any and all acquisitions by any person of our shares of stock. There can be no assurance that such provision will not be amended or eliminated at any time in the future. However, we will amend our bylaws to be subject to the Control Share Acquisition Act only if the board of directors determines that it would be in our best interests and if the SEC staff does not object to our determination that our being subject to the Control Share Acquisition Act does not conflict with the 1940 Act.

Business Combinations

Under Maryland law, business combinations between a corporation and an interested stockholder or an affiliate of an interested stockholder are prohibited for five years after the most recent date on which the interested stockholder becomes an interested stockholder (the Business Combination Act). These business combinations include a merger, consolidation, share exchange or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities. An interested stockholder is defined as:

any person who beneficially owns 10% or more of the voting power of the corporation's outstanding voting stock; or an affiliate or associate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of the voting power of the then outstanding voting stock of the corporation.

A person is not an interested stockholder under this statute if the board of directors approved in advance the transaction by which the stockholder otherwise would have become an interested stockholder. However, in approving a transaction, the board of directors may provide that its approval is subject to compliance, at or after the time of approval, with any terms and conditions determined by the board.

After the five-year prohibition, any business combination between the corporation and an interested stockholder generally must be recommended by the board of directors of the corporation and approved by the affirmative vote of at least:

80% of the votes entitled to be cast by holders of outstanding shares of voting stock of the corporation; and two-thirds of the votes entitled to be cast by holders of voting stock of the corporation other than shares held by the interested stockholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested stockholder.

These super-majority vote requirements do not apply if the corporation's common stockholders receive a minimum price, as defined under Maryland law, for their shares in the form of cash or other consideration in the same form as previously paid by the interested stockholder for its shares.

The statute permits various exemptions from its provisions, including business combinations that are exempted by the board of directors before the time that the interested stockholder becomes an interested stockholder. Our board of directors has adopted a resolution that any business combination between us and any other person is exempted from the provisions of the Business Combination Act, provided that the business combination is first approved by the board of directors, including a majority of the directors who are not interested persons as defined in the 1940 Act. This resolution may be altered or repealed in whole or in part at any time. However, our board of directors will adopt resolutions so as to make us subject to the provisions of the Business Combination Act only if the board of directors determines that it would be in our best interests and if the SEC staff does not object to our determination that our being subject to the Business Combination Act does not conflict with the 1940 Act. If this resolution is repealed, or the board of directors does not otherwise approve a business combination, the statute may discourage others from trying to acquire control of us and increase the difficulty of consummating any offer.

Conflict with the 1940 Act

Our bylaws provide that, if and to the extent that any provision of the Maryland General Corporation Law, including the Control Share Acquisition Act (if we amend our bylaws to be subject to such Act) and the Business Combination Act, or any provision of our charter or bylaws conflicts with any provision of the 1940 Act, the applicable provision of the 1940 Act will control.

TABLE OF CONTENTS

DESCRIPTION OF OUR PREFERRED STOCK

Our charter authorizes our board of directors to classify and reclassify any unissued shares of stock into other classes or series of stock, including preferred stock. Prior to issuance of shares of each class or series, the board of directors is required by Maryland law and by our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends and other distributions, qualifications and terms or conditions of redemption for each class or series. Thus, our board of directors could authorize the issuance of shares of preferred stock with terms and conditions which could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. You should note, however, that any issuance of preferred stock must comply with the requirements of the 1940 Act.

The 1940 Act generally requires that (1) immediately after issuance and before any distribution is made with respect to our common stock and before any purchase of common stock is made, such preferred stock together with all other senior securities must not exceed an amount equal to 50.0% of our total assets less liabilities not represented by indebtedness, and (2) the holders of shares of preferred stock, if any are issued, must be entitled as a class to elect two directors at all times and to elect a majority of the directors if distributions on such preferred stock are in arrears by two years or more. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock. For example, holders of preferred stock would vote separately from the holders of common stock on a proposal to cease operations as a business development company. Further, the 1940 Act requires that any distributions we make on preferred stock be cumulative. We believe that the availability for issuance of preferred stock will provide us with increased flexibility in structuring future financings and acquisitions.

For any series of preferred stock that we may issue, our board of directors will determine and the prospectus supplement relating to such series will describe:

- the designation and number of shares of such series;
- the rate and time at which, and the preferences and conditions under which, any distributions will be paid on shares of such series, as well as whether such distributions are participating or non-participating;
- any provisions relating to convertibility or exchangeability of the shares of such series;
- the rights and preferences, if any, of holders of shares of such series upon our liquidation, dissolution or winding up of our affairs;
- the voting powers, if any, of the holders of shares of such series;
- any provisions relating to the redemption of the shares of such series;
- any limitations on our ability to pay distributions on, or acquire or redeem, other securities while shares of such series are outstanding;
- any conditions or restrictions on our ability to issue additional shares of such series or other securities;
- if applicable, a discussion of certain U.S. federal income tax considerations; and
- any other relative power, preferences and participating, optional or special rights of shares of such series, and the qualifications, limitations or restrictions thereof.

All shares of preferred stock that we may issue will be identical and of equal rank except as to the particular terms thereof that may be fixed by our board of directors, and all shares of each series of preferred stock will be identical and of equal rank except as to the dates from which distributions, if any, thereon will be cumulative. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash distributions at an annual rate that will be fixed or will vary for the successive distribution periods for each series. In general, the distribution periods for fixed rate preferred stock can range from quarterly to weekly and are subject to extension. The rate for distributions may be variable and determined for each distribution period.

TABLE OF CONTENTS

DESCRIPTION OF OUR SUBSCRIPTION RIGHTS

We may issue subscription rights to purchase common stock. Subscription rights may be issued independently or together with any other offered security and may or may not be transferable by the person purchasing or receiving the subscription rights. In connection with any subscription rights offering to our stockholders, we may enter into a standby underwriting or other arrangement with one or more underwriters or other persons pursuant to which such underwriters or other persons would purchase any offered securities remaining unsubscribed for after such subscription rights offering. We will not offer transferable subscription rights to our stockholders at a price equivalent to less than the then current net asset value per share of common stock, excluding underwriting commissions, unless we first file a post-effective amendment that is declared effective by the SEC with respect to such issuance and the common stock to be purchased in connection with the rights represents no more than one-third of our outstanding common stock at the time such rights are issued. In connection with a subscription rights offering to our stockholders, we would distribute certificates evidencing the subscription rights and a prospectus supplement to our stockholders on the record date that we set for receiving subscription rights in such subscription rights offering. Our common stockholders will indirectly bear the expenses of such subscription rights offerings, regardless of whether our common stockholders exercise any subscription rights.

The applicable prospectus supplement would describe the following terms of subscription rights in respect of which this prospectus is being delivered:

- the title of such subscription rights;
- the exercise price or a formula for the determination of the exercise price for such subscription rights;
- the number or a formula for the determination of the number of such subscription rights issued to each stockholder;
- the extent to which such subscription rights are transferable;
- if applicable, a discussion of the material U.S. federal income tax considerations applicable to the issuance or exercise of such subscription rights;
- the date on which the right to exercise such subscription rights would commence, and the date on which such rights shall expire (subject to any extension);
- the extent to which such subscription rights include an over-subscription privilege with respect to unsubscribed securities;
- if applicable, the material terms of any standby underwriting or other purchase arrangement that we may enter into in connection with the subscription rights offering; and
- any other terms of such subscription rights, including terms, procedures and limitations relating to the exchange and exercise of such subscription rights.

Exercise of Subscription Rights

Each subscription right would entitle the holder of the subscription right to purchase for cash or other consideration such amount of shares of common stock or other securities at such exercise price as shall in each case be set forth in, or be determinable as set forth in, the prospectus supplement relating to the subscription rights offered thereby or another report filed with the SEC. Subscription rights may be exercised at any time up to the close of business on the expiration date for such subscription rights set forth in the applicable prospectus supplement. After the close of business on the expiration date, all unexercised subscription rights would become void. We have not previously completed such an offering of subscription rights.

Subscription rights may be exercised as set forth in the prospectus supplement relating to the subscription rights offered thereby. Upon receipt of payment and the subscription rights certificate properly completed and duly executed

at the corporate trust office of the subscription rights agent or any other office indicated in the prospectus supplement, we will forward, as soon as practicable, the shares of common stock or other

TABLE OF CONTENTS

securities purchasable upon such exercise. We may determine to offer any unsubscribed offered securities directly to stockholders, persons other than stockholders, to or through agents, underwriters or dealers or through a combination of such methods, including pursuant to standby underwriting or other arrangements, as set forth in the applicable prospectus supplement.

Under the 1940 Act, we may generally only offer subscription rights (other than rights to subscribe expiring not later than 120 days after their issuance and issued exclusively and ratably to a class or classes of our security holders) on the condition that: (1) the subscription rights expire by their terms within ten years; (2) the exercise price is not less than the current market value at the date of issuance; (3) our stockholders authorize the proposal to issue such subscription rights, and a required majority of our board of directors approves of such issuance on the basis that the issuance is in the best interests of the Company and our stockholders; and (4) if the subscription rights are accompanied by other securities, the subscription rights are not separately transferable unless no class of such subscription rights and the securities accompanying them has been publicly distributed. A required majority of our board of directors is a vote of both a majority of our directors who have no financial interest in the transaction and a majority of the directors who are not interested persons of the company. The 1940 Act also provides that the amount of our voting securities that would result from the exercise of all outstanding warrants, options and subscription rights at the time of issuance may not exceed 25% of our outstanding voting securities.

TABLE OF CONTENTS

DESCRIPTION OF OUR DEBT SECURITIES

We may issue debt securities in one or more series in the future which, if publicly offered, will be under an indenture to be entered into between us and a trustee. The specific terms of each series of debt securities we publicly offer will be described in the particular prospectus supplement relating to that series. The prospectus supplement may or may not modify the general terms found in this prospectus and will be filed with the SEC. For a complete description of the terms of a particular series of debt securities, you should read both this prospectus and the prospectus supplement relating to that particular series.

As required by federal law for all bonds and notes of companies that are publicly offered, the debt securities are governed by a document called an indenture. An indenture is a contract between us and the trustee and is subject to and governed by the Trust Indenture Act of 1939, as amended. The trustee has two main roles. First, the trustee can enforce rights of investors against us if we default. There are some limitations on the extent to which the trustee acts on behalf of investors, described in the second paragraph under Events of Default Remedies if an Event of Default Occurs. Second, the trustee performs certain administrative duties for us.

Because this section is a summary, it does not describe every aspect of the debt securities we may issue and the indenture. We urge you to read the indenture because it, and not this description, defines rights of a holder of debt securities.

If we offer debt securities in the future, the prospectus supplement, which will accompany this prospectus, will describe the particular series of debt securities being offered, including, among other things:

- the designation or title of the series of debt securities;
- the total principal amount of the series of debt securities;
- the percentage of the principal amount at which the series of debt securities will be offered;
- the date or dates on which principal will be payable;
- the rate or rates (which may be either fixed or variable) and/or the method of determining such rate or rates of interest, if any;
- the date or dates from which any interest will accrue, or the method of determining such date or dates, and the date or dates on which any interest will be payable;
- the terms for redemption, extension or early repayment, if any;
- the currencies in which the series of debt securities are issued and payable;
- whether the amount of payments of principal, premium or interest, if any, on a series of debt securities will be determined with reference to an index, formula or other method (which could be based on one or more currencies, commodities, equity indices or other indices) and how these amounts will be determined;
- the place or places of payment, transfer, conversion and/or exchange of the debt securities;
- the denominations in which the offered debt securities will be issued;
- the provision for any sinking fund;
- any restrictive covenants;
- any events of default;
- whether the series of debt securities are issuable in certificated form;
- any provisions for defeasance or covenant defeasance;
- any special U.S. federal income tax implications, including, if applicable, U.S. federal income tax considerations relating to original issue discount;

TABLE OF CONTENTS

whether and under what circumstances we will pay additional amounts in respect of any tax, assessment or governmental charge and, if so, whether we will have the option to redeem the debt securities rather than pay the additional amounts (and the terms of this option);

any provisions for convertibility or exchangeability of the debt securities into or for any other securities; whether the debt securities are subject to subordination and the terms of such subordination; the listing, if any, on a securities exchange; and any other material terms.

The debt securities may be secured or unsecured obligations. Under the provisions of the 1940 Act, we are permitted, as a BDC, to issue debt only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200.0% after each issuance of debt, excluding the SBA debentures in accordance with SEC exemptive relief granted October 2, 2014. Unless the prospectus supplement states otherwise, principal (and premium, if any) and interest, if any, will be paid by us in immediately available funds.

General

The indenture provides that any debt securities proposed to be sold under this prospectus and the applicable prospectus supplement (offered debt securities) and any debt securities issuable upon the exercise of warrants or upon conversion or exchange of other offered securities (underlying debt securities), may be issued under the indenture in one or more series.

For purposes of this prospectus, any reference to the payment of principal of or premium or interest, if any, on debt securities will include additional amounts if required by the terms of the debt securities.

The indenture does not limit the amount of debt securities that may be issued thereunder from time to time. Debt securities issued under the indenture, when a single trustee is acting for all debt securities issued under the indenture, are called the indenture securities. The indenture also provides that there may be more than one trustee thereunder, each with respect to one or more different series of indenture securities. See Resignation of Trustee below. At a time when two or more trustees are acting under the indenture, each with respect to only certain series, the term indenture securities means the one or more series of debt securities with respect to which each respective trustee is acting. In the event that there is more than one trustee under the indenture, the powers and trust obligations of each trustee described in this prospectus will extend only to the one or more series of indenture securities for which it is trustee. If two or more trustees are acting under the indenture, then the indenture securities for which each trustee is acting would be treated as if issued under separate indentures.

The indenture does not contain any provisions that give the holder of debt securities protection in the event we issue a large amount of debt or we are acquired by another entity.

We refer you to the applicable prospectus supplement for information with respect to any deletions from, modifications of or additions to the Events of Default, as defined below, or our covenants that are described below, including any addition of a covenant or other provision providing event risk or similar protection.

We have the ability to issue indenture securities with terms different from those of indenture securities previously issued and, without the consent of the holders thereof, to reopen a previous issue of a series of indenture securities and issue additional indenture securities of that series unless the reopening was restricted when that series was created.

We expect that we will usually issue debt securities in book entry only form represented by global securities and will specify the method of issuance in the applicable prospectus supplement.

Conversion and Exchange

If any debt securities are convertible into or exchangeable for other securities, the applicable prospectus supplement will explain the terms and conditions of the conversion or exchange, including the conversion price or exchange ratio (or the calculation method), the conversion or exchange period (or how the period will be determined), whether conversion or exchange will be mandatory or at the option of the holder or us,

131

TABLE OF CONTENTS

provisions for adjusting the conversion price or the exchange ratio and provisions affecting conversion or exchange in the event of the redemption of the underlying debt securities. These terms may also include provisions under which the number or amount of other securities to be received by the holders of the debt securities upon conversion or exchange would be calculated according to the market price of the other securities as of a time stated in the applicable prospectus supplement.

Payment

Unless otherwise specified in the applicable prospectus supplement, we will pay interest to the person listed in the trustee's records as the owner of the debt security at the close of business on a particular day in advance of each due date for interest, even if that person no longer owns the debt security on the interest due date. That day, usually about two weeks in advance of the interest due date, is called the record date. Because we will pay all the interest for an interest period to the holders on the record date, holders buying and selling the debt securities must work out between themselves the appropriate purchase price. The most common manner is to adjust the sales price of the debt securities to prorate interest fairly between buyer and seller based on their respective ownership periods within the particular interest period. This prorated interest amount is called accrued interest.

Payments on Global Securities

We will make payments on a global security in accordance with the applicable policies of the depository as in effect from time to time. Under those policies, we will make payments directly to the depository, or its nominee, and not to any indirect holders who own beneficial interests in the global security. An indirect holder's right to those payments will be governed by the rules and practices of the depository and its participants.

Payment When Offices Are Closed

If any payment is due on a debt security on a day that is not a business day, we will make the payment on the next day that is a business day. Payments made on the next business day in this situation will be treated under the indenture as if they were made on the original due date, except as otherwise indicated in the attached prospectus supplement. Such payment will not result in a default under any debt security or the indenture, and no interest will accrue on the payment amount from the original due date to the next day that is a business day.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive payments on their debt securities.

Events of Default

Investors will have rights if an Event of Default, as defined below, occurs with respect to the debt securities of their respective series and the Event of Default is not cured, as described later in this subsection.

The term "Event of Default" with respect to the relevant series of debt securities means any of the following (unless the applicable prospectus supplement or supplemental indenture relating to such debt securities states otherwise):

We do not pay the principal of any debt security of the series on its due date.
We do not pay interest on any debt security of the seri
