Filed pursuant to Rule 497(c)
File No. 333-192857

PROSPECTUS SUPPLEMENT
(To Prospectus dated June 28, 2016)

Monroe Capital Corporation

\$50,000,000

Common Stock

We are a specialty finance company focused on providing financing primarily to lower middle-market companies in the United States and Canada. We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended. Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity investments. We use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies.

We invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Below investment grade securities are often referred to as "high yield" or "junk." In addition, many of the debt securities we hold do not fully amortize prior to maturity, which heightens the risk that we may lose all or a part of our investment.

Monroe Capital BDC Advisors, LLC serves as our investment advisor. Monroe Capital Management Advisors, LLC serves as our administrator. Each of Monroe Capital BDC Advisors, LLC and Monroe Capital Management Advisors, LLC is affiliated with Monroe Capital, LLC, a leading lender to middle-market companies.

We have entered into separate equity distribution agreements, each dated February 6, 2015, with MLV & Co. LLC ("MLV") and JMP Securities LLC ("JMP"). On July 1, 2016, we entered into an amendment to MLV's equity distribution agreement and an assignment agreement to replace MLV with FBR Capital Markets & Co. ("FBR"), as sales agent. MLV is an affiliate of FBR. FBR, together with JMP, are herein referred to individually as a "Sales Agent" and together, the "Sales Agents." The equity distribution agreement with JMP and the equity distribution agreement with FBR, as amended, relate to the shares of common stock offered by this prospectus supplement and the accompanying prospectus. The equity distribution agreements provide that we may offer and sell up to \$50,000,000 of our common stock from time to time through the Sales Agents in negotiated transactions or transactions that are deemed to be "at the market," as defined in Rule 415 under the Securities Act of 1933, as amended, including sales made directly on The Nasdaq Global Select Market or similar securities exchange or sales made to or through a market maker other than on an exchange, at prices related to the prevailing market prices or at negotiated prices. As of the date of this prospectus

supplement, we have sold \$10.0 million of our common stock under the equity distribution agreements.

Our common stock is listed on The Nasdaq Global Select Market under the symbol MRCC. On March 10, 2017, the last reported sale price of our stock on The Nasdaq Global Select Market was \$15.60 per share. Our net asset value as of December 31, 2016 was \$14.52 per share.

Under the terms of the equity distribution agreements, the Sales Agents will receive a commission from us of up to 2.0% of the gross sales price of any shares of our common stock sold through the Sales Agents under the equity distribution agreements. The Sales Agents are not required to sell any specific number or dollar amount of common stock, but will use their commercially reasonable efforts consistent with their sales and trading practices to sell the shares of our common stock offered by this prospectus supplement and the accompanying prospectus. For all fees and expenses paid to the Sales Agents, see Plan of Distribution beginning on page S-97 of this prospectus supplement.

Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value. If our shares trade at a discount to our net asset value, it will likely increase the risk of loss for purchasers in this offering. On July 14, 2016, our stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of twelve months subject to certain conditions. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. In addition, continuous sales of common stock below net asset value may have a negative impact on total returns and could have a negative impact on the market price of our shares of common stock. See Sale of Common Stock Below Net Asset Value in this prospectus supplement and Risk Factors and Sales of Common Stock Below Net Asset Value in the accompanying prospectus.

An investment in our securities is subject to risks, including a risk of total loss of investment. In addition, the companies in which we invest are subject to special risks. We are an emerging growth company under the federal securities laws and are subject to reduced public company reporting requirements. Substantially all of the debt instruments in which we invest (i) have and will have variable interest rate provisions that may make it more difficult for borrowers to make debt repayments to us in a rising interest rate environment and (ii) will likely have a principal amount outstanding at maturity, that may lead to a substantial loss to us if the borrower is unable to refinance or repay. See Risk Factors beginning on page S-14 of this prospectus supplement and page 12 of the accompanying prospectus to read about factors you should consider, including the risk of leverage, before investing in our securities.

This prospectus supplement and the accompanying prospectus contain important information you should know before investing. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission, or the SEC. This information is available free of charge by contacting us at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, Attention: Investor Relations, by calling us collect at (312) 258-8300, or on our website at www.monroebdc.com. The SEC also maintains a website at www.sec.gov that contains such information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

ABOUT THIS PROSPECTUS SUPPLEMENT

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of the common stock and also adds to and updates information contained in the accompanying prospectus.

The second part is the accompanying prospectus, which gives more general information and disclosures. For information about our common stock see Description of Our Capital Stock in the accompanying prospectus.

To the extent information differs between this prospectus supplement and the accompanying prospectus, you should rely only on such information in this prospectus supplement. You should read this prospectus supplement and the accompanying prospectus together with the additional information described under the heading Available Information before investing in our common stock.

You should rely only on the information contained in this prospectus supplement and the accompanying prospectus. We have not, and FBR and JMP Securities have not, authorized any other person to provide you with different or additional information. If anyone provides you with different or additional information, you should not rely on it. We are not, and FBR and JMP Securities are not, making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus supplement and the accompanying prospectus is accurate only as of their respective dates, regardless of the time of delivery of this prospectus supplement and the accompanying prospectus or any sales of the securities. Our business, financial condition, results of operations and prospects may have changed since those dates.

TABLE OF CONTENTS

SUMMARY

This summary highlights some of the information in this prospectus supplement. This summary is not complete and may not contain all of the information that you may want to consider before investing in our common stock. You should read this entire prospectus supplement and the accompanying prospectus carefully, including, in particular, the more detailed information set forth under Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations.

As used in this prospectus supplement, except as otherwise indicated, the terms:

we, us and our refer to Monroe Capital Corporation, a Maryland corporation;

MC Advisors refers to Monroe Capital BDC Advisors, LLC, our investment advisor and a Delaware limited liability company;

MC Management refers to Monroe Capital Management Advisors, LLC, our administrator and a Delaware limited liability company;

Monroe Capital refers to Monroe Capital LLC, a Delaware limited liability company, and its subsidiaries and affiliates;

MRCC SBIC refers to Monroe Capital Corporation SBIC, LP, a Delaware limited partnership, our wholly-owned subsidiary that operates as a small business investment company pursuant to a license received from the United States Small Business Administration; and

LIBOR refers to the one-month, three-month or six-month London Interbank Offered Rate as reported by the British Bankers Association. Unless stated otherwise herein, LIBOR refers to the one-month rate.

Monroe Capital Corporation

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended, or the 1940 Act, and that has elected to be treated as a regulated investment company, or RIC, for tax purposes under the U.S.

Internal Revenue Code of 1986, as amended, or the Code, commencing with our taxable year ended December 31, 2012. We provide customized financing solutions to lower middle-market companies in the United States and Canada focused primarily on senior secured, junior secured and unitranche (a combination of senior secured and junior secured debt in the same facility in which we syndicate a first out portion of the loan to an investor and retain a last out portion of the loan) debt and, to a lesser extent, unsecured subordinated debt and equity, including equity co-investments in preferred and common stock and warrants.

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through investment in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity investments. We seek to use our extensive leveraged finance origination infrastructure and broad expertise in sourcing loans to invest in primarily senior, unitranche and junior secured debt of middle-market companies. We believe that our primary focus on lending to lower middle-market companies offers several advantages as compared to lending to larger companies, including more attractive economics, lower leverage, more comprehensive and restrictive covenants, more expansive events of default, relatively small debt facilities that provide us with enhanced influence over our borrowers, direct access to borrower management and improved information flow.

In this prospectus supplement and the accompanying prospectus, the term middle-market generally refers to companies having annual revenue of between \$20 million and \$500 million and/or annual earnings before interest,

taxes, depreciation and amortization, or EBITDA, of between \$3 million and \$50 million. Within the middle-market, we consider companies having annual revenues of less than \$250 million and/or EBITDA of less than \$25 million to be in the lower middle-market.

Our Investment Advisor

Our investment activities are managed by our investment advisor, MC Advisors. MC Advisors is responsible for sourcing potential investments, conducting research and due diligence on prospective

S-1

TABLE OF CONTENTS

investments and their private equity sponsors, analyzing investment opportunities, structuring our investments and managing our investments and portfolio companies on an ongoing basis. MC Advisors was organized in February 2011 and is a registered investment adviser under the Investment Advisers Act of 1940, as amended, or the Advisers Act.

Under the investment advisory and management agreement with MC Advisors, or the Investment Advisory Agreement, we pay MC Advisors a base management fee and an incentive fee for its services. See Management and Other Agreements Investment Advisory Agreement Management and Incentive Fee in the accompanying prospectus for a discussion of the base management fee and incentive fee payable by us to MC Advisors. While not expected to review or approve each investment, our independent directors periodically review MC Advisors' services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate.

MC Advisors seeks to capitalize on the significant deal origination, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of Monroe Capital's investment professionals.

The senior management team of Monroe Capital, including Theodore L. Koenig and Aaron D. Peck, provides investment services to MC Advisors pursuant to a staffing agreement, or the Staffing Agreement, between MC Management, an affiliate of Monroe Capital, and MC Advisors. Messrs. Koenig and Peck have developed a broad network of contacts within the investment community and average more than 25 years of experience investing in debt and equity securities of lower middle-market companies. In addition, Messrs. Koenig and Peck have extensive experience investing in assets that constitute our primary focus and have expertise in investing throughout all periods of the economic cycle. MC Advisors is an affiliate of Monroe Capital and is supported by experienced investment professionals of Monroe Capital under the terms of the Staffing Agreement. Monroe Capital's core team of investment professionals has an established track record in sourcing, underwriting, executing and monitoring transactions. From Monroe Capital's formation in 2004 through December 31, 2016, Monroe Capital's investment professionals invested in over 1,000 loan and related investments with an aggregate principal value of over \$6.0 billion.

In addition to their roles with Monroe Capital and MC Advisors, Messrs. Koenig and Peck serve as interested directors of ours. Mr. Koenig has more than 25 years of experience in structuring, negotiating and closing transactions on behalf of asset-backed lenders, commercial finance companies, financial institutions and private equity investors at organizations including Monroe Capital, which Mr. Koenig founded in 2004, and Hilco Capital LP, where he led investments in over 20 companies in the lower middle-market. Mr. Peck has more than 20 years of public company management, leveraged finance and commercial lending experience at organizations including Deerfield Capital Management LLC, Black Diamond Capital Management LLC and Salomon Smith Barney Inc.

Messrs. Koenig and Peck are joined on the investment committee of MC Advisors by Michael J. Egan and Jeremy T. VanDerMeid, each of whom is a senior investment professional at Monroe Capital. Mr. Egan has more than 25 years of experience in commercial finance, credit administration and banking at organizations including Hilco Capital, The CIT Group/Business Credit, Inc., The National Community Bank of New Jersey (The Bank of New York) and KeyCorp. Mr. VanDerMeid has more than 15 years of lending and corporate finance experience at organizations including Morgan Stanley Investment Management, Dymas Capital Management Company, LLC and Heller Financial.

About Monroe Capital

Monroe Capital, a Delaware limited liability company that was founded in 2004, is a leading lender to middle-market companies. As of December 31, 2016, Monroe Capital had approximately \$4.0 billion in assets under management.

Monroe Capital has maintained a continued lending presence in the lower middle-market throughout the most recent economic downturn. The result is an established lending platform that we believe generates consistent primary and secondary deal flow from a network of proprietary relationships and additional deal flow from a diverse portfolio of over 425 current investments. From Monroe Capital's formation in 2004 through December 31, 2016, Monroe Capital's investment professionals invested in over 1,000 loan and related investments with an aggregate principal value of over \$6.0 billion. The senior investment team of Monroe Capital averages more than 20 years of experience and has developed a proven

S-2

TABLE OF CONTENTS

investment and portfolio management process that has performed through multiple market cycles. In addition, Monroe Capital's investment professionals are supported by administrative and back-office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management.

Market Opportunity

We invest primarily in senior, unitranche and junior secured debt issued to lower middle-market companies in the United States and, to a lesser extent and in accordance with the limitations on foreign investments in the 1940 Act, Canada. We believe that U.S. and Canadian lower middle-market companies comprise a large, growing and fragmented market that offers attractive financing opportunities. We believe that there exists a large number of prospective lending opportunities for lenders, which should allow us to generate substantial investment opportunities and build an attractive portfolio of investments.

Investment Strategy

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation primarily through investments in senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt and equity. We also seek to invest opportunistically in attractively priced, broadly syndicated loans, which should enhance our geographic and industry portfolio diversification and increase our portfolio's liquidity. We do not target any specific industry, however, as of December 31, 2016, our investments in the healthcare and pharmaceuticals industry represented approximately 13.7% of the fair value of our portfolio. To achieve our investment objective, we utilize the following investment strategy:

Attractive Current Yield. We believe our sourcing network allows us to enter into transactions with attractive yields and investment structures. Based on current market conditions and our pipeline of new investments, we expect our target directly originated senior and unitranche secured debt will have an average maturity of three to five years and interest rates of 8% to 13%, and we expect our target directly originated junior secured debt and unsecured subordinated debt will have an average maturity of four to seven years and interest rates of 10% to 15%. In addition, based on current market conditions and our pipeline of new investments, we expect that our target debt investments will typically have a variable coupon (with a LIBOR floor), and may include payment-in-kind, or PIK, interest (interest that is not received in cash, but added to the principal balance of the loan), and that we will typically receive upfront closing fees of 1% to 4%. We may also receive warrants or other forms of upside equity participation. Our transactions are generally secured and supported by a lien on all assets and/or a pledge of company stock in order to provide priority of return and to influence any corporate actions. Although we will target investments with the characteristics described in this paragraph, we cannot assure you that our new investments will have these characteristics and we may enter into investments with different characteristics as the market dictates. For a description of the characteristics of our current investment portfolio, see Management's Discussion and Analysis of Financial Condition and Results of Operations—Portfolio and Investment Activity. Until investment opportunities can be found, we may invest our undeployed capital in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. See Use of Proceeds.

Sound Portfolio Construction. We strive to exercise discipline in portfolio creation and management and to implement effective governance throughout our business. Monroe Capital has been, and MC Advisors, which is comprised of substantially the same investment professionals who have operated Monroe Capital, is, and we believe will continue to be, conservative in the underwriting and structuring of covenant packages in order to enable early

intervention in the event of weak financial performance by a portfolio company. We seek to pursue lending opportunities selectively and to maintain a diversified portfolio. We believe that exercising disciplined portfolio management through continued intensive account monitoring and timely and relevant management reporting allows us to mitigate risks in our debt investments. In addition, we have implemented rigorous governance processes through segregation of duties, documented policies and procedures and independent oversight and review of transactions, which we believe helps us to maintain a low level of non-performing loans. We believe that Monroe Capital's proven process of thorough origination, conservative

S-3

TABLE OF CONTENTS

underwriting, due diligence and structuring, combined with careful account management and diversification, enabled it to protect investor capital, and we believe MC Advisors follows and will follow the same philosophy and processes in originating, structuring and managing our portfolio investments.

Predictability of Returns. Beyond conservative structuring and protection of capital, we seek a predictable exit from our investments. We seek to invest in situations where there are a number of potential exit options that can result in full repayment or a modest refinance of our investment. We seek to structure the majority of our transactions as secured loans with a covenant package that provides for full or partial repayment upon the completion of asset sales and restructurings. Because we seek to structure these transactions to provide for contractually determined, periodic payments of principal and interest, we are less likely to depend on merger and acquisition activity or public equity markets to exit our debt investments. As a result, we believe that we can achieve our target returns even in a period when public markets are depressed.

Competitive Strengths

We believe that we represent an attractive investment opportunity for the following reasons:

Deep, Experienced Management Team. We are managed by MC Advisors, which has access through the Staffing Agreement to Monroe Capital's experienced team comprised of over 70 professionals, including seven senior partners that average more than 25 years of direct lending experience. We are led by our Chairman and Chief Executive Officer, Theodore L. Koenig, and Aaron D. Peck, our Chief Financial Officer and Chief Investment Officer. This extensive experience includes the management of investments with borrowers of varying credit profiles and transactions completed in all phases of the credit cycle. Monroe Capital's senior investment professionals provide us with a difficult-to-replicate sourcing network and a broad range of transactional, financial, managerial and investment skills. This expertise and experience is supported by administrative and back office personnel focused on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management. From Monroe Capital's formation in 2004 through December 31, 2016, Monroe Capital's investment professionals invested in more than 1,000 loan and related investments with an aggregate principal value of over \$6.0 billion.

Differentiated Relationship-Based Sourcing Network. We believe Monroe Capital's senior investment professionals benefit from extensive relationships with commercial banks, private equity firms, financial intermediaries, management teams and turn-around advisors. We believe that this broad sourcing network differentiates us from our competitors and offers us a diversified origination approach that does not rely on a single channel and offers us consistent deal flow throughout the economic cycle. We also believe that this broad network allows us to originate a substantial number of non-private equity-sponsored investments.

Extensive Institutional Platform for Originating Middle-Market Deal Flow. Monroe Capital's broad network of relationships and significant origination resources enable us to review numerous lending opportunities, permitting us to exercise a high degree of selectivity in terms of loans to which we ultimately commit. Monroe Capital estimates that it reviewed approximately 2,000 investment opportunities during 2016. Monroe Capital's over 1,000 previously executed transactions, over 425 of which are with current borrowers, offer us another source of deal flow, as these debt investments reach maturity or seek refinancing. As of December 31, 2016, Monroe Capital had a pipeline of more than 250 transactions for an aggregate potential deal volume of greater than \$5.0 billion for all funds under management. We are also positioned to benefit from Monroe Capital's established brand name, strong track record in partnering with industry participants and reputation for closing deals on time and as committed. Monroe Capital's senior investment professionals are complemented by extensive experience in capital markets transactions, risk management and portfolio monitoring.

Disciplined, Credit-First Underwriting Process. Monroe Capital has developed a systematic underwriting process that applies a consistent approach to credit review and approval, with a focus on evaluating credit first and then appropriately assessing the risk-reward profile of each loan. MC Advisors' assessment of credit outweighs pricing and other considerations, as we seek to minimize potential credit losses through effective due diligence, structuring and covenant design. MC Advisors seeks to customize each transaction structure and financial covenant to reflect risks identified through the underwriting and due diligence process. We also seek to actively manage our origination and credit underwriting activities through

S-4

TABLE OF CONTENTS

personal visits and calls on all parties involved with an investment, including the management team, private equity sponsors, if any, and other lenders.

Established Credit Risk Management Framework. We seek to manage our credit risk through a well-defined portfolio strategy and credit policy. In terms of credit monitoring, MC Advisors assigns each loan to a particular portfolio management professional and maintains an internal credit rating analysis for all loans. MC Advisors then employs ongoing review and analysis, together with monthly investment committee meetings to review the status of certain complex and challenging loans and a comprehensive quarterly review of all loan transactions. MC Advisors investment professionals also have significant turnaround and debt work-out experience, which gives them perspective on the risks and possibilities throughout the entire credit cycle. We believe this careful approach to investment and monitoring enables us to identify problems early and gives us an opportunity to assist borrowers before they face difficult liquidity constraints. By anticipating possible negative contingencies and preparing for them, we believe that we diminish the probability of underperforming assets and loan losses.

Credit Facility

We have a credit facility with ING Capital LLC, or the Lender, as agent, which as of December 31, 2016 consisted of a revolving line of credit of \$160.0 million, which may be increased to up to \$300.0 million pursuant to an accordion feature. Effective February 22, 2017, we increased the aggregate commitments under the credit facility to \$200.0 million pursuant to this accordion feature.

We may make draws under the revolver from time-to-time through December 2019 to make or purchase additional investments or for general working capital purposes until the maturity date of the credit facility, or the earliest to occur of (a) December 14, 2020, subject to extension as mutually agreed by us and the Lender, (b) the termination of the facility in accordance with its terms or (c) any other date mutually agreed to by us and the Lender. The revolving credit facility is secured by a lien on all of our assets, including cash on hand, but excluding the assets of our wholly-owned subsidiary, MRCC SBIC. The material terms of the credit facility are as follows:

total borrowing capacity currently equal to \$200.0 million (\$160.0 million as of December 31, 2016) and up to \$300.0 million pursuant to an accordion feature, subject to, among other things, availability under a defined borrowing base, which varies based on our portfolio characteristics and certain eligibility criteria and concentration limits, as well as valuation methodologies;

an interest rate equal to, at our election, (a) LIBOR (one-month, two-month, three-month or six-month at our discretion based on the term of the borrowing) plus 3.00% per annum, with a further step-down to LIBOR plus 2.75% when our net worth (excluding investments in MRCC SBIC) exceeds \$225.0 million or (b) a daily rate equal to 2.00% per annum plus the greater of the prime interest rate, the federal funds rate plus 0.5% or LIBOR plus 1.0%;

in addition to the stated interest rate on borrowings under the revolving credit facility, we are required to pay a fee of 0.5% per annum on any unused portion of the revolving credit facility if the unused portion of the facility is less than 65% of the then available maximum borrowing or a fee of 1.0% per annum on any unused portion of the revolving credit facility if the unused portion of the facility is greater than or equal to 65% of the then available maximum borrowing; and

customary financial covenants and negative covenants and events of default.

As of December 31, 2016, we had \$129.0 million outstanding under our revolving credit facility and availability of \$31.0 million.

MRCC SBIC

On February 28, 2014, our wholly-owned subsidiary, MRCC SBIC received a license from the U.S. Small Business Administration (SBA) to operate as a Small Business Investment Company (SBIC) under Section 301(c) of the Small Business Investment Company Act of 1958. MRCC SBIC commenced operations on September 16, 2013. As our wholly-owned subsidiary, MRCC SBIC relies on one or more exclusions from the definition of investment company under the 1940 Act and does not elect to be

S-5

TABLE OF CONTENTS

regulated as business development company under the 1940 Act. MRCC SBIC has an investment objective substantially similar to ours and makes similar types of investments in accordance with SBIC regulations.

As of December 31, 2016, MRCC SBIC had \$41.0 million in leveragable capital (approximately 9.6% of our total assets) and \$51.5 million in SBA-guaranteed debentures outstanding. On April 13, 2016, MRCC SBIC was approved by the SBA for an additional \$75.0 million in SBA-guaranteed debentures, for a total of \$115.0 million in available debentures.

We have received exemptive relief from the SEC to permit us to exclude the debt of our SBIC subsidiary guaranteed by the SBA from the definition of senior securities for the purposes of the 200% asset coverage ratio we are required to maintain under the 1940 Act, which provides us with increased flexibility, but also increases our risks associated with leverage.

Operating and Regulatory Structure

Our investment activities are managed by MC Advisors under the direction of our board of directors, a majority of whom are independent of us, MC Advisors and our and its respective affiliates.

As a business development company, we are required to comply with certain regulatory requirements. For example, while we are permitted to finance investments using leverage, which may include the issuance of notes, other borrowings and shares of preferred stock, our ability to use leverage is limited in significant respects. See Regulation in the accompanying prospectus. Any decision on our part to use leverage will depend upon our assessment of the attractiveness of available investment opportunities in relation to the costs and perceived risks of such leverage. The use of leverage to finance investments creates certain risks and potential conflicts of interest. See Risk Factors Risks Relating to Our Business and Structure We maintain a revolving credit facility and may use other borrowed funds to make investments or fund our business operations, which exposes us to risks typically associated with leverage and increases the risk of investing in us.

Also, as a business development company, we are generally prohibited from acquiring assets other than qualifying assets unless, after giving effect to any acquisition, at least 70% of our total assets are qualifying assets. Qualifying assets generally include securities of eligible portfolio companies, cash, cash equivalents, U.S. government securities and high-quality debt instruments maturing in one year or less from the time of investment. Under the rules of the 1940 Act, eligible portfolio companies include (a) private domestic operating companies, (b) public domestic operating companies whose securities are not listed on a national securities exchange (e.g., The Nasdaq Global Market) or registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and (c) public domestic operating companies having a market capitalization of less than \$250 million. Public domestic operating companies whose securities are quoted on the over-the-counter bulletin board or through Pink Sheets LLC are not listed on a national securities exchange and therefore are eligible portfolio companies. See Regulation in the accompanying prospectus. Additionally, to the extent we invest in the securities of companies domiciled in or with their principal places of business outside of the United States, we seek to limit those investments to companies domiciled or with their principal place of business in Canada. Any investments in Canadian companies will not be qualifying assets, meaning that in accordance with the 1940 Act, we cannot invest more than 30% of our assets in Canadian securities and other non-qualifying assets.

We have elected to be treated for U.S. federal income tax purposes as a RIC under the Code. In order to continue to qualify to be treated as a RIC, we must satisfy certain source of income, asset diversification and distribution requirements. See Material U.S. Federal Income Tax Considerations in the accompanying prospectus.

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, MC Advisors has agreed to offer us the right to participate in all investment opportunities that it determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors. These offers are subject to the exception that, in accordance with MC Advisors' conflict of interest and allocation policies, we might not participate in each individual opportunity but are entitled, on an overall basis, to participate equitably with other entities sponsored or managed by MC Advisors and its affiliates.

S-6

TABLE OF CONTENTS

Affiliates of MC Advisors manage other assets in four closed-end funds, two additional small business investment companies and nine private funds that also have an investment strategy focused primarily on senior, unitranche, and junior secured debt and, to a lesser extent, unsecured subordinated debt to lower middle-market companies. In addition, MC Advisors and/or its affiliates may manage other entities in the future with an investment focus similar to ours. To the extent that we compete with entities managed by MC Advisors or any of its affiliates for a particular investment opportunity, MC Advisors seeks to allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) its internal conflict of interest and allocation policies, (b) the requirements of the Advisers Act and (c) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates. MC Advisors' allocation policies are intended to ensure that we may generally share equitably with other investment funds or other investment vehicles managed by MC Advisors or its affiliates in investment opportunities, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer, which may be suitable for us and such other investment funds or other investment vehicles.

MC Advisors and/or its affiliates may in the future sponsor or manage investment funds, accounts or other investment vehicles with similar or overlapping investment strategies, and MC Advisors has put in place a conflict-resolution policy that addresses the co-investment restrictions set forth under the 1940 Act. MC Advisors seeks to ensure an equitable allocation of investment opportunities when we are able to invest alongside other accounts managed by MC Advisors and its affiliates. We received exemptive relief from the SEC on October 15, 2014 that permits us greater flexibility relating to co-investments, subject to certain conditions. When we invest alongside such other accounts as permitted under the 1940 Act, pursuant to SEC staff interpretations or our exemptive relief from the SEC that permits greater flexibility relating to co-investments, such investments will be made consistent with such relief and MC Advisors' allocation policy. Under this allocation policy, a fixed percentage of each opportunity, which may vary based on asset class and from time to time, will be offered to us and similar eligible accounts, as periodically determined by MC Advisors and approved by our board of directors, including a majority of our independent directors. The allocation policy provides that allocations among us and other accounts will generally be made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors, including a majority of our independent directors. It is our policy to base our determinations as to the amount of capital available for investment on such factors as the amount of cash on hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors, or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. In situations where co-investment with other entities sponsored or managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, MC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. MC Advisors will make these determinations based on its policies and procedures, which will generally require that such opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods.

Corporate History and Additional Information

We were incorporated under the laws of Maryland on February 9, 2011. Our principal executive offices are located at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, and our telephone number is (312) 258-8300. We maintain a website at www.monroeibd.com and make all of our periodic and current reports, proxy statements and other information available, free of charge, on or through our website. Information on our website is not incorporated into or part of this prospectus supplement or the accompanying prospectus. You may also obtain such information free of charge by contacting us in writing at 311 South Wacker Drive, Suite 6400, Chicago, Illinois 60606, attention: Investor Relations.

We have filed with the SEC a registration statement on Form N-2, of which this prospectus supplement is a part, under the Securities Act of 1933, as amended, or the Securities Act. This registration statement contains additional information about us and the securities being offered by this prospectus supplement. We also file periodic reports, current reports, proxy statements and other information with the SEC. This information is available at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549

and on the SEC's website at www.sec.gov. Information on the operation of the SEC's public reference room may be obtained by calling the SEC at 1-800-SEC-0330.

Implications of Being an Emerging Growth Company

We qualify as an emerging growth company as defined in the Jumpstart our Business Startups Act of 2012, or the JOBS Act. As an emerging growth company, we may take advantage of specified reduced reporting requirements and are relieved of certain other significant requirements that are otherwise generally applicable to public companies including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a non-binding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. If some investors find our securities less attractive as a result, there may be a less active trading market for our securities and the prices of our securities may be more volatile.

In addition, Section 7(a)(2)(B) of the Securities Act and Section 13(a) of the Exchange Act, as amended by Section 102(b) of the JOBS Act, provide that an emerging growth company can take advantage of the extended transition period for complying with new or revised accounting standards. However, pursuant to Section 107 of the JOBS Act, we have chosen to opt out of such extended transition period, and as a result, we comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Our decision to opt out of the extended transition period for complying with new or revised accounting standards is irrevocable.

We may take advantage of these provisions until December 31, 2017 or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than \$1.0 billion in annual revenues, have more than \$700 million in market value of our common stock held by non-affiliates or issue more than \$1.0 billion of non-convertible debt over a three-year period.

Sale of Common Stock Below NAV

We may offer, and have in the past offered, shares of our common stock at a discount from our most recently determined net asset value per share pursuant to authority granted by our stockholders on July 14, 2016, June 24, 2015, June 27, 2014 and July 9, 2013. Our board of directors has in the past determined that it would be in our and our stockholders' best interests to issue shares of our common stock below net asset value. See Sale of Common Stock Below Net Asset Value in this prospectus supplement, Risk Factors on page 12 of the accompanying prospectus and Sales of Common Stock Below Net Asset Value on page 107 of the accompanying prospectus.

Risk Factors

The value of our assets, as well as the market price of our shares will fluctuate. Our investments may be risky, and you may lose all or part of your investment in us. A material portion of our portfolio may have exposure to specific industries. See Risk Factors beginning on page 12 of the accompanying prospectus for a more detailed discussion of the material risks you should carefully consider before deciding to invest in our common stock.

TABLE OF CONTENTS

THE OFFERING

Common Stock Offered by Us

Shares of our common stock having an aggregate offering price of up to \$50,000,000.

Manner of Offering

At the market offering that may be made from time to time through FBR Capital Markets & Co. and JMP Securities LLC, each a Sales Agent and, collectively, the Sales Agents, using commercially reasonable efforts. See Plan of Distribution.

Use of Proceeds

We intend to use the net proceeds of this offering to invest in portfolio companies in accordance with our investment objectives and for general corporate purposes. We will also pay operating expenses, including management and administrative fees, and may pay other expenses from the net proceeds of this offering. Pending such investments, we intend to invest the net proceeds of this offering primarily in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. See Use of Proceeds.

Symbol on The Nasdaq Global Select Market

MRCC

Distributions

To the extent we have income and cash available, we intend to make quarterly distributions to our stockholders. Our quarterly distributions, if any, will be determined by our board of directors. Any distributions to our stockholders will be declared out of assets legally available for distribution.

Taxation

We have elected and intend to continue to qualify as a RIC under the Code. As a RIC, we generally will not have to pay corporate-level U.S. federal income taxes on any net ordinary income or capital gain that we distribute to our stockholders. To obtain and maintain RIC tax status, we must distribute at least 90% of our net ordinary income and net short-term capital gains in excess of our net long-term capital losses, if any. Because most of our income will not be attributable to dividends, such income will not be taxable at more favorable rates for qualified dividend income. Distributions made to you will generally be taxed as ordinary income or as capital gains.

Leverage

As a business development company, we are permitted under the 1940 Act to borrow funds to finance a portion of our investments. As a result, we may be exposed to the risks of leverage, which may be considered a speculative investment technique. Borrowings, also known as leverage, increase the potential for gain and loss on amounts invested and therefore increase the risks associated with investing in our securities. With certain limited exceptions, we are currently only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% immediately after such borrowing. In addition, the costs associated with our borrowings, if any, including any increase in the management fee payable to MC Advisors, will be borne by our common stockholders.

S-9

TABLE OF CONTENTS

We have received exemptive relief from the Securities and Exchange Commission to permit us to exclude the debt of our SBIC subsidiary guaranteed by the SBA from the definition of senior securities for the purposes of the 200% asset coverage ratio we are required to maintain under the 1940 Act, which provides us with increased flexibility, but also increases our risks associated with leverage.

As of December 31, 2016, we had debt outstanding under the revolving loan portion of the credit facility of approximately \$129.0 million, SBA-guaranteed debentures outstanding of \$51.5 million and \$1.3 million of secured borrowings at fair value, which arose under the application of Accounting Standards Codification, or ASC, Topic 860 Transfer and Servicing, or ASC Topic 860, due to partial loan sales during the year ended December 31, 2013.

Trading

Shares of closed-end investment companies, including business development companies, frequently trade in the secondary market at a discount to their net asset value. The risk that our shares may trade at a discount to our net asset value is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our shares will trade above, at, or below net asset value.

Sales of common stock below net asset value

Generally, the offering price per share of our common stock, exclusive of any underwriting commissions or discounts, may not be less than the net asset value per share of our common stock at the time we make the offering except (1) in connection with a rights offering to our existing stockholders, (2) with the consent of the majority of our common stockholders and approval of our board of directors, including the approval of a majority of our independent directors, or (3) under such circumstances as the SEC may permit.

On July 14, 2016, our stockholders voted to allow us to sell or otherwise issue common stock at a price below net asset value per share for a period of twelve months subject to approval by our board of directors. Sales or other issuances by us of our common stock at a discount from our net asset value pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering.

Risk Factors

An investment in our common stock is subject to risks. See **Risk Factors** beginning on page S-14 of this prospectus supplement to read about factors you should consider before deciding to invest in shares of our common stock.

S-10

TABLE OF CONTENTS**FEES AND EXPENSES**

The following table is intended to assist you in understanding the costs and expenses that an investor in our common stock will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and actual amounts and percentages may vary. Except where the context suggests otherwise, whenever this prospectus supplement and the accompanying prospectus contain a reference to fees or expenses paid by you, us, the Company or Monroe Capital Corporation, or that we will pay fees or expenses, stockholders will indirectly bear such fees or expenses as investors in Monroe Capital Corporation.

Stockholder transaction expenses:		
Sales load (as a percentage of offering price)	2.00	% ⁽¹⁾
Offering expenses (as a percentage of offering price)	0.57	% ⁽²⁾
Dividend reinvestment plan expenses		% ⁽³⁾
Total stockholder transaction expenses (as a percentage of offering price)	2.57	%
Estimated annual expenses (as a percentage of net assets attributable to common stock):		
Base management fee	2.92	% ⁽⁴⁾
Incentive fees payable under the Investment Advisory Agreement	2.49	% ⁽⁵⁾
Interest payments on borrowed funds	2.99	% ⁽⁶⁾
Other expenses (estimated)	1.82	% ⁽⁷⁾
Total annual expenses (estimated)	10.22	% ⁽⁸⁾

Represents the commission with respect to the shares of common stock being sold in this offering. There is no (1) guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus.

(2) The percentage reflects estimated offering expenses of approximately \$285,000.

(3) The expenses of the dividend reinvestment plan are included in other expenses. See Dividend Reinvestment Plan. Our base management fee is 1.75% of our total assets (which includes assets purchased with borrowed amounts but does not include cash and cash equivalents). For the purposes of this table, we have assumed that the base management fee will remain at 1.75% as set forth in the Investment Advisory Agreement. We may from time to time decide it is appropriate to change the terms of the Investment Advisory Agreement. Under the 1940 Act, any material change to the Investment Advisory Agreement generally must be submitted to our stockholders for approval. The base management fee percentage is calculated as a percentage of net assets attributable to common (4) stockholders, rather than total assets, including assets that have been funded with borrowed monies, because common stockholders bear all of this cost. The base management fee in the table above assumes the base management fee remains consistent with fees incurred for the three months ended December 31, 2016 of \$1.7 million, based on average total assets (excluding cash) for the period of \$397.7 million, as a percentage of our average net assets for the period of \$240.0 million. See Management and Other Agreements Investment Advisory Agreement in the accompanying prospectus.

Estimated assuming that annual incentive fees earned by MC Advisors remains consistent with the incentive fees earned, gross of the incentive fee waiver, for the three months ended December 31, 2016 of \$1.5 million, as a (5) percentage of our average net assets of \$240.0 million for the period. For information about our incentive fee waiver, see Consolidated Statements of Operations in our financial statements included in this prospectus supplement.

The incentive fee consists of two parts:

The first part of the incentive fee, payable quarterly in arrears, equals 20% of our pre-incentive fee net investment income (including interest that is accrued but not yet received in cash), subject to a 2% quarterly (8% annualized) hurdle rate and a catch-up provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, MC Advisors receives no incentive fee until our net investment income equals the hurdle rate of 2% but then receives, as a catch-up, 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net

S-11

TABLE OF CONTENTS

investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, MC Advisors will receive 20% of our pre-incentive fee net investment income as if a hurdle rate did not apply. The first component of the incentive fee will be computed and paid on income that includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with PIK interest, preferred stock with PIK dividends and zero coupon securities, accrued income that we have not yet received in cash. Since the hurdle rate is fixed, as interest rates rise, it will be easier for the MC Advisors to surpass the hurdle rate and receive an incentive fee based on net investment income. The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income will be payable except to the extent that 20% of the cumulative net increase in net assets resulting from operations over the then current and 11 preceding calendar quarters exceeds the cumulative incentive fees accrued and/or paid for the 11 preceding calendar quarters. In other words, any ordinary income incentive fee that is payable in a calendar quarter will be limited to the lesser of (i) 20% of the amount by which our pre-incentive fee net investment income for such calendar quarter exceeds the 2% hurdle, subject to the catch-up provision, and (ii) (x) 20% of the cumulative net increase in net assets resulting from operations for the then current and 11 preceding calendar quarters *minus* (y) the cumulative incentive fees accrued and/or paid for the 11 preceding calendar quarters. For the foregoing purpose, the cumulative net increase in net assets resulting from operations is the sum of our pre-incentive fee net investment income, base management fees, realized gains and losses and unrealized appreciation and depreciation for the then current and 11 preceding calendar quarters.

The second part of the incentive fee, payable annually in arrears, equals 20% of our realized capital gains on a cumulative basis from inception through the end of the fiscal year, if any (or upon the termination of the Investment Advisory Agreement, as of the termination date), computed net of all realized capital losses on a cumulative basis and unrealized capital depreciation, less the aggregate amount of any previously paid capital gain incentive fees. We will accrue (but not pay) an expense for potential payment of capital gain incentive fees with respect to any unrealized appreciation on our portfolio.

See Management and Other Agreements Investment Advisory Agreement in the accompanying prospectus.

- We may borrow funds from time to time to make investments to the extent we determine that it is appropriate to do so. The costs associated with any outstanding borrowings are indirectly borne by our investors. The table assumes borrowings are consistent with the average borrowings for the three months ended December 31, 2016 of \$164.0 million, no preferred stock issued or outstanding and average net assets of \$240.0 million. For the three months ended December 31, 2016, we had interest expense of \$1.8 million (including fees for unused portions of commitments). The weighted average interest rate of our revolving credit facility (excluding debt issuance costs) was 3.75% and the weighted average interest rate on our SBA-guaranteed debentures (excluding debt issuance costs) was 2.99% during the three months ended December 31, 2016. Although we do not have any current plans to issue debt securities or preferred stock in the next twelve months, we may issue debt securities or preferred stock, subject to our compliance with applicable requirements under the 1940 Act.
- (6) Includes our estimated overhead expenses, including payments under the Administration Agreement based on our allocable portion of overhead and other expenses incurred by MC Management. The table above assumes other expenses remain consistent with the \$1.1 million incurred during the three months ended December 31, 2016 and average net assets for the period of \$240.0 million.
- (7) Total annual expenses as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. We calculate the total annual expenses percentage as a percentage of net assets (defined as total assets less indebtedness and after taking into account any incentive fees payable during the period), rather than the total assets, including assets that have been purchased with borrowed amounts. The terms of our indebtedness may be found in Management's Discussion and Analysis of Financial Condition and Results of
- (8)

Operations Liquidity and Capital Resources Borrowings. If the total annual expenses percentage were calculated instead as a percentage of consolidated total assets, our total annual expenses would be 6.04% of consolidated total assets. With certain limited exceptions, we are only allowed to borrow amounts such that our asset

TABLE OF CONTENTS

coverage ratio, as defined in the 1940 Act, equals at least 200% of total assets after such borrowing. We have received exemptive relief from the SEC to permit us to exclude the debt of our SBIC subsidiary guaranteed by the SBA from the definition of senior securities for the purposes of the 200% asset coverage ratio, which provides us with increased flexibility, but also increases our risks associated with leverage. We have included our estimated leverage expenses (consistent with the assumptions in footnote (7)) for the twelve months following this offering in total annual expenses.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage, that none of our assets are cash or cash equivalents and that our annual operating expenses would remain at the levels set forth in the table above.

You would pay the following expenses on a \$1,000 investment	1 Year	3 Years	5 Years	10 Years
Assuming a 5% annual return (assumes no return from net realized capital gains or net unrealized capital appreciation)	\$ 103	\$ 257	\$ 412	\$ 798
Assuming a 5% annual return (assumes entire return is from realized capital gains and thus subject to the capital gains incentive fee)	\$ 113	\$ 289	\$ 467	\$ 924

This table is to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. As incentive fees vary based on the character of the 5% return, the example above provides (i) expenses assuming no return from capital gains (therefore not meeting the hurdle rate for the first part of the incentive fee) and (ii) expenses assuming the entire return is from realized capital gains (resulting in a capital gains incentive fee). For the year ended December 31, 2016, 7.72% of our return (excluding the incentive fee waiver) was comprised of realized and unrealized capital gains, excluding the incentive fee waiver. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, if our board of directors authorizes and we declare a cash distribution, participants in our dividend reinvestment plan who have not otherwise elected to receive cash will receive a number of shares of our common stock, determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See Dividend Reinvestment Plan for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

TABLE OF CONTENTS

RISK FACTORS

Investing in our securities involves a number of significant risks. Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus supplement and the accompanying prospectus, before you decide whether to make an investment in our common stock. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us may also impair our operations and performance. If any of the following events occurs, our business, financial condition, results of operations and cash flows could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment. The risk factors described below are the principal risk factors associated with an investment in us as well as those factors generally associated with an investment company with investment objectives, investment policies, capital structure or trading markets similar to ours.

Risks Relating to Our Business and Structure

We depend upon MC Advisors' senior management for our success, and upon its access to the investment professionals of Monroe Capital and its affiliates.

We do not have any internal management capacity or employees. We depend on the investment expertise, skill and network of business contacts of the senior investment professionals of MC Advisors, who evaluate, negotiate, structure, execute, monitor and service our investments in accordance with the terms of the Investment Advisory Agreement. Our success depends to a significant extent on the continued service and coordination of the senior investment professionals of MC Advisors, particularly Messrs. Koenig, Peck, Egan and VanDerMeid. These individuals may have other demands on their time now and in the future, and we cannot assure you that they will continue to be actively involved in our management. Each of these individuals is an employee of MC Management and is not subject to an employment contract. The departure of any of these individuals or competing demands on their time in the future could have a material adverse effect on our ability to achieve our investment objective.

MC Advisors evaluates, negotiates, structures, closes and monitors our investments in accordance with the terms of the Investment Advisory Agreement. We can offer no assurance, however, that MC Advisors' senior investment professionals will continue to provide investment advice to us. If these individuals do not maintain their existing relationships with Monroe Capital and its affiliates and do not develop new relationships with other sources of investment opportunities, we may not be able to grow our investment portfolio or achieve our investment objective. In addition, individuals with whom Monroe Capital's senior investment professionals have relationships are not obligated to provide us with investment opportunities. Therefore, we can offer no assurance that such relationships will generate investment opportunities for us.

MC Advisors, an affiliate of Monroe Capital, provides us with access to Monroe Capital's investment professionals. MC Advisors also depends upon Monroe Capital to obtain access to deal flow generated by the investment professionals of Monroe Capital and its affiliates. The Staffing Agreement provides that MC Management will make available to MC Advisors experienced investment professionals and access to the senior investment personnel of Monroe Capital for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. We are not a party to this Staffing Agreement and cannot assure you that MC Management will fulfill its obligations under the agreement. Furthermore, the Staffing Agreement may be terminated by either party without penalty upon 60 days written notice to the other party. If MC Management fails to perform or terminates the agreement, we cannot assure

you that MC Advisors will enforce the Staffing Agreement or that such agreement will not be terminated by either party or that we will continue to have access to the investment professionals of Monroe Capital and its affiliates or their information and deal flow.

The investment committee that oversees our investment activities is provided by MC Advisors under the Investment Advisory Agreement. MC Advisors' investment committee consists of Messrs. Koenig, Peck, Egan and VanDerMeid.

The loss of any member of MC Advisors' investment committee or of other Monroe Capital senior investment professionals would limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition and results of operations.

S-14

TABLE OF CONTENTS

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors and investment professionals. Any inability of MC Advisors to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon the senior investment professionals of MC Advisors to maintain their relationships with financial institutions, sponsors and investment professionals, and we rely to a significant extent upon these relationships to provide us with potential investment opportunities. If the senior investment professionals of MC Advisors fail to maintain such relationships, or to develop new relationships with other sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the senior investment professionals of MC Advisors have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

Our financial condition and results of operation depend on our ability to manage our business effectively.

Our ability to achieve our investment objective and grow depends on our ability to manage our business. This depends, in turn, on MC Advisors' ability to identify, invest in and monitor companies that meet our investment criteria. The achievement of our investment objectives depends upon MC Advisors' execution of our investment process, its ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. MC Advisors has substantial responsibilities under the Investment Advisory Agreement. The senior origination professionals and other personnel of MC Advisors and its affiliates may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition, results of operations and prospects. Our results of operations depend on many factors, including the availability of opportunities for investment, readily accessible short and long-term funding alternatives in the financial markets and economic conditions. Furthermore, if we cannot successfully operate our business or implement our investment policies and strategies, it could negatively impact our ability to pay dividends or other distributions and you may lose all or part of your investment.

There may be conflicts related to obligations that MC Advisors' senior investment professionals and members of its investment committee have to other clients.

The senior investment professionals and members of the investment committee of MC Advisors serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of investment funds, accounts or other investment vehicles sponsored or managed by MC Advisors or its affiliates. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in our best interests or in the best interest of our stockholders. For example, Messrs. Koenig, Egan and VanDerMeid have and will continue to have, and Mr. Peck may have, management responsibilities for other investment funds, accounts or other investment vehicles sponsored or managed by affiliates of MC Advisors. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our stockholders. MC Advisors seeks to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors,

its allocation policy.

Affiliates of MC Advisors manage other assets in four closed-end funds, two small business investment companies and nine private funds that also have an investment strategy focused primarily on senior, unitranche and junior secured debt and, to a lesser extent, unsecured subordinated debt to lower middle-market companies. None of these funds are registered with the SEC. In addition, although we are currently the only entity managed by MC Advisors, MC Advisors and/or its affiliates may manage other entities in the future with an investment strategy that has the same or similar focus as ours.

Monroe Capital and its affiliates seek to allocate investment opportunities among eligible accounts made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors, including our independent directors. It is the policy of Monroe Capital and its affiliates to base the determinations as to the amount of capital available for investment on such factors as the amount of cash

S-15

TABLE OF CONTENTS

on hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors, or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. In situations where co-investment with other entities sponsored or managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, MC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. MC Advisors will make these determinations based on its policies and procedures which require that such opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods. However, there can be no assurance that we will be able to participate in all investment opportunities that are suitable to us.

MC Advisors or its investment committee may, from time to time, possess material nonpublic information, limiting our investment discretion.

The managing members and the senior origination professionals of MC Advisors and the senior professionals and members of MC Advisors' investment committee may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material nonpublic information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have a material adverse effect on us.

Our management and incentive fee structure may create incentives for MC Advisors that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we pay management and incentive fees to MC Advisors. Management fees are based on our total assets (which include assets purchased with borrowed amounts but exclude cash and cash equivalents). As a result, investors in our common stock invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on our total assets, including assets purchased with borrowed amounts but excluding cash and cash equivalents, MC Advisors benefits when we incur debt or otherwise use leverage. This fee structure may encourage MC Advisors to cause us to borrow money to finance additional investments or to maintain leverage when it would otherwise be appropriate to pay off our indebtedness. Under certain circumstances, the use of borrowed money may increase the likelihood of default, which would disfavor our stockholders. Our board of directors is charged with protecting our interests by monitoring how MC Advisors addresses these and other conflicts of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each investment, our independent directors periodically review MC Advisors' services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, MC Advisors or its affiliates may from time to time have interests that differ from those of our stockholders, giving rise to a conflict.

The part of the incentive fee payable to MC Advisors that relates to our net investment income is computed and paid on income that may include interest income that has been accrued but not yet received in cash. This fee structure may be considered to involve a conflict of interest for MC Advisors to the extent that it may encourage MC Advisors to favor debt financings that provide for deferred interest, rather than current cash payments of interest. MC Advisors may have an incentive to invest in PIK interest securities in circumstances where it would not have done so but for the

MC Advisors or its investment committee may, from time to time, possess material nonpublic information, limiting our

opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because MC Advisors is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued. In addition, the part of the incentive fee payable to MC Advisors that relates to our net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Any net investment income incentive fee would not be subject to repayment.

S-16

TABLE OF CONTENTS

Our incentive fee may induce MC Advisors to make certain investments, including speculative investments.

MC Advisors receives an incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, MC Advisors may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The Investment Advisory Agreement with MC Advisors and the Administration Agreement with MC Management were not negotiated on an arm's length basis and may not be as favorable to us as if they had been negotiated with an unaffiliated third-party.

We negotiated the Investment Advisory Agreement and the Administration Agreement with related parties. Consequently, their terms, including fees payable to MC Advisors, may not be as favorable to us as if they had been negotiated with an unaffiliated third-party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights and remedies under these agreements because of our desire to maintain our ongoing relationship with MC Advisors and MC Management. Any such decision, however, would breach our fiduciary obligations to our stockholders.

Our ability to enter into transactions with our affiliates is restricted, which may limit the scope of investments available to us.

We are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Any person that owns, directly or indirectly, five percent or more of our outstanding voting securities is our affiliate for purposes of the 1940 Act, and we are generally prohibited from buying or selling any security from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits certain joint transactions with certain of our affiliates, which could include investments in the same portfolio company, without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to any person who owns more than 25% of our voting securities or certain of that person's affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC. As a result of these restrictions, we may be prohibited from buying or selling any security (other than any security of which we are the issuer) from or to any portfolio company of a private equity fund managed by MC Advisors or its affiliates without the prior approval of the SEC, which may limit the scope of investment opportunities that would otherwise be available to us.

We may, however, co-invest with MC Advisors and its affiliates' other clients in certain circumstances where doing so is consistent with applicable law and SEC staff interpretations. For example, we may co-invest with such accounts consistent with guidance promulgated by the SEC staff permitting us and such other accounts to purchase interests in a single class of privately placed securities so long as certain conditions are met, including that MC Advisors, acting on our behalf and on behalf of other clients, negotiates no term other than price. We may also co-invest with MC Advisors' affiliates' other clients as otherwise permissible under regulatory guidance, applicable regulations, exemptive relief granted to us by the SEC on October 15, 2014 and MC Advisors' allocation policy, which the investment committee of MC Advisors maintains in writing. Under this allocation policy, a fixed percentage of each opportunity,

which may vary based on asset class and from time to time, is offered to us and similar eligible accounts, as periodically determined by MC Advisors and approved by our board of directors, including our independent directors. The allocation policy further provides that allocations among us and these other accounts are generally made pro rata based on each account's capital available for investment, as determined, in our case, by our board of directors. It is our policy to base our determinations as to the amount of capital available for investment based on such factors as: the amount of cash on-hand, existing commitments and reserves, if any, the targeted leverage level, the targeted asset mix and diversification requirements and other investment policies and restrictions set by our board of directors or imposed by applicable laws, rules, regulations or interpretations. We expect that these determinations will be made similarly for other accounts. However, we can offer no assurance that investment opportunities will be allocated to us fairly or equitably in the short-term or over time.

S-17

TABLE OF CONTENTS

In situations where co-investment with other funds managed by MC Advisors or its affiliates is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer or where the different investments could be expected to result in a conflict between our interests and those of other MC Advisors clients, MC Advisors must decide which client will proceed with the investment. MC Advisors makes these determinations based on its policies and procedures, which generally require that such opportunities be offered to eligible accounts on an alternating basis that will be fair and equitable over time. Moreover, except in certain circumstances, we are unable to invest in any issuer in which a fund managed by MC Advisors or its affiliates has previously invested. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates.

We may also be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of the majority of the members of our board of directors who are not interested persons and, in some cases, prior approval by the SEC. The SEC has interpreted the business development company regulations governing transactions with affiliates to prohibit certain joint transactions between entities that share a common investment adviser.

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

We compete with a number of specialty and commercial finance companies to make the types of investments that we make in middle-market companies, including business development companies, traditional commercial banks, private investment funds, regional banking institutions, small business investment companies, investment banks and insurance companies. Additionally, with increased competition for investment opportunities, alternative investment vehicles such as hedge funds may seek to invest in areas they have not traditionally invested in or from which they had withdrawn during the economic downturn, including investing in middle-market companies. As a result, competition for investments in lower middle-market companies has intensified, and we expect that trend to continue. Many of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. These characteristics could allow our competitors to consider a wider variety of investments, establish more relationships and offer better pricing and more flexible structuring than we offer. We may lose investment opportunities if we do not match our competitors pricing, terms and structure. If we are forced to match our competitors pricing, terms and structure, however, we may not be able to achieve acceptable returns on our investments or may bear substantial risk of capital loss. A significant part of our competitive advantage stems from the fact that the lower middle-market is underserved by traditional commercial and investment banks, and generally has less access to capital. A significant increase in the number and/or the size of our competitors in this target market could force us to accept less attractive investment terms.

Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a business development company or the source of income, asset diversification and distribution requirements we must satisfy to maintain our RIC status. The competitive pressures we face may have a material adverse effect on our business, financial condition and results of operations. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

We will be subject to corporate-level federal income tax if we are unable to qualify or maintain qualification as a RIC under Subchapter M of the Code.

We elected to be treated as a RIC under Subchapter M of the Code commencing with our taxable year ended December 31, 2012, have qualified in each taxable year since, and intend to qualify annually hereafter; however, no assurance can be given that we will be able to qualify for and maintain RIC status. To qualify as a RIC under the Code and to be relieved of federal taxes on income and gains distributed to our stockholders, we must meet certain requirements, including source-of-income, asset diversification and distribution requirements. The annual distribution requirement applicable to RICs is satisfied if we distribute at least 90% of our net ordinary income and net short-term

S-18

TABLE OF CONTENTS

capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. In addition, we will be subject to a 4% nondeductible federal excise tax to the extent that we do not satisfy certain additional minimum distribution requirements on a calendar year basis. To the extent we use debt financing, we will be subject to certain asset coverage ratio requirements under the 1940 Act and may be subject to financial covenants under loan and credit agreements, each of which could, under certain circumstances, restrict us from making annual distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify and maintain our qualification for the tax benefits available to RICs and, thus, may be subject to corporate-level federal income tax on our entire taxable income without regard to any distributions made by us. To qualify and maintain our qualification as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments will be in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to qualify as a RIC for any reason and become subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distributions to stockholders and the amount of our distributions and the amount of funds available for new investments. Such a failure would have a material adverse effect on us and our stockholders. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

An extended disruption in the capital markets and the credit markets could negatively affect our business.

As a business development company, it will be necessary for us to maintain our ability to raise additional capital for investment purposes. Without sufficient access to the capital markets or credit markets, we may be forced to curtail our business operations or we may not be able to pursue new business opportunities. The capital markets and the credit markets have experienced periods of extreme volatility and disruption and, accordingly, there has been and may in the future be uncertainty in the financial markets in general. Ongoing disruptive conditions in the financial industry and the impact of new legislation in response to those conditions could restrict our business operations and could adversely impact our results of operations and financial condition.

We access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. A reduction in the availability of new capital could limit our ability to pursue new business opportunities and grow our business. In addition, we are required to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to qualify for the tax benefits available to RICs. As a result, these earnings will not be available to fund new investments. An inability to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which may have an adverse effect on the value of our securities.

We may need to raise additional capital to grow because we must distribute most of our income.

We may need additional capital to fund new investments and grow our portfolio of investments. We intend to access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. A reduction in the availability of new capital could limit our ability to grow. In addition, we are required to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to

maintain our qualification as a RIC. As a result, these earnings are not available to fund new investments. An inability to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which may have an adverse effect on the value of our securities.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as original issue discount, or through contracted PIK interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Original issue discount,

S-19

TABLE OF CONTENTS

which could be significant relative to our overall investment activities, or increases in loan balances as a result of contracted PIK arrangements, will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash.

That part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash, such as original issue discount and PIK interest. If we pay a net investment income incentive fee on interest that has been accrued, but not yet received in cash, it will increase the basis of our investment in that loan, which will reduce the capital gain incentive fee that we would otherwise pay in the future. Nevertheless, if we pay a net investment income incentive fee on interest that has been accrued but not yet received, and if that portfolio company defaults on such a loan, it is possible that accrued interest previously included in the calculation of the incentive fee will become uncollectible.

Because we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirements applicable to RICs. In such a case, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations and sourcings to meet these distribution requirements. If we are not able to obtain such cash from other sources, we may fail to qualify for the tax benefits available to RICs and thus be subject to corporate-level income tax.

See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

Regulations governing our operation as a business development company affect our ability to and the way in which we raise additional capital.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a business development company to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of total assets less all liabilities and indebtedness not represented by senior securities, immediately after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. In addition, issuance of securities could dilute the percentage ownership of our current stockholders in us.

No person or entity from which we borrow money will have a veto power or a vote in approving or changing any of our fundamental policies. If we issue preferred stock, the preferred stock would rank senior to common stock in our capital structure, preferred stockholders would have separate voting rights on certain matters and might have other rights, preferences or privileges more favorable than those of our common stockholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in your best interest. Holders of our common stock will directly or indirectly bear all of the costs associated with offering and servicing any preferred stock that we issue.

In addition, any interests of preferred stockholders may not necessarily align with the interests of holders of our common stock and the rights of holders of shares of preferred stock to receive dividends would be senior to those of holders of shares of our common stock.

As a business development company, we generally are not able to issue our common stock at a price below net asset value per share without first obtaining the approval of our stockholders and our independent directors. If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, then percentage ownership of our stockholders at that time would decrease, and you might experience

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash re

dilution. We have stockholder approval to sell our common stock below net asset value through July 14, 2017. We may seek further stockholder approval to sell shares below net asset value in the future.

S-20

TABLE OF CONTENTS

We maintain a revolving credit facility and may use other borrowed funds to make investments or fund our business operations, which exposes us to risks typically associated with leverage and increases the risk of investing in us.

We maintain a revolving credit facility and may borrow money, including through the issuance of debt securities or preferred stock, to leverage our capital structure, which is generally considered a speculative investment technique. As a result:

our common stock is exposed to an increased risk of loss because a decrease in the value of our investments would have a greater negative impact on the value of our common stock than if we did not use leverage;
 if we do not appropriately match the assets and liabilities of our business, adverse changes in interest rates could reduce or eliminate the incremental income we make with the proceeds of any leverage;
 our ability to pay distributions on our common stock may be restricted if our asset coverage ratio, as provided in the 1940 Act, is not at least 200% and any amounts used to service indebtedness or preferred stock would not be available for such distributions;
 any credit facility is subject to periodic renewal by its lenders, whose continued participation cannot be guaranteed;
 our revolving credit facility with ING Capital LLC, as agent, is, and any other credit facility we may enter into would be, subject to various financial and operating covenants, including that our portfolio of investments satisfies certain eligibility and concentration limits as well as valuation methodologies;
 such securities would be governed by an indenture or other instrument containing covenants restricting our operating flexibility;
 we bear the cost of issuing and paying interest or distributions on such securities, which costs are entirely borne by our common stockholders; and
 any convertible or exchangeable securities that we issue may have rights, preferences and privileges more favorable than those of our common stock.

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on Our Portfolio (Net of Expenses) ⁽¹⁾				
	-10%	-5%	0%	5%	10%
Corresponding return to common stockholder ⁽²⁾	-20.34 %	-11.52 %	-2.70 %	6.11 %	14.93 %

(1) The assumed return on our portfolio is required by regulation of the SEC to assist investors in understanding the effects of leverage and is not a prediction of, and does not represent, our projected or actual performance.

Assumes \$425.0 million in total assets, \$184.0 million in debt outstanding, \$241.0 million in net assets and an average cost of funds of 3.5%, which was the weighted average interest rate of borrowings on our revolving credit facility and SBA-guaranteed debentures as of December 31, 2016. The interest rate on our revolving credit facility is a variable rate. See Summary Credit Facility.

We are subject to risks associated with our revolving credit facility.

Our revolving credit facility, as amended, imposes certain conditions that may limit the amount of our distributions to stockholders. Distributions payable in our common stock under our dividend reinvestment plan are not limited by the revolving credit facility. Distributions in cash or property other than our common stock are generally limited to 115% of the amount of distributions required to maintain our status as a RIC. We are required under the revolving credit

We maintain a revolving credit facility and may use other borrowed funds to make investments or fund our business

facility to maintain our status as a RIC.

S-21

TABLE OF CONTENTS

The revolving credit facility requires us to comply with certain financial and operational covenants, including asset and interest coverage ratios, a minimum net worth and minimum number of portfolio investments. For example, the revolving credit facility requires that we maintain an asset coverage ratio of at least 2.10 to 1 at all times and a consolidated interest coverage ratio of at least 2.50 to 1 as of the last day of any fiscal quarter. We may divert cash to pay the lenders in amounts sufficient to cause these tests to be satisfied. Our compliance with these covenants depends on many factors, some of which, such as market conditions, are beyond our control.

Our ability to sell our investments is also limited under the revolving credit facility. Under the revolving credit facility, the sale of any portfolio investment may not cause our covered debt amount to exceed our borrowing base. As a result, there may be times or circumstances during which we are unable to sell investments, pay distributions or take other actions that might be in our best interests.

Availability of borrowings under the revolving credit facility is linked to the valuation of the collateral pursuant to a borrowing base mechanism. As such, declines in the fair market value of our investments which are collateral to the revolving credit facility may reduce availability under our revolving credit facility.

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money to make investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we use debt to finance our investments. In periods of rising interest rates, our cost of funds would increase, which could reduce our net investment income. We expect that our long-term fixed-rate investments will be financed primarily with issuances of equity and long-term debt securities. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

You should also be aware that a rise in the general level of interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to MC Advisors.

We are exposed to risks associated with changes in interest rates.

Interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could have an adverse impact on our net investment income while an increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates and increase our interest expense, thereby decreasing our net income. An increase in interest rates available to investors could also make investment in our common stock less attractive unless we are able to increase our dividend rate. In addition, a significant increase in market interest rates could also result in an increase in our non-performing assets and a decrease in the value of our portfolio because our floating-rate loan portfolio companies may be unable to meet higher payment obligations.

MRCC SBIC is subject to SBA regulations.

Under current SBA regulations, a licensed SBIC can invest in entities that have a tangible net worth not exceeding \$19.5 million and an average annual net income after U.S. federal income taxes (excluding any carryover losses) not

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net

exceeding \$6.5 million for the two most recent fiscal years. In addition, a licensed SBIC must invest 25.0% of its capital in those entities that have a tangible net worth not exceeding \$6.0 million and an average annual net income after U.S. federal income taxes (excluding any carryover losses) not exceeding \$2.0 million for the two most recent fiscal years. The SBA regulations also provide alternative size standard criteria to determine eligibility, which depend on the industry in which the business is engaged and are based on either the number of employees or the gross sales.

The SBA regulations permit licensed SBICs to make long term loans to small businesses, invest in the equity securities of such businesses and provide them with consulting and advisory services. The SBA also places certain limitations on the financing terms of

S-22

TABLE OF CONTENTS

investments by SBICs in portfolio companies and prohibits SBICs from providing funds for certain purposes or to businesses in certain prohibited industries. Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA staff to determine its compliance with the relevant SBA regulations. Compliance with these SBA requirements may cause MRCC SBIC to forego attractive investment opportunities that are not permitted under the SBA regulations, and may cause MRCC SBIC to make investments it otherwise would not make in order to remain in compliance with these regulations.

Failure to comply with the SBA regulations could result in the loss of the SBIC license and the resulting inability to participate in the SBA debenture program. The SBA prohibits, without prior SBA approval, a change of control of an SBIC or transfers that would result in any person (or a group of persons acting in concert) owning 10.0% or more of a class of capital stock of a licensed SBIC. Current SBA regulations provide the SBA with certain rights and remedies if an SBIC violates their terms. Remedies for regulatory violations are graduated in severity depending on the seriousness of capital impairment or other regulatory violations. For minor regulatory infractions, the SBA issues a warning. For more serious infractions, the use of SBA debentures may be limited or prohibited, outstanding debentures can be declared to be immediately due and payable, restrictions on distributions and making new investments may be imposed and management fees may be required to be reduced. In severe cases, the SBA may require the removal of a general partner of an SBIC or its officers, directors, managers or partners, or the SBA may obtain appointment of a receiver for the SBIC.

SBA regulations limit the amount that may be borrowed from the SBA by an SBIC.

The SBA regulations currently limit the amount that is available to be borrowed by any SBIC and guaranteed by the SBA to 300.0% of an SBIC's regulatory capital or \$150.0 million, whichever is less. For two or more SBICs under common control (commonly referred to as a family of funds), the maximum amount of outstanding SBA debentures cannot exceed \$350.0 million (prior to December 18, 2015, this limitation was \$225.0 million). As Monroe Capital has other affiliated SBICs in operation, MRCC SBIC was historically limited to a maximum of \$40.0 million in borrowings. Pursuant to the recent increase in the family of funds leverage limitation, we submitted a commitment application to the SBA and on April 13, 2016 MRCC SBIC was approved for \$75.0 million in additional SBA-guaranteed debentures, for a total of \$115.0 million in available debentures. If MRCC SBIC borrows the maximum amount from the SBA and thereafter requires additional capital, our cost of capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms.

Moreover, there can be no assurance that MRCC SBIC will continue to receive SBA debenture funding. Receipt of SBA debenture funding depends upon an SBIC's continued compliance with SBA regulations and policies and the availability of funding. The amount of SBA debenture funding available to SBICs depends upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient SBA debenture funding available at the times desired by MRCC SBIC.

The debentures issued by MRCC SBIC to the SBA have a maturity of ten years and bear interest semi-annually at fixed rates. MRCC SBIC will need to generate sufficient cash flow to make required debt payments to the SBA. If MRCC SBIC is unable to generate such cash flow, the SBA, as a debt holder, will have a superior claim to our assets over our stockholders in the event it liquidates or the SBA exercises its remedies under such debentures as the result of a default by MRCC SBIC.

MRCC SBIC, as an SBIC, is limited in its ability to make distributions to us, which could result in us being unable to meet the minimum distribution requirements to maintain our status as a RIC.

In order to maintain our status as a RIC, we are required to distribute to our stockholders on an annual basis 90.0% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses. For this purpose, our taxable income includes the income of MRCC SBIC (and any other entities that are disregarded as separate from us for U.S. federal income tax purposes). MRCC SBIC's ability to make distributions to us may be limited by the Small Business Investment Act of 1958, as amended, and the regulations promulgated thereunder. As a result, in order to maintain our status as a RIC, we may be required to make distributions attributable to MRCC SBIC's income without receiving any corresponding cash

S-23

TABLE OF CONTENTS

distributions from it with respect to such income. We can make no assurances that MRCC SBIC will be able to make, or not be limited in making, distributions to us. If we are unable to satisfy the annual distribution requirements, we may fail to maintain our status as a RIC, which would result in the imposition of corporate-level U.S. federal income tax on our entire taxable income without regard to any distributions made by us. See We will be subject to corporate-level U.S. federal income tax if we are unable to qualify or maintain qualification as a RIC under Subchapter M of the Code.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a business development company, which would have a material adverse effect on our business, financial condition and results of operations.

As a business development company, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See Regulation Qualifying Assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could violate the 1940 Act provisions applicable to business development companies. As a result of such violation, specific rules under the 1940 Act could prevent us, for example, from making follow-on investments in existing portfolio companies which could result in the dilution of our position or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of investments quickly, it could be difficult to dispose of such investments on favorable terms. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.

Under the 1940 Act, we are required to carry our portfolio investments at market value or if there is no readily available market value, at fair value as determined by our board of directors. Many of our portfolio investments may take the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable, and we value these securities at fair value as determined in good faith by our board of directors, including to reflect significant events affecting the value of our securities. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

- a comparison of the portfolio company's securities to publicly traded securities;
 - the enterprise value of a portfolio company;
 - the nature and realizable value of any collateral;
 - the portfolio company's ability to make payments and its earnings and discounted cash flow;
 - the markets in which the portfolio company does business; and
- changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a business development

We expect that most of our investments (other than cash and cash equivalents) will be classified as Level 3 in the fair value hierarchy and require disclosures about the level of disaggregation along with the inputs and valuation techniques we use to measure fair value. This means that our portfolio valuations are based on unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of fair value of our portfolio investments require significant management judgment or estimation. Even if observable market data are available, such information may be the result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimers materially reduces the reliability of such

S-24

TABLE OF CONTENTS

information. We employ the services of one or more independent service providers to review the valuation of these securities. The types of factors that the board of directors may take into account in determining the fair value of our investments generally include, as appropriate, comparison to publicly traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Due to this uncertainty in the value of our portfolio investments, a fair value determination may cause net asset value on a given date to materially understate or overstate the value that we may ultimately realize upon one or more of our investments. As a result, investors purchasing shares of our common stock based on an overstated net asset value would pay a higher price than the value of the investments might warrant. Conversely, investors selling shares during a period in which the net asset value understates the value of investments will receive a lower price for their shares than the value the investment portfolio might warrant.

We adjust quarterly the valuation of our portfolio to reflect the determination of our board of directors of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our consolidated statements of operations as net change in unrealized appreciation (depreciation) on investments.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including our ability or inability to make investments in companies that meet our investment criteria, the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our business strategy.

We and our portfolio companies are subject to regulation at the local, state and federal level. New legislation may be enacted or new interpretations, rulings or regulations could be adopted, including those governing the types of investments we or our portfolio companies are permitted to make, any of which could have a material adverse effect on our business. In particular, on July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, became law. The scope of the Dodd-Frank Act impacts many aspects of the financial services industry, and it required the development and adoption of many implementing regulations. President Trump has indicated that he may seek to amend or repeal portions of the Dodd-Frank Act, among other federal laws, and drastically reduce the role of regulatory agencies, such as the CFPB, which may create regulatory uncertainty in the near term. The Dodd-Frank Act, including future changes to the rules implementing its provisions and the interpretation of those rules, along with other legislative and regulatory proposals directed at the financial services industry or affecting taxation that are proposed or pending in the U.S. Congress, may negatively impact the operations, cash flows or financial condition of us or our portfolio companies, impose additional costs on us or our portfolio companies, intensify the regulatory supervision of us or our portfolio companies or otherwise adversely affect our business or the business of our portfolio companies. In addition, if we do not comply with applicable laws and regulations, we could lose any licenses that we then hold for the conduct of our business and may be subject to

civil fines and criminal penalties.

Additionally, changes to the laws and regulations governing our operations, including those associated with RICs, may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities or result in the imposition of corporate-level taxes on us. Such changes could result in material differences to the strategies and plans set forth herein and may shift our investment focus from the areas of expertise of MC Advisors to other types of investments in which MC Advisors may have little or no expertise

S-25

TABLE OF CONTENTS

or experience. Any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment.

Over the last several years, there also has been an increase in regulatory attention to the extension of credit outside of the traditional banking sector, raising the possibility that some portion of the non-bank financial sector will be subject to new regulation. While it cannot be known at this time whether any regulation will be implemented or what form it will take, increased regulation of non-bank credit extension could negatively impact our operations, cash flows or financial condition, impose additional costs on us, intensify the regulatory supervision of us or otherwise adversely affect our business, financial condition and results of operations.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse.

Our board of directors has the authority, except as otherwise prohibited by the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval. However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a business development company. Under Maryland law, we also cannot be dissolved without prior stockholder approval except by judicial action. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and the price value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

MC Advisors can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

MC Advisors has the right to resign under the Investment Advisory Agreement without penalty at any time upon 60 days written notice to us, whether we have found a replacement or not. If MC Advisors resigns, we may not be able to find a new investment advisor or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by MC Advisors and its affiliates. Even if we were able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

MC Management can resign on 60 days notice from its role as our administrator under the Administration Agreement, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

Our board of directors may change our investment objective, operating policies and strategies without prior notice o

Even if we were able to retain a comparable service provider or individuals to perform such services, whether internal or external, their integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

S-26

TABLE OF CONTENTS

We are an emerging growth company, and we do not know if such status will make our common stock less attractive to investors.

We currently are, and expect to remain, an emerging growth company, as defined in the Jumpstart Our Business Startups Act, or the JOBS Act, signed into law on April 5, 2012, until the earliest of:

the last day of our fiscal year ending December 31, 2017;
the year in which our total annual gross revenues first exceed \$1.0 billion;
the date on which we have, during the prior three-year period, issued more than \$1.0 billion in non-convertible debt;
and
the last day of a fiscal year in which we (1) have an aggregate worldwide market value of our common stock held by non-affiliates of \$700 million or more, computed at the end of each fiscal year as of the last business day of our most recently completed second fiscal quarter, and (2) have been an Exchange Act reporting company for at least one year (and filed at least one annual report under the Exchange Act).

We currently take advantage of some or all of the reduced regulatory and disclosure requirements permitted by the JOBS Act and, as a result, some investors may consider our common stock less attractive, which could reduce the market value of our common stock. For example, while we are an emerging growth company, we take advantage of an exemption from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that our independent registered public accounting firm provide an attestation report on the effectiveness of our internal control over financial reporting and the extended transition period available to emerging growth companies to comply with new or revised accounting standards until those standards are applicable to private companies. As a result, our consolidated financial statements may not be comparable to the financial statements of issuers who are required to comply with the effective dates for new or revised accounting standards that are applicable to public companies. This may increase the risk that material weaknesses or other deficiencies in our internal control over financial reporting go undetected.

Efforts to comply with the Sarbanes-Oxley Act involve significant expenditures, and non-compliance with the Sarbanes-Oxley Act may adversely affect us and the market price of our common stock.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, and other rules implemented by the SEC.

We are subject to the Sarbanes-Oxley Act, and the related rules and regulations promulgated by the SEC. Under current SEC rules, our management is required to report on its internal controls over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act and rules and regulations of the SEC thereunder. We are required to review on an annual basis our internal controls over financial reporting, and on a quarterly and annual basis to evaluate and disclose changes in our internal controls over financial reporting. As a result, we expect to continue to incur associated expenses, which may negatively impact our financial performance and our ability to make distributions. This process also will result in a diversion of our management's time and attention. We cannot be certain as to the timing of completion of our evaluation, testing and remediation actions or the impact of the same on our operations and may not be able to ensure that the process is effective or that the internal controls are or will be effective in a timely manner.

There can be no assurance that our quarterly reviews and annual audits will not identify additional material weaknesses. In the event that we are unable to maintain or achieve compliance with the Sarbanes-Oxley Act and related rules, our value and results of operations may be adversely affected. As a result, we expect to incur significant

associated expenses, which may negatively impact our financial performance and our ability to make distributions.

As an emerging growth company, we are following certain permitted corporate governance practices instead of the otherwise applicable SEC and Nasdaq requirements, which may result in less protection than is accorded to investors in a non-emerging growth company.

As an emerging growth company, we are permitted and intend to follow certain permitted corporate governance practices instead of those otherwise required by the SEC and under the listing requirements of the

S-27

TABLE OF CONTENTS

Nasdaq Global Select Market. Following our emerging growth company governance practices as opposed to the requirements that would otherwise apply to a company listed on the Nasdaq Global Select Market may provide less protection to you than what is accorded to investors under the Listing Rules of the Nasdaq Stock Market applicable to non-emerging growth company issuers.

The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning, could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions.

If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

We may incur lender liability as a result of our lending activities.

In recent years, a number of judicial decisions have upheld the right of borrowers and others to sue lending institutions on the basis of various evolving legal theories, collectively termed lender liability. Generally, lender liability is founded on the premise that a lender has either violated a duty, whether implied or contractual, of good faith and fair dealing owed to the borrower or has assumed a degree of control over the borrower resulting in the creation of a fiduciary duty owed to the borrower or its other creditors or stockholders. We may be subject to allegations of lender liability, which could be time-consuming and expensive to defend and result in significant liability.

We may incur liability as a result of providing managerial assistance to our portfolio companies.

In the course of providing significant managerial assistance to certain portfolio companies, certain of our management and directors may serve as directors on the boards of such companies. To the extent that litigation arises out of investments in these companies, our management and directors may be named as defendants in such litigation, which could result in an expenditure of our funds, through our indemnification of such officers and directors, and the diversion of management time and resources.

MC Advisors may not be able to achieve the same or similar returns as those achieved by our senior management and investment teams while they were employed at prior positions.

The track record and achievements of the senior investment professionals of Monroe Capital are not necessarily indicative of future results that will be achieved by MC Advisors. As a result, MC Advisors may not be able to achieve the same or similar returns as those achieved by the senior investment professionals of Monroe Capital.

Risks Related to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may

S-28

TABLE OF CONTENTS

decrease the value of collateral securing some of our loans and the value of our equity investments and could lead to financial losses in our portfolio and a corresponding decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of its loans and foreclosure on its assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. It is possible that we could become subject to a lender liability claim, including as a result of actions taken if we or MC Advisors render significant managerial assistance to the borrower.

Furthermore, if one of our portfolio companies were to file for bankruptcy protection, even though we may have structured our investment as senior secured debt, depending on the facts and circumstances, including the extent to which we or MC Advisors provided managerial assistance to that portfolio company or otherwise exercise control over it, a bankruptcy court might re-characterize our debt as a form of equity and subordinate all or a portion of our claim to claims of other creditors.

Market conditions have materially and adversely affected debt and equity capital markets in the United States and around the world.

In the past, the global capital markets experienced periods of disruption resulting in increasing spreads between the yields realized on riskier debt securities and those realized on securities perceived as being risk-free and a lack of liquidity in parts of the debt capital markets, significant write-offs in the financial services sector relating to subprime mortgages and the re-pricing of credit risk in the broadly syndicated market. These events, along with the deterioration of the housing market, illiquid market conditions, declining business and consumer confidence and the failure of major financial institutions in the United States, led to a general decline in economic conditions. This economic decline materially and adversely affected the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and to financial firms in particular. If such a period of disruption were to occur in the future, to the extent that we wish to use debt to fund our investments, the debt capital that will be available to us, if at all, may be at a higher cost, and on terms and conditions that may be less favorable, than what we expect, which could negatively affect our financial performance and results. A prolonged period of market illiquidity may cause us to reduce the volume of loans we originate and/or fund below historical levels and adversely affect the value of our portfolio investments, which could have a material and adverse effect on our business, financial condition, and results of operations. The spread between the yields realized on riskier debt securities and those realized on securities perceived as being risk-free has remained narrow on a relative basis recently. If these spreads were to widen or if there were deterioration of market conditions, these events could materially and adversely affect our business.

Our investments in leveraged portfolio companies may be risky, and you could lose all or part of your investment.

Investment in leveraged companies involves a number of significant risks. Leveraged companies, including lower middle-market companies, in which we invest may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold. Such developments may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees that we may have obtained in connection with our investment. In addition, our junior secured loans are generally subordinated to senior loans. As

Economic recessions or downturns could impair our portfolio companies and harm our operating results. 60

such, other creditors may rank senior to us in the event of an insolvency.

Our portfolio companies will likely consist primarily of lower middle-market, privately owned companies, which may present a greater risk of loss than loans to larger companies.

Our portfolio consists, and will most likely continue to consist, primarily of loans to lower middle-market, privately owned companies. Compared to larger, publicly traded firms, these companies generally have more limited access to capital and higher funding costs, may be in a weaker financial position

S-29

TABLE OF CONTENTS

and may need more capital to expand, compete and operate their business. In addition, many of these companies may be unable to obtain financing from public capital markets or from traditional sources, such as commercial banks. Accordingly, loans made to these types of borrowers may entail higher risks than loans made to companies that have larger businesses, greater financial resources or are otherwise able to access traditional credit sources on more attractive terms.

Investing in lower middle-market companies involves a number of significant risks, including that lower middle-market companies:

may have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;

are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

typically have more limited access to the capital markets, which may hinder their ability to refinance borrowings; will be unable to refinance or repay at maturity the unamortized loan balance as we structure our loans such that a significant balance remains due at maturity;

generally have less predictable operating results, may be particularly vulnerable to changes in customer preferences or market conditions, depend on one or a limited number of major customers;

may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position; and

generally have less publicly available information about their businesses, operations and financial condition. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and may lose all or part of our investment.

Any of these factors or changes thereto could impair a portfolio company's financial condition, results of operation, cash flow or result in other adverse events, such as bankruptcy, any of which could limit a portfolio company's ability to make scheduled payments on loans from us. This, in turn, may lead to their inability to make payments on outstanding borrowings, which could result in losses in our loan portfolio and a decrease in our net interest income and book value.

Loans may become nonperforming for a variety of reasons.

A nonperforming loan may require substantial debt work-out negotiations or restructuring that may entail a substantial reduction in the interest rate and/or a substantial write-down of the principal of such loan. Because of the unique and customized nature of a loan agreement and the private syndication of a loan, certain loans may not be purchased or sold as easily as publicly traded securities, and, historically, the trading volume in the loan market has been small relative to other markets. Loans may encounter trading delays due to their unique and customized nature, and transfers of interests in loans may require the consent of an agent or borrower.

The lack of liquidity in our investments may adversely affect our business.

All of our assets may be invested in illiquid securities, and a substantial portion of our investments in leveraged companies will be subject to legal and other restrictions on resale or will otherwise be less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments when desired. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize

Our portfolio companies will likely consist primarily of lower middle-market, privately owned companies, which may p

significantly less than the value at which we have previously recorded these investments. As a result, we do not expect to achieve liquidity in our investments in the near-term. However, to maintain the election to be regulated as a business development company and qualify as a RIC, we may have to dispose of investments if we do not satisfy one or more of the applicable criteria under the respective

S-30

TABLE OF CONTENTS

regulatory frameworks. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we or MC Advisors have material nonpublic information regarding such portfolio company.

Price declines and illiquidity in the corporate debt markets may adversely affect the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a business development company, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by our board of directors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. We record decreases in the market values or fair values of our investments as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets may result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio may reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse effect on our business, financial condition and results of operations.

Our portfolio companies may prepay loans, which prepayment may reduce stated yields if capital returned cannot be invested in transactions with equal or greater expected yields.

The loans underlying our portfolio may be callable at any time, and many of them can be repaid with no premium to par. It is not clear at this time when or if any loan might be called. Whether a loan is called will depend both on the continued positive performance of the portfolio company and the existence of favorable financing market conditions that allow such company the ability to replace existing financing with less expensive capital. As market conditions change frequently, it is unknown when, and if, this may be possible for each portfolio company. Risks associated with owning loans include the fact that prepayments may occur at any time, sometimes without premium or penalty, and that the exercise of prepayment rights during periods of declining spreads could cause us to reinvest prepayment proceeds in lower-yielding instruments. In the case of some of these loans, having the loan called early may reduce the achievable yield for our company below the stated yield to maturity described elsewhere in this prospectus supplement and the accompanying prospectus if the capital returned cannot be invested in transactions with equal or greater expected yields.

Our portfolio may be exposed in part to one or more specific industries, which may subject us to a risk of significant loss in a particular investment or investments if there is a downturn in that particular industry.

Our portfolio may be exposed in part to one or more specific industries. A downturn in any particular industry in which we are invested could significantly impact the aggregate returns we realize. If an industry in which we have significant investments suffers from adverse business or economic conditions, as these industries have to varying degrees, a material portion of our investment portfolio could be affected adversely, which, in turn, could adversely affect our financial position and results of operations.

As of December 31, 2016, our investments in the healthcare and pharmaceuticals industry represented approximately 13.7% of the fair value of our portfolio and are subject to certain risks particular to that industry. The laws and rules governing the business of healthcare companies and interpretations of those laws and rules are subject to frequent change and broad latitude is given to the agencies administering those regulations. Existing or future laws and rules could force our portfolio companies engaged in healthcare to change how they do business, restrict revenue, increase costs, change reserve levels and change business practices. Healthcare companies often must obtain and maintain regulatory approvals to market many of their products, change prices for certain regulated products and consummate some of their acquisitions and divestitures. Policy changes on the local, state and federal level, such as the expansion of the government's role in the healthcare arena, health insurance reform and alternative assessments and tax increases specific to the healthcare industry or products could fundamentally change the dynamics of the healthcare industry. Any of these factors could materially adversely affect the operations of a portfolio company in this industry and, in turn, impair our ability to timely collect principal and interest payments owed to us.

S-31

TABLE OF CONTENTS

To the extent original issue discount and payment-in-kind interest constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments include original issue discount, or OID, components and may include PIK interest components. For the year ended December 31, 2016, PIK interest comprised approximately 4.5% of our investment income. To the extent original issue discount constitutes a portion of our income, we are exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash, including the following:

We must include in income each year a portion of the OID that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. Because any OID or other amounts accrued will be included in investment company taxable income for the year of the accrual, we may be required to make a distribution to our stockholders in order to satisfy our annual distribution requirements, even though we will not have received any corresponding cash amount. As a result, we may have to sell some of our investments at times or at prices that would not be advantageous to us, raise additional debt or equity capital or forgo new investment opportunities.

The higher yield of OID instruments reflect the payment deferral and credit risk associated with these instruments. Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

OID instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of the collateral.

OID instruments generally represent a significantly higher credit risk than coupon loans.

OID income received by us may create uncertainty about the source of our cash distributions to stockholders. For accounting purposes, any cash distributions to stockholders representing OID or market discount income are not treated as coming from paid-in capital, even though the cash to pay them comes from the offering proceeds. Thus, although a distribution of OID or market discount interest comes from the cash invested by the stockholders, Section 19(a) of the 1940 Act does not require that stockholders be given notice of this fact by reporting it as a return of capital.

The deferral of PIK interest has a negative impact on liquidity, as it represents non-cash income that may require distribution of cash dividends to stockholders in order to maintain our RIC status. In addition, the deferral of PIK interest also increases the loan-to-value (LTV) ratio at a compounding rate, thus, increasing the risk that we will absorb a loss in the event of foreclosure.

OID and market discount instruments create the risk of non-refundable incentive fee payments to MC Advisors based on non-cash accruals that we may not ultimately realize.

We have not yet identified the portfolio company investments we will acquire using the proceeds of an offering.

We have not yet identified potential investments for our portfolio that we may acquire with the proceeds of an offering. Privately negotiated investments in illiquid securities or private middle-market companies require substantial due diligence and structuring, and we cannot assure you that we will achieve our anticipated investment pace. You will be unable to evaluate any future portfolio company investments prior to purchasing our securities. Additionally, MC Advisors will select our investments subsequent to the closing of an offering, and our stockholders will have no input with respect to such investment decisions. These factors increase the uncertainty, and thus the risk, of investing in our securities.

To the extent original issue discount and payment-in-kind interest constitute a portion of our income, we will be exposed

Pending investment in portfolio companies, we will invest the net proceeds of offerings in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment.

We expect these temporary investments to earn yields substantially lower than the income that

S-32

TABLE OF CONTENTS

we expect to receive in respect of investments. As a result, any distributions we make during this period may be substantially smaller than the distributions that we would expect to pay when our portfolio is fully invested.

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we are not limited by the 1940 Act with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. Our portfolio is and may in the future be concentrated in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code, we do not have fixed guidelines for diversification. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. As a result, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

We may hold the debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings.

Leveraged companies may experience bankruptcy or similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by a portfolio company may adversely and permanently affect the portfolio company. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor's return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in seeking to:

increase or maintain in whole or in part our position as a creditor or equity ownership percentage in a portfolio company;

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we are not limited

preserve or enhance the value of our investment.

We have discretion to make follow-on investments, subject to the availability of capital resources and the provisions of the 1940 Act. Failure on our part to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not

S-33

TABLE OF CONTENTS

want to increase our level of risk, because we prefer other opportunities or because we are inhibited by compliance with business development company requirements or the desire to maintain our RIC status. Our ability to make follow-on investments may also be limited by MC Advisors' allocation policy.

Because we do not hold controlling equity interests in the majority of our portfolio companies, we may not be able to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies, which could decrease the value of our investments.

Although we may do so in the future, we do not currently hold controlling equity positions in the majority of our portfolio companies. Our debt investments may provide limited control features such as restrictions, for example, on the ability of a portfolio company to assume additional debt, or to use the proceeds of our investment for other than certain specified purposes. Control under the 1940 Act is presumed at more than 25% equity ownership, and may also be present at lower ownership levels where we provide managerial assistance. When we do not acquire a controlling equity position in a portfolio company, we may be subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

Defaults by our portfolio companies will harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize such portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

In addition, many of our investments will likely have a principal amount outstanding at maturity, which could result in a substantial loss to us if the borrower is unable to refinance or repay.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We generally seek to invest capital in senior, unitranche and junior secured loans and, to a lesser extent, unsecured subordinated debt and equity. The portfolio companies in which we invest usually have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying senior creditors, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share any distributions on an equal and ratable basis with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the

Because we do not hold controlling equity interests in the majority of our portfolio companies, we may not be able to

relevant portfolio company.

Additionally, certain loans that we make to portfolio companies may be secured on a second-priority basis by the same collateral securing senior secured debt of such companies. The first-priority liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by first-priority liens on the collateral will generally control the liquidation of, and be entitled to receive proceeds from, any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will

S-34

TABLE OF CONTENTS

depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second-priority liens after payment in full of all obligations secured by the first-priority liens on the collateral.

If such proceeds were not sufficient to repay amounts outstanding under the loan obligations secured by the second-priority liens, then, to the extent not repaid from the proceeds of the sale of the collateral, we will only have an unsecured claim against the portfolio company's remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of such senior debt, including in unitranche transactions. Under a typical intercreditor agreement, at any time that obligations that have the benefit of the first-priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the first-priority liens:

- the ability to cause the commencement of enforcement proceedings against the collateral;
- the ability to control the conduct of such proceedings;
- the approval of amendments to collateral documents;
- releases of liens on the collateral; and
- waivers of past defaults under collateral documents.

We may not have the ability to control or direct such actions, even if our rights are adversely affected. In addition, a bankruptcy court may choose not to enforce an intercreditor agreement or other agreement with creditors.

We may also make unsecured loans to portfolio companies, meaning that such loans will not benefit from any interest in collateral of such companies. Liens on such portfolio companies' collateral, if any, will secure the portfolio company's obligations under its outstanding secured debt and may secure certain future debt that is permitted to be incurred by the portfolio company under its secured loan agreements. The holders of obligations secured by such liens will generally control the liquidation of, and be entitled to receive proceeds from, any realization of such collateral to repay their obligations in full before us. In addition, the value of such collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of such collateral would be sufficient to satisfy our unsecured loan obligations after payment in full of all secured loan obligations. If such proceeds were not sufficient to repay the outstanding secured loan obligations, then our unsecured claims would rank equally with the unpaid portion of such secured creditors' claims against the portfolio company's remaining assets, if any.

We may also make subordinated investments that rank below other obligations of the obligor in right of payment. Subordinated investments are generally more volatile than secured loans and are subject to greater risk of default than senior obligations as a result of adverse changes in the financial condition of the obligor or in general economic conditions. If we make a subordinated investment in a portfolio company, the portfolio company may be highly leveraged, and its relatively high LTV ratio may create increased risks that its operations might not generate sufficient cash flow to service all of its debt obligations.

Investments in securities of foreign companies, if any, may involve significant risks in addition to the risks inherent in U.S. investments.

We may make investments in securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies, including changes in exchange control regulations, political and social instability, expropriation and imposition of foreign taxes. In addition, any investments

Investments in securities of foreign companies, if any, may involve significant risks in addition to the risks inherent in

that we make that are denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Factors such as trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments may

S-35

TABLE OF CONTENTS

affect currency values. We may employ hedging techniques to minimize these risks, but we cannot assure you that we will, in fact, hedge currency risk, or, that if we do, such strategies will be effective.

We may be subject to risks associated with syndicated loans.

From time to time, our investments may consist of syndicated loans. Under the documentation for such loans, a financial institution or other entity typically is designated as the administrative agent and/or collateral agent. This agent is granted a lien on any collateral on behalf of the other lenders and distributes payments on the indebtedness as they are received. The agent is the party responsible for administering and enforcing the loan and generally may take actions only in accordance with the instructions of a majority or two-thirds in commitments and/or principal amount of the associated indebtedness. In most cases, we do not expect to hold a sufficient amount of the indebtedness to be able to compel any actions by the agent. Accordingly, we may be precluded from directing such actions unless we act together with other holders of the indebtedness. If we are unable to direct such actions, we cannot assure you that the actions taken will be in our best interests.

There is a risk that a loan agent may become bankrupt or insolvent. Such an event would delay, and possibly impair, any enforcement actions undertaken by holders of the associated indebtedness, including attempts to realize upon the collateral securing the associated indebtedness and/or direct the agent to take actions against the related obligor or the collateral securing the associated indebtedness and actions to realize on proceeds of payments made by obligors that are in the possession or control of any other financial institution. In addition, we may be unable to remove the agent in circumstances in which removal would be in our best interests. Moreover, agented loans typically allow for the agent to resign with certain advance notice.

The disposition of our investments may result in contingent liabilities.

A significant portion of our investments involve private securities. In connection with the disposition of an investment in private securities, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through our return of distributions previously made to us.

We may be subject to additional risks if we engage in hedging transactions and/or invest in foreign securities.

The 1940 Act generally requires that 70% of our investments be in issuers each of whom, in addition to other requirements, is organized under the laws of, and has its principal place of business in, any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands or any other possession of the United States. Our investment strategy does not contemplate a significant number of investments in securities of non-U.S. companies other than Canadian companies. We expect that these investments would focus on the same investments that we intend to make in U.S. middle-market companies and, accordingly, would be complementary to our overall strategy and enhance the diversity of our holdings.

Engaging in either hedging transactions or investing in foreign securities would entail additional risks to our stockholders. We could, for example, use instruments such as interest rate swaps, caps, collars and floors and, if we were to invest in foreign securities, we could use instruments such as forward contracts or currency options and borrow under a credit facility in currencies selected to minimize our foreign currency exposure. In each such case, we

generally would seek to hedge against fluctuations of the relative values of our portfolio positions from changes in market interest rates or currency exchange rates. Hedging against a decline in the values of our portfolio positions would not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of the positions declined. However, such hedging could establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions could also limit the opportunity for gain if the values of the underlying portfolio positions increased. Moreover, it might not be possible to hedge against an exchange rate or interest rate fluctuation that was so generally anticipated that we would not be able to enter into a hedging transaction at an acceptable price. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the U.S. Commodity Futures Trading Commission.

S-36

TABLE OF CONTENTS

While we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates could result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged could vary. Moreover, for a variety of reasons, we might not seek to establish a perfect correlation between the hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation could prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it might not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities would likely fluctuate as a result of factors not related to currency fluctuations.

We may not realize gains from our equity investments.

We currently hold and we may in the future make investments that include warrants or other equity or equity-related securities. In addition, we may from time to time make non-control, equity co-investments in companies in conjunction with private equity sponsors. Our goal is ultimately to realize gains upon our disposition of such equity interests.

However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience. We also may be unable to realize any value if a portfolio company does not have a liquidity event, such as a sale of the business, recapitalization or public offering, which would allow us to sell the underlying equity interests. We often seek puts or similar rights to give us the right to sell our equity securities back to the portfolio company issuer. We may be unable to exercise these put rights for the consideration provided in our investment documents if the issuer is in financial distress.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus supplement and the accompanying prospectus contain forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about us, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, believes, sees, estimates, would, should, targets, projects, and variations of these words and similar expressions are intended to identify forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements including:

- our dependence on key personnel;
- our ability to maintain or develop referral relationships;
- the ability of MC Advisors to identify, invest in and monitor companies that meet our investment criteria;
- our contractual arrangements and relationships with third parties;
- actual and potential conflicts of interest with MC Advisors and its affiliates;
- possession of material nonpublic information;
- potential divergent interests of MC Advisors and our stockholders arising from our incentive fee structure;
- restrictions on affiliate transactions;
- competition for investment opportunities;
- our ability to maintain our qualification as a RIC and as a business development company;
- the impact of a protracted decline in the liquidity of credit markets on our business and portfolio investments;
- the adequacy of our financing sources;
- the timing, form and amount of any payments, dividends or other distributions from our portfolio companies;
- our use of leverage;
- changes in interest rates;
- SBA regulations affecting MRCC SBIC or any other wholly-owned SBIC subsidiary;
- uncertain valuations of our portfolio investments;
- fluctuations in our quarterly operating results;
- our ability to issue securities at a discount to net asset value per share;
- changes in laws or regulations applicable to us; and
- general economic and political conditions and their impact on the industries in which we invest.

We have based the forward-looking statements included in this prospectus supplement and the accompanying prospectus on information available to us on the date of this prospectus supplement. Actual results could differ materially from those anticipated in our forward-looking statements, and future results could differ materially from historical performance. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus supplement. However, we will update this prospectus supplement to reflect any material changes to the information contained herein during the period of this offering.

TABLE OF CONTENTS

You should understand that, under Sections 27A(b)(2)(B) of the Securities Act and Section 21E(b)(2)(B) of the Exchange Act, the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 do not apply to statements made in connection with any offering of securities pursuant to this prospectus supplement or in periodic reports we file under the Exchange Act.

S-39

TABLE OF CONTENTS

USE OF PROCEEDS

Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions that are deemed to be at the market as defined in Rule 415 under the Securities Act, including sales made directly on The Nasdaq Global Select Market or sales made to or through a market maker other than on an exchange. There is no guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus. Actual sales, if any, of our common stock under this prospectus supplement and the accompanying prospectus may be less than as set forth in this paragraph depending on, among other things, the market price of our common stock at the time of any such sale. As a result, the actual net proceeds we receive may be more or less than the amount of net proceeds estimated in this prospectus supplement.

Assuming the sale of all \$50,000,000 of common stock offered under this prospectus supplement and the accompanying prospectus, we estimate that the net proceeds of this offering would be approximately \$48.7 million, after deducting the estimated sales commission payable to the Sales Agents and our estimated offering expenses. Through March 10, 2017, we have sold an aggregate of \$10.0 million of our common stock pursuant to the equity distribution agreements to which this prospectus supplement relates.

We intend to use all or substantially all of the net proceeds from the sale of our common stock to invest directly in portfolio companies in accordance with our investment objective and strategies and for general corporate purposes. We will also pay operating expenses, including management and administrative fees, and may pay other expenses from the net proceeds of this offering.

We anticipate that we will use substantially all of the net proceeds from this offering for the above purposes within approximately six months after the completion of this offering, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. It may take more or less time for us to identify, negotiate and enter into investments and fully deploy any proceeds we raise, and we cannot assure you that we will achieve our targeted investment pace.

Until such appropriate investment opportunities can be found, we will invest the net proceeds of any offering of our securities primarily in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. These temporary investments may have lower yields than our other investments and, accordingly, may result in lower distributions, if any, during such period. Our ability to achieve our investment objective may be limited to the extent that the net proceeds from an offering, pending full investment, are held in lower yielding interest-bearing deposits or other short-term instruments. See Regulation Temporary Investments in the accompanying prospectus for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective.

TABLE OF CONTENTS**CAPITALIZATION**

The equity distribution agreements provide that we may offer and sell up to \$50,000,000 of our common stock from time to time through our Sales Agents for the offer and sale of such common stock. The table below assumes that we will sell all of the remaining common stock available under the program as of December 31, 2016 of \$40.0 million at a price of \$15.60 per share (the last reported sale price of our common stock on The Nasdaq Global Select Market on

March 10, 2017), but there is no guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus. Actual sales, if any, of our common stock under this prospectus supplement and the accompanying prospectus may be less than as set forth in the table below. In addition, the price per share of any such sale may be greater or less than \$15.60, depending on the market price of our common stock at the time of any such sale. The following table sets forth our capitalization as of December 31, 2016:

on an actual basis; and

on an as adjusted basis giving effect to the assumed sale of \$40.0 million of our common stock at a price of \$15.60 per share (the last reported sale price of our common stock on The Nasdaq Global Select Market on March 10, 2017) less commissions and expenses.

This table should be read in conjunction with our Management's Discussion and Analysis of Financial Condition and Results of Operations and our financial statements and notes thereto included in this prospectus supplement and the accompanying prospectus.

	As of December 31, 2016	
	Actual	As Adjusted (unaudited)
	(in thousands, except per share data)	
Assets:		
Cash	\$5,958	\$44,923

(1)

NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low closing sales price divided by the quarter end NAV.

(3) Represents the distribution declared in the specified quarter. We have adopted an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, stockholders cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions. See Dividend Reinvestment Plan.

(4) On March 7, 2017, we declared a quarterly distribution of \$0.35 per share, to be paid March 31, 2017 to shareholders of record as of March 17, 2017. Our management monitors available taxable earnings, including net investment income and realized capital gains, to determine if a tax return of capital may occur for the year. To the extent that our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to our stockholders. The tax character of distributions will be determined at the end of the fiscal year.

S-42
