Bancroft Fund Ltd. - Selected Notes to Financial Statements - unaudited

Bancroft Fund Ltd. (the Fund), is registered under the Investment Company Act of 1940, as amended, (the Act) as a diversified, closed-end management investment company.

Note 1 - Security Valuation - Investments in securities traded on a national securities exchange are valued at market using the last reported sales price, supplied by an independent pricing service, as of the close of regular trading. Listed securities, for which no sales were reported, are valued at the mean between closing reported bid and asked prices as of the close of regular trading. Unlisted securities traded in the over-the-counter market are valued using an evaluated quote provided by the independent pricing service, or, if an evaluated quote is unavailable, such securities are valued using prices received from dealers, provided that if the dealer supplies both bid and asked prices, the price to be used is the mean of the bid and asked prices. The independent pricing service derives an evaluated quote by obtaining dealer quotes, analyzing the listed markets, reviewing trade execution data and employing sensitivity analysis. Evaluated quotes may also reflect appropriate factors such as individual characteristics of the issue, communications with broker-dealers, and other market data. Securities for which quotations are not readily available, restricted securities and other assets are valued at fair value as determined in good faith pursuant to procedures approved by the Board of Trustees. Short-term debt securities with original maturities of 60 days or less are valued at amortized cost.

The Fund has adopted authoritative fair valuation accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion in changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1 - Quoted unadjusted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-driven valuation in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers, and those received from an independent pricing service.

Level 3 - Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund's own assumptions that market participants would use to price an asset or liability based on the best available information.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of the markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

(1) In determining certain of these inputs, management evaluates a variety of factors including economic conditions, industry and market developments, market valuations of comparable companies and company specific developments.

(2) This column represents the directional change in the fair value of the Level 3 investments that would result from an increase to the corresponding unobservable input. A decrease to the unobservable input would have the opposite effect.

Note 2 - Securities Transactions and Related Investment Income - Securities transactions are accounted for on the trade date (the date the order to buy or sell is executed) with gain or loss on the sale of securities being determined based upon identified cost. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis, including accretion of discounts and amortization of non-equity premium.

Note 3 - Federal Income Tax Cost - At January 31, 2014, the cost basis of investments for federal income tax purposes, as well as unrealized appreciation (depreciation) of investment securities on a tax basis were as follows:

Unrealized appreciation	\$21,235,425
Unrealized depreciation	(1,944,541)
Net unrealized appreciation	19,290,884
