See page 37 for explanatory notes

Paul Walsh, Chief Executive of Diageo, commenting on the six months ended 31 December 2003 said:

Diageo, focused as it is now on premium drinks, continues to deliver growth with improvement in key measures of performance in this first half. Further mix improvement combined with good volume growth has led to a 6% organic increase in both net sales (after deducting excise duties) and operating profit at a time when investment in marketing has again increased ahead of net sales growth and we have absorbed restructuring costs. Looking forward the trends that we have seen in the first half are expected to continue despite the uneven recovery in Europe, although the current exchange rate volatility will impact reported results.

These results also reflect our financial strength; return on invested capital is up 3 percentage points to 17.6%, free cash flow is up £257 million in the period, the interim dividend is up 7% and we have returned a further £256 million to shareholders.

Edgar Filing: DIAGEO PLC - Form 6-K

Diageo is committed to creating shareholder value even in uncertain times. These results demonstrate our ability to do so.

Table of Contents

**DIAGEO INTERIM RESULTS
For the six months ended 31 December 2003**

Key highlights

Diageo is now a focused premium drinks business and this is the first year in which premium drinks is the sole driver of Diageo's operating performance

The results reflect the strength of the performance platform Diageo has created in premium drinks, based on brand range, advantaged route to market and global reach. Further, they demonstrate Diageo's ability to deliver value for shareholders

Diageo's leadership position has again improved with share gains in the four major markets

Diageo's operating margin is 23.3% and return on invested capital is 17.6%

Volume growth of 3% was driven by strong growth of global priority brands, up 5%, and improved performance on category brands, volume up 2%. However, ready to drink slowed, with volume down 4%, as volume declined in Great Britain and the roll-out to new markets was completed

Net sales (after deducting excise duties) grew by 6%, driven by the strong mix improvement in North America and key markets

Exchange rate movements reduced operating profit before exceptional items by £20 million

Operating profit grew by 6%, in a period when marketing investment increased a further 8% and Diageo incurred restructuring costs of £19 million which were taken to operating profit in the period

% movements are organic movements. They are before exceptional items. See page 37 for explanatory notes

Edgar Filing: DIAGEO PLC - Form 6-K

Profit/(loss) for the period	923	(32)	891	905	(1,364)	(459)

On a reported basis, turnover decreased by £273 million (5%) from £5,333 million (of which Burger King contributed £479 million) in the six months ended 31 December 2002 to £5,060 million in the six months ended 31 December 2003. For premium drinks, turnover increased by £206 million (4%). The weakening of the US dollar was offset by the strengthening of the euro, and therefore turnover was broadly unaffected by the impact of exchange rate movements. The effect of disposals and the termination of certain distribution rights reduced turnover by £72 million in premium drinks.

On a reported basis, operating costs decreased by £335 million (8%) from £4,233 million (of which Burger King costs were £426 million) in the six months ended 31 December 2002 to £3,898 million in the six months ended 31 December 2003. Operating costs for the premium drinks business increased by £91 million against the comparable period last year partly due to an increase in excise duties of £39 million and an increase in marketing of £39 million.

Reported operating profit increased by £62 million from £1,100 million (of which Burger King contributed £53 million) to £1,162 million. Exceptional items charged to operating profit, in respect of the integration of the Seagram businesses, were £19 million in the six months ended 31 December 2003 compared with £104 million (of which £89 million was in respect of the integration of the Seagram businesses) in the six months ended 31 December 2002. Exchange rate movements reduced operating profit before exceptional items for the six months ended 31 December 2003 by £20 million (US dollar reduction of £38 million, euro benefit of £28 million, other currencies reduction of £10 million) and disposals and the termination of certain distribution rights reduced operating profit by £12 million.

Table of Contents

On a reported basis, marketing investment for premium drinks increased 7% from £573 million to £612 million. Marketing investment on global priority brands grew 2% to £454 million, while marketing spend on ready to drink brands declined by £29 million.

Finance charges decreased from £196 million to £157 million in the six months ended 31 December 2003. The net interest charge decreased by £61 million (29%) from £207 million in the comparable prior period to £146 million in the six months ended 31 December 2003. Other finance charges, principally in respect of post employment plans, amounted to a charge of £11 million in the six months ended 31 December 2003 compared with income of £11 million in the six months ended 31 December 2002.

Reported profit before exceptional items, taxation and minority interests increased by £23 million (2%) from £1,274 million in the six months ended 31 December 2002 to £1,297 million in the six months ended 31 December 2003.

Exceptional items before taxation were a charge of £38 million in the six months ended 31 December 2003 compared with a charge of £1,482 million (including £1,383 million in respect of Burger King) in the six months ended 31 December 2002.

After exceptional items, the result before taxation and minority interests increased by £1,467 million from a loss of £208 million to a profit of £1,259 million in the six months ended 31 December 2003. After taxation and minority interests the result for the period increased by £1,350 million from a loss of £459 million to a profit of £891 million.

Table of Contents**REVIEW BY BRAND CATEGORY**

See explanatory notes on page 37 for definitions.

Organic volume and net sales (after deducting excise duties) movement by brand

	Equivalent units (million)	Volume movement %	Net sales* movement %
Smirnoff	12.9	2	(1)
Johnnie Walker	6.9	9	11
Guinness	5.9	3	5
Baileys	4.3	9	11
J&B	3.5	(1)	(4)
Captain Morgan	3.1	11	26
José Cuervo	2.0	2	7
Tanqueray	1.0	4	8
Total global priority brands	39.6	5	6
Local priority brands	12.8	1	7
Category brands	14.5	2	7
Total premium drinks	66.9	3	6

* *after deducting excise duties*

On a reported basis total volume increased 2% from 65.8 million equivalent units to 66.9 million equivalent units

On a reported basis net sales (after deducting excise duties) increased 5% from £3,628 million to £3,795 million

Smirnoff volume, excluding ready to drink, was up 4% and net sales (after deducting excise duties) was up 7%

Captain Morgan volume, excluding ready to drink, was up 7% and net sales (after deducting excise duties) was up 10%

Volume growth of the global priority brands, excluding ready to drink, was 5%, compared to 3% in the six months ended 31 December 2002. Net sales (after deducting excise duties) growth of the global priority brands, excluding ready to drink, was 7%, compared to 5% in the six months ended 31 December 2002.

* before exceptional items

ANALYSIS BY INDIVIDUAL MARKET

The figures for 2002 have been restated (see note 1 on page 27).

North America

Key measures:

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			1	3
Turnover	1,465	1,464		9
Net sales (after deducting excise duties)	1,238	1,219	2	10
Marketing	202	209	(3)	7
Operating profit before exceptional items	416	397	5	14

Reported performance:

Turnover was up from £1,464 million to £1,465 million in the six months ended 31 December 2003. Operating profit before exceptional items increased £19 million (5%), from £397 million in the six months ended 31 December 2002 to £416 million in the six months ended 31 December 2003.

Organic performance:

The weighted average exchange rate used to translate US dollar sales moved from £1 = \$1.55 in the six months ended 31 December 2002 to £1 = \$1.65 in the six months ended 31 December 2003. This weakening of the US dollar was the principal reason for a £78 million reduction in turnover arising because of exchange rate movements. In addition, the termination of distribution rights for Bass Ale in June 2003 and Cuervo 1800 in October 2002 reduced turnover in the period compared with the six months ended 31 December 2002 by £26 million and £9 million, respectively. Other disposals, including Gibson's Whiskey in Canada, adversely affected turnover by £3 million. The turnover of brands owned

Edgar Filing: DIAGEO PLC - Form 6-K

or distributed throughout both periods was £117 million higher in the six months ended 31 December 2003 than the comparable six month period, as discussed within organic brand performance below.

Table of Contents

Adverse exchange rate movements and the termination of distribution rights and disposals noted above reduced reported operating profit before exceptional items by £25 million and £7 million, respectively, compared with the six months ended 31 December 2002. However, those brands owned or distributed throughout both periods contributed £51 million more in the six months ended 31 December 2003 compared with the six months ended 31 December 2002, leading to an overall improvement of £19 million in operating profit before exceptional items.

Organic brand performance:

	Volume movement %	Net sales* movement %
Smirnoff	(1)	4
Johnnie Walker	6	10
José Cuervo	4	10
Baileys	15	18
Captain Morgan	13	31
Tanqueray	2	8
Guinness	7	7
J&B	(2)	(4)
Total global priority brands	4	10
Local priority brands	1	6
Category brands		24
Total	3	10

* *after deducting excise duties*

Total volume, excluding Captain Morgan Gold was up 2% and net sales (after deducting excise duties) was up 9%

Smirnoff volume, excluding ready to drink was down 1% and net sales (after deducting excise duties) was up 6%

Captain Morgan volume, excluding Captain Morgan Gold was up 8% and net sales (after deducting excise duties) was up 11%
From 1 July 2003, terms of sale were harmonised between the former UDV and Seagram brands and freight is now billed in net sales (after deducting excise duties) for all brands. The actual freight cost is captured in cost of goods sold. This resulted in approximately a 2 percentage point improvement in net sales (after deducting excise duties) versus the comparable period in the prior year.

As in previous periods, strong growth in global priority brands was the key driver of the performance in Diageo's North America business.

Smirnoff volume excluding ready to drink declined as a result of the price increase on Smirnoff Red in a number of markets within North America. The price increase and mix improvement driven by the stronger growth of Smirnoff Twist meant that net sales (after deducting excise duties) grew 6%. Marketing investment grew 29%, with increased investment behind the re-launch of Smirnoff with new packaging and the Neat advertising campaign aired on national cable television.

Johnnie Walker gained share with Johnnie Walker Red Label volume up 5% and net sales (after deducting excise duties) up 6% and Johnnie Walker Black Label volume up 7% and net sales (after deducting excise duties) up 12%. Marketing investment increased by 16%, mainly behind the launch costs of the new Keep Walking advertising campaign introduced in September 2003.

Table of Contents

Despite the competitive pricing environment, José Cuervo broadly maintained price and benefited from mix improvement as a result of the launch of Clasico and the launch of Tradicional in the fast growing super premium tequila segment. Marketing investment grew 16% behind on premise initiatives and advertising. José Cuervo is the number one tequila in North America, but has lost some share as a result of price competition.

Baileys growth was driven by increased display and television advertising. The successful launch in June 2003 of Baileys Minis delivered 5% of Baileys volume and contributed to an increase in share.

Tanqueray continued its improved performance and the brand grew share of the imported gin segment. Net sales (after deducting excise duties) benefited from price increases introduced in September 2003.

The main driver of Guinness growth was the performance of Guinness Draught in Bottles, where distribution has increased by 9 percentage points to 55% of the off premise.

Captain Morgan continues to gain share of the rum category, with net sales (after deducting excise duties) benefiting from price increases taken on Captain Morgan Parrot Bay. Excluding ready to drink, marketing investment grew by 28% mainly due to the development of a new advertising campaign.

J&B continued to decline, with both volume and net sales (after deducting excise duties) down.

Ready to drink volume, excluding the positive impact of the returns of Captain Morgan Gold in the prior period, declined 1%, mainly due to decline in Smirnoff ready to drink in Canada. Weakness in Canada has meant that Smirnoff ready to drink volume in North America declined by 2%. Volume of Smirnoff ready to drink in the United States however grew 1% due in part to the launch of Smirnoff Twisted V. Net sales (after deducting excise duties) grew by 6% reflecting the benefit of price increases. The ready to drink segment in the United States continued to decline with volume down 15% as some competitor products were withdrawn. Smirnoff ready to drink however grew share by 17 percentage points and now has 40% of the segment.

Performance of the local priority brands was mixed. Growth of Crown Royal, volume up 6%, Beaulieu Vineyard, volume up 16%, and Sterling Vineyards, volume up 27%, offset a decline in other local priority brands in North America.

The strong mix improvement in category brand performance reflects the strong performance of Cîroc vodka, since its launch in 2003, and strong premium wine sales, offset by a volume decline in other category brands.

Other business performance drivers:

Robust growth of the spirits category in the United States

Diageo's share of spirits grew by 0.6 percentage points

Incremental Seagram synergy of £17 million

The spirits category continues to show robust growth with an increase of 2% versus the same period last year and Diageo continues to gain share of the total market with a share increase of 0.6 percentage points.

In September 2003 new distribution arrangements had been consolidated in 34 states plus Washington DC, representing nearly 80% of Diageo's United States volume. To avoid disruption during the key October to December period, no additional consolidations occurred. It is expected that Diageo will consolidate the remaining open states and potentially several franchise states by June 2004.

Table of Contents

For the next six months, the focus in respect of NGG remains the same:

Continue to drive growth through better execution of retail programmes

Build on premise leadership while strengthening off premise selling capabilities

Create a shared vision for growth across Diageo and the distributors

Great Britain

Key measures:

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			5	5
Turnover	847	829	2	3
Net sales (after deducting excise duties)	474	473		1
Marketing	80	84	(5)	(5)
Operating profit before exceptional items	150	139	8	6

Reported performance:

Turnover in Great Britain was up 2% on a reported basis from £829 million in the six months ended 31 December 2002 to £847 million in the six months ended 31 December 2003. Operating profit before exceptional items was up £11 million from £139 million in the six months ended 31 December 2002 to £150 million in the six months ended 31 December 2003.

Organic performance:

Reported turnover growth of £18 million was generated by a £26 million improvement in turnover in brands owned throughout both periods (see organic brand performance below), offset by an £8 million reduction from the effect of disposals, principally the termination of distribution rights to Brown Forman agency brands in Great Britain from August 2002.

Operating profit before exceptional items was up £11 million in the six months ended 31 December 2003 compared with the six months ended 31 December 2002. There was a positive impact from disposals of £3 million because the adverse effect of the loss of the Brown Forman agency brands was more than offset by the disposal in June 2003 of Translucis UK Limited, an e-business venture which made a loss in the comparable period. The continuing brands grew operating profit before exceptional items by £8 million compared to the six months ended 31 December 2002.

Organic brand performance:

	Volume movement %	Net sales* movement %
Smirnoff	9	(7)
Guinness	(3)	(1)
Baileys	7	12
Total global priority brands	5	(1)
Local priority brands	(2)	(10)
Category brands	24	23
Total	5	1

* after deducting excise duties

Table of Contents

Excluding ready to drink total volume was up 7% and net sales (after deducting excise duties) up 7%. Growth in Great Britain was driven by the strong volume performance of spirit and wine brands which offset volume decline in ready to drink and beer. Net sales (after deducting excise duties) performance has been negatively impacted by the decline in ready to drink.

Pricing pressure continues to impact the vodka category and therefore net sales (after deducting excise duties) growth lagged the strong volume performance. However, Smirnoff increased share of the growing vodka category, driven by the if Smirnoff made advertising campaign, distribution gains and category development initiatives, such as the every serve perfect programme. In addition, a number of new distribution contracts have been agreed in the on trade.

Baileys continued to gain share of the liqueur category, but growth slowed against that achieved in previous periods. Net sales (after deducting excise duties) grew ahead of volume due to the mix improvements generated by Baileys Glide.

The volume performance of Guinness reflected decline in the on trade, partially offset by growth in the off trade. The decline in net sales (after deducting excise duties) was mitigated by a price increase taken in February 2003. An additional factor was that Guinness promotions in the off trade did not compete directly on price and instead leveraged occasions, such as the Rugby in November 2003, to increase share of at-home consumption. Media spend in the second half of the financial year will be significantly increased to address the decline in on trade performance.

The ready to drink segment in Great Britain continues to decline, with both volume and price under pressure. Reflecting this trend, Smirnoff ready to drink volume fell 12% and net sales (after deducting excise duties) declined 20%. However, share increased by nearly 3 percentage points.

The decline in local priority brands reflects the decline of Archers, volume down 12% and net sales (after deducting excise duties) down 27%, and Bell's, volume down 3%. This was partially offset by volume growth of Gordon's, up 4%. Archers performance continues to be disappointing with both its schnapps and ready to drink products declining. Excluding Gordon's Edge, which was withdrawn from the market, Gordon's volume grew 7%, reflecting the benefit of increased focus and investment in advertising. Mix improvement in Bell's was driven by stronger pricing over the Christmas period than in the same period last year. Bell's share of the scotch category at 25% is 6 percentage points higher than its nearest competitor.

The strong growth on category brands was largely driven by Pimm's, volume up 34%, and Blossom Hill, volume up 59%. Blossom Hill Wines continue to outperform in the branded wine segment, as both red and white Blossom Hill blends are now the top selling wines in Great Britain.

Other business performance drivers:

Increased share of the spirits market

On trade decline

Retailer/pub consolidation

Reduced marketing due to lower level of new product launches

Diageo increased its share of the spirits category by 0.6 percentage points and Diageo brands outperformed the gin, vodka, liqueur and wine categories in the off trade over the important Christmas trading period. However as the off trade continues to grow its share of the beverage alcohol market and with the trend towards retailer and on trade consolidation, pressure on margins has increased.

Marketing investment decreased by 5% due to lower spend on new product introductions which declined by £11 million.

Table of Contents**Ireland***Key measures:*

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			(6)	(6)
Turnover	542	522	4	(4)
Net sales (after deducting excise duties)	360	350	3	(5)
Marketing	43	38	13	5
Operating profit before exceptional items	75	83	(10)	(17)

Reported performance:

In Ireland, turnover increased on a reported basis, from £522 million in the six months ended 31 December 2002 to £542 million in the six months ended 31 December 2003. Operating profit before exceptional items was down from £83 million to £75 million.

Organic performance:

Although reported turnover was up £20 million, the main driver of this was the strength of the euro, which had a beneficial impact of £41 million. The weighted average exchange rate used for translation strengthened from £1 = 1.57 for the six months ended 31 December 2002 to £1 = 1.43 for the six months ended 31 December 2003. Underlying weakness in brand performance reduced turnover by £21 million.

A similar trend can be seen for operating profit before exceptional items, where the strength of the euro had a £7 million positive impact, offset by declining performance of continuing brands of £15 million.

Organic brand performance:

	Volume movement %	Net sales* movement %
Guinness	(7)	(3)
Smirnoff	(12)	(21)
Baileys	(17)	(19)
Total global priority brands	(9)	(8)
Local priority brands	(3)	(1)
Category brands	3	(4)
Total	(6)	(5)

** after deducting excise duties*

The beverage alcohol market in Ireland declined by 4% in the period, impacted by uncertainty in the general economic climate. In addition, there continues to be a marked switch from on to off trade channels. The on trade declined 8% and the off trade grew 3%, which negatively impacted Diageo's share by 1 percentage point.

The impact of the price increase introduced in March 2003 has partially offset the impact of the volume decline on net sales (after deducting excise duties).

Guinness' share of the long alcoholic drinks segment, which had stabilised in the year ended 30 June 2003, declined 1.5 percentage points in the latest period. Net sales (after deducting excise duties) fell by 3% reflecting some benefit from price increases of 3% introduced in March 2003.

Table of Contents

The decline in spirits and ready to drink volume reflects the impact of the excise duty increase of over 40% in spirits and nearly 100% in ready to drink in December 2002. Diageo has gained 1.7 percentage points share of spirits but has lost some share of the ready to drink market as focus has been on driving value rather than volume.

Volume of local priority brands Budweiser, Carlsberg, Harp and Smithwicks declined by 3% where Diageo has lost share to lower priced competitors in the off trade. Category brands grew by 3% principally driven by growth in agency brands. Wine volume declined by 8%, however net sales (after deducting excise duties) of wine grew by 3% as Diageo focused on value maximisation.

Other business performance drivers:

Implementation of a reorganisation to reduce costs and improve effectiveness

Investment behind the brands with marketing up in the period

In response to the further decline in the beverage alcohol market in Ireland, Diageo has taken steps to address the current operating profit pressures by the introduction of a new operating model which is more consumer focused and delivers an improved cost base. The cost of implementing this restructuring adversely impacted operating profit in the period by £11 million. Investment in marketing grew by 5% in the period as Diageo continued to invest behind the priority brands despite the overall decline in the market.

Spain*Key measures:*

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			4	4
Turnover	270	233	16	6
Net sales (after deducting excise duties)	203	175	16	6
Marketing	44	39	13	
Operating profit before exceptional items	69	60	15	6

Reported performance:

Spain reported turnover of £270 million in the six months ended 31 December 2003, up 16% against the £233 million reported in the prior period. Reported operating profit before exceptional items was up £9 million (15%) from £60 million in the six months ended 31 December 2002 to £69 million in the current period.

Organic performance:

Favourable exchange rate variances due to the strength of the euro positively impacted reported turnover by £23 million. There was a £2 million adverse impact from the loss of the distribution rights to Lagunilla wines in January 2003. Organic growth of brands owned throughout this and the comparable period contributed £16 million.

Operating profit before exceptional items increased £9 million from the £60 million reported for the six months ended 31 December 2002. This improvement was the result of the strong euro, £5 million, and growth of continuing brands, £4 million.

Table of Contents*Organic brand performance:*

	Volume movement %	Net sales* movement %
J&B	1	(3)
Baileys	2	5
Johnnie Walker	15	15
Smirnoff	4	(2)
Total global priority brands	4	1
Local priority brands	14	15
Category brands	(5)	7
Total	4	6

* *after deducting excise duties*

The performance in Spain was driven by volume growth from global and local priority brands.

While the scotch category in Spain has shown a further marginal decline, J&B volume was up and J&B gained share. However, there has been price discounting in the category and J&B has responded. Hence net sales (after deducting excise duties) declined. The performance of J&B Twist has been disappointing and the brand has now been withdrawn from the market.

Volume of other major global priority brands in Spain, Johnnie Walker Red Label, Smirnoff and Baileys all grew. Johnnie Walker Red Label and Baileys grew share. However, Smirnoff has lost some share of the on trade channel.

Local priority brand performance was driven by the strong performance of both Cacique, where volume was up 15% and share gains continued, and Cardhu where volume was up 5%.

Category brands declined by 5% as distribution arrangements for Bell's and Dimple were restructured.

Other business performance drivers:

Changing Spanish consumer drinking habits

Growth of the dark rum segment

Lower level of new product introductions led to level marketing spend
The drinking habits of the Spanish consumer are changing. There has been a reduction in on premise consumption of spirits while the dark rum segment, of which Diageo has a 43% share, is growing strongly.

Despite spending £5 million less than the prior period on J&B Twist, marketing investment was level.

Table of Contents**Key markets**

Key measures:

	2003* £ million	2002** £ million	Reported movement %	Organic movement %

Marketing	161	115	40	18
Operating profit before exceptional items	306	309	(1)	1

* *including Germany, excluding Portugal*** *including Portugal, excluding Germany*
Reported performance:

Reported turnover in the six months ended 31 December 2003 was £1,286 million, up 13% on the prior period figure of £1,136 million. Operating profit before exceptional items was down 1% at £306 million for the six months ended 31 December 2003.

Organic performance:

Turnover in key markets was up £150 million compared with the six months ended 31 December 2002. There were favourable exchange gains of £34 million, principally on the euro and the Australian dollar, and a £68 million improvement in the performance of brands owned throughout this and the comparable period. In addition, Germany has been transferred into key markets from venture markets, and Portugal has been transferred out of key markets into venture markets. This change has had a beneficial impact of £62 million on key markets turnover. The sale of 50% of Don Julio in January 2003 (which has since been accounted for as an associate) has negatively impacted turnover by £14 million.

There has been a £3 million decline in operating profit before exceptional items. This was due to unfavourable exchange rate movements of £6 million, (including exchange controls imposed against the Venezuelan bolivar) and the Don Julio disposal of £7 million, offset by the beneficial impact of replacing Portugal with Germany in the key markets structure of £8 million, and organic improvement of the brands, £2 million.

Table of Contents

The strong performance of the global priority brands in key markets was driven by Guinness in Africa, growth in Johnnie Walker Red Label in Latin America and Australia, and growth in Johnnie Walker Black Label in Global Duty Free, Taiwan and Thailand.

The performance of local priority brands benefited from bringing the distribution of Dimple in-house in South Korea. There were no sales of Dimple in the prior period as distribution arrangements for the brand were restructured. Local priority brand volume excluding Dimple was level. Strong performances of Malta Guinness in Africa, volume up 22%, and Bundaberg in Australia, volume up 12%, offset declines of Windsor Premier in South Korea and of premium lager brands in Kenya.

Category brand volume was down 1%, as the decline of VAT 69 was partially offset by the performance of brands such as Cacique in Venezuela.

Ready to drink volume grew 4%, with strong performance in Australia and the continuing benefit of the launch of Smirnoff ready to drink in May 2003 in France offset weakness in Germany and Southern Africa.

Net sales (after deducting excise duties) grew 8% reflecting price increases achieved on Guinness and Malta Guinness in Africa. Marketing investment increased 18% driven by investment in Australia behind Bundaberg's sponsorship of the Rugby World Cup, the reintroduction of Dimple in South Korea, Guinness in Africa and ready to drink launches in Japan and France.

Other business performance drivers:

Strong performance in Africa

Improved performance in Latin America

Strong volume growth in Australia

Weakening scotch market in South Korea

Weakening trading environment in Western Europe

Overall volume in Africa grew 5% with Guinness volume up 15%. The key drivers of the strong performance were the growth of Guinness in Nigeria where it has held share in the growing beer market, Malta Guinness, with volume up 22% across the region, and Johnnie Walker, volume up 8% as the brand benefited from the group's everyday heroes advertising being tailored for the African market. The volume of premium lager brands in Kenya declined 15% as the worsening economic situation there has led to a decline in the alcohol market. Net sales (after deducting excise duties) grew 13% due to price increases being achieved in Ghana and Kenya, together with market mix benefits as a greater proportion of Guinness was sold in Nigeria. Marketing investment grew by 16% with greater investment in Ghana behind the launch of Guinness Extra Smooth, the Guinness brand in Nigeria and Cameroon, and Johnnie Walker. Additional production capacity was installed in December in Ghana and there are plans to create additional capacity in Nigeria to take advantage of the strong beer market there. Route-to-market initiatives already implemented to drive distribution of Malta Guinness in Cameroon are now being rolled out in Nigeria.

Volume in Latin America grew 9% and overall profitability increased as the region benefited from more stable foreign exchange rates. Against this improved economic environment, Johnnie Walker Red Label volume was up 28% in Brazil, Paraguay and Uruguay. The brand gained share and now has a 50% share of the standard scotch segment in these markets. In Venezuela, volume grew by 28% driven by Cacique, Johnnie Walker Black label and Buchanan's. Marketing investment across Latin America grew by 34% as marketing investment in the region is rebuilt.

Table of Contents

Volume in South Korea grew by 1% benefiting from sales of Dimple. Lack of promotional activity on Dimple in the prior period as distribution was restructured had a negative impact on volume. Increased marketing investment, new packaging and route to market initiatives are being implemented to address the position. The whisky category in South Korea declined by 18%, impacted by weak economic conditions. However, volume of Windsor Premier, the leading scotch whisky, declined by only 8% and therefore share improved.

In Asia, volume in Taiwan grew 37% due to the Chinese New Year falling earlier in the year and buying ahead of a price increase implemented in January 2004. Volume in Thailand grew 8%, however the market there is very price competitive and net sales (after deducting excise duties) declined by 6%. Volume in Japan declined by 9% as growth in Smirnoff, excluding ready to drink volume, up 4%, was offset by a decline in Johnnie Walker volume, down 8%. The scotch category declined by 13% and therefore Johnnie Walker gained some share. Smirnoff ready to drink volume was negatively impacted by the stock build ahead of the launch in May 2003, however distribution continues to build.

Volume in Global Duty Free grew 5% with growth in Johnnie Walker, Smirnoff and Baileys. The Diageo Global Duty Free business benefited from a number of programmes, including improved retail stores formats and initiatives to drive growth in the premium sector.

In Australia, Diageo grew share in a flat spirits segment by 3 percentage points as volume grew 7%. Johnnie Walker Red Label grew share with volume up 12%. Baileys volume grew 32%. Bundaberg Rum's sponsorship of the Rugby World Cup created tremendous exposure for the brand and volume grew 12%. The ready to drink segment grew 14% and Diageo increased share to 32%.

In the Western European key markets, the economic environment has made trading challenging. Volume in France declined 6% as the continuing weakness of the beverage alcohol market there offset the benefit of the launch of Smirnoff ready to drink in May 2003. Volume in Germany fell 18%, mainly due to the steep decline in sales of Smirnoff ready to drink where volume declined 48%. The ready to drink segment in Germany has been negatively impacted by the growth of aggressively discounted own label and secondary ready to drink brands. Volume in Greece grew 3% and share was maintained. Volume excluding ready to drink grew 4% driven by Johnnie Walker, which grew share with volume up 7%. Diageo grew share of ready to drink but volume declined 23% as the segment was impacted in part by lower levels of tourism.

Venture markets

Key measures:

	2003* £ million	2002** £ million	Reported movement %	Organic movement %
Volume			(3)	6
Turnover	650	670	(3)	9
Net sales (after deducting excise duties)	508	527	(4)	8
Marketing	82	88	(7)	12
Operating profit before exceptional items	165	163	1	8

* including Portugal, excluding Germany

** including Germany, excluding Portugal

Reported performance:

Reported turnover was £650 million in the six months ended 31 December 2003, down 3% from £670 million in the prior period. Operating profit before exceptional items improved by 1%, £2 million, to £165 million in the six months ended 31 December 2003.

Table of Contents*Organic performance:*

The main factor in the fall in venture markets turnover in the six months ended 31 December 2003 was the transfer of Germany out of venture markets into key markets, to be replaced with Portugal. This reduced turnover by £62 million. The disposals of Gilbey's Green and White Whisky in India (December 2002) and Fernet Branca wines in Switzerland (December 2002) reduced turnover by £10 million. However, strong organic performance of the brands, up £52 million, meant that overall, venture markets turnover was only down £20 million, after the impact of the Germany/Portugal transfer.

The £2 million increase in operating profit before exceptional items was the result of improved performances in the underlying brands of £12 million in the six months ended 31 December 2003 compared with the prior period partly offset by £8 million arising on the Germany/Portugal transfer, adverse exchange rate movements of £1 million and disposals of £1 million.

Local priority brands	(24)	6
Category brands	5	6
Total	6	8

* *after deducting excise duties*

Venture market's volume growth reflected the continued strong performance of global priority brands and improved performance of category brands.

Johnnie Walker volume grew 8%. Johnnie Walker Black Label and Super Deluxe volume was up 4% and Johnnie Walker Red Label grew 10% driven by strong performances in the Middle East, India, Russia and Latin American venture markets.

Smirnoff growth was led by the strong performance in the Middle East and Latin American venture markets. Poland, the largest Smirnoff venture market, grew volume against a low prior period comparative when there were limited sales in the first quarter ahead of a reduction in duty in September 2002.

Guinness volume increased by 2%. Malaysia continues to deliver strong growth behind the launch of a new can format and increased sales focus. There was also some benefit due to the earlier timing of the Chinese New Year. Performance in Indonesia continues to be impacted by political and economic instability. Price increases introduced in Malaysia and Jamaica delivered mix benefits.

Baileys volume grew by 10%, driven by investment behind visibility and rate of sale campaigns in the venture markets of Chile, Peru and Puerto Rico.

Volume of Red Stripe in Jamaica, venture markets local priority brand, was down 24%. Volume has been impacted by worsening economic conditions and the price and duty increases that took place in the second half of the last financial year, although the volume decline lessened through the period.

Table of Contents

The improvement in category brand volume performance was driven by strong growth of Tiger and Heineken beers in Malaysia, wines in Argentina, rums in Chile and secondary scotches in the Latin American and Caribbean markets.

Overall ready to drink volume declined by 13% versus the comparative period in the prior year. Smirnoff ready to drink volume growth of 10%, which was mainly due to the benefit of new market launches in 2003, was offset by a decline in Gilbey's Island Punch in the Philippines which was discontinued in January 2004. Switzerland and Norway increased taxes on ready to drink products in early 2004.

Marketing investment was up 12% mainly behind Johnnie Walker, Guinness and ready to drink launches in Italy, Nordics, Caribbean and Latin America.

Other business performance drivers:

Strong growth in the Middle East, Asia and Latin America

Mixed performance across Europe

Middle East markets performed strongly as a result of good performance across the brands with volume up 19%, benefiting from the growth of global priority brands particularly in the Lebanon.

In the venture markets across Asia, overall volume grew by 5%. In India, the sale of the Gilbey's Green and White whisky in December 2002 has resulted in increased focus on the global priority brands. Parts of the region such as Malaysia, Singapore and China are seeing recovery post SARS, though the potential for further outbreaks remains a concern and trading in the Philippines and Indonesia remains challenging.

In European venture markets, the Nordics have performed strongly and have been bolstered by tax cuts in Denmark in October. Elsewhere the weakening economic environment has impacted performance.

In Latin America and Caribbean markets, volume grew by 25% with growth across the brands, in particular Baileys and category brands. The political and economic climate in the region is still volatile, however the United States economic recovery should have a positive impact in the months to come.

Table of Contents

FINANCIAL REVIEW

Exchange rates

Exchange rate movements during the six month period adversely impacted profit before exceptional items and taxation by £14 million of which £38 million was in respect of the US dollar, largely offset by a £34 million benefit on the euro. This includes translation exchange only in respect of the profits of associates. The adverse impact on group operating profit was £20 million, offset by a beneficial impact on finance charges of £6 million.

Based on current exchange rates, it is expected that the full year equivalent adverse impact of exchange rate movements (translation exchange only on reported share of profits of associates) on profit before exceptional items and taxation will be approximately £95 million. Similarly, based on current exchange rates, the full year impact of adverse exchange rate movements on profit before exceptional items and taxation for the financial year ending 30 June 2005 is estimated to be £75 million.

The group currently has net transaction hedges for US dollars in place which settle in the year ending 30 June 2004 to sell £435 million of US dollars and which settle in the year ending 30 June 2005 to sell £439 million of US dollars. Where these hedges are against sterling they are at an average rate of £1 = \$1.53 for the year ending 30 June 2004 and £1 = \$1.59 for the year ending 30 June 2005.

The group currently has net transaction hedges for euros in place which settle in the year ending 30 June 2004 to buy £51 million of euros and which settle in the year ending 30 June 2005 to buy £141 million of euros. Where these hedges are against sterling they are at an average rate of £1 = 1.54 for the year ending 30 June 2004 and £1 = 1.41 for the year ending 30 June 2005.

Post employment plans

The application of FRS 17 resulted in a charge to operating profit of £54 million (2002 £51 million) and other finance charges of £8 million (2002 credit of £18 million). The figures for the six months ended 31 December 2002 have been restated onto a FRS 17 basis. At 31 January 2004 Diageo's deficit before taxation for all post employment plans was estimated at approximately £1.1 billion (30 June 2003 £1.4 billion). This improvement in the level of the deficit reflects the partial recovery in equity markets subsequent to 30 June 2003. However, changes in the valuation subsequent to 30 June 2003 are not included in the balance sheet until 30 June 2004.

Associates

The group's share of profits of associates before exceptional items was £273 million for the period compared to £266 million for the same period last year. The 21% equity interest in General Mills contributed £153 million (2002 £157 million). The equity interest in General Mills, in the six months ended 31 December 2003, contributed £120 million to profit after interest but before tax and exceptional items (2002 £119 million). Diageo's 34% equity interest in Moët Hennessy contributed £110 million to operating profit (2002 £103 million).

Exceptional items

Exceptional items in the six month period amounted to a net charge before taxation of £38 million comprising Seagram integration costs of £19 million, a share of associates' exceptional charges of £11 million and a net loss on disposals of fixed assets of £8 million, principally in respect of the dilution of the investment in General Mills through the issue of share options.

Table of Contents

In the six month period, £19 million was incurred in respect of the integration of the Seagram spirits and wine businesses, acquired in December 2001 (year ended 30 June 2003 £177 million; year ended 30 June 2002 £164 million). Approximately £7 million of these costs were employee related, £3 million were in respect of write-downs of assets, and the balance of £9 million included legal and professional and systems costs. The majority of these costs were incurred in North America.

Finance charges

The interest charge in the period was £146 million, compared with £207 million for the comparable period last year. The decrease is principally in respect of £11 million arising from the disposal of businesses and £32 million from the effect of reducing interest rates, partly offset by the funding of the share repurchases, £7 million, and dividends, £10 million.

Other finance charges have increased by £22 million, principally as a result of charges of £8 million in respect of the group's post employment plans in the six months ended 31 December 2003 compared to income of £18 million in the six months ended 31 December 2002. The adverse movement principally reflects the decline in the values of the assets held by the post employment plans between 30 June 2002 and 30 June 2003.

Taxation

The effective rate of taxation on profit before exceptional items for the period was 25%, compared with 25.4% for the six months ended 31 December 2002, restated from the originally reported 25% following compliance with the new accounting pronouncements for post employment plans and share trusts. The charge for the six months ended 31 December 2003 is based on an estimate of the effective tax rate for the financial year as a whole.

Dividend

Diageo will pay an interim dividend of 10.6 pence per share on 6 April 2004, an increase of 7% on last year's interim dividend. Payment to US ADR holders will be made 13 April 2004. The record date for this dividend will be 5 March 2004. A dividend reinvestment plan is available in respect of this dividend and the plan notice date will be 15 March 2004.

Cash flow

Taxation	(179)	(15)
Net purchase of investments	(5)	(16)
Net capital expenditure	(95)	(178)
	<hr/>	<hr/>
Free cash flow	620	363
	<hr/>	<hr/>

Table of Contents

Free cash inflow was £620 million, compared with £363 million in the six months ended 31 December 2002 (restated following the adoption of UITF 38, whereby shares purchased and sold by the share trusts no longer form part of capital expenditure and financial investment). Cash inflow from operating activities was £971 million compared with £754 million in the comparable period. Discontinued operations contributed £76 million to cash inflow from operating activities in the six months ended 31 December 2002. Cash flow from operating activities was after £52 million of restructuring and integration payments and a £321 million increase in working capital, mainly due to seasonal factors.

Net interest payments were £140 million against £200 million in the comparable period. Purchases of tangible fixed assets in the period amounted to £110 million, a decrease of £89 million. Tax payments were £179 million compared to £15 million in the six months ended 31 December 2002.

In the six months ended 31 December 2003, Diageo repurchased for cancellation 36 million shares (2002 71 million shares) at a cost of £256 million (2002 £552 million) and spent a net cost of £16 million (2002 £62 million) on the purchase of shares for the employee share trusts.

Balance sheet

At 31 December 2003, total shareholders funds were £2,992 million compared with £2,801 million at 30 June 2003. The increase was mainly due to the £571 million retained income for the period, less £272 million for the repurchase of own shares. Total shareholders funds at 30 June 2003 were restated from £4,954 million to £2,801 million following the adoption of *FRS 17 Retirement benefits* and *UITF 38 Accounting for ESOP trusts* on 1 July 2003. The net deficit for post employment plans (net of deferred tax) is now disclosed as a separate line on the balance sheet and all prior period balance sheets have been restated.

Net borrowings were £4,705 million, a decrease of £165 million from 30 June 2003. The principal components of this decrease were free cash inflow of £620 million and the benefits from favourable exchange rate movements of £295 million, less £272 million on the repurchase of shares and a £480 million equity dividend payment.

NOTES

1. New accounting policies

The group has adopted the reporting requirements of *FRS 17 Retirement benefits* in its primary financial statements from 1 July 2003. In prior years, the group complied with the transitional disclosure requirements of the standard. The financial information included in this interim statement also complies with the following requirements issued by the UK's Accounting Standards Board: *Abstract 38 Accounting for ESOP trusts* and the amendment to *FRS 5 Reporting the substance of transactions*.

FRS 17 Retirement benefits. This standard replaces the use of the actuarial values for assets in a pension scheme in favour of a market-based approach. In order to cope with the volatility inherent in this measurement basis, the standard requires that the profit and loss account shows the relatively stable ongoing service cost, finance charge and expected return on assets. Differences between expected and actual returns, and changes in actuarial assumptions, are reflected in the statement of total recognised gains and losses.

The adoption of *FRS 17* has decreased the reported operating profit for the six months ended 31 December 2002 by £42 million. This charge has been offset by a decrease in exceptional charges of £18 million, an increase in other finance income of £18 million and a decrease in the tax charge of £2 million, giving a net increase in the loss for the period of £4 million. In addition, the adoption of the standard has reduced net assets at 30 June 2003 by £1,869 million (31 December 2002 £735 million).

UITF 38 Accounting for ESOP trusts. This abstract changes the presentation of an entity's own shares held in an employee share trust from requiring them to be recognised as assets to requiring them to be deducted in arriving at shareholders' funds. It also requires that the minimum expense to the profit and loss account should be the difference between the fair value of the shares at the date of award and the amount that an employee may be required to pay for the shares (i.e. the intrinsic value of the award).

The impact of the adoption of *UITF 38* in the six months ended 31 December 2002 has been to increase operating profit by £6 million and increase the tax charge by £2 million. The reclassification of shares acquired by the share trust (treasury shares) from fixed assets and debtors to equity has reduced net assets by £288 million at 30 June 2003 (31 December 2002 £301 million). In addition, the net cash outflow arising from the purchase of shares by the share trusts has been reclassified from capital expenditure and financial investment to financing. This reclassification increases free cash flow for the six months ended 31 December 2002 by £62 million.

FRS 5 Reporting the substance of transactions. The amendment to the standard added a new application note (G) on revenue recognition. This requires that revenue should be stated at fair value of the right to consideration. Diageo incurs certain promotional expenditure (for example, slotting fees, whereby fees are paid to retailers for prominence of display, listing or agreement not to delist Diageo's products) that is not wholly independent of the invoiced product price. Such expenditure is now deducted from turnover. The change, which has no impact on operating profit, reduced turnover and operating costs by £95 million in the six months ended 31 December 2002.

All appropriate primary statements and notes supporting the financial information have been restated.

Table of Contents**2. Segmental analysis**

	2003		2002	
	Turnover £ million	Operating profit £ million	Turnover (restated) £ million	Operating profit (restated) £ million
Class of business:

10. Contingent liabilities

(i) *Guarantees.* In connection with the disposal of the quick service restaurants business, Diageo has guaranteed up to \$850 million (£475 million) of external borrowings of Burger King until December 2007. These loans had an original term of five years although Diageo and

Edgar Filing: DIAGEO PLC - Form 6-K

Burger King agreed to structure their arrangements to encourage refinancing by Burger King on a non-guaranteed basis prior to the end of five years. In connection with the disposal of Pillsbury, Diageo has guaranteed the debt of a third party to the amount of \$200 million (£112 million) until 13 November 2009.

Including these guarantees, but net of the amount provided, the group has given performance guarantees and indemnities to third parties of £606 million. There has been no material change since 30 June 2003 in the group's performance guarantees and indemnities.

Table of Contents

(ii) *Colombian excise duties*. In August 2000, Diageo learned that the Governors of the Departments of the Republic of Colombia and the City of Bogotá (the Departments) were considering initiating legal proceedings against major spirits companies in relation to unpaid excise duties and taxes on products that are smuggled into Colombia by third parties. Such proceedings are expected to be similar to actions that have been brought in recent years by foreign governments, including the Departments, against a number of major tobacco companies. Specifically, there have been four such actions filed against various tobacco companies. Three of the four actions have been dismissed. The fourth has yet to proceed to the stage where motions to dismiss are filed. It remains the directors' intent that any proceedings of this kind that might be brought against Diageo will be strenuously defended.

(iii) *Hakki versus Zima Company, et al and related cases*. Diageo plc and Diageo North America have been named as defendants in three purported class action lawsuits. The first Hakki versus Zima, et al, was commenced against a number of alcohol beverage companies on 14 November 2003 in the Superior Court of Washington, D.C. The complaint asserts claims under the District of Columbia Consumer Protection Procedures Act (DCCPPA) and the common law of the District of Columbia that the defendants specifically targeted the US advertising and marketing of certain of their products to individuals below the 21 year old legal drinking age. The complaint alleges that at least 15-20% of all alcoholic beverages sold in the United States are consumed by underage drinkers . The complaint further alleges that profits earned by the defendants from the alleged illegal sales to underage drinkers greatly exceed \$1 billion per year .

The lawsuit seeks certification as a class action on behalf of (a) parents and guardians whose funds were used by their children under 21 from 1982 to the present without their knowledge to purchase alcohol beverages marketed by the defendants, on whose behalf monetary recovery is sought and (b) the parents and guardians of all children under 21, on whose behalf the complaint requests that the Court enter an injunction prohibiting the defendants from marketing alcohol beverages to underage persons.

The prayer for relief in the complaint seeks, among other matters, (a) that defendants each disgorge to the purported class all amounts by which they have been allegedly unjustly enriched, plus costs and interest; (2) rescission of the alleged transactions whereby defendants allegedly obtained revenues from the illegal sale of alcoholic beverages to underage consumers and ordered to pay such monies to the purported class; and (3) to assess all defendants jointly and severally for all alleged actual damages sustained by the purported plaintiff class plus treble damages or \$1,500 per violation, whichever is greater, punitive damages, attorneys fees, costs of suit and interest.

Since the filing of the Hakki lawsuit, two similar cases against Diageo and the other Hakki defendants have been filed. The first, Kreft versus Zima Company, et al, was brought in state court in Denver, Colorado; the second, Wilson versus Zima Company et al, was brought in state court in Charlotte, North Carolina. The allegations are largely similar to Hakki, refer to the same advertisements, and were brought by mostly the same lawyers. Diageo intends to strenuously defend all these claims.

(iv) *Other*. The group has extensive international operations and is a defendant in a number of legal proceedings incidental to these operations. There are a number of legal claims or potential claims against the group, the outcome of which cannot at present be foreseen. Save as disclosed above, neither Diageo nor any member of Diageo is or has been engaged in, nor (so far as Diageo is aware) is there pending or threatened by or against it, any legal or arbitration proceedings which may have a significant effect on the financial position of the Diageo group. Provision is made for all liabilities that are probable and reliably measurable.

Table of Contents

11. Basis of preparation

The interim financial information has been prepared on the basis of accounting policies consistent with those applied in the accounts for the year ended 30 June 2003, except for the accounting policy changes set out in note 1 above. The information is unaudited but has been reviewed by the auditors, KPMG Audit Plc, and their report is reproduced after these notes. The information does not comprise the statutory accounts of the group. The statutory accounts of Diageo plc for the year ended 30 June 2003 have been filed with the registrar of companies. KPMG Audit Plc have reported on these accounts; their report was unqualified and did not contain any statement under section 237 of the Companies Act 1985.

INDEPENDENT REVIEW REPORT TO DIAGEO plc

Introduction

We have been instructed by the company to review the financial information for the six months ended 31 December 2003 set out on pages 23 to 32. We have read the other information contained in the interim report and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

This report is made solely to the company in accordance with the terms of our engagement to assist the company in meeting the requirements of the Listing Rules of the Financial Services Authority. Our review has been undertaken so that we might state to the company those matters we are required to state to it in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company for our review work, for this report, or for the conclusions we have reached.

Directors responsibilities

The interim report, including the financial information contained therein, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the interim report in accordance with the Listing Rules of the Financial Services Authority which require that the accounting policies and presentation applied to the interim figures should be consistent with those applied in preparing annual accounts except where they are to be changed in the next annual accounts in which case any changes, and the reasons for them, are to be disclosed.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4: Review of Interim Financial Information issued by the Auditing Practices Board for use in the United Kingdom. A review consists principally of making enquiries of group management and applying analytical procedures to the financial information and underlying financial data and, based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review is substantially less in scope than an audit performed in accordance with Auditing Standards and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the financial information.

Review conclusion

On the basis of our review we are not aware of any material modifications that should be made to the financial information as presented for the six months ended 31 December 2003.

Table of Contents

Notes

- (1) The reported turnover and net sales (after deducting excise duties) for the six months ended 31 December 2002 has been restated following the adoption of *FRS 5 Reporting the substance of transactions on revenue recognition application note (G)*. The change reduced turnover and net sales (after deducting excise duties) by £95 million in the six months ended 31 December 2002 in respect of the following markets £12 million for North America, £32 million for Great Britain, £nil for Ireland, £11 million for Spain, £27 million for key markets and £13 million for venture markets.
- (2) The reported operating profit before exceptional items for the six months ended 31 December 2002 has been restated following the adoption of *FRS 17 Retirement benefits, UITF 38 Accounting for ESOP trusts*. The operating profit before exceptional items has been reduced by £36 million in respect of the following markets £16 million for North America, £5 million for Great Britain, £5 million for Ireland, £1 million for Spain, £8 million for key markets and £1 million for venture markets.
- (3) The exchange adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items are principally in respect of the US dollar and the euro.
- (4) Disposals include the transfer of Portugal to venture markets from key markets, and Germany to key markets from venture markets, effective 1 July 2003. This adjustment represents the differential between the incremental amounts contributed by Germany compared to the amounts contributed by Portugal in the six months ended 31 December 2002 £62 million for turnover, £45 million for net sales (after deducting excise duties) and £8 million for operating profit before exceptional items. In addition, disposals for turnover, net sales (after deducting excise duties) and operating profit before exceptional items, respectively, were principally in respect of the termination of distribution rights for Bass Ale in North America and Brown Forman agency brands in Great Britain, the disposals of Gilbey's Green and White Whisky in India, and the partial disposal of Don Julio in Mexico.
- (5) There have been no acquisitions of subsidiaries in the last eighteen months.
- (6) In the calculation of operating profit before exceptional items the overheads included in disposals were only those directly attributable to the businesses disposed, and do not result from subjective judgements of management.
- (7) The organic movement percentage is the amount in the column headed organic movement in the table above expressed as a percentage of the aggregate of the first three columns. The basis of the calculation of the organic movement is explained below.

Calculation of organic movement

Where a business, brand, brand distribution right or agency agreement was disposed of, or terminated, in the current period, the group, in organic movement calculations, adjusts the results for the comparable prior period to exclude the amount the group earned in that period that it could not have earned in the current period (i.e. the period between the date in the prior period, equivalent to the date of the disposal in the current period, and the end of the prior period). As a result, the organic movement numbers reflect only comparable trading performance. Similarly, if a business was disposed of part way through the equivalent prior period then its contribution would be completely excluded from that prior period's performance in the organic movement calculation, since the group recognised no contribution from that business in the current period.

A further adjustment in organic movement is made to exclude the effect of exchange rate movements by recalculating the prior period's results as if they had been generated at the current period's exchange rates.

Table of Contents

Organic movement percentages are calculated as the organic movement amount in £ million, expressed as the percentage of the prior period results at current year exchange rates and after adjusting for disposals. The basis of calculation means that the results used to measure organic movement for a given period will be adjusted when used to measure organic movement in the subsequent period.

Table of Contents

EXPLANATORY NOTES

Definitions

Unless otherwise stated, percentage movements given throughout this announcement for volume, turnover, net sales (after deducting excise duties), marketing investment and operating profit are organic movements (at level exchange rates and after adjusting for acquisitions and disposals) for continuing operations. They are before exceptional items. Comparisons are with the equivalent period in the last financial year. For an explanation of organic movements and free cash flow please refer to Diageo's annual report for the year ended 30 June 2003 and Reconciliation to GAAP measures in this announcement.

Volume has been measured on an equivalent servings basis to nine litre cases of spirits. Equivalent units are calculated as follows: beer in hectolitres is divided by 0.9, wine in nine litre cases is divided by 5, ready to drink in nine litre cases is divided by 10. An equivalent unit represents approximately 272 servings. A serving comprises 33ml of spirits; 165ml of wine; or 330ml of ready to drink or beer.

Net sales are turnover less excise duty.

References to ready to drink include flavored malt beverages in the United States. References to Smirnoff ready to drink include Smirnoff Ice, Smirnoff Black Ice, Smirnoff Twisted V, Smirnoff Mule, Smirnoff Spin and Smirnoff Caesar. References to Smirnoff Black Ice include Smirnoff Ice Triple Black in the United States.

The share data contained in this announcement is taken from independent industry sources in the markets in which Diageo operates.

This announcement contains forward-looking statements that involve risk and uncertainty. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors beyond Diageo's control. Please refer to page 40 Cautionary statement concerning forward-looking statements for more details.

This announcement includes names of Diageo's products which constitute trademarks or trade names which Diageo owns or which others own and license to Diageo for its use.

Reconciliation to GAAP measures

(i) Organic movement

Organic movement in volume, turnover, net sales (after deducting excise duties) and operating profit before exceptional items are measures not specifically used in the consolidated financial statements themselves (non-GAAP measures). The performance of the premium drinks segment is discussed using these measures.

Since overall performance is the result of a number of factors, breaking these down into broad categories and discussing each of these categories assists management and the reader in understanding the overall picture. Once factors such as the effect of currency movements, excise duties and acquisitions and disposals have been discussed, the above measures enable the reader to focus on the performance of the premium drinks brand portfolio which is common to both periods. Organic movement measures also most closely reflect the way in which the business is managed, for the same reasons of achieving comparability between periods. Diageo's strategic planning and budgeting process is based on organic movement in volume, net sales (after deducting excise duties) and operating profit before exceptional items, and these measures closely reflect the way in which operating targets are defined and performance is monitored by the group's management.

Table of Contents

These measures are chosen for planning, budgeting and reporting purposes since, as explained further below, they represent those measures which local managers are most directly able to influence and they enable consideration of the underlying business performance without the distortion caused by fluctuating exchange rates, excise duties, acquisitions and disposals. In addition, management bonus targets are set based on the performance of the business as measured by organic operating profit growth before exceptional items.

The group's management believe these measures provide valuable additional information for users of the financial statements in understanding the group's performance since they provide information on those elements of performance which local managers are most directly able to influence and focus on that element of the core brand portfolio which is common to both periods. However, whilst these measures are important in the management of the business, they should not be viewed as replacements for, but rather as complementary to, the comparable GAAP measures such as turnover and reported (rather than organic) movements in individual profit and loss account captions. These GAAP measures reflect all of the factors which impact the business and the discussion in relation to premium drinks should be read in the context of the discussion of the overall group performance.

In the discussion of the performance of the premium drinks segment, net sales (after deducting excise duties) is presented in addition to turnover, since turnover reflects significant components of excise duties which are set by external regulators and over which Diageo has no control. Diageo incurs excise duties throughout the world. In some countries, such as the United States and Canada, excise duties are based on sales and are separately identified on the face of the invoice to the external customer. In others, such as the United Kingdom and Ireland, it is effectively a production tax, which is incurred when the spirit is removed from bonded warehouses. In these countries it is part of the cost of goods sold and is not separately identified on the sales invoice. Changes in the level of excise duties can significantly effect the level of reported turnover and cost of sales, without directly reflecting changes in volume, mix or profitability that are the variables that impact the element of turnover retained by the group.

Also in the discussion of the performance of the premium drinks segment, certain information is presented using sterling amounts on a constant currency basis. This strips out the effect of foreign exchange and enables an understanding of the underlying performance of the market that is most closely influenced by the actions of the group's management. The risk from foreign exchange is managed centrally and is not a factor over which local managers have any control.

Adjusting for these items enables group management to monitor performance over factors which local managers are not directly able to influence in relation to the core ongoing brand portfolio. The underlying performance on a constant currency basis and excluding the impact of acquisitions and disposals is referred to as organic performance, and further information on the calculation of organic measures as used in the discussion of the premium drinks segment is included on page 35.

(ii) Free cash flow

Free cash flow is a non-GAAP measure that comprises the net cash flow arising from operating activities, dividends received from associates, returns on investments and servicing of finance, taxation, and capital expenditure and financial investment. Free cash flow as used by the company covers all the items that are required by FRS 1 to be on the face of the cash flow statement down to, and including, capital expenditure and financial investment. It is therefore a natural sub-total but may not be comparable to similarly titled measures used by other companies. The group's management believe the measure assists users of the financial statements in understanding the group's cash generating performance as it comprises items which arise from the running of the ongoing business.

Table of Contents

Where appropriate, separate discussion is given for the impacts of acquisitions and disposals of businesses, equity dividends and purchase of own shares – each of which arises from decisions which are independent from the running of the ongoing underlying business. The management regards capital expenditure as ultimately non-discretionary since ongoing investment in plant and machinery is required to support the day-to-day operations, whereas acquisitions and disposals of businesses are discretionary. However, free cash flow does not necessarily reflect all amounts which the group either has a constructive or legal obligation to incur. The free cash flow measure is also used by management for their own planning, budgeting, reporting and incentive purposes since it provides information on those elements of performance which local managers are most directly able to influence.

(iii) Return on average total invested capital

Return on average total invested capital is a non-GAAP measure that is used by management to assess the return obtained from the group's asset base. This measure is not specifically used in the consolidated financial statements, but is calculated to aid comparison of the performance of the business between periods.

Profits used in assessing the return on total invested capital reflect the operating performance of the business after the effective tax rate for the period, stated before exceptional items and interest. Average total invested capital is calculated using the average derived from the consolidated balance sheets at 30 June and 31 December. Capital employed comprises the average net assets for the period, excluding post employment liabilities (net of deferred tax) and average net borrowings. This is aggregated with restructuring and integration costs, which have been charged to exceptional items, and goodwill written off in reserves (up to 1 July 1998). For the six months ended 31 December 2002, the capital employed has also been adjusted for the assets, including goodwill, of Burger King, as profits were generated for five and a half months of this period. Calculations for the return on average total invested capital for the six months ended 31 December 2003 were as follows:

	2003	2002 (restated)
	£ million	£ million
Operating profit before exceptional items	1,181	1,204
Associates after interest	241	227
Effective tax rate 25% / 25.4%	(356)	(363)
	<u>1,066</u>	<u>1,068</u>
Average net assets	4,795	4,733
Average net borrowings	4,788	5,362
Average integration costs (net of tax)	896	768
Average goodwill	1,619	1,661
Burger King		2,067
	<u>12,098</u>	<u>14,591</u>
Return on average total invested capital	<u>17.6%</u>	<u>14.6%</u>

Cautionary statement concerning forward-looking statements

This document contains statements with respect to the financial condition, results of operations and business of Diageo and certain of the plans and objectives of Diageo with respect to these items. These forward-looking statements are made pursuant to the Safe Harbor provisions of the United States Private Securities Litigation Reform Act of 1995. In particular, all statements that express forecasts, expectations and projections with respect to future matters, including trends in results of operations, margins, growth rates, overall market trends, the impact of interest or exchange rates, the availability of financing to Diageo and parties or consortia who have purchased Diageo's assets, actions of parties or consortia who have purchased Diageo's assets, anticipated cost savings or synergy and the completion of Diageo's strategic transactions, are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors that are outside Diageo's control.

These factors include, but are not limited to:

Increased competitive product and pricing pressures and unanticipated actions by competitors that could impact Diageo's market share, increase expenses and hinder growth potential;

The effects of future business combinations, partnerships, acquisitions or disposals, existing or future, and the ability to realise expected synergy and/or costs savings;

Diageo's ability to complete future acquisitions and disposals;

Legal and regulatory developments, including changes in regulations regarding consumption of, or advertising for, beverage alcohol, changes in accounting standards, taxation requirements, such as the impact of excise tax increases with respect to the premium drinks business, and environmental laws;

Developments in the Hakki versus Zima Company et al, Kreft versus Zima Company et al, Wilson versus Zima Company et al litigation and any similar proceedings;

Changes in the food industry in the United States, including increased competition and changes in levels of consumer preferences;

Changes in consumer preferences and tastes, demographic trends or perception about health related issues;

Changes in the cost of raw materials and labour costs;

Changes in economic conditions in countries in which Diageo operates, including changes in levels of consumer spending;

Levels of marketing and promotional expenditure by Diageo and its competitors;

Renewal of distribution rights on favourable terms when they expire;

Termination of existing distribution rights on agency brands;

Technological developments that may affect the distribution of products or impede Diageo's ability to protect its intellectual property rights; and

Table of Contents

Changes in financial and equity markets, including significant interest rate and foreign currency rate fluctuations, which may affect Diageo's access to or increase the cost of financing.

All oral and written forward-looking statements made on or after the date of this announcement and attributable to Diageo are expressly qualified in their entirety by the above factors and the risk factors contained in the annual report on Form 20-F for the year ended 30 June 2003 filed with the U.S. Securities and Exchange Commission.

The information in this announcement does not constitute an offer to sell or an invitation to buy shares in Diageo plc or any other invitation or inducement to engage in investment activities.

Past performance cannot be relied upon as a guide to future performance.
