Headline 2005 IFRS Information

Released 10:09 09-Nov-05

9 November 2005

2005 IFRS Information

At its preliminary results in September 2005 Diageo issued supplementary schedules giving information in respect of its transition to financial reporting in accordance with International Financial Reporting Standards (IFRS). This data included unaudited restated financial information prepared in accordance with IFRS in relation to the year ended 30 June 2005 (the 2005 IFRS Information).

The International Accounting Standards Board, at its meeting in October 2005, considered a technical correction to eliminate an inconsistency in one of the standards. IFRS requires that deferred tax liabilities should be recognised in respect

**Table of Contents**

of separable intangibles where there is a difference between the accounting and tax values for these assets. Normally recognition of this deferred tax liability would result in a corresponding increase in goodwill. Diageo reflected this treatment in the 2005 IFRS Information issued on 1 September 2005 in respect of deferred tax liabilities of £438 million relating to intangibles acquired in business combinations prior to the IFRS transition date (1 July 2004). This was also the treatment considered as a technical correction by the IASB. However, following the decision by the IASB not to propose a technical correction, the provisions of IFRS1 applicable to pre transition date business combinations require that deferred tax liabilities existing at the transition date in respect of these assets should reduce equity by an equivalent amount and not increase goodwill.

Under UK GAAP, net assets at 1 July 2004, 31 December 2004 and 30 June 2005 were £4,183 million, £4,284 million and £3,834 million respectively. Under IFRS, net assets at 1 July 2004, 31 December 2004 and 30 June 2005 were £5,229 million, £4,997 million and £4,626 million respectively after making the above adjustment. This compares to £5,667 million, £5,435 million and £5,074 million, respectively disclosed in the 2005 IFRS information issued on 1 September 2005. This adjustment has no impact on the IFRS income statement or cash flows. Updated IFRS financial information is attached. The IFRS financial information and reconciliations with UK GAAP are available at [www.diageo.com](http://www.diageo.com).

As described in the 2005 IFRS Information published on 1 September, IFRS are subject to ongoing review and endorsement by the EU and possible amendment by interpretative guidance from the International Accounting Standards Board (IASB) and are therefore still subject to change. Diageo's IFRS information will be updated as necessary for any such changes, should they occur.

Diageo is required to present its first financial statements in accordance with IFRS in respect of the year ending 30 June 2006. The group will also present its interim financial information for the six months ending 31 December 2005 in accordance with IFRS.

Diageo Maintains Guidance at Investor Conference in London today

Diageo is holding an Investor Conference in London today. At the conference Nick Rose, Diageo's Chief Financial Officer will tell attendees that Diageo's guidance for the full year ended June 2006 is unchanged and that organic operating profit growth can be similar to that achieved on the year ended June 2005 even allowing for higher growth in marketing spend and higher pension costs.

Nick Rose went on to say:

---

**Table of Contents**

We continue to see good share gains in the US, even with the price increases that we have put through there. The terrible hurricanes in the US have had an impact on our performance in the Southeastern states. It is too early to tell whether this will impact full year performance or whether the impact will be limited to the first half and we will benefit in the second half from restocking.

In Diageo Europe, we are seeing continued weakness in ready to drink and in Guinness and while we have plans in place to address these trends any benefit is not expected to be seen until later in the financial year.

In Diageo International, Latin America remains buoyant. We have made steady progress in the three markets which we identified for improvement at the time of our 2005 results announcement, Taiwan, Korea and Nigeria. In Taiwan, a series of actions including management changes and a renewed focus on Johnnie Walker means that Johnnie Walker has now overtaken its most significant competitor and is again the leading Scotch whisky brand there. In Korea, the new management team is also making good progress. Focus on Windsor has returned the brand to growth and we will now begin a similar program on Dimple. In Nigeria, volumes are still down year on year, but this is in line with our expectations at this stage. Guinness Extra Smooth and Harp are doing well and Guinness Malta is benefiting from improvement in its regional distribution.

We are on track to deliver our cost synergies but we are seeing pressure on input costs from higher oil prices. As we said in the AGM statement, our relatively high operating margin does mitigate the impact of the current high oil price but it will increase our cost base by around £20 million in the current year.

With the exception of Guinness our global priority brands, particularly Smirnoff, Johnnie Walker and Captain Morgan, continue to grow strongly.

We are reiterating our full year guidance although the rate of growth in the first half performance may be below our guidance for the full year. We have not given full year eps guidance, as reported eps will be impacted by agreements with tax authorities in respect of brand carrying values. We are still confident that the tax rate for 06 will be well below 20% and hope to be able to give an update on the actual tax rate at the time of the interims.
