---

**Table of Contents**

**OUTLOOK FOR 2007**

Based upon the current group structure: In 2007 we expect a growth in reported revenues of between 15% and 20%. The EBITDA margin before other income and expenses is expected to be around 35%. We expect capital expenditure as a proportion of revenues to be around 20% in 2007, mainly driven by high subscription growth within our mobile operations in emerging markets. The effects from the introduction of an interconnect regime in Thailand, both when it comes to timing as well as magnitude, represents the main uncertain factor related to Telenor's outlook for 2007. A growing share of Telenor's revenues and profits is derived from operations outside Norway. Currency fluctuations may to an increasing extent influence the reported figures in Norwegian Krone. Political risk, including regulatory conditions, may also influence the profits. We expect seasonal variations between the quarters.

**KYIVSTAR FIGURES BASED ON ESTIMATES**

There are litigation and arbitration proceedings pending in New York involving Kyivstar's shareholders relating to Kyivstar's shareholders agreement. Further proceedings have recently been brought in Ukrainian courts by Storm LLC (43.5% shareholder in Kyivstar) and a related party challenging the authority of the company to appoint auditors. An injunction from Krasnolutsk City Court of Lugansk Region has been issued that, among other things, purports to prohibit Kyivstar's management from providing financial information to Kyivstar's international auditors, the company's shareholders, including Telenor, from using financial information already provided by Kyivstar and Kyivstar and Telenor's auditors from carrying out any audit work in relation to Kyivstar's year-end IFRS financial statements. Telenor is contesting these actions. As a result of not having the ability to obtain relevant financial information from Kyivstar, the information contained in Telenor's fourth quarter results relating to Kyivstar is based on estimated figures. Actual results could differ from these estimates.
