SEMI-ANNUAL REPORT

Dear Shareholder

Market volatility has been extraordinary in recent months. Government debt and deficit issues in both the US and Europe have taken a toll on investor sentiment while weaker-than-expected US economic data raised concerns of another recession. Political instability and concerns that central banks have nearly exhausted their stimulus measures have further compounded investor uncertainty. Although markets remain volatile and conditions are highly uncertain, BlackRock remains focused on finding opportunities in this environment.

The pages that follow reflect your fund s reporting period ended August 31, 2011. Accordingly, the following discussion is intended to provide you with additional perspective on the performance of your investments during that period.

One year ago, the global economy appeared to solidly be in recovery mode and investors were optimistic given the anticipated second round of quantitative easing from the US Federal Reserve (the Fed). Stock markets rallied despite the ongoing sovereign debt crisis in Europe and inflationary pressures looming over emerging markets. Fixed income markets, however, saw yields move sharply upward (pushing prices down) especially on the long end of the historically steep yield curve. While high yield bonds benefited from the risk rally, most fixed income sectors declined in the fourth quarter. The tax-exempt municipal market faced additional headwinds as it became evident that the Build America Bond program would not be extended and municipal finance troubles abounded.

The new year brought spikes of volatility as political turmoil swept across the Middle East/North Africa region and as prices of oil and other commodities soared. Natural disasters in Japan disrupted industrial supply chains and concerns mounted over US debt and deficit issues. Equities generally performed well early in the year, however, as investors chose to focus on the continuing stream of strong corporate earnings and positive economic data. Credit markets were surprisingly resilient in this environment and yields regained relative stability in 2011. The tax-exempt market saw relief from its headwinds and steadily recovered from its fourth-quarter lows. Equities, commodities and high yield bonds outpaced higher-quality assets as investors increased their risk tolerance.

However, longer-term headwinds had been brewing. Inflationary pressures intensified in emerging economies, many of which were overheating, and the European debt crisis continued to escalate. Markets were met with a sharp reversal in May when political unrest in Greece pushed the nation closer to defaulting on its debt. This development rekindled fears about the broader debt crisis and its further contagion among peripheral European countries. Concurrently, it became evident that the pace of global economic growth had slowed as higher oil prices and supply chain disruptions finally showed up in economic data. By mid-summer, confidence in policymakers was tarnished as the prolonged US debt ceiling debate revealed the degree of polarization in Washington, DC. The downgrade of the US government s credit rating on August 5 was the catalyst for the recent turmoil in financial markets. Extreme volatility persisted as Europe s debt and banking crisis deepened and US economic data continued to weaken. Investors fled from riskier assets, pushing stock and high yield bond indices into negative territory for the six-month period ended August 31, while lower-risk investments including US Treasuries, municipal securities and investment grade corporate bonds posted gains. Twelve-month returns on all asset classes remained positive. Continued low short-term interest rates kept yields on money market securities near their all-time lows.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

BlackRock remains focused on managing risk and finding opportunities in all market environments.

Fund Summary as of August 31, 2011

BlackRock Corporate High Yield Fund, Inc.

Investment Objective

BlackRock Corporate High Yield Fund, Inc. s (COY) (the Fund) investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities, which are rated in the lower rating categories of the established rating services (BB or lower by Standard & Poor s Corporation (S&P s) or Ba or lower by Moody s Investors Service, Inc. (Moody s)) or are unrated securities considered by BlackRock to be of comparable quality. The Fund s secondary objective is to provide stockholders with capital appreciation. The Fund invests, under normal market conditions, at least 80% of its assets in high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and corporate loans which are below investment grade quality. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended August 31, 2011, the Fund returned 4.03% based on market price and (2.99)% based on net asset value (NAV). For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 1.40% based on market price and (2.67)% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Detracting from performance was the Fund s limited exposure to higher-quality securities, which exhibit greater sensitivity to interest rates than their lower-quality counterparts, and therefore benefited to a greater degree from the rally in US Treasury rates as market volatility increased during the period. Holdings of non-rated credits and securities classified as having equity-correlated risks had a negative impact on Fund returns. Security selection within the automotive, non-captive diversified (industrials) and consumer service sectors also hindered returns. In addition, the Fund s allocation to senior secured bank loans, which underperformed high yield bonds for the period, had a negative impact.

Security selection and trades based on relative valuation contributed positively to overall performance for the period, particularly within the independent energy, media non-cable, electric and metals & mining sectors. The Fund sholdings of lower-quality high yield bonds benefited performance earlier in the period due to favorable liquidity conditions and an improving corporate credit backdrop.

The Fund uses credit default swaps to express a particular view in an individual credit name and as a means of managing risk. It will also utilize credit default swaps on a basket of securities in order to put cash to work or quickly increase or decrease the portfolio s exposure to market movements. The Fund may also use stock futures and options to hedge the equity risk inherent within an individual position or group of positions. Stock futures are an efficient mechanism for reducing risk under certain market conditions. During the period, the use of derivatives had an overall positive impact on Fund returns.

Describe recent portfolio activity.

Over the period, the Fund reduced the overall risk profile by focusing its purchases in higher quality areas of the market and selling some of its riskier holdings. In order to hedge against risks relating to equity market volatility (i.e., reduce equity beta), the Fund established short positions in equity futures contracts. The Fund continued to participate in the new issue market, although cautiously, seeking opportunities in more stable industries from issuers that offer good cash flows, earnings and revenue visibility, as well as attractive downside protection. Additionally, the Fund increased exposure to names in the independent energy sector, while reducing exposure to the wireless sector.

Describe portfolio positioning at period end.

At period end, the Fund held 83% of its total portfolio in corporate bonds, 10% in floating rate loan interests (bank loans) and 3% in common stocks, with the remainder in other interests and preferred securities. The Fund had a negligible cash position. From a sector perspective, the Fund held large exposures to automotive and media non-cable names and continued to limit its exposure to consumer-related sectors including retailers, gaming and technology. The Fund ended the period with leverage at 22% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended August 31, 2011, the Fund returned 0.43% based on market price and (3.35)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 1.40% based on market price and (2.67)% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Detracting from performance was the Fund s limited exposure to higher-quality securities, which exhibit greater sensitivity to interest rates than their lower-quality counterparts, and therefore benefited to a greater degree from the rally in US Treasury rates as market volatility increased during the period. Holdings of non-rated credits and securities classified as having equity-correlated risks had a negative impact on Fund returns. Security selection within the automotive, non-captive diversified (industrials) and consumer service sectors also hindered returns. In addition, the Fund s allocation to senior secured bank loans, which underperformed high yield bonds for the period, had a negative impact.

Security selection and trades based on relative valuation contributed positively to overall performance for the period, particularly within the independent energy, media non-cable, electric and metals & mining sectors. The Fund s holdings of lower-quality high yield bonds benefited performance earlier in the period due to favorable liquidity conditions and an improving corporate credit backdrop.

The Fund uses credit default swaps to express a particular view in an individual credit name and as a means of managing risk. It will also utilize credit default swaps on a basket of securities in order to put cash to work or quickly increase or decrease the portfolio s exposure to market movements. The Fund may also use stock futures and options to hedge the equity risk inherent within an individual position or group of positions. Stock futures are an efficient mechanism for reducing risk under certain market conditions. During the period, the use of derivatives had an overall positive impact on Fund returns.

Describe recent portfolio activity.

Over the period, the Fund reduced the overall risk profile by focusing its purchases in higher quality areas of the market and selling some of its riskier holdings. In order to hedge against risks relating to equity market volatility (i.e., reduce equity beta), the Fund established short positions in equity futures contracts. The Fund continued to participate in the new issue market, although cautiously, seeking opportunities in more stable industries from issuers that offer good cash flows, earnings and revenue visibility, as well as attractive downside protection. Additionally, the Fund increased exposure to names in the independent energy sector, while reducing exposure to the wireless sector.

BlackRock Debt Strategies Fund, Inc.

Investment Objective

BlackRock Debt Strategies Fund, Inc. s (DSU) (the Fund) primary investment objective is to provide current income by investing primarily in a diversified portfolio of US companies debt instruments, including corporate loans, which are rated in the lower rating categories of the established rating services (BBB or lower by S&P s or Baa or lower by Moody s) or unrated debt instruments, which are in the judgment of the investment adviser of equivalent quality. The Fund s secondary objective is to provide capital appreciation. Corporate loans include senior and subordinated corporate loans, both secured and unsecured. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended August 31, 2011, the Fund returned 2.16% based on market price and (3.81)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 1.40% based on market price and (2.67)% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Fund invests in both high yield bonds and floating rate loan interests (i.e., bank loans). Both of these sectors generated negative returns for the period as investors fled riskier assets due to concerns about the debt crisis in Europe and slowing economic growth in the US. Bank loans underperformed high yield bonds as interest rates fell and the Fed signaled that it is likely to maintain low short-term interest rates for an extended period. The Fund s large allocation to bank loans detracted from performance relative to its Lipper category competitors, which invest primarily in high yield bonds. The Fund s positions in common stocks, convertible bonds and preferred securities (approximately 2% of the portfolio) had a negative impact, as did its underexposure to higher-quality, non-investment grade issues.

Conversely, the Fund s heavy exposure to names in energy and metals and mining contributed positively to performance as these sectors are more stable and therefore outperformed the more cyclical sectors when the market declined. Limited exposure to the lower-quality tiers of speculative-grade credits also proved beneficial.

Describe recent portfolio activity.

Over the period, the Fund shifted positioning to a more conservative stance by reducing its holdings in the more cyclical sectors and increasing exposure to sectors exhibiting stable cash flows, earnings visibility, and attractive downside protection.

Describe portfolio positioning at period end.

At period end, the Fund held 53% of its total portfolio in floating rate loan interests (bank loans), 43% in corporate bonds, 2% in common stocks and the remainder in asset-backed securities and other interests. The Fund held a negligible cash position. From a sector perspective, the Fund held large exposures to the paper, chemicals and independent energy sectors, while its exposures to technology, automotive and gaming names were limited. The Fund ended the period with leverage at 26% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Fund Summary as of August 31, 2011

BlackRock Floating Rate Income Strategies Fund II, Inc.

Investment Objective

BlackRock Floating Rate Income Strategies Fund II, Inc. s (FRB) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended August 31, 2011, the Fund returned (11.01)% based on market price and (4.85)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (11.93)% based on market price and (5.66)% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Floating rate loan interests (i.e., bank loans) suffered along with other risk assets as macroeconomic headwinds intensified and investor confidence waned during the period. Although the bank loan market generally advanced over the first five months of the period, a surge of volatility in August more than reversed those gains. Within the Fund, security selection in consumer services had a negative impact on performance. The Fund s use of leverage hurt returns (on an absolute basis) as the bank loan sector underperformed relative to other fixed income sectors. In addition, the Fund s bias to higher-quality pockets of the loan market proved a disadvantage when the markets corrected in August. Selling in the bank loan market was concentrated in higher-quality loan instruments as they tend to be more liquid and have better pricing transparency.

The Fund maintains a relatively conservative portfolio, weighted toward higher-quality non-investment grade investments. This investment style along with the Fund s bottom-up process for security selection was the largest contributor to performance for the period. Security selection within chemicals along with low exposure and positive selection in media non-cable had a positive impact. From an asset allocation perspective, the Fund s exposure to high yield bonds was beneficial as the sector outperformed bank loans.

Describe recent portfolio activity.

During the period, the Fund maintained its higher-quality bias in terms of structure, overall credit quality and liquidity. Prior to the market correction in August, the Fund reduced exposure to some of the lower-quality holdings and increased the level of cash. While transitioning the overall portfolio to a more conservative stance, Fund management continued to seek investment opportunities across the new-issue market, albeit cautiously, targeting issuers with superior credit fundamentals (i.e., stable income streams and attractive downside protection).

Describe portfolio positioning at period end.

At period end, the Fund held 81% of its total portfolio in floating rate loan interests (bank loans) and 16% in corporate bonds, with the remainder in asset-backed securities, other interests and cash. From a sector perspective, the Fund held large exposures to the non-captive diversified (industrials), chemicals and wireless sectors, while its exposures to consumer products, media non-cable and technology were limited. The Fund ended the period with leverage at 27% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

--------------------	-----------------	----

Fund Summary as of August 31, 2011

BlackRock Senior High Income Fund, Inc.

Investment Objective

BlackRock Senior High Income Fund, Inc. s (ARK) (the Fund) investment objective is to provide high current income by investing principally in senior debt obligations of companies, including corporate loans made by banks and other financial institutions and both privately placed and publicly offered corporate bonds and notes. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended August 31, 2011, the Fund returned (6.20)% based on market price and (2.18)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 1.40% based on market price and (2.67)% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Fund invests in both high yield bonds and floating rate loan interests (i.e., bank loans). Both of these sectors generated negative returns for the period as investors fled riskier assets due to concerns about the debt crisis in Europe and slowing economic growth in the US. Bank loans underperformed high yield bonds as interest rates fell and the Fed signaled that it is likely to maintain low short-term interest rates for an extended period. The Fund s large allocation to bank loans detracted from performance relative to its Lipper category competitors, which invest primarily in high yield bonds. The Fund s positions in common stocks, convertible bonds and preferred securities (approximately 3% of the portfolio) had a negative impact, as did its underexposure to higher-quality, non-investment grade issues.

Conversely, the Fund s heavy exposure to names in energy and metals & mining contributed positively to performance as these sectors are more stable and therefore outperformed the more cyclical sectors when the market declined. Limited exposure to the lower-quality tiers of speculative-grade credits also proved beneficial.

Describe recent portfolio activity.

Over the period, the Fund shifted positioning to a more conservative stance by reducing its holdings in the more cyclical sectors and increasing exposure to sectors exhibiting stable cash flows, earnings visibility, and attractive downside protection.

Describe portfolio positioning at period end.

At period end, the Fund held 54% of its total portfolio in floating rate loan interests (bank loans) and 43% in corporate bonds, with the remainder in asset-backed securities, common stocks and other interests. The Fund held a negligible cash position. From a sector perspective, the Fund held large exposures to the non-captive diversified (industrials), chemicals and independent energy sectors, while its exposures to technology, automotive and electric names were limited. The Fund ended the period with leverage at 23% of its total managed assets.

SEMI-ANNUAL REPORT

BlackRock Senior High Income Fund, Inc.

Fund Information

Symbol on NYSE	ARK
Initial Offering Date	April 30, 1993
Yield on Closing Market Price as of August 31, 2011 (\$3.78) ¹	7.94%
Current Monthly Distribution per Common Share ²	\$0.025
Current Annualized Distribution per Common Share ²	\$0.300
Leverage as of August 31, 2011 ³	23%

- ¹ Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.
- ² The distribution rate is not constant and is subject to change.
- ³ Represents loan outstanding as a percentage of total managed assets, which is the total assets of the Fund (including any assets attributable to borrowings) minus the sum of liabilities (other than borrowings representing financial leverage). For a discussion of leveraging techniques utilized by the Fund, please see The Benefits and Risks of Leveraging on page 14.

The table below summarizes the changes in the Fund s market price and NAV per share:

	8/.	31/11	2/	28/11	Change]	High]	Low

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV. However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage by borrowing through a credit facility. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it issues debt securities for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays interest expense on the \$30 million of debt securities based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the interest expense of the borrowings is significantly lower than the income earned on the Fund s long-term investments, and therefore the Fund s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds NAV positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Fund s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund s ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through their credit facility up to 33 % of their total managed assets. As of August 31, 2011, the Funds had outstanding leverage from borrowings as a percentage of their total managed assets as follows:

	Percent of Leverage 22%
COY	
COY CYE	24%
DSU	26%
FRB	27%
DSU FRB ARK	23%

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

Liabilities in Excess of Other Assets (25.3)%				(60,682,896)
Net Assets 100.0%			\$	240,242,084

* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2011, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 313,099,853
Gross unrealized appreciation	\$ 11,308,144
Gross unrealized depreciation	(22,600,970)
Net unrealized depreciation	\$ (11,292,826)

⁽a) Non-income producing security.

- (b) Restricted security as to resale. As of report date the Fund held less than 0.1% of its net assets, with a current market value of \$3,851 and an original cost of \$277, in this security.
- (c) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) Represents a step-down bond that pays an initial coupon rate for the first period and then a lower coupon rate for the following periods. Rate shown is as of report date.
- (e) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (f) Convertible security.
- (g) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (h) Variable rate security. Rate shown is as of report date.
- (i) Issuer filed for bankruptcy and/or is in default of interest payments.
- Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (k) Other interests represent beneficial interest in liquidation trusts and other reorganization or private entities.

- (l) Amount is less than \$500.
- (m) The investment is held by a wholly owned subsidiary of the Fund.
- (n) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (o) Investments in companies considered to be an affiliate of the Fund during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at February 28, 2010	Net Activity	Shares Held at August 31, 2011	Income		
BlackRock Liquidity	2010	Activity	2011	me	ome	
Funds, TempCash,						
Institutional Class	1,721,866	243,950	1,965,816	\$	1,031	

(p) Represents the current yield as of report date.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Financial futures contracts sold as of August 31, 2011 were as follows:

Total					\$ 47,092

(a) Pays a fixed interest rate and receives floating rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized in three broad levels for financial statement purposes as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instruments)

The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Fund s perceived risk of investing in those securities. For information about the Fund s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of August 31, 2011 in determining the fair valuation of the Fund s investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term				
Investments:				
Common Stocks	\$ 7,032,920	\$ 85,137	\$ 2,152,050	\$ 9,270,107

2,239,019)

¹ Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts, and foreign currency exchange contracts are valued at the unrealized appreciation/ depreciation on the instrument and options are shown at value.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

BlackRock Corporate High Yield Fund, Inc. (COY)

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Fl	oating Rate Loan Interests	Other Interests	P	referred Stocks	v	Varrants	Jnfunded Loan mmitments	Total
Assets/Liabilities:											
Balance, as of February 28,											
2011	\$ 412,146	\$ 5,083,048	\$	6,878,236	\$	7		\$	154	\$ (11,592) \$	12,361,999
Accrued discounts/premiums		12,301		1,296							13,597
Net realized gain (loss)		6,528		3,965							10,493
Net change in unrealized											
appreciation/depreciation ²	(2,000,339) 624,595		1,156,020	(27,393	3)\$	297,347		225,780	11,592	287,602
Purchases	3,740,243	47,658		5,690	1,577,152	2					5,370,743
Sales		(748,753)		(2,574,160)							(3,322,913)
Transfers in ³		105,738		1,461,797							1,567,535
Transfers out ³				(1,153,977)							(1,153,977)
Balance, as of August 31,											
2011	\$ 2,152,050	\$ 5,131,115	\$	5,778,867	\$ 1,549,760	5\$	297,347	\$	225,934	\$	15,135,079

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held on August 31, 2011 was \$(992,367).

³ The Fund s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets.

See Notes to Financial Statements.
