Impsat selects Gilat's SkyEdge broadband satellite equipment for SCPC and high bandwidth applications

SkyEdge enables Impsat to provide efficient, bandwidth-on-demand solutions to corporate clients throughout Argentina

Petah Tikva, Israel, June 27, 2006 Gilat Satellite Networks, Ltd. (Nasdaq: GILT), today announced it has provided a SkyEdge satellite hub and VSAT equipment to Impsat, one of Latin America's largest providers of private telecommunications networks and Internet services.

Utilizing the SkyEdge platform, Impsat will provide services to enterprises throughout Argentina with a wide range of data networking applications, including broadband Internet access and VoIP. SkyEdge's advanced Quality of Service (QoS) ensures that Service Level Agreements (SLAs) can be maintained. This is especially important for corporate customers who require committed IP data pipes and low latency for time-sensitive applications such as VoIP and credit card authorization.

After evaluating several alternatives, we found SkyEdge to be the most effective solution for ensuring the integrity of the SLAs we offer our customers. We believe that SkyEdge's bandwidth-on-demand and IP capabilities will complete our IP anywhere offering in Argentina, which provides converged multimedia broadband solutions to any customer, regardless of geographic location," said Leonardo Barbero, Data Products Senior Vice President for Impsat. SkyEdge's flexibility also enables us to manage service upgrades in a smooth and simple manner.

Over the past two years, Impsat has deployed Gilat VSAT equipment at 700 sites to serve corporate customers.

Erez Antebi, CEO for Gilat Network Systems (GNS), a business unit of Gilat Satellite Networks, said, "This agreement demonstrates Impsat's confidence in Gilat and SkyEdge's ability to meet the complex networking requirements of their most demanding enterprise users. Impsat shall serve as an important landmark for us, proving the case of VSAT technology as an efficient solution to address SCPC services. In the past, VSATs were mainly focused on contention based transactions, however, the SkyEdge product was developed as well to support SLAs for high-bandwidth corporate and cellular-backhaul applications.

He added, "We are grateful for the opportunity to continue our successful relationship with Impsat and support its tradition of excellence in network solutions.

Gilat's SkyEdge is a comprehensive satellite communications platform that delivers high-end voice, data and video services over a single, powerful system. It represents Gilat's deep knowledge base and field-proven product offering, acquired through nearly two decades of experience. SkyEdge's flexible architecture and efficient space segment utilization make it an ideal platform for operators and service providers.

About Impsat

Impsat is a leading provider of private telecommunications networks and Internet services in Latin America. The Company offers integrated data, voice, data center and Internet solutions, with an emphasis on broadband transmission, including IP/ATM switching, DWDM, and non-zero dispersion fiber optics. Impsat provides telecommunications, data center and Internet services through its networks, which consist of owned fiber optic and wireless links, teleports, earth stations and leased satellite links. The Company owns and operates 15 data centers and metropolitan area networks in some of the largest cities in Latin America. Impsat provides services to more than 4,200 national and multinational companies, financial institutions, governmental agencies, carriers, ISPs and other service providers throughout the region. Impsat has operations in Argentina, Colombia, Brazil, Venezuela, Ecuador, Chile, Peru, the United States and throughout Latin America and the Caribbean. Visit Impsat at www.imsat.com.

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd. (Nasdaq: GILT) is a leading provider of products and services for satellite-based communications networks. The Company operates under three business units: (i) Gilat Network Systems (GNS), which is a provider of network systems and associated professional services to service providers and operators worldwide; (ii) Spacenet Inc., which provides managed services in North America for businesses and governments through its Connexstar service brand and for consumers through its StarBand service brand; (iii) Spacenet Rural Communications, which offers rural telephony and Internet access solutions to remote areas primarily in Latin America.

Gilat was founded in 1987 and has shipped over 600,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 14 local offices and three service facilities worldwide. Gilat markets the SkyEdge Product Family which includes the SkyEdge Pro, SkyEdge IP, SkyEdge Call, SkyEdge DVB-RCS and SkyEdge Gateway. In addition, the Company markets numerous other legacy products. Visit Gilat at www.gilat.com.
