Consolidated Financial Results

April 1, 2005 March 31, 2006

May 12, 2006

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

U.S. Dollar amounts have been calculated at Yen 117.47 to \$1.00, the approximate exchange rate prevailing at March 31, 2006.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under "Risk Factors" in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission and those factors described under "5. Business Risk" of the "Financial Results" herein.

The Company believes that it will be considered a "passive foreign investment company" for United States Federal income tax purpose in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

| | | |
|-------------------------------|-----|--|
| Consolidated Subsidiaries | 185 | |
| Non-consolidated Subsidiaries | 0 | |
| Affiliates | 84 | (Of which 84 are accounted for by the equity method) |

(5) Changes in Number of Consolidated Subsidiaries and Affiliates

Additions to and deletions from consolidated subsidiaries and affiliates

Additions: Consolidated Subsidiaries 8, Affiliates 10

Deletions: Consolidated Subsidiaries 16, Affiliates 8

2. Forecasts for the Year Ending March 31, 2007 (Unaudited)

| <u>Fiscal Year</u> | <u>Total Revenues</u> | <u>Income before Income Taxes</u> | <u>Net Income</u> |
|--------------------|-----------------------|---------------------------------------|-------------------|
| March 31, 2007 | 1,100,000 | 295,000 | 177,000 |

Note:1. Basic Earnings Per Share is forecasted to be JPY 1,969.06.

2. The above forecasts have been made based upon the available information obtained on the date of this document. Actual results may differ from the forecasts depending upon various factors that may occur in the future.

The forecasts for revenues and income before income taxes do not take into account the reclassification to discontinued operations as it is difficult to forecast income from discontinued operations, net. Please refer to page 14 for a discussion related to the forecasts.

Table of Contents

Group Position

The main contents of each operation and the positioning of ORIX Corporation and its subsidiaries are given below. The following classification is the same as that used in the classification of information by segment.

Operations in Japan

(1) Corporate Financial Services

This business centers on direct financing leases and installment loans, other than real estate loans, to corporate customers as well as the sale of a variety of financial products and other fee business.

[Main related companies]

ORIX Corporation, ORIX Alpha Corporation, Nittetsu Lease Co., Ltd.

(2) Automobile Operations

This business principally comprises automobile leasing operations and automobile rental operations.

[Main related companies]

ORIX Auto Corporation

(3) Rental Operations

This business principally comprises the rental and lease of precision measuring equipment, personal computers and other equipment to corporate customers.

[Main related companies]

ORIX Rentec Corporation

(4) Real Estate-Related Finance

This business encompasses real estate loans to corporate customers and housing loans to individuals. ORIX is also expanding its business involving loan servicing and commercial mortgage-backed securities (CMBS).

[Main related companies]

ORIX Corporation, ORIX Trust and Banking Corporation, ORIX Asset Management & Loan Services Corporation

(5) Real Estate

This business consists principally of condominium development, office building development and sales, office rental activities, integrated facilities management as well as the operation of such facilities as hotels, employee dormitories and training facilities and asset management of Real Estate Investment Trusts (REITs).

[Main related companies]

ORIX Corporation, ORIX Real Estate Corporation, ORIX Facilities Corporation

(6) Life Insurance

Edgar Filing: ORIX CORP - Form 6-K

This segment consists of direct and agency life insurance sales and related activities conducted by ORIX Life Insurance.

[Main related companies]

ORIX Life Insurance Corporation

(7) Other

The other segment encompasses securities brokerage, venture capital operations, consumer card loan operations, investment banking and new businesses.

[Main related companies]

ORIX Corporation, ORIX Credit Corporation, ORIX Capital Corporation, ORIX Securities Corporation,

ORIX Baseball Club Co., Ltd., ORIX COMMODITIES Corporation, ORIX Investment Corporation,

The Fuji Fire and Marine Insurance Company, Limited, DAIKYO INCORPORATED

Overseas Operations

(1) The Americas

Principal businesses in the Americas segment are direct financing leases, corporate lending, securities investment, commercial mortgage-backed securities (CMBS) related business, investment banking and real estate development.

[Main related companies]

ORIX USA Corporation

(2) Asia, Oceania and Europe

Principal businesses in Asia, Oceania and Europe involve direct financing leases, ship related operations, operating leases for transportation equipment, corporate lending and securities investment.

[Main related companies]

ORIX Asia Limited, ORIX Leasing Malaysia Berhad, PT. ORIX Indonesia Finance,

ORIX Investment and Management Private Limited, ORIX Taiwan Corporation, ORIX Leasing Singapore Limited,

ORIX Leasing Pakistan Limited, INFRASTRUCTURE LEASING & FINANCIAL SERVICES LIMITED,

ORIX Australia Corporation Limited, ORIX Aviation Systems Limited, Korea Life Insurance Co., Ltd.

Table of Contents

Group Structure

The structure of principal business of the ORIX Group is as follows.

Table of Contents

[Management Policies]

1. Management Basic Policy

ORIX's corporate philosophy and management policy are shown below.

Corporate Philosophy

ORIX is working to contribute to society by developing leading financial services on a global scale, constantly anticipating market needs, and offering innovative products that create new value for customers.

Management Policy

ORIX strives to meet the diverse needs of our customers and to deepen trust by developing superior services and drawing on the full range of our capabilities.

ORIX aims to strengthen its base of operations and achieve stable, long-term growth by integrating ORIX's resources to promote synergies amongst different units.

ORIX makes efforts to maintain a corporate culture that encourages a sense of fulfillment and pride by developing personnel resources through corporate programs and promoting professional development.

ORIX aims to attain stable, long-term growth in shareholder value by implementing these initiatives.

2. Profit Distribution Policy

Over the medium- and long-term ORIX is attempting to distribute profits to shareholders through a steady dividend, and to foster sustainable growth of the company and shareholder value through the appropriation of retained earnings to business fields that are expected to achieve high earnings.

3. Vision and Policy for Lowering Investment Units

ORIX believes that it is necessary to take appropriate measures in reviewing its policy regarding the minimum investment unit for trading on the stock exchange to allow for participation by a broader range of investors.

With regard to the above policy, ORIX changed the number of shares that constitute one unit from 100 to 10 on December 1, 2005.

4. Target Management Index

ORIX sets ROE, ROA, and the shareholders' equity ratio as important management indexes and is building its business portfolio with a focus on balancing profitability, growth and stability of the company.

Table of Contents

5. Medium- and Long-Term Corporate Management Strategy

With the continued evolution of the economy and society, market demands for innovative products and services increasingly impact the financial services sector, ORIX's principal operating domain. Accordingly, ORIX has identified management's ability to promptly and flexibly respond to changing market needs as critical to achieving medium- and long-term growth.

Currently, ORIX is engaged in business activities across seven operating segments in Japan and two segments overseas. These nine segments are segregated according to three core characteristics with management resources allocated to ensure maximum efficacy. The position of each segment is subject to constant change in line with the aforementioned shifts in market demand. The nine operating segments according to their current characteristics are as follows.

1. Stable profit segments attempting to achieve further growth Corporate Financial Services; Rental Operations; Life Insurance; and Asia, Oceania and Europe segments
2. Accelerated growth segments attempting to achieve high growth in profits Automobile Operations, Real Estate-Related Finance and Real Estate segments
3. Future profit segments expected to contribute to profits in the future Other and The Americas segments

6. Challenges to be Addressed

(1) Strengthening Corporate Structure

ORIX understands that a robust and dynamic corporate structure is integral to achieving sustained growth from a medium- and long-term perspective. As the scale of operations continues to expand the importance to strengthen corporate structure also increases. Recognizing its growing importance in conjunction with demands to expand corporate scale, ORIX is committed to redoubling efforts in this area.

In specific terms, we intend to implement the following three measures in an effort to strengthen our corporate structure.

1. Further improve our financial position
2. Further develop an operating platform that is capable of creating new value
3. Establish a workplace environment that is valued by employees

From the perspective of further improving our financial position, we have in recent years enjoyed quantitative results commensurate with our efforts. Going forward, ORIX will continue to secure growth opportunities with the aim of realizing further improvement. In an effort to further develop an operating platform that is capable of creating new value, we will focus on expanding our customer base, enhancing our sales and marketing network, and fostering improvements in intangible areas such as cross-functional collaboration and teamwork, individual employee effort and our corporate culture. With the aim of establishing an optimal workplace environment, we will promote increased awareness among management as to their roles and responsibilities, while extending efforts to realize a value-creating environment in which employees can fulfill their potential irrespective of nationality, age, gender, education and employment type. At the same time, we will instill among employees a deeper understanding of the impact of our corporate activities in an effort to better contribute to the prosperity of the economy and society.

Table of Contents

(2) Business Development

Buoyed by a steadily recovering domestic economy, ORIX will pursue business development in Japan by bolstering the activities of its core Corporate Financial Services segment focusing on small and medium-sized enterprises (SME). In response to capital investment and real estate development needs, we will expand operations in leasing and loans. Complementing these initiatives, we will propose a variety of innovative financial services to address requirements from the growing M&A market and emerging demands relating to business restructuring including the sale of businesses and operating units. Furthermore, we will expand operations in automobile leasing by providing a broad range of high-quality services.

In the Real Estate segment, we will expand the scale of operations in condominium, office building and a wide range of other property development. We will also enter new business fields including nursing and medical care services for residential development and property management. Leveraging our strengths in non-recourse loans, loan servicing and related activities, we will nurture the Real Estate and Real Estate-Related Finance segments to become new core businesses after our Corporate Financial Services segment focusing on SMEs.

Utilizing a sales and marketing network that extends across 22 countries and regions outside of Japan, we are looking to further expand our overseas operations. In January 2006, ORIX entered the investment banking field in the United States. While working to promote our activities in this new endeavor, we will also pursue synergies with our existing Corporate Finance Group.

Commensurate with business expansion and changes in our operating environment, ORIX will confront a variety of business and market risks. Risks tend to increase along with the profitability and growth of a particular business. In order for us to ensure that the checks and balances in our operations are more effective, we examine new business transactions from a variety of perspectives and apply strict assessment criteria. Thereafter, we periodically monitor transactions, work to further diversify risk and selectively apply financial instruments, a key element in risk management. While the profit structure is constantly changing, we are also implementing capital allocation initiatives with the aim of building a portfolio that attempts to balance profitability, growth and financial stability.

Table of Contents

(3) Corporate Governance

In order to ensure prompt decision-making and execution as well as more effective separation of roles and responsibilities between the executive and supervisory functions, ORIX adopted a Company with Committees board model in 2003. (This model was amended to reflect the effectiveness of the Company Law on May 1, 2006).

As of March 31, 2006, the Board of Directors consisted of five outside directors and six internal directors. By appointing external parties to its Board of Directors, ORIX is able to leverage the experience and resourcefulness of individuals from outside the Company, further strengthen its corporate governance framework and improve the Board's ability to objectively determine whether business activities emphasize the interests of shareholders. In the future, ORIX will continue to enhance its corporate governance function with the aim of ensuring sound and efficient corporate management.

7. Matters Related to the Parent Company

Not applicable.

Table of Contents**Financial Results****1. The Fiscal Year Ended March 31, 2006****Economic Environment**

The world economy showed signs of recovery and expansion throughout this fiscal year in the U.S., Europe, and Asia. The U.S. economy expanded as a result of the favorable employment environment and a continuation of steady increases in consumer spending, despite concerns of the effect of a sharp increase in crude oil prices and slowdown in housing investments. The European economy showed signs of recovery as corporate output expanded in the background of strong exports, despite the continued uncertainty surrounding a recovery in consumer spending. In the Asian economy, China continued to achieve high growth despite a slowdown in the expansion of exports and investments that have been driving its economy, while the other Asian countries also saw an overall expansion in their economies.

The Japanese economy improved despite rises in crude oil and raw material prices, as there was a continuation in the expansion of capital expenditures, improvement in the employment environment, an active stock market and increase in consumer spending. As a result, the Bank of Japan moved to end its quantitative easing policy in March 2006 and an end to the deflationary spiral appears within sight.

Financial Highlights

| | |
|---------------------------------------|---|
| Revenues | 947,824 million yen (Up 2% year on year) |
| Operating Income | 217,338 million yen (Up 65% year on year) |
| Income before Income Taxes* | 252,150 million yen (Up 63% year on year) |
| Net Income | 166,388 million yen (Up 82% year on year) |
| Operating Assets | 5,858,277 million yen (Up 14% on March 31, 2005) |
| Earnings Per Share (Basic) | 1,883.89 yen (Up 73% year on year) |
| Earnings Per Share (Diluted) | 1,790.30 yen (Up 79% year on year) |
| Shareholders' Equity Per Share | 10,608.97 yen (Up 27% on March 31, 2005) |
| ROE | 19.8% (March 31, 2005: 14.2%) |
| ROA | 2.50% (March 31, 2005: 1.56%) |

* Income before income taxes refers to income before discontinued operations, income taxes and minority interests in earnings of subsidiaries.

Revenues: 947,824 million yen (Up 2% year on year)

Revenues increased 2% to 947,824 million yen compared with the previous fiscal year.

Although real estate sales decreased year on year, revenues from direct financing leases, operating leases, interest on loans and investment securities, brokerage commissions and net gains on investment securities, life insurance premiums and related investment income, gains on sales of real estate under operating leases, and other operating revenues were up compared to the previous fiscal year.

Furthermore, transportation revenues, which were recorded in the previous fiscal year, are no longer consolidated, and the results of operations of the related business were recorded as equity in net income of affiliates during this fiscal year as shown in (Note 1) on page 9.

Revenues from direct financing leases increased 12% to 98,645 million yen compared to the previous fiscal year. In Japan, revenues from direct financing leases were up 10% to 71,279 million yen compared to 64,879 million yen in the previous fiscal year due to an expansion of the automobile leasing operations and the contribution from the operations of ORIX Kitakanto Corporation, which entered the ORIX Group during the previous fiscal year. Overseas, revenues were up 17% to 27,366 million yen compared to 23,373 million yen in the previous fiscal year. The expansion of the leasing operations in the Asia, Oceania and Europe segment resulted in the higher overall revenues.

Table of Contents

Revenues from operating leases increased 9% to 213,865 million yen compared to the previous fiscal year. In Japan, although revenues from the precision measuring and other equipment rental operations were down year on year, there was an increase in automobile and real estate operating leases that resulted in a 5% increase to 162,062 million yen compared to 153,658 million yen in the previous fiscal year. Overseas, revenues were up 24% to 51,803 million yen compared to 41,812 million yen in the previous fiscal year due to the expansion of automobile operating leases in the Asia, Oceania and Europe segment.

Revenues from interest on loans and investment securities increased 19% to 161,350 million yen compared to the previous fiscal year. In Japan, interest on loans and investment securities increased 18% to 129,195 million yen compared to 109,887 million yen in the previous fiscal year. The increase in revenues was due mainly to an expansion of revenues associated with loans to corporate customers, including non-recourse loans, and the loan servicing operations. Overseas, revenues were up 26% to 32,155 million yen compared to 25,571 million yen in the previous fiscal year due to the contribution from loans to corporate customers in The Americas segment.

Revenues from brokerage commissions and net gains on investment securities increased 44% to 48,826 million yen compared to the previous fiscal year. Brokerage commissions were up 95% year on year due to an increase in the level of trading volume on the stock market in Japan. Net gains on investment securities were up 36% year on year due to the sale of securities mainly associated with our venture capital operations and corporate rehabilitation fund investments in Japan and securities investments in The Americas segment.

Life insurance premiums and related investment income were up 1% year on year to 138,118 million yen. Life insurance premiums were flat year on year, while life insurance related investment income increased year on year.

Real estate sales decreased 39% year on year to 74,943 million yen. Although revenues associated with the sales of residential condominiums to buyers increased compared to the previous fiscal year, there were no revenues from the sales of office buildings and other real estate developments this fiscal year that were recorded in the previous fiscal year. Furthermore, residential condominiums developed through certain joint ventures were accounted for by the equity method, and are included as a net of revenues and selling costs in equity in net income of affiliates. The revenues from the aforementioned joint ventures were 9,387 million yen.

Gains on sales of real estate under operating leases were up almost six-fold year on year to 8,970 million yen due to the increase in sales of rental purpose office buildings and other real estate.

Other operating revenues increased 28% year on year to 203,107 million yen. In Japan, revenues were up 24% to 190,445 million yen compared to 154,078 million yen in the previous fiscal year due to the increase in revenues associated with companies in which we invested as part of our corporate rehabilitation business in the previous fiscal year that contributed from the beginning of this fiscal year and increase in revenues associated with our integrated facilities management operations. Overseas, revenues increased almost three-fold to 12,662 million yen compared to 4,481 million yen in the previous fiscal year due to the contribution from the investment bank Houlihan Lokey Howard & Zukin that entered the ORIX Group in the fourth quarter of this fiscal year and is included in The Americas segment.

(Note 1)

Transportation revenues and costs of transportation revenues associated with the operations of Footwork Express Co., Ltd., in which we invested as part of our corporate rehabilitation business, were included in the previous fiscal year based on a three-month lag basis as permitted under U.S. GAAP. However, ORIX's share in Footwork Express Co., Ltd. was reduced in December 2004 due to an increase in capital whereby the substantive participating rights of a minority shareholder were increased. As a result, ORIX no longer has a controlling financial interest in the company and accounted for this company as an equity method affiliate at the end of the fiscal year ended March 31, 2005. ORIX has started recording its proportionate share of net income or loss of the company by the equity method from the beginning of the fiscal year ended March 31, 2006 instead of recording transportation revenues and costs of transportation revenues.

Table of Contents

Expenses: 730,486 million yen (Down 8% year on year)

Expenses were down 8% to 730,486 million yen compared with the previous fiscal year. Although interest expense, costs of operating leases, other operating expenses, and selling, general and administrative expenses increased, life insurance costs, costs of real estate sales, provision for doubtful receivables and probable loan losses, write-downs of long-lived assets, and write-downs of securities were down year on year. For details on costs of transportation revenues, refer to (Note 1) on page 9.

Interest expense was up 14% year on year to 62,467 million yen. In Japan, interest expense increased due to the higher average debt levels, and interest expense also increased overseas due to the higher interest rates despite the lower average debt levels.

Costs of operating leases were up 10% year on year to 135,583 million yen accompanying the increase in the average balance of investment in operating leases.

Life insurance costs decreased 4% year on year to 117,622 million yen due mainly to lower insurance payments.

Costs of real estate sales were down 42% year on year to 65,904 million yen for the same reason as given for real estate sales. Furthermore, 12,565 million yen in selling costs associated with residential condominiums developed through certain joint ventures were accounted for by the equity method.

Other operating expenses were up 24% year on year to 129,577 million yen for the same reason as given for other operating revenues.

Selling, general and administrative expenses were up 10% year on year to 190,189 million yen. Although there were no expenses associated with Footwork Express Co., Ltd., which became an equity method affiliate ((Note 1) on page 9), expenses increased due to three factors that included an increase in costs, which were included from the beginning of this fiscal year, accompanying the increase in the number of consolidated companies that entered the ORIX Group during the previous fiscal year, the costs associated Houlihan Lokey Howard & Zukin that entered the ORIX Group in the fourth quarter of this fiscal year, and the expansion of business scope.

Provision for doubtful receivables and probable loan losses was down 58% year on year to 16,480 million yen due to a lower level of non-performing assets despite an increase in operating assets.

Write-downs of long-lived assets were down year on year to 8,336 million yen.

Write-downs of securities were down 8% year on year to 4,540 million yen as we recorded write-downs associated mainly with equity investments made by our venture capital operations in Japan.

Table of Contents

Net Income: 166,388 million yen (Up 82% year on year)

Operating income was up 65% year on year to 217,338 million yen.

Equity in net income of affiliates was up 60% to 32,080 million yen compared to the previous fiscal year due mainly to the increase in profits from overseas equity method affiliates. Included in equity in net income of affiliates are earnings on investments in operating companies accounted for by the equity method and earnings on investments in residential condominiums developed through certain joint ventures, which are also accounted for by the equity method. The equity in net income of affiliates associated with these residential condominium joint ventures was a loss of 3,178 million yen, which is primarily attributable to the upfront recognition of advertising expenses, associated with some large-scale residential condominium development projects, preceding the revenue recognition of completed sales upon title transfer to buyers.

Gains on sales of subsidiaries and affiliates and liquidation loss were down 18% year on year to 2,732 million yen.

Income before discontinued operations, income taxes and minority interests in earnings of subsidiaries increased 63% year on year to 252,150 million yen.

Minority interests in earnings of subsidiaries, net increased 32% year on year to 3,257 million yen (For details refer to (Note 4) on page 17 of the consolidated statements of income).

As a result, income from continuing operations increased 79% year on year to 151,161 million yen.

Discontinued operations, net of applicable tax effect (Note 2) more than doubled year on year to 15,227 million yen.

As a result, net income increased 82% year on year to 166,388 million yen.

(Note 2)

Subsidiaries, businesses, and real estate under operating leases that have been sold or that are to be disposed for which there is no significant continuing involvement, are reclassified to discontinued operations. Income and expenses generated by such subsidiaries, businesses, and real estate under operating leases are retroactively reclassified.

Operating Assets: 5,858,277 million yen (Up 14% on March 31, 2005)

Operating assets were up 14% on March 31, 2005 to 5,858,277 million yen. While investment in direct financing leases declined, installment loans, investment in operating leases, investment in securities, and other operating assets were up.

Segment Information (Segment Profits refer to income before income taxes)

Segment profits were up year on year for all nine segments.

The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, the real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, are included in the Real Estate segment from the first quarter of this fiscal year (Refer to (Note 1) on page 22 of the Segment Information).

Table of Contents

Operations in Japan

Corporate Financial Services Segment:

Segment revenues were up 8% year on year to 97,683 million yen due to the expansion of loans to corporate customers, an increase in contribution from direct financing leases, and due to the increase of gains from securitization compared to the previous fiscal year.

Segment profits increased 11% to 48,661 million yen compared to 43,848 million yen in the previous fiscal year due to the increase in segment revenues and the lower provision for doubtful receivables and probable loan losses.

Segment assets increased 7% on March 31, 2005 to 1,616,574 million yen due to an increase in loans to corporate customers despite the lower level of direct financing leases as a result of securitization.

Automobile Operations Segment:

Segment revenues increased 11% year on year to 130,775 million yen. Although the automobile rental operations were flat compared to the previous fiscal year, the automobile leasing operations expanded.

Segment profits increased 26% to 26,661 million yen in line with the increase in segment revenues compared to 21,088 million yen in the previous fiscal year.

Segment assets increased 13% on March 31, 2005 to 509,149 million yen due to the higher level of direct financing leases from the automobile leasing operations.

Rental Operations Segment:

Segment revenues were down 2% year on year to 67,066 million yen as there were fewer orders from electronics and communications equipment manufacturers for operating lease precision measuring and other equipment rentals, despite an increase in revenues from transactions being accounted for as direct financing leases.

Segment profits increased 6% to 9,911 million yen compared to 9,384 million yen in the previous fiscal year. Although segment revenues were lower, the recording of gains on investment securities resulted in higher segment profits.

Segment assets were up 4% on March 31, 2005 to 123,532 million yen.

Real Estate-Related Finance Segment:

Segment revenues decreased 10% year on year to 69,472 million yen. Although revenues associated with corporate loans, including non-recourse loans, and the loan servicing operations expanded in addition to the contribution from gains on investment securities, there were no revenues associated with the sales of real estate developments, in this fiscal year that were recorded in the previous fiscal year.

Segment profits more than doubled to 33,384 million yen compared to 13,856 million yen in the previous fiscal year due to the lower provision for doubtful receivables and probable loan losses, and the contributions from revenues associated with the loan servicing operations and from gains on investment securities.

Segment assets increased 28% on March 31, 2005 to 1,223,063 million yen due mainly to the increase in corporate loans.

Table of Contents

Real Estate Segment:

Segment revenues increased 1% year on year to 198,780 million yen. Lower real estate sales were recorded as there were no revenues associated with the sales of real estate developments, such as office buildings, in this fiscal year that were recorded in the previous fiscal year. On the other hand, the increase in gains associated with sales of real estate under operating leases and revenues associated with our integrated facilities management operations led to the higher segment revenues.

Segment profits increased 20% to 28,650 million yen compared to 23,959 million yen in the previous fiscal year as a result of the increase in gains associated with the sales of real estate under operating leases.

Segment assets increased 36% on March 31, 2005 to 682,166 million yen due to the purchase of some rental purpose real estate.

Life Insurance Segment:

Segment revenues were up slightly to 137,468 million yen due to the increase in life insurance related investment income while life insurance premiums were flat compared to the previous fiscal year.

Segment profits increased 83% year on year to 13,212 million yen compared to 7,223 million yen in the previous fiscal year due to lower insurance payments and other expenses.

Segment assets were down 13% on March 31, 2005 to 491,857 million yen due to a reclassification of some assets as a result of a change in their use to office facilities and a decrease in the investment portfolio associated with the maturity of some endowment insurance policies.

Other Segment:

Segment revenues decreased 22% year on year to 111,854 million yen. Although there were contributions to revenues from companies that we invested in the previous fiscal year, as part of our corporate rehabilitation business, and from the securities operations and gains on investment securities, the flat year on year revenues from the card loan operations and the change in the accounting treatment of transportation revenues to equity in net income of affiliates, as previously described on the (Note 1) on page 9, resulted in the lower revenues.

Segment profits increased almost two-fold to 41,657 million yen compared to 20,970 million yen in the previous fiscal year due to the lower provision for doubtful receivables and probable loan losses associated with the card loan operations and the increase of gains on sales of companies invested in as part of our corporate rehabilitation business and affiliates.

Segment assets were up 37% on March 31, 2005 to 668,689 million yen. The increase in segment assets was due to a change in the cardholder membership agreement at the card loan operations whereby the balance of certain card loans that were previously accounted for as off-balance sheet assets no longer meet the requirements for such accounting treatment and were accounted for as on-balance sheet assets from this fiscal year and due to the increase in loans related to margin trading at the securities brokerage.

Overseas Operations

The Americas Segment:

Segment revenues were up 32% year on year to 70,223 million yen. Although revenues associated with direct financing leases were flat, revenues from interest on loans to corporate customers and sales on real estate increased year on year. In addition, there were also contributions from the gain on the sale of the primary and master servicing business and from the operations of the investment bank Houlihan Lokey Howard & Zukin that entered the ORIX Group.

Segment profits more than doubled to 34,701 million yen compared to 15,621 million yen in the previous fiscal year due to the increase in segment revenues and the lower provision for doubtful receivables and probable loan losses and other expenses.

Table of Contents

Segment assets were up 9% on March 31, 2005 to 441,285 million yen. Although there was a withdrawal from an investment in an affiliate accompanying its termination, segment assets were up due to the increase in loans to corporate customers and the depreciation of the yen against the dollar.

Asia, Oceania and Europe Segment:

Segment revenues were up 22% year on year to 88,914 million yen due to the steady performance of automobile and machine equipment leasing and increase in revenues from the ship-related operations.

Segment profits increased 44% to 31,956 million yen compared to 22,133 million yen in the previous fiscal year due to an increase in segment revenues, the steady performance of equity in net income of affiliates, and the contribution from the gain on the sale of an affiliate.

Segment assets were up 13% on March 31, 2005 to 562,654 million yen due mainly to the increase in direct financing leases and the depreciation of the yen against the dollar.

2. Summary of Cash Flows (Fiscal Year Ended March 31, 2006)

Cash and cash equivalents increased by 100,476 million yen to 245,856 million yen compared to March 31, 2005.

Cash flows from operating activities provided 136,003 million yen in this fiscal year and provided 126,467 million yen in the previous fiscal year due primarily to inflows associated with the increase in net income.

Cash flows from investing activities used 799,357 million yen in this fiscal year and used 408,004 million yen in the previous fiscal year. There were higher net cash outflows this fiscal year compared with the previous fiscal year as the purchases of lease equipment exceeded the total of principal payments received under direct financing leases and proceeds from sales of operating lease assets, and installment loans made to customers exceeded principal collected on installment loans.

Cash flows from financing activities provided 762,528 million yen in this fiscal year and provided 274,343 million yen in the previous fiscal year, due to the increase in debt accompanying the increase in operating assets.

3. Summary of Fourth Quarter (Three Months Ended March 31, 2006)

In the fourth quarter of this fiscal year revenues decreased 17,118 million yen compared to the same period of the previous fiscal year. Revenues from direct financing leases were up compared to the fourth quarter of the previous fiscal year due to the increase in the average balance of direct financing leases, despite the lower contribution from gains on securitization. Revenues from operating leases were flat year on year. Revenues from interest on loans and investment securities were up due to the increase in the average balance of the associated operating assets compared with the fourth quarter of the previous fiscal year. Brokerage commissions and net gains on investment securities were up compared to the fourth quarter of the previous fiscal year due to the increases in net gains on investment securities and brokerage commissions. Life insurance premiums and related investment income were flat compared to the fourth quarter of the previous fiscal year. Real estate sales decreased year on year as there were no revenues from the sales of office buildings and other real estate developments in the fourth quarter of this fiscal year that were recorded in the fourth quarter of the previous fiscal year. Losses on sales of real estate under operating leases associated with office buildings that are not accounted for under discontinued operations were recorded. Other operating revenues were up year on year due to the increase in revenues associated with the corporate rehabilitation business and contribution to revenues from Houlihan Lokey Howard & Zukin that entered the ORIX Group in the fourth quarter of this fiscal year.

Table of Contents

Expenses were down 25,652 million yen compared to the fourth quarter of the previous fiscal year. Interest expense increased year on year as a result of the increase in the average balance of operating assets. Costs of operating leases were up year on year due to the increase in the average balance of investment in operating leases. Life insurance costs were down compared with the same period of the previous fiscal year due mainly to the lower insurance payments. Costs of real estate sales decreased compared to the fourth quarter of the previous fiscal year for the same reason as given for real estate sales. Other operating expenses increased compared to the same period of the previous fiscal year for the same reason as given for other operating revenues. Selling, general and administrative expenses were up year on year despite the change in accounting for Footwork Express Co., Ltd. (Refer to (Note 1) on page 9 for details) which went from being accounted for as a consolidated company to an equity method affiliate, due to the expenses associated with Houlihan Lokey Howard & Zukin that entered the ORIX Group in the fourth quarter of this fiscal year as well as the expansion of business scope. The provision for doubtful receivables and probable loan losses was down compared to the fourth quarter of the previous fiscal year. Write-downs of long-lived assets were up while write-downs of securities were down compared to the fourth quarter of the previous fiscal year.

As the reduction in expenses was larger than the reduction in revenues, operating income increased by 8,534 million yen compared with the fourth quarter of the previous fiscal year to 47,683 million yen.

Equity in net income of affiliates increased year on year, while losses on sales of subsidiaries and affiliates were recorded. As a result, income before discontinued operations, income taxes and minority interests in earnings of subsidiaries increased by 17,631 million yen compared to the fourth quarter of the previous fiscal year to 58,820 million yen.

Minority interests in earnings of subsidiaries, net of 1,955 million yen were recorded and income from continuing operations increased by 16,360 million yen year on year to 38,283 million yen.

Discontinued operations, net of applicable tax effect added 2,008 million yen and net income in the fourth quarter of this fiscal year rose by 16,513 million yen to 40,291 million yen compared with a net income of 23,778 million yen in the fourth quarter of the previous fiscal year.

4. Outlook and Forecasts for the Fiscal Year Ending March 31, 2007

In terms of the business environment for the fiscal year ending March 31, 2007, overseas the U.S. economy is expected to be steady despite concerns regarding the trend in crude oil prices. In addition, the Asian economy is also expected to continue to expand. In Japan, a steady increase in capital expenditures, a continuation of economic recovery, and a moderate increase in interest rates are expected.

As a result of this business environment, for the fiscal year ending March 31, 2007, we forecast revenues of 1,100,000 million yen (up 16% compared with the fiscal year ended March 31, 2006), income before income taxes of 295,000 million yen (up 17%) and net income of 177,000 million yen (up 6%).

Table of Contents

5. Business Risk

Our business, operating results and financial condition may be materially adversely affected by any of the factors discussed below or other factors. The risk factors listed below are taken from the Annual Financial Report (*Yukashoken houkokusho*) for the fiscal year ended March 31, 2005 that was submitted in Japan in June 2005.

Our business may continue to be adversely affected by economic conditions in Japan

Deflation, deterioration in market demand for real estate, natural disasters or environmental hazards may adversely affect the value of our long-lived assets or collateral of our loans

Our credit losses on loans to Japanese real estate-related companies and construction companies may exceed our allowances for these loans

Changes in market interest rates and currency exchange rates could adversely affect our assets and our financial condition and results of operations

We may lose market share or suffer reduced interest margins if our competitors compete with us on pricing and other terms

Our access to liquidity and capital may be restricted by economic conditions, instability in the financial markets or potential credit rating downgrades

Our business has in the past been, and may again be, adversely affected by adverse economic conditions in the United States

Adverse developments affecting other Asian economies may adversely affect our business

We may suffer losses on our investment portfolio and derivative instruments

We may suffer losses if we are unable to remarket leased equipment returned to us

Our allowance for doubtful receivables on direct financing leases and probable loan losses may be insufficient

Our credit-related costs might increase

Poor performance or failure of affiliates accounted for using the equity method, which include investments in companies as part of our corporate rehabilitation business, or consolidated companies in which we have invested as part of our corporate rehabilitation business, will have an adverse affect on our results of operations and financial condition

Edgar Filing: ORIX CORP - Form 6-K

Our business may be adversely affected by adverse conditions in the airline industry

Inadequate or failed processes or systems, human factors or external events or factors may adversely affect our results of operations, liquidity or reputation

We may be exposed to increased risks as we expand or reduce the range of our products and services, or acquire companies or assets, included as part of our corporate rehabilitation business

We may not be able to hire or retain human resources to achieve our strategic goals

Our results of operations and financial condition may be materially adversely affected by unpredictable events

A failure to comply with regulations to which many of our businesses are subject could result in sanctions or penalties, harm our reputation and adversely affect our results of operations

Changes in law and regulations may materially affect our business, results of operations and financial condition

Changes in tax laws or accounting rules may affect our sales of structured financial products

Litigation and regulatory investigations may adversely affect our financial results

Our life insurance subsidiary is subject to risks that are specific to its business

A downgrade of our credit ratings could have a negative effect on our derivative transactions

We may not be able to manage our risks successfully through derivatives

Our real estate investments may be uninsured or under-insured for certain losses

Dispositions of the Shares, particularly by major shareholders, may adversely affect market prices for the Shares

The departure of top management could adversely affect us

Change of listed sections and delisting of Shares could adversely affect the liquidity and price of the Shares

Holding a professional baseball team entails reputation risks

Edgar Filing: ORIX CORP - Form 6-K

There is a risk that our risk management will not be effective

Details on risks related to our business are disclosed in our Annual Financial Report (*Yukashoken houkokusho*) each year. The Annual Financial Report (*Yukashoken houkokusho*) for the fiscal year ended March 31, 2006 is scheduled to be submitted by June 30, 2006.

- Note:**
1. Pursuant to FASB Statement No. 144 (Accounting for the Impairment or Disposal of Long-Lived Assets), the results of operations which meet the criteria for discontinued operations are reported as a separate component of income, and those related amounts that had been previously reported are reclassified.
 2. Lease income associated with re-leasing, which had been recorded net of depreciation costs of estimated residual values and included in revenues of Direct Financing Leases, were reclassified into revenues of Operating Leases and Costs of Operating Leases, respectively. And revenues and costs of vehicle maintenance and management services, which had been recorded net and included in revenues of Direct Financing Leases, were reclassified into Other Operating Revenues and Other Operating Expenses, respectively. In addition, these amounts in the previous years have been reclassified retroactively.
 3. In the previous fiscal year, Transportation Revenues and Costs of Transportation Revenues were disclosed separately. However, as the logistics subsidiary became an affiliate, the proportionate share of the net income (loss) is recorded in Equity in Net Income of Affiliates by the equity method.
 4. From this fiscal year, Minority Interests in Earnings of Subsidiaries, net which had been included in Selling, General and Administrative Expenses were disclosed separately. In addition, the amount in the previous years has been reclassified retroactively.

- *Note 1:** The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, were included in the Real Estate segment from the first quarter of this fiscal year. Therefore, certain related amounts that had been previously reported are reclassified.
- 2:** As described in note 2 in the accompanying Condensed Consolidated Statements of Income, from fiscal 2006, the presentation of lease income associated with re-leasing and the corresponding costs has been changed. In order to conform to the fiscal 2006 presentation, the segment revenues in the Corporate Financial Services and Automobile Operations segments for the year ended March 31, 2005 were retroactively reclassified, however, there was no effect to the segment profits. In addition, from fiscal 2006, the presentation of revenues and costs of vehicle maintenance and management services has been changed and accordingly, the fiscal 2005 presentation has been also retroactively changed to conform to the fiscal 2006 presentation. This reclassification had no effect on previously reported segment profits but resulted in an increase to previously reported total revenues and expenses of the Automobile Operations segment.
- 3:** Since the Company evaluates the performance for the segments based on profits before income taxes, tax expenses are not included in the segment profits. In addition, results of discontinued operations are included in Segment Revenues and Segment Profits of each segment, if any. Such amounts are eliminated in Difference between Segment totals and Consolidated Amounts.

Table of Contents

Basis of presentation and significant accounting policies

In preparing the accompanying consolidated financial statements, ORIX Corporation (the Company) and its subsidiaries have followed accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

Some areas of potential significant differences between U.S. and Japanese accounting policies and practices are as follows: Accounting for direct financing leases, the use of the straight-line method of depreciation for operating lease equipment, deferral of life insurance policy acquisition costs, accounting for derivative instruments and hedging activities, accounting for goodwill and other intangible assets resulting from business combinations, accounting for pension plans, and reclassification of discontinued operations. Segment information is prepared in accordance with FASB Statement No. 131. The basis of presentation and significant accounting policies are as follows.

1. Consolidated subsidiaries

The accompanying consolidated financial statements include the accounts of the Company, 109 domestic subsidiaries and 76 overseas subsidiaries (total of 185 subsidiaries).

The consolidated financial statements also include variable interest entities to which the Company and its subsidiaries are primary beneficiaries pursuant to FASB Interpretation No. 46 (revised December 2003) (FIN46(R) (Consolidation of Variable Interest Entities)).

Major subsidiaries are ORIX Auto Corporation, ORIX USA Corporation and others.

2. Affiliates accounted for by the equity method

Investment in 58 domestic affiliates and 26 overseas affiliates (total of 84 affiliates) are accounted for by using the equity method. Major affiliates are The Fuji Fire and Marine Insurance Company, Limited, DAIKYO INCORPORATED, Korea Life Insurance Co., Ltd., and others.

3. The date of subsidiaries fiscal closing

Certain subsidiaries have a year-end that differs from that of the Company. However, these subsidiaries close their books and make necessary adjustments for consolidation purposes as of the Company's fiscal year end. For certain subsidiaries whose fiscal periods end at a date that is within three months from our consolidated fiscal periods, we use the most recent fiscal period end of those subsidiaries in our consolidated financial results.

4. Accounting policies

(1) Use of estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(2) Recognition of revenues

Direct financing leases

The excess of aggregate lease rentals plus the estimated unguaranteed residual value over the cost of the leased equipment constitutes the unearned lease income to be taken into income over the lease term using the interest method. Certain direct lease origination costs (initial direct costs) are being deferred and amortized over the lease term as a yield adjustment.

Table of Contents

Operating leases

Revenues from operating leases are recognized on a straight-line basis over the contract terms. Operating lease assets are recorded at cost and are depreciated over their estimated useful lives mainly on a straight-line basis.

Insurance premiums and expenses

Premium income from life insurance policies are recognized as earned premiums when due. Life insurance benefits are recorded as expenses when they are incurred. Policy liabilities for future policy benefits are established for by the net level premium method, based on actuarial estimates of the amount of future policyholder benefits. Certain costs associated with writing insurance (deferred policy acquisition costs) are deferred and amortized over the respective policy periods in proportion to anticipated premium revenue.

(3) Investment in securities

Trading securities are reported at fair value with unrealized gains and losses included in income. Available-for-sale securities are reported at fair value, and unrealized gains or losses are recorded through accumulated other comprehensive income (loss), net of applicable income taxes. However, the Company and its subsidiaries recognize losses related to securities for which the market price has been significantly below the acquisition cost and not considered temporary in nature.

(4) Inventories

Inventories consist primarily of advance and/or progress payments for development of residential condominiums for sale and completed residential condominiums.

Advances and/or progress payments for sale are carried at cost less any impairment losses and finished goods are stated at the lower of cost or market.

(5) Impairment of long-lived assets

Long-lived assets and certain identifiable intangibles to be held and used by the Company and its subsidiaries are reviewed for impairment, whenever events and circumstances indicate that the assets might be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. The net carrying value of assets not recoverable is reduced to fair value if lower than the carrying value.

(6) Allowance for doubtful receivables on direct financing leases and probable loan losses

The allowance for doubtful receivables on direct financing leases and probable loan losses is maintained at a level which, in the judgment of management, is adequate to provide for probable losses on lease and loan portfolios that can be reasonably anticipated.

(7) Prepaid benefit cost (Accrued benefit liability)

The Company and its subsidiaries adopt FASB Statement No. 87 (Employer s Accounting for Pensions), and the costs of pension plans are accrued based on amounts determined using actuarial methods.

(8) Foreign currencies translation

The Company and its subsidiaries maintain their accounting records in their functional currency. Transactions in foreign currencies are recorded in the entity s functional currency based on the prevailing exchange rates on the transaction date.

The financial statements of foreign subsidiaries and affiliates are translated into Japanese yen by applying the exchange rates in effect at the end of each fiscal year to all assets and liabilities. Income and expenses are translated at the average rates of exchange prevailing during the fiscal year.

Table of Contents

(9) Derivatives

The Company and its subsidiaries adopt FASB Statement No. 133 (Accounting for Derivative Instruments and Hedging Activities), as amended by FASB Statement No. 138 (Accounting for Certain Derivative Instruments and Certain Hedging Activities an amendment of FASB Statement No. 133) and FASB Statement No. 149 (Amendment of Statement 133 on Derivative Instruments and Hedging Activities). All derivatives are recorded on the balance sheet at fair value.

(10) Goodwill and other intangible assets resulting from business combinations

Goodwill and other intangible assets that have indefinite useful lives are not amortized. Impairment tests are required on an annual basis and between annual tests whenever events or circumstances indicate a potential impairment might exist.

(11) Income taxes

Income taxes are accounted for under the assets and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized.

(12) Discontinued operations

In accordance with FASB Statement No.144 (Accounting for the Impairment or Disposal of Long-Lived Assets), included in reported discontinued operations are the operating results for subsidiaries, business units, and certain properties sold or to be disposed of by sale without significant continuing involvements and are presented as a separate line from continuing operations.

5. Cash and cash equivalents in the accompanying consolidated statements of cash flows

Cash and cash equivalents include cash on hand, deposits placed with banks and short-term highly liquid investments with original maturities of three months or less.

Revenues from overseas customers

Revenues from overseas customers are as follows.

March 31, 2006

| | Millions of JPY | | |
|---|-----------------|--------------------------|---------|
| | The Americas | Asia, Oceania and Europe | Total |
| Overseas revenue | 47,837 | 90,234 | 138,071 |
| Consolidated revenue | | | 947,824 |
| The rate of the overseas revenues to consolidated revenue | 5.1% | 9.5% | 14.6% |

Investment in Securities

Investment in securities at March 31, 2006 and 2005 consists of the following:

| | Millions of JPY | | Millions of U.S. dollars |
|-------------------------------|-------------------|-------------------|-----------------------------|
| | March 31, 2006 | March 31, 2005 | March 31, 2006 |
| Trading securities | 61,971 | 47,784 | 528 |
| Available-for-sale securities | 432,306 | 390,542 | 3,680 |
| Other securities | 188,521 | 150,945 | 1,605 |
| | 682,798 | 589,271 | 5,813 |

For fiscal 2006 and 2005, net unrealized holding gains and losses on trading securities are gains of JPY1,901 million (US\$16 million) and losses of JPY764 million, respectively. During fiscal 2006 and 2005, the Company and its subsidiaries sold available-for-sale securities for aggregate proceeds of JPY169,534 million (US\$1,443 million) and JPY158,740 million, respectively, resulting in gross realized gains of JPY12,216 million (US\$104 million) and JPY23,036 million, respectively, and gross realized losses of JPY1,185 million (US\$10 million) and JPY1,747 million, respectively. The cost of the securities sold was based on the average cost of each such security held at the time of the sale.

Edgar Filing: ORIX CORP - Form 6-K

Other securities consist mainly of non-marketable equity securities and preferred capital shares carried at cost and investment funds accounted for under the equity method.

Table of Contents

The following is a summary of the contractual maturities of debt securities classified as available-for-sale securities held at March 31, 2006:

| | Millions of JPY | | Millions of U.S. dollars | |
|-----------------------------|-----------------|----------------|--------------------------|--------------|
| | Amortized cost | Fair value | Amortized cost | Fair value |
| Due within one year | 25,099 | 25,585 | 214 | 218 |
| Due after one to five years | 160,300 | 164,222 | 1,365 | 1,398 |
| Due after five to ten years | 138,873 | 140,278 | 1,182 | 1,194 |
| Due after ten years | 22,117 | 26,757 | 188 | 228 |
| | 346,389 | 356,842 | 2,949 | 3,038 |

Securities not due at a single maturity date, such as mortgage-backed securities, are included in the above table based on their final maturities.

Certain borrowers may have the right to call or prepay obligations. This right may cause actual maturities to differ from the contractual maturities summarized above.
