Interim Business Report

(from April 1, 2006 to September 30, 2006)

Hitachi, Ltd.

Tokyo, Japan

(Note) Certain information including product introduction is omitted from this English translation.

Table of Contents

Dear Shareholders:

We take the opportunity of sending you this report on the business results for the first half of fiscal 2006 to express our heartfelt gratitude for your continued support and understanding.

During the half-year period, the Japanese economy remained steady, as private sector plant and equipment investment and consumer spending expanded in response to better corporate earnings and an improved employment environment.

In this business environment, consolidated revenues during the half-year under review of Hitachi (Hitachi, Ltd. and its consolidated subsidiaries) amounted to JPY4,770.9 billion, up 8% from the same period of the preceding year with all industry segments posting higher revenues, particularly in High Functional Materials & Components and Electronic Devices.

As for operating income, although High Functional Materials & Components and Electronic Devices posted higher operating income, overall operating income fell 74% below the year-earlier level, to JPY19.8 billion, owing to lower income by Information & Telecommunication Systems and operating losses both by Power & Industrial Systems, which incurred power plant repair and other expenses, and by Digital Media & Consumer Products, which made aggressive promotional investments. Income before income taxes came to JPY25.8 billion. However, owing to an increase in the income taxes burden and other factors, net loss amounted to JPY78.0 billion.

Looking at non-consolidated results, Hitachi, Ltd. (the Company) recorded revenues of JPY1,229.4 billion, up 2% from a year earlier, but experienced a net loss of JPY66.2 billion primarily because an allowance for doubtful accounts regarding a loan to an affiliated company is posted.

Some major management initiatives were taken during the half year. In April 2006, part of the Company's Industrial Systems, Hitachi Plant Engineering & Construction Co., Ltd., Hitachi Kiden Kogyo, Ltd. and Hitachi Industries Co., Ltd. were integrated to form Hitachi Plant Technologies, Ltd. to strengthen Hitachi's social and industrial infrastructure systems business. In another move aimed at reinforcing the air conditioning and home appliances businesses, Hitachi Air Conditioning Systems Co., Ltd. and Hitachi Home & Life Solutions, Inc. merged to form Hitachi Appliances, Inc.

Steps were also taken to strengthen the automotive systems business. In addition to carrying out a stock-for-stock exchange that made Hitachi Mobile Co., Ltd. a wholly-owned subsidiary, the Company conducted a tender offer for shares of Clarion Co., Ltd. from October 2006 to establish more powerful infrastructure in the car information systems business.

Further, against the backdrop of intensifying competition in both domestic and overseas flat panel TVs markets, the Company moved to strengthen plasma display panel business by boosting production capacity at the Miyazaki Works of Fujitsu Hitachi Plasma Display Limited, a company that was made a subsidiary in April 2005. The expanded plant went into full operation in October 2006.

The breakdown of Hitachi-built turbines at Hamaoka Nuclear Power Station No. 5 of Chubu Electric Power Co., Inc. and Shika Nuclear Power Station No. 2 of Hokuriku Electric Power Company was truly regrettable. In response to this incident, the Company will bolster Hitachi's production engineering up to a still higher level to restore and improve the Hitachi's reputation for reliability.

In September 2006, the Company was ordered to pay a surcharge for having violated the Antimonopoly Act in connection with a bidding in 2004 for installation of tunnel ventilation equipment on the Shinjuku Line of the Metropolitan Expressway. We are sincerely sorry for the considerable anxiety this caused our shareholders. We take this matter most seriously and make further effort to instill strict compliance through basic principles calling for strict observance of laws and regulations and total respect for the free competition.

In light of recent business performance, the Board of Directors determined the amount of an interim dividend to be paid to shareholders at JPY3 per share. The President and all other Directors and Executive Officers will make every effort to achieve an early recovery in business performance.

Table of Contents

Management's view of the future business environment is that Japan is likely to experience a slowdown in economic expansion owing to declining exports to the United States and a slowdown in plant and equipment investment as corporate earnings growth slackens under the pressure of oil prices staying high. In order to meet shareholder expectations for a quick recovery in business performance, management intends to make optimum use of personnel, funds and other corporate resources across the chain from R&D to marketing so as to create new businesses and strengthen targeted businesses. An all-out effort will also be made to reduce costs, implement sweeping structural reforms and establish robust high profit structure.

The Company recently announced its corporate strategy for the future. The new strategy is directed to the building of a solid high-profit structure, implementing thorough business management of each business group, promoting collaborations with a various partners, and putting strong focus on products and services matched to market needs and requirements.

The management team hopes that it will continue to receive your understanding and support.

November 2006

Etsuhiko Shoyama
Chairman

Kazuo Furukawa
President

Table of Contents

Outline of Business Results

Information & Telecommunication Systems

Segment revenues rose 9% from the same period of the preceding year, to JPY1,147.8 billion thanks to strong performance by the outsourcing services business and solutions business, and an advance by the storage business. Operating income fell 40% from a year earlier, to JPY13.8 billion, despite a smaller loss in the hard disk drives, chiefly as a result of investment in product development.

Electronic Devices

Segment revenues increased 11% from the same period of the preceding year, to JPY645.9 billion, and operating income rose 161%, to JPY24.0 billion. The advances are due to growth of Hitachi High-Technologies Corporation and in liquid-crystal displays business.

Power & Industrial Systems

Segment revenues came to JPY1,280.8 billion, substantially unchanged from the same period of the preceding year. Although automotive products and elevators and escalators showed good performance and Hitachi Construction Machinery Co., Ltd. also fared well, revenues were pushed down by the fact that sales of the former Hitachi Air Conditioning Systems Co., Ltd. were credited to Digital Media & Consumer Products starting from the half-year period under review and a decline in power business. The segment recorded an operating loss of JPY45.3 billion caused mainly by power plant repair expenses.

Digital Media & Consumer Products

Segment revenues were up 24% from the same period of the preceding year, to JPY758.7 billion. It was mainly because the revenues of the former Hitachi Air Conditioning Systems Co., Ltd. being stated as revenues of Digital Media & Consumer Products because of the merger of this company with Hitachi Home & Life Solutions Inc. Stronger performance by flat panel TVs made an additional contribution. The segment posted an operating loss of JPY34.4 billion attributable to an increase in flat panel TVs marketing-related investments and poor showings by DVD recorders and household air-conditioners.

High Functional Materials & Components

Segment revenues increased 14% from the same period of the preceding year, to JPY870.2 billion. The improvement was driven primarily by strong gains posted by Hitachi Chemical Co., Ltd., particularly in electronics related business, good results from Hitachi Metals, Ltd., particularly in automotive related products, and improved sales at Hitachi Cable, Ltd. Three main companies of the segments, Hitachi Chemical Co., Ltd., Hitachi Metals, Ltd. and Hitachi Cable, Ltd., all increased in operating income as a result of the increased sales and the effect of cost reductions. Consequently, segment operating income was up 33%, to JPY63.8 billion.

Logistics, Services & Others

Segment revenues rose 7% from the same period of the preceding year, to JPY610.9 billion, mostly on the strength of good performance by Hitachi Transport System, Ltd., especially in third-party logistics services that respond to the needs of customers outsourcing all of their distribution-related activities. Buoyed by higher revenues at Hitachi Transport System, Ltd. and other service company in Japan, operating income increased 16%, to JPY7.9 billion.

Financial Services

Segment revenues were up 1% from the same period of the preceding year, to JPY263.6 billion. The rise in revenues was produced by higher revenues at Hitachi Capital Corporation. Operating income decreased 2%, to JPY15.7 billion.
