LAKE SHORE BANCORP, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Lake Shore Bancorp, Inc. (the Company) was formed on April 3, 2006 to serve as the stock holding company for Lake Shore Savings Bank (the Bank) as part of the Bank's conversion and reorganization from a New York-chartered mutual savings and loan association to the federal mutual holding company form of organization.

The interim financial statements included herein as of September 30, 2008 and for the three and nine months ended September 30, 2008 and 2007 have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC), and therefore, do not include all information or footnotes necessary for a complete presentation of financial condition, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. The balance sheet at December 31, 2007 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of such information. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the audited consolidated financial statements included in the Company's Form 10-K for the year ended December 31, 2007. The results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of the results for any subsequent period or the entire year ending December 31, 2008.

To prepare these financial statements in conformity with generally accepted accounting principles, management of the Company made a number of estimates and assumptions relating to the reporting of assets and liabilities and the reporting of revenue and expenses. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, securities valuation estimates, and income taxes.

NOTE 2 DERIVATIVE INSTRUMENTS

In August 2006, the Company entered into a derivative contract as part of its risk management strategy to protect against market fluctuations in interest rates. An interest rate floor was purchased for \$221,000 to protect against a decline in the prime rate earned on a \$10 million notional amount of adjustable rate loans within our loan portfolio. The term of the interest rate floor product is 60 months. The Company follows Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended, to account for this transaction. SFAS No. 133 requires an entity to recognize all derivatives as either assets or liabilities on the balance sheet and measure those instruments at fair value. Changes in the fair value of derivatives must be recognized in earnings when they occur, unless the derivatives qualify as a hedge. If a derivative qualifies as a hedge, a company can elect to use hedge accounting to eliminate or reduce income statement volatility that would arise from reporting changes in a derivative's fair value in income. The Company did not elect to use hedge accounting for this transaction. The interest rate floor is recorded in Other Assets on the Consolidated Statement of Financial Condition and the change in fair value is recorded in Loan Interest Income on the Consolidated Statement of Operations. As of September 30, 2008 and 2007, the fair market value of the interest rate floor was \$685,000 and \$295,000, respectively, resulting in \$166,000 of interest income for the nine months ended September 30, 2008 and \$75,000 of interest expense for the nine months ended September 30, 2007. During the quarter ended September 30, 2008 and 2007, \$102,000 and \$176,000, respectively, of interest income was recorded for the increase in the fair market value of the interest rate floor.

Table of Contents

NOTE 3 ADOPTION OF NEW ACCOUNTING STANDARDS

The Company adopted FASB Statement No. 157 Fair Value Measurements (SFAS 157) effective January 1, 2008, for financial assets and liabilities that are measured and reported at fair value. There was no impact from the adoption of SFAS 157 on the amounts reported in the consolidated financial statements. The primary impact of SFAS 157 on the Company was to expand required disclosures pertaining to the methods used to determine fair values. See Note 9 for further details.

NOTE 4 RECENT ACCOUNTING PRONOUNCEMENTS

In December 2007, the FASB issued Statement No. 141 (R), Business Combinations. This statement establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. This new pronouncement will impact the Company's accounting for business combinations completed beginning January 1, 2009.

In March 2008, the FASB issued Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133 (Statement 161). Statement 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contained within derivatives. Statement 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 has been applied, and the impact that hedges have on an entity's financial position, financial performance, and cash flows. Statement 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In April 2008, the FASB issued FSP FAS 142-3, Determination of the Useful Life of Intangible Assets. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, Goodwill and Other Intangible Assets (SFAS 142). The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141R and other GAAP. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008 and interim periods within those fiscal years. Early adoption is prohibited. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles. This Statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements. This Statement is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities. This FSP clarifies that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in

Table of Contents

undistributed earnings with common shareholders. Awards of this nature are considered participating securities and the two-class method of computing basic and diluted earnings per share must be applied. This FSP is effective for fiscal years beginning after December 15, 2008. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In October 2008, the FASB issued FSP SFAS No. 157-3, Determining the Fair Value of a Financial Asset When The Market for That Asset Is Not Active (FSP 157-3), to clarify the application of the provisions of SFAS 157 in an inactive market and how an entity would determine fair value in an inactive market. FSP 157-3 is effective immediately and applies to our September 30, 2008 financial statements. The application of the provisions of FSP 157-3 did not have any affect on our results of operations or financial condition as of and for the periods ended September 30, 2008.

NOTE 5 OTHER COMPREHENSIVE INCOME (LOSS)

Accounting principles generally require that recognized revenue, expenses, gains, and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities, are reported as a separate component of the stockholders' equity section of the consolidated statement of financial condition, such items, along with net income, are components of comprehensive income (loss).

The components of other comprehensive income (loss) and related tax effects for the three and nine months ended September 30, 2008 and 2007 are as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
	(In Thousands)			
Unrealized holding gains (losses) on securities available for sale	\$ (1,476)	\$ 1,097	\$ (3,246)	\$ 303
Reclassification adjustment related to impairment charge for losses included in net income			1,732	
Net Unrealized Gains (Losses)	(1,476)	1,097	(1,514)	303
Income tax benefit (expense)	546	(406)	560	(113)
Other Comprehensive Income (Loss)	\$ (930)	\$ 691	\$ (954)	\$ 190

NOTE 6 EARNINGS PER SHARE

Earnings per share is calculated for the three and nine month periods ended September 30, 2008 and 2007, respectively. Basic net income per share is based upon the weighted average number of common shares outstanding, while diluted net income per share is based upon the weighted average number of common shares outstanding and common share equivalents that would arise from the exercise of dilutive securities.

The difference between the common shares issued and the common shares outstanding, for the purposes of calculating basic earnings per share, is a result of the unallocated shares held by the Company's employee stock ownership plan (the ESOP) and shares of restricted stock. The Company utilized \$2.6 million to extend a loan to the ESOP and the ESOP used such proceeds to purchase 238,050 shares of stock on the open market at an average price of \$10.70 per share, plus commission expenses. As a result of the purchase of shares by the ESOP, total stockholders equity of the Company was reduced by \$2.6 million.

Table of Contents

Basic and diluted earnings per share was calculated as follows:

	Three Months ended September 30, 2008	Three Months ended September 30, 2007
Numerator net income	\$ 867,000	\$ 542,000
Denominators:		
Basic weighted average shares outstanding	6,038,436	6,115,226
Increase in weighted average shares outstanding due to: (1)		
Stock options		
Unvested restricted stock awards		
Diluted shares outstanding	6,038,436	6,115,226
Earnings per share:		
Basic	\$ 0.14	\$ 0.09
Diluted	\$ 0.14	\$ 0.09
	Nine Months ended September 30, 2008	Nine Months ended September 30, 2007
Numerator net income	\$ 599,000	\$ 1,143,000
Denominators:		
Basic weighted average shares outstanding	6,066,524	6,126,389
Increase in weighted average shares outstanding due to: (1)		
Stock options		
Unvested restricted stock awards		
Diluted shares outstanding	6,066,524	6,126,389
Earnings per share:		
Basic	\$ 0.10	\$ 0.19
Diluted	\$ 0.10	\$ 0.19

- (1) Stock options to purchase 219,289 shares under the Stock Option Plan at \$11.50 and to purchase restricted unvested shares of 92,425 under the RRP plan were outstanding during the nine month period ended September 30, 2008, but were not included in the calculation of diluted earnings per share because to do so would have been anti-dilutive. Stock options to purchase 241,546 shares under the Stock Option Plan at \$11.50 and to purchase restricted unvested shares of 106,081 under the RRP plan were outstanding during the nine month period ending September 30, 2007, but were not included in the calculation of diluted earnings per share because to do so would have been anti-dilutive.

Table of Contents**NOTE 7 COMMITMENTS TO EXTEND CREDIT**

The Company has commitments to extend credit with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance sheet instruments.

The following commitments to extend credit were outstanding:

	Contract Amount	
	September 30, 2008	December 31, 2007
	(In Thousands)	
Commitments to grant loans	\$ 7,856	\$ 5,037
Unfunded commitments under lines of credit	\$ 25,679	\$ 21,256

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer. At September 30, 2008 and December 31, 2007, the Company's fixed rate loan commitments totaled \$6.4 million and \$3.7 million, respectively. The range of interest rates on these fixed rate commitments was 5.63% to 8.25% at September 30, 2008.

NOTE 8 STOCK-BASED COMPENSATION

As of September 30, 2008, the Company had three stock-based compensation plans, which are described below. The Company accounts for the fair value of its grants under those plans in accordance with SFAS 123R, Share Based Payment. The compensation cost that has been charged under salary and benefits expense in the other non-interest expense section of the consolidated statements of operations for these plans was \$92,000 for the three months ended September 30, 2008 and \$99,000 for the three months ended September 30, 2007. The compensation cost that has been charged under salary and benefits expense in the other non-interest expense section of the consolidated statements of operations for these plans for the nine month periods ended September 30, 2008 and September 30, 2007 was \$275,000 and \$301,000, respectively.

Stock Option Plan

The Company's 2006 Stock Option Plan (the "Stock Option Plan"), which was approved by the Company's shareholders, permits the grant of options to its employees and non-employee directors for up to 297,562 shares of common stock. On November 15, 2006, the Board of Directors granted stock options exercisable into 241,546 shares of common stock to members of management and non-employee directors. Both incentive stock options and non-qualified stock options may be granted under the Stock Option Plan. The exercise price of each stock option equals the market price of the Company's stock on the date of grant and the maximum term is ten years. The stock options generally vest over a five year period.

Table of Contents

The fair value of each stock option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions: dividend yield of 1.04%; expected volatility of 9.64%; risk-free interest rate of 4.617%; and expected life of 10 years.

A summary of the status of the Stock Option Plan as of September 30, 2008 and 2007 is presented below:

	September 30, 2008			September 30, 2007		
	Options	Exercise Price	Remaining Contractual Life	Options	Exercise Price	Remaining Contractual Life
Outstanding at beginning of year	241,546	\$ 11.50		241,546	\$ 11.50	
Granted						
Forfeited	22,257	\$ 11.50				
Outstanding at end of quarter	219,289	\$ 11.50	8 years	241,546	\$ 11.50	9 years
Options exercisable at end of quarter	48,319	\$ 11.50				
Fair value of options granted	\$ 3.27			\$ 3.27		

At September 30, 2008, stock options outstanding did not have an intrinsic value (as the stock price on that date was below the exercise price) and 78,273 options remained available for grant under the Stock Option Plan. Compensation expense amounted to \$36,000 for the three months ended September 30, 2008 and \$35,000 for the three months ended September 30, 2007 based on the vesting of 10,746 and 10,793 stock options earned respectively, through those dates. Compensation expense amounted to \$105,000 for the nine months ended September 30, 2008 and 2007 based on the vesting of 32,003 and 32,017 options, respectively, through those dates. At September 30, 2008, \$454,000 of unrecognized compensation cost related to stock options is expected to be recognized over a period of 39 months.

Recognition and Retention Plan

The Company's 2006 Recognition and Retention Plan (the "RRP"), which was approved by the Company's shareholders, permits the grant of restricted stock awards to employees and non-employee directors for up to 119,025 shares of common stock. On November 15, 2006, the Board of Directors granted awards for an aggregate of 83,305 shares under the RRP to members of management and non-employee directors. Awards vest at a rate of 20% per year with the first vesting period ended December 31, 2007. The fair value of the awards on the grant date was \$11.50. As of September 30, 2008, there were 16,665 shares vested and distributed to eligible participants. Compensation expense amounted to \$38,000 for the three months ended September 30, 2008 and \$43,000 for the three months ended September 30, 2007 based on the vesting of 3,336 and 3,721 shares, respectively. Compensation expense amounted to \$114,000 for the nine months ended September 30, 2008 and \$127,000 for the nine months ended September 30, 2007 based on the vesting of 9,935 shares and 11,042 shares, respectively through these dates. At September 30, 2008, \$496,000 of unrecognized compensation cost related to the RRP is expected to be recognized over a period of 39 months.

Employee Stock Ownership Plan

The Company established the ESOP for the benefit of eligible employees of the Company and Bank. All Company and Bank employees meeting certain age and service requirements are eligible to participate in

Table of Contents

the ESOP. Participants' benefits become fully vested after five years of service. As of September 30, 2008, there were 15,870 allocated shares and 222,180 unallocated shares compared to 7,935 allocated shares and 230,115 unallocated shares at September 30, 2007. The ESOP compensation expense was \$18,000 for the three months ended September 30, 2008 and \$21,000 for the three months ended September 30, 2007 based on 1,984 shares earned. The ESOP compensation expense was \$56,000 and \$70,000, respectively, for the nine months ended September 30, 2008 and 2007 based on 5,951 shares earned.

NOTE 9 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the income tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in these estimates.

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument, including judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates as provided by the Company's custodial agent and investment advisor. Prices obtained from these sources include market quotations.

As discussed in Note 3, the Company adopted SFAS 157 effective January 1, 2008. SFAS 157 established a fair value hierarchy that prioritized the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). Immediately following its publication, the Company applied the provisions of FSP SFAS No. 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active.

The three levels of the fair value hierarchy under SFAS 157 are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date of identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported with little or no market activity).

An asset or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Table of Contents

For assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used are as follows:

	Fair Value Measurements at September 30, 2008			
	September 30, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Securities available for sale	\$ 104,702	\$	\$ 104,702	\$
Interest rate floor	685		685	
Total	\$ 105,387	\$	\$ 105,387	\$

Nonrecurring Fair Value Changes

We may be required to measure certain other financial assets at fair value on a nonrecurring basis. These adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets. The Level 3 disclosures shown below represent the carrying value of loans for which adjustments are primarily based on the appraised value of collateral or the present value of expected future cash flows, which often results in significant management assumptions and input with respect to the determination of fair value. There were no realized or unrealized gains or losses relating to Level 3 financial assets and liabilities measured on a nonrecurring basis for the nine months ended September 30, 2008.

	Fair Value Measurements Nonrecurring at September 30, 2008			
	September 30, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Impaired loans	\$ 79	\$	\$	\$ 79

Impaired loans, which are measured using the fair value of the collateral for collateral-dependent loans, had a carrying amount of \$107,000, with a valuation allowance of \$28,000, resulting in additional provision for loan losses of \$7,000 for the nine months ended September 30, 2008.

The Company's adoption of SFAS 157 applies only to its financial instruments required to be reported at fair value. The adoption does not apply to those non-financial assets and non-financial liabilities for which the adoption was delayed until January 1, 2009 in accordance with FSP FAS 157-2.

Fair value methods and assumptions are set forth below for each type of financial instrument.

Securities available for sale

Fair value on available for sale securities were based upon a market approach. Securities which are fixed income instruments that are not quoted on an exchange, but are traded in active markets, are valued using prices obtained from our custodian, which used third party data service providers.

Management evaluated the Company's investment portfolio and determined that a \$1.7 million other than temporary impairment existed on four non-agency, asset-backed securities. The impairment of these securities was considered to be other than temporary due to recent developments in the financial

Table of Contents

condition and near-term prospects of the issuers or insurers backing the securities, a downturn of economic conditions in the financial services industry and deteriorating book values of these securities.

The impairment charge represents a write down of these securities to their fair market value as of June 30, 2008 and was recognized in earnings during the second quarter of 2008. Management will continue to evaluate the value of these investments and make any necessary adjustments as conditions dictate.

Interest rate floor

The carrying amount of the interest rate floor approximates fair value. Fair value of the interest rate floor is provided by a third party and is derived from proprietary models based upon well recognized financial principles and reasonable estimates about relevant future market conditions. Interest rate floor products are not actively traded, and fair market values do not indicate potential amount received if sold.

Impaired loans

Fair value on impaired loans is based on recent appraisal of related collateral and current market conditions.

NOTE 10 TREASURY STOCK

During the quarter ended September 30, 2008, the Company repurchased 36,000 shares of common stock at an average cost of \$9.17 per share. The 36,000 shares were repurchased pursuant to the Company's publicly announced common stock repurchase programs. As of September 30, 2008, there were 119,541 shares remaining to be repurchased under the existing stock repurchase program.

NOTE 11 SUBSEQUENT EVENTS

On October 16, 2008, the Board of Directors declared a quarterly dividend of \$0.05 per share on the Company's common stock, payable on November 14, 2008 to shareholders of record as of October 30, 2008. Lake Shore, MHC, which owns 57.4% of the Company's outstanding common stock elected to waive its right to receive cash dividends of approximately \$182,000 for the three month period ended September 30, 2008 and \$509,000 for the nine month period ended September 30, 2008. Lake Shore, MHC has waived approximately \$1,090,000 of cash dividends cumulatively as of September 30, 2008. The dividends waived by Lake Shore, MHC are considered a restriction on the retained earnings of the Company.

On October 16, 2008, the Company also announced that an agreement with First Niagara Financial Group was executed to purchase the former Greater Buffalo Savings Bank branch office (building and land) located on Delaware Avenue in Kenmore, New York for \$1.3 million. The Company currently anticipates that the new branch will open on December 1, 2008. This will be the 9th branch location for Lake Shore Savings Bank.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may be identified by words such as believe, will, expect, project, may, could, anticipate, estimate, in targets and similar expressions. These statements are based upon our current beliefs and expectations and are subject to significant risks and uncertainties. Actual results may differ materially from those set forth in the forward-looking statements as a result of numerous factors.

The following factors, including the factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2007, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in our forward-looking statements:

general and local economic conditions;

changes in interest rates, deposit flows, demand for mortgages and other loans, real estate values and competition;

the ability of our customers to make loan payments;

our ability to continue to control costs and expenses;

our ability to effectively deploy the capital raised in our April 2006 initial public offering;

changes in accounting principles, policies or guidelines;

our success in managing the risks involved in our business;

inflation, and market and monetary fluctuations;

changes in legislation or regulation; and

other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services.

Any or all of our forward-looking statements in this Quarterly Report on Form 10-Q and in any other public statements we make may differ from actual outcomes. They can be affected by inaccurate assumptions we might make or known or unknown risks and uncertainties. Consequently, no forward-looking statements can be guaranteed. We undertake no obligation to publicly update any forward looking statement, whether as a result of new information, future events or otherwise.

Overview

The following discussion and analysis is presented to assist in the understanding and evaluation of our consolidated financial condition and results of operations. It is intended to complement the unaudited consolidated financial statements and notes thereto appearing elsewhere in this Form 10-Q and should be read in conjunction therewith. The detailed discussion focuses on our consolidated financial condition as of

Edgar Filing: Lake Shore Bancorp, Inc. - Form 10-Q

September 30, 2008 compared to the financial condition as of December 31, 2007 and the consolidated results of operations for the three and nine months ended September 30, 2008 and 2007.

Table of Contents

Our results of operations depend primarily on our net interest income, which is the difference between the interest income we earn on loans and investments and the interest we pay on deposits and other interest-bearing liabilities. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rates we earn or pay on these balances.

Our operations are also affected by non-interest income, such as service fees and gains and losses on the sales of securities and loans, our provision for loan losses and non-interest expenses, which include salaries and employee benefits, occupancy costs, and other general and administrative expenses.

Financial institutions like us are significantly affected by economic conditions, competition, and the monetary and fiscal policies of the federal government. Lending activities are influenced by the demand for and supply of housing, competition among lenders, interest rate conditions, and funds availability. Our operations and lending are principally concentrated in the Western New York area, and our operations and earnings are influenced by local economic conditions. Deposit balances and cost of funds are influenced by prevailing market rates on competing investments, customer preferences, and levels of personal income and savings in our primary market area.

Management Strategy

Our Reputation. With more than 117 years of service to our community, our primary management strategy has been to maintain our reputation as one of the most respected and recognized community banks in Western New York. We strive to accomplish this goal by continuing to emphasize our high quality customer service and financial strength. We are one of the largest lenders in market share of residential mortgages in Chautauqua County.

Branching. In 2003, we opened branch offices in Orchard Park and East Amherst, New York. These offices have generated deposits of \$34.6 million and \$26.6 million as of September 30, 2008, respectively. We also opened a branch office in Hamburg, New York in December 2005, which has generated deposits of \$15.4 million as of September 30, 2008. Our offices are located in Dunkirk, Fredonia, Jamestown, Lakewood and Westfield, in Chautauqua County, New York and in East Amherst, Hamburg and Orchard Park in Erie County, New York. We plan on opening a new branch office in Kenmore, New York in December 2008. Saturation of the market in Chautauqua County led to our expansion plan in Erie County, which is a critical component of our future profitability and growth.

Our People. A large part of our success is related to customer service and customer satisfaction. Having employees who understand and value our clientele and their business is a key component to our success. We believe that our employees constitute one of our competitive strengths. Thus, the retention of such persons and our ability to continue to attract high quality personnel are high priorities.

Residential Mortgage and Other Lending. Historically, our lending portfolio has been composed predominantly of residential mortgage loans. At September 30, 2008 and December 31, 2007, we held \$172.2 million and \$157.8 million of residential mortgage loans, respectively, which constituted 73.9% and 72.4% of our total loan portfolio, at such respective dates. We also originate commercial real estate loans to finance the purchase of real property, which generally consists of developed real estate. At September 30, 2008 and December 31, 2007, our commercial real estate loan portfolio consisted of loans totaling \$19.1 million and \$20.4 million respectively, or 8.2% and 9.4%, respectively, of total loans. In addition to commercial real estate loans, we also engage in small business commercial lending, including business installment loans, lines of credit, and other commercial loans. At September 30, 2008 and December 31, 2007, our commercial loan portfolio consisted of loans totaling \$7.2 million and \$8.2 million, respectively, or 3.1% and 3.8%, respectively, of total loans. Other loan products offered to our customers include home equity loans, construction loans and consumer loans, including auto loans, overdraft lines of credit and share loans. We will sell loans when appropriate and will retain servicing rights to those loans. We will invest excess funds in permissible investments such as mortgage-backed securities and asset-backed securities, when such investment opportunities are prudent. Residential mortgage loans will continue to be the dominant type of loan in our lending portfolio.

Table of Contents

Investment Strategy. Our investment policy is designed primarily to manage the interest rate sensitivity of our assets and liabilities, to generate a favorable return without incurring undue interest rate and credit risk, to complement our lending activities and to provide and maintain liquidity within established guidelines. At September 30, 2008 and December 31, 2007, our investment securities totaled \$107.7 million and \$109.0 million, respectively.

Treasury Yield Curve. As with all community banks, we face a challenge in monitoring our interest rate risk. Banks generate revenue on the difference between the interest earned on loans, which are generally for longer terms, and the interest paid on deposits, which are generally for shorter terms. This mismatch between shorter term deposits and longer term loans usually produces a positive contribution to earnings because the yield curve is normally positively sloped. As of December 31, 2006, the treasury yield curve was inverted, with the federal funds rate and short-term treasury bill rates higher than rates on long-term treasury bills. On July 1, 2007, the yield curve was virtually flat at 5%. During the remainder of 2007 and in 2008, the Federal Reserve cut the federal funds rate 8 times and as of September 30, 2008, the federal funds rate was 1.50%. During 2008, there have been unprecedented dislocations in the markets including the failure of large investment banks, the conservatorship of FNMA/FHLMC, a global liquidity crisis, continuing housing market declines and an ongoing credit crisis with financial institutions. In response, there have been coordinated global initiatives and significant injections of capital and liquidity into the capital markets and financial institutions. These actions have caused the yield curve to shift down. Rates on short-term treasury bills and rates on intermediate-term treasury bills have dropped significantly. As a result, the yield curve now has a positive slope. For example, the yield on the two year Treasury note declined from 3.98% as of September 30, 2007 to 1.96% as of September 30, 2008. The yield on the 10 year Treasury note declined from 4.59% as of September 30, 2007 to 3.82% as of September 30, 2008. However, because of credit concerns over mortgage related securities, the yield spread for mortgage securities widened over Treasury bonds. For example, on September 30, 2007, we offered a 30 year fixed rate mortgage at 6.375%. On September 30, 2008, the rate we offered on this loan type was 6.25%, a decline of only 12.5 basis points. Given the changes to the treasury yield curve and spread relationships, our net interest margin could improve if our funding costs decline and if interest rates on loans remain relatively unchanged.

Interest Rate Risk. Our strategy to improve interest income was to increase our interest rate risk exposure. To mitigate the risk of falling interest rates on our adjustable rate home equity and commercial loans, we purchased an interest rate floor product during August 2006 on a notional principal amount of \$10 million. This product allows us to receive payments if the prime rate drops below 8%. The prime rate as of September 30, 2008 was 5%. As a result, we now receive payments on the interest rate floor product, which will partially offset the expected reduction in loan interest income on adjustable rate loans that are tied to the prime rate. The interest rate floor expires on August 11, 2011. Refer to Note 2 in the Notes to our Consolidated Financial Statements for more information.

We believe that the cumulative impact of the strategies we elected to pursue have protected us from having a more severe exposure to falling interest rates. We believe that our current capital position and success in the core banking services of lending and deposits will result in sustained earnings going forward.

We employ a third party financial advisor to assist us in managing our investment portfolio and developing balance sheet strategies. At September 30, 2008 and December 31, 2007, we had \$104.7 and \$105.9 million, respectively, invested in securities available for sale, the majority of which are mortgage-backed, collateralized mortgage obligations (CMOs) and municipal securities. We do not own any collateralized debt obligations (CDOs) or structured investment vehicles (SIVs).

Table of Contents

Critical Accounting Policies

It is management's opinion that accounting estimates covering certain aspects of our business have more significance than others due to the relative importance of those areas to overall performance, or the level of subjectivity required in making such estimates. Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the uncertainty in evaluating the level of the allowance for loan losses required for probable credit losses and the material effect that such judgments can have on the results of operations. Management's quarterly evaluation of the adequacy of the allowance considers our historical loan loss experience, review of specific loans, current economic conditions, and such other factors considered appropriate to estimate loan losses. Management uses presently available information to estimate probable losses on loans; however, future additions to the allowance may be necessary based on changes in estimates, assumptions, or economic conditions. Significant factors that could give rise to changes in these estimates include, but are not limited to, changes in economic conditions in the local area, concentrations of risk and decline in local property values.

Our evaluation of risk in maintaining the allowance for loan losses includes the review of all loans on which the collectibility of principal may not be reasonably assured. We consider the following factors as part of this evaluation: historical loan loss experience, payment status, the estimated value of the underlying collateral, loans originated in areas outside of the historic market area for loan activity, trends in loan volume, and national and local economic conditions. There may be other factors that may warrant consideration in maintaining an allowance at a level sufficient to provide for probable loan losses. Although our management believes that it has established and maintained the allowance for loan losses to reflect losses inherent in our loan portfolio, based on its evaluation of the factors noted above, future additions may be necessary if economic and other conditions differ substantially from the current operating environment.

The allowance consists of allocated, general and unallocated components. The allocated component relates to loans that are classified as doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value for that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Management also considers the accounting policy relating to the evaluation of impairment of investments to be a critical accounting policy due to the subjectivity and judgment involved and the material effect an impairment loss could have on the results of operations. A decline in the fair value of investments below cost deemed to be other than temporary is charged to earnings resulting in the establishment of a new cost basis for an asset. Management continually reviews the current value of its investments for evidence of other than temporary impairment.

These critical policies and their application are reviewed periodically by our Audit Committee and our Board of Directors. All accounting policies are important, and as such, we encourage the reader to review each of the policies included in the notes to the consolidated financial statements of our audited consolidated financial statements included in Form 10-K for the year ended December 31, 2007 to better understand how our financial performance is reported.

Other than Temporary Impairment

With the continued disruption of the securities and housing markets, we found it necessary to write down four asset-backed securities in our investment portfolio during the second quarter of 2008. The write-down

Table of Contents

resulted in a pre-tax loss of \$1.7 million (\$1.3 million, net of tax), which was recorded in the Other Non-interest Income section of the consolidated statements of operations. The securities were rated AAA by the major rating agencies when purchased. Three of the securities are collateralized by second lien home equity loans to prime borrowers. Since the collateral was on a second lien position, these securities were wrapped by an insurance guarantee issued by Financial Guaranty Insurance Co. (FGIC). FGIC also wrapped other mortgage-backed and asset-backed securities. As a result of FGIC's exposure to the sub-prime housing market and inability to raise additional capital, the major rating agencies downgraded FGIC. As a result of FGIC's downgrade, the major rating agencies downgraded the ratings on these securities and the fair market value of these securities experienced significant declines. The fourth security is backed by first lien residential mortgages to sub-prime borrowers. The majority of the mortgages are adjustable rate loans. The security now has a mix of ratings including several at the AAA level. However, the fair market value of the security has declined significantly. The price declines, current accounting rules and associated SEC guidance contributed to management's determination that the impairment on these securities was other-than-temporary. It should be noted that all these securities continue to make payments in accordance with their terms as of September 30, 2008.

Analysis of Net Interest Income

Net interest income represents the difference between the interest we earn on our interest-earning assets, such as mortgage loans and investment securities, and the expense we pay on interest-bearing liabilities, such as time deposits. Net interest income depends on both the volume of our interest-earning assets and interest-bearing liabilities and the interest rates we earn or pay on them.

Average Balances, Interest and Average Yields. The following table sets forth certain information relating to our average balance sheets and reflects the average yield on interest-earnings assets and average cost of interest-bearing liabilities, interest earned and interest paid for the periods indicated. Such yields and costs are derived by dividing annualized income or expense by the average balance of interest-earning assets or interest-bearing liabilities, respectively, for the periods presented. Average balances are derived from daily balances over the periods indicated. The average balances for loans are net of allowance for loan losses, but include non-accrual loans. Interest income on securities does not include a tax equivalent adjustment for bank qualified municipals.

Table of Contents

	At September 30, 2008		For the Three Months ended September 30, 2008			For the Three Months ended September 30, 2007		
	Actual Balance	Yield/ Rate	Average Balance	Income/ Expense	Yield/ Rate	Average Balance	Income/ Expense	Yield/ Rate
	Interest (Dollars in thousands)

Our earnings may be adversely impacted by an increase in interest rates because the majority of our interest-earning assets are long-term, fixed rate mortgage-related assets that will not reprice as long-term interest rates increase. Conversely, a majority of our interest-bearing liabilities have much shorter contractual maturities and are expected to reprice. A significant portion of our deposits have no contractual maturities and are

Edgar Filing: Lake Shore Bancorp, Inc. - Form 10-Q

likely to reprice quickly as short-term interest rates increase. Therefore, in an increasing rate environment, our cost of funds is expected to increase more rapidly than the yields earned on our loan portfolio and securities portfolio. An increasing rate environment is expected to cause a further narrowing of our net interest rate spread and a decrease in our earnings.

Table of Contents

However, beginning September 2007, interest rates began to decrease. In a decreasing interest rate environment, our earnings may increase if long-term interest-earning assets do not reprice and interest rates on short-term deposits begin to decrease.

For the three months ended September 30, 2008, the average yield on our loan portfolio and investment portfolio was 6.26% and 4.77%, respectively, in comparison to rates of 6.63% and 4.50%, respectively, for the three months ended September 30, 2007. The decrease in yield on the loan portfolio was impacted by \$102,000 of income earned on the interest rate floor product during the three month period ended September 30, 2008 as compared to income of \$176,000 during the same three month period in 2007. This income is reflected in loan interest income. Overall the average yield on our interest earning assets has decreased by 0.29% for the three months ended September 30, 2008 in comparison to the three months ended September 30, 2007. For the three months ended September 30, 2008, the average rate that we were paying on deposit products decreased by 0.54% in comparison to the same period in the prior year. Furthermore, the interest paid on our borrowings had decreased from 4.53% to 3.98%. Our interest rate spread for the three months ended September 30, 2008 was 2.77%, which was a 0.24% increase in comparison to the three months ended September 30, 2007. Our net interest margin was 3.19% and 3.05% for the three months ended September 30, 2008 and 2007, respectively.

For the nine months ended September 30, 2008, the average yield on our loan and investment portfolios was 6.26% and 4.70%, respectively, in comparison to rates of 6.31% and 4.51%, respectively, for the nine months ended September 30, 2007. Overall, the average yield on our interest earning assets has decreased by 0.03% for the nine months ended September 30, 2008 in comparison to the nine months ended September 30, 2007. For the nine months ended September 30, 2008, the average rate that we were paying on deposit products had decreased by 0.31% in comparison with the same period in the prior year. Furthermore, the interest paid on our borrowings had decreased from 4.44% to 3.99%. Our interest rate spread for the nine months ended September 30, 2008 was 2.62% which was a 0.26% increase in comparison to the nine months ended September 30, 2007. Our net interest margin was 3.08% and 2.86% for the nine months ended September 30, 2008 and 2007, respectively.

Comparison of Financial Condition at September 30, 2008 and December 31, 2007

Total assets at September 30, 2008 were \$388.3 million, an increase of \$30.5 million, from \$357.8 million at December 31, 2007. The increase in total assets from December 31, 2007 is attributable to an increase of \$14.6 million in cash and cash equivalents and an increase of \$14.9 million in loans receivable, net.

Cash and cash equivalents increased by \$14.6 million, from \$10.1 million as of December 31, 2007 to \$24.7 million as of September 30, 2008. The increase is attributable to a \$13.1 million increase in federal funds sold. Federal funds sold increased due to an increase in deposits of \$34.4 million from December 31, 2007 to September 30, 2008. As of September 30, 2008, a portion of the deposit growth had not yet been utilized for loan proceeds or invested in available for sale securities.

Securities available for sale decreased by \$1.2 million to \$104.7 million at September 30, 2008 from \$105.9 million at December 31, 2007. The reduction is due to the receipt of principal payments of \$14.7 million partially offset by purchases of \$16.6 million and a \$1.7 million other than temporary impairment write-down in the second quarter of 2008. Management determined that four non-agency asset-backed securities were other than temporarily impaired during the second quarter of 2008 which resulted in a \$1.7 million write-down before taxes (\$1.3 million, net of tax). See Other than Temporary Impairment above.

Table of Contents

Loans receivable, net increased by \$14.9 million, or 6.8%, to \$233.6 million at September 30, 2008 from \$218.7 million at December 31, 2007. The table below shows the changes in loan volume by loan type between December 31, 2007 and September 30, 2008:

	September 30, 2008	December 31, 2007 (in thousands)	Change \$	%
Real Estate Loans:				
Residential, 1-4 Family	\$ 172,179	\$ 157,834	\$ 14,345	9.1%
Home Equity	26,908	26,569	339	1.3%
Commercial	19,056	20,394	(1,338)	(6.6)%
Construction	5,072	2,775	2,297	82.8%
Total Real Estate Loans	223,215	207,572	15,643	7.5%
Commercial Loans	7,210	8,246	(1,036)	(12.6)%
Consumer Loans	2,449	2,306	143	6.2%
Total Gross Loans	232,874	218,124	14,750	6.8%
Allowance for Loan Losses	(1,412)	(1,226)	(186)	15.2%
Net deferred loan costs	2,180	1,813	367	20.2%
Loans receivable, net	\$ 233,642	\$ 218,711	\$ 14,931	6.8%

The increase in residential mortgage lending is attributable to an increase in loan applications received and approved for construction or purchase of new and existing homes during the nine month period ended September 30, 2008. Residential mortgage loans and commercial real estate loans represented 73.9% and 8.2%, respectively, of the loan portfolio at September 30, 2008. We do not carry any sub-prime loans in our loan portfolio.

The table below shows changes in deposit volumes by type of deposit between December 31, 2007 and September 30, 2008:

	September 30, 2008	December 31, 2007 (in thousands)	Change \$	%
Demand Deposits:				
Non-interest bearing	\$ 21,967	\$ 19,321	\$ 2,646	13.7%
Interest bearing	34,843	37,934	(3,091)	(8.1)%
Money market	23,324	23,202	122	0.5%
Savings	28,681	25,282	3,399	13.4%
Time deposits	166,424	135,089	31,335	23.2%
Total Deposits	\$ 275,239	\$ 240,828	\$ 34,411	14.3%

The overall increase in savings accounts is primarily attributable to new commercial customers. The increase in time deposits is attributable to our ability to offer or match competitive interest rates in our market area.

Our borrowings, consisting of advances from the Federal Home Loan Bank of New York, decreased to \$53.7 million as of September 30, 2008 from \$56.4 million at December 31, 2007. Short-term borrowings decreased \$15.9 million, from \$18.5 million at December 31, 2007, to \$2.7 million at September 30, 2008, while long-term debt increased \$13.1 million, from \$37.9 million at December 31, 2007, to \$51.1 million at September 30, 2008. The Company shifted certain short-term borrowings to long-term debt to lower our borrowing costs, by taking advantage of the drop in interest rates which occurred in the first half of 2008.

Table of Contents

Total stockholders' equity decreased by \$1.3 million, from \$53.5 million at December 31, 2007, to \$52.1 million at September 30, 2008. The decrease is primarily attributable to the purchase of \$889,000 in outstanding common stock under our stock repurchase plan during 2008 and to a \$954,000 decrease in mark to market value, net of tax on securities available for sale. Dividends declared and paid during the nine months ended September 30, 2008 further reduced stockholders' equity by \$375,000. These decreases were partially offset by net income of \$599,000 and an increase in stock-based compensation expenses of \$275,000.

Comparison of Results of Operations for the Three Months Ended September 30, 2008 and 2007

General. Net income was \$867,000 for the three months ended September 30, 2008, a net increase of \$325,000, or 60.0%, compared to net income of \$542,000 for the three months ended September 30, 2007. The increase in net income is attributable to an increase in net interest income of \$388,000, or 15.6%, from \$2.5 million for the three months ended September 30, 2007 to \$2.9 million for the three months ended September 30, 2008. Non-interest income also increased \$155,000, or 29.3%, from \$530,000 for the three months ended September 30, 2007 to \$685,000 for the three months ended September 30, 2008. Earnings per share increased \$0.05, or 55.6%, from \$0.09 per share for the three months ended September 30, 2007 to \$0.14 per share for the three months ended September 30, 2008.

Interest Income. Interest income increased \$253,000, or 5.3%, from \$4.8 million for the three months ended September 30, 2007 to \$5.0 million for the three months ended September 30, 2008. Approximately \$97,000 of this increase is attributable to an increase in loan interest income from \$3.5 million for the three months ended September 30, 2007 to \$3.6 million for the three months ended September 30, 2008. The average balance on our loan portfolio increased \$19.0 million, from an average balance of \$212.4 million for the three months ended September 30, 2007 to an average balance of \$231.5 million for the three months ended September 30, 2008. The average yield on our loan portfolio decreased from 6.63% to 6.26% for the three months ended September 30, 2007 and 2008, respectively. The decrease in the average yield is attributable to a decrease in income received on the interest rate floor product from \$176,000 during the three months ended September 30, 2007 to \$102,000 during the three month period ended September 30, 2008. The interest on investment securities increased by \$62,000 for the three month period ended September 30, 2008, compared to the same period in 2007. The investment portfolio had an average yield of 4.77% for the three months ended September 30, 2008 compared to an average yield of 4.50% for the three months ended September 30, 2007. Other interest income, which includes interest income on Fed funds sold and other interest bearing deposits increased by \$94,000 in the three months ended September 30, 2008 compared to the same period in 2007. Interest on Fed funds sold increased by \$77,000 due to an increase in the average balance of Fed funds sold and other interest bearing deposits from \$1.3 million during the three months ended September 30, 2007 to \$18.3 million for the three months ended September 30, 2008.

Interest Expense. Interest expense decreased by \$135,000, or 5.9%, from \$2.3 million for the three months ended September 30, 2007 to \$2.2 million for the three months ended September 30, 2008. The interest paid on deposits decreased by \$158,000 from \$1.8 million for the three months ended September 30, 2007 to \$1.6 million for the three months ended September 30, 2008. This decrease was due to a decrease in the average rate paid on interest bearing deposits from 3.08% for the three months ended September 30, 2007 to 2.54% for the three months ended September 30, 2008. The interest expense related to advances from the Federal Home Loan Bank of New York increased \$23,000 from \$517,000 for the three months ended September 30, 2007 to \$540,000 for the three months ended September 30, 2008. While the average rate on these borrowings decreased from 4.53% to 3.98% for the three months ended September 2007 and 2008, respectively, the average balance increased from \$45.7 million to \$54.2 million for the three month periods ended September 30, 2007 and 2008, respectively.

Table of Contents

Provision for Loan Losses. Provision for loan losses increased by \$150,000 for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. Management deemed the increase necessary due to a \$5.9 million increase in residential loans since June 30, 2008 and due to a downgrade in classification for a single, delinquent commercial loan.

We establish provisions for loan losses, which are charged to operations, in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable incurred credit losses in the loan portfolio. The amount of allowance is based on estimates and the ultimate losses may vary from such estimates as more information becomes available or later events occur. Management assesses the allowance for loan losses on a quarterly basis and makes provisions for loan losses in order to maintain the adequacy of the allowance.

Non-interest Income. For the three months ended September 30, 2008, non-interest income was \$685,000 compared to \$530,000 for the three month period ended September 30, 2007, an increase of \$155,000 or 29.3%. The increase in non-interest income is primarily due to a \$144,000 increase in service charges and fees in the three months ended September 30, 2008 compared to the same period in 2007. In February 2008, the Company implemented a new fee-based service, resulting in increased fee income in the 2008 period.

Non-interest Expense. Non-interest expense increased \$101,000, or 4.4%, to \$2.4 million for the quarter ended September 30, 2008 from \$2.3 million for the quarter ended September 30, 2007. The increase was partly attributable to an increase in occupancy and equipment expenses of \$27,000, due to maintenance and repairs on existing buildings. Advertising expense increased \$23,000 in the third quarter of 2008 in comparison to the same period last year primarily due to increased print advertising. Expenses related to collections, including maintenance, legal and realtor expenses for foreclosed properties, increased by \$21,000 in the third quarter of 2008 in comparison to the same period last year. This increase was primarily due to the receipt of \$14,000 in insurance funds on foreclosed properties in the third quarter of 2007, which decreased the overall expense during that period. Lastly, non-interest expense was impacted by a \$12,000 expense recorded in the third quarter of 2008 due to the retirement of an outdated ATM unit that was not fully depreciated.

Income Tax Expense. Income tax expense decreased by \$33,000, or 18.1%, from \$182,000 for the three months ended September 30, 2007 to \$149,000 for the three months ended September 30, 2008. The decrease in income tax expense is largely attributable to an increase in tax exempt income on our municipal bond portfolio. As a result, our projected mix of tax-exempt income derived from our municipal bond portfolio and bank-owned life insurance increased significantly as it related to our projection of pre-tax income for the year, causing our effective tax rate estimate to decrease to 16.6%. This decrease combined with the impact on our effective tax rate recognized for the quarters ended March 31, 2008 and June 30, 2008, resulted in our effective tax rate decreasing from 25.1% for the quarter ended September 30, 2007 to 14.7% for the quarter ended September 30, 2008.

Comparison of Results of Operations for the Nine Months Ended September 30, 2008 and 2007

General. Net income was \$599,000 for the nine months ended September 30, 2008, a decrease of \$544,000 or 47.6%, compared to net income of \$1.1 million for the nine months ended September 30, 2007. Earnings per share decreased \$.09 per share, or 47.4%, from \$0.19 per diluted share for the nine months ended September 30, 2007 to \$0.10 per diluted share for the nine months ended September 30, 2008. The decrease in net income is primarily attributable to the Company recording a \$1.7 million other than temporary impairment writedown associated with non-agency, asset-backed securities in the second quarter of 2008. See *Other than Temporary Impairment* above. Excluding the impairment charge, the Company would have had net income of \$1.8 million for the nine months ended September 30, 2008, an increase of \$700,000, or 63.4%, in comparison to the same period in the prior year and earnings per diluted share would have been \$0.29.

Table of Contents

Interest Income. Interest income increased \$977,000, or 7.1%, from \$13.7 million for the nine months ended September 30, 2007 to \$14.7 million for the nine months ended September 30, 2008. Loan interest income increased by \$733,000, or 7.4%, to \$10.6 million for the nine months ended September 30, 2008. The increase in loan interest income is primarily due to an increase in the average balance on our loan portfolio. The average balance on our loan portfolio increased \$17.0 million from an average balance of \$208.3 million for the nine months ended September 30, 2007 to \$225.3 million for the nine months ended September 30, 2008. Investment interest income increased by \$132,000, or 3.5%, from \$3.7 million for the nine months ended September 30, 2007 to \$3.9 million for the nine months ended September 30, 2008. The investment portfolio had an average yield of 4.70% for the nine months ended September 30, 2008 compared to an average yield of 4.51% for the nine months ended September 30, 2007. Interest income on fed funds and other interest bearing deposits increased \$112,000, or 98.3%, for the nine month period ended September 30, 2008 compared to the nine months ended September 30, 2007. The average balance of fed funds and other interest bearing deposits was \$13.0 million and the average yield was 2.31% for the nine months ended September 30, 2008 compared to an average balance of \$4.3 million and average yield of 3.56% for the nine months ended September 30, 2007.

Interest Expense. Interest expense decreased by \$124,000, or 1.8%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. Interest expense on deposits decreased by \$357,000, or 6.8%, from \$5.2 million for the nine months ended September 30, 2007 to \$4.9 million for the nine months ended September 30, 2008. However, despite an increase in the average balance of deposits, the average rate on deposits decreased from 3.04% to 2.73% for the periods ending September 30, 2007 and 2008, respectively. The average balance on deposits increased by \$8.7 million to \$237.7 million for the nine months ended September 30, 2008 compared to \$229.0 million for the nine months ended September 30, 2007. The interest expense related to advances from the Federal Home Loan Bank of New York increased by \$233,000, or 16.1%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. While the average rate on these borrowings decreased from 4.44% for the nine month period ended September 30, 2007 to 3.99% for the nine months ended September 30, 2008, the average balance increased from \$43.6 million to \$56.2 million for the same periods.

Provision for Loan Losses. Provision for loan losses increased \$255,000 for the nine month period ended September 30, 2008 compared to the nine month period ended September 30, 2007. Management deemed the increase necessary due to a \$14.3 million increase in residential loans since December 31, 2007 and due to a downgrade in classification for a single, delinquent commercial loan.

We establish provisions for loan losses, which are charged to operations, in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable incurred credit losses in the loan portfolio. The amount of allowance is based on estimates and the ultimate losses may vary from such estimates as more information becomes available or later events occur. Management assesses the allowance for loan losses on a quarterly basis and makes provisions for loan losses in order to maintain the adequacy of the allowance.

Non-interest Income. For the nine months ended September 30, 2008, non-interest income was \$190,000, which was a decrease of \$1.3 million in comparison to the same period in the prior year. The decrease was due to a \$1.7 million other-than-temporary impairment charge recorded on certain non-agency asset-backed securities. See **Other than Temporary Impairment** above. Excluding the impairment charge, the Company would have recorded non-interest income for the nine months ended September 30, 2008 of \$1.9 million, a 28.9% increase over the nine months ended September 30, 2007, mainly due to the implementation of a new fee based income service in February 2008.

Non-interest Expense. Non-interest expense was \$7.2 million for the nine months ended September 30, 2008 compared to \$6.9 million for the same period in 2007, an increase of \$285,000, or 4.1%. Salary and

Table of Contents

personnel expense increased by \$34,000, or 0.9%, due to annual salary increases and the addition of two lending officers, offset by decreases in benefit costs due to employee and director retirements. Advertising expense increased by \$100,000 for the nine months ended September 30, 2008 compared with the nine months ended September 30, 2007 primarily due to costs incurred in 2008 for television, print and sponsorship advertising in our Erie County market area. Data processing expenses increased by \$46,000 due to increased transactions and expense for ATM and debit card transactions. Occupancy expense increased by \$55,000 due to increased costs for property taxes, utilities, equipment maintenance contracts and property maintenance. Expenses related to collections, including maintenance, legal and realtor expenses for foreclosed properties, increased by \$35,000 in comparison to the same period last year. This was partly attributable to receipt of \$20,000 in insurance funds on foreclosed properties in 2007, which decreased the overall expense during that period.

Income Tax Expense. Income tax expense decreased by \$196,000, or 62.2%, from \$315,000 for the nine months ended September 30, 2007 to \$119,000 for the nine months ended September 30, 2008. The decrease in income tax expense is largely attributable to the impact of the pre-tax impairment charge discussed above as well as an increase in our tax-exempt income on our municipal bond portfolio. As a result, our projected mix of tax-exempt income derived from our municipal bond portfolio and bank-owned life insurance increased significantly as it related to our projection of pre-tax book income for the year, causing our effective tax rate estimate to decrease from 21.6% for the nine months ended September 30, 2007 to 16.6% for the nine months ended September 30, 2008.

Liquidity and Capital Resources

Liquidity describes our ability to meet the financial obligations that arise during the ordinary course of business. Liquidity is primarily needed to meet the lending and deposit withdrawal requirements of our customers and to fund current and planned expenditures. Our primary sources of funds consist of deposits, scheduled amortization and prepayments of loans and mortgage-backed and asset-backed securities, maturities and sales of other investments, interest bearing deposits at other financial institutions and funds provided from operations. We have written agreements with the Federal Home Loan Bank of New York, which as of August 1, 2008, allowed us to borrow up to \$26.8 million on an overnight line of credit and \$26.8 million on a one-month overnight repricing line of credit. We had no borrowings through either of these agreements as of September 30, 2008. We also have a third agreement to obtain advances from the Federal Home Loan Bank collateralized by a pledge of our mortgage loans. At September 30, 2008, we had outstanding advances on this agreement totaling \$53.7 million.

Loan repayments and maturing investment securities are a relatively predictable source of funds. However, deposit flows, calls of investment securities, and prepayments of loans and mortgage-backed securities are strongly influenced by interest rates, general and local economic conditions, and competition in the marketplace. These factors reduce the predictability of the timing of these sources of funds.

Our primary investing activities include the origination of loans and, to a lesser extent, the purchase of investment securities. For the nine months ended September 30, 2008, we originated loans of approximately \$51.3 million in comparison to approximately \$37.0 million of loans originated during the nine month period ended September 30, 2007. Purchases of investment securities totaled \$16.6 million in the nine months ended September 30, 2008 and \$13.4 million in the nine months ended September 30, 2007.

At September 30, 2008, we had loan commitments to borrowers of approximately \$7.9 million and overdraft lines of protection and unused home equity lines of credit of approximately \$25.7 million.

Total deposits were \$275.2 million at September 30, 2008, as compared to \$240.8 million at December 31, 2007. Time deposit accounts scheduled to mature within one year were \$107.2 million at September 30, 2008. The increase in total deposits occurred as a result of offering and matching competitive rates in our market area. We anticipate that a significant portion of the time deposits that are scheduled to mature within one year will remain with us.

Table of Contents

We are committed to maintaining a strong liquidity position; therefore, we monitor our liquidity position on a daily basis. We anticipate that we will have sufficient funds to meet our current funding commitments. The marginal cost of new funding, however, whether from deposits or borrowings from the Federal Home Loan Bank, will be carefully considered as we monitor our liquidity needs. Therefore, in order to minimize our cost of funds, we may consider additional borrowings from the Federal Home Loan Bank in the future.

Recent Regulatory Updates

In response to the recent crises affecting the financial markets, the federal government has taken unprecedented steps in an attempt to stabilize and provide liquidity to the U.S. financial markets. Under the Emergency Economic Stabilization Act of 2008 (EESA) and the Troubled Asset Relief Program Capital Purchase Program (CPP), the U.S. Treasury will make \$250 billion of capital available to U.S. financial institutions and potentially other financial and commercial firms by purchasing preferred stock in these institutions. The program is voluntary and requires an institution to comply with a number of restrictions and provisions, including limits on executive compensation, stock redemptions and declaration of dividends. Applications must be submitted by November 14, 2008 and are subject to approval by the Treasury. The CPP provides for a minimum investment of 1% of Total Risk Weighted Assets, with a maximum investment equal to the lesser of 3% of Total Risk Weighted Assets or \$25 billion. In conjunction with the purchase of preferred stock, the U.S. Treasury will receive warrants to purchase common stock having an aggregate market price equal to 15% of the preferred stock purchased. We are still evaluating whether to participate in the CPP and are awaiting guidance from the U.S. Treasury regarding institutions with MHC structures like ours.

In addition, the Federal Deposit Insurance Corporation (FDIC) announced the creation of the Temporary Liquidity Guarantee Program (TLGP) as part of a larger government effort to strengthen confidence and encourage liquidity in the nation's banking system. All eligible institutions are automatically enrolled in the TLGP for the first 30 days at no cost. Organizations that do not wish to participate in the TLGP must opt out by December 5, 2008. After that time, participating entities will be charged fees. The TLGP has two components. The FDIC will provide a complete guarantee of newly issued senior unsecured debt of the participating organizations, within a certain limit, issued between October 14, 2008 and June 30, 2009. For such debts maturing beyond June 30, 2009, the guarantee will remain in effect until June 30, 2012. An annualized fee of 75 basis points multiplied by the amount of debt issued from October 14, 2008 (and still outstanding on December 6, 2008), through June 30, 2009 will be charged. The other component provides full FDIC insurance coverage for non-interest bearing transaction deposit accounts, regardless of dollar amount until December 31, 2009. An annualized 10 basis point assessment on balances in noninterest bearing transaction accounts that exceed the existing deposit insurance limit of \$250,000 will be assessed on a quarterly basis to insured depository institutions that have not opted out of the TLGP. We do plan to participate in the TLGP component which allows us to provide full FDIC insurance coverage for non-interest bearing transaction accounts, but plan to opt out of the component relating to the complete guarantee of newly issued senior unsecured debt.

It is not clear at this time whether our decision to participate or not to participate in either the CPP or our decision to participate in a portion of the TLGP will have an effect on our business or financial condition. In addition, there is no assurance that these government actions will achieve their purpose. The failure of the financial markets to stabilize, or a continuation or worsening of the current financial market conditions, could have a material adverse affect on our business, our financial condition, the financial condition of our customers, our common stock trading price, as well as our ability to access credit. It could also cause declines in our investment portfolio which could result in an other-than-temporary impairments charge.

Table of Contents

Loans Past Due and Non-performing Assets. We define non-performing loans as loans that are either non-accruing or accruing whose payments are 90 days or more past due. Non-performing assets, including non-performing loans and foreclosed real estate, totaled \$1.6 million at September 30, 2008 and \$1.7 million at December 31, 2007.

The following table presents information regarding our non-accrual loans, accruing loans delinquent 90 days or more, and foreclosed real estate as of the dates indicated.

	At September 30, 2008	At December 31, 2007
	(Dollars in thousands)	
Loans past due 90 days or more but still accruing interest:		
Mortgage loans on real estate:		
One-to-four family	\$ 486	\$ 209
Construction		
Commercial real estate	47	208
Home equity loans and lines of credit	129	65
Other loans:		
Commercial loans	17	85
Consumer loans		
Total	\$ 679	\$ 567
Loans accounted for on a nonaccrual basis:		
Mortgage loans on real estate:		
One-to-four family	\$ 696	\$ 918
Construction		
Commercial real estate	150	107
Home equity loans and lines of credit	49	42
Other loans:		
Commercial loans	2	
Consumer loans	14	10
Total non-accrual loans	911	1,077
Total nonperforming loans	1,590	1,644
Foreclosed real estate	58	61
Restructured loans		
Total nonperforming assets	\$ 1,648	\$ 1,705
Ratios:		
Nonperforming loans as a percent of total net loans:	0.68%	0.75%
Nonperforming assets as a percent of total assets:	0.42%	0.48%

Table of Contents

The following table sets forth activity in our allowance for loan losses and other ratios for the dates indicated.

	For the Nine Months Ended September 30, 2008	For the Year Ended December 31, 2007
	(Dollars in thousands)	
Balance at beginning of period:	\$ 1,226	\$ 1,257
Provision for loan losses	300	105
Charge-offs:

Off-Balance Sheet Arrangements

Other than loan commitments, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources that is material to investors. Refer to Note 7 of the Notes to Consolidated Financial Statements for a summary of loan commitments outstanding as of September 30, 2008.

**Item 3. Quantitative and Qualitative Disclosures about Market Risk
Management of Market Risk**

There have been no material changes in information regarding quantitative and qualitative disclosures about market risk at September 30, 2008 from the information presented in the Company's Form 10-K for the year ended December 31, 2007.

Item 4T. Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective, as of September 30, 2008, to ensure that information relating to us, which is required to be disclosed in the reports we file with the SEC under the Exchange Act, is (i) recorded, processed, summarized and reported as and when required and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

There has been no change in our internal control over financial reporting identified in connection with the evaluation that occurred during our last fiscal quarter that has materially affected, or that is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1A. Risk Factors

The following risk factor represents a change and addition to, and should be read in conjunction with, Item 1A. Risk Factors contained in our Annual Report on Form 10-K for the year ended December 31, 2007.

Recent developments affecting the financial markets presently have an unknown effect on our business.

In response to the recent crises affecting the financial markets, the federal government has taken unprecedented steps in an attempt to stabilize and provide liquidity to the U.S. financial markets. Under the Emergency Economic Stabilization Act of 2008 (EESA) and the Troubled Asset Relief Program Capital Purchase Program (CPP), the U.S. Treasury will make \$250 billion of capital available to U.S. financial institutions and potentially other financial and commercial firms by purchasing preferred stock in these institutions. The program is voluntary and requires an institution to comply with a number of restrictions and provisions, including limits on executive compensation, stock redemptions and declaration of dividends. Applications must be submitted by November 14, 2008 and are subject to approval by the Treasury. The CPP provides for a minimum investment of 1% of Total Risk Weighted Assets, with a maximum investment equal to the lesser of 3% of Total Risk Weighted Assets or \$25 billion. In conjunction with the purchase of preferred stock, the U.S. Treasury will receive warrants to purchase common stock having an aggregate market price equal to 15% of the preferred stock purchased. We are still evaluating whether to participate in the CPP and are awaiting guidance from the U.S. Treasury regarding institutions with MHC structures like ours.

In addition, the Federal Deposit Insurance Corporation (FDIC) announced the creation of the Temporary Liquidity Guarantee Program (TLGP) as part of a larger government effort to strengthen confidence and encourage liquidity in the nation's banking system. All eligible institutions are automatically enrolled in the TLGP for the first 30 days at no cost. Organizations that do not wish to participate in the TLGP must opt out by December 5, 2008. After that time, participating entities will be charged fees. The TLGP has two components. The FDIC will provide a complete guarantee of newly issued senior unsecured debt of the participating organizations, within a certain limit, issued between October 14, 2008 and June 30, 2009. For such debts maturing beyond June 30, 2009, the guarantee will remain in effect until June 30, 2012. An annualized fee of 75 basis points multiplied by the amount of debt issued from October 14, 2008 (and still outstanding on December 6, 2008), through June 30, 2009 will be charged. The other component provides full FDIC insurance coverage for non-interest bearing transaction deposit accounts, regardless of dollar amount until December 31, 2009. An annualized 10 basis point assessment on balances in noninterest bearing transaction accounts that exceed the existing deposit insurance limit of \$250,000 will be assessed on a quarterly basis to insured depository institutions that have not opted out of the TLGP. We do plan to participate in the TLGP component which allows us to provide full FDIC insurance coverage for non-interest bearing transaction accounts, but plan to opt out of the component relating to the complete guarantee of newly issued senior unsecured debt.

It is not clear at this time whether our decision to participate or not to participate in either the CPP or our decision to participate in a portion of the TLGP will have an effect on our business or financial condition. In addition, there is no assurance that these government actions will achieve their purpose. The failure of the financial markets to stabilize, or a continuation or worsening of the current financial market conditions, could have a material adverse affect on our business, our financial condition, the financial condition of our customers, our common stock trading price, as well as our ability to access credit. It could also cause declines in our investment portfolio which could result in an other-than-temporary impairments charge.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table reports information regarding repurchases by the Company of its common stock in each month of the quarter ended September 30, 2008:

COMPANY PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs(1), (2)
July 1, 2008 through July 31, 2008	15,000	\$ 8.32	15,000	34,445
August 1, 2008 through August 31, 2008	5,000	\$ 9.30	5,000	135,541
September 1, 2008 through September 30, 2008	16,000	\$ 9.93	16,000	119,541
Total	36,000	\$ 9.17	36,000	119,541

- (1) On November 16, 2007, the Company announced that the Board of Directors had approved its second stock repurchase plan pursuant to which the Company could repurchase up to 141,342 shares of its outstanding common stock. This amount represented 5% of the Company's outstanding stock not owned by Lake Shore, MHC.
- (2) On August 27, 2008, the Company announced that the Board of Directors had approved its third stock repurchase plan pursuant to which the Company could repurchase up to 135,541 shares of its outstanding common stock. This amount represented 5% of the Company's outstanding stock not owned by Lake Shore, MHC. The repurchase plan does not have an expiration date. This repurchase program superseded all of the prior Company stock repurchase programs.
