Business Report for the 86th Fiscal Year

For the Period From: April 1, 2009 To: March 31, 2010

1. OUTLINE OF BUSINESS

(1) Review of Operations

Honda's consolidated revenue for the period amounted to ¥8,579.1 billion, a decrease of 14.3% from the previous fiscal year, primarily due to unfavorable currency translation effects and decreased revenue in the automobile business.

Consolidated operating income for the period totaled ¥363.7 billion, an increase of 91.8%, due primarily to decreased SG&A expenses and R&D expenses and continuing cost reduction efforts, despite decreased profit attributable to decreased revenue, the unfavorable impact of currency effects and the increase in fixed costs per vehicle as a result of reduced production. Consolidated net income attributable to Honda Motor Co., Ltd. for the period totaled ¥268.4 billion, an increase of 95.9% from the previous fiscal year.

Motorcycles

Sales Volume and Profitability

With respect to Honda's motorcycle sales for the fiscal year ended March 31, 2010, unit sales of motorcycles totaled 9,639 thousand units, a decrease of 4.7% from the previous fiscal year. Unit sales in Japan totaled 190 thousand units, a decrease of 18.1% from the previous fiscal year. Unit sales outside of Japan totaled 9,449 thousand units, a decrease of 4.4% from the previous fiscal year*, due mainly to decreased unit sales in Other Regions, including South America, and North America, more than offsetting increased unit sales in Asia. Revenue from sales to external customers decreased 19.2%, to ¥1,140.2 billion, from the previous fiscal year, due mainly to decreased unit sales and the unfavorable currency translation effects. Operating income decreased by 41.1%, to ¥58.8 billion from the previous fiscal year, due primarily to decreased profit attributable to decreased revenue and the unfavorable impact of currency effects, more than offsetting decreased SG&A expenses and R&D expenses.

* Of the net sales of Honda-brand motorcycle products that are manufactured and sold by overseas affiliates accounted for under the equity method, those with respect to which parts for manufacturing were not supplied from Honda or its subsidiaries are not included in net sales and other operating revenue, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results.

Table of Contents**Significant Accounting Policy Change**

Honda adopted the FASB Accounting Standards Codification (ASC) 810 Consolidation, which is previously known as Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51, effective April 1, 2009. This statement requires a noncontrolling interest in a subsidiary to be reported as equity in the consolidated financial statements, and requires that changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary to be accounted for as equity transactions. Upon the adoption of ASC 810, noncontrolling interests, which were previously referred to as minority interests and classified between total liabilities and stockholders' equity on the consolidated balance sheets, are now included as a separate component of total equity. In addition, the presentation of consolidated statements of income and stockholders' equity and comprehensive income has been changed. As the presentation and disclosure requirements of ASC 810 have been applied retrospectively, Honda has made reclassifications to the prior consolidated financial statements to conform to the presentation used for the year ended March 2010. The adoption of ASC 810 did not have a material impact on the Company's consolidated financial position or results of operations.

Table of Contents**Note on Financial Instruments:****Current Status of Financial Instruments**

1. **Policy Regarding Financial Instruments** The policy of Honda is to support its business activities by maintaining sufficient capital resources, a sufficient level of liquidity and a sound balance sheet. In its cash management activities, the Company invests principally in highly safe, short-term financial instruments. Honda meets its operating capital requirements primarily through cash generated by operations, bank loans and the issuance of commercial paper. In addition, the Company's finance subsidiaries fund those financial programs for customers and dealers primarily from corporate bonds, medium-term notes, commercial paper, securitization of finance receivables and intercompany loans.
2. **Risk Associated with Financial Instruments and Related Risk Management System** The Company reduces the credit risk arising from trade and note receivables and finance subsidiaries' receivables by requiring compliance with its internal credit management regulations. To minimize the foreign currency fluctuation risk of the foreign currency denominated receivables, the Company enters into forward currency forward exchange contracts and foreign currency purchased option contracts. Regarding the lease receivables held by the Company's finance subsidiaries, losses may incur when proceeds from the sale of the returned vehicles are less than the contractual residual value. The Company's finance subsidiaries periodically review the estimated residual value of the leased vehicles to monitor the residual value risk. Available-for-sale securities mainly consist of equity securities. Held-to-maturity securities mainly consist of government and agency debt securities. In order to manage the price fluctuation risk, the Company periodically estimates the fair value of these securities.

To manage the liquidity risk associated with short-term and long-term debt, the Company diversifies its sources of funds. To reduce the interest rate fluctuation risk, the Company enters into interest rate swap contracts. To minimize the foreign currency fluctuation risk of the foreign currency denominated payables, the Company enters into currency swap contracts.

The Company enters into derivative contracts within the actual demand of its business activities in accordance with the risk management policy. The derivative instruments contain an element of risk in the event the counterparties are unable to meet the terms of the agreement. However, Honda minimizes the risk exposure by limiting the counterparties to major international banks and financial institutions meeting established credit guidelines.

The Company applies hedge accounting for certain foreign currency forward exchange contracts related to forecasted foreign currency transactions between the Company and its subsidiaries.

Fair Value of Financial Instruments

The carrying amount, estimated fair value and difference of financial instruments at March 31, 2010 are as follows:

	Carrying Amount	Yen (millions) Estimate Fair Value	Difference
Finance subsidiaries' receivables	3,569,760	3,638,964	69,204
Available-for-sale securities	104,601	104,601	
Held-to-maturity securities	18,766	18,862	96
Short-term and long-term debt	(4,101,675)	(4,191,389)	(89,714)
Derivative instruments	22,763	22,763	

Note: The carrying amount of finance subsidiaries' receivables at March 31, 2010 in the table excludes ¥411,288 million of direct financing leases, net, classified as finance subsidiaries' receivables in the consolidated balance sheets. The carrying amount of finance subsidiaries' receivables at March 31, 2010 in the table also includes ¥519,495 million of finance receivables classified as trade receivables and other assets in the consolidated balance sheets.

Table of Contents

The methodologies used to estimate the fair value of financial instruments are as follows.

1. Cash and cash equivalents, trade and note receivables and note and account payables The carrying amounts approximate fair values because of the short maturity of these instruments.

2. Finance subsidiaries receivables

The fair values of retail receivables and term loans to dealers are estimated by discounting future cash flows using the current rates for these instruments of similar remaining maturities. Given the short maturities of wholesale receivables, the carrying amount of those receivables approximates fair value. The fair values of the retained interests in securitizations are estimated by calculating the present value of the future cash flows using a discount rate commensurate with the risks involved.

3. Available-for-sale securities and held-to-maturity securities

The fair value of available-for-sale securities and held-to-maturity securities is estimated using the quoted market price. The fair value of auction rate securities is estimated by discounting future cash flows considering liquidity risk and other factors.

4. Short-term debt and long-term debt

The fair values of bonds and notes are estimated based on the quoted market prices for the same or similar issues. The fair value of long-term loans is estimated by discounting future cash flows using rates currently available for loans of similar terms and remaining maturities. The carrying amounts of short-term bank loans and commercial paper approximate fair values because of the short maturity of these instruments.

5. Derivative instruments

The Company holds foreign currency and interest rate derivative instruments. The fair values of foreign currency instruments are estimated based on foreign exchange rates, discount rates and implied volatility. The fair values of interest rate instruments are estimated by discounting future cash flows using LIBOR rates, swap rates and foreign exchange rates. The fair values of a limited number of interest rate swap agreements related to certain off-balance sheet securitizations are estimated using internally developed prepayment assumptions in order to forecast future notional amounts on these structured derivative contracts.

Non-marketable securities are excluded from the above table as it is not possible to estimate the future cash flow and it is deemed to be extremely difficult to measure the fair value. The carrying amount of non-marketable securities is ¥11,888 million at March 31, 2010.
