Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

x Form 20-F "Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): "

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): "

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934:

" Yes x No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): n/a

NEWS RELEASE

Release Time IMMEDIATE

Date 20 April 2011

Number 13/11

BHP BILLITON PRODUCTION REPORT FOR THE NINE MONTHS ENDED 31 MARCH 2011

Successfully concluded the acquisition of the Fayetteville Shale (USA), which is expected to be an important contributor to the continued growth of the Petroleum business.

Quarterly production records were achieved at Hunter Valley Energy Coal (Australia) and the Alumar refinery (Brazil), while record milling rates were set at Olympic Dam (Australia) for the second consecutive quarter.

Record iron ore production and sales for the nine months ended March 2011 were achieved at both Western Australia Iron Ore and Samarco (Brazil), highlighting the benefit of BHP Billiton s commitment to invest through economic cycles. Year to date production records were also achieved for crude oil and condensate, the North West Shelf (Australia) and manganese ore. Petroleum

	MAR 2011 YTD	MAR 2011 QTR	MAR YTD11 vs MAR YTD10	MAR Q11 vs MAR Q10	MAR Q11 vs DEC Q10
Crude Oil, Condensate and Natural Gas Liquids (000 bbl)	70,586	21,642	-1%	-4%	-8%
Natural Gas (bcf)	273.27	84.90	-2%	-4%	3%
Total Petroleum Products (million boe)	116.13	35.79	-1%	-4%	-4%

Total Petroleum Production Record crude oil and condensate production for the nine months ended March 2011 reflected strong performance at the BHP Billiton operated Pyrenees (Australia) and Shenzi (USA) fields. Production for the March 2011 quarter continued to be impacted by permitting delays in the Gulf of Mexico (USA) and the tropical cyclone season in Western Australia.

Following regulatory approval, BHP Billiton was the first operator to resume production drilling in the deep water Gulf of Mexico at the BHP Billiton operated Shenzi field. This followed previous approvals for water injection wells. Notwithstanding these important milestones, permitting delays in the Gulf of Mexico continue to impact our Petroleum operations, further deferring the drilling of high volume production wells. When excluding volume growth from the Fayetteville Shale acquisition, we therefore expect production to be lower in the 2012 financial year.

Crude Oil, Condensate, and Natural Gas Liquids Crude oil production growth, specifically at Atlantis (USA), has been significantly impacted by the inability to drill new, high volume production wells. Production in the March 2011 quarter was further impacted by the tropical cyclone season in Western Australia.

Natural Gas Year to date natural gas production declined despite record performance at the North West Shelf as lower volumes from the Gulf of Mexico and severe flooding in Pakistan impacted performance. A recovery in quarterly production in Pakistan and stronger seasonal demand at Bass Strait (Australia) resulted in higher natural gas production when compared with the prior period.

BHP Billiton successfully concluded the acquisition of 100 per cent of Chesapeake Energy Corporation supstream and midstream Fayetteville interests on 31 March 2011, providing a leadership position in a consolidated shale play.

Aluminium

	MAR 2011	MAR 2011	MAR YTD11 vs	MAR Q11 vs	MAR Q11 vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Alumina (000 tonnes) (a)	2,984	959	7%	-6%	-6%
Aluminium (000 tonnes)	933	305	0%	0%	-3%

Alumina Production in the March 2011 quarter was impacted by a planned calciner outage at Worsley (Australia). The Alumar refinery continued to ramp up during the period and is now producing at near nameplate capacity.

Aluminium Production across all operations was in line with comparable periods.

Base Metals

	MAR 2011 YTD	MAR 2011 QTR	MAR YTD11 vs MAR YTD10	MAR Q11 vs MAR Q10	MAR Q11 vs DEC Q10
Copper (000 tonnes)	867.1	273.6	11%	19%	-9%
Lead (tonnes)	185,976	51,910	0%	-15%	-20%
Zinc (tonnes)	117,394	40,252	-23%	-14%	9%
Silver (000 ounces)	32,779	9,056	-3%	-21%	-22%
Uranium Oxide Concentrate (Uranium) (tonnes)	3,030	1,063	93%	1,094%	11%

Copper Production was higher than both the nine months and quarter ended March 2010, which were impacted by the Clark Shaft outage at Olympic Dam and industrial action at Pampa Norte (Chile). Record year to date milling rates were achieved at Pampa Norte, Olympic Dam and Antamina (Peru).

Consistent with prior full year production guidance for Escondida (Chile), copper volumes declined in the March 2011 quarter largely as a result of lower ore grades. In addition, a higher proportion of hard ore constrained mill throughput rates at Escondida, although the impact was mitigated by continued strong performance in the SX-EW circuit. At Olympic Dam, a second consecutive quarterly record was set for milling rates.

Lead/Silver Lower lead and silver grades and weather related disruption of mining activities reduced production at Cannington (Australia) in the March 2011 quarter.

Zinc An improvement in grades and recoveries at Antamina resulted in higher zinc production in the March 2011 quarter when compared with the prior period.

Uranium Record mining and milling rates for the nine months ended March 2011 highlighted the strong recovery in performance at Olympic Dam that has followed the successful repair of the Clark Shaft.

Diamonds & Specialty Products

	MAR	MAR	MAR YTD11	MAR Q11	MAR Q11
	2011	2011	vs	vs	vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Diamonds (000 carats)	1,930	551	-16%	-28%	-18%

Diamonds Production for the March 2011 quarter was lower than comparable periods primarily due to lower average ore grade. Production continues to be influenced by the variability of ore sources due to the mix of open pit and underground mining. Consistent with the mine plan, BHP Billiton expects lower average ore grades to impact EKATI (Canada) production in the 2012 financial year.

Stainless Steel Materials

	MAR	MAR	MAR YTD11	MAR Q11	MAR Q11
	2011	2011	vs	vs	vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Nickel (000 tonnes) (b)	114.5	33.0	-10%	-24%	-23%

Nickel Contained nickel production was lower than comparable periods due to reduced production from Cerro Matoso (Colombia) following commencement of the planned furnace replacement in February 2011.

When compared with the December 2010 quarter, metal production increased at the Nickel West Kwinana refinery (Australia) following improved hydrogen supply. This was more than offset by lower matte production as a result of weather related interruptions and maintenance at the Nickel West Kalgoorlie smelter (Australia).

Iron Ore

	MAR	MAR	MAR YTD11	MAR Q11	MAR Q11
	2011	2011	vs	VS	vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Iron Ore (000 tonnes)	98,880	33,231	6%	7%	-1%

Iron Ore Record production and sales for the nine months ended March 2011 were achieved at both Western Australia Iron Ore and Samarco, highlighting the benefit of BHP Billiton s commitment to invest through economic cycles.

Western Australia Iron Ore recorded another strong quarter of production despite seasonal weather impacts and tie-in activities. Samarco production was impacted by planned maintenance during the period.

Manganese

	MAR 2011 YTD	MAR 2011 QTR	MAR YTD11 vs MAR YTD10	MAR Q11 vs MAR Q10	MAR Q11 vs DEC Q10
Manganese Ore (000 tonnes)	5,303	1,352	20%	-21%	-26%
Manganese Alloy (000 tonnes)	563	172	54%	1%	-10%

Manganese Ore Production in the March 2011 quarter was impacted by safety related downtime at Hotazel (South Africa) and heavy rainfall at GEMCO (Australia). Hotazel and GEMCO achieved record production and sales volumes for the nine months ended March 2011, reflecting an improvement in the underlying market fundamentals.

Manganese Alloy Production was lower than the December 2010 quarter due to maintenance at both Metalloys (South Africa) and TEMCO (Australia), although both achieved year to date sales records.

Metallurgical Coal

	MAR	MAR	MAR YTD11	MAR Q11	MAR Q11
	2011	2011	vs	vs	vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Metallurgical Coal (000 tonnes)	24,756	6,670	-6%	-18%	-14%

Metallurgical Coal The Bowen Basin has been significantly affected by persistent wet weather for a large part of the 2011 financial year that continues to delay recovery efforts, particularly for the large open cut operations. At Queensland Coal (Australia), resultant in-pit water accumulation has severely restricted overburden removal and broader mining activities. Force majeure remains in place for the majority of our Bowen Basin products with production, sales and unit costs likely to be impacted, to some extent, for the remainder of the 2011 calendar year.

Illawarra Coal (Australia) production for the quarter was impacted by the commencement of two longwall moves at Dendrobium and Appin, which will continue into the June 2011 quarter.

Energy Coal

	MAR	MAR	MAR YTD11	MAR Q11	MAR Q11
	2011	2011	vs	vs	vs
	YTD	QTR	MAR YTD10	MAR Q10	DEC Q10
Energy Coal (000 tonnes)	51,162	17,543	3%	7%	6%

Energy Coal Quarterly and year to date production and sales records for Hunter Valley Energy Coal reflect the successful ramp-up of the MAC20 project and the use of our recently commissioned Newcastle Coal Infrastructure Group (NCIG) port capacity. Total Energy Coal production was also higher than all comparable periods as Cerrejon Coal (Colombia) recovered following record rainfall in the December 2010 quarter.

- (a) Excluding Suriname which was sold effective 31 July 2009.
- (b) Excluding Yabulu which was sold effective 31 July 2009.

Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

This report, together with the Exploration and Development Report, represents the Interim Management Statement for the purposes of the UK Listing Authority s Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 31 March 2011.

⁽a) LPG and Ethane are reported as Natural Gas Liquid (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).

⁽b) Suriname was sold effective 31 July 2009.

⁽c) Metal production is reported on the basis of payable metal.

- (d) Includes Cerro Colorado and Spence.
- (e) Yabulu was sold effective 31 July 2009.
- (f) Iron ore production is reported on a wet tonnes basis.
- (g) Newman includes Mt Newman Joint Venture and Jimblebar.
- (h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.
- (i) Production includes Medium Carbon Ferro Manganese.
- (j) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (k) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
