2. Business**A. Business overview**

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then, our business has been focused on the research, development, manufacture and sale of display panels, applying technologies such as TFT-LCD, LTPS-LCD and OLED.

As of June 30, 2011, we operated TFT-LCD and OLED production facilities in Paju and Gumi, Korea and a LCD research center in Paju, Korea. We have also established subsidiaries in the United States, Europe and Asia.

As of June 30, 2011, our business consisted of (i) the manufacture and sale of LCD panels, (ii) the manufacture and sale of OLED panels and (iii) the manufacture and sale of television sets and monitors that utilize our LCD panels. Because our OLED, television set and monitor businesses represent an extremely small portion of our assets and revenues, we have included them as part of our LCD reporting business segment.

B. Industry**(1) Industry characteristics and growth potential**

TFT-LCD technology is one of the widely used technologies in the manufacture of flat panel displays, and the demand for flat panel displays is growing. The flat panel display industry is characterized by entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is intense competition among the players in the industry, and the industry's production capacity, including ours, is continually increasing.

Table of Contents

The demand for LCD panels for notebook computers and desktop monitors has grown, to a degree, in tandem with the growth in the information technology industry. The demand for LCD panels for television sets has been growing as digital broadcasting is becoming more common and as LCD television has come to play an important role in the digital display market. In addition, markets for small- to medium-sized LCD panels, such as those used in mobile phones, P-A/V, medical applications, automobile navigation systems and e-books, among others, have shown continued growth.

The average selling prices of LCD panels may continue to decline with time irrespective of general business cycles as a result of, among other factors, technology advancements and cost reductions.

(2) Cyclical

The TFT-LCD business is highly cyclical. In spite of the increased demand for products, this industry has experienced periodic volatility caused by imbalances between supply and demand due to capacity expansion within the industry.

Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.

During such surges in production capacity, the average selling prices of display panels may decline. Conversely, demand surges and inability of supply to meet such demand may lead to price increases.

(3) Market conditions

The TFT-LCD industry is highly competitive due largely to additional capacity expansion driven by TFT-LCD panel makers.

Most TFT-LCD panel makers are located in Asia.

- a. Korea: LG Display, Samsung Electronics (including a joint venture between Samsung Electronics and Sony Corporation), Samsung Mobile Display, Hydis Technologies
- b. Taiwan: AU Optronics, Chi Mei Innolux, CPT, Hannstar, etc.
- c. Japan: Sharp, Panasonic LCD, etc.
- d. China: SVA-NEC, BOE-OT, etc.

(4) Market shares

(5) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, successful and timely investment and product development, cost competitiveness, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

As a leading technology innovator in the display industry, we continue to focus on delivering differentiated value to our customers by developing new technologies and products, including in the categories of 3D, touch screens and next generation displays. With respect to 3D technology, we have commenced mass production of high definition 3D panels with reduced degrees of crosstalk, or the degree of 3D image overlapping, of less than 1% (which is less than what the human eye can perceive). We have also acquired the technical skills and have established a supply chain management system that enables us to provide one-stop solutions to our customers with respect to touch module products. In addition, we have shown that we are technologically a step ahead of the competition by developing products such as 10.1-inch flexible LCDs, 2.6 mm thin televisions (the thinnest in the world at the time) and 19-inch flexible e-papers.

Moreover, we entered into long-term sales contracts with major global firms, including those in the United States and Japan, to secure customers and expand partnerships for technology development.

C. New businesses

In order to meet the rapidly increasing market demand for large TFT-LCD panels, we decided in March 2010 to further expand P8 by investing in P83, which successfully commenced mass production in March 2011. In January 2011, we also decided to invest in a new eighth generation production facility, P98.

Edgar Filing: LG Display Co., Ltd. - Form 6-K

We also plan to strengthen our market position in future display technologies by strengthening our OLED business, accelerating the development of flexible display technologies and maintaining our leadership position in the LED backlight LCD market.

Table of Contents

We are making an effort to increase our competitiveness, including in the LCD component parts market, by forming cooperative relationships with suppliers and purchasers of our products. We invested US\$10.4 million in return for a 51% interest in Suzhou Raken Technology Ltd. Suzhou Raken Technology Ltd. will supply both parties with TFT-LCD modules and TFT-LCD televisions. Through the establishment of this joint venture, we are able to further expand our customer base by securing a stable long-term panel dealer. It also allows us to produce LCD modules and LCD television sets in a single factory, which enables us to provide our customers with products that are more competitive both in terms of technology and price. In 2009 and 2010, we invested an additional US\$58.7 million and US\$14.5 million, respectively, in Suzhou Raken Technology Ltd., but the additional investments did not change our percentage interest in Suzhou Raken Technology Ltd.

As of December 31, 2009, we had invested (Won)72.3 billion in return for a 49% equity interest in the joint venture company. In June 2010, we sold (Won)19.0 billion worth of our equity interest in the joint venture company. After such sale, our equity interest was reduced to 32.73%.

In December 2009, we acquired a 30.6% limited partnership interest in LB Gemini New Growth Fund No. 16. Under the limited partnership agreement, we have agreed to invest a total amount of (Won)30 billion in the fund, and as of December 31, 2010, we had invested (Won)8.3 billion in the fund. In June 2011, we received a further distribution of (Won)0.7 billion as return of principal and (Won)0.9 billion as dividends and we invested an additional (Won)1.2 billion in the fund. The additional investments did not change our investment commitment amount of (Won)30 billion or our limited partnership interest in the fund, which remained at 30.6%.

In order to establish a production base for LCD modules, LCD television sets and LCD monitors, we entered into a joint investment agreement with Top Victory Investment Ltd. in January 2010 and established L&T Display Technology

B. Average selling price trend of major products

The average selling price of LCD panels per square meter of net display area in the second quarter of 2011 increased by 6% from the first quarter of 2011 due to an increase in sales of 3D Film Patterned Retarder (FPR) panels, high-end monitors, smartbooks, smartphones and other high value-added products. However, there is no assurance that the average selling prices of LCD panels will not fluctuate in the future due to imbalances in supply and demand.

6. Market Risks and Risk Management

A. Market risks

Our industry continues to experience continued declines in the average selling prices of display panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The TFT-LCD industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel makers in Korea, Taiwan, China and Japan. Our main competitors in the industry include Samsung Electronics (including its joint venture with Sony), Samsung Mobile Display, Infovision, Hydis Technologies, AU Optronics, Chi Mei Innolux, Chunghwa Picture Tubes, HannStar, SVA-NEC, BOE-OT, Sharp, Hitachi, TMDisplay, Mitsubishi and Panasonic LCD.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Our risk management policy regarding foreign currency risk is to minimize the impact of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

B. Risk management

The average selling prices of display panels have declined in general and could continue to decline with time irrespective of industry-wide cyclical fluctuations. Certain contributing factors for this decline will be beyond our ability to control and manage. However, in anticipation of such price decline we have continued to develop new technologies and have implemented various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we have entered into cross-currency interest rate swap contracts and foreign currency forward contracts.

7. Derivative Contracts

A. Currency risks

We are exposed to currency risks on sales, purchases and borrowings that are denominated in currencies other than in Won, our functional currency. These currencies are primarily the U.S. dollar, the Euro, the Japanese Yen and the Chinese

Renminbi.

We generally use forward exchange contracts with a maturity of less than one year to hedge against currency risks.

Table of Contents

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by our underlying operations, primarily in Won, the U.S. dollar, the Japanese Yen and the Chinese Renminbi.

In respect of other monetary assets and liabilities denominated in foreign currencies, we ensure that our net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates, when necessary, to address short-term imbalances. In addition, we also adjust the factoring volumes of foreign currency denominated receivables and utilize usances as means of settling accounts payables relating to capital expenditures for our facilities, in response to currency fluctuations.

B. Interest rate risks

Our exposure to interest rate risks relates primarily to our long term debt obligations. To the extent necessary, we hedge our interest rate risks by entering into interest swap contracts. As of June 30, 2011, we had no interest swap contracts outstanding.

8. Major contracts

Our material contracts, other than contracts entered into in the ordinary course of business, are set forth below.

| Type of agreement | Name of party | Term | Content |
|---------------------------------------|---------------------------------|-----------------|--|
| Technology licensing agreement | Semiconductor Energy Laboratory | October 2005 ~ | Patent licensing of LCD and OLED related technology |

10. Customer Service

In order to highlight the importance of creating customer value, we have formulated a roadmap toward creating customer value and have shared this information with all of our employees. Through our Voice of Customer campaign, we have responded to customer feedback including complaints, suggestions, praises, enquiries and requests as soon as they were made and we have made efforts to change any negative feedback made by a customer into a positive feedback through such prompt response. In addition, in order to support our customers, we have established IPS camps and have cooperated with our customers to promote IPS technology. Furthermore, we have hosted Why LGD campaigns in order to provide superior products and services to our customers including in the areas of technology, quality, responsiveness, delivery and cost. We also monitor customer opinion through annual customer satisfaction surveys and customer interviews, and the results of such surveys and interviews are reflected in the performance evaluation of our executive officers.

11. Intellectual Property

As of June 30, 2011, we held a total of 15,592 patents, including 6,927 in Korea and 8,665 in other countries.

12. Environmental Matters

We are subject to strict environmental regulations and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate worksite waste, including water and air pollutants, at various stages in the manufacturing process, and we are subject to a variety of laws and regulations relating to the use, storage, discharge and disposal of such chemical by-products and waste substances. We have installed various types of anti-pollution equipment, consistent with industry standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations.

We have also voluntarily agreed to reduce emission of greenhouse gases, such as trifluoride oxide and perfluoro compounds, or PFCs, including sulfur hexafluoride, or SF₆, gases, by installing abatement systems to meet voluntary emissions targets for the TFT-LCD industry for 2010. As part of our voluntary activities to reduce emission of greenhouse gases, we installed trifluoride oxide abatement systems at all of our production lines. We also installed an SF₆ abatement system in P1 in April 2005, and we have taken steps to install additional SF₆ abatement systems through the use of Clean Development Mechanism, or CDM, projects. On July 10, 2010, after becoming the first TFT-LCD company to receive the UNFCCC CDM Executive Board's approval of our CDM project, we installed an SF₆ abatement system in P6. In June 2011, we received 144,222 tons of certified emission reduction credits from the UN for the reduction of greenhouse gas emissions during the period from August 1, 2010 to September 30, 2010. We were the first LCD company to receive such certified emission reduction credits pursuant to an SF₆ decomposition CDM project. Currently, a third party accreditation agency is also examining the reduction of our greenhouse gas emissions during the period from October 1, 2010 to April 30, 2011 as part of our application for receiving certified emission reduction credits from the UN. Beginning in August 2011, we intend to install an SF₆ abatement system in P7 through the implementation of CDM projects.

Currently, the Korean government is implementing the greenhouse gas emission reduction target system under the Framework Act on Low Carbon, Green Growth and is expected to assign greenhouse gas emission reduction targets to individual companies in 2011. Once such greenhouse gas emission reduction targets have been assigned, certain companies may need to invest in additional equipment and there may be other costs associated with meeting the reduction target, which may have a negative effect on such companies' profitability or production activities. In addition, if a company fails to meet its reduction target, it may be subject to fines or penalties or may even be forced to shut down its production facilities.

Table of Contents

In connection with the greenhouse gas emission reduction target system, we have prepared a statement of our domestic emissions and energy usage and have submitted it to the government-designated accreditation agency. In addition, in order to improve the efficiency and reliability of measuring our greenhouse gas emission reduction activities, we plan to make improvements in our electronic greenhouse gas inventory system.

In addition, as of June 30, 2011, we were party to voluntary agreements, which reflect a coordinated energy conservation initiative between government and industry, with respect to our operation of P1 through P8, the Gumi module production plant and the Paju module production plant. In accordance with such agreements, we have implemented a variety of energy-saving measures in those facilities, including installation of energy saving devices and consulting with energy conservation specialists.

Operations at our manufacturing plants are subject to regulation and periodic monitoring by the Korean Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures for the effective maintenance of environmental protection standards consistent with local industry practice, and that we are in compliance in all material respects with the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists for each environmental area, including air quality, water quality, toxic materials and radiation. We currently have ISO 14001 certifications with respect to the environmental record for P1 through P8, our OLED production facility in Gumi, Korea, our Gumi module production plant and our Paju module production plant, as well as our module production plants in Nanjing and Guangzhou, China. In addition, with respect to P1 through P8 and our module production plants in Gumi and Paju, we are currently participating and setting up a pilot environment management system called the green management certification system. We have been certified by the Korean Ministry of Environment as a Green Company, with respect to our environmental record for P1 and our module production plant in Gumi since 1997, with respect to our operations at P2 and P3 since 2006, and with respect to our operations at P4, P5 and P6 since 2008.

We also have an internal monitoring system to control the use of hazardous substances in the manufacture of our products as we are committed to compliance with all applicable environmental laws and regulations, including European Union Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC, which took effect in July 2006, and restricts the use of certain hazardous substances in the manufacture of electrical and electronic equipment.

In October 2005, we became the first TFT-LCD company to receive accreditation as an International Accredited Testing Laboratory by the Korea Laboratory Accreditation Scheme, which is operated by the Korean Ministry of Knowledge Economy. In September 2006, we received international accreditation from TUV SUD, EU's German accreditation agency, as a RoHS testing laboratory. Moreover, we participated in reforming IEC 62321 by 2012, a RoHS international testing standard, by including a halogen-free combustion ion chromatography method in our committee draft that we submitted in June 2010.

In addition, we have implemented a green purchasing system that prevents the use of hazardous materials from the purchasing stage. As a result of the green purchasing system, we are in compliance with RoHS and other applicable environmental laws and regulation, and we became the first TFT-LCD company to receive the Hazardous Substance Process Management QC080000 certification, or HSPM, from the International Electrotechnical Commission. HSPM is used to help companies manage their hazardous materials and be in compliance with RoHS.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Introduction

We have reviewed the accompanying condensed consolidated statement of financial position of LG Display Co., Ltd. and subsidiaries (the Group) as of June 30, 2011, and the related condensed consolidated statements of comprehensive income for each of the three-month and six-month periods ended June 30, 2011 and 2010, changes in equity and cash flows for the six-month periods ended June 30, 2011 and 2010, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Condensed Consolidated Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting* and for such internal control as management determines is necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for *Quarterly/Semiannual* Financial Statements of the Republic of Korea. A review consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards 1034, No. *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the consolidated financial statements, the European Commission issued a decision finding that LG Display Co., Ltd. engaged in anti-competitive activities in the Liquid Crystal Display (LCD) industry in violation of European competition laws and imposed a fine of EUR215 million on December 8, 2010. LG Display Co., Ltd., along with its subsidiaries, is under investigations by the Korea Fair Trade Commission and antitrust authorities in other countries with respect to possible anti-competitive activities in the LCD industry. In addition, LG Display Co., Ltd., along with its subsidiaries, has been named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits in connection with the alleged antitrust violations concerning the sale of LCD panels. The Group estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Group.

Other Considerations

We audited the consolidated statement of financial position as of December 31, 2010 and the consolidated statements of comprehensive income, changes in equity and cash flows for the year ended December 31, 2010, not accompanying this review report, in accordance with auditing standards generally accepted in the Republic of Korea, and our report thereon, dated February 24, 2011, expressed an unqualified opinion. The accompanying consolidated statement of financial position of the Group as of December 31, 2010, presented for comparative purposes, is not different from that audited by us in all material respects.

(ii) Sensitivity analysis

A weakening of the won, as indicated below, against the following currencies which comprise the Group's financial assets or liabilities denominated in foreign currency as of June 30, 2011 and December 31, 2010 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considered to be reasonably possible at the end of each reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant. The changes in equity and profit or loss are as follows:

(In millions of won)

| | June 30, 2011 | | December 31, 2010 | |
|---------------------------|---------------|----------------|-------------------|----------------|
| | Equity | Profit or loss | Equity | Profit or loss |
| USD (5 percent weakening) | (34,118) | (14,994) | (9,119) | (29,823) |
| JPY (5 percent weakening) | (29,894) | (26,406) | (60,256) | (59,738) |
| CNY (5 percent weakening) | (4,115) | | (1,867) | |
| TWD (5 percent weakening) | 921 | 443 | 5,504 | 4,859 |
| EUR (5 percent weakening) | (2,518) | (2,199) | (2,923) | (3,666) |
| PLN (5 percent weakening) | 12 | | 928 | 1,065 |
| SGD (5 percent weakening) | | | 23 | |

A strengthening of the won against the above currencies as of June 30, 2011 and December 31, 2010 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(i) Profile

The interest rate profile of the Group's interest-bearing financial instruments as of June 30, 2011 and December 31, 2010 are as follows:

(In millions of won)

| | 2011 | 2010 |
|----------------------------------|-------------------|-------------|
| Fixed rate instruments | | |

| Variable rate instruments | | |
| Financial liabilities | (Won) (2,857,445) | (3,058,390) |

(ii) Fair value sensitivity analysis for fixed rate instruments

The Group has recognized some fixed rate financial assets as financial assets at fair value through profit or loss. The increase of the interest rate by 100 basis points would have decreased the Group's equity and profit and loss by (Won)497 million and the decrease of the interest rate by 100 basis points would have had an opposite effect.

(iii) Cash flow sensitivity analysis for variable rate instruments

As of June 30, 2011 and December 31, 2010, a change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below for each year following the reporting dates. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

The table below analyzes financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: inputs for the asset or liability that are not based on observable market data

Table of Contents9. Financial Instruments, Continued

The derivative financial assets and liabilities are classified as Level 2 since all significant inputs to compute the fair value of the over-the-counter derivatives were observable.

In order to determine the fair value of Level 3 instruments, management used a valuation technique in which all significant inputs were based on unobservable market data. The fair values of the Level 3 instruments have been computed using discounted cash flow and option pricing model considering the financial conditions of the invested companies and by discounting estimated future cash flows from stock using yield rate that reflects invested companies' credit risks.

Changes in Level 3 instruments are as follows:

(In millions of won)

| | December 31, 2010 | Purchases, disposal and others | Profit or loss | Net realized/unrealized gains included in Other comprehensive income | Transfer to other levels | June 30, 2011 |

(f) Capital Management

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Liabilities to equity ratio, net borrowing to equity ratio and other financial ratios are used by management to achieve optimal capital structure. Management also monitors the level of dividends to ordinary shareholders. Equity, defined by K-IFRS, is identical to the definition of capital, managed by management.

The Group designated foreign currency denominated convertible bonds as financial liabilities at fair value through profits or loss and recognizes the convertible bonds at fair value with changes in fair value recognized in profit or loss.

The bonds will be repaid at 116.77% of the principal amount at maturity unless the bonds are converted. During the year ended December 31, 2010, put options attached to the convertible bonds amounting to USD484 million were exercised and the Group repaid USD531 million for the convertible bonds at 109.75% of the principal amount. Put options not exercised were expired.

The Group measured the convertible bonds at their fair value using the market quotes available at Bloomberg and it was assumed that the remaining convertible bonds will be repaid in full at maturity and they were reclassified as current liabilities.

The Group is entitled to exercise a call option after three years from the date of issue at the amount of the principal and interest, calculated at 3.125% of the annual yield to maturity, from the issue date to the repayment date. The call option can be exercised only when the market price of the common shares on each of 20 trading days in 30 consecutive trading days ending on the trading day immediately prior to the date upon which notice of such redemption is published exceeds at least 130% of the conversion price. In addition, in the event that at least 90% of the initial principal amount of the bonds has been redeemed, converted, or purchased and cancelled, the remaining bonds may also be redeemed, at the Group's option, at the amount of the principal and interest (3.125% per annum) from the date of issue to the repayment date prior to their maturity.

Based on the terms and conditions of the bond, the conversion price was decreased from (Won)48,075 to (Won)47,892 per share due to the Controlling Company's declaration of cash dividends of (Won)500 per share for the year ended December 31, 2010.

As of June 30, 2011 and December 31, 2010, the number of common shares to be issued if the outstanding convertible bonds are fully converted is as follows:

| <i>(In won and share)</i> | 2011 | 2010 |

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Introduction

We have reviewed the accompanying condensed separate statement of financial position of LG Display Co., Ltd. (the Company) as of June 30, 2011, and the related condensed separate statements of comprehensive income for each of the three-month and six-month periods ended June 30, 2011 and 2010, changes in equity and cash flows for the six-month periods ended June 30, 2011 and 2010, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Condensed Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting* and for such internal controls as management determines are necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express a conclusion on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly/Semiannual Financial Statements of the Republic of Korea. A review consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed separate interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the financial statements, the European Commission issued a decision finding that LG Display Co., Ltd. engaged in anti-competitive activities in the Liquid Crystal Display (LCD) industry in violation of European competition laws and imposed a fine of EUR215 million on December 8, 2010. LG Display Co., Ltd., along with its subsidiaries, is under investigations by the Korea Fair Trade Commission and antitrust authorities in other countries with respect to possible anti-competitive activities in the LCD industry. In addition, LG Display Co., Ltd., along with its subsidiaries, has been named as defendants in a number of federal class actions in the United States and Canada and related individual lawsuits in connection with the alleged antitrust violations concerning the sale of LCD panels. The Company estimated and recognized losses related to these legal proceedings. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Company.

Other Considerations

We audited the separate statement of financial position as of December 31, 2010, and the separate statements of comprehensive income, changes in equity and cash flows for the year ended December 31, 2010, not accompanying this review report, in accordance with auditing standards generally accepted in the Republic of Korea, and our report thereon, dated February 24, 2011, expressed an unqualified opinion. The accompanying separate statement of financial position of the Company as of December 31, 2010, presented for comparative purposes, is not different from that audited by us in all material respects.

A weakening of the won, as indicated below, against the following currencies which comprise the Company's financial assets or liabilities denominated in foreign currency as of June 30, 2011 and December 31, 2010, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of each reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant. The changes in equity and profit or loss are as follows:

| <i>(In millions of won)</i> | June 30, 2011 | | December 31, 2010 | |
|-----------------------------|----------------------|-----------------------|--------------------------|-----------------------|
| | Equity | Profit or loss | Equity | Profit or loss |
| USD (5 percent weakening) | (21,265) | (21,591) | 9,022 | 8,633 |
| JPY (5 percent weakening) | (26,399) | (26,399) | (57,236) | (57,236) |
| TWD (5 percent weakening) | 549 | 549 | 5,033 | 5,033 |
| PLN (5 percent weakening) | 105 | 105 | 1,056 | 1,056 |
| EUR (5 percent weakening) | (540) | (540) | (459) | (459) |

A strengthening of the won against the above currencies as of June 30, 2011 and December 31, 2010 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(ii) Fair value sensitivity analysis for fixed rate instruments

The Company has recognized some fixed rate financial assets as financial assets at fair value through profit or loss. The increase of the interest rate by 100 basis points would have decreased the Company's equity and profit and loss by (Won)497 million and the decrease of the interest rate by 100 basis points would have had an opposite effect.

(iii) Cash flow sensitivity analysis for variable rate instruments

As of June 30, 2011 and December 31, 2010, a change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below for each year following the reporting dates. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

(ii) Interest rates used for determining fair value

The significant interest rates applied for determination of the above fair value as of June 30, 2011 and December 31, 2010 are as follows:

| | 2011 | 2010 |
|-----------------|-------|-------|
| Derivatives | 3.91% | 3.31% |
| Debts and bonds | 3.91% | 3.58% |

(iii) Fair value hierarchy

The table below analyzes financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: inputs for the asset or liability that are not based on observable market data

(In millions of won)

| | Level 1 | Level 2 | Level 3 | Total |

| Financial liabilities at fair value through profit or loss | (84,338) | | | (84,338) |
| | (Won) (84,338) | (956) | | (85,294) |

The derivative financial assets and liabilities are classified as Level 2 since all significant inputs to compute the fair value of the over-the-counter derivatives were observable.

Table of Contents9. Financial Instruments, Continued

In order to determine the fair value of Level 3 instruments, management used a valuation technique in which all significant inputs were based on unobservable market data. The fair values of the Level 3 instruments have been computed using discounted cash flow and option pricing model considering the financial conditions of the invested companies and by discounting estimated future cash flows from stock using yield rate that reflects invested companies' credit risks.

Changes in Level 3 instruments are as follows:

| <i>(In millions of won)</i> | December 31, 2010 | Purchases, disposal and others | Net realized/unrealized gains included in | | Transfer to other level | June 30, 2011 |

| Available-for-sale financial assets | (Won) 26,085 | 2,674 | | 3,864 | | 32,623 |

(f) Capital Management

Management's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Liabilities to equity ratio, net borrowing to equity ratio and other financial ratios are used by management to achieve optimal capital structure. Management also monitors the level of dividends to ordinary shareholders. Equity, defined by K-IFRS, is identical to the definition of capital, managed by management.

The Company is entitled to exercise a call option after three years from the date of issue at the amount of the principal and interest, calculated at 3.125% of the annual yield to maturity, from the issue date to the repayment date. The call option can be exercised only when the market price of the common shares on each of 20 trading days in 30 consecutive trading days ending on the trading day immediately prior to the date upon which notice of such redemption is published exceeds at least 130% of the conversion price. In addition, in the event that at least 90% of the initial principal amount of the bonds has been redeemed, converted, or purchased and cancelled, the remaining bonds may also be redeemed, at the Company's option, at the amount of the principal and interest (3.125% per annum) from the date of issue to the repayment date prior to their maturity.
