- Attached: Press Release

**LG DISPLAY REPORTS FOURTH QUARTER 2011 RESULTS**

SEOUL, Korea 27 January, 2012 LG Display [NYSE: LPL, KRX: 034220], a leading innovator of TFT-LCD technology, reported today unaudited earnings results based on consolidated K-IFRS (Korean International Financial Reporting Standards) for the three-month period ending December 31, 2011.

Sales in the fourth quarter of 2011 increased by 5% to KRW 6,610 billion from KRW 6,269 billion in the third quarter of 2011, and increased by 2% compared with KRW 6,483 billion in the fourth quarter of 2010.

Operating loss in the fourth quarter of 2011 was KRW 145 billion. This compares with a loss of KRW 492 billion in the third quarter of 2011 and operating loss of KRW 387 billion in the fourth quarter of 2010.

EBITDA in the fourth quarter of 2011 was KRW 849 billion, an increase of 86% from KRW 456 billion in the third quarter of 2011, and a year-on-year increase of 115% from KRW 396 billion in the fourth quarter of 2010.

Net loss was 6 billion in the fourth quarter of 2011 compared with net loss of KRW 688 billion in the third quarter of 2011 and net loss of KRW 268 billion in the fourth quarter of 2010.

The company posted stable annual sales of KRW 24,291 billion in 2011 despite the global economic recession.

Although uncertainty in the display market continued mainly due to the global economic recession, we were able to sustain our competitive industry position with a focus on differentiated products such as FPR 3D and IPS for smart devices, as well as high factory utilization rates. As a result, we are pleased to report a growth in market share in all product segments, sales and shipments remarked Dr. Sang Beom Han, newly appointed CEO of LG Display. Having recently received wide acclaim for our large sized OLED TV panel at the Consumer Electronic Show 2012, we are excited about the year ahead and will continue our strategy of developing differentiated products to define the market.

The company shipped a total of 8.41 million square meters of net display area in the fourth quarter of 2011, an increase of 4% quarter-on-quarter.

For the fourth quarter, the cost in production on a USD basis decreased by a mid-single digit percentage from the third quarter. The main factors contributing to this cost improvement were the results of proactive activities such as reducing overhead costs.

TFT-LCD panels for TVs, monitors, notebook PCs, smartbooks and mobile applications accounted for 47%, 20%, 13%, 9% and 11%, respectively, on a revenue basis in the fourth quarter.

With KRW 2,333 billion in cash and cash equivalents and 148% in liability to equity ratio as of December 31, 2011, the financial structure of the company remains stable.

**Outlook**

The following expectations are based on information as of December 31, 2011. The Company does not expect to update its expectations until next quarter's earnings announcement. However, the Company reserves the right to update its full business outlook, or any portion thereof, at any time and for any reason.

The total shipments of LG Display for the first quarter of 2012 will be similar to the fourth quarter of 2011 and prices are expected to remain stable. During the first quarter, we expect an increase in demand mainly by replenishment of inventory and the strengthened position of major customers. However, the duration of the demand is uncertain as the economic recession continues, said James Jeong, CFO of LG Display. Going forward, LG Display is confident about its ability to maintain its leadership with a host of differentiated products in the global display sector even in a rapidly changing market and well positioned to achieve an early turnaround.

**Earnings Conference and Conference Call**

LG Display will hold a Korean language earnings conference on January 27, 2012, at 4 p.m. Korea Standard Time at the Hall (B1), Twin Towers (East), Yeouido, Seoul, Korea.
