Offering Size and Additional Proceeds

The Issuer has increased the offering of the Notes from \$250.0 million aggregate principal amount to \$350.0 million aggregate principal amount. References in the Preliminary Prospectus Supplement to the principal amount of the Notes are hereby amended to reference the issuance of \$350.0 million aggregate principal amount of Notes.

The net proceeds (after underwriting discount and estimated expenses) from the offering of the Notes are expected to total \$344.0 million. All net proceeds will be used to reduce amounts outstanding under the Issuer's revolving credit facility. Because the "as adjusted" amount under the revolving credit facility due 2016 for the purposes of the table under "Capitalization" in the Prospectus Supplement prior to the application of the net proceeds is less than the expected net proceeds, the capitalization table is amended to reflect, in the "as adjusted" column, \$0 principal amount outstanding for the revolving credit facility due 2016 and "as adjusted" cash and cash equivalents of \$77.9 million.
