Approximate date of proposed public offering: From time to time after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box):

when declared effective pursuant to Section 8(c).

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Title of Securities Being Registered	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee(1)
Common Stock, \$0.01 par value per share(2)(3)		
Preferred Stock, \$0.01 par value per share(2)		
Warrants(4)		
Debt Securities(5)		
Units(6)		
Total(7)	\$1,000,000,000(7)	\$116,100.00(8)

- (1) Estimated pursuant to Rule 457(o) under the Securities Act of 1933 solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this Registration Statement.
- (2) Subject to Note 8 below, there is being registered hereunder an indeterminate number of shares of common stock or preferred stock as may be sold, from time to time, separately or as units in combination with other securities registered hereunder.
- (3) Includes such indeterminate number of shares of common stock as may, from time to time, be issued upon conversion or exchange of other securities registered hereunder, to the extent any such securities are, by their terms, convertible or exchangeable for common stock.
- (4) Subject to Note 8 below, there is being registered hereunder an indeterminate number of warrants as may be sold, from time to time, separately or as units in combination with other securities registered hereunder, representing rights to purchase common stock, preferred stock or debt securities.
- (5) Subject to Note 8 below, there is being registered hereunder an indeterminate number of debt securities as may be sold, from time to time, separately or as units in combination with other securities registered hereunder. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$1,000,000,000.
- (6) Subject to Note 8 below, there is being registered hereunder an indeterminate number of units issuable upon conversion or exchange of securities registered hereunder to the extent any such securities, are, by their terms convertible into or exchangeable for units, including upon the exercise of warrants. Each unit may consist of a combination of any two or more of the securities being registered hereby or debt obligations of third parties, including U.S. Treasury securities.
- (7) In no event will the aggregate offering price of all securities issued from time to time pursuant to this Registration Statement exceed \$1,000,000,000.
- (8) Previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

We are an externally managed finance company. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in leveraged companies, including middle-market companies, in the form of senior secured loans, mezzanine loans and equity securities.

We were formed in February 2007 as Solar Capital LLC, a Maryland limited liability company, and commenced operations in March 2007. On February 9, 2010, Solar Capital LLC was merged with and into Solar Capital Ltd., an externally managed, non-diversified, closed-end management investment company that has elected to be treated as a business development company under the Investment Company Act of

Edgar Filing: Solar Capital Ltd. - Form POS 8C

1940, or the 1940 Act. We are managed by Solar Capital Partners, LLC. Solar Capital Management, LLC provides the administrative services necessary for us to operate.

We may offer, from time to time, in one or more offerings or series, up to \$1,000,000,000 of our common stock, preferred stock, debt securities, units or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, which we refer to, collectively, as the securities. The preferred stock and warrants offered hereby may be convertible or exchangeable into shares of our common stock. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

In the event we offer common stock, the offering price per share of our common stock less any underwriting commissions or discounts will generally not be less than the net asset value per share of our common stock at the time we make the offering. However, we may issue shares of our common stock pursuant to this prospectus at a price per share that is less than our net asset value per share (a) with the prior approval of the majority of our common stockholders or (b) under such other circumstances as the SEC may permit.

The securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of the securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any of the securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of such securities.

Our common stock is listed on the NASDAQ Global Select Market under the symbol SLRC. On March 26, 2012, the last reported sales price on the NASDAQ Global Select Market for our common stock was \$22.20 per share.

This prospectus, and the accompanying prospectus supplement, contains important information about us that a prospective investor should know before investing in our common stock. Please read this prospectus, and the accompanying prospectus supplement, before investing, and keep it for future reference. We are required to file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission. This information is available free of charge by contacting us by mail at 500 Park Avenue, New York, NY 10022, by telephone at (212) 993-1670 or on our website at <http://www.solarcapltd.com>. The Securities and Exchange Commission also maintains a website at <http://www.sec.gov> that contains such information. Information contained on our website is not incorporated by reference into this prospectus, and you should not consider that information to be part of this prospectus or the accompanying prospectus supplement.

An investment in our common stock is very risky and highly speculative. Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value. In addition, the companies in which we invest are subject to special risks. See Risk Factors beginning on page 17 to read about factors you should consider, including the risk of leverage, before investing in our common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

This prospectus may not be used to consummate sales of shares of common stock unless accompanied by a prospectus supplement.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission, or SEC, using the shelf registration process. Under the shelf registration process, which constitutes a delayed offering in reliance on Rule 415 under the Securities Act of 1933, as amended, or the Securities Act, we may offer, from time to time, in one or more offerings or series, up to \$1,000,000,000 of our common stock, preferred stock, debt securities, units or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities on the terms to be determined at the time of the offering. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. A prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any such supplements together with any exhibits and the additional information described under Available Information and in the Summary and Risk Factors sections before you make an investment decision.

Table of Contents

SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under Risk Factors and the other information included in this prospectus and the documents to which we have referred.

We were formed in February 2007 as Solar Capital LLC, a Maryland limited liability company, and commenced operations in March 2007 after conducting a private placement of units of membership interest (units). On February 9, 2010, Solar Capital LLC was merged with and into Solar Capital Ltd., a Maryland corporation, which we refer to as the Solar Capital Merger, concurrent with the pricing of our initial public offering, leaving Solar Capital Ltd. as the surviving entity. Except where the context suggests otherwise, the terms we, us, our and Solar Capital refer to Solar Capital LLC prior to the Solar Capital Merger, and Solar Capital Ltd. after the Solar Capital Merger. In addition, the terms Solar Capital Partners or investment adviser refer to Solar Capital Partners, LLC, and Solar Capital Management or the administrator refers to Solar Capital Management, LLC.

In this prospectus, we use the term leveraged to refer to companies of any size with non-investment grade debt outstanding or, if not explicitly rated, those which we believe would be rated as non-investment grade based on their leverage levels and other terms. In addition, we use the term middle-market to refer to companies with annual revenues between \$50 million and \$1 billion.

Solar Capital

Solar Capital Ltd., a Maryland corporation formed in November 2007, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company (BDC) under the 1940 Act. In addition, for tax purposes we have elected to be treated as a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code).

On February 9, 2010, we priced our initial public offering, selling 5.68 million shares. Concurrent with our initial public offering, Michael S. Gross, our chairman and chief executive officer, and Bruce Spohler, our chief operating officer, collectively purchased an additional 0.6 million shares through a private placement transaction exempt from registration under the Securities Act of 1933, as amended, or the Securities Act (the Concurrent Private Placement). Solar Capital Ltd. issued an aggregate of approximately 26.65 million shares of common stock and \$125 million in senior unsecured notes (the Senior Unsecured Notes) to the existing Solar Capital LLC unit holders in connection with the Solar Capital Merger. Solar Capital Ltd. had no assets or operations prior to completion of the Solar Capital Merger and as a result, the books and records of Solar Capital LLC have become the books and records of the surviving entity. As of December 17, 2010, the Senior Unsecured Notes have been repaid from proceeds of a private placement transaction that we completed on November 30, 2010 and from borrowings under our credit facility established in December 2010.

We invest primarily in U.S. middle-market companies, where we believe the supply of primary capital is limited and the investment opportunities are most attractive. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in leveraged middle market companies in the form of senior secured loans, mezzanine loans and equity securities. From time to time, we may also invest in public companies that are thinly traded. Our business model is focused primarily on the direct origination of investments through portfolio companies or their financial sponsors. Our investments generally range between \$20 million and \$100 million each, although we expect that this investment size will vary proportionately with the size of our capital base. We are managed by Solar Capital Partners. Solar Capital Management provides the administrative services necessary for us to operate. In addition, we may invest

a

1

Table of Contents

portion of our portfolio in other types of investments, which we refer to as opportunistic investments, which are not our primary focus but are intended to enhance our overall returns. These investments may include, but are not limited to, direct investments in public companies that are not thinly traded and securities of leveraged companies located in select countries outside of the United States.

As of December 31, 2011, our long term investments totaled \$1.05 billion and our net asset value was \$805.9 million. Our portfolio was comprised of debt and equity investments in 40 portfolio companies and our income producing assets, which represented 91.2% of our total portfolio, had a weighted average annualized yield on a fair value basis of approximately 14.2%.

During the year ended December 31, 2011, we originated approximately \$318.8 million of new investments in 13 portfolio companies and approximately \$76.8 million was invested in six existing portfolio companies. We also had approximately \$308.7 million in debt repayments of existing portfolio companies and sales of securities of 4 portfolio companies for approximately \$29.4 million, during 2011.

About Solar Capital Partners

Solar Capital Partners, our investment adviser, is controlled and led by Michael S. Gross, our chairman and chief executive officer, and Bruce Spohler, our chief operating officer. They are supported by a team of dedicated investment professionals, including senior team members Brian Gerson, Cedric Henley, David Mait and Suhail Shaikh. We refer to Messrs. Gross, Spohler, Gerson, Henley, Mait and Shaikh as Solar Capital Partners' senior investment professionals. Solar Capital Partners' investment team has extensive experience in the private equity and leveraged lending industries, as well as significant contacts with financial sponsors operating in those industries.

In addition, Solar Capital Partners presently serves as the investment adviser for Solar Senior Capital Ltd, or Solar Senior, a publicly traded business development company with more than \$300 million of investable capital that invests in the senior debt securities of leveraged middle market companies similar to those we intend to target for investment. The investment team led by Messrs. Gross and Spohler has invested in approximately 90 different portfolio companies for Solar Capital and Solar Senior, which investments involved an aggregate of approximately 80 different financial sponsors, through December 31, 2011. Since Solar Capital's inception, these investment professionals have used their relationships in the middle-market financial sponsor and financial intermediary community to generate deal flow. As of March 26, 2012, Mr. Gross and Mr. Spohler beneficially owned, either directly or indirectly, approximately 5.76% and 5.62%, respectively, of our outstanding common stock.

Mr. Gross has 25 years of experience in the private equity, distressed debt and mezzanine lending businesses and has been involved in originating, structuring, negotiating, consummating and managing private equity, distressed debt and mezzanine lending transactions. We also rely on the 25 years of experience of Mr. Spohler, who has served as our chief operating officer and a partner of Solar Capital Partners since inception. In addition to Messrs. Gross and Spohler, Solar Capital Partners' senior investment professionals include Messrs. Gerson, Henley, Mait and Shaikh, each of whom has extensive experience in originating, evaluating and structuring investments in the types of middle-market companies we currently target.

Solar Capital Partners' senior investment professionals have been active participants in the primary and secondary leveraged credit markets throughout their careers. They have effectively managed portfolios of distressed and mezzanine debt as well as other investment types. The depth of their experience and credit market expertise has led them through various stages of the economic cycle as well as several market disruptions.

Table of Contents

Market Opportunity

Solar Capital invests primarily in senior secured loans, mezzanine loans and equity securities of middle-market leveraged companies. We believe that the size of this market, coupled with leveraged companies' need for flexible sources of capital at attractive terms and rates, create an attractive investment environment for us. See **Business Market Opportunity**.

Middle-market companies have faced increasing difficulty in accessing the capital markets. While many middle-market companies were formerly able to raise funds by issuing high-yield bonds, we believe this approach to financing has become more difficult in recent years as institutional investors have sought to invest in larger, more liquid offerings. In addition, many private finance companies that historically financed their lending and investing activities through securitization transactions have lost that source of funding and reduced lending significantly. Moreover, consolidation and the illiquid nature of investments has resulted in fewer middle market lenders and market participants.

There is a large pool of uninvested private equity capital likely to seek additional capital to support their investments. There is currently over \$520 billion of uninvested private equity capital seeking debt financing to support acquisitions. We expect that middle-market private equity firms will continue to invest the approximately \$185 billion raised since 2000 in middle-market companies and that those private equity firms will seek to support their investments with mezzanine loans from sources such as Solar Capital. Additionally, over \$17.4 billion was raised by middle-market sponsors during 2011, which we believe demonstrates the continued appetite for middle-market acquisitions that require debt financing.

The significant amount of debt maturing through 2018 should provide additional demand for capital. A high volume of financings were completed between the years 2004 and 2007, which are expected to mature over the next few years. We believe that this supply of prospective lending opportunities coupled with a lack of available credit in the middle-market lending space may offer attractive risk-adjusted returns to investors.

Investing in private middle-market debt provides an attractive risk reward profile. In general, terms for illiquid, middle-market subordinated debt have been more attractive than those for larger corporations which are typically more liquid. We believe this is because fewer institutions are able to invest in illiquid asset classes. In 2011, on average, the total debt to EBITDA ratio for middle-market LBOs was 4.3x, versus 5.4x for large capitalization LBOs. This reduced leverage provides further cushion for borrowers to meet debt service obligations.

Therefore, we believe that there is an attractive opportunity to invest in senior secured loans, mezzanine loans and equity securities of leveraged companies, and that we are well positioned to serve this market.

Competitive Advantages and Strategy

We believe that we have the following competitive advantages over other providers of financing to leveraged companies. See **Business Competitive Advantages and Strategy**.

Management Expertise

Edgar Filing: Solar Capital Ltd. - Form POS 8C

As managing partner, Mr. Gross has principal management responsibility for Solar Capital Partners, to which he currently dedicates substantially all of his time. Mr. Gross has 25 years of experience in leveraged finance, private equity and distressed debt investing. Mr. Spohler, our chief operating officer and a partner of Solar Capital Partners, has 25 years of experience in evaluating and executing leverage finance transactions. We believe that Messrs. Gross and Spohler have developed a strong reputation in the capital markets, and that this experience provides us with a competitive advantage in identifying and investing in leveraged companies with the potential to generate returns.

Table of Contents

In addition to Messrs. Gross and Spohler, Solar Capital Partners' senior investment team includes Messrs. Gerson, Henley, Mait and Shaikh, each of whom has extensive experience in originating, evaluating and structuring investments in the types of middle-market companies we currently target. Solar Capital Partners' senior investment professionals have an average of over 20 years of experience in the private equity and leveraged lending industries.

Investment Portfolio

Our portfolio investments consist of portfolio companies that have strong cash flows and have maintained financial and operating performance despite the recent economic climate. As of December 31, 2011, over 99% of our total portfolio value of income producing assets was comprised of performing assets. The majority of our assets have been seasoned, which has allowed us to gain a solid understanding of our borrowers and the industries in which they compete.

Investment Capacity

The proceeds from our initial public offering and the Concurrent Private Placement, the borrowing capacity under our credit facilities and our \$35 million senior secured term loan (the "Term Loan"), and the expected repayments of existing investments provide us with a substantial amount of capital available for deployment into new investment opportunities. We believe we are well positioned for the current marketplace.

Solar Capital's Limited Leverage

As of December 31, 2011, we had outstanding borrowings of \$201.4 million. We believe our relatively low level of leverage provides us with a competitive advantage, allowing us to anticipate providing a consistent dividend to our investors as proceeds from our investments are available for reinvestment as opposed to being consumed by debt repayment. We may increase our relative level of debt in the future. However, we do not currently anticipate operating with a substantial amount of debt relative to our total assets.

Proprietary Sourcing and Origination

We believe that Solar Capital Partners' senior investment professionals' longstanding relationships with financial sponsors, commercial and investment banks, management teams and other financial intermediaries provide us with a strong pipeline of proprietary origination opportunities. We believe the broad expertise of Solar Capital Partners' senior investment team and their ability to draw upon their average of over 20 years of investment experience enable us to identify, assess and structure investments successfully. We expect to continue leveraging the relationships Mr. Gross established while sourcing and originating investments at Apollo Investment Corporation as well as the financial sponsor relationships Mr. Spohler developed while he was a co-head of CIBC World Markets' U.S. Leveraged Finance Group.

Since its inception, Solar Capital Partners has sourced investments in approximately 90 different portfolio companies for both Solar Capital and Solar Senior Capital Ltd. ("Solar Senior"), collectively, which investments involved an aggregate of approximately 80 different financial sponsors, through December 31, 2011.

Versatile Transaction Structuring and Flexibility of Capital

We believe Solar Capital Partners' senior investment team's broad expertise and ability to draw upon their extensive experience enable us to identify, assess and structure investments successfully across all levels of a company's capital structure and to manage potential risk and return at all stages of the economic cycle. While we are subject to significant regulation as a BDC, we are not subject to many of the regulatory limitations that govern traditional lending institutions such as banks. As a result, we believe that we can be more flexible than

Table of Contents

such lending institutions in selecting and structuring investments, adjusting investment criteria, transaction structures and, in some cases, the types of securities in which we invest. We believe financial sponsors, management teams and investment banks see this flexibility as a benefit, making us an attractive financing partner.

Emphasis on Achieving Strong Risk-Adjusted Returns

Solar Capital Partners uses a disciplined investment and risk management process that emphasizes a rigorous fundamental research and analysis framework. Solar Capital Partners seeks to build our portfolio on a bottom-up basis, choosing and sizing individual positions based on their relative risk/reward profiles as a function of the associated downside risk, volatility, correlation with the existing portfolio and liquidity. At the same time, Solar Capital Partners takes into consideration a variety of factors in managing our portfolio and imposes portfolio-based risk constraints promoting a more diverse portfolio of investments and limiting issuer and industry concentration. Our value-oriented investment philosophy focuses on preserving capital and ensuring that our investments have an appropriate return profile in relation to risk. When market conditions make it difficult for us to invest according to our criteria, we are highly selective in deploying our capital. We do not pursue short-term origination targets. We believe this approach enables us to build an attractive investment portfolio that meets our return and value criteria over the long term.

We believe it is critical to conduct extensive due diligence on investment targets. In evaluating new investments we, through Solar Capital Partners, conduct a rigorous due diligence process that draws upon investment experience, industry expertise and network of contacts of our senior investment professionals, as well as the other members of our investment team.

Deep Industry Focus with Substantial Information Flow

We concentrate our investing activities in industries characterized by strong cash flow and in which Solar Capital Partners' investment professionals have deep investment experience. During his time with the Apollo entities, Mr. Gross oversaw investments in over 200 companies in 20 industries. As a result of their investment experience, Messrs. Gross and Spohler, together with Solar Capital Partners' other senior investment professionals, have long-term relationships with management consultants and management teams in the industries we target, as well as substantial information concerning those industries.

Longer Investment Horizon

Unlike private equity and venture capital funds, we will not be subject to standard periodic capital return requirements. Such requirements typically stipulate that the capital of these funds, together with any capital gains on such invested funds, can only be invested once and must be returned to investors after a pre-agreed time period. We believe that our flexibility to make investments with a long-term view and without the capital return requirements of traditional private investment vehicles provides us with the opportunity to generate favorable returns on invested capital and enables us to be a better long-term partner for our portfolio companies.

Table of Contents

Risk Factors

The value of our assets, as well as the market price of our shares, will fluctuate. Our investments may be risky, and you may lose all or part of your investment in us. Investing in Solar Capital involves other risks, including the following:

We operate in a highly competitive market for investment opportunities;

The lack of liquidity in our investments may adversely affect our business;

We may borrow money, which would magnify the potential for gain or loss on amounts invested and may increase the risk of investing in us;

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net investment income;

There will be uncertainty as to the value of our portfolio investments;

We may experience fluctuations in our quarterly results;

We will become subject to corporate-level income tax on all of our income if we are unable to continue to qualify as a regulated investment company, or RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended, which we refer to as the Code, which would have a material adverse effect on our financial performance;

We are dependent upon Solar Capital Partners' key personnel for our future success;

We cannot assure you that shares of our common stock will not trade at a market price below our net asset value per share;

The net asset value per share of our common stock may be diluted if we sell shares of our common stock in one or more offerings at prices below the then current net asset value per share of our common stock or securities convertible into shares of our common stock;

Our common stock price may be volatile and may decrease substantially;

There is a risk that our stockholders may not receive distributions or that our distributions may not grow over time;

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock; and

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital. As a BDC, the necessity of raising additional capital may expose us to risks, including the typical risks associated with leverage.

See **Risk Factors** beginning on page 17 and the other information included in this prospectus, for additional discussion of factors you should carefully consider before deciding to invest in our securities.

Table of Contents

Operating and Regulatory Structure

Immediately prior to the pricing of our initial public offering, Solar Capital LLC was merged with and into Solar Capital Ltd., a Maryland corporation that is an externally managed, non-diversified closed-end management investment company which has elected to be treated as a BDC under the 1940 Act. As a BDC, we are required to meet regulatory tests, including the requirement to invest at least 70% of our total assets in qualifying assets. Qualifying assets generally include, among other things, securities of eligible portfolio companies. Eligible portfolio companies generally include U.S. companies that are not investment companies and that do not have securities listed on a national exchange. See Regulation as a Business Development Company. We may also borrow funds to make investments. In addition, we have elected to be treated for federal income tax purposes, and intend to continue to qualify annually, as a RIC under Subchapter M of the Code. See Material U.S. Federal Income Tax Considerations.

Our investment activities are managed by Solar Capital Partners and supervised by our board of directors. Solar Capital Partners is an investment adviser that is registered under the Investment Advisers Act of 1940, as amended, or the Advisers Act. Under our investment advisory and management agreement, which we refer to as the Investment Advisory and Management Agreement, we have agreed to pay Solar Capital Partners an annual base management fee based on our gross assets as well as an incentive fee based on our performance. See Investment Advisory and Management Agreement. We have also entered into an administration agreement, which we refer to as the Administration Agreement, under which we have agreed to reimburse Solar Capital Management for the allocable portion of overhead and other expenses incurred by Solar Capital Management in performing its obligations under the Administration Agreement, including furnishing us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities, as well as providing us with other administrative services. See Administration Agreement.

Our Corporate Information

Table of Contents

OFFERINGS

We may offer, from time to time, in one or more offerings or series, up to \$1,000,000,000 of our common stock, preferred stock, debt securities, units or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, on terms to be determined at the time of the offering. We will offer our securities at prices and on terms to be set forth in one or more supplements to this prospectus.

At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring on the earlier of the one-year anniversary of the date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012. However, notwithstanding such stockholder approval, since our initial public offering on February 9, 2010, we have not sold any shares of our common stock at a price below our then current net asset value per share. At our 2012 Annual Stockholders Meeting, we have sought the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share. Any such issuance of shares of our common stock below net asset value will be dilutive to the net asset value of our common stock. See Risk Factors Risks Relating to an Investment in Our Securities and Sales of Common Stock Below Net Asset Value.

The securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of the securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any of the securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of such securities.

Set forth below is additional information regarding offerings of our common stock:

Use of Proceeds

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from the sale of our securities for general corporate purposes, which includes, among other things, (a) investing in portfolio companies in accordance with our investment objective and strategies and market conditions and (b) repaying indebtedness. Each supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. See Use of Proceeds.

SLRC

Distributions

To the extent that we have income available, we intend to distribute quarterly dividends to our stockholders. The amount of our dividends, if any, will be determined by our board of directors. Any dividends to our stockholders will be declared out of assets legally available for distribution. The specific tax characteristics of our dividends will be reported to shareholders after the end of each calendar year. We may issue preferred stock from time to time, although we have no immediate intention to do so. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash dividends at an annual rate that will be fixed or will vary for the successive dividend periods for each series. In general, the dividend periods for fixed rate preferred stock will

be quarterly.

Table of Contents

Taxation	We have elected to be treated for federal income tax purposes, and intend to continue to qualify annually, as a RIC under Subchapter M of the Code. As a RIC, we generally will not have to pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To obtain and maintain our RIC tax treatment, we must meet specified source-of-income and asset diversification requirements and distribute annually at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. See Plan of Distribution and Material U.S. Federal Income Tax Considerations in this prospectus.
Leverage	We have historically and will in the future borrow funds to make investments. As a result, we will be exposed to the risks of leverage, which may be considered a speculative investment technique. The use of leverage magnifies the potential for gain and loss on amounts invested and therefore increases the risks associated with investing in our securities. In addition, the costs associated with our borrowings, including any increase in the management fee payable to our investment adviser, Solar Capital Partners, will be borne by our common stockholders.
Investment Advisory Fees	We pay Solar Capital Partners a fee for its services under the Investment Advisory and Management Agreement consisting of two components a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 2.00% of our gross assets, which includes any borrowings for investment purposes. The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears and equals 20% of our pre-incentive fee net investment income for the immediately preceding quarter, subject to a preferred return, or hurdle, and a catch up feature. The second part is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory and Management Agreement) in an amount equal to 20% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. See Investment Advisory and Management Agreement in this prospectus.
Administration Agreement	We reimburse Solar Capital Management for the allocable portion of overhead and other expenses incurred by Solar Capital Management in performing its obligations under the Administration Agreement, including furnishing us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities, as well as providing us with other administrative services. In addition, we reimburse Solar Capital Management for the fees and expenses associated with performing compliance functions, and our allocable

Table of Contents

portion of the compensation of our chief financial officer and any administrative support staff. See Administration Agreement in this prospectus.

Trading

Shares of closed-end investment companies frequently trade at a discount to their net asset value. The risk that our shares may trade at a discount to our net asset value is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether our shares will trade above, at or below net asset value.

License Agreement

We have entered into a license agreement with Solar Capital Partners, pursuant to which Solar Capital Partners has agreed to grant us a non-exclusive license to use the name Solar Capital. See License Agreement in this prospectus.

Dividend Reinvestment Plan

We have adopted an opt out dividend reinvestment plan. If your shares of common stock are registered in your own name, your distributions will automatically be reinvested under our dividend reinvestment plan in additional whole and fractional shares of common stock, unless you opt out of our dividend reinvestment plan so as to receive cash dividends by delivering a written notice to our plan administrator. If your shares are held in the name of a broker or other nominee, you should contact the broker or nominee for details regarding opting out of our dividend reinvestment plan. Stockholders who receive distributions in the form of stock will be subject to the same federal, state and local tax consequences as stockholders who elect to receive their distributions in cash. See Dividend Reinvestment Plan in this prospectus.

Certain Anti-Takeover Measures

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from making an acquisition proposal for us. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price for our common stock. See Description of Our Capital Stock in this prospectus.

Available Information

We are required to file periodic reports, current reports, proxy statements and other information with the SEC. This information is available at the SEC's public reference room at 100 F Street, NE, Washington, D.C. 20549 and on the SEC's website at <http://www.sec.gov>. The public may obtain information on the operation of the SEC's public reference room by calling the SEC at (202) 551-8090. This information is also available free of charge by contacting us at Solar Capital Ltd., 500 Park Avenue, New York, NY 10022, by telephone at (212) 993-1670 or on our website at <http://www.solarcapltd.com>.

Table of Contents

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that you will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by us or Solar Capital, or that we will pay fees or expenses, you will indirectly bear such fees or expenses as an investor in Solar Capital Ltd.

Stockholder transaction expenses:

Sales load borne by us (as a percentage of offering price)	%(1)
Offering expenses borne by us (as a percentage of offering price)	%(2)
Dividend reinvestment plan expenses	None(3)

Total stockholder transaction expenses (as a percentage of offering price) %(2)

Annual expenses (as a percentage of net assets attributable to common stock):

Base management fee	2.56%(4)
Incentive fees payable under our Investment Advisory and Management Agreement	2.54%(5)
Interest payments on borrowed funds	1.14%(6)
Other expenses (estimated)	0.74%(7)

Total annual expenses 6.98%

Example

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed that our annual operating expenses would remain at the levels set forth in the table above and have excluded performance-based incentive fees. See Note 6 below for additional information regarding certain assumptions regarding our level of leverage. In the event that shares to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 44	\$ 134	\$ 224	\$ 455

- (1) In the event that the shares of common stock to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load and the Example will be updated accordingly.
- (2) The prospectus supplement corresponding to each offering will disclose the applicable offering expenses and total stockholder transaction expenses.
- (3) The expenses of the dividend reinvestment plan are included in other expenses.
- (4) Our base management fee under the Investment Advisory and Management Agreement is based on our gross assets, which is defined as all the assets of Solar Capital, including those acquired using borrowings for investment purposes, and assumes the base management fee remains consistent with fees incurred for the year ended December 31, 2011. See Investment Advisory and Management Agreement.
- (5) Assumes that annual incentive fees earned by our investment adviser, Solar Capital Partners, remain consistent with the incentive fees earned by Solar Capital Partners for the year ended December 31, 2011. The incentive fee consists of two parts:

Edgar Filing: Solar Capital Ltd. - Form POS 8C

The first part, which was payable quarterly in arrears, equals 20% of the excess, if any, of our Pre-Incentive Fee Net Investment Income that exceeds a 1.75% quarterly (7.00% annualized) hurdle rate, which we refer to as the Hurdle, subject to a catch-up provision measured at the end of each calendar quarter. The first part of the incentive fee is computed and paid on income that may include interest that is accrued but not yet received in cash. The operation of the first part of the incentive fee for each quarter is as follows:

no incentive fee is payable to our investment adviser in any calendar quarter in which our Pre-Incentive Fee Net Investment Income does not exceed the Hurdle of 1.75%;

Table of Contents

100% of our Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the Hurdle but is less than 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser. We refer to this portion of our Pre-Incentive Fee Net Investment Income (which exceeds the Hurdle but is less than 2.1875%) as the catch-up. The catch-up is meant to provide our investment adviser with 20% of our Pre-Incentive Fee Net Investment Income, as if a Hurdle did not apply when our Pre-Incentive Fee Net Investment Income exceeds 2.1875% in any calendar quarter; and 20% of the amount of our Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser (once the Hurdle is reached and the catch-up is achieved, 20% of all Pre-Incentive Fee Investment Income thereafter is allocated to our investment adviser).

The second part of the incentive fee equals 20% of our Incentive Fee Capital Gains, if any, which equals our realized capital gains on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. The second part of the incentive fee is payable, in arrears, at the end of each calendar year (or upon termination of the Investment Advisory and Management Agreement, as of the termination date). For a more detailed discussion of the calculation of this fee, see Investment Advisory and Management Agreement.

- (6) We may borrow funds from time to time to make investments to the extent we determine that the economic situation is conducive to doing so. The costs associated with our outstanding borrowings are indirectly born by our investors. For purposes of this section, we have computed interest expense using the average balance outstanding for all borrowings during the year ended December 31, 2011. We used the LIBOR rate on December 31, 2011 and the interest rate on our revolving credit facilities and our Term Loan. We have also included the estimated amortization of fees incurred in establishing our revolving credit facilities and our Term Loan. Additionally, we included the estimated cost of commitment fees for unused balances on our revolving credit facilities. As of December 31, 2011, we had \$201.4 million outstanding and \$303.6 million remaining available to us under our revolving credit facilities and we had \$35 million outstanding under our Term Loan. We may also issue preferred stock, subject to our compliance with applicable requirements under the 1940 Act.
- (7) Other expenses are based on the amounts incurred for the year ended December 31, 2011 and include our overhead expenses, including payments under our Administration Agreement based on our allocable portion of overhead and other expenses incurred by Solar Capital Management in performing its obligations under the Administration Agreement. See Administration Agreement.

The example and the expenses in the tables above should not be considered a representation of our future expenses, and actual expenses may be greater or less than those shown. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The incentive fee under the Investment Advisory and Management Agreement, which, assuming a 5% annual return, would either not be payable or would have an insignificant impact on the expense amounts shown above, is not included in the example. This illustration assumes that we will not realize any capital gains (computed net of all realized capital losses and unrealized capital depreciation) in any of the indicated time periods. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses and returns to our investors would be higher. For example, if we assumed that we received our 5% annual return completely in the form of net realized capital gains on our investments, computed net of all cumulative unrealized depreciation on our investments, the projected dollar amount of total cumulative expenses set forth in the above illustration would be as follows:

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 54	\$ 162	\$ 270	\$ 533

Table of Contents

In addition, the example assumes no sales load. Also, while the example assumes reinvestment of all dividends at net asset value, participants in our dividend reinvestment plan will receive a number of shares of our common stock, determined by dividing the total dollar amount of the dividend payable to a participant by the market price per share of our common stock at the close of trading on the dividend payment date, which may be at, above or below net asset value. See [Dividend Reinvestment Plan](#) for additional information regarding our dividend reinvestment plan.

Table of Contents**SELECTED FINANCIAL AND OTHER DATA**

The selected financial and other data below should be read in conjunction with our Management's Discussion and Analysis of Financial Condition and Results of Operations and the financial statements and notes thereto. Financial information is presented for the fiscal years ended December 31, 2011, 2010, 2009 and 2008 and for the period from March 13, 2007 (Solar Capital LLC inception) through December 31, 2007. Financial information for the periods ending December 31, 2011, 2010, 2009, 2008 and 2007 has been derived from our financial statements that were audited by KPMG LLP (KPMG), an independent registered public accounting firm.

- (1) Throughout this document, the weighted average yield on income producing investments is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities, plus the effective interest yield on preferred shares divided by (b) total income producing investments at fair value. The weighted average yield is computed as of the balance sheet date and excludes assets on non-accrual status or on a cost recovery basis as of such date.

Table of Contents

- (2) For this calculation, the weighted average yield on income producing investments is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities, plus the effective interest yield on preferred shares divided by (b) total income producing investments at cost. The weighted average yield is computed as of the balance sheet date and excludes assets on non-accrual status or on a cost recovery basis as of such date.
- (3) The number of shares used to calculate weighted average shares for use in computations on a per share basis have been decreased retroactively by a factor of approximately 0.4022 for all periods prior to February 9, 2010. This factor represents the effective impact of the reduction in shares resulting from the Solar Capital Merger. The per share calculations are based on 32,860,454 weighted average shares outstanding as of December 31, 2009, 2008, and 2007, 36,383,158 shares outstanding and 33,258,402 weighted average shares outstanding for the year ended December 31, 2010, and 36,608,038 shares outstanding and 36,470,384 weighted average shares outstanding for the year ended December 31, 2011.
- (4) Unaudited.

Table of Contents

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline or the value of our preferred stock, debt securities, units or warrants may decline, and you may lose all or part of your investment.

Risks Related to Our Investments

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we target in leveraged companies. We compete with other BDCs, public and private funds, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments than we do, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

We do not seek to compete primarily based on the interest rates we will offer, and we believe that some of our competitors may make loans with interest rates that will be comparable to or lower than the rates we offer. We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss.

Our investments are very risky and highly speculative.

We invest primarily in senior secured term loans, mezzanine debt and select equity investments issued by leveraged companies.

Senior Secured Loans. When we make a senior secured term loan investment in a portfolio company, we generally take a security interest in the available assets of the portfolio company, including the equity interests of its subsidiaries, which we expect to help mitigate the risk that we will not be repaid. However, there is a risk that the collateral securing our loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of the portfolio company to raise additional capital, and, in some circumstances, our lien could be subordinated to claims of other creditors. In addition, deterioration in a portfolio company's financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for the loan. Consequently, the fact that a loan is secured does not guarantee that we will receive principal and interest payments according to the loan's terms, or at all, or that we will be able to collect on

the loan should we be forced to enforce our remedies.

Mezzanine Loans. Our mezzanine debt investments are generally subordinated to senior loans and are generally unsecured. As such, other creditors may rank senior to us in the event of an insolvency. This may result in an above average amount of risk and loss of principal.

Table of Contents

Equity Investments. When we invest in senior secured loans or mezzanine loans, we may acquire equity securities as well. In addition, we may invest directly in the equity securities of portfolio companies. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

In addition, investing in middle-market companies involves a number of significant risks, including:

these companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment;

they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;

they are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

they generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our investment adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies; and

they may have difficulty accessing the capital markets to meet future capital needs, which may limit their ability to grow or to repay their outstanding indebtedness upon maturity.

The lack of liquidity in our investments may adversely affect our business.

We generally make investments in private companies. Substantially all of these securities are subject to legal and other restrictions on resale or will otherwise be less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we have material non-public information regarding such portfolio company.

Our portfolio may be concentrated in a limited number of portfolio companies and industries, which will subject us to a risk of significant loss if any of these companies defaults on its obligations under any of its debt instruments or if there is a downturn in a particular industry.

Our portfolio may be concentrated in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with our qualification as a RIC under Subchapter M of the Code, we do not have fixed guidelines for diversification, and while we are

Edgar Filing: Solar Capital Ltd. - Form POS 8C

not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

Table of Contents

Capital markets were recently in a period of disruption and instability. These market conditions materially and adversely affected debt and equity capital markets in the United States and abroad, which had, and may in the future have, a negative impact on our business and operations.

The global capital markets were recently in a period of disruption as evidenced by a lack of liquidity in the debt capital markets, significant write-offs in the financial services sector, the re-pricing of credit risk in the broadly syndicated credit market and the failure of certain major financial institutions. Despite actions of the United States federal government and foreign governments, these events contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. These conditions may return in the future. If these conditions return, we and other companies in the financial services sector may have to access, if available, alternative markets for debt and equity capital. In such situations, equity capital may be difficult to raise because, subject to some limited exceptions which as of the date of this prospectus apply to us, as a BDC we are generally not able to issue additional shares of our common stock at a price less than net asset value without first obtaining approval for such issuance from our stockholders and our independent directors. At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring on the earlier of the one-year anniversary of the date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012. However, notwithstanding such stockholder approval, since our initial public offering on February 9, 2010, we have not sold any shares of our common stock at a price below our then current net asset value per share. At our 2012 Annual Stockholders Meeting, we have sought the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share. In addition, our ability to incur indebtedness (including by issuing preferred stock) is limited by applicable regulations such that our asset coverage, as defined in the 1940 Act, must equal at least 200% immediately after each time we incur indebtedness. The debt capital that will be available, if at all, may be at a higher cost and on less favorable terms and conditions in the future. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. In addition, significant changes in the capital markets, including the recent extreme volatility and disruption, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition or results of operations.

The downgrade of the U.S. credit rating and the economic crisis in Europe could negatively impact our business, financial condition and results of operations.

Recent U.S. debt ceiling and budget deficit concerns, together with signs of deteriorating sovereign debt conditions in Europe, have increased the possibility of additional credit-rating downgrades and economic slowdowns. Although U.S. lawmakers passed legislation to raise the federal debt ceiling, Standard & Poor's Ratings Services lowered its long-term sovereign credit rating on the United States from AAA to AA+ in August 2011. The impact of this or any further downgrades to the U.S. government's sovereign credit rating, or its perceived creditworthiness, and the impact of the current crisis in Europe with respect to the ability of certain European Union countries to continue to service their sovereign debt obligations is inherently unpredictable and could adversely effect the U.S. and global financial markets and economic conditions. There can be no assurance that governmental or other measures to aid economic recovery will be effective. These developments, and the government's credit concerns in general, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the capital markets on favorable terms. In addition, the decreased credit rating could create broader financial turmoil and uncertainty, which may weigh heavily on our stock price. Continued adverse economic conditions could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets may increase and the value of our portfolio may decrease during these periods as we are required to record the values of our investments. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments at fair value. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of the time when the loans are due and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize the portfolio company's ability to meet its obligations under the debt that we hold. We may incur additional expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, if one of our portfolio companies were to go bankrupt, depending on the facts and circumstances, including the extent to which we actually provided significant managerial assistance to that portfolio company, a bankruptcy court might recharacterize our debt holding and subordinate all or a portion of our claim to that of other creditors.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

Price declines and illiquidity in the corporate debt markets may adversely affect, and may continue to adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by or under the direction of our board of directors. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation. The unprecedented declines in prices and liquidity in the corporate debt markets from 2008 through mid-2010 have resulted in significant net unrealized depreciation in our portfolio, reducing our net asset value. Depending on market conditions, we could incur substantial losses in future periods, which could reduce our net asset value and have a material adverse impact on our business, financial condition and results of operations.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in order to: (i) increase or maintain in whole or in part our equity ownership percentage; (ii) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or (iii) attempt to preserve or enhance the value of our investment. We may elect not to make follow-on investments or otherwise lack sufficient funds to make those investments. We will have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make

Table of Contents

follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, either because we prefer other opportunities or because we are subject to BDC requirements that would prevent such follow-on investments or the desire to maintain our RIC tax status.

Because we generally do not hold controlling equity interests in our portfolio companies, we may not be in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

Although we may do so in the future, we do not currently hold controlling equity positions in our portfolio companies. As a result, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

An investment strategy focused primarily on privately held companies presents certain challenges, including the lack of available information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns.

We invest primarily in privately held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of Solar Capital Partners' investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately held companies frequently have less diverse product lines and smaller market presence than larger competitors. These factors could adversely affect our investment returns as compared to companies investing primarily in the securities of public companies.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We invest primarily in senior secured loans, mezzanine loans and equity securities issued by our portfolio companies. Our portfolio companies typically have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Our investment strategy contemplates potential investments in debt securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the

Table of Contents

United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility.

Although most of our investments will be U.S. dollar-denominated, any investments denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk, or that if we do, such strategies will be effective.

We may expose ourselves to risks if we engage in hedging transactions.

If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the underlying portfolio positions should increase. It may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations. To the extent we engage in hedging transactions, we also face the risk that counterparties to the derivative instruments we hold may default, which may expose us to unexpected losses from positions where we believed that our risk had been appropriately hedged.

Our investment adviser may not be able to achieve the same or similar returns as those achieved by our senior investment professionals while they were employed at prior positions.

Although in the past Mr. Gross held senior positions at a number of investment firms, including Apollo Investment Corporation and Apollo Management, L.P., Mr. Gross' track record and achievements are not necessarily indicative of future results that will be achieved by our investment adviser. In his role at such other firms, Mr. Gross was part of an investment team, and he was not solely responsible for generating investment ideas. In addition, such investment teams arrived at investment decisions by consensus.

Risks Relating to an Investment in Our Securities

Our shares may trade at a substantial discount from net asset value and may continue to do so over the long term.

Shares of closed-end investment companies have frequently traded at a market price that is less than the net asset value that is attributable to those shares. The possibility that our shares of common stock will trade at a substantial discount from net asset value over the long term is

Edgar Filing: Solar Capital Ltd. - Form POS 8C

separate and distinct from the risk that our net asset value will decrease. We cannot predict whether shares of our common stock will trade above, at or below our net asset value. If our common stock trades below its net asset value, we will generally not be able to issue additional shares or sell our common stock at its market price without first obtaining the approval for such issuance from our stockholders and our independent directors. At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring on the earlier of the one-year anniversary of the

Table of Contents

date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012. However, notwithstanding such stockholder approval, since our initial public offering on February 9, 2010, we have not sold any shares of our common stock at a price below our then current net asset value per share. At our 2012 Annual Stockholders Meeting, we have sought the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share. If additional funds are not available to us, we could be forced to curtail or cease our new lending and investment activities, and our net asset value could decrease and our level of distributions could be impacted.

Our common stock price may be volatile and may decrease substantially.

The trading price of our common stock may fluctuate substantially. The price of our common stock that will prevail in the market may be higher or lower than the price you pay, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include, but are not limited to, the following:

price and volume fluctuations in the overall stock market from time to time;

investor demand for our shares;

significant volatility in the market price and trading volume of securities of business development companies or other companies in our sector, which are not necessarily related to the operating performance of these companies;

changes in regulatory policies or tax guidelines with respect to RICs or business development companies;

failure to qualify as a RIC, or the loss of RIC status;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

changes, or perceived changes, in the value of our portfolio investments;

departures of Solar Capital Partners' key personnel;

operating performance of companies comparable to us; or

general economic conditions and trends and other external factors.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Due to the potential volatility of our stock price, we may become the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

There is a risk that our stockholders may not receive distributions or that our distributions may not grow over time.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a BDC, we may be limited in our ability to make distributions.

We may choose to pay dividends in our own common stock, in which case our stockholders may be required to pay federal income taxes in excess of the cash dividends they receive.

We may distribute taxable dividends that are payable in cash or shares of our common stock at the election of each stockholder. Under certain applicable provisions of the Code and the Treasury regulations, distributions payable in cash or in shares of stock at the election of stockholders are treated as taxable dividends. The Internal

Table of Contents

Revenue Service has issued private rulings indicating that this rule will apply even where the total amount of cash that may be distributed is limited to no more than 20% of the total distribution. Under these rulings, if too many stockholders elect to receive their distributions in cash, each such stockholder would receive a pro rata share of the total cash to be distributed and would receive the remainder of their distribution in shares of stock. If we decide to make any distributions consistent with these rulings that are payable in part in our stock, taxable stockholders receiving such dividends will be required to include the full amount of the dividend (whether received in cash, our stock, or a combination thereof) as ordinary income (or as long-term capital gain to the extent such distribution is properly reported as a capital gain dividend) to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. stockholder may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock. For a more detailed discussion, see **Material U.S. Federal Income Tax Considerations**.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

The shares of our common stock beneficially owned by each of Messrs. Gross and Spohler immediately prior to completion of our initial public offering, including any shares that are attributable to such shares issued pursuant to our dividend reinvestment plan, are no longer subject to lock-up restrictions that each of Messrs. Gross and Spohler agreed to in connection with our initial public offering, and are generally available for resale without restriction, subject to the provisions of Rule 144 promulgated under the Securities Act. In addition, on November 30, 2010, Messrs. Gross and Spohler jointly acquired 115,000 shares of our common stock in a private placement transaction conducted in accordance with Regulation D under the Securities Act. Such shares have been registered with the SEC and are generally available for resale. Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

We will have broad discretion over the use of proceeds of any offering made pursuant to this prospectus, to the extent it is successful.

We will have significant flexibility in applying the proceeds of any offering made pursuant to this prospectus. We will also pay operating expenses, and may pay other expenses such as due diligence expenses of potential new investments, from net proceeds. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of the offering, pending full investment, are used to pay operating expenses. In addition, we can provide you no assurance that the current offering will be successful, or that by increasing the size of our available equity capital our aggregate expenses, and correspondingly, our expense ratio, will be lowered.

Table of Contents

The net asset value per share of our common stock may be diluted if we sell shares of our common stock in one or more offerings at prices below the then current net asset value per share of our common stock or securities to subscribe for or convertible into shares of our common stock.

At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring on the earlier of the one-year anniversary of the date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012. However, notwithstanding such stockholder approval, since our initial public offering on February 9, 2010, we have not sold any shares of our common stock at a price below our then current net asset value per share. At our 2012 Annual Stockholders Meeting, we have sought the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share.

In addition, at our 2011 Annual Stockholders Meeting, our stockholders authorized us to sell or otherwise issue warrants or securities to subscribe for or convertible into shares of our common stock subject to certain limitations (including, without limitation, that the number of shares issuable does not exceed 25% of our then outstanding common stock and that the exercise or conversion price thereof is not, at the date of issuance, less than the market value per share of our common stock). Such authorization has no expiration.

Any decision to sell shares of our common stock below its then current net asset value per share or securities to subscribe for or convertible into shares of our common stock would be subject to the determination by our board of directors that such issuance is in our and our stockholders best interests.

If we were to sell shares of our common stock below its then current net asset value per share, such sales would result in an immediate dilution to the net asset value per share of our common stock. This dilution would occur as a result of the sale of shares at a price below the then current net asset value per share of our common stock and a proportionately greater decrease in the stockholders' interest in our earnings and assets and their voting interest in us than the increase in our assets resulting from such issuance. Because the number of shares of common stock that could be so issued and the timing of any issuance is not currently known, the actual dilutive effect cannot be predicted.

In addition, if we issue warrants or securities to subscribe for or convertible into shares of our common stock, subject to certain limitations, the exercise or conversion price per share could be less than net asset value per share at the time of exercise or conversion (including through the operation of anti-dilution protections). Because we would incur expenses in connection with any issuance of such securities, such issuance could result in a dilution of the net asset value per share at the time of exercise or conversion. This dilution would include reduction in net asset value per share as a result of the proportionately greater decrease in the stockholders' interest in our earnings and assets and their voting interest than the increase in our assets resulting from such issuance.

Further, if our current stockholders do not purchase any shares to maintain their percentage interest, regardless of whether such offering is above or below the then current net asset value per share, their voting power will be diluted. For example, if we sell an additional 10% of our common shares at a 5% discount from net asset value, a stockholder who does not participate in that offering for its proportionate interest will suffer net asset value dilution of up to 0.5% or \$5 per \$1000 of net asset value. For additional information and hypothetical examples of these risks, see [Sale of Common Stock Below Net Asset Value](#) and the prospectus supplement pursuant to which such sale is made.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

If we issue preferred stock, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock would result in a higher yield or return to the holders of the common stock. The issuance of preferred stock would likely cause the net asset value and market value of the common stock to become more volatile. If the dividend rate on the preferred stock were to approach

Table of Contents

the net rate of return on our investment portfolio, the benefit of leverage to the holders of the common stock would be reduced. If the dividend rate on the preferred stock were to exceed the net rate of return on our portfolio, the leverage would result in a lower rate of return to the holders of common stock than if we had not issued preferred stock. Any decline in the net asset value of our investments would be borne entirely by the holders of common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of common stock than if we were not leveraged through the issuance of preferred stock. This greater net asset value decrease would also tend to cause a greater decline in the market price for the common stock. We might be in danger of failing to maintain the required asset coverage of the preferred stock or of losing our ratings on the preferred stock or, in an extreme case, our current investment income might not be sufficient to meet the dividend requirements on the preferred stock. In order to counteract such an event, we might need to liquidate investments in order to fund a redemption of some or all of the preferred stock. In addition, we would pay (and the holders of common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, including higher advisory fees if our total return exceeds the dividend rate on the preferred stock. Holders of preferred stock may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

Holders of any preferred stock we might issue would have the right to elect members of the board of directors and class voting rights on certain matters.

Holders of any preferred stock we might issue, voting separately as a single class, would have the right to elect two members of the board of directors at all times and in the event dividends become two full years in arrears would have the right to elect a majority of the directors until such arrearage is completely eliminated. In addition, preferred stockholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion to open-end status, and accordingly can veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies or the terms of our credit facilities, might impair our ability to maintain our qualification as a RIC for federal income tax purposes. While we would intend to redeem our preferred stock to the extent necessary to enable us to distribute our income as required to maintain our qualification as a RIC, there can be no assurance that such actions could be effected in time to meet the tax requirements.

Risks Relating to Our Business and Structure

We are dependent upon Solar Capital Partners' key personnel for our future success.

We depend on the diligence, skill and network of business contacts of Messrs. Gross and Spohler, who serve as the managing member and a partner of Solar Capital Partners, respectively, and who lead Solar Capital Partners' investment team. Messrs. Gross and Spohler, together with the other dedicated investment professionals available to Solar Capital Partners, evaluate, negotiate, structure, close and monitor our investments. Our future success will depend on the continued service of Messrs. Gross and Spohler and the other investment professionals available to Solar Capital Partners. We cannot assure you that unforeseen business, medical, personal or other circumstances would not lead any such individual to terminate his relationship with us. The loss of Mr. Gross or Mr. Spohler, or any of the other senior investment professionals who serve on Solar Capital Partners' investment team, could have a material adverse effect on our ability to achieve our investment objective as well as on our financial condition and results of operations. In addition, we can offer no assurance that Solar Capital Partners will remain our investment adviser.

The senior investment professionals of Solar Capital Partners are and may in the future become affiliated with entities engaged in business activities similar to those intended to be conducted by us, and may have conflicts of interest in allocating their time. We expect that Messrs. Gross and Spohler will dedicate a significant portion of their time to the activities of Solar Capital; however, they may be engaged in other business activities which could divert their time and attention in the future.

Table of Contents

Our business model depends to a significant extent upon strong referral relationships with financial sponsors, and the inability of the senior investment professionals of our investment adviser to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We expect that the principals of our investment adviser will maintain and develop their relationships with financial sponsors, and we will rely to a significant extent upon these relationships to provide us with potential investment opportunities. If the senior investment professionals of our investment adviser fail to maintain their existing relationships or develop new relationships with other sponsors or sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the senior investment professionals of our investment adviser have relationships are not obligated to provide us with investment opportunities, and, therefore, there is no assurance that such relationships will generate investment opportunities for us.

A disruption in the capital markets and the credit markets could negatively affect our business.

As a BDC, we must maintain our ability to raise additional capital for investment purposes. Without sufficient access to the capital markets or credit markets, we may be forced to curtail our business operations or we may not be able to pursue new business opportunities. Disruptive conditions in the financial industry and the impact of new legislation in response to those conditions could restrict our business operations and could adversely impact our results of operations and financial condition.

If the fair value of our assets declines substantially, we may fail to maintain the asset coverage ratios imposed upon us by the 1940 Act. Any such failure would affect our ability to issue senior securities, including borrowings, and pay dividends, which could materially impair our business operations. Our liquidity could be impaired further by an inability to access the capital markets or to draw on our credit facilities. For example, we cannot be certain that we will be able to renew our credit facilities as they mature or to consummate new borrowing facilities to provide capital for normal operations, including new originations. Reflecting concern about the stability of the financial markets, many lenders and institutional investors have reduced or ceased providing funding to borrowers. This market turmoil and tightening of credit have led to increased market volatility and widespread reduction of business activity generally.

If we are unable to renew or replace such facilities and consummate new facilities on commercially reasonable terms, our liquidity will be reduced significantly. If we are unable to repay amounts outstanding under such facilities and are declared in default or are unable to renew or refinance these facilities, we would not be able to initiate significant originations or to operate our business in the normal course. These situations may arise due to circumstances that we may be unable to control, such as inaccessibility to the credit markets, a severe decline in the value of the U.S. dollar, a further economic downturn or an operational problem that affects third parties or us, and could materially damage our business. Moreover, we are unable to predict when economic and market conditions may become more favorable. Even if such conditions improve broadly and significantly over the long term, adverse conditions in particular sectors of the financial markets could adversely impact our business.

Our financial condition and results of operations will depend on our ability to manage future growth effectively.

Our ability to achieve our investment objective and to grow depends on Solar Capital Partners' ability to identify, invest in and monitor companies that meet our investment criteria.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Accomplishing this result on a cost-effective basis is largely a function of Solar Capital Partners' structuring of the investment process, its ability to provide competent, attentive and efficient services to us and its ability to access financing for us on acceptable terms. The investment team of Solar Capital Partners has substantial responsibilities under the Investment Advisory and Management Agreement, and they may also be called upon to provide managerial assistance to our portfolio companies as the principals of our administrator. Such demands on their time may distract them or slow our rate of investment. In order to grow, we and Solar Capital Partners will

Table of Contents

need to retain, train, supervise and manage new investment professionals. However, we can offer no assurance that any such investment professionals will contribute effectively to the work of the investment adviser. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility.

The 1940 Act imposes numerous constraints on the operations of BDCs. For example, BDCs are required to invest at least 70% of their total assets in specified types of securities, primarily in private companies or thinly-traded U.S. public companies, cash, cash equivalents, U.S. government securities and other high quality debt investments that mature in one year or less. Furthermore, any failure to comply with the requirements imposed on BDCs by the 1940 Act could cause the SEC to bring an enforcement action against us and/or expose us to claims of private litigants. In addition, upon approval of a majority of our stockholders, we may elect to withdraw our status as a BDC. If we decide to withdraw our election, or if we otherwise fail to qualify, or maintain our qualification, as a BDC, we may be subject to the substantially greater regulation under the 1940 Act as a closed-end investment company. Compliance with such regulations would significantly decrease our operating flexibility, and could significantly increase our costs of doing business.

Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital. As a BDC, the necessity of raising additional capital may expose us to risks, including the typical risks associated with leverage.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we will be permitted, as a BDC, to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of gross assets less all liabilities and indebtedness not represented by senior securities, after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. Also, any amounts that we use to service our indebtedness would not be available for distributions to our common stockholders. Furthermore, as a result of issuing senior securities, we would also be exposed to typical risks associated with leverage, including an increased risk of loss.

As of December 31, 2011, we had \$201.4 million outstanding under our credit facilities and \$35 million outstanding under our Term Loan. If we issue preferred stock, the preferred stock would rank senior to common stock in our capital structure, preferred stockholders would have separate voting rights on certain matters and might have other rights, preferences, or privileges more favorable than those of our common stockholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in your best interest.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of Solar Capital and its stockholders, and our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease, and you might experience dilution.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring

Table of Contents

on the earlier of the one-year anniversary of the date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012. At our 2012 Annual Stockholders Meeting, we will seek the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock at a price below the then current net asset value per share.

We may borrow money, which would magnify the potential for gain or loss on amounts invested and may increase the risk of investing in us.

The use of leverage magnifies the potential for gain or loss on amounts invested and, therefore, increases the risks associated with investing in our securities. As of December 31, 2011, we had \$201.4 million outstanding under our credit facilities and \$35 million outstanding under our Term Loan. We may borrow from and issue senior debt securities to banks, insurance companies and other lenders in the future. Lenders of these senior securities, including our revolving credit facilities and our Term Loan, will have fixed dollar claims on our assets that are superior to the claims of our common stockholders, and we would expect such lenders to seek recovery against our assets in the event of a default. If the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could also negatively affect our ability to make dividend payments on our common stock. Leverage is generally considered a speculative investment technique. Our ability to service any debt that we incur will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. Moreover, as the management fee payable to our investment adviser, Solar Capital Partners, will be payable based on our gross assets, including those assets acquired through the use of leverage, Solar Capital Partners will have a financial incentive to incur leverage which may not be consistent with our stockholders' interests. In addition, our common stockholders will bear the burden of any increase in our expenses as a result of leverage, including any increase in the management fee payable to Solar Capital Partners.

As a BDC, we generally are required to meet a coverage ratio of total assets to total borrowings and other senior securities, which include all of our borrowings and any preferred stock that we may issue in the future, of at least 200%. If this ratio declines below 200%, we may not be able to incur additional debt and could be required by law to sell a portion of our investments to repay some debt when it is disadvantageous to do so, which could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ will depend on our investment adviser's and our board of directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to obtain credit at all or on terms acceptable to us.

In addition, our credit facilities and Term Loan impose, and any other debt facility into which we may enter would likely impose financial and operating covenants that restrict our business activities, including limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code.

As of December 31, 2011, we had \$201.4 million outstanding under our credit facilities and \$35 million outstanding under our Term Loan.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns on the portfolio, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed total return on our portfolio (net of expenses)				
	(10)%	(5)%	0%	5%	10%
Corresponding return to stockholder(1)	(14.5)%	(7.8)%	(1.1)%	5.6%	12.3%

- (1) Assumes \$1.08 billion in total assets and \$236.4 million in total debt outstanding, which reflects our total assets and total debt outstanding as of December 31, 2011, and a cost of funds of 3.7%. Excludes non-leverage related liabilities.

Table of Contents

To the extent we use debt or preferred stock to finance our investments, changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money, or issue preferred stock, to make investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds or pay dividends on preferred stock and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we use debt to finance our investments. In periods of rising interest rates, our cost of funds would increase, except to the extent we issue fixed rate debt or preferred stock, which could reduce our net investment income. We expect that our long-term fixed-rate investments will be financed primarily with equity and long-term debt. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

You should also be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee hurdle rate and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to our pre-incentive fee net investment income.

As of December 31, 2011, we had \$201.4 million outstanding under our credit facilities and \$35 million outstanding under our Term Loan.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

There will be uncertainty as to the value of our portfolio investments.

A large percentage of our portfolio investments are in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We value these securities on a quarterly basis in accordance with our valuation policy, which is at all times consistent with U.S. generally accepted accounting policies (GAAP). Our board of directors utilizes the services of third-party valuation firms to aid it in determining the fair value of these securities. The board of directors discusses valuations and determines the fair value in good faith based on the input of our investment adviser and the respective third-party valuation firms. The factors that may be considered in fair value pricing our investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparisons to publicly traded companies, discounted cash flow and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to

Table of Contents

which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

There are significant potential conflicts of interest which could impact our investment returns.

Our executive officers and directors, as well as the current and future partners of our investment adviser, Solar Capital Partners, may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do. For example, Solar Capital Partners presently serves as investment adviser to Solar Senior Capital Ltd., a publicly-traded BDC which focuses on investing primarily in senior secured loans, including first lien, unitranche and second lien debt instruments. In addition, Michael S. Gross, our chairman and chief executive officer, Bruce Spohler, our chief operating officer, and Nicholas Radesca, our chief financial officer, serve in similar capacities for Solar Senior Capital Ltd. Accordingly, they may have obligations to investors in those entities, the fulfillment of which obligations might not be in the best interests of us or our stockholders. In addition, we note that any affiliated investment vehicle formed in the future and managed by our investment adviser or its affiliates may, notwithstanding different stated investment objectives, have overlapping investment objectives with our own and, accordingly, may invest in asset classes similar to those targeted by us. As a result, Solar Capital Partners may face conflicts in allocating investment opportunities between us and such other entities. Although Solar Capital Partners will endeavor to allocate investment opportunities in a fair and equitable manner, it is possible that, in the future, we may not be given the opportunity to participate in investments made by investment funds managed by our investment adviser or an investment manager affiliated with our investment adviser. In any such case, when Solar Capital Partners identifies an investment, it will be forced to choose which investment fund should make the investment.

If our investment adviser forms other affiliates in the future, we may co-invest on a concurrent basis with such other affiliates, subject to compliance with applicable regulations and regulatory guidance and our allocation procedures.

In the course of our investing activities, we pay management and incentive fees to Solar Capital Partners and reimburse Solar Capital Partners for certain expenses it incurs. As a result, investors in our common stock will invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than an investor might achieve through direct investments. Accordingly, there may be times when the management team of Solar Capital Partners has interests that differ from those of our stockholders, giving rise to a conflict.

We have entered into a royalty-free license agreement with our investment adviser, pursuant to which our investment adviser has granted us a non-exclusive license to use the name Solar Capital. Under the license agreement, we have the right to use the Solar Capital name for so long as Solar Capital Partners or one of its affiliates remains our investment adviser. In addition, we pay Solar Capital Management, an affiliate of Solar Capital Partners, our allocable portion of overhead and other expenses incurred by Solar Capital Management in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and our allocable portion of the compensation of our chief financial officer and any administrative support staff. These arrangements create conflicts of interest that our board of directors must monitor.

We may be obligated to pay our investment adviser incentive compensation even if we incur a loss.

Our investment adviser will be entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our pre-incentive fee net investment income for that quarter (before deducting incentive compensation) above a performance threshold for that quarter. Accordingly, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses or depreciation that we may incur in the fiscal quarter,

Table of Contents

even if such capital losses or depreciation result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay Solar Capital Partners incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

Our incentive fee may induce Solar Capital Partners to pursue speculative investments.

The incentive fee payable by us to Solar Capital Partners may create an incentive for Solar Capital Partners to pursue investments on our behalf that are riskier or more speculative than would be the case in the absence of such compensation arrangement. The incentive fee payable to our investment adviser is calculated based on a percentage of our return on invested capital. This may encourage our investment adviser to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would impair the value of our common stock. In addition, the investment adviser receives the incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, the investment adviser may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The incentive fee payable by us to our investment adviser also may induce Solar Capital Partners to invest on our behalf in instruments that have a deferred interest feature, even if such deferred payments would not provide cash necessary to enable us to pay current distributions to our shareholders. Under these investments, we would accrue interest over the life of the investment but would not receive the cash income from the investment until the end of the term. Our net investment income used to calculate the income portion of our investment fee, however, includes accrued interest. Thus, a portion of this incentive fee would be based on income that we have not yet received in cash. In addition, the catch-up portion of the incentive fee may encourage Solar Capital Partners to accelerate or defer interest payable by portfolio companies from one calendar quarter to another, potentially resulting in fluctuations in timing and dividend amounts.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to Solar Capital Partners with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our stockholders will bear his or her share of the management and incentive fee of Solar Capital Partners as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

We will become subject to corporate-level income tax if we are unable to qualify and maintain our qualification as a regulated investment company under Subchapter M of the Code.

Although we have elected to be treated as a RIC under Subchapter M of the Code, no assurance can be given that we will be able to qualify for and maintain RIC status. To maintain RIC tax treatment under the Code, we must meet the following annual distribution, income source and asset diversification requirements.

The annual distribution requirement for a RIC will be satisfied if we distribute to our stockholders on an annual basis at least 90% of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. Because we may use debt financing, we are subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making distributions necessary to satisfy the

Edgar Filing: Solar Capital Ltd. - Form POS 8C

distribution requirement. If we are unable to obtain cash from other sources, we could fail to qualify for RIC tax treatment and thus become subject to corporate-level income tax.

The income source requirement will be satisfied if we obtain at least 90% of our income for each year from dividends, interest, gains from the sale of stock or securities or similar sources.

Table of Contents

The asset diversification requirement will be satisfied if we meet certain asset diversification requirements at the end of each quarter of our taxable year. Failure to meet those requirements may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments will be in private companies, and therefore will be relatively illiquid, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

If we fail to qualify for RIC tax treatment for any reason and become subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions.

We may have difficulty satisfying the annual distribution requirement in order to qualify and maintain RIC status if we recognize income before or without receiving cash representing such income.

For federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if we receive warrants in connection with the making of a loan or possibly in other circumstances, or contracted payment in kind, or PIK, interest, which represents contractual interest added to the loan balance and due at the end of the loan term. We also may be required to include in income certain other amounts that we will not receive in cash.

Because in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty satisfying the annual distribution requirement applicable to RICs. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investments to meet these distribution requirements. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus be subject to corporate-level income tax.

Our board of directors is authorized to reclassify any unissued shares of common stock into one or more classes of preferred stock, which could convey special rights and privileges to its owners.

Under Maryland General Corporation Law and our charter, our board of directors is authorized to classify and reclassify any authorized but unissued shares of stock into one or more classes of stock, including preferred stock. Prior to issuance of shares of each class or series, the board of directors is required by Maryland law and our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series. Thus, the board of directors could authorize the issuance of shares of preferred stock with terms and conditions which could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. The cost of any such reclassification would be borne by our existing common stockholders. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock. For example, holders of preferred stock would vote separately from the holders of common stock on a proposal to cease operations as a BDC. In addition, the 1940 Act provides that holders of preferred stock are entitled to vote separately from holders of common stock to elect two preferred stock directors. We currently have no plans to issue preferred stock. The issuance of preferred shares convertible into shares of common stock might also reduce the net income and net asset value per share of our common stock upon conversion, provided, that we will only be permitted to issue such convertible preferred stock to the extent we comply with the requirements of Section 61 of the 1940 Act, including obtaining common stockholder approval. These effects, among others, could have an adverse effect on your investment in our common stock.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

The Maryland General Corporation Law and our charter and bylaws contain provisions that may discourage, delay or make more difficult a change in control of Solar Capital or the removal of our directors. We are subject to the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our board of

Table of Contents

directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such a transaction.

We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our board of directors in three classes serving staggered three-year terms, and authorizing our board of directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, to amend our charter without stockholder approval and to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority to modify or waive certain of our operating policies and strategies without prior notice (except as required by the 1940 Act) and without stockholder approval. However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. Nevertheless, the effects may adversely affect our business and impact our ability to make distributions.

The impact of recent financial reform legislation on us is uncertain.

In light of recent conditions in the U.S. and global financial markets, legislators, the presidential administration and regulators have increased their focus on the regulation of the financial services industry. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Reform Act) became effective on July 21, 2010; although many provisions of the Dodd-Frank Reform Act have delayed effectiveness or will not become effective until the relevant federal agencies issue new rules to implement the Dodd-Frank Reform Act. Nevertheless, the Dodd-Frank Reform Act may have a material adverse impact on the financial services industry as a whole and on our business, results of operations and financial condition. Accordingly, we cannot predict the effect the Dodd-Frank Act or its implementing regulations will have on our business, results of operations or financial condition.

Changes in laws or regulations governing our operations may adversely affect our business.

We and our portfolio companies are subject to regulation by laws at the local, state and federal levels. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations could have a material adverse affect on our business.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Our investment adviser can resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

Our investment adviser has the right, under the Investment Advisory and Management Agreement, to resign at any time upon 60 days' written notice, whether we have found a replacement or not. If our investment adviser

Table of Contents

resigns, we may not be able to find a new investment adviser or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our investment adviser and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

Table of Contents

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about Solar Capital, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, believes, seeks, estimates, should, targets, projects, and variations of these words and similar expressions are intended to identify forward-looking statements.

The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

our future operating results;

our business prospects and the prospects of our portfolio companies;

the impact of investments that we expect to make;

our contractual arrangements and relationships with third parties;

the dependence of our future success on the general economy and its impact on the industries in which we invest;

the ability of our portfolio companies to achieve their objectives;

our expected financings and investments;

the adequacy of our cash resources and working capital; and

the timing of cash flows, if any, from the operations of our portfolio companies.

These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

an economic downturn could impair our portfolio companies' ability to continue to operate, which could lead to the loss of some or all of our investments in such portfolio companies;

a contraction of available credit and/or an inability to access the equity markets could impair our lending and investment activities;

Edgar Filing: Solar Capital Ltd. - Form POS 8C

interest rate volatility could adversely affect our results, particularly if we elect to use leverage as part of our investment strategy;

currency fluctuations could adversely affect the results of our investments in foreign companies, particularly to the extent that we receive payments denominated in foreign currency rather than U.S. dollars; and

the risks, uncertainties and other factors we identify in **Risk Factors** and elsewhere in this prospectus and in our filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in **Risk Factors** and elsewhere in this prospectus. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus. However, we will update this prospectus to reflect any material changes to the information contained herein. The forward-looking statements and projections contained in this prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act.

Table of Contents

USE OF PROCEEDS

We intend to use the net proceeds from the sale of our securities pursuant to this prospectus for general corporate purposes, which may include investing in debt or equity securities consistent with our investment objective, repayment of outstanding indebtedness, acquisitions and other general corporate purposes. We are continuously identifying, reviewing and, to the extent consistent with our investment objective, funding new investments. As a result, we typically raise capital as we deem appropriate to fund such new investments. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

We estimate that it will take three to six months for us to substantially invest the net proceeds of any offering made pursuant to this prospectus, depending on the availability of attractive opportunities and market conditions. However, we can offer no assurance that we will be able to achieve this goal. We expect that it may take more than three months to invest all of the proceeds of this offering, in part because investments in private companies often require substantial prior research and due diligence.

Pending these uses, we will invest such net proceeds primarily in cash, cash equivalents, and U.S. government securities and other high-quality debt investments that mature in one year or less. The management fee payable by us to our investment adviser will not be reduced while our assets are invested in such securities.

Table of Contents**PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS**

Our common stock is traded on the NASDAQ Global Select Market under the symbol SLRC. The following table sets forth, for each fiscal quarter since our initial public offering on February 9, 2010, the net asset value (NAV) per share of our common stock, the high and low sales prices for our common stock, such sales prices as a percentage of NAV per share and quarterly distributions per share.

	Price Range			High Sales Price as a Percentage of NAV(2)	Low Sales Price as a Percentage of NAV(2)	Cash Distributions Per Share(3)
	NAV(1)	High	Low			
Fiscal 2012						
First Quarter (through March 26, 2012)	*	\$ 23.89	\$ 21.91	*	*	\$ 0.60
Fiscal 2011						
Fourth Quarter	\$ 22.02	23.66	18.90	107.4%	85.8%	0.60
Third Quarter	21.20	25.16	19.17	118.7%	90.4%	0.60
Second Quarter	23.22	25.93	23.92	111.7%	103.0%	0.60
First Quarter	23.48	25.45	21.87	108.4%	93.1%	0.60
Fiscal 2010						
Fourth Quarter	\$ 22.73	\$25.39	\$21.32	111.7%	93.8%	\$ 0.60
Third Quarter	22.09	21.80	18.75	98.7%	84.9%	0.60
Second Quarter	22.07	24.20	18.77	109.7%	85.0%	0.60
First Quarter(4)	22.18	22.22	17.29	100.2%	78.0%	0.34

- (1) Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.
- (2) Calculated as the respective high or low sales price divided by NAV.
- (3) Represents the cash distribution declared in the specified quarter.
- (4) The period from February 9, 2010 through March 31, 2010.
- * Not determinable at the time of filing.

On March 26, 2012, the last reported sales price of our common stock was \$22.20 per share. As of March 26, 2012, we had 15 shareholders of record.

Shares of business development companies may trade at a market price that is less than the value of the net assets attributable to those shares. The possibility that our shares of common stock will trade at a discount from net asset value or at premiums that are unsustainable over the long term are separate and distinct from the risk that our net asset value will decrease. Since our initial public offering on February 9, 2010, our shares of common stock have traded at both a discount and a premium to the net assets attributable to those shares. As of March 26, 2012, our shares of common stock traded at a premium equal to approximately 0.8% of the net assets attributable to those shares based upon our net asset value as of December 31, 2011. It is not possible to predict whether the shares offered hereby will trade at, above, or below net asset value.

We intend to distribute quarterly dividends to our stockholders. Our quarterly dividends, if any, will be determined by our board of directors.

Table of Contents

The following table reflects the cash distributions, including dividends and returns of capital, if any, per share that we have declared on our common stock since our initial public offering.:

Date Declared	Record Date	Payment Date	Amount
Fiscal 2011			
November 1, 2011	December 15, 2011	December 29, 2011	\$ 0.60
August 2, 2011	September 20, 2011	October 4, 2011	0.60
May 2, 2011	June 17, 2011	July 5, 2011	0.60
March 1, 2011	March 17, 2011	April 4, 2011	0.60
Total 2011			\$ 2.40
Fiscal 2010			
November 2, 2010	December 17, 2010	December 30, 2010	\$ 0.60
August 3, 2010	September 17, 2010	October 4, 2010	0.60
May 4, 2010	June 17, 2010	July 2, 2010	0.60
January 26, 2010	March 18, 2010	April 1, 2010	0.34
Total 2010			\$ 2.14

The \$0.34 dividend declared during the first quarter of 2010 was a \$0.60 dividend prorated for the number of days that remained in the quarter after our initial public offering. Tax characteristics of all dividends will be reported to shareholders on Form 1099 after the end of the calendar year. Our quarterly dividends, if any, will be determined by our board of directors.

We intend to elect to be taxed as a RIC under Subchapter M of the Code. To obtain and maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. In addition, although we currently intend to distribute realized net capital gains (*i.e.*, net long-term capital gains in excess of short-term capital losses), if any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment.

We maintain an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend, then stockholders cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash dividends.

We may not be able to achieve operating results that will allow us to make dividends and distributions at a specific level or to increase the amount of these dividends and distributions from time to time. In addition, we may be limited in our ability to make dividends and distributions due to the asset coverage test for borrowings when applicable to us as a BDC under the 1940 Act and due to provisions in current and future credit facilities. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of our RIC status. We cannot assure stockholders that they will receive any dividends and distributions or dividends and distributions at a particular level.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan may experience dilution over time. Stockholders who do not elect to receive dividends in shares of common stock may experience accretion to the net asset value

Edgar Filing: Solar Capital Ltd. - Form POS 8C

of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the dividend payable to a stockholder.

Table of Contents

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The information contained in this section should be read in conjunction with the Selected Financial and Other Data and our Financial Statements and notes thereto appearing elsewhere in this prospectus.

Overview

Solar Capital Ltd., a Maryland corporation formed in November 2007, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for tax purposes the Company has elected to be treated as a RIC under Subchapter M of the Code.

On February 9, 2010, we priced our initial public offering, selling 5.68 million shares. Concurrent with our initial public offering, Michael S. Gross, our chairman and chief executive officer, and Bruce Spohler, our chief operating officer, collectively purchased an additional 0.6 million shares through a private placement transaction exempt from registration under the Securities Act. Solar Capital Ltd. issued an aggregate of approximately 26.65 million shares of common stock and \$125 million in Senior Unsecured Notes to the existing Solar Capital LLC unit holders in connection with the Solar Capital Merger. Solar Capital Ltd. had no assets or operations prior to completion of the Solar Capital Merger and as a result, the books and records of Solar Capital LLC have become the books and records of the surviving entity.

We invest primarily in U.S. middle market companies, where we believe the supply of primary capital is limited and the investment opportunities are most attractive. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in leveraged middle market companies in the form of senior secured loans, mezzanine loans and equity securities. From time to time, we may also invest in public companies that are thinly traded. Our business model is focused primarily on the direct origination of investments through portfolio companies or their financial sponsors. Our investments generally range between \$20 million and \$100 million each, although we expect that this investment size will vary proportionately with the size of our capital base. We are managed by Solar Capital Partners LLC. Solar Capital Management LLC provides the administrative services necessary for us to operate.

In addition, we may invest a portion of our portfolio in other types of investments, which we refer to as opportunistic investments, which are not our primary focus but are intended to enhance our overall returns. These investments may include, but are not limited to, direct investments in public companies that are not thinly traded and securities of leveraged companies located in select countries outside of the United States.

As of December 31, 2011, our long term investments totaled \$1.05 billion and our net asset value was \$805.9 million. Our portfolio was comprised of debt and equity investments in 40 portfolio companies and our income producing assets, which represented 91.2% of our total portfolio, had a weighted average annualized yield on a fair value basis of approximately 14.2%.

Critical Accounting Policies

Edgar Filing: Solar Capital Ltd. - Form POS 8C

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. We have identified the following items as critical accounting policies.

Table of Contents

Valuation of Portfolio Investments

We conduct the valuation of our assets, pursuant to which our net asset value is determined, at all times consistent with GAAP, and the 1940 Act. Our valuation procedures are set forth in more detail below:

Securities for which market quotations are readily available on an exchange are valued at the closing price on the day of valuation. We may also obtain quotes with respect to certain of our investments from pricing services or brokers or dealers in order to value assets. When doing so, we determine whether the quote obtained is sufficient according to GAAP to determine the fair value of the security. If determined adequate, we use the quote obtained.

Securities for which reliable market quotations are not readily available or for which the pricing source does not provide a valuation or methodology or provides a valuation or methodology that, in the judgment of our investment adviser or board of directors, does not represent fair value, shall be valued as follows: (i) each portfolio company or investment is initially valued by the investment professionals responsible for the portfolio investment; (ii) preliminary valuation conclusions are documented and discussed with our senior management; (iii) independent third-party valuation firms engaged by, or on behalf of, the board of directors will conduct independent appraisals and review management's preliminary valuations and make their own assessment for all material assets; (iv) the board of directors will discuss valuations and determine the fair value of each investment in our portfolio in good faith based on the input of the investment adviser and, where appropriate, the respective third-party valuation firms.

The recommendation of fair value will generally be based on the following factors, as relevant:

the nature and realizable value of any collateral including credit risk;

the portfolio company's ability to make payments;

the portfolio company's earnings and discounted cash flow;

the markets in which the issuer does business and; and

comparisons to publicly traded securities.

Securities for which market quotations are not readily available or for which a pricing source is not sufficient may include, but are not limited to, the following:

private placements and restricted securities that do not have an active trading market;

Edgar Filing: Solar Capital Ltd. - Form POS 8C

securities whose trading has been suspended or for which market quotes are no longer available;

debt securities that have recently gone into default and for which there is no current market;

securities whose prices are stale;

securities affected by significant events; and

securities that the investment adviser believes were priced incorrectly.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our financial statements express the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements.

GAAP fair value measurement guidance classifies the inputs used to measure these fair values into the following hierarchy:

Level 1. Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company has the ability to access (examples include active exchange-traded equity securities, exchange-traded derivatives, and most U.S. Government and agency securities).

Table of Contents

Level 2. Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

a) Quoted prices for similar assets or liabilities in active markets;

b) Quoted prices for identical or similar assets or liabilities in non-active markets (examples include corporate and municipal bonds, which trade infrequently);

c) Pricing models whose inputs are observable for substantially the full term of the asset or liability (examples include most over-the-counter derivatives, including foreign exchange forward contracts); and

d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability.

Level 3. Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability (examples include certain of our private debt and equity investments) and long-dated or complex derivatives (including certain equity and currency derivatives).

Fair Value Measurements

As of December 31, 2011

	Level 1	Level 2	Level 3	Total
Assets:				
Bank Debt/Senior Secured Loans		46,377	366,019	412,396
Subordinated Debt / Corporate Notes		10,508	536,351	546,859
Preferred Equity			14,664	14,664
Common Equity / Partnership Interests / Warrants	11,460		59,664	71,124
Derivative assets - interest rate cap		469		469
Derivative assets - forward contracts		180		180

At December 31, 2011 the fair value of investments classified as Level 3 was \$976.7 million or 93.5% of total investments. One asset with a fair value of \$41.1 million was transferred out of Level 3 to Level 2 during 2011 because of the increase in availability and reliability of third party market quotes for this investments. Subsequently, prior to end of 2011, this asset was repaid at par.

Additionally, during 2011, one asset with a December 31, 2011 fair value of \$9.9 million was transferred from Level 2 to Level 1 as trading restrictions expired on this publicly traded equity investment.

At December 31, 2010 the fair value of investments classified as Level 3 was \$823.9 million or 84% of total investments. Two assets with a combined fair value of \$94.7 million were transferred out of Level 3 to Level 2 during 2010 because of the increase in availability and reliability of third party market quotes for these investments.

Additionally, during 2010, one asset with a fair value of \$0.4 million was transferred from Level 2 to Level 1 when trading restrictions expired on a publicly traded equity investment.

Revenue Recognition

Our revenue recognition policies are as follows:

Sales: Gains or losses on the sale of investments are calculated by using the specific identification method.

Interest Income: Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis. Origination, closing and/or commitment fees associated with investments in

Table of Contents

portfolio companies are accreted into interest income over the respective terms of the applicable loans. Upon the prepayment of a loan or debt security, any prepayment penalties and unamortized loan origination, closing and commitment fees are recorded as part of interest income. We have loans in our portfolio that contain a PIK provision. PIK interest is accrued at the contractual rates and added to the loan principal on the reset dates.

Non-accrual: Loans are placed on non-accrual status when principal or interest payments are past due 30 days or more or when there is reasonable doubt that principal or interest will be collected. Accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment about ultimate collectability of principal. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in management's judgment, are likely to remain current.

Payment-in-Kind Interest

We have investments in our portfolio which contain a PIK interest provision. PIK interest is added to the principal balance of the investment and is recorded as income. For us to maintain our status as a RIC, substantially all of this income must be paid out to stockholders in the form of dividends, even though we have not collected any cash with respect to PIK securities.

New Accounting Pronouncements and Accounting Standards Updates

In May 2011, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04). ASU 2011-04 was issued concurrently with International Financial Reporting Standards No. 13 (IFRS 13), Fair Value Measurements, to provide largely identical guidance about fair value measurement and disclosure requirements as is currently required under ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820). The new standards do not extend the use of fair value but, rather, provide guidance about how fair value should be applied where it already is required or permitted under IFRS or GAAP. For GAAP, most of the changes are clarifications of existing guidance or wording changes to align with IFRS 13. ASU 2011-04 eliminates the concepts of in-use and in-exchange when measuring fair value of all financial instruments. For Level 3 fair value measurements, the ASU requires that our disclosure include quantitative information about significant unobservable inputs, a qualitative discussion about the sensitivity of the fair value measurement to changes in the unobservable inputs and the interrelationship between inputs, and a description of our valuation process. Public companies are required to apply ASU 2011-04 prospectively for interim and annual periods beginning after December 15, 2011. Upon adoption of ASU 2011-04, it is not expected that it will have a significant impact on the Company's financial statements and the Company is currently evaluating the impact on its disclosures.

Portfolio Investments

The total value of our investments was approximately \$1.05 billion and \$976.2 million at December 31, 2011 and 2010, respectively. During the year ended December 31, 2011, we originated approximately \$318.8 million of new investments in 13 portfolio companies and approximately \$76.8 million was invested in six existing portfolio companies. During the year ended December 31, 2010, we originated approximately \$272.3 million of new investments in 9 portfolio companies and approximately \$68.2 million was invested in 3 existing portfolio companies.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

In certain instances, we receive payments on our debt investments based on scheduled amortization of the outstanding balances. In addition, we may receive repayments of certain debt investments prior to their scheduled maturity date. The frequency or volume of these repayments may fluctuate significantly from period to period. Our portfolio activity also reflects sales of securities. For the year ended December 31, 2011, we had approximately \$308.7 million in debt repayments of existing portfolio companies and sales of securities of 4

Table of Contents

portfolio companies for approximately \$29.4 million. For the year ended December 31, 2010, we had approximately \$298.5 million in debt repayments and approximately \$33.1 million in sales of securities in 7 portfolio companies.

At December 31, 2011, we had investments in debt and preferred securities of 34 portfolio companies, totaling approximately \$973.9 million, and equity investments in 7 portfolio companies, totaling approximately \$71.1 million. At December 31, 2010, we had investments in debt and preferred securities of 30 portfolio companies, totaling approximately \$900.9 million, and equity investments in 9 portfolio companies, totaling approximately \$75.4 million.

The following table shows the fair value of our portfolio of investments by asset class as of December 31, 2011 and 2010:

	December 31, 2011		December 31, 2010	
	Cost	Fair Value	Cost	Fair Value
Bank Debt/Senior Secured Loans	\$ 426,201	\$ 412,396	\$ 250,253	\$ 247,141
Subordinated Debt/Corporate Notes	604,157	546,859	690,817	649,784
Preferred Equity	15,107	14,664	3,929	3,934
Common Equity/Partnership Interests/Warrants	107,108	71,124	118,562	75,362
Total	\$ 1,152,573	\$ 1,045,043	\$ 1,063,561	\$ 976,221

As of December 31, 2011 and 2010, the weighted average yield on income producing investments in our portfolio was approximately 14.2%.

As of December 31, 2011, we had one investment on non-accrual status with a fair value of \$5.9 million. As of December 31, 2010 we had one investment on non-accrual status with a fair value of \$6.6 million.

Recent Portfolio Developments

Subsequent to December 31, 2011, DSW Group, Inc., our largest investment, announced it is seeking to refinance its capital structure. Until the terms of the recapitalization have been finalized, we cannot fully assess the impact on our portfolio; however, at this time, we do not believe the impact will be material.

Results of Operations for the Year Ended December 31, 2011 compared to the Year Ended December 31, 2010***Revenue***

Edgar Filing: Solar Capital Ltd. - Form POS 8C

	For the Year Ended December 31,		% Change
	2011	2010	
	(in thousands)		
Investment income	\$ 138,900	\$ 124,641	11%

Table of Contents

The increase in investment income for the year ended December 31, 2011 compared to the year ended December 31, 2010 was primarily due to an increase of approximately \$18.3 million in interest and dividend income on a higher average invested balance during 2011. Increases were partially offset by decreases of approximately \$4.6 million in repayment related income (call premiums, accelerated fee amortization on prepaid loans, and other fees).

Expenses

	For the Year Ended December 31,		% Change
	2011	2010	
	(in thousands)		
Investment advisory and management fees	\$ 20,596	\$ 18,296	13%
Performance-based incentive fee	20,476	17,305	18%
Interest and other credit facility expenses	9,212	14,276	(35%)
Administrative service fee	1,638	1,294	27%
Other general and administrative expenses	4,326	3,930	10%
Total operating expenses	\$ 56,248	\$ 55,101	2%

Total operating expenses were relatively flat from 2010 to 2011. Both the performance-based incentive fee, which is calculated as a percentage of net investment income above certain hurdle rates, and investment advisory and management fees, which are calculated based on average gross assets, were higher during 2011 due to higher investment income earned on larger average gross assets. Interest and other credit facility expenses for 2011 were lower than 2010 primarily due to lower borrowing rates in 2011 subsequent to the repayment of higher priced fixed rate notes in late 2010. Administrative service fees and other general and administrative expenses were higher for 2011 than for 2010 primarily due to increases in overhead expenses.

Net Realized and Unrealized Gains and Losses

	For the Year Ended December 31,	
	2011	2010
	(in thousands)	
Net realized gain (loss) on investments (net of taxes)	\$ 3,645	\$ (39,365)
Net realized loss on derivatives	(5,620)	(3,124)
Net realized gain (loss) on foreign currency exchange	(418)	3,521
Net unrealized gain (loss) on investments	(20,190)	113,508
Net unrealized loss on derivatives	(1,354)	(1,204)
Net unrealized gain (loss) on foreign currency exchange	3,348	(663)
Total realized and unrealized gain (loss)	\$ (20,589)	\$ 72,673

The combination of the net realized and unrealized gains or losses resulted in a net loss of \$20.6 million for 2011 compared to a net gain of \$72.7 million for 2010. Unrealized losses on investments were primarily due to technical valuation reductions due to overall market weakness during the second half of the year. Whereas, the net gain for 2010 was primarily due to increases in the fair value of our portfolio assets during the year as well as realizations in excess of prior valuations, following recession valuation lows. We analyze this section on a combined basis

Edgar Filing: Solar Capital Ltd. - Form POS 8C

because offsets may exist in the individual line items due to foreign exchange fluctuations and movements from unrealized to realized.

Our investments denominated in Euro, British Pounds and Australian dollars are converted into U.S. dollars at the balance sheet date, and as such, we are exposed to movements in exchange rates. To limit our exposure to

Table of Contents

movements in foreign currency exchange rates we enter into foreign exchange forward contracts or borrow in foreign currencies under our multi-currency revolving credit facility. For the year ended December 31, 2011, the total net realized and unrealized gain on forward contracts was a loss of \$4.5 million compared to a loss of \$4.3 million for the same line items for the year ended December 31, 2010.

To partially mitigate this risk of rising interest rates on our floating rate debt exposure, we purchased two interest rate derivative contracts during 2011, which effectively cap the London Interbank Borrowing Rate (LIBOR) at 1.00% on \$100 million of notional amount through January 2014 and \$50 million of notional amount through May 2014. The interest rate caps were purchased for \$2.94 million and were valued at \$0.47 million on December 31, 2011.

Results of Operations for the Year Ended December 31, 2010 compared to the Year Ended December 31, 2009*Revenue*

	For the Year Ended December 31,		% Change
	2010	2009	
	(in thousands)		
Investment income	\$ 124,641	\$ 109,670	14%

The increase in investment income for the year ended December 31, 2010 compared to the year ended December 31, 2009 was primarily due to increased fee income resulting from the early repayment of assets and higher amortization income during 2010. Call premiums, accelerated fee amortization on prepaid loans, and other fee income was \$12.4 million in 2010 compared to \$1.6 million in 2009. Additionally, amortization of upfront fees was \$2.6 million higher during 2010.

Expenses

	For the Year Ended December 31,		% Change
	2010	2009	
	(in thousands)		
Investment advisory and management fees	\$ 18,296	\$ 16,738	9%
Performance-based incentive fee	17,305	16,815	3%
Interest and other credit facility expenses	14,276	2,636	442%
Administrative service fee	1,294	2,020	(36%)
Other general and administrative expenses	3,930	3,971	(1%)
Total operating expenses	\$ 55,101	\$ 42,180	31%

Investment advisory and management fees, which are calculated based on average gross assets, were higher in 2010 compared to 2009 primarily due to the increased average fair value of our investment portfolio. Total expenses increased by approximately \$13.0 million for the year ended December 31, 2010 compared to the same period in 2009.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Interest and other credit facility expenses were higher in 2010 compared to 2009 primarily due to higher average debt balances outstanding during 2010, including the Senior Unsecured Notes (outstanding from February 2010 through December 2010), Term Loan, and our credit facilities, higher loan fee amortization expense and higher unused credit facility fees.

Administrative service fees and other general and administrative expenses were lower during the 2010 because 2009 included costs related to pre-IPO private fund administration and reporting.

Table of Contents**Net Realized and Unrealized Gains and Losses**

	For the Year Ended December 31,	
	2010	2009
	(in thousands)	
Net realized loss on investments	\$ (39,365)	\$ (253,394)
Net realized loss on derivatives	(3,124)	(12,608)
Net realized gain on foreign currency exchange	3,521	1,104
Net unrealized gain on investments	113,508	287,671
Net unrealized loss on derivatives	(1,204)	(2,583)
Net unrealized loss on foreign currency exchange	(663)	(516)
Total realized and unrealized gain	\$ 72,673	\$ 19,674

The combination of the net realized and unrealized gains or losses resulted in a net gain of \$72.7 million for 2010 compared to \$19.7 million for 2009. The net gain for 2010 was primarily due to increases in the fair value of our portfolio assets during the year as well as realizations in excess of prior valuations. The net increase in the fair value of our portfolio assets was primarily due to continued credit improvement in the portfolio, the tightening of credit spreads in the high yield market and portfolio realizations. We analyze this section on a combined basis because offsets may exist in the individual line items due to foreign exchange fluctuations and movements from unrealized to realized.

Our investments denominated in Euro, British Pounds and Australian dollars are converted into U.S. dollars at the balance sheet date, and as such, we are exposed to movements in exchange rates. To limit our exposure to movements in foreign currency exchange rates we enter into foreign exchange forward contracts or borrow in foreign currencies under our multi-currency revolving credit facility. For the year ended December 31, 2010, the total net realized and unrealized gain on forward contracts was a loss of \$4.3 million compared to a loss of \$15.2 million for the same line items for the year ended December 31, 2009. This is due to a higher relative weakening of the U.S. dollar during 2009 compared to the same period in 2010.

Income Taxes

Solar Capital Ltd., a U.S. corporation, has elected to be treated as a RIC under Subchapter M of the Code, as amended (See Taxation as a Regulated Investment Company in Item 1. Business). In order to qualify as a RIC, among other things, the Company is required to timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, for each year. Depending on the level of taxable income earned in a given tax year, we may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions, the Company accrues excise tax, if any, on estimated excess taxable income as taxable income is earned. For the years ended December 31, 2011 and 2010, U.S. Federal excise tax of \$0.7 million and \$0.1 million was accrued, respectively.

We are also subject to taxes in Luxembourg, through Solar Capital Luxembourg I S.a.r.l., a wholly-owned subsidiary. Under the laws of Luxembourg, we pay a corporate income tax and a municipal business tax on our subsidiary's taxable income.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Prior to our initial public offering in February 2010, Solar Capital LLC was subject to New York City unincorporated business tax (UBT), which is imposed on the business income of every unincorporated business that is carried on in New York City. The UBT is imposed for each taxable year at a rate of 4 percent of taxable income that is allocable to New York City. There was no UBT for 2009 or 2010.

Table of Contents

Liquidity and Capital Resources

The Company's liquidity and capital resources are generated and generally available through its \$405 million multi-currency credit facility maturing in February 2013 (the "\$405 Million Facility"), \$100 million credit facility maturing in December 2015 (the "\$100 Million Facility" and together with the \$405 Million Facility, "Credit Facilities"), \$35 million Term Loan maturing in September 2013, from cash flows from operations, investment sales, repayments of senior and subordinated loans, income earned on investments and cash equivalents, and we expect through periodic follow-on equity and/or debt offerings. We may from time to time issue such securities in either public or private offerings. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors and there can be no assurance that any such issuance will occur or be successful.

On February 9, 2010, we priced our initial public offering, selling 5.68 million shares at \$18.50 per share. Immediately thereafter, our shares began to trade on the NASDAQ Global Select Market under the ticker "SLRC". In addition, we sold 600,000 shares at \$18.50 in a concurrent private placement to Messrs. Gross and Spohler. A total of approximately \$106.7 million was raised through the IPO (net of underwriting fees), and the private placement.

On November 30, 2010, we completed a private placement transaction conducted in accordance with Regulation D under the Securities Act in which we sold an aggregate of 2,850,000 shares of our common stock to certain institutional accredited investors and 115,000 shares of our common stock jointly to Michael S. Gross, our chairman and chief executive officer, and Bruce Spohler, our chief operating officer at a purchase price per share of \$22.94, resulting in approximately \$68 million in gross proceeds. We used the net proceeds resulting from this private placement transaction to repay \$67 million of the Company's then outstanding \$125 million of the Senior Unsecured Notes.

On December 17, 2010, the Company repaid the outstanding \$58 million of Senior Unsecured Notes with borrowings under the \$100 Million Facility.

The primary use of existing funds and any funds raised in the future is expected to be for repayment of indebtedness, investments in portfolio companies, cash distributions to our shareholders or for other general corporate purposes.

At December 31, 2011, 2010 and 2009, we had cash and cash equivalents of approximately \$11.8 million, \$288.7 million and \$5.7 million, respectively. Cash provided by and (used in) operating activities for the years ended December 31, 2011, 2010 and 2009 was approximately \$4.1 million, \$20.6 million and \$17.2 million, respectively. We expect that all current liquidity needs will be met with cash flows from operations and other activities.

Credit Facilities. On February 12, 2010, Solar Capital Ltd. amended and restated Solar Capital LLC's \$250 million credit facility, extending the maturity to February 2013 and increasing the total commitments under the facility to \$270 million. Total commitments under the \$405 Million Facility have since been increased to \$405 million as a result of the addition of three new lenders on May 12, 2010, June 23, 2010 and December 19, 2011. The \$405 Million Facility generally bears interest at LIBOR plus 3.25%. The \$405 Million Facility size may be increased up to \$600 million with additional new lenders or increases in the commitments of current lenders. The \$405 Million Facility contains certain customary affirmative and negative covenants and events of default, including the occurrence of a change of control. In addition, the \$405 Million Facility contains certain financial covenants that among other things, require the Company to maintain a minimum shareholder's equity and a minimum asset coverage ratio.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

On December 17, 2010, we established the \$100 Million Facility with Wells Fargo Securities, LLC acting as administrative agent. In connection with the \$100 Million Facility, our wholly owned financing subsidiary, Solar

Table of Contents

Capital Funding II, LLC (SC Funding), as borrower, entered into a Loan and Servicing Agreement whereby we transferred certain loans we have originated or acquired or will originate or acquire from time to time to SC Funding via a Purchase and Sale Agreement. The \$100 Million Facility, as amended, among other things, matures on December 17, 2015 and generally bears interest based on LIBOR plus 2.75%. The \$100 Million Facility is secured by all of the assets held by SC Funding. Under the \$100 Million Facility, Solar and SC Funding, as applicable, have made certain customary representations and warranties, and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. The \$100 Million Facility includes usual and customary events of default for credit facilities of this nature.

Term Loan. On September 2, 2010, Solar Capital Ltd. entered into the fully funded \$35 million Term Loan, which matures in September 2013, bears interest at a rate per annum equal to the base rate plus 3.25%, and has terms substantially similar to our revolving credit facilities.

Certain covenants may restrict our business activities, including limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code.

Contractual Obligations.

A summary of our significant contractual payment obligations is as follows:

(in millions)	Total	Payments Due by Period			
		Less than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Senior secured revolving credit facilities(1)	\$ 201.4	\$	\$ 103.4	\$ 98.0	\$
Term Loan	\$ 35.0	\$	\$ 35.0	\$	\$

(1) As of December 31, 2011, we had \$303.6 million of unused borrowing capacity under the Credit Facilities.

We have certain commitments pursuant to our Investment Advisory and Management Agreement entered into with Solar Capital Partners. We have agreed to pay a fee for investment advisory and management services consisting of two components a base management fee and an incentive fee. Payments under the Investment Advisory and Management Agreement are equal to (1) a percentage of the value of our average gross assets and (2) a two-part incentive fee. See Item 1. Business Investment Advisory and Management Agreement. We have also entered into a contract with Solar Capital Management to serve as our administrator. Payments under the Administration Agreement are equal to an amount based upon our allocable portion of Solar Capital Management s overhead in performing its obligation under the agreement, including rent, fees, and other expenses inclusive of our allocable portion of the compensation of our chief financial officer and any administrative staff. See Item 1. Business Solar Capital Management.

Off-Balance Sheet Arrangements

In the normal course of its business, we trade various financial instruments and may enter into various investment activities with off-balance sheet risk, which include forward foreign currency contracts. Generally, these financial instruments represent future commitments to purchase or sell other financial instruments at specific terms at future dates. These financial instruments contain varying degrees of off-balance sheet risk

Edgar Filing: Solar Capital Ltd. - Form POS 8C

whereby changes in the market value or our satisfaction of the obligations may exceed the amount recognized in our Statement of Assets and Liabilities.

Borrowings

We had borrowings outstanding of \$201.4 million and \$400.0 million as of December 31, 2011 and 2010, respectively, under the Credit Facilities. See [Credit Facilities](#) for a description of the \$405 Million Facility and the \$100 Million Facility. We also had \$35 million outstanding on the Term Loan as of December 31, 2011 and 2010.

Table of Contents***Distributions and Dividends***

The following table reflects the cash distributions, including dividends and returns of capital, if any, per share that we have declared on our common stock since our initial public offering:

Date Declared	Record Date	Payment Date	Amount
Fiscal 2011			
November 1, 2011	December 15, 2011	December 29, 2011	\$ 0.60
August 2, 2011	September 20, 2011	October 4, 2011	0.60
May 2, 2011	June 17, 2011	July 5, 2011	0.60
March 1, 2011	March 17, 2011	April 4, 2011	0.60
<i>Total 2011</i>			\$ 2.40
Fiscal 2010			
November 2, 2010	December 17, 2010	December 30, 2010	\$ 0.60
August 3, 2010	September 17, 2010	October 4, 2010	0.60
May 4, 2010	June 17, 2010	July 2, 2010	0.60
January 26, 2010	March 18, 2010	April 1, 2010	0.34
<i>Total 2010</i>			\$ 2.14

Tax characteristics of all dividends will be reported to shareholders on Form 1099 after the end of the calendar year. Future quarterly dividends, if any, will be determined by our board of directors.

We have elected to be taxed as a RIC under Subchapter M of the Code. To maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. In addition, although we currently intend to distribute net realized capital gains (net long-term capital gains in excess of short-term capital losses), if any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment.

We maintain an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend, then stockholders cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash dividends.

Related Parties

We have entered into a number of business relationships with affiliated or related parties, including the following:

Edgar Filing: Solar Capital Ltd. - Form POS 8C

We have entered into an Investment Advisory and Management Agreement with Solar Capital Partners. Mr. Gross, our chairman and chief executive officer, is the managing member and a senior investment professional of, and has financial and controlling interests in, Solar Capital Partners. In addition, Mr. Spohler, our chief operating officer is a partner and a senior investment professional of, and has financial interests in, Solar Capital Partners.

Solar Capital Management provides us with the office facilities and administrative services necessary to conduct day-to-day operations pursuant to our Administration Agreement. We reimburse Solar Capital Management for the allocable portion of overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and the compensation of our chief compliance officer, our chief financial officer and any administrative support staff. Solar Capital Partners, our investment adviser, is the sole member of and controls Solar Capital Management.

Table of Contents

We have entered into a license agreement with Solar Capital Partners, pursuant to which Solar Capital Partners has granted us a non-exclusive, royalty-free license to use the name Solar Capital.

Solar Capital Partners and its affiliates may also manage other funds in the future that may have investment mandates that are similar, in whole and in part, with ours. For example, Solar Capital Partners presently serves as investment adviser to Solar Senior Capital Ltd., a publicly traded BDC, which focuses on investing primarily in senior secured loans, including first lien, unitranche and second lien debt instruments. In addition, Michael S. Gross, our chairman and chief executive officer, Bruce Spohler, our chief operating officer, and Nicholas Radesca, our chief financial officer, serve in similar capacities for Solar Senior Capital Ltd. Solar Capital Partners and its affiliates may determine that an investment is appropriate for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, Solar Capital Partners or its affiliates may determine that we should invest side-by-side with one or more other funds. Any such investments will be made only to the extent permitted by applicable law and interpretive positions of the SEC and its staff, and consistent with Solar Capital Partners' allocation procedures.

In addition, we have adopted a formal code of ethics that governs the conduct of our officers and directors. Our officers and directors also remain subject to the duties imposed by both the 1940 Act and the Maryland General Corporation Law.

Table of Contents**SENIOR SECURITIES**

Information about our senior securities is shown in the following tables as of December 31, 2011, 2010, 2009, 2008 and 2007. The report of our independent registered public accounting firm on the senior securities table as of December 31, 2011, 2010 and 2009 is attached as an exhibit to the registration statement of which this prospectus is a part.

<i>(in thousands)</i>	Total Amount Outstanding Exclusive of Treasury Securities(1)	Asset Coverage Ratio Per Unit(2)	Involuntary Liquidation Preference Per Unit(3)	Average Market Value Per Unit(4)
Class and Year				
Senior Secured Revolving Credit Facilities				
2011	\$ 201,355	\$ 4,410		N/A
2010	\$ 400,000	\$ 2,901		N/A
2009	\$ 88,114	\$ 8,920		N/A
2008				N/A
2007				N/A
Senior Secured Term Loan				
2011	\$ 35,000	\$ 4,410		N/A
2010	\$ 35,000	\$ 2,901		N/A

- (1) Total amount of each class of senior securities outstanding at the end of the period presented.
- (2) Asset coverage per unit is the ratio of the carrying value of our total consolidated assets, less all liabilities and indebtedness not represented by senior securities, to the aggregate amount of senior securities representing indebtedness. Asset coverage per unit is expressed in terms of dollar amounts per \$1,000 of indebtedness.
- (3) The amount to which such class of senior security would be entitled upon the voluntary liquidation of the issuer in preference to any security junior to it. The "N/A" in this column indicates that the Securities and Exchange Commission expressly does not require this information to be disclosed for certain types of senior securities.
- (4) Not applicable because senior securities are not registered for public trading.

Table of Contents

BUSINESS

Solar Capital

Solar Capital Ltd., a Maryland corporation formed in November 2007, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for tax purposes we have elected to be treated as a RIC under Subchapter M of the Code.

On February 9, 2010 we priced our initial public offering, selling 5.68 million shares. Concurrent with our initial public offering, management purchased an additional 0.6 million shares through the Concurrent Private Placement. Solar Capital Ltd. issued an aggregate of approximately 26.65 million shares of common stock and \$125 million in Senior Unsecured Notes to the existing Solar Capital LLC unit holders in connection with the Solar Capital Merger. Solar Capital Ltd. had no assets or operations prior to completion of the Solar Capital Merger and as a result, the books and records of Solar Capital LLC have become the books and records of the surviving entity. As of December 17, 2010, the Senior Unsecured Notes have been repaid from proceeds of a private placement transaction that we completed on November 30, 2010 and from borrowings under our credit facility established in December 2010.

We invest primarily in U.S. middle-market companies, where we believe the supply of primary capital is limited and the investment opportunities are most attractive. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in leveraged middle market companies in the form of senior secured loans, mezzanine loans and equity securities. From time to time, we may also invest in public companies that are thinly traded. Our business model is focused primarily on the direct origination of investments through portfolio companies or their financial sponsors. Our investments generally range between \$20 million and \$100 million each, although we expect that this investment size will vary proportionately with the size of our capital base. We are managed by Solar Capital Partners. Solar Capital Management provides the administrative services necessary for us to operate. In addition, we may invest a portion of our portfolio in other types of investments, which we refer to as opportunistic investments, which are not our primary focus but are intended to enhance our overall returns. These investments may include, but are not limited to, direct investments in public companies that are not thinly traded and securities of leveraged companies located in select countries outside of the United States.

As of December 31, 2011, our long term investments totaled \$1.05 billion and our net asset value was \$805.9 million. Our portfolio was comprised of debt and equity investments in 40 portfolio companies and our income producing assets, which represented 91.2% of our total portfolio, had a weighted average annualized yield on a fair value basis of approximately 14.2%.

During the year ended December 31, 2011, we originated approximately \$318.8 million of new investments in 13 portfolio companies and approximately \$76.8 million was invested in six existing portfolio companies. We also had approximately \$308.7 million in debt repayments of existing portfolio companies and sales of securities of 4 portfolio companies for approximately \$29.4 million, during 2011.

About Solar Capital Partners

Solar Capital Partners, our investment adviser, is controlled and led by Michael S. Gross, our chairman and chief executive officer, and Bruce Spohler, our chief operating officer. They are supported by a team of dedicated investment professionals, including senior team members Brian Gerson, Cedric Henley, David Mait and Suhail Shaikh. We refer to Messrs. Gross, Spohler, Gerson, Henley, Mait and Shaikh as Solar Capital

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Partners senior investment professionals. Solar Capital Partners investment team has extensive experience in the private equity and leveraged lending industries, as well as significant contacts with financial sponsors operating in those industries.

In addition, Solar Capital Partners presently serves as the investment adviser for Solar Senior Capital Ltd, or Solar Senior, a publicly traded business development company with more than \$300 million of investable capital that invests in the senior debt securities of leveraged middle market companies similar to those we intend to target for investment. The investment team led by Messrs. Gross and Spohler has invested in approximately 90 different

Table of Contents

portfolio companies for Solar Capital and Solar Senior, which investments involved an aggregate of approximately 80 different financial sponsors, through December 31, 2011. Since Solar Capital's inception, these investment professionals have used their relationships in the middle-market financial sponsor and financial intermediary community to generate deal flow. As of March 26, 2012, Mr. Gross and Mr. Spohler beneficially owned, either directly or indirectly, approximately 5.76% and 5.62%, respectively, of our outstanding common stock.

Mr. Gross has 25 years of experience in the private equity, distressed debt and mezzanine lending businesses and has been involved in originating, structuring, negotiating, consummating and managing private equity, distressed debt and mezzanine lending transactions. Prior to his current role as our chairman, chief executive officer and president, Mr. Gross founded Apollo Investment Corporation, a publicly traded BDC. He served as its chairman from February 2004 to July 2006 and its chief executive officer from February 2004 to February 2006. Under his management, Apollo Investment Corporation raised approximately \$930 million in gross proceeds in an initial public offering in April 2004, built a dedicated investment team and infrastructure and invested approximately \$2.3 billion in over 65 companies in conjunction with 50 different private equity sponsors. Mr. Gross is also a founder and a former senior partner of Apollo Management, L.P., a leading private equity firm. During his tenure at Apollo Management, L.P., Mr. Gross was a member of the investment committee that was responsible for overseeing more than \$13 billion of investments in over 150 companies.

Mr. Gross also currently serves on the boards of directors of three public companies, and in the past has served on the boards of directors of more than 20 public and private companies. As a result, Mr. Gross has developed an extensive network of private equity sponsor relationships as well as relationships with management teams of public and private companies, investment bankers, attorneys and accountants that we believe should provide us with significant business opportunities.

We also rely on the 25 years of experience of Mr. Spohler, who has served as our chief operating officer and a partner of Solar Capital Partners since inception. Previously, Mr. Spohler was a managing director and a former co-head of U.S. Leveraged Finance for CIBC World Markets. He held numerous senior roles at CIBC World Markets, including serving on the U.S. Management Committee, Global Executive Committee and the Deals Committee, which approves all of CIBC World Markets' U.S. corporate finance debt capital decisions. During Mr. Spohler's tenure, he was responsible for senior loan, high yield and mezzanine origination and execution, as well as CIBC World Markets' below investment grade loan portfolio in the United States. As a co-head of U.S. Leveraged Finance, Mr. Spohler oversaw over 300 capital raising and merger and acquisition transactions, comprising over \$40 billion in market capitalization.

In addition to Messrs. Gross and Spohler, Solar Capital Partners' senior investment professionals include Messrs. Gerson, Henley, Mait and Shaikh each of whom has extensive experience in originating, evaluating and structuring investments in the types of middle-market companies we currently target. Solar Capital Partners' senior investment professionals have an average of over 20 years of experience in the private equity and leveraged lending industries.

Solar Capital Partners' senior investment professionals have been active participants in the primary and secondary leveraged credit markets throughout their careers. They have effectively managed portfolios of distressed and mezzanine debt as well as other investment types. The depth of their experience and credit market expertise has led them through various stages of the economic cycle as well as several market disruptions.

Market Opportunity

Solar Capital invests primarily in senior secured loans, mezzanine loans and equity securities of middle-market leveraged companies. We believe that the size of this market, coupled with leveraged companies' need for flexible sources of capital at attractive terms and rates, create an

attractive investment environment for us.

Middle-market companies have faced increasing difficulty in accessing the capital markets. While many middle-market companies were formerly able to raise funds by issuing high-yield bonds, we believe this approach to financing has become more difficult in recent years as institutional investors have sought to

Table of Contents

invest in larger, more liquid offerings. In addition, many private finance companies that historically financed their lending and investing activities through securitization transactions have lost that source of funding and reduced lending significantly. Moreover, consolidation and the illiquid nature of investments has resulted in fewer middle market lenders and market participants.

There is a large pool of uninvested private equity capital likely to seek additional capital to support their investments. There is currently over \$520 billion of uninvested private equity capital seeking debt financing to support acquisitions. We expect that middle-market private equity firms will continue to invest the approximately \$185 billion raised since 2000 in middle-market companies and that those private equity firms will seek to support their investments with mezzanine loans from sources such as Solar Capital. Additionally, over \$17.4 billion was raised by middle-market sponsors during 2011, which we believe demonstrates the continued appetite for middle-market acquisitions that require debt financing.

The significant amount of debt maturing through 2018 should provide additional demand for capital. A high volume of financings were completed between the years 2004 and 2007, which are expected to mature over the next few years. We believe that this supply of prospective lending opportunities coupled with a lack of available credit in the middle-market lending space may offer attractive risk-adjusted returns to investors.

Investing in private middle-market debt provides an attractive risk reward profile. In general, terms for illiquid, middle-market subordinated debt have been more attractive than those for larger corporations which are typically more liquid. We believe this is because fewer institutions are able to invest in illiquid asset classes. In 2011, on average, the total debt to EBITDA ratio for middle-market LBOs was 4.3x, versus 5.4x for large capitalization LBOs. This reduced leverage provides further cushion for borrowers to meet debt service obligations.

Therefore, we believe that there is an attractive opportunity to invest in senior secured loans, mezzanine loans and equity securities of leveraged companies, and that we are well positioned to serve this market.

Competitive Advantages and Strategy

We believe that we have the following competitive advantages over other providers of financing to leveraged companies:

Management Expertise

As managing partner, Mr. Gross has principal management responsibility for Solar Capital Partners, to which he currently dedicates substantially all of his time. Mr. Gross has 25 years of experience in leveraged finance, private equity and distressed debt investing. Mr. Spohler, our chief operating officer and a partner of Solar Capital Partners, has 25 years of experience in evaluating and executing leverage finance transactions. We believe that Messrs. Gross and Spohler have developed a strong reputation in the capital markets, and that this experience provides us with a competitive advantage in identifying and investing in leveraged companies with the potential to generate returns. We believe that our investment team has extensive experience in the private equity and leveraged lending industries, as well as significant contacts with financial sponsors operating in those industries. We believe that our investment team has a proven track record of valuing companies and assets and negotiating transactions.

In addition to Messrs. Gross and Spohler, Solar Capital Partners' senior investment team includes Messrs. Gerson, Henley, Mait and Shaikh, each of whom has extensive experience in originating, evaluating and structuring investments in the types of middle-market companies we currently

Edgar Filing: Solar Capital Ltd. - Form POS 8C

target. Solar Capital Partners' senior investment professionals have an average of over 20 years of experience in the private equity and leveraged lending industries.

Solar Capital Partners' senior investment professionals have been active participants in the primary and secondary leveraged credit markets throughout their careers. They have effectively managed portfolios of

Table of Contents

distressed and mezzanine debt as well as other investment types. The depth of their experience and credit market expertise has led them through various stages of the economic cycle as well as several market disruptions.

Investment Portfolio

Our portfolio investments consist of portfolio companies that have strong cash flows and have maintained financial and operating performance despite the recent economic climate. As of December 31, 2011, over 99% of our total portfolio value of income producing assets was comprised of performing assets. The majority of our assets have been seasoned, which has allowed us to gain a solid understanding of our borrowers and the industries in which they compete. Additionally, over time, we have established productive relationships with our portfolio companies.

Investment Capacity

The proceeds from our initial public offering and the Concurrent Private Placement, the borrowing capacity under our credit facilities and our \$35 million Term Loan, and the expected repayments of existing investments provide us with a substantial amount of capital available for deployment into new investment opportunities. We believe we are well positioned for the current marketplace. We believe that in the current economic environment financing needs of many companies will increase while funding options are limited, allowing us to capitalize on favorable investment opportunities.

Solar Capital's Limited Leverage

As of December 31, 2011, we had outstanding borrowings of \$201.4 million. We believe our relatively low level of leverage provides us with a competitive advantage, allowing us to anticipate providing a consistent dividend to our investors as proceeds from our investments are available for reinvestment as opposed to being consumed by debt repayment. To the extent borrowing conditions improve and leverage becomes available on more attractive terms, we may increase our relative level of debt in the future. However, we do not currently anticipate operating with a substantial amount of debt relative to our total assets. Furthermore, by maintaining prudent leverage levels, we believe we will be better positioned to weather future market downturns.

Proprietary Sourcing and Origination

We believe that Solar Capital Partners' senior investment professionals' longstanding relationships with financial sponsors, commercial and investment banks, management teams and other financial intermediaries provide us with a strong pipeline of proprietary origination opportunities. We believe the broad expertise of Solar Capital Partners' senior investment team and their ability to draw upon their average of over 20 years of investment experience enable us to identify, assess and structure investments successfully. We expect to continue leveraging the relationships Mr. Gross established while sourcing and originating investments at Apollo Investment Corporation as well as the financial sponsor relationships Mr. Spohler developed while he was a co-head of CIBC World Markets' U.S. Leveraged Finance Group.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Our senior investment team's strong relationship network is enhanced by the collaborative role Solar Capital plays in the private equity industry. We offer tailored solutions to our portfolio companies, and we believe that this role provides us with greater deal flow as opposed to being viewed as a competitor bidding for control stakes. Because Solar Capital is not associated with a private equity firm, we are not precluded from partnering with most of the top tier financial sponsors.

These direct investments enable us to perform more in-depth due diligence and play an active role in structuring financings. We believe that effectuating the transaction terms and having greater insight into a portfolio company's operations and financial picture assist Solar Capital in minimizing downside potential, while reinforcing Solar Capital as a trusted partner who delivers comprehensive financing solutions. Since its inception,

Table of Contents

Solar Capital Partners has sourced investments in approximately 90 different portfolio companies for both Solar Capital and Solar Senior, collectively, which investments involved an aggregate of approximately 80 different financial sponsors, through December 31, 2011.

Versatile Transaction Structuring and Flexibility of Capital

We believe Solar Capital Partners' senior investment team's broad expertise and ability to draw upon their extensive experience enable us to identify, assess and structure investments successfully across all levels of a company's capital structure and to manage potential risk and return at all stages of the economic cycle. While we are subject to significant regulation as a BDC, we are not subject to many of the regulatory limitations that govern traditional lending institutions such as banks. As a result, we believe that we can be more flexible than such lending institutions in selecting and structuring investments, adjusting investment criteria, transaction structures and, in some cases, the types of securities in which we invest. We believe financial sponsors, management teams and investment banks see this flexibility as a benefit, making us an attractive financing partner. We believe that this approach enables us to procure attractive investment opportunities throughout the economic cycle so that we can make investments consistent with our stated investment objective even during turbulent periods in the capital markets.

Emphasis on Achieving Strong Risk-Adjusted Returns

Solar Capital Partners uses a disciplined investment and risk management process that emphasizes a rigorous fundamental research and analysis framework. Solar Capital Partners seeks to build our portfolio on a bottom-up basis, choosing and sizing individual positions based on their relative risk/reward profiles as a function of the associated downside risk, volatility, correlation with the existing portfolio and liquidity. At the same time, Solar Capital Partners takes into consideration a variety of factors in managing our portfolio and imposes portfolio-based risk constraints promoting a more diverse portfolio of investments and limiting issuer and industry concentration. Our value-oriented investment philosophy focuses on preserving capital and ensuring that our investments have an appropriate return profile in relation to risk. When market conditions make it difficult for us to invest according to our criteria, we are highly selective in deploying our capital. We do not pursue short-term origination targets. We believe this approach enables us to build an attractive investment portfolio that meets our return and value criteria over the long term.

We believe it is critical to conduct extensive due diligence on investment targets. In evaluating new investments we, through Solar Capital Partners, conduct a rigorous due diligence process that draws upon investment experience, industry expertise and network of contacts of our senior investment professionals, as well as the other members of our investment team. Among other things, our due diligence is designed to ensure that a prospective portfolio company will be able to meet its debt service obligations.

We have the ability to invest across an issuer's capital structure, which we believe enables us to provide comprehensive financing solutions for our portfolio companies, as well as access the best risk-adjusted opportunities. The overall transaction size and product mix is based upon the needs of the customer, as well as our risk-return hurdles. We also focus on downside protection and preservation of capital throughout the structuring process.

Deep Industry Focus with Substantial Information Flow

We concentrate our investing activities in industries characterized by strong cash flow and in which Solar Capital Partners' investment professionals have deep investment experience. During his time with the Apollo entities, Mr. Gross oversaw investments in over 200 companies

Edgar Filing: Solar Capital Ltd. - Form POS 8C

in 20 industries. As a result of their investment experience, Messrs. Gross and Spohler, together with Solar Capital Partners' other senior investment professionals, have long-term relationships with management consultants and management teams in the industries we target, as well as substantial information concerning those industries. Solar Capital Partners

Table of Contents

investment team also has significant experience in evaluating and making investments in the industries we target. We believe that the in-depth experience of Solar Capital Partners' investment team in investing throughout various stages of the economic cycle provides our investment adviser with access to ongoing market insights in addition to a powerful asset for investment sourcing. See **Business** **Investments**.

Longer Investment Horizon

Unlike private equity and venture capital funds, we will not be subject to standard periodic capital return requirements. Such requirements typically stipulate that the capital of these funds, together with any capital gains on such invested funds, can only be invested once and must be returned to investors after a pre-agreed time period. We believe that our flexibility to make investments with a long-term view and without the capital return requirements of traditional private investment vehicles provides us with the opportunity to generate favorable returns on invested capital and enables us to be a better long-term partner for our portfolio companies.

Investments

Solar Capital seeks to create a diverse portfolio that includes senior secured loans, mezzanine loans and equity securities by investing approximately \$20 to \$100 million of capital, on average, in the securities of leveraged companies, including middle-market companies. Our portfolio includes both senior secured loans and mezzanine loans. Structurally, mezzanine loans usually rank subordinate in priority of payment to senior debt, such as senior bank debt, and are often unsecured. As such, other creditors may rank senior to us in the event of insolvency. However, mezzanine loans rank senior to common and preferred equity in a borrower's capital structure. Typically, mezzanine loans have elements of both debt and equity instruments, offering fixed returns in the form of interest payments associated with senior debt, while providing lenders an opportunity to participate in the capital appreciation of a borrower, if any, through an equity interest. This equity interest may take the form of warrants. Due to its higher risk profile and often less restrictive covenants as compared to senior loans, mezzanine loans generally earn a higher return than senior secured loans. The warrants associated with mezzanine loans are typically detachable, which allows lenders to receive repayment of their principal on an agreed amortization schedule while retaining their equity interest in the borrower. Mezzanine loans also may include a put feature, which permits the holder to sell its equity interest back to the borrower at a price determined through an agreed formula. We believe that mezzanine loans offer an attractive investment opportunity based upon their historic returns and resilience during economic downturns.

In addition to senior secured loans and mezzanine loans, we may invest a portion of our portfolio in opportunistic investments, which are not our primary focus, but are intended to enhance our returns to our investors. These investments may include direct investments in public companies that are not thinly traded and securities of leveraged companies located in select countries outside of the United States.

Additionally, we may in the future seek to securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly owned subsidiary and contribute a pool of loans to the subsidiary. This could include the sale of interests in the subsidiary on a non-recourse basis to purchasers who we would expect to be willing to accept a lower interest rate to invest in investment grade loan pools, and we would retain a portion of the equity in the securitized pool of loans.

Moreover, we may acquire investments in the secondary market and, in analyzing such investments, we will employ the same analytical process as we use for our primary investments.

Table of Contents

Our principal focus is to provide senior secured loans and mezzanine loans to leveraged companies in a variety of industries. We generally seek to target companies that generate positive cash flows. We generally seek to invest in companies from the broad variety of industries in which our investment adviser has direct expertise. The following is a representative list of the industries in which we may invest.

Aerospace & Defense	
Automobile	Healthcare, Education & Childcare
Banking	Home, Office Furnishings & Durable Consumer Prds
Beverage, Food & Tobacco	Hotels, Motels, Inns and Gaming
Buildings & Real Estate	Insurance
Broadcasting & Entertainment	Leisure, Amusement, Entertainment
Cargo Transport	Machinery
Chemicals, Plastics & Rubber	Mining, Steel, Iron & Nonprecious Metals
Containers, Packaging & Glass	Oil & Gas
Diversified/Conglomerate Manufacturing	Personal, Food and Misc. Services
Diversified/Conglomerate Services	Personal Transportation
Electronics	Printing & Publishing
Farming & Agriculture	Retail Stores
Finance	Telecommunications
Grocery	Textiles & Leather
	Utilities

We may invest in other industries if we are presented with attractive opportunities.

Set forth below is a list of our ten largest portfolio company investments as of December 31, 2011, as well as the top ten industries in which we were invested as of December 31, 2011, in each case calculated as a percentage of our total assets as of such date.

Portfolio Company	% of Total Assets
DSW Group, Inc.	9.9%
Midcap Financial Intermediate Holdings, LLC	7.0%
Earthbound Farm	5.2%
Rug Doctor L.P	4.4%

Healthcare, Education & Childcare	5.3%
Farming & Agriculture	5.2%
Grocery	5.1%
Retail Stores	4.2%
Diversified/Conglomerate Service	3.9%

Investment Selection Process

Solar Capital Partners utilizes a value-oriented investment philosophy with a focus on the preservation of capital and a commitment to managing downside exposure.

Portfolio Company Characteristics

We have identified several criteria that we believe are important in identifying and investing in prospective portfolio companies. These criteria provide general guidelines for our investment decisions; however, not all of these criteria will be met by each prospective portfolio company in which we choose to invest.

Table of Contents

Stable Earnings and Strong Free Cash Flow. We seek to invest in companies who have demonstrated stable earnings through economic cycles. We target companies that can de-lever through consistent generation of cash flows rather than relying solely on growth to service and repay our loans.

Value Orientation. Our investment philosophy places a premium on fundamental analysis from an investor's perspective and has a distinct value orientation. We focus on companies in which we can invest at relatively low multiples of operating cash flow and that are profitable at the time of investment on an operating cash flow basis.

Value of Assets. The prospective value of the assets, if any, that collateralizes the loans in which we invest, is an important factor in our credit analysis. Our analysis emphasizes both tangible assets, such as accounts receivable, inventory, equipment and real estate, and intangible assets, such as intellectual property, customer lists, networks and databases. In some of our transactions the company's fundings may be derived from a borrowing base determined by the value of the company's assets.

Strong Competitive Position in Industry. We seek to invest in target companies that have developed leading market positions within their respective markets and are well positioned to capitalize on growth opportunities. We seek companies that demonstrate significant competitive advantages versus their competitors, which we believe should help to protect their market position and profitability. Typically, we would not invest in start-up companies or companies having speculative business plans.

Diversified Customer and Supplier Base. We seek to acquire businesses that have a diversified customer and supplier base. We believe that companies with a diversified customer and supplier base are generally better able to endure economic downturns, industry consolidation, changing business preferences and other factors that may negatively impact their customers, suppliers and competitors.

Exit Strategy. We predominantly invest in companies which provide multiple alternatives for an eventual exit. We look for opportunities that provide an exit typically within three years of the initial capital commitment.

We seek companies that we believe will provide a steady stream of cash flow to repay our loans and reinvest in their respective businesses. We believe that such internally generated cash flow, leading to the payment of interest on, and the repayment of the principal of, our investments in portfolio companies represents a key means by which we will be able to exit from our investments over time.

In addition, we also seek to invest in companies whose business models and expected future cash flows offer attractive exit possibilities. These companies include candidates for strategic acquisition by other industry participants and companies that may repay our investments through an initial public offering of common stock or another capital market transaction. We underwrite our investments on a held-to-maturity basis, but expensive capital is often repaid prior to stated maturity.

Experienced and Committed Management. We generally require that portfolio companies have an experienced management team. We also require portfolio companies have in place proper incentives to induce management to succeed and to act in concert with our interests as investors, including having significant equity interests.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Strong Sponsorship. We aim to invest alongside other sophisticated investors. We seek to partner with successful financial sponsors who have historically generated high returns. We believe that investing in these sponsors' portfolio companies enables us to benefit from their direct involvement and due diligence.

Table of Contents

The illustration below provides Solar Capital's target portfolio companies and the targeted position of its investment in a company's capital structure.

(1) Investment size may vary proportionally as the size of the capital base changes.

Solar Capital's investment team works in concert with sponsors to proactively manage investment opportunities by acting as a partner throughout the investment process. We actively focus on the middle-market financial sponsor community, with a particular focus on the upper-end of the middle-market (sponsors with equity funds of \$800 million to \$3 billion). We favor such sponsors because they typically:

buy larger companies with strong business franchises;

invest significant amounts of equity in their portfolio companies;

value flexibility and creativity in structuring their transactions;

possess longer track records over multiple investment funds;

have a deeper management bench;

have better ability to withstand downturns; and

possess the ability to support portfolio companies with additional capital.

We divide our coverage of these sponsors among our more senior investment professionals, who are responsible for day-to-day interaction with financial sponsors. Our coverage approach aims to act proactively, consider all investments in the capital structure, provide quick feedback, deliver on commitments, and are constructive throughout the life cycle of an investment.

Due Diligence

Our private equity approach to credit investing incorporates extensive in-depth due diligence often alongside the private equity sponsor. In conducting due diligence, we use publicly available information as well as information from relationships with former and current management teams, consultants, competitors and

Table of Contents

investment bankers. Our due diligence methodology allows us to screen a high volume of potential investment opportunities on a consistent and thorough basis and typically can last two to three months.

Our due diligence typically includes:

review of historical and prospective financial information;

research relating to the company's management, industry, markets, products and services and competitors;

on-site visits;

discussions with management, employees, customers or vendors of the potential portfolio company;

review of senior loan documents; and

background investigations.

We also evaluate the private equity sponsor making the investment. Further, due to Solar Capital Partners' considerable repeat business with sponsors, we have direct experience with the management teams of many sponsors. A private equity sponsor is typically the controlling shareholder upon completion of an investment and as such is considered critical to the success of the investment. The equity sponsor is evaluated along several key criteria, including:

Investment track record;

Industry experience;

Capacity and willingness to provide additional financial support to the company through additional capital contributions, if necessary; and

Reference checks.

Throughout the diligence process, a deal team is in constant dialogue with the investment team to ensure that any concerns are addressed as early as possible through the process and that unsuitable investments are filtered out before considerable time has been invested. In total, due to our thorough diligence process, we only complete 1.5% to 2.0% of all opportunities that we review annually.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Upon the completion of due diligence and a decision to proceed with an investment in a company, the investment professionals leading the investment present the investment opportunity to Solar Capital Partners' investment committee, which then determines whether to pursue the potential investment. Additional due diligence with respect to any investment may be conducted on our behalf by attorneys and independent accountants prior to the closing of the investment, as well as other outside advisers, as appropriate.

The Investment Committee

All new investments are required to be approved by a consensus of the investment committee of Solar Capital Partners, which is led by Messrs. Gross and Spohler. The members of Solar Capital Partners' investment committee receive no compensation from us. Such members may be employees or partners of Solar Capital Partners and may receive compensation or profit distributions from Solar Capital Partners.

Investment Structure

Once we determine that a prospective portfolio company is suitable for investment, we work with the management of that company and its other capital providers, including senior, junior and equity capital providers, to structure an investment. We negotiate among these parties to agree on how our investment is expected to perform relative to the other capital in the portfolio company's capital structure.

We structure our mezzanine investments primarily as unsecured, subordinated loans that provide for relatively high, fixed interest rates that provide us with significant current interest income. These loans typically have interest-only payments in the early years, with amortization of principal deferred to the later years of the mezzanine loans. In some cases, we may enter into loans that, by their terms, convert into equity or additional

Table of Contents

debt securities or defer payments of interest for the first few years after our investment. Also, in some cases our mezzanine loans may be collateralized by a subordinated lien on some or all of the assets of the borrower. Typically, our mezzanine loans have maturities of five to ten years.

We also invest in portfolio companies in the form of senior secured loans. These senior secured loans typically provide for deferred interest payments in the first few years of the term of the loan. We generally obtain security interests in the assets of our portfolio companies that serve as collateral in support of the repayment of these loans. This collateral may take the form of first or second priority liens on the assets of a portfolio company.

Typically, our mezzanine and senior secured loans have final maturities of five to ten years. However, we expect that our portfolio companies often may repay these loans early, generally within three years from the date of initial investment. To preserve an acceptable return on investment, we seek to structure these loans with prepayment premiums.

In the case of our mezzanine loan and senior secured loan investments, we tailor the terms of the investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its profitability. For example, in addition to seeking a senior position in the capital structure of our portfolio companies, we will seek to limit the downside potential of our investments by:

requiring a total return on our investments (including both interest and potential capital appreciation) that compensates us for credit risk;

incorporating put rights and call protection into the investment structure; and

negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or participation rights.

Our investments may include equity features, such as warrants or options to buy a minority interest in the portfolio company. Any warrants we receive with our debt securities generally require only a nominal cost to exercise, and thus, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure the warrants to provide provisions protecting our rights as a minority interest holder, as well as puts, or rights to sell such securities back to the company, upon the occurrence of specified events. In many cases, we also obtain registration rights in connection with these equity securities, which may include demand and piggyback registration rights. In addition, we may from time to time make direct equity investments in portfolio companies.

We seek to hold most of our investments to maturity or repayment, but will sell our investments earlier if a liquidity event takes place, such as the sale or recapitalization of a portfolio company.

Ongoing Relationships with Portfolio Companies

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Monitoring. Solar Capital Partners monitors our portfolio companies on an ongoing basis. Solar Capital Partners monitors the financial trends of each portfolio company to determine if it is meeting its business plan and to assess the appropriate course of action for each company.

Solar Capital Partners has several methods of evaluating and monitoring the performance and fair value of our investments, which include the following:

Assessment of success in adhering to each portfolio company's business plan and compliance with covenants;

Table of Contents

Periodic and regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor, to discuss financial position, requirements and accomplishments;

Comparisons to other Solar Capital portfolio companies in the industry, if any;

Attendance at and participation in board meetings; and

Review of monthly and quarterly financial statements and financial projections for portfolio companies.

In addition to various risk management and monitoring tools, Solar Capital Partners also uses an investment rating system to characterize and monitor our expected level of returns on each investment in our portfolio.

We use an investment rating scale of 1 to 4. The following is a description of the conditions associated with each investment rating:

Investment

Rating	Summary Description
1	Involves the least amount of risk in our portfolio, the portfolio company is performing above expectations, and the trends and risk factors are generally favorable (including a potential exit)
2	Risk that is similar to the risk at the time of origination, the portfolio company is performing as expected, and the risk factors are neutral to favorable; all new investments are initially assessed a grade of 2
3	The portfolio company is performing below expectations, may be out of compliance with debt covenants, and requires procedures for closer monitoring
4	The investment is performing well below expectations and is not anticipated to be repaid in full

Solar Capital Partners monitors and, when appropriate, changes the investment ratings assigned to each investment in our portfolio. As of December 31, 2011, the weighted average investment rating on the fair market value of our portfolio was 2.1. In connection with our valuation process, Solar Capital Partners reviews these investment ratings on a quarterly basis.

Valuation Procedures

We will conduct the valuation of our assets, pursuant to which our net asset value shall be determined, at all times consistent with GAAP and the 1940 Act. Our valuation procedures are set forth in more detail below:

Securities for which market quotations are readily available on an exchange shall be valued at the closing price on the day of valuation. We may also obtain quotes with respect to certain of our investments from pricing services or brokers or dealers in order to value assets. When doing so, we determine whether the quote obtained is sufficient according to GAAP to determine the fair value of the security. If determined adequate, we use the quote obtained.

Securities for which reliable market quotations are not readily available or for which the pricing source does not provide a valuation or methodology or provides a valuation or methodology that, in the judgment of our investment adviser or board of directors, does not represent fair value, shall each be valued as follows: (i) each portfolio company or investment is initially valued by the investment professionals responsible for the portfolio investment; (ii) preliminary valuation conclusions are documented and discussed with our senior management; (iii) independent third-party valuation firms engaged by, or on behalf of, the board of directors will conduct independent appraisals and review management's preliminary valuations and make their own assessment for all material assets; (iv) the board of directors will discuss valuations and determine the fair value of each investment in our portfolio in good faith based on the input of the investment adviser and, where appropriate, the respective third-party valuation firms.

Table of Contents

The recommendation of fair value will generally be based on the following factors, as relevant:

the nature and realizable value of any collateral;

the portfolio company's ability to make payments;

the portfolio company's earnings and discounted cash flow;

the markets in which the issuer does business; and

comparisons to publicly traded securities.

Securities for which market quotations are not readily available or for which a pricing source is not sufficient may include, but are not limited to, the following:

private placements and restricted securities that do not have an active trading market;

securities whose trading has been suspended or for which market quotes are no longer available;

debt securities that have recently gone into default and for which there is no current market;

securities whose prices are stale;

securities affected by significant events; and

securities that the investment adviser believes were priced incorrectly.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our financial statements express the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements.

Competition

Our primary competitors provide financing to middle-market companies and include other BDCs, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative

investment vehicles, such as hedge funds, frequently invest in middle-market companies. As a result, competition for investment opportunities at middle-market companies can be intense. However, we believe that there has been a reduction in the amount of debt capital available since the downturn in the credit markets, which began in mid-2007, and that this has resulted in a less competitive environment for making new investments. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. We use the industry information available to Messrs. Gross and Spohler the other investment professionals of Solar Capital Partners to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we believe that the relationships of Messrs. Gross and Spohler and the other investment professionals of our investment adviser enable us to learn about, and compete effectively for, financing opportunities with attractive leveraged companies in the industries in which we seek to invest.

Staffing

We do not currently have any employees. Mr. Gross, our chief executive officer, and Mr. Spohler, our chief operating officer, currently serve as partners of our investment adviser, Solar Capital Partners. Nicholas Radesca, our chief financial officer and corporate secretary, is employed by Solar Capital Management, and performs his functions as chief financial officer under the terms of our Administration Agreement. Guy Talarico, our chief

Table of Contents

compliance officer, is the chief executive officer of Alaric Compliance Services, LLC, and performs his functions as our chief compliance officer under the terms of an agreement between Solar Capital Management and Alaric Compliance Services, LLC. Solar Capital Management has retained Mr. Talarico and Alaric Compliance Services, LLC pursuant to its obligations under our Administration Agreement.

Our day-to-day investment operations are managed by Solar Capital Partners. Solar Capital Partners' investment personnel currently consists of its senior investment professionals, Messrs. Gross, Spohler, Gerson, Henley, Mait and Shaikh, and a team of additional experienced investment professionals. Based upon its needs, Solar Capital Partners may hire additional investment professionals. In addition, we will reimburse Solar Capital Management for the allocable portion of overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and the compensation of our chief financial officer and any administrative support staff.

Properties

Our executive offices are located at 500 Park Avenue, New York, New York 10022, and are provided by Solar Capital Management in accordance with the terms of the Administration Agreement. We believe that our office facilities are suitable and adequate for our business as it is contemplated to be conducted.

Legal Proceedings

None of us, our investment adviser or administrator, is currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us, or against our investment adviser or administrator. From time to time, we, our investment adviser or administrator, may be a party to certain legal proceedings in the ordinary course of business, including proceedings relating to the enforcement of our rights under contracts with our portfolio companies. While the outcome of these legal proceedings cannot be predicted with certainty, we do not expect that these proceedings will have a material effect upon our financial condition or results of operations.

Table of Contents**PORTFOLIO COMPANIES**

The following table sets forth certain information as of December 31, 2011 for each portfolio company in which we had a debt or equity investment. The general terms of our debt and equity investments are described in Business Investments. Other than these investments, our only formal relationships with our portfolio companies are the managerial assistance we may provide upon request and the board observer or participation rights we may receive in connection with our investment. Other than Ark Real Estate Partners, National Specialty Alloys, LLC, SOCA Y Corp., SODAY Corp., and USAW 767, we do not control and are not an affiliate of any of our portfolio companies, each as defined in the 1940 Act. In general, under the 1940 Act, we would control a portfolio company if we owned more than 25% of its voting securities and would be an affiliate of a portfolio company if we owned more than 5% of its voting securities.

- (1) All interest is payable in cash unless otherwise indicated. A majority of the variable rate debt investments bear interest at a rate that may be determined by reference to LIBOR or EURIBOR, and which reset daily quarterly (Q), monthly (M), or semi-annually (S). For each debt investment we have provided the current interest rate in effect as of December 31, 2011.
- (2) All or a portion of interest may be deferred through a payment-in-kind interest option.
- (3) Includes an unfunded par commitment of \$6.0 million.
- (4) Pays on a variable rate, subject to a base rate floor.
- (5) Includes an unfunded par commitment of \$15.3 million.
- (6) Includes an unfunded par commitment of \$1.3 million.
- (7) Denotes an investment that we believe does not meet the requirements to be considered a qualifying asset under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire any asset other than assets of the type listed in Section 55(a) of the 1940 Act, which are referred to as qualifying assets, unless, at the time the acquisition is made, qualifying assets represent at least 70% of our total assets.

Set forth below is a brief description of each portfolio company in which we have made an investment that represents greater than 5% of our total assets as of December 31, 2011.

DS Waters

DS Waters produces and distributes bottled water products in the U.S. DS Waters commands a leading market presence in the HOD (home and office delivery) space, particularly in the 3 gallon, 5 gallon and ½ liter bottled water segments. Water is bottled at DS Waters' manufacturing facilities and then delivered by its fleet of delivery trucks to homes and offices across the country. DS Waters operates in most major markets in the U.S. based on population, and the company maintains a significant market share position in most of the markets in which it operates.

Earthbound Farm

Earthbound is a leading provider of organic value-added produce in the United States, with a leading market share in the organic packaged salad category. This company sells organic packaged salads, fruits and vegetables under the Earthbound Farm brand name and also sells under private label to select customers. Earthbound's customer base includes retail grocers, natural food retailers, club stores, mass merchants, and food service distributors.

Midcap Financial Intermediate Holdings, LLC

Midcap Financial is a commercial finance firm that focuses exclusively on providing debt solutions to middle market health care companies. Midcap Financial provides a broad array of products intended to finance the growth and manage the working capital of companies spanning the breadth of the healthcare industry.

Table of Contents**MANAGEMENT**

Our board of directors oversees our management. The board of directors currently consists of five members, three of whom are not interested persons of Solar Capital Ltd. as defined in Section 2(a)(19) of the 1940 Act. We refer to these individuals as our independent directors. Our board of directors elects our officers, who serve at the discretion of the board of directors. The responsibilities of each director will include, among other things, the oversight of our investment activity, the quarterly valuation of our assets, and oversight of our financing arrangements. The board of directors has also established an audit committee and a nominating and corporate governance committee and may establish additional committees in the future.

Board of Directors and Executive Officers*Directors*

Information regarding the board of directors is as follows:

Name	Age	Position	Director Since	Expiration of Term
Interested Director				
Michael S. Gross	50	Chief Executive Officer, President and Chairman of the Board of Directors	2007	2012
Bruce Spohler	51	Chief Operating Officer and Director	2009	2014
Independent Directors				
Steven Hochberg	50	Director	2007	2014

Leonard A. Potter	50	Director	2009	2012

The address for each of our directors is 500 Park Avenue, New York, New York 10022.

Executive Officers Who Are Not Directors

Name	Age	Position
Nicholas Radesca	46	Chief Financial Officer and Secretary
Guy Talarico	56	Chief Compliance Officer

The address for each of our executive officers is 500 Park Avenue, New York, New York 10022.

Biographical Information

Directors

Our directors have been divided into two groups – interested directors and independent directors. An interested director is an interested person as defined in Section 2(a)(19) of the 1940 Act. As described below under Committees of the Board of Directors – Nominating and Corporate Governance Committee, the board of directors has identified certain desired attributes for director nominees. Each of our directors has demonstrated high character and integrity, superior credentials and recognition in his respective field and the relevant expertise and experience upon which to be able to offer advice and guidance to our management. Each of our directors also has sufficient time available to devote to the affairs of Solar Capital, is able to work with the other members of the board of directors and contribute to the success of Solar Capital and can represent the long-term interests of Solar Capital’s stockholders as a whole. Our directors have been selected such that the board of directors represents a range of backgrounds and experience. Set forth below is biographical information of each director, including a discussion of such director’s particular experience, qualifications, attributes or skills that lead us to

Table of Contents

conclude, as of the date of this prospectus, that such individual should serve as a director of Solar Capital, in light of Solar Capital's business and structure.

Interested Directors

Michael S. Gross was the managing member, the chairman of the board of directors and the chief executive officer of Solar Capital LLC since its inception in February 2007, and has been the chairman of the board of directors since December 2007, and chief executive officer and president since November 2007, of Solar Capital Ltd. Mr. Gross also currently serves as the managing member of our investment adviser, Solar Capital Partners. In addition, Mr. Gross has served as chairman of the board of directors, chief executive officer and president of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners, since its inception in December 2010. From July 2006 through approximately the first quarter of 2009, Mr. Gross was a partner in Magnetar Capital Partners, LP. Between February 2004 and February 2006, Mr. Gross was the president and chief executive officer of Apollo Investment Corporation, a publicly traded BDC that he founded and on whose board of directors and investment committee he served as chairman from February 2004 to July 2006, and was the managing partner of Apollo Investment Management, L.P., the investment adviser to Apollo Investment Corporation. Apollo Investment Corporation invests primarily in middle-market companies in the form of senior secured and mezzanine loans as well as by making direct equity investments in such companies. Under his management, Apollo Investment Corporation raised approximately \$930 million in gross proceeds in an initial public offering in April 2004 and invested approximately \$2.3 billion in over 65 companies in conjunction with 50 different private equity sponsors. From 1990 to February 2006, Mr. Gross was a senior partner at Apollo Management, L.P., a leading private equity firm which he founded in 1990 with five other persons. Since its inception, Apollo Management, L.P. has invested more than \$13 billion in over 150 companies in the United States and Western Europe. During his tenure at Apollo Management, L.P., Mr. Gross was a member of an investment committee that was responsible for overseeing such investments. In addition, from 2003 to February 2006, Mr. Gross was the managing partner of Apollo Distressed Investment Fund, an investment fund he founded to invest principally in non-control oriented distressed debt and other investment securities of leveraged companies. Prior to his time at Apollo Management, L.P., Mr. Gross was employed by Drexel Burnham Lambert Incorporated. From June 2006 to August 2008, Mr. Gross served as the chief executive officer, chairman of the board of directors and secretary of Marathon Acquisition Corp., a publicly traded special purpose acquisition company. Mr. Gross currently serves on the boards of directors of Saks, Inc., Global Ship Lease Inc. and Jarden Corporation. From January 1999 to June 2008, Mr. Gross served on the board of directors of United Rentals, Inc., and in the past has served on the boards of directors, including in certain cases, in the capacity as a lead director, of more than 20 public and private companies. He is a founding member, and serves on the executive committee, of the Youth Renewal Fund, is the chairman of the board of Mt. Sinai Children's Center Foundation, and serves on the Board of Trustees of The Trinity School and the Board of Directors of New York Road Runners. Mr. Gross holds a B.B.A. in accounting from the University of Michigan and an M.M. from the J.L. Kellogg Graduate School of Management at Northwestern University. Mr. Gross' intimate knowledge of the business and operations of Solar Capital Partners, extensive familiarity with the financial industry and the investment management process in particular, and experience as a director of other public and private companies not only gives the board of directors valuable insight but also positions him well to continue to serve as the chairman of our board of directors.

Bruce Spohler was a senior vice president of Solar Capital LLC from its inception in February 2007, and has been a director since September 2009, and the chief operating officer since December 2007, of Solar Capital Ltd. Mr. Spohler also currently serves as a partner of our investment adviser, Solar Capital Partners. In addition, Mr. Spohler has served as chief operating officer and a member of the board of directors of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners, since its inception in December 2010. Previously, Mr. Spohler was a managing director and a former co-head of U.S. Leveraged Finance for CIBC World Markets. He held numerous senior roles at CIBC World Markets, including serving on the U.S. Management Committee, Global Executive Committee and the Deals Committee, which approves all of CIBC World Markets' U.S. corporate finance debt capital decisions. During his tenure, he was responsible for senior loan, high yield and mezzanine

Table of Contents

origination and execution, as well as CIBC World Markets' below investment grade loan portfolio in the U.S. As a co-head of U.S. Leveraged Finance, he oversaw over 300 capital raising and merger and acquisition transactions, comprising over \$40 billion in market capitalization. He joined CIBC World Markets in 1995 when it acquired The Argosy Group, of which Mr. Spohler was a founding member and managing director. Founded in 1990, The Argosy Group was a middle-market financing business, in which Mr. Spohler and other principals of The Argosy Group raised third party capital as well as invested alongside their financial sponsor clients. Prior to The Argosy Group, Mr. Spohler was employed by Drexel Burnham Lambert Incorporated. Mr. Spohler earned a B.S. from Syracuse University and an M.M. from the J.L. Kellogg Graduate School of Management at Northwestern University. Mr. Spohler's depth of experience in managerial positions in investment management, leveraged finance and financial services, as well as his intimate knowledge of Solar Capital's business and operations, gives the board of directors valuable industry-specific knowledge and expertise on these and other matters.

Independent Directors

Steven Hochberg was a director of Solar Capital LLC from its inception in February 2007, and has been a director of Solar Capital Ltd. since November 2007. Mr. Hochberg is the founder of Ascent Biomedical Ventures, a New York based venture investor in biomedical technology companies including medical devices and drugs. Since 1992, Mr. Hochberg has also been an active founder of early-stage medical technology companies, including Biomerix Corporation, Eminent Research Systems Inc., Clinsights, Inc., Med-E-Systems/AHT Corporation, and Physicians Online. Mr. Hochberg is the chairman of the board of directors of Biomerix Corporation, Crosstrees Medical, Inc. and Ouroboros, Inc., and serves on the board of directors of Synecor, LLC and SpineView, Inc. Previously, Mr. Hochberg was an investment banker with Alex. Brown & Sons and a strategy consultant with Bain & Company in the technology and healthcare areas. Currently, Mr. Hochberg is a member of the Board of Trustees and Vice Chairman of Continuum Health Partners, one of the largest non-profit hospital systems in New York City. Mr. Hochberg is also a member of the Board of Governors of the New York Academy of Sciences. In addition, Mr. Hochberg presently serves as a member of the board of directors of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners. Mr. Hochberg holds a B.B.A. from the University of Michigan and an M.B.A. from Harvard Business School. Mr. Hochberg's varied experience in investing in medical technology companies provides the board of directors with particular knowledge of this field, and his role as chairman of other companies' board of directors brings the perspective of a knowledgeable corporate leader.

Leonard A. Potter has been a director of Solar Capital Ltd. since September 2009. Mr. Potter has served as the President of Wildcat Capital Management, LLC, a private family investment office, since September 2011. From August 2009 through August 2011, Mr. Potter served as the Chief Investment Officer of Salt Creek Hospitality, a private acquirer and owner of hospitality related assets. From December 2002 through July 2009, Mr. Potter was a Managing Director - Soros Private Equity at Soros Fund Management LLC (SFM) where, from May 2005 through July 2009, Mr. Potter served as co-head of the Private Equity group and a member of the Private Equity Investment Committee. From September 1998 until joining SFM in 2002, Mr. Potter was a Managing Director of Alpine Consolidated LLC, a private merchant bank, and from April 1996 through September 1998, Mr. Potter founded and served as a Managing Director of Capstone Partners LLC, a private merchant bank. Prior to founding Capstone Partners, Mr. Potter was an attorney specializing in mergers, acquisitions and corporate finance at Morgan, Lewis & Bockius and Willkie Farr & Gallagher. Mr. Potter is currently a member of the board of directors of GSV Capital Corp., a publicly-traded BDC, Crumbs Bake Shop Inc., a neighborhood bakery and a retailer of cup cakes, and Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners; and has previously served as a board member of several public companies and currently serves on the boards of several private companies. Mr. Potter has a B.A. from Brandeis University and a J.D. from the Fordham University School of Law. Mr. Potter's experience practicing as a corporate lawyer provides valuable insight to the board of directors on regulatory and risk management issues. In addition, his tenure in private equity investments and service as a director of both public and private companies provide industry-specific knowledge and expertise to the board of directors.

Table of Contents

David S. Wachter was a director of Solar Capital LLC from its inception in February 2007, and has been a director of Solar Capital Ltd. since November 2007. Mr. Wachter has been a founding partner, managing director and president of W Capital Partners since 2001. W Capital Partners is a private equity fund manager that acquires direct private equity portfolios in the secondary market. W Capital Partners manages over \$1 billion of capital and is a leading participant in providing private equity firms, financial institutions and corporations with a liquidity alternative for their private equity investments. Prior to founding W Capital Partners, Mr. Wachter was a managing director at Jefferies & Co. from 1999 to 2001, a founding partner and managing director at C.E. Unterberg, Towbin from 1990 to 1999 and an investment banker at Lehman Brothers from 1986 to 1990. In addition, Mr. Wachter presently serves as a member of the board of directors of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners. Mr. Wachter has a B.S. in Engineering, with a major in Computer Science and Applied Mathematics, from Tufts University and an M.B.A. from New York University Graduate School of Business. Mr. Wachter's extensive knowledge of private equity and investment banking provides the board of directors with the valuable insight of an experienced financial manager.

Executive Officers Who Are Not Directors

Nicholas Radesca CPA has been the chief financial officer and secretary of Solar Capital Ltd. since March 2008 and October 2009, respectively, and was the chief financial officer of Solar Capital LLC from March 2008 until the Solar Capital Merger in February 2010. In addition, Mr. Radesca has served as chief financial officer and secretary of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners, since its inception in December 2010. Mr. Radesca joined Solar Capital from iStar Financial Inc. where he served from 2006 to 2008 as the Chief Accounting Officer. His responsibilities at iStar Financial Inc., a publicly traded, diversified commercial real estate company, encompassed all aspects of accounting, tax and SEC reporting. Prior to iStar Financial Inc., Mr. Radesca was the Vice President of Financial Reporting at Fannie Mae from 2005 to 2006 where he oversaw SEC, regulatory and internal reporting. From 2002 to 2005, he served as Director of External Reporting at Del Monte Foods Company and from 1999 to 2002, served as the Vice President of Financial Reporting at Provident Financial. He began his financial services career at Bank of America. Mr. Radesca has more than 15 years of management experience and is a licensed Certified Public Accountant. Mr. Radesca has a B.S. in Accounting from New York Institute of Technology and an M.B.A. from The California State University, East Bay.

Guy Talarico has been the chief compliance officer of Solar Capital Ltd. since July 2008. In addition, Mr. Talarico has served as chief compliance officer of Solar Senior Capital Ltd., a BDC managed by Solar Capital Partners, since its inception in December 2010. Mr. Talarico founded and has served as chief executive officer of Alaric Compliance Services, LLC, (successor to EOS Compliance Services LLC) since June 2004. Mr. Talarico currently serves as chief compliance officer for a number of funds and investment advisers, including Keeley Funds Inc., The FBR Funds and PennantPark Investment Corporation. Prior to founding EOS Compliance Services LLC, Mr. Talarico served as the Senior Director of the Institutional Custody Division at Investors Bank & Trust Company from 2001 to 2004. Immediately prior to that, Mr. Talarico worked at JPMorgan Chase Bank where he was a Division Executive for Commercial Investment and Retirement Services in its Investment Services Group from 1995 to 2001. Mr. Talarico holds a B.S. ChE from Lehigh University, an M.B.A. from Fairleigh Dickinson University and a J.D. from New York Law School.

Director Independence

In accordance with rules of the NASDAQ Stock Market, our board of directors annually determines each director's independence. We do not consider a director independent unless the board of directors has determined that he has no material relationship with us. We monitor the relationships of our directors and officers through a questionnaire each director completes no less frequently than annually and updates periodically as information provided in the most recent questionnaire changes.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Our governance guidelines require any director who has previously been determined to be independent to inform the Chairman of the board of directors, the Chairman of the Nominating and Corporate Governance

Table of Contents

committee and our secretary of any change in circumstance that may cause his or her status as an independent director to change. The board of directors limits membership on the audit committee and the nominating and corporate governance committee to independent directors.

In order to evaluate the materiality of any such relationship, the board of directors uses the definition of director independence set forth in the rules promulgated by the NASDAQ Stock Market. Rule 5605(a)(2) provides that a director of a BDC shall be considered to be independent if he or she is not an interested person of such BDC, as defined in Section 2(a)(19) of the 1940 Act.

The board of directors has determined that each of the directors is independent and has no relationship with us, except as a director and stockholder, with the exception of Michael S. Gross, as a result of his positions as the chief executive officer and president of Solar Capital and the managing member of Solar Capital Partners, Solar Capital's investment adviser, and Bruce Spohler, as a result of his position as chief operating officer of Solar Capital and a partner of Solar Capital Partners.

Board Leadership Structure

Our board of directors monitors and performs an oversight role with respect to the business and affairs of Solar Capital, including with respect to investment practices and performance, compliance with regulatory requirements and the services, expenses and performance of service providers to Solar Capital. Among other things, our board of directors approves the appointment of our investment adviser and officers, reviews and monitors the services and activities performed by our investment adviser and executive officers and approves the engagement, and reviews the performance of, our independent public accounting firm.

Under Solar Capital's bylaws, our board of directors may designate a chairman to preside over the meetings of the board of directors and meetings of the stockholders and to perform such other duties as may be assigned to him by the board. We do not have a fixed policy as to whether the chairman of the board should be an independent director and believe that we should maintain the flexibility to select the chairman and reorganize the leadership structure, from time to time, based on the criteria that is in the best interests of Solar Capital and its stockholders at such times.

Presently, Mr. Gross serves as the chairman of our board of directors. Mr. Gross is an interested person of Solar Capital as defined in Section 2(a)(19) of the 1940 Act because he is the president and chief executive officer of Solar Capital, serves on the investment committee of our investment adviser and is the managing member of our investment adviser. We believe that Mr. Gross' history with Solar Capital, familiarity with its investment platform, and extensive knowledge of the financial services industry and the investment valuation process in particular qualify him to serve as the chairman of our board of directors. We believe that Solar Capital is best served through this existing leadership structure, as Mr. Gross' relationship with Solar Capital's investment adviser provides an effective bridge and encourages an open dialogue between management and the board of directors, ensuring that both groups act with a common purpose.

Our board of directors does not currently have a designated lead independent director. We are aware of the potential conflicts that may arise when a non-independent director is chairman of the board, but believe these potential conflicts are offset by our strong corporate governance policies. Our corporate governance policies include regular meetings of the independent directors in executive session without the presence of interested directors and management, the establishment of audit and nominating and corporate governance committees comprised solely of independent directors and the appointment of a chief compliance officer, with whom the independent directors meet regularly without the presence of interested directors and other members of management, for administering our compliance policies and procedures.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

We recognize that different board leadership structures are appropriate for companies in different situations. We re-examine our corporate governance policies on an ongoing basis to ensure that they continue to meet Solar Capital's needs.

Table of Contents

Board's Role In Risk Oversight

Our board of directors performs its risk oversight function primarily through (a) its two standing committees, which report to the entire board of directors and are comprised solely of independent directors, and (b) active monitoring of our chief compliance officer and our compliance policies and procedures.

As described below in more detail under **Committees of the Board of Directors**, the audit committee and the nominating and corporate governance committee assist the board of directors in fulfilling its risk oversight responsibilities. The audit committee's risk oversight responsibilities include overseeing Solar Capital's accounting and financial reporting processes, Solar Capital's systems of internal controls regarding finance and accounting, and audits of Solar Capital's financial statements. The nominating and corporate governance committee's risk oversight responsibilities include selecting, researching and nominating directors for election by our stockholders, developing and recommending to the board a set of corporate governance principles and overseeing the evaluation of the board and our management.

Our board of directors also performs its risk oversight responsibilities with the assistance of the chief compliance officer. The board of directors annually reviews a written report from the chief compliance officer discussing the adequacy and effectiveness of the compliance policies and procedures of Solar Capital and its service providers. The chief compliance officer's annual report addresses at a minimum (a) the operation of the compliance policies and procedures of Solar Capital and its service providers since the last report; (b) any material changes to such policies and procedures since the last report; (c) any recommendations for material changes to such policies and procedures as a result of the chief compliance officer's annual review; and (d) any compliance matter that has occurred since the date of the last report about which the board of directors would reasonably need to know to oversee our compliance activities and risks. In addition, the chief compliance officer meets separately in executive session with the independent directors at least once each year.

We believe that our board's role in risk oversight is effective, and appropriate given the extensive regulation to which we are already subject as a BDC. As a BDC, we are required to comply with certain regulatory requirements that control the levels of risk in our business and operations. For example, our ability to incur indebtedness is limited such that our asset coverage must equal at least 200% immediately after each time we incur indebtedness, we generally have to invest at least 70% of our total assets in qualifying assets and we are not generally permitted to invest in any portfolio company in which one of our affiliates currently has an investment.

We recognize that different board roles in risk oversight are appropriate for companies in different situations. We re-examine the manners in which the board administers its oversight function on an ongoing basis to ensure that they continue to meet Solar Capital's needs.

Committees of the Board of Directors

An audit committee and a nominating and corporate governance committee have been established by our board of directors. During 2011, our board of directors held six board meetings and four audit committee meetings. All directors attended at least 75% of the aggregate number of meetings of the board of directors and of the respective committees on which they serve. We require each director to make a diligent effort to attend all board and committee meetings as well as each annual meeting of our stockholders.

Audit Committee

Edgar Filing: Solar Capital Ltd. - Form POS 8C

The audit committee operates pursuant to a charter approved by our board of directors, a copy of which is available on our website at <http://www.solarcapltid.com>. The charter sets forth the responsibilities of the audit committee. The audit committee's responsibilities include selecting the independent registered public accounting firm for Solar Capital, reviewing with such independent registered public accounting firm the planning, scope

Table of Contents

and results of their audit of Solar Capital's financial statements, pre-approving the fees for services performed, reviewing with the independent registered public accounting firm the adequacy of internal control systems, reviewing Solar Capital's annual financial statements and periodic filings and receiving Solar Capital's audit reports and financial statements. The audit committee also establishes guidelines and makes recommendations to our board of directors regarding the valuation of our investments. The audit committee is responsible for aiding our board of directors in determining the fair value of debt and equity securities that are not publicly traded or for which current market values are not readily available. The board of directors and audit committee utilize the services of nationally recognized third-party valuation firms to help determine the fair value of these securities. The audit committee is currently composed of Messrs. Hochberg, Wachter and Potter, all of whom are considered independent under the rules of the NASDAQ Stock Market and are not interested persons of Solar Capital as that term is defined in Section 2(a)(19) of the 1940 Act. Mr. Hochberg serves as chairman of the audit committee. Our board of directors has determined that Mr. Hochberg is an audit committee financial expert as that term is defined under Item 407 of Regulation S-K, as promulgated under the Exchange Act. Mr. Hochberg meets the current independence and experience requirements of Rule 10A-3 of the Exchange Act.

Nominating and Corporate Governance Committee

The nominating and corporate governance committee operates pursuant to a charter approved by our board of directors, a copy of which is available on our website at <http://www.solarcapltd.com>. The members of the nominating and corporate governance committee are Messrs. Hochberg, Wachter and Potter, all of whom are considered independent under the rules of the NASDAQ Stock Market and are not interested persons of Solar Capital as that term is defined in Section 2(a)(19) of the 1940 Act. Mr. Wachter serves as chairman of the nominating and corporate governance committee. The nominating and corporate governance committee is responsible for selecting, researching and nominating directors for election by our stockholders, selecting nominees to fill vacancies on the board of directors or a committee thereof, developing and recommending to the board of directors a set of corporate governance principles and overseeing the evaluation of the board of directors and our management. The nominating and corporate governance committee currently does not consider nominees recommended by our stockholders.

The nominating and corporate governance committee seeks candidates who possess the background, skills and expertise to make a significant contribution to the board of directors, Solar Capital and its stockholders. In considering possible candidates for election as a director, the nominating and corporate governance committee takes into account, in addition to such other factors as it deems relevant, the desirability of selecting directors who:

are of high character and integrity;

are accomplished in their respective fields, with superior credentials and recognition;

have relevant expertise and experience upon which to be able to offer advice and guidance to management;

have sufficient time available to devote to the affairs of Solar Capital;

are able to work with the other members of the board of directors and contribute to the success of Solar Capital;

can represent the long-term interests of Solar Capital's stockholders as a whole; and

are selected such that the board of directors represents a range of backgrounds and experience.

The nominating and corporate governance committee has not adopted a formal policy with regard to the consideration of diversity in identifying director nominees. In determining whether to recommend a director nominee, the nominating and corporate governance committee considers and discusses diversity, among other factors, with a view toward the needs of the board of directors as a whole. The nominating and corporate governance committee generally conceptualizes diversity expansively to include, without limitation, concepts

Table of Contents

such as race, gender, national origin, differences of viewpoint, professional experience, education, skill and other qualities that contribute to the board of directors, when identifying and recommending director nominees. The nominating and corporate governance committee believes that the inclusion of diversity as one of many factors considered in selecting director nominees is consistent with the nominating and corporate governance committee's goal of creating a board of directors that best serves the needs of Solar Capital and the interest of its shareholders.

Compensation Committee

Solar Capital does not have a compensation committee because our executive officers do not receive any direct compensation from Solar Capital.

Compensation of Directors

The following table sets forth compensation of Solar Capital's directors, for the year ended December 31, 2011.

Name	Fees Earned or Paid in Cash(1)	Stock Awards(2)	All Other Compensation	Total
Interested Directors				
Michel S. Gross				
Bruce Spohler				
Independent Directors				
Steven Hochberg	\$ 122,000			\$ 122,000
David S. Wachter	\$ 115,500			\$ 115,500
Leonard A. Potter	\$ 114,500			\$ 114,500

(1) For a discussion of the independent directors' compensation, see below.

(2) We do not maintain a stock or option plan, non-equity incentive plan or pension plan for our directors. However, our independent directors have the option to receive all or a portion of the directors' fees to which they would otherwise be entitled in the form of shares of our common stock issued at a price per share equal to the greater of our then-current net asset value per share or the market price at the time of payment. No shares were issued to any of our independent directors in lieu of cash during 2011.

Our independent directors' annual fee is \$100,000. The independent directors also receive \$2,500 (\$1,500 if participate telephonically) plus reimbursement of reasonable out-of-pocket expenses incurred in connection with attending each board meeting and \$1,000 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with each committee meeting attended. In addition, the chairman of the audit committee receives an annual fee of \$7,500 and the chairman of the nominating and corporate governance committee receives an annual fee of \$2,500. Further, we purchase directors' and officers' liability insurance on behalf of our directors and officers. Our independent directors also have the option to receive all or a portion of the directors' fees to which they would otherwise be entitled in the form of shares of our common stock issued at a price per share equal to the greater of our then-current net asset value per share or the market price at the time of payment. No shares were issued to any of our independent directors in lieu of cash during 2011. In addition, no compensation was paid to directors who are interested persons of Solar Capital as defined in the 1940 Act.

Compensation of Executive Officers

None of our officers receives direct compensation from Solar Capital. Mr. Gross, our chief executive officer and president, and Mr. Spohler, our chief operating officer, through their ownership interest in Solar Capital Partners, our investment adviser, are entitled to a portion of any profits earned by Solar Capital Partners, which includes any fees payable to Solar Capital Partners under the terms of our Investment Advisory and Management

Table of Contents

Agreement, less expenses incurred by Solar Capital Partners in performing its services under the Investment Advisory and Management Agreement. Messrs. Gross and Spohler do not receive any additional compensation from Solar Capital Partners in connection with the management of our portfolio.

Mr. Radesca, our chief financial officer and secretary and, through Alaric Compliance Services, LLC, Guy Talarico, our chief compliance officer, are paid by Solar Capital Management, our administrator, subject to reimbursement by us of an allocable portion of such compensation for services rendered by such persons to Solar Capital. To the extent that Solar Capital Management outsources any of its functions we will pay the fees associated with such functions on a direct basis without profit to Solar Capital Management.

Indemnification Agreements

We have entered into indemnification agreements with our directors. The indemnification agreements are intended to provide our directors the maximum indemnification permitted under Maryland law and the 1940 Act. Each indemnification agreement provides that Solar Capital shall indemnify the director who is a party to the agreement (an Indemnitee), including the advancement of legal expenses, if, by reason of his or her corporate status, the Indemnitee is, or is threatened to be, made a party to or a witness in any threatened, pending, or completed proceeding, to the maximum extent permitted by Maryland law and the 1940 Act.

Table of Contents**PORTFOLIO MANAGEMENT**

The management of our investment portfolio is the responsibility of our investment adviser, Solar Capital Partners, and its investment committee, which is led by Messrs. Gross and Spohler. For more information regarding the business experience of Messrs. Gross and Spohler, see Management Board of Directors and Executive Officers Interested Directors. Solar Capital Partners investment committee must approve each new investment that we make. The members of Solar Capital Partners investment committee are not employed by us, and receive no compensation from us in connection with their portfolio management activities. However, Messrs. Gross and Spohler, through their financial interests in Solar Capital Partners, will be entitled to a portion of any investment advisory fees paid by Solar Capital to Solar Capital Partners.

Investment Personnel

Solar Capital Partners senior investment team currently consists of its senior investment professionals, Messrs. Gross, Spohler, Gerson, Henley, Mait and Shaikh, and team of additional experienced investment professionals. We consider Messrs. Gross and Spohler, who lead Solar Capital Partners investment committee, to be our portfolio managers.

In addition to managing our investments, our portfolio managers also currently manage the following entity:

Name	Entity	Investment Focus	Gross Assets
Solar Senior Capital Ltd.	BDC	Senior secured loans and other senior debt instruments	\$ 187.4 million(1)

(1) As of December 31, 2011.

The table below shows the dollar range of shares of our common stock to be beneficially owned by each of our portfolio managers.

Name of Portfolio Manager	Dollar Range of Equity Securities in Solar Capital(1)(2)
Michael S. Gross	Over \$1 million
Bruce Spohler	Over \$1 million

- (1) Dollar ranges are as follows: None, \$1 \$10,000, \$10,001 \$50,000, \$50,001 \$100,000, \$100,001 \$500,000; \$500,001 \$1,000,000 or Over \$1,000,000.
- (2) The dollar range of equity securities beneficially owned in us is based on the closing price for our common stock of \$22.20 on March 26, 2012 on the NASDAQ Global Select Market.

Compensation

Edgar Filing: Solar Capital Ltd. - Form POS 8C

None of Solar Capital Partners' investment professionals receive any direct compensation from us in connection with the management of our portfolio. Messrs. Gross and Spohler, through their financial interests in Solar Capital Partners, are entitled to a portion of any profits earned by Solar Capital Partners, which includes any fees payable to Solar Capital Partners under the terms of our Investment Advisory and Management Agreement, less expenses incurred by Solar Capital Partners in performing its services under our Investment Advisory and Management Agreement.

Table of Contents

INVESTMENT ADVISORY AND MANAGEMENT AGREEMENT

Management Services

Solar Capital Partners serves as our investment adviser. Solar Capital Partners is an investment adviser that is registered as an investment adviser under the Advisers Act. Subject to the overall supervision of our board of directors, our investment adviser manages the day-to-day operations of, and provides investment advisory and management services to, Solar Capital. Under the terms of our Investment Advisory and Management Agreement, Solar Capital Partners:

determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;

identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies);

closes and monitors the investments we make; and

provides us with other investment advisory, research and related services as we may from time to time require.

Solar Capital Partners' services under the Investment Advisory and Management Agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired. For example, Solar Capital Partners presently serves as investment adviser to Solar Senior Capital Ltd., a publicly-traded BDC which focuses on investing primarily in senior secured loans, including first lien, unitranche and second lien debt instruments.

Management Fee

Pursuant to the Investment Advisory and Management Agreement, we have agreed to pay Solar Capital Partners a fee for investment advisory and management services consisting of two components – a base management fee and an incentive fee.

The base management fee is calculated at an annual rate of 2.00% of our gross assets. For services rendered under the Investment Advisory and Management Agreement, the base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets at the end of the two most recently completed calendar quarters, and appropriately adjusted for any share issuances or repurchases during the current calendar quarter.

The incentive fee has two parts, as follows: one is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees (other than fees for providing managerial assistance), such as commitment,

Edgar Filing: Solar Capital Ltd. - Form POS 8C

origination, structuring, diligence and consulting fees or other fees that we receive from portfolio companies) accrued during the calendar quarter, minus our operating expenses for the quarter (including the base management fee, expenses payable under the Administration Agreement to Solar Capital Management, and any interest expense and dividends paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature (such as original issue discount, debt instruments with pay in kind interest and zero coupon securities), accrued income that we have not yet received in cash. Pre-incentive fee net investment income does not include any realized capital gains, computed net of all realized capital losses or unrealized capital appreciation or depreciation. Pre-incentive fee net

Table of Contents

investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to a hurdle of 1.75% per quarter (7.00% annualized). Our net investment income used to calculate this part of the incentive fee is also included in the amount of our gross assets used to calculate the 2.00% base management fee. We pay Solar Capital Partners an incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

no incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed the hurdle of 1.75%;

100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle but is less than 2.1875% in any calendar quarter (8.75% annualized). We refer to this portion of our pre-incentive fee net investment income (which exceeds the hurdle but is less than 2.1875%) as the catch-up. The catch-up is meant to provide our investment adviser with 20% of our pre-incentive fee net investment income as if a hurdle did not apply if this net investment income exceeds 2.1875% in any calendar quarter; and

20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.1875% in any calendar quarter (8.75% annualized) is payable to Solar Capital Partners (once the hurdle is reached and the catch-up is achieved, 20% of all pre-incentive fee investment income thereafter is allocated to Solar Capital Partners).

The following is a graphical representation of the calculation of the income-related portion of the incentive fee:

Quarterly Incentive Fee Based on Net Investment Income

Pre-incentive fee net investment income

(expressed as a percentage of the value of net assets)

Percentage of pre-incentive fee net investment income

allocated to Solar Capital Partners

These calculations are appropriately pro-rated for any period of less than three months and adjusted for any share issuances or repurchases during the relevant quarter. You should be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee hurdle rate and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income.

The second part of the incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory and Management Agreement, as of the termination date), and equals 20% of our realized capital gains, if any, on a

Edgar Filing: Solar Capital Ltd. - Form POS 8C

cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees with respect to each of the investments in our portfolio.

Table of Contents

Examples of Quarterly Incentive Fee Calculation

Example 1: Income Related Portion of Incentive Fee (*):

Alternative 1:

Assumptions

Investment income (including interest, dividends, fees, etc.) = 1.25%

Hurdle rate (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income - (management fee + other expenses)) = 0.55%

Pre-incentive net investment income does not exceed hurdle rate, therefore there is no incentive fee.

Alternative 2:

Assumptions

Investment income (including interest, dividends, fees, etc.) = 2.70%

Hurdle rate (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income - (management fee + other expenses)) = 2.00%

Incentive fee = 100% × pre-incentive fee net investment income, subject to the catch-up (4)

$$= 100\% \times (2.00\% - 1.75\%)$$

$$= 0.25\%$$

Alternative 3:

Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.00%

Hurdle rate (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income - (management fee + other expenses)) = 2.30%

Incentive fee = 20% × pre-incentive fee net investment income, subject to catch-up (4)

Incentive fee = 100% × catch-up + (20% × (pre-incentive fee net investment income - 2.1875%))

Catch-up = 2.1875% - 1.75%

= 0.4375%

Incentive fee = (100% × 0.4375%) + (20% × (2.3% - 2.1875%))

= 0.4375% + (20% × 0.1125%)

= 0.4375% + 0.0225%

= 0.46%

(*) The hypothetical amount of pre-incentive fee net investment income shown is based on a percentage of total net assets.

(1) Represents 7% annualized hurdle rate.

(2) Represents 2% annualized management fee.

(3) Excludes organizational and offering expenses.

(4) The catch-up provision is intended to provide our investment adviser with an incentive fee of 20% on all of our pre-incentive fee net investment income as if a hurdle rate did not apply when our net investment income exceeds 2.1875% in any calendar quarter.

Table of Contents

Example 2: Capital Gains Portion of Incentive Fee:

Alternative 1:

Assumptions

Year 1: \$20 million investment made in Company A (Investment A), and \$30 million investment made in Company B (Investment B)

Year 2: Investment A sold for \$50 million and fair market value (FMV) of Investment B determined to be \$32 million

Year 3: FMV of Investment B determined to be \$25 million

Year 4: Investment B sold for \$31 million

The capital gains portion of the incentive fee would be:

Year 1: None

Year 2: Capital gains incentive fee of \$6 million (\$30 million realized capital gains on sale of Investment A multiplied by 20%)

Year 3: None

\$5 million (20% multiplied by (\$30 million cumulative capital gains less \$5 million cumulative capital depreciation)) less \$6 million (previous capital gains fee paid in Year 2)

Year 4: Capital gains incentive fee of \$200,000

\$6.2 million (\$31 million cumulative realized capital gains multiplied by 20%) less \$6 million (capital gains fee taken in Year 2)

Alternative 2:

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Assumptions

Year 1: \$20 million investment made in Company A (Investment A), \$30 million investment made in Company B (Investment B) and \$25 million investment made in Company C (Investment C)

Year 2: Investment A sold for \$50 million, FMV of Investment B determined to be \$25 million and FMV of Investment C determined to be \$25 million

Year 3: FMV of Investment B determined to be \$27 million and Investment C sold for \$30 million

Year 4: FMV of Investment B determined to be \$24 million

Year 5: Investment B sold for \$20 million

The capital gains incentive fee, if any, would be:

Year 1: None

Year 2: \$5 million capital gains incentive fee

20% multiplied by \$25 million (\$30 million realized capital gains on Investment A less unrealized capital depreciation on Investment B)

Year 3: \$1.4 million capital gains incentive fee⁽¹⁾

\$6.4 million (20% multiplied by \$32 million (\$35 million cumulative realized capital gains less \$3 million unrealized capital depreciation)) less \$5 million capital gains fee received in Year 2

Table of Contents

- (1) As illustrated in Year 3 of Alternative 1 above, if Solar Capital were to be wound up on a date other than December 31 of any year, Solar Capital may have paid aggregate capital gain incentive fees that are more than the amount of such fees that would be payable if Solar Capital had been wound up on December 31 of such year.

Year 4: None

Year 5: None

\$5 million (20% multiplied by \$25 million (cumulative realized capital gains of \$35 million less realized capital losses of \$10 million)) less \$6.4 million cumulative capital gains fee paid in Year 2 and Year 3

Payment of Our Expenses

All investment professionals of the investment adviser and their respective staffs, when and to the extent engaged in providing investment advisory and management services, and the compensation and routine overhead expenses of such personnel allocable to such services, are provided and paid for by Solar Capital Partners. We bear all other costs and expenses of our operations and transactions, including (without limitation):

the cost of our organization and public offerings;

the cost of calculating our net asset value, including the cost of any third-party valuation services;

the cost of effecting sales and repurchases of our shares and other securities;

interest payable on debt, if any, to finance our investments;

fees payable to third parties relating to, or associated with, making investments, including fees and expenses associated with performing due diligence reviews of prospective investments and advisory fees;

transfer agent and custodial fees;

fees and expenses associated with marketing efforts;

federal and state registration fees, any stock exchange listing fees;

federal, state and local taxes;

Edgar Filing: Solar Capital Ltd. - Form POS 8C

independent directors fees and expenses;

brokerage commissions;

fidelity bond, directors and officers errors and omissions liability insurance and other insurance premiums;

direct costs and expenses of administration, including printing, mailing, long distance telephone and staff;

fees and expenses associated with independent audits and outside legal costs;

costs associated with our reporting and compliance obligations under the 1940 Act and applicable federal and state securities laws; and

all other expenses incurred by either Solar Capital Management or us in connection with administering our business, including payments under the Administration Agreement that will be based upon our allocable portion of overhead and other expenses incurred by Solar Capital Management in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions, and our allocable portion of the costs of compensation and related expenses of our chief compliance officer and our chief financial officer and any administrative support staff.

Table of Contents

Duration and Termination

The Investment Advisory and Management Agreement was initially approved by the board of directors of Solar Capital LLC on March 6, 2007 and subsequently approved in its current form by our board of directors on September 29, 2009. Unless earlier terminated as described below, the Investment Advisory and Management Agreement will remain in effect from year to year if approved annually by our board of directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, including, in either case, approval by a majority of our directors who are not parties to such agreement or who are not interested persons of Solar Capital, as such term is defined in Section 2(a)(19) of the 1940 Act. The Investment Advisory and Management Agreement will automatically terminate in the event of its assignment. The Investment Advisory and Management Agreement may also be terminated by either party without penalty upon 60 days' written notice to the other. See Risk Factors - Risks Relating to Our Business and Structure. Our investment adviser can resign on 60 days' notice.

Indemnification

The Investment Advisory and Management Agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, Solar Capital Partners and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from Solar Capital for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of Solar Capital Partners' services under the Investment Advisory and Management Agreement or otherwise as an investment adviser of Solar Capital.

Organization of the Investment Adviser

Solar Capital Partners is a Delaware limited liability company. The principal executive offices of Solar Capital Partners are located at 500 Park Avenue, New York, New York 10022.

Board Approval of the Investment Advisory and Management Agreement

A discussion regarding the basis for our board of directors' approval of our Investment Advisory and Management Agreement will be included in our first annual report on Form 10-K filed subsequent to any such board approval, or incorporated by reference therein.

Table of Contents

ADMINISTRATION AGREEMENT

Solar Capital Management, LLC, a Delaware limited liability company, serves as our administrator. The principal executive offices of Solar Capital Management are located at 500 Park Avenue, New York, New York 10022. Pursuant to an Administration Agreement, Solar Capital Management furnishes us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities. Under the Administration Agreement, Solar Capital Management also performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records which we are required to maintain and preparing reports to our stockholders. In addition, Solar Capital Management assists us in determining and publishing our net asset value, oversees the preparation and filing of our tax returns and the printing and dissemination of reports to our stockholder, and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Payments under the Administration Agreement are equal to an amount based upon our allocable portion of Solar Capital Management's overhead in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions and our allocable portion of the compensation of our chief financial officer and any administrative support staff. Under the Administration Agreement, Solar Capital Management will also provide on our behalf managerial assistance to those portfolio companies that request such assistance. The Administration Agreement may be terminated by either party without penalty upon 60 days' written notice to the other party.

The Administration Agreement provides that, absent willful misfeasance, bad faith or negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, Solar Capital Management and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from Solar Capital for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of Solar Capital Management's services under the Administration Agreement or otherwise as administrator for Solar Capital.

LICENSE AGREEMENT

We have entered into a license agreement with Solar Capital Partners pursuant to which Solar Capital Partners has agreed to grant us a non-exclusive, royalty-free license to use the name "Solar Capital." Under this agreement, we have a right to use the Solar Capital name for so long as the Investment Advisory and Management Agreement with our investment adviser is in effect. Other than with respect to this limited license, we will have no legal right to the "Solar Capital" name.

Table of Contents

CERTAIN RELATIONSHIPS AND TRANSACTIONS

We have entered into the Investment Advisory and Management Agreement with Solar Capital Partners. Mr. Gross, our chairman and chief executive officer, is the managing member and a senior investment professional of, and has financial and controlling interests in, Solar Capital Partners. In addition, Mr. Spohler, our chief operating officer and board member and Mr. Radesca, our chief financial officer and secretary, serve as a partner and chief financial officer, respectively, for Solar Capital Partners. Mr. Spohler also has financial interests in Solar Capital Partners.

Solar Capital Partners and its affiliates may also manage other funds in the future that may have investment mandates that are similar, in whole and in part, with ours. For example, Solar Capital Partners presently serves as investment adviser to Solar Senior Capital Ltd., a publicly-traded BDC which focuses on investing primarily in senior secured loans, including first lien, unitranche and second lien debt instruments. In addition, Michael S. Gross, our chairman and chief executive officer, Bruce Spohler, our chief operating officer, and Nicholas Radesca, our chief financial officer, serve in similar capacities for Solar Senior Capital Ltd. Solar Capital Partners and its affiliates may determine that an investment is appropriate for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, Solar Capital Partners or its affiliates may determine that we should invest side-by-side with one or more other funds. Any such investments will be made only to the extent permitted by applicable law and interpretive positions of the SEC and its staff, and consistent with Solar Capital Partners' allocation procedures.

We have entered into a license agreement with Solar Capital Partners, pursuant to which Solar Capital Partners has agreed to grant us a non-exclusive, royalty-free license to use the name Solar Capital. In addition, pursuant to the terms of the Administration Agreement, Solar Capital Management provides us with the office facilities and administrative services necessary to conduct our day-to-day operations. Solar Capital Partners is the sole member of and controls Solar Capital Management.

Table of Contents**CONTROL PERSONS AND PRINCIPAL STOCKHOLDERS**

The following table sets forth certain ownership information as of March 26, 2012 with respect to Solar Capital Ltd.'s common stock for those persons who, directly or indirectly, own, control or hold with the power to vote, 5% or more of Solar Capital Ltd.'s common stock, and all officers and directors as a group.

Name	Type of Ownership	Shares Owned(1)	Percentage(2)
Thornburg Investment Management Inc.(3)	Indirect	3,750,000	10.24%
Clough Capital Partners L.P.(4)	Indirect	1,845,264	5.04%
All officers and directors as a group (7 persons)(5)	Direct and Indirect	2,143,678	5.86%

- (1) Beneficial ownership is determined in accordance with Rule 13d-3 under the Securities Exchange Act of 1934. Assumes no other purchases or sales of our common stock since the most recently available SEC filings. This assumption has been made under the rules and regulations of the SEC and does not reflect any knowledge that we have with respect to the present intent of the beneficial owners of our common stock listed in this table.
- (2) Percentages are based on 36,608,038 shares of common stock outstanding as of March 26, 2012.
- (3) Such securities are held by certain investment vehicles controlled and/or managed by Thornburg Investment Management Inc. or its affiliates. The address for Thornburg Investment Management Inc. is 2300 North Ridgeway Road, Santa Fe, New Mexico 87506.
- (4) Such securities are held by certain investment vehicles controlled and/or managed by Clough Capital Partners L.P. or its affiliates. The address for Clough Capital Partners L.P. is One Post Office Square, 40th Floor, Boston, MA, 02109.
- (5) The address for all officers and directors is 500 Park Avenue, New York, NY 10022.

The following table sets forth the dollar range of our equity securities beneficially owned by each of our directors as of March 26, 2012.

Name of Director	Dollar Range of Equity Securities in Solar Capital(1)(2)
Interested Directors	
Michael S. Gross	Over \$100,000
Bruce Spohler	Over \$100,000
Independent Directors	
Steven Hochberg	Over \$100,000
David S. Wachter	Over \$100,000
Leonard A. Potter	Over \$100,000

- (1) The dollar ranges are: None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, or Over \$100,000.
- (2) The dollar range of equity securities beneficially owned in us is based on the closing price for our common stock of \$22.20 on March 26, 2012 on the NASDAQ Global Select Market. Beneficial ownership has been determined in accordance with Rule 16a-1(a)(2) of the Securities Exchange Act of 1934.

REGULATION AS A BUSINESS DEVELOPMENT COMPANY

General

A BDC is regulated by the 1940 Act. A BDC must be organized in the United States for the purpose of investing in or lending to primarily private companies and making significant managerial assistance available to them. A BDC may use capital provided by public stockholders and from other sources to make long-term, private investments in businesses. A business development company provides stockholders the ability to retain the liquidity of a publicly-traded stock while sharing in the possible benefits, if any, of investing in primarily privately owned companies.

We may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC unless authorized by vote of a majority of the outstanding voting securities, as required by the 1940 Act. A majority of the outstanding voting securities of a company is defined under the 1940 Act as the lesser of: (a) 67% or more of such company's voting securities present at a meeting if more than 50% of the outstanding voting securities of such company are present or represented by proxy, or (b) more than 50% of the outstanding voting securities of such company. We do not anticipate any substantial change in the nature of our business.

As with other companies regulated by the 1940 Act, a BDC must adhere to certain substantive regulatory requirements. A majority of our directors must be persons who are not interested persons, as that term is defined in the 1940 Act. Additionally, we are required to provide and maintain a bond issued by a reputable fidelity insurance company to protect the BDC. Furthermore, as a BDC, we are prohibited from protecting any director or officer against any liability to us or our stockholders arising from willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such person's office.

As a BDC, we are required to meet a coverage ratio of the value of total assets to total senior securities, which include all of our borrowings and any preferred stock we may issue in the future, of at least 200%. We may also be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our directors who are not interested persons and, in some cases, prior approval by the SEC.

We are generally not be able to issue and sell our common stock at a price below net asset value per share. See **Risk Factors** **Risks Relating to Our Business and Structure** **Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital.** We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value of our common stock if our board of directors determines that such sale is in our best interests and the best interests of our stockholders, and our stockholders approve such sale. In addition, we may generally issue new shares of our common stock at a price below net asset value in rights offerings to existing stockholders, in payment of dividends and in certain other limited circumstances.

As a BDC, we are generally limited in our ability to invest in any portfolio company in which our investment adviser or any of its affiliates currently have an investment or to make any co-investments with our investment adviser or its affiliates without an exemptive order from the SEC, subject to certain exceptions. We may seek an order from the SEC to permit us to co-invest with certain of our affiliates under certain circumstances. There can be no assurance when, or if, such an order may be obtained.

We are periodically examined by the SEC for compliance with the 1940 Act.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

As a BDC, we are subject to certain risks and uncertainties. See [Risk Factors](#) [Risks Relating to Our Business and Structure](#).

Table of Contents

Qualifying Assets

Under the 1940 Act, a BDC may not acquire any asset other than assets of the type listed in Section 55(a) of the 1940 Act, which are referred to as qualifying assets, unless, at the time the acquisition is made, qualifying assets represent at least 70% of the BDC's total assets. The principal categories of qualifying assets relevant to our proposed business are the following:

(1) Securities purchased in transactions not involving any public offering from the issuer of such securities, which issuer (subject to certain limited exceptions) is an eligible portfolio company, or from any person who is, or has been during the preceding 13 months, an affiliated person of an eligible portfolio company, or from any other person, subject to such rules as may be prescribed by the SEC. An eligible portfolio company is defined in the 1940 Act as any issuer which:

(a) is organized under the laws of, and has its principal place of business in, the United States;

(b) is not an investment company (other than a small business investment company wholly owned by the BDC); and

(c) satisfies any of the following:

i. does not have any class of securities that is traded on a national securities exchange;

ii. has a class of securities listed on a national securities exchange, but has an aggregate market value of outstanding voting and non-voting common equity of less than \$250 million;

iii. is controlled by a BDC or a group of companies including a BDC and the BDC has an affiliated person who is a director of the eligible portfolio company; or

iv. is a small and solvent company having total assets of not more than \$4.0 million and capital and surplus of not less than \$2.0 million.

(2) Securities of any eligible portfolio company which we control.

(3) Securities purchased in a private transaction from a U.S. issuer that is not an investment company or from an affiliated person of the issuer, or in transactions incident thereto, if the issuer is in bankruptcy and subject to reorganization or if the issuer, immediately prior to the purchase of its securities, was unable to meet its obligations as they came due without material assistance other than conventional lending or financing arrangements.

(4) Securities of an eligible portfolio company purchased from any person in a private transaction if there is no ready market for such securities and we already own 60% of the outstanding equity of the eligible portfolio company.

(5) Securities received in exchange for or distributed on or with respect to securities described in (1) through (4) above, or pursuant to the exercise of warrants or rights relating to such securities.

(6) Cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment.

Managerial Assistance to Portfolio Companies

In addition, a BDC must have been organized and have its principal place of business in the United States and must be operated for the purpose of making investments in the types of securities described in (1), (2) or (3) above. However, in order to count portfolio securities as qualifying assets for the purpose of the 70% test, the BDC must either control the issuer of the securities or must offer to make available to the issuer of the securities (other than small and solvent companies described above) significant managerial assistance; except that, where the BDC purchases such securities in conjunction with one or more other persons acting together, one of the other persons in the group may make available such managerial assistance. Making available managerial

Table of Contents

assistance means, among other things, any arrangement whereby the BDC, through its directors, officers or employees, offers to provide, and, if accepted, does so provide, significant guidance and counsel concerning the management, operations or business objectives and policies of a portfolio company.

Temporary Investments

Pending investment in other types of qualifying assets, as described above, our investments may consist of cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment, which we refer to, collectively, as temporary investments, so that 70% of our assets are qualifying assets. Typically, we will invest in U.S. Treasury bills or in repurchase agreements, provided that such agreements are fully collateralized by cash or securities issued by the U.S. government or its agencies. A repurchase agreement involves the purchase by an investor, such as us, of a specified security and the simultaneous agreement by the seller to repurchase it at an agreed-upon future date and at a price which is greater than the purchase price by an amount that reflects an agreed-upon interest rate. There is no percentage restriction on the proportion of our assets that may be invested in such repurchase agreements. However, if more than 25% of our total assets constitute repurchase agreements from a single counterparty, we would not meet the diversification tests in order to qualify as a RIC for federal income tax purposes. Thus, we do not intend to enter into repurchase agreements with a single counterparty in excess of this limit. Our investment adviser will monitor the creditworthiness of the counterparties with which we enter into repurchase agreement transactions.

Senior Securities

We are permitted, under specified conditions, to issue multiple classes of indebtedness and one class of stock senior to our common stock if our asset coverage, as defined in the 1940 Act, is at least equal to 200% immediately after each such issuance. In addition, while any senior securities remain outstanding, we must make provisions to prohibit any distribution to our stockholders or the repurchase of such securities or shares unless we meet the applicable asset coverage ratios at the time of the distribution or repurchase. We may also borrow amounts up to 5% of the value of our total assets for temporary or emergency purposes without regard to asset coverage. For a discussion of the risks associated with leverage, see Risk Factors Risks Relating to Our Business and Structure We may borrow money, which would magnify the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Code of Ethics

We and Solar Capital Partners have each adopted a code of ethics pursuant to Rule 17j-1 under the 1940 Act and Rule 204A-1 under the Advisers Act, respectively, that establishes procedures for personal investments and restricts certain transactions by our personnel. Our codes of ethics generally do not permit investments by our employees in securities that may be purchased or held by us. You may read and copy these codes of ethics at the SEC's Public Reference Room in Washington, D.C. You may obtain information on the operation of the Public Reference Room by calling the SEC at (202) 551-8090. In addition, each code of ethics is attached as an exhibit to the registration statement of which this prospectus is a part, and is available on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>. You may also obtain copies of the codes of ethics, after paying a duplicating fee, by electronic request at the following Email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section, 100 F Street, N.E., Washington, D.C. 20549.

Compliance Policies and Procedures

Edgar Filing: Solar Capital Ltd. - Form POS 8C

We and our investment adviser have adopted and implemented written policies and procedures reasonably designed to detect and prevent violation of the federal securities laws and are required to review these compliance policies and procedures annually for their adequacy and the effectiveness of their implementation and designate a chief compliance officer to be responsible for administering the policies and procedures. Guy Talarico currently serves as our chief compliance officer.

Table of Contents

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 imposes a wide variety of new regulatory requirements on publicly-held companies and their insiders. Many of these requirements affect us. For example:

pursuant to Rule 13a-14 of the Exchange Act, our chief executive officer and chief financial officer must certify the accuracy of the financial statements contained in our periodic reports;

pursuant to Item 307 of Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures;

pursuant to Rule 13a-15 of the Exchange Act, our management is required to prepare an annual report regarding its assessment of our internal control over financial reporting and to obtain an audit of the effectiveness of internal control over financial reporting performed by our independent registered public accounting firm; and

pursuant to Item 308 of Regulation S-K and Rule 13a-15 of the 1934 Act, our periodic reports must disclose whether there were significant changes in our internal controls over financial reporting or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance therewith.

Proxy Voting Policies and Procedures

We have delegated our proxy voting responsibility to our investment adviser. The Proxy Voting Policies and Procedures of our investment adviser are set forth below. The guidelines will be reviewed periodically by our investment adviser and our non-interested directors, and, accordingly, are subject to change. For purposes of these Proxy Voting Policies and Procedures described below, we, our and us refers to our investment adviser.

Introduction

An investment adviser registered under the Advisers Act has a fiduciary duty to act solely in the best interests of its clients. As part of this duty, we recognize that we must vote client securities in a timely manner free of conflicts of interest and in the best interests of our clients.

These policies and procedures for voting proxies for our investment advisory clients are intended to comply with Section 206 of, and Rule 206(4)-6 under, the Advisers Act.

Proxy Policies

We will vote proxies relating to our portfolio securities in what we perceive to be the best interest of our clients' stockholders. We will review on a case-by-case basis each proposal submitted to a stockholder vote to determine its impact on the portfolio securities held by our clients. Although we will generally vote against proposals that may have a negative impact on our clients' portfolio securities, we may vote for such a proposal if there exist compelling long-term reasons to do so.

Our proxy voting decisions will be made by the senior officers who are responsible for monitoring each of the clients' investments. To ensure that our vote is not the product of a conflict of interest, we will require that: (1) anyone involved in the decision making process disclose to our managing member any potential conflict that

Table of Contents

he or she is aware of and any contact that he or she has had with any interested party regarding a proxy vote; and (2) employees involved in the decision making process or vote administration are prohibited from revealing how we intend to vote on a proposal in order to reduce any attempted influence from interested parties.

Proxy Voting Records

You may obtain information about how we voted proxies by making a written request for proxy voting information to: Solar Capital Partners at 500 Park Avenue, New York, New York 10022.

Privacy Principles

We are committed to maintaining the privacy of our stockholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information we collect, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, we do not receive any non-public personal information relating to our stockholders, although certain non-public personal information of our stockholders may become available to us. We do not disclose any non-public personal information about our stockholders or former stockholders to anyone, except as permitted by law or as is necessary in order to service stockholder accounts (for example, to a transfer agent or third party administrator).

We restrict access to non-public personal information about our stockholders to employees of our investment adviser and its affiliates with a legitimate business need for the information. We will maintain physical, electronic and procedural safeguards designed to protect the non-public personal information of our stockholders.

Table of Contents

DETERMINATION OF NET ASSET VALUE

We determine the net asset value of our investment portfolio each quarter by subtracting our total liabilities from the fair value of our total assets.

We conduct the valuation of our assets, pursuant to which our net asset value shall be determined, at all times consistent with GAAP and the 1940 Act. Our valuation procedures are set forth in more detail below:

Securities for which market quotations are readily available on an exchange shall be valued at such price as of the closing price on the day of valuation. We may also obtain quotes with respect to certain of our investments from pricing services or brokers or dealers in order to value assets. When doing so, we determine whether the quote obtained is sufficient according to GAAP to determine the fair value of the security. If determined adequate, we use the quote obtained.

Securities for which reliable market quotations are not readily available or for which the pricing source does not provide a valuation or methodology or provides a valuation or methodology that, in the judgment of our investment adviser or board of directors, does not represent fair value, shall each be valued as follows: (i) each portfolio company or investment is initially valued by the investment professionals responsible for the portfolio investment; (ii) preliminary valuation conclusions are documented and discussed with our senior management; (iii) independent third-party valuation firms engaged by, or on behalf of, the board of directors will conduct independent appraisals and review management's preliminary valuations and make their own assessment for all material assets; (iv) the board of directors will discuss valuations and determine the fair value of each investment in our portfolio in good faith based on the input of the investment adviser and, where appropriate, the respective third-party valuation firms.

The recommendation of fair value will generally be based on the following factors, as relevant:

the nature and realizable value of any collateral;

the portfolio company's ability to make payments;

the portfolio company's earnings and discounted cash flow;

the markets in which the issuer does business; and

comparisons to publicly traded securities.

Securities for which market quotations are not readily available or for which a pricing source is not sufficient may include, but are not limited to, the following:

Edgar Filing: Solar Capital Ltd. - Form POS 8C

private placements and restricted securities that do not have an active trading market;

securities whose trading has been suspended or for which market quotes are no longer available;

debt securities that have recently gone into default and for which there is no current market;

securities whose prices are stale;

securities affected by significant events; and

securities that the investment adviser believes were priced incorrectly.

Determination of fair value involves subjective judgments and estimates. Accordingly, the notes to our financial statements express the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements.

Table of Contents

Determinations in Connection with Offerings

In connection with future offering of shares of our common stock, to the extent we do not have stockholder approval to sell below NAV, our board of directors or a committee thereof will be required to make the determination that we are not selling shares of our common stock at a price below the then current net asset value of our common stock at the time at which the sale is made. Our board of directors will consider the following factors, among others, in making such determination:

the net asset value of our common stock disclosed in the most recent periodic report that we filed with the SEC;

our management's assessment of whether any material change in the net asset value of our common stock has occurred (including through the realization of gains on the sale of our portfolio securities) during the period beginning on the date of the most recently disclosed net asset value of our common stock and ending two days prior to the date of the sale of our common stock; and

the magnitude of the difference between (i) the net asset value of our common stock disclosed in the most recent periodic report that we filed with the SEC and our management's assessment of any material change in the net asset value of our common stock since the date of the most recently disclosed net asset value of our common stock, and (ii) the offering price of the shares of our common stock in the proposed offering.

Importantly, this determination will not require that we calculate the net asset value of our common stock in connection with each offering of shares of our common stock, but instead it will involve the determination by our board of directors or a committee thereof that we are not selling shares of our common stock at a price below the then current net asset value of our common stock at the time at which the sale is made.

Moreover, to the extent that there is even a remote possibility that we may (i) issue shares of our common stock at a price below the then current net asset value of our common stock at the time at which the sale is made or (ii) trigger the undertaking (which we provide in certain registration statements we file with the SEC) to suspend the offering of shares of our common stock pursuant to this prospectus if the net asset value of our common stock fluctuates by certain amounts in certain circumstances until the prospectus is amended, our board of directors will elect, in the case of clause (i) above, either to postpone the offering until such time that there is no longer the possibility of the occurrence of such event or to undertake to determine the net asset value of our common stock within two days prior to any such sale to ensure that such sale will not be below our then current net asset value, and, in the case of clause (ii) above, to comply with such undertaking or to undertake to determine the net asset value of our common stock to ensure that such undertaking has not been triggered.

These processes and procedures are part of our compliance policies and procedures. Records will be made contemporaneously with all determinations described in this section and these records will be maintained with other records that we are required to maintain under the 1940 Act.

Table of Contents

DIVIDEND REINVESTMENT PLAN

We have adopted a dividend reinvestment plan that provides for reinvestment of our dividends and other distributions on behalf of our stockholders, unless a stockholder elects to receive cash as provided below. As a result, if our board of directors authorizes, and we declare, a cash distribution, then our stockholders who have not opted out of our dividend reinvestment plan will have their cash distributions automatically reinvested in additional shares of our common stock, rather than receiving the cash distributions.

No action will be required on the part of a registered stockholder to have his cash distribution reinvested in shares of our common stock. A registered stockholder may elect to receive an entire distribution in cash by notifying American Stock Transfer & Trust Company, the plan administrator and our transfer agent and registrar, in writing so that such notice is received by the plan administrator no later than the record date for distributions to stockholders. The plan administrator will set up an account for shares acquired through the plan for each stockholder who has not elected to receive distributions in cash and hold such shares in non-certificated form. Upon request by a stockholder participating in the plan, received in writing not less than 10 days prior to the record date, the plan administrator will, instead of crediting shares to the participant's account, issue a certificate registered in the participant's name for the number of whole shares of our common stock and a check for any fractional share.

Those stockholders whose shares are held by a broker or other financial intermediary may receive distributions in cash by notifying their broker or other financial intermediary of their election.

We intend to use primarily newly issued shares to implement the plan, whether our shares are trading at a premium or at a discount to net asset value. However, we reserve the right to purchase shares in the open market in connection with our implementation of the plan. If we declare a distribution to stockholders, the plan administrator may be instructed not to credit accounts with newly-issued shares and instead to buy shares in the market if (i) the price at which newly-issued shares are to be credited does not exceed 110% of the last determined net asset value of the shares; or (ii) we have advised the plan administrator that since such net asset value was last determined, we have become aware of events that indicate the possibility of a material change in per share net asset value as a result of which the net asset value of the shares on the payment date might be higher than the price at which the plan administrator would credit newly-issued shares to stockholders. The number of shares to be issued to a stockholder is determined by dividing the total dollar amount of the distribution payable to such stockholder by the market price per share of our common stock at the close of regular trading on the valuation date for such distribution. Market price per share on that date will be the closing price for such shares on the national securities exchange on which our shares are then listed or, if no sale is reported for such day, at the average of their reported bid and asked prices. The number of shares of our common stock to be outstanding after giving effect to payment of the distribution cannot be established until the value per share at which additional shares will be issued has been determined and elections of our stockholders have been tabulated.

There will be no brokerage charges or other charges to stockholders who participate in the plan. The plan administrator's fees under the plan will be paid by us. If a participant elects by written notice to the plan administrator to have the plan administrator sell part or all of the shares held by the plan administrator in the participant's account and remit the proceeds to the participant, the plan administrator is authorized to deduct a transaction fee of \$15 plus a per share brokerage commissions from the proceeds.

Stockholders who receive distributions in the form of stock are subject to the same federal, state and local tax consequences as are stockholders who elect to receive their distributions in cash. A stockholder's basis for determining gain or loss upon the sale of stock received in a distribution from us will be equal to the amount of cash they would have received if they had elected to receive the distribution in cash, or the fair market value of the distributed shares if such shares have a fair market value equal to or greater than net asset value. Any stock

Table of Contents

received in a distribution will have a new holding period for tax purposes commencing on the day following the day on which the shares are credited to the U.S. stockholder's account.

The plan may be terminated by us upon notice in writing mailed to each participant at least 30 days prior to any record date for the payment of any distribution by us. All correspondence concerning the plan should be directed to the plan administrator by mail at 6201 15th Avenue, Brooklyn, NY 11219 or by phone at (800) 937-5449.

Table of Contents

MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion is a general summary of the material U.S. federal income tax considerations applicable to us and to an investment in our common stock. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. For example, we have not described tax consequences that we assume to be generally known by investors or certain considerations that may be relevant to certain types of holders subject to special treatment under U.S. federal income tax laws, including stockholders subject to the alternative minimum tax, tax-exempt organizations, insurance companies, dealers in securities, pension plans and trusts, and financial institutions. This summary assumes that investors hold our common stock as capital assets (within the meaning of the Code). The discussion is based upon the Code, Treasury regulations, and administrative and judicial interpretations, each as in effect as of the date of this registration statement and all of which are subject to change, possibly retroactively, which could affect the continuing validity of this discussion. We have not sought and will not seek any ruling from the Internal Revenue Service regarding this offering. This summary does not discuss any aspects of U.S. estate or gift tax or foreign, state or local tax. It does not discuss the special treatment under U.S. federal income tax laws that could result if we invested in tax-exempt securities or certain other investment assets in which we do not currently intend to invest.

This summary does not discuss the consequences of an investment in shares of our preferred stock, debt securities or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities. The U.S. federal income tax consequences of such an investment will be discussed in a relevant prospectus supplement.

A U.S. stockholder generally is a beneficial owner of shares of our common stock who is for U.S. federal income tax purposes:

a citizen or individual resident of the United States including an alien individual who is a lawful permanent resident of the United States or meets the substantial presence test under Section 7701(b) of the Code;

a corporation or other entity taxable as a corporation, for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any political subdivision thereof;

a trust, if a court in the United States has primary supervision over its administration and one or more U.S. persons have the authority to control all decisions of the trust, or the trust has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person; or

an estate, the income of which is subject to U.S. federal income taxation regardless of its source.

A non-U.S. stockholder is a beneficial owner of shares of our common stock that is an individual, corporation, trust or estate and is not a U.S. stockholder.

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds shares of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A prospective stockholder who is a partner of a partnership holding shares of our common stock should consult its tax advisors with respect to the purchase, ownership and disposition of shares of our common stock.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

Tax matters are very complicated and the tax consequences to an investor of an investment in our shares will depend on the facts of its particular situation. We encourage investors to consult their own tax advisors regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty and the effect of any possible changes in the tax laws.

Table of Contents

As a BDC, we intend to elect to be treated, and intend to qualify annually thereafter, as a RIC under Subchapter M of the Code, beginning with our 2010 taxable year. As a RIC, we generally will not have to pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements (as described below). In addition, to qualify for RIC tax treatment we must distribute to our stockholders, for each taxable year, at least 90% of our investment company taxable income, which is generally our ordinary income plus the excess of our realized net short-term capital gains over our realized net long-term capital losses (the Annual Distribution Requirement).

Taxation as a Regulated Investment Company

If we:

qualify as a RIC; and

satisfy the Annual Distribution Requirement;

then we will not be subject to federal income tax on the portion of our investment company taxable income and net capital gain (i.e., realized net long-term capital gains in excess of realized net short-term capital losses) we distribute to stockholders. We will be subject to U.S. federal income tax at the regular corporate rates on any income or capital gain not distributed (or deemed distributed) to our stockholders.

We will be subject to a 4% nondeductible federal excise tax on certain undistributed income unless we distribute in a timely manner an amount at least equal to the sum of (1) 98% of our ordinary income for each calendar year, (2) 98.2% of our capital gain net income for the one-year period ending October 31 in that calendar year and (3) any income realized, but not distributed, and on which we paid no federal income tax, in preceding years (the Excise Tax Avoidance Requirement). We currently intend to make sufficient distributions each taxable year to satisfy the Excise Tax Avoidance Requirement.

In order to qualify as a RIC for federal income tax purposes, we must, among other things:

at all times during each taxable year, have in effect an election to be treated as a BDC under the 1940 Act;

derive in each taxable year at least 90% of our gross income from (a) dividends, interest, payments with respect to certain securities loans, gains from the sale of stock or other securities or currencies, or other income derived with respect to our business of investing in such stock, securities or currencies and (b) net income derived from an interest in a qualified publicly traded partnership; and

diversify our holdings so that at the end of each quarter of the taxable year:

at least 50% of the value of our assets consists of cash, cash equivalents, U.S. government securities, securities of other RICs, and other securities if such other securities of any one issuer do not represent more than 5% of the value of our assets or more than 10% of the outstanding voting securities of the issuer; and

no more than 25% of the value of our assets is invested in (i) the securities, other than U.S. government securities or securities of other RICs, of one issuer, (ii) the securities of two or more issuers that are controlled, as determined under applicable tax rules, by us and that are engaged in the same or similar or related trades or businesses or (iii) the securities of one or more qualified publicly traded partnerships.

We may be required to recognize taxable income in circumstances in which we do not receive cash. For example, if we hold debt obligations that are treated under applicable tax rules as having original issue discount (such as debt instruments with PIK interest or, in certain cases, increasing interest rates or debt instruments issued with warrants), we must include in income each year a portion of the original issue discount that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same

Table of Contents

taxable year. Because any original issue discount accrued will be included in our investment company taxable income for the year of accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement, even though we will not have received any corresponding cash amount.

Because we may use debt financing, we will be subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making distributions necessary to satisfy the Annual Distribution Requirement. If we are unable to obtain cash from other sources or are otherwise limited in our ability to make distributions, we could fail to qualify for RIC tax treatment and thus become subject to corporate-level income tax.

Certain of our investment practices may be subject to special and complex U.S. federal income tax provisions that may, among other things: (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions; (ii) convert lower taxed long-term capital gain into higher taxed short-term capital gain or ordinary income; (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (iv) cause us to recognize income or gain without a corresponding receipt of cash; (v) adversely affect the time as to when a purchase or sale of securities is deemed to occur; (vi) adversely alter the characterization of certain complex financial transactions; and (vii) produce income that will not be qualifying income for purposes of the 90% gross income test described above. We will monitor our transactions and may make certain tax elections in order to mitigate the potential adverse effect of these provisions.

Gain or loss realized by us from the sale or exchange of warrants acquired by us as well as any loss attributable to the lapse of such warrants generally will be treated as capital gain or loss. The treatment of such gain or loss as long-term or short-term will depend on how long we held a particular warrant. Upon the exercise of a warrant acquired by us, our tax basis in the stock purchased under the warrant will equal the sum of the amount paid for the warrant plus the strike price paid on the exercise of the warrant. Except as set forth below in *Failure to Qualify as a Regulated Investment Company*, the remainder of this discussion assumes we will qualify as a RIC for each taxable year.

Taxation of U.S. Stockholders

Distributions by us generally will be taxable to U.S. stockholders as ordinary income or capital gains. Distributions of our investment company taxable income will be taxable as ordinary income to U.S. stockholders to the extent of our current or accumulated earnings and profits, whether paid in cash or reinvested in additional common stock. Distributions of our net capital gains (that is, the excess of our realized net long-term capital gains in excess of realized net short-term capital losses) properly reported by us as capital gain dividends will be taxable to a U.S. stockholder as long-term capital gains, regardless of the U.S. stockholder's holding period for its common stock and regardless of whether paid in cash or reinvested in additional common stock. For taxable years beginning on or before December 31, 2012, distributions of investment company taxable income that are reported by us as being derived from qualified dividend income will be taxed in the hands of non-corporate stockholders at the rates applicable to long-term capital gain, provided that holding period and other requirements are met by both the stockholders and us. Dividends distributed by us will generally not be attributable to qualified dividend income. Distributions in excess of our current and accumulated earnings and profits first will reduce a U.S. stockholder's adjusted tax basis in such U.S. stockholder's common stock and, after the adjusted basis is reduced to zero, will constitute capital gains to such U.S. stockholder. For a summary of the tax rates applicable to capital gains, including capital gain dividends, see the discussion below.

Under the dividend reinvestment plan, if a U.S. stockholder owns shares of common stock registered in its own name, the U.S. stockholder will have all cash distributions automatically reinvested in additional shares of common stock unless the U.S. stockholder opts out of our dividend reinvestment plan by delivering a written notice to our dividend paying agent prior to the record date of the next dividend or distribution. See

Dividend Reinvestment Plan. Any distributions reinvested under the plan will nevertheless remain taxable to the U.S. stockholder. The U.S. stockholder will have an adjusted basis in the additional common shares purchased

Table of Contents

through the plan equal to the amount of cash they would have received if they had elected to receive the distribution in cash, or the fair market value of the distributed shares if such shares have a fair market value equal to or greater than net asset value. The additional shares will have a new holding period commencing on the day following the day on which the shares are credited to the U.S. stockholder's account.

Although we currently intend to distribute realized net capital gains (i.e., net realized long-term capital gains in excess of net realized short-term capital losses), if any, at least annually, we may in the future decide to retain some or all of our net capital gains, but to designate the retained amount as a deemed distribution. In that case, among other consequences, we will pay corporate-level tax on the retained amount, each U.S. stockholder will be required to include its share of the deemed distribution in income as if it had been actually distributed to the U.S. stockholder, and the U.S. stockholder will be entitled to claim a credit or refund equal to its allocable share of the corporate-level tax we pay on the retained capital gain. The amount of the deemed distribution net of such tax will be added to the U.S. stockholder's cost basis for its common stock. Since we expect to pay tax on any retained capital gains at our regular corporate capital gain tax rate, and since that rate is in excess of the maximum rate currently payable by non-corporate U.S. stockholders on long-term capital gains, the amount of tax that non-corporate U.S. stockholders will be treated as having paid will exceed the tax they owe on the capital gain dividend. Such excess generally may be claimed as a credit or refund against the U.S. stockholder's other U.S. federal income tax obligations. A U.S. stockholder that is not subject to U.S. federal income tax or otherwise required to file a U.S. federal income tax return would be required to file a U.S. federal income tax return on the appropriate form in order to claim a refund for the taxes we paid. In order to utilize the deemed distribution approach, we must provide written notice to our stockholders prior to the expiration of 60 days after the close of the relevant tax year.

As a RIC, we will be subject to the alternative minimum tax (AMT), but any items that are treated differently for AMT purposes must be apportioned between us and our stockholders and this may affect the stockholders' AMT liabilities. Although regulations explaining the precise method of apportionment have not yet been issued by the Internal Revenue Service, we intend in general to apportion these items in the same proportion that dividends paid to each stockholder bear to our taxable income (determined without regard to the dividends paid deduction), unless we determine that a different method for a particular item is warranted under the circumstances.

For purposes of determining (i) whether the Annual Distribution Requirement is satisfied for any year and (ii) the amount of dividends paid for that year, we may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the taxable year in question. If we make such an election, the U.S. stockholder generally will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by us in October, November, or December of any calendar year, payable to stockholders of record on a specified date in such a month and actually paid during January of the following year, will be treated as if it had been received by our U.S. stockholders on December 31 of the year in which the dividend was declared.

You should consider the tax implications of buying common stock just prior to a distribution. Even if the price of the common stock includes the amount of the forthcoming distribution, and the distribution economically represents a return of your investment, you will be taxed upon receipt of the distribution and will not be entitled to offset the distribution against the tax basis in your common stock.

You may recognize taxable gain or loss if you sell or exchange your common stock. The amount of the gain or loss will be measured by the difference between your adjusted tax basis in your common stock and the amount of the proceeds you receive in exchange for such stock. Any gain or loss arising from the sale or exchange of our common stock (or, in the case of distributions in excess of the sum of our current and accumulated earnings and profits and your tax basis in the stock, treated as arising from the sale or exchange of our common stock) generally will be a capital gain or loss if the common stock is held as a capital asset. This capital gain or loss normally will be treated as a long-term capital gain or loss if you have held your common stock for more than

Table of Contents

one year. Otherwise, it will be classified as short-term capital gain or loss. However, any capital loss arising from the sale or exchange of common stock held for six months or less generally will be treated as a long-term capital loss to the extent of the amount of capital gain dividends received, or treated as deemed distributed, with respect to such stock. For this purpose, certain special rules, including rules relating to periods when your risk of loss with respect to your common stock has been diminished, generally apply in determining the holding period of such stock. The ability to deduct capital losses may be subject to other limitations under the Code.

In addition, all or a portion of any loss recognized upon a disposition of shares of our common stock may be disallowed if other shares of our common stock are purchased (whether through reinvestment of distributions or otherwise) within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss. In general, individual U.S. stockholders currently are subject to a maximum U.S. federal income tax rate of 15% (20% for years beginning after December 31, 2012) on their net capital gain, i.e., the excess of net long-term capital gain over net short-term capital loss for a taxable year, including a long-term capital gain derived from an investment in our common stock. In addition, for taxable years beginning after December 31, 2012, individuals with income in excess of \$200,000 (\$250,000 in the case of married individuals filing jointly or \$125,000 in the case of married individuals filing separately) and certain estates and trusts are subject to an additional 3.8% tax on their net investment income, which generally includes net income from interest, dividends, annuities, royalties, and rents, and net capital gains (other than certain amounts earned from trades or businesses). Corporate U.S. stockholders currently are subject to U.S. federal income tax on net capital gain at the maximum 35% rate also applied to ordinary income. Dividends distributed by us to corporate stockholders generally will not be eligible for the dividends-received deduction. Tax rates imposed by states and local jurisdictions on capital gain and ordinary income may differ.

We will send to each of our U.S. stockholders, as promptly as possible after the end of each calendar year, a report detailing the amounts includible in such U.S. stockholder's taxable income for such year as ordinary income, long-term capital gain and qualified dividend income, if any. In addition, the U.S. federal tax status of each year's distributions generally will be reported to the Internal Revenue Service. Distributions may also be subject to additional state, local, and foreign taxes depending on a U.S. stockholder's particular situation.

Backup withholding may apply to distributions on the common stock with respect to certain non-exempt U.S. stockholders. Such U.S. stockholders generally will be subject to backup withholding unless the U.S. stockholder provides its correct taxpayer identification number and certain other information, certified under penalties of perjury, to the dividend paying agent, or otherwise establishes an exemption from backup withholding. Any amount withheld under backup withholding is allowed as a credit against the U.S. stockholder's U.S. federal income tax liability, provided the proper information is provided to the Internal Revenue Service.

Taxation of Non-U.S. Stockholders

Whether an investment in our common stock is appropriate for a non-U.S. stockholder will depend upon that stockholder's particular circumstances. Non-U.S. stockholders should consult their tax advisors before investing in our common stock.

Distributions of our investment company taxable income to stockholders that are non-U.S. stockholders will currently be subject to withholding of U.S. federal income tax at a 30% rate (or lower rate provided by an applicable treaty) to the extent of our current and accumulated earnings and profits unless the distributions are effectively connected with a U.S. trade or business of the non-U.S. stockholders, and, if an income tax treaty applies, attributable to a permanent establishment in the United States. In that case, the distributions will be subject to U.S. federal income tax at the ordinary income rates applicable to U.S. stockholders and we will not have to withhold U.S. federal withholding tax if the non-U.S. stockholder complies with applicable certification and disclosure requirements. Special certification requirements apply to a non-U.S. stockholder that is a foreign partnership or a foreign trust and such entities are urged to consult their own tax advisors.

Table of Contents

In addition, for taxable years beginning prior to January 1, 2012, U.S. source withholding taxes were not imposed on dividends paid by us to the extent the dividends were reported as interest-related dividends or short-term capital gain dividends. Under this exemption, interest-related dividends and short-term capital gain dividends generally represented distributions of interest or short-term capital gains that would not have been subject to U.S. withholding tax at the source if they had been received directly by a foreign person, and that satisfied certain other requirements. No assurance can be given, however, as to whether this exemption will be extended for tax years beginning on or after January 1, 2012 or whether any of our distributions will be reported as eligible for this exemption (if extended) from withholding tax.

Actual or deemed distributions of our net capital gains to a stockholder that is a non-U.S. stockholder, and gains realized by a non-U.S. stockholder upon the sale or redemption of our common stock, will not be subject to U.S. federal income tax unless the distributions or gains, as the case may be, are effectively connected with a U.S. trade or business of the non-U.S. stockholder and, if an income tax treaty applies, are attributable to a permanent establishment maintained by the non-U.S. stockholder in the United States, or, in the case of an individual, the non-U.S. stockholder was present in the United States for 183 days or more during the taxable year and certain other conditions are met.

If we distribute our net capital gains in the form of deemed rather than actual distributions, a non-U.S. stockholder will be entitled to a U.S. federal income tax credit or tax refund equal to the stockholder's allocable share of the corporate-level tax we pay on the capital gains deemed to have been distributed; however, in order to obtain the refund, the non-U.S. stockholder must obtain a U.S. taxpayer identification number and file a U.S. federal income tax return even if the non-U.S. stockholder would not otherwise be required to obtain a U.S. taxpayer identification number or file a U.S. federal income tax return.

For a corporate non-U.S. stockholder, distributions (both actual and deemed), and gains realized upon the sale or redemption of our common stock that are effectively connected to a U.S. trade or business may, under certain circumstances, be subject to an additional branch profits tax at a 30% rate (or at a lower rate if provided for by an applicable treaty). Accordingly, investment in our stock may not be appropriate for a non-U.S. stockholder.

Under our dividend reinvestment plan, if a non-U.S. stockholder owns shares of common stock registered in its own name, the non-U.S. stockholder will have all cash distributions automatically reinvested in additional shares of common stock unless it opts out of our dividend reinvestment plan by delivering a written notice to our dividend paying agent prior to the record date of the next dividend or distribution. See Dividend Reinvestment Plan. If the distribution is a distribution of our investment company taxable income, is not reported by us as a short-term capital gains dividend or interest-related dividend and it is not effectively connected with a U.S. trade or business of the non-U.S. stockholder (or, if a treaty applies, is not attributable to a permanent establishment), the amount distributed (to the extent of our current and accumulated earnings and profits) will be subject to withholding of U.S. federal income tax at a 30% rate (or lower rate provided by an applicable treaty) and only the net after-tax amount will be reinvested in common shares. If the distribution is effectively connected with a U.S. trade or business of the non-U.S. stockholder, generally the full amount of the distribution will be reinvested in the plan and will nevertheless be subject to U.S. federal income tax at the ordinary income rates applicable to U.S. persons. The non-U.S. stockholder will have an adjusted basis in the additional common shares purchased through the plan equal to the amount of cash that they would have received if they had elected to receive the distribution in cash, or the fair market value of the distributed shares if such shares have a fair market value equal to or greater than net asset value. The additional shares will have a new holding period commencing on the day following the day on which the shares are credited to the non-U.S. stockholder's account.

Recently enacted legislation generally imposes a 30% withholding tax on payments of certain types of income to foreign financial institutions that fail to enter into an agreement with the United States Treasury to report certain required information with respect to accounts held by United States persons (or held by foreign entities that have U.S. persons as substantial owners). The types of income subject to the tax include U.S. source

Table of Contents

interest and dividends paid after December 31, 2013, and the gross proceeds from the sale of any property that could produce U.S. source interest or dividends received after December 31, 2014. The information required to be reported includes the identity and taxpayer identification number of each account holder that is a U.S. person and transaction activity within the holder's account. In addition, subject to certain exceptions, this legislation also imposes a 30% withholding on payments to foreign entities that are not financial institutions unless the foreign entity certifies that it does not have a greater than 10% U.S. owner or provides the withholding agent with identifying information on each greater than 10% U.S. owner. When these provisions become effective, depending on the status of a Non-U.S. Holder and the status of the intermediaries through which they hold their units, Non-U.S. Holders could be subject to this 30% withholding tax with respect to distributions on their units and proceeds from the sale of their units. Under certain circumstances, a Non-U.S. Holder might be eligible for refunds or credits of such taxes.

A non-U.S. stockholder who is a nonresident alien individual, and who is otherwise subject to withholding of U.S. federal income tax, may be subject to information reporting and backup withholding of U.S. federal income tax on dividends unless the non-U.S. stockholder provides us or the dividend paying agent with an Internal Revenue Service Form W-8BEN (or an acceptable substitute form) or otherwise meets documentary evidence requirements for establishing that it is a non-U.S. stockholder or the non-U.S. stockholder otherwise establishes an exemption from backup withholding.

You are urged to consult your own tax advisor regarding the specific tax consequences of the purchase, ownership and sale of our common stock.

Failure to Qualify as a Regulated Investment Company

If we were unable to qualify for treatment as a RIC, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. Such distributions would be taxable to our stockholders as dividends and, if made in a taxable year beginning on or before December 31, 2012 and provided certain holding period and other requirements were met, could qualify for treatment as qualified dividend income in the hands of non-corporate stockholders (and thus eligible for the current 15% maximum rate) to the extent of our current and accumulated earnings and profits. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends received deduction. Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of the stockholder's tax basis, and any remaining distributions would be treated as a capital gain. To requalify as a RIC in a subsequent taxable year, we would be required to satisfy the RIC qualification requirements for that year and dispose of any earnings and profits from any year in which we failed to qualify as a RIC. Subject to a limited exception applicable to RICs that qualified as such under Subchapter M of the Code for at least one year prior to disqualification and that requalify as a RIC no later than the second year following the non-qualifying year, we could be subject to tax on any unrealized net built-in gains in the assets held by us during the period in which we failed to qualify as a RIC that are recognized within the subsequent 10 years, unless we made a special election to pay corporate-level tax on such built-in gain at the time of our requalification as a RIC.

Table of Contents

SALES OF COMMON STOCK BELOW NET ASSET VALUE

At our 2011 Annual Stockholders Meeting, subject to certain determinations required to be made by our board of directors, our stockholders approved our ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share during a period beginning on June 9, 2011 and expiring on the earlier of the one-year anniversary of the date of the 2011 Annual Stockholders Meeting and the date of our 2012 Annual Stockholders Meeting, which is expected to be held in May 2012 (the "Stockholder Approval"). However, notwithstanding such stockholder approval, since our initial public offering on February 9, 2010, we have not sold any shares of our common stock at a price below our then current net asset value per share. At our 2012 Annual Stockholders Meeting, we have sought the re-approval of our stockholders to provide us with the ability to sell or otherwise issue shares of our common stock, not exceeding 25% of our then outstanding common stock immediately prior to each such offering, at a price below the then current net asset value per share.

In order to sell shares of common stock pursuant to this authorization, no further authorization from our stockholders will need to be solicited, but a majority of our directors who have no financial interest in the sale and a majority of our independent directors will have to (a) find that the sale is in our best interests and in the best interests of our stockholders and (b) in consultation with any underwriter or underwriters of the offering, make a good faith determination as of a time either immediately prior to the first solicitation by us or on our behalf of firm commitments to purchase such shares of common stock, or immediately prior to the issuance of such common stock, that the price at which such shares of common stock are to be sold is not less than a price which closely approximates the market value of those shares of common stock, less any distributing commission or discount.

Any offering of common stock below its net asset value per share will be designed to raise capital for investment in accordance with our investment objective.

In making a determination that an offering of common stock below its net asset value per share is in our and our stockholders' best interests, our board of directors will consider a variety of factors including:

the effect that an offering below net asset value per share would have on our stockholders, including the potential dilution to the net asset value per share of our common stock our stockholders would experience as a result of the offering;

the amount per share by which the offering price per share and the net proceeds per share are less than our most recently determined net asset value per share;

the relationship of recent market prices of par common stock to net asset value per share and the potential impact of the offering on the market price per share of our common stock;

whether the estimated offering price would closely approximate the market value of shares of our common stock;

the potential market impact of being able to raise capital during the current financial market difficulties;

the nature of any new investors anticipated to acquire shares of our common stock in the offering;

Edgar Filing: Solar Capital Ltd. - Form POS 8C

the anticipated rate of return on and quality, type and availability of investments; and

the leverage available to us.

Our board of directors will also consider the fact that sales of shares of common stock at a discount will benefit our investment adviser as the investment adviser will earn additional investment management fees on the proceeds of such offerings, as it would from the offering of any other of our securities or from the offering of common stock at a premium to net asset value per share.

We will not sell shares of our common stock under this prospectus or an accompanying prospectus supplement pursuant to the Stockholder Approval without first filing a new post-effective amendment to the registration statement if the cumulative dilution to our net asset value per share from offerings under the registration statement, as amended by any post-effective amendments, exceeds 15%. This would be measured

Table of Contents

separately for each offering pursuant to the registration statement, as amended by any post-effective amendments, by calculating the percentage dilution or accretion to aggregate net asset value from that offering and then summing the percentage from each offering. For example, if our most recently determined NAV per share at the time of the first offering is \$23.00 and we have 37 million shares outstanding, the sale of 9.25 million shares at net proceeds to us of \$11.50 per share (a 50% discount) would produce dilution of 10.0%. If we subsequently determined that our NAV per share increased to \$24.00 on the then 46.25 million shares outstanding and then made an additional offering, we could, for example, sell approximately an additional 5.15 million shares at net proceeds to us of \$12.00 per share, which would produce dilution of 5.0%, before we would reach the aggregate 15% limit. If we file a new post-effective amendment, the threshold would reset.

In addition, it should be noted that under the Stockholder Approval the maximum number of shares issuable below NAV per share that could result in such dilution is limited to 25% of our then outstanding common stock. As a result, the maximum amount of dilution to existing stockholders under the Stockholder Approval will be limited to no more than 20% of our then current NAV per share, assuming we were to issue the maximum number of shares at no more than par value, or \$0.01 per share.

Sales by us of our common stock at a discount from net asset value per share pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering. Any sale of common stock at a price below net asset value per share would result in an immediate dilution to existing common stockholders who do not participate in such sale on at least a pro-rata basis. See Risk Factors Risks Relating to an Investment in Our Securities The net asset value per share of our common stock may be diluted if we sell shares of our common stock in one or more offerings at prices below the then current net asset value per share of our common stock or securities to subscribe for or convertible into shares of our common stock.

The following three headings and accompanying tables explain and provide hypothetical examples on the impact of an offering of our common stock at a price less than net asset value per share on three different types of investors:

existing stockholders who do not purchase any shares in the offering;

existing stockholders who purchase a relatively small amount of shares in the offering or a relatively large amount of shares in the offering; and

new investors who become stockholders by purchasing shares in the offering.

Impact On Existing Stockholders Who Do Not Participate in the Offering

Our current stockholders who do not participate in an offering below net asset value per share or who do not buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after expenses and commissions) face the greatest potential risks. These stockholders will experience an immediate dilution in the net asset value of the shares of common stock they hold and their net asset value per share. These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we will experience in our assets, potential earning power and voting interests due to such offering. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and level of discounts increases. Further, if current stockholders do not purchase any shares to maintain their percentage interest, regardless of whether such offering is above or below the then current net asset value, their voting power will be diluted.

Edgar Filing: Solar Capital Ltd. - Form POS 8C

The following chart illustrates the level of net asset value dilution that would be experienced by a nonparticipating stockholder in three different hypothetical offerings of different sizes and levels of discount from net asset value per share. It is not possible to predict the level of market price decline that may occur.

Table of Contents

The examples assume that the issuer has 30 million shares outstanding, \$600 million in total assets and \$150 million in total liabilities. The current net asset value and net asset value per share are thus \$450 million and \$15.00. The chart illustrates the dilutive effect on Stockholder A of (a) an offering of 1.5 million shares of common stock (5% of the outstanding shares) at \$14.25 per share after offering expenses and commissions (a 5% discount from net asset value), (b) an offering of 3 million shares of common stock (10% of the outstanding shares) at \$13.50 per share after offering expenses and commissions (a 10% discount from net asset value), (c) an offering of 6 million shares of common stock (20% of the outstanding shares) at \$12.00 per share after offering expenses and commissions (a 20% discount from net asset value), and (d) an offering of 7.5 million shares of common stock (25% of the outstanding shares) at \$0.01 per share, the par value of our common stock (a 100% discount from net asset value). The prospectus supplement pursuant to which any discounted offering is made will include a chart based on the actual number of shares of common stock in such offering and the actual discount to the most recently determined net asset value. It is not possible to predict the level of market price decline that may occur.

		Example 1 5% Offering at 5% Discount		Example 2 10% Offering at 10% Discount		Example 3 20% Offering at 20% Discount		Example 4 25% Offering at 100% Discount

Impact On Existing Stockholders Who Do Participate in the Offering

Our existing stockholders who participate in an offering below net asset value per share or who buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after expenses and commissions) will experience the same types of net asset value dilution as the nonparticipating stockholders, although at a lower level, to the extent they purchase less than the same percentage of the discounted offering as their interest in shares of our common stock immediately prior to the offering. The level of net asset value dilution will decrease as the number of shares such stockholders purchase increases. Existing stockholders who buy more than such percentage will experience net asset value dilution but will, in contrast to existing stockholders who purchase less than their proportionate share of the offering, experience accretion in net asset value per share over their investment per share and will also experience a disproportionately greater increase in their participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to such offering. The level of accretion will increase as the excess number of shares such stockholder purchases increases. Even a stockholder who over-participates will, however, be subject to the risk that we may make additional discounted offerings in which such stockholder does not participate, in which case such a stockholder will experience net asset value dilution as described above in such subsequent offerings. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following chart illustrates the level of dilution and accretion in the hypothetical 20% discount offering from the prior chart (Example 3) for a stockholder that acquires shares equal to (a) 50% of its proportionate share of the offering (*i.e.*, 3,000 shares, which is 0.05% of an offering of 6 million shares) rather than its 0.10% proportionate share and (b) 150% of such percentage (*i.e.*, 9,000 shares, which is 0.15% of an offering of 6 million shares rather than its 0.10% proportionate share). The prospectus supplement pursuant to which any discounted offering is made will include a chart for these examples based on the actual number of shares in such offering and the actual discount from the most recently determined net asset value per share. It is not possible to predict the level of market price decline that may occur.

	Prior to Sale	50% Participation		150% Participation	
		Following Sale	% Change	Following Sale	% Change
Offering Price					
Price per Share to Public		\$ 12.63		\$ 12.63

Net Asset Value per Share Held by Stockholder A		\$ 14.50		\$ 14.50	
Dilution/Accretion per Share Held by Stockholder A (Net Asset Value per Share Less Investment per Share)		\$ (0.28)		\$ 0.05	0.40%
Percentage Dilution/Accretion to Stockholder A (Dilution per Share Divided by Investment per Share)			(1.96)%		0.32%

Impact On New Investors

Investors who are not currently stockholders and who participate in an offering of shares of our common stock below net asset value, but whose investment per share is greater than the resulting net asset value per share due to selling compensation and expenses paid by the Company, will experience an immediate decrease, although small, in the net asset value of their shares and their net asset value per share compared to the price they pay for their shares. Investors who are not currently stockholders and who participate in an offering of shares of our common stock below net asset value per share and whose investment per share is also less than the resulting net asset value per share due to selling compensation and expenses paid by the Company being significantly less than the discount per share, will experience an immediate increase in the net asset value of their shares and their net asset value per share compared to the price they pay for their shares. These investors will experience a disproportionately greater participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to such offering. These investors will, however, be subject to the risk that we may make additional discounted offerings in which such new stockholder does not participate, in which case such new stockholder will experience dilution as described above in such subsequent offerings. These investors may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in net asset value per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following chart illustrates the level of dilution or accretion for new investors that would be experienced by a new investor in the same hypothetical 5%, 10%, 20% and 25% discounted offerings as described in the first chart above. The illustration is for a new investor who purchases the same percentage (0.10%) of the shares in the offering as Stockholder A in the prior examples held immediately prior to the offering. The prospectus supplement pursuant to which any discounted offering is made will include a chart for these examples based on the actual number of shares in such offering and the actual discount from the most recently determined net asset value per share. It is not possible to predict the level of market price decline that may occur.

ISSUANCE OF WARRANTS OR SECURITIES TO SUBSCRIBE FOR OR CONVERTIBLE INTO SHARES OF OUR COMMON STOCK

At our 2011 Annual Stockholders Meeting, our stockholders authorized us to sell or otherwise issue warrants or securities to subscribe for or convertible into shares of our common stock, not exceeding 25% of our then outstanding common stock, at an exercise or conversion price that, at the date of issuance, will not be less than the market value per share of our common stock. Such authorization has no expiration. Any exercise of warrants or securities to subscribe for or convertible into shares of our common stock at an exercise or conversion price that is below net asset value at the time of such exercise or conversion would result in an immediate dilution to existing common stockholders. This dilution would include reduction in net asset value as a result of the proportionately greater decrease in the stockholders' interest in our earnings and assets and their voting interest than the increase in our assets resulting from such offering.

In order to sell or issue warrants or securities to subscribe for or convertible into shares of our common stock, (a) the exercise, conversion or subscription rights in such securities must expire by their terms within 10 years, (b) with respect to any warrants, options or rights to subscribe or convert to our common stock that are issued along with other securities, such warrants, options or rights must not be separately transferable, (c) the exercise or conversion price of such securities must not be less than the greater of the market value per share of our common stock and the net asset value per share of our common stock at the date of issuance of such securities, (d) the issuance of such securities must be approved by a majority of the board of directors who have no financial interest in the transaction and a majority of the non-interested directors on the basis that such issuance is in the best interests of the Company and its stockholders and (e) the number of shares of our common stock that would result from the exercise or conversion of such securities and all other securities convertible, exercisable or exchangeable into shares of our common stock outstanding at the time of issuance of such securities must not exceed 25% of our outstanding common stock at such time.
