**Item 1. Schedule of Investments.**

The Schedule(s) of Investments is attached herewith.

*FLAHERTY & CRUMRINE PREFERRED SECURITIES INCOME FUND*

To the Shareholders of Flaherty & Crumrine Preferred Securities Income Fund:

The new fiscal year is off to a fine start total return on *net asset value* for the first fiscal quarter<sup>2</sup> was +4.7%. Over the same period total return based on income plus change in the Fund's *market price* was +5.0%.

With signs of economic improvement trickling in, prices on intermediate and long-term US Treasury bonds fell as much as five percent in the quarter. In contrast, prices on many preferred securities rose. Conditions in the market for preferred securities have been, and remain, positive; credit quality continues to improve, investor demand is high, and the market is shrinking.

Once again redemptions of preferred securities outpaced issuance. Since December 1, 2012, redemptions<sup>3</sup> totaled \$30.1 billion. Over the same period, \$16.8 billion of new preferred securities were brought to market. *During the past four months, the preferred securities market has shrunk by \$13.3 billion, or 3.7%.*

It is instructive to break these numbers down between bank and non-bank securities. Since December 1, 2012, redemptions of bank preferred securities have totaled \$17.6 billion, or 44% of total preferred redemptions. Since mid-March, however, bank calls have spiked and comprise over 70% of total redemptions. The pace quickened immediately after regulators announced results from their annual review of capital at large banks. So far, banks have been slow to replace preferred capital new bank issues have totaled a paltry \$3.9 billion since December<sup>1</sup> of last year.

For non-bank companies the decision to call or issue is driven primarily by economics. In the current low interest rate environment, it is often possible for issuers to achieve substantial savings by refinancing. While banks are concerned about expense reduction as well, their decisions about redemption or issuance have been driven mainly by regulatory requirements. The Dodd-Frank Wall Street Reform and Consumer Protection Act, passed by Congress in 2010, mandated new standards for the amount and form of bank capital. Under the Act, trust preferred securities are being phased out of the calculation of Tier 1 capital. New capital will be either traditional equity or non-cumulative perpetual preferred stock.

As we've discussed in the past, the wave of refinancing negatively impacts income earned from Fund investments. The current combination of high-yielding portfolio assets and low cost of Fund leverage won't last forever; we attempt to set distribution rates that reflect this situation.

Since our last letter, there have been three related changes to the Fund: a new name, a new shareholder servicing agent and a new website address at [www.preferredincome.com](http://www.preferredincome.com). We are pleased to welcome Destra Capital Investments LLC ( Destra Capital ) as the new shareholder servicing agent. In addition, the Fund changed its name to Flaherty & Crumrine Preferred Securities Income Fund Incorporated . We emphasize that Flaherty & Crumrine is still the investment adviser and there has been no change in investment strategies or style.

<sup>1</sup> Following the methodology required by the SEC, total return includes income and principal change, plus the impact of the Fund's leverage and expenses.

## NOTES TO FINANCIAL STATEMENTS (Unaudited)

### 1. Aggregate Information for Federal Income Tax Purposes

At February 28, 2013, the aggregate cost of securities for federal income tax purposes was \$1,188,977,813, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$134,190,574 and the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$89,030,937.

### 2. Additional Accounting Standards

*Fair Value Measurements:* The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)  
The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. A summary of the inputs used to value the Fund's investments as of February 28, 2013 is as follows:

|                                     | Total<br>Value at<br>February 28, 2013 | Level 1<br>Quoted<br>Price | Level 2<br>Significant<br>Observable<br>Inputs | Level 3<br>Significant<br>Unobservable<br>Inputs |

**NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

During the reporting period, there were no transfers into Level 1 from Level 2. During the reporting period, securities with an aggregate market value of \$6,045,000 were transferred into Level 2 from Level 1. The securities were transferred because of a reduction in the amount of observable market data, resulting from: a decrease in market activity for the securities, reduced availability of quoted prices for the securities, or de-listing of securities from a national securities exchange that resulted in a material decrease in activity.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services approved by the Board and unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active participant in the markets.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades or the same information for securities that are similar in many respects to those being valued are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

|  |                   | Preferred Securities |                    | Corporate Debt |
|--|-------------------|----------------------|--------------------|----------------|

**NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

| Category                         | Fair Value at 2/28/13 | Valuation Technique | Unobservable Input                 | Input Range (Wgt Avg) |
|----------------------------------|-----------------------|---------------------|------------------------------------|-----------------------|
| <b>Preferred Securities</b>      |                       |                     |                                    |                       |
| Banking                          | \$ 52,650             | Bankruptcy recovery | Credit/Structure-specific recovery | 0.00% - 0.50% (0.15%) |
|                                  | 14,400                | Bankruptcy recovery | Credit/Structure-specific recovery | 0.00% - 0.50% (0.05%) |
| <b>Corporate Debt Securities</b> |                       |                     |                                    |                       |
|                                  | 649,165               | Bankruptcy recovery | Credit/Structure-specific recovery | 10% - 20% (13%)       |

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.
