NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

March 31, 2013

1. Nature of Business

Atmos Energy Corporation (Atmos Energy or the Company) and our subsidiaries are engaged primarily in the regulated natural gas distribution and transmission and storage businesses as well as certain other nonregulated businesses. For the fiscal year ended September 30, 2012, our regulated businesses comprised over 95 percent of our consolidated net income.

Through our natural gas distribution business, we deliver natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers through our six regulated natural gas distribution divisions, which at March 31, 2013, covered service areas located in nine states. In addition, we transport natural gas for others through our distribution system. On April 1, 2013, we completed the divestiture of our natural gas distribution operations in Georgia, representing approximately 64,000 customers. Our regulated businesses also include our regulated pipeline and storage operations, which include the transportation of natural gas to our distribution system and the management of our underground storage facilities. Our regulated businesses are subject to federal and state regulation and/or regulation by local authorities in each of the states in which our natural gas distribution divisions operate.

Our nonregulated businesses operate primarily in the Midwest and Southeast through various wholly-owned subsidiaries of Atmos Energy Holdings, Inc., (AEH). AEH is wholly owned by the Company and based in Houston, Texas. Through AEH, we provide natural gas management and transportation services to municipalities, natural gas distribution companies, including certain divisions of Atmos Energy and third parties.

We operate the Company through the following three segments:

the natural gas distribution segment, which includes our regulated natural gas distribution and related sales operations,

the regulated transmission and storage segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline Texas Division and

the nonregulated segment, which includes our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

2. Unaudited Financial Information

These consolidated interim-period financial statements have been prepared in accordance with accounting principles generally accepted in the United States on the same basis as those used for the Company s audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. In the opinion of management, all material adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been made to the unaudited consolidated interim-period financial statements. These consolidated interim-period financial statements are condensed as permitted by the instructions to Form 10-Q and should be read in conjunction with the audited consolidated financial statements of Atmos Energy Corporation included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. Because of seasonal and other factors, the results of operations for the six-month period ended March 31, 2013 are not indicative of our results of operations for the full 2013 fiscal year, which ends September 30, 2013.

We have evaluated subsequent events from the March 31, 2013 balance sheet date through the date these financial statements were filed with the Securities and Exchange Commission (SEC). On April 1, 2013, we completed the sale of our Georgia natural gas distribution assets. Except as discussed in Note 6, no events have occurred subsequent to the balance sheet date that would require recognition or disclosure in the condensed consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Significant accounting policies

Our accounting policies are described in Note 2 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012.

During the second quarter of fiscal 2013, we completed our annual goodwill impairment assessment. Based on the assessment performed, we determined that our goodwill was not impaired.

Due to the April 1, 2013 sale of our Georgia distribution operations, at March 31, 2013, the financial results for this service area are shown in discontinued operations. Accordingly, certain prior-year amounts have been reclassified to conform with the current-year presentation.

During the six months ended March 31, 2013, two new accounting standards were announced that will become applicable to the Company in future periods. The first standard clarifies the enhanced disclosure of offsetting arrangements for financial instruments that will become effective for us for annual and interim periods beginning on October 1, 2013. The second standard, which became effective during our second fiscal quarter, requires the presentation of amounts reclassified out of accumulated other comprehensive income by component as well as significant amounts reclassified out of accumulated other comprehensive income by the respective line item in the statement of net income. We have presented the disclosures relating to reclassifications out of accumulated other comprehensive income in Note 4. The adoption of these standards should not have an impact on our financial position, results of operations or cash flows. There were no other significant changes to our accounting policies during the six months ended March 31, 2013.

Regulatory assets and liabilities

Accounting principles generally accepted in the United States require cost-based, rate-regulated entities that meet certain criteria to reflect the authorized recovery of costs due to regulatory decisions in their financial statements. As a result, certain costs are permitted to be capitalized rather than expensed because they can be recovered through rates. We record certain costs as regulatory assets when future recovery through customer rates is considered probable. Regulatory liabilities are recorded when it is probable that revenues will be reduced for amounts that will be credited to customers through the ratemaking process. Substantially all of our regulatory assets are recorded as a component of deferred charges and other assets and substantially all of our regulatory liabilities are recorded as a component of deferred credits and other liabilities. Deferred gas costs are recorded either in other current assets or liabilities and the regulatory cost of removal obligation is reported separately.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Significant regulatory assets and liabilities as of March 31, 2013 and September 30, 2012 included the following:

	March 31, 2013	•	tember 30, 2012
	(In the	ousands)	
Regulatory assets:			
Pension and postretirement benefit costs ⁽¹⁾	\$289,003	\$	296,160
Merger and integration costs, net	5,502		5,754
Deferred gas costs	525		31,359
Regulatory cost of removal asset	10,183		10,500
Rate case costs	6,256		4,661
Deferred franchise fees	265		2,714
Texas Rule 8.209 ⁽²⁾	14,912		5,370
APT annual adjustment mechanism	4,965		4,539
Other	5,716		7,262
	\$ 337,327	\$	368,319
	Ψ 331,321	Ψ	300,317
Regulatory liabilities:			
Deferred gas costs	\$ 43,112	\$	23,072
Deferred franchise fees	2,943		
Regulatory cost of removal obligation	433,617		459,688
Other	5,429		5,637
	\$ 485,101	\$	488,397

The amounts above do not include regulatory assets and liabilities related to our Georgia operations, which are classified as assets held for sale as discussed in Note 6.

Currently authorized rates do not include a return on certain of our merger and integration costs; however, we recover the amortization of these costs. Merger and integration costs, net, are generally amortized on a straight-line basis over estimated useful lives ranging up to 20 years.

3. Financial Instruments

We use financial instruments to mitigate commodity price risk and interest rate risk. The objectives and strategies for using financial instruments have been tailored to our regulated and nonregulated businesses. The accounting for these financial instruments is fully described in Note 2 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. During the six months ended March 31, 2013 there were no changes in our objectives, strategies and accounting for these financial instruments. Currently, we utilize financial instruments in our natural gas distribution and nonregulated segments. We currently do not manage commodity price risk with financial instruments in our regulated transmission and storage segment.

⁽¹⁾ Includes \$13.5 million and \$7.6 million of pension and postretirement expense deferred in our Texas service areas pursuant to the Texas Gas Utility Regulatory Act.

⁽²⁾ Texas Rule 8.209 is a Railroad Commission rule that allows for the deferral of all expenses associated with capital expenditures incurred pursuant to this rule, including the recording of interest on the deferred expenses until the next rate proceeding (rate case or annual rate filing) at which time investment and costs would be recovered through base rates.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our financial instruments do not contain any credit-risk-related or other contingent features that could cause payments to be accelerated when our financial instruments are in net liability positions.

Regulated Commodity Risk Management Activities

Although our purchased gas cost adjustment mechanisms essentially insulate our natural gas distribution segment from commodity price risk, our customers are exposed to the effects of volatile natural gas prices. We manage this exposure through a combination of physical storage, fixed-price forward contracts and financial instruments, primarily over-the-counter swap and option contracts, in an effort to minimize the impact of natural gas price volatility on our customers during the winter heating season.

Our natural gas distribution gas supply department is responsible for executing this segment s commodity risk management activities in conformity with regulatory requirements. In jurisdictions where we are permitted to mitigate commodity price risk through financial instruments, the relevant regulatory authorities may establish the level of heating season gas purchases that can be hedged. Historically, if the regulatory authority does not establish this level, we seek to hedge between 25 and 50 percent of anticipated heating season gas purchases using financial instruments. For the 2012-2013 heating season (generally October through March), in the jurisdictions where we are permitted to utilize financial instruments, we hedged approximately 33 percent, or 22.8 Bcf of the winter flowing gas requirements. We have not designated these financial instruments as hedges for accounting purposes.

The costs associated with and the gains and losses arising from the use of financial instruments to mitigate commodity price risk are included in our purchased gas cost adjustment mechanisms in accordance with regulatory requirements. Therefore, changes in the fair value of these financial instruments are initially recorded as a component of deferred gas costs and recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue in accordance with applicable authoritative accounting guidance. Accordingly, there is no earnings impact on our natural gas distribution segment as a result of the use of financial instruments.

Nonregulated Commodity Risk Management Activities

Our nonregulated operations aggregate and purchase gas supply, arrange transportation and/or storage logistics and ultimately deliver gas to our customers at competitive prices. To provide these services, we utilize proprietary and customer-owned transportation and storage assets to provide the various services our customers request. In an effort to offset the demand fees paid to contract for storage capacity and to maximize the value of this capacity, AEH sells financial instruments to earn a gross profit margin through the arbitrage of pricing differences in various locations and by recognizing pricing differences that occur over time.

As a result of these activities, our nonregulated segment is exposed to risks associated with changes in the market price of natural gas. We manage our exposure to such risks through a combination of physical storage and financial instruments, including futures, over-the-counter and exchange traded options and swap contracts with counterparties. Future contracts provide the right, but not the obligation, to buy or sell the commodity at a fixed price. Option contracts provide the right, but not the requirement, to buy or sell the commodity at a fixed price. Swap contracts require receipt of payment for the commodity based on the difference between a fixed price and the market price on the settlement date.

We use financial instruments, designated as cash flow hedges of anticipated purchases and sales at index prices, to mitigate the commodity price risk in our nonregulated operations associated with deliveries under fixed-priced forward contracts to deliver gas to customers. These financial instruments have maturity dates ranging from one to 57 months. We use financial instruments, designated as fair value hedges, to hedge our natural gas inventory used in asset optimization activities in our nonregulated segment.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our nonregulated operations also use storage swaps and futures to capture additional storage arbitrage opportunities that arise subsequent to the execution of the original fair value hedge associated with our physical natural gas inventory, basis swaps to insulate and protect the economic value of our fixed price and storage books and various over-the-counter and exchange-traded options. These financial instruments have not been designated as hedges for accounting purposes.

Interest Rate Risk Management Activities

We have periodically managed interest rate risk by entering into financial instruments to fix the Treasury yield component of the interest cost associated with anticipated financings. Prior to fiscal 2012, we used Treasury locks to mitigate interest rate risk; however, beginning in the fourth quarter of fiscal 2012 we started utilizing interest rate swaps and forward starting interest rate swaps to manage this risk.

In August 2011, we entered into three Treasury lock agreements to fix the Treasury yield component of the interest cost associated with \$350 million out of a total \$500 million of senior notes that were issued on January 11, 2013. This offering is discussed in Note 7. We designated these Treasury locks as cash flow hedges. The Treasury locks were settled on January 8, 2013 with a payment of \$66.6 million to the counterparties due to a decrease in the 30-year Treasury lock rates between inception of the Treasury locks and settlement. Because the Treasury locks were effective, the \$66.6 million unrealized loss was recorded as a component of accumulated other comprehensive income and is being recognized as a component of interest expense over the 30-year life of the senior notes.

In the fourth quarter of fiscal 2012, we entered into an interest rate swap to fix the LIBOR component of our \$260 million short-term financing facility that terminated on December 27, 2012. We recorded an immaterial loss upon settlement of the swap, which was recorded as a component of interest expense as we did not designate the interest rate swap as a hedge.

In October 2012, we entered into forward starting interest rate swaps to fix the Treasury yield component associated with the anticipated issuance of \$500 million and \$250 million unsecured senior notes in fiscal 2015 and fiscal 2017, which we designated as cash flow hedges at the time the agreements were executed. Accordingly, unrealized gains and losses associated with the forward starting interest rate swaps are being recorded as a component of accumulated other comprehensive income (loss). When the forward starting interest rate swaps settle, the realized gain or loss will be recorded as a component of accumulated other comprehensive income (loss) and recognized as a component of interest expense over the life of the related financing arrangement. Hedge ineffectiveness to the extent incurred is reported as a component of interest expense.

In prior years, we entered into Treasury lock agreements to fix the Treasury yield component of the interest cost of financing various issuances of long-term debt and senior notes. The gains and losses realized upon settlement of these Treasury locks were recorded as a component of accumulated other comprehensive income (loss) when they were settled and are being recognized as a component of interest expense over the life of the associated notes from the date of settlement. As of March 31, 2013, the remaining amortization periods for the settled Treasury locks extend through fiscal 2043.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Quantitative Disclosures Related to Financial Instruments

The following tables present detailed information concerning the impact of financial instruments on our condensed consolidated balance sheet and income statements.

As of March 31, 2013, our financial instruments were comprised of both long and short commodity positions. A long position is a contract to purchase the commodity, while a short position is a contract to sell the commodity. As of March 31, 2013, we had net long/(short) commodity contracts outstanding in the following quantities:

Contract Type		Hedge Designation	Natural Gas Distribution Nonregulated Quantity (MMcf)
Commodity contracts	Fair Value		(22,490)
	Cash Flow		23,768
	Not designated		5,890 55,387
			5,890 56,665

Financial Instruments on the Balance Sheet

The following tables present the fair value and balance sheet classification of our financial instruments by operating segment as of March 31, 2013 and September 30, 2012. As required by authoritative accounting literature, the fair value amounts below are presented on a gross basis and do not reflect the netting of asset and liability positions permitted under the terms of our master netting arrangements. Further, the amounts below do not include \$12.0 million and \$23.7 million of cash held on deposit in margin accounts as of March 31, 2013 and September 30, 2012 to collateralize certain financial instruments. Therefore, these gross balances are not indicative of either our actual credit exposure or net economic exposure. Additionally, the amounts below will not be equal to the amounts presented on our condensed consolidated balance sheet, nor will they be equal to the fair value information presented for our financial instruments in Note 5.

Hedge ineffectiveness for our nonregulated segment is recorded as a component of unrealized gross profit and primarily results from differences in the location and timing of the derivative instrument and the hedged item. Hedge ineffectiveness could materially affect our results of operations for the reported period. For the three months ended March 31, 2013 and 2012 we recognized a gain (loss) arising from fair value and cash flow hedge ineffectiveness of \$1.7 million and \$(6.2) million. For the six months ended March 31, 2013 and 2012 we recognized gains arising from fair value and cash flow hedge ineffectiveness of \$17.8 million and \$2.2 million. Additional information regarding ineffectiveness recognized in the income statement is included in the tables below.

⁽¹⁾ Other current assets not designated as hedges in our natural gas distribution segment include \$0.1 million related to risk management assets that were classified as assets held for sale at September 30, 2012.

Other current liabilities not designated as hedges in our natural gas distribution segment include \$0.3 million related to risk management liabilities that were classified as liabilities held for sale at September 30, 2012.

Impact of Financial Instruments on the Income Statement

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Fair Value Hedges

The impact of our nonregulated commodity contracts designated as fair value hedges and the related hedged item on our condensed consolidated income statement for the three and six months ended March 31, 2013 and 2012 is presented below.

	Three Months Ended March 31		
	2013	2012 usands)	
Commodity contracts	\$ (17,846)	\$ 29,090	
Fair value adjustment for natural gas inventory designated as the hedged item	19,586	(35,087)	
Total (increase) decrease in purchased gas cost	\$ 1,740	\$ (5,997)	
The (increase) decrease in purchased gas cost is comprised of the following:			
Basis ineffectiveness	\$ 1,458	\$ (739)	
Timing ineffectiveness	282	(5,258)	
	¢ 1.740	\$ (5,997)	
	\$ 1,740	Ψ (3,221)	
	Six Mont	ths Ended	
	Six Mont Mar 2013	ths Ended ch 31 2012	
Commodity contracts	Six Mont Mar 2013 (In tho	ths Ended ch 31	
Commodity contracts Fair value adjustment for natural gas inventory designated as the hedged item	Six Mont Mar 2013	chs Ended ch 31 2012 usands)	
	Six Mont Mar 2013 (In tho \$ (10,532)	ths Ended ch 31 2012 usands) \$ 53,153	
Fair value adjustment for natural gas inventory designated as the hedged item Total decrease in purchased gas cost	Six Mont Mar- 2013 (In tho \$ (10,532) 28,405	ths Ended ch 31 2012 usands) \$ 53,153 (50,335)	
Fair value adjustment for natural gas inventory designated as the hedged item	Six Mont Mar- 2013 (In tho \$ (10,532) 28,405	ths Ended ch 31 2012 usands) \$ 53,153 (50,335)	
Fair value adjustment for natural gas inventory designated as the hedged item Total decrease in purchased gas cost The decrease in purchased gas cost is comprised of the following:	Six Mont Mar 2013 (In tho \$ (10,532) 28,405 \$ 17,873	ths Ended ch 31 2012 usands) \$ 53,153 (50,335) \$ 2,818	

Basis ineffectiveness arises from natural gas market price differences between the locations of the hedged inventory and the delivery location specified in the hedge instruments. Timing ineffectiveness arises due to changes in the difference between the spot price and the futures price, as well as the difference between the timing of the settlement of the futures and the valuation of the underlying physical commodity. As the commodity contract nears the settlement date, spot-to-forward price differences should converge, which should reduce or eliminate the impact of this ineffectiveness on purchased gas cost.

To the extent that the Company s natural gas inventory does not qualify as a hedged item in a fair-value hedge, or has not been designated as such, the natural gas inventory is valued at the lower of cost or market. We did not record a writedown for nonqualifying natural gas inventory for the six months ended March 31, 2013. During the six months ended March 31, 2012, we recorded a \$1.7 million charge to write down nonqualifying natural gas inventory to market.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash Flow Hedges

The impact of cash flow hedges on our condensed consolidated income statements for the three and six months ended March 31, 2013 and 2012 is presented below. Note that this presentation does not reflect the financial impact arising from the hedged physical transaction. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Financial Instruments Not Designated as Hedges

The impact of financial instruments that have not been designated as hedges on our condensed consolidated income statements for the three months ended March 31, 2013 and 2012 was an increase (decrease) in gross profit of \$6.8 million and \$(12.8) million. For the six months ended March 31, 2013 and 2012 gross profit increased (decreased) \$6.7 million and \$(15.0) million. Note that this presentation does not reflect the expected gains or losses arising from the underlying physical transactions associated with these financial instruments. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

As discussed above, financial instruments used in our natural gas distribution segment are not designated as hedges. However, there is no earnings impact on our natural gas distribution segment as a result of the use of these financial instruments because the gains and losses arising from the use of these financial instruments are recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue. Accordingly, the impact of these financial instruments is excluded from this presentation.

4. Accumulated Other Comprehensive Income

We record deferred gains (losses) in accumulated other comprehensive income (AOCI) related to available-for-sale securities, interest rate agreement cash flow hedges and commodity contract cash flow hedges. Deferred gains (losses) for our available-for-sale securities and commodity contract cash flow hedges are recognized in earnings upon settlement, while deferred gains (losses) related to our interest rate agreement cash flow hedges are recognized in earnings as they are amortized. The following table provides the components of our accumulated other comprehensive income (loss) balances, net of the related tax effects allocated to each component of other comprehensive income.

	Available- for-Sale Securities	Interest Rate Agreement Cash Flow Hedges (In tho	Commodity Contracts Cash Flow Hedges ousands)	Total

5. Fair Value Measurements

We report certain assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We record cash and cash equivalents, accounts receivable and accounts payable at

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

carrying value, which substantially approximates fair value due to the short-term nature of these assets and liabilities. For other financial assets and liabilities, we primarily use quoted market prices and other observable market pricing information to minimize the use of unobservable pricing inputs in our measurements when determining fair value. The methods used to determine fair value for our assets and liabilities are fully described in Note 2 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. During the three and six months ended March 31, 2013, there were no changes in these methods.

Fair value measurements also apply to the valuation of our pension and postretirement plan assets. Current accounting guidance requires employers to annually disclose information about fair value measurements of the assets of a defined benefit pension or other postretirement plan. The fair value of these assets is presented in Note 9 to the financial statements in our Annual Report on Form 10-K for the fiscal year ending September 30, 2012.

Quantitative Disclosures

Financial Instruments

The classification of our fair value measurements requires judgment regarding the degree to which market data are observable or corroborated by observable market data. Authoritative accounting literature establishes a fair value hierarchy that prioritizes the inputs used to measure fair value based on observable and unobservable data. The hierarchy categorizes the inputs into three levels, with the highest priority given to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1), with the lowest priority given to unobservable inputs (Level 3). The following tables summarize, by level within the fair value hierarchy, our assets and liabilities that were accounted for at fair value on a recurring basis as of March 31, 2013 and September 30, 2012. Assets and liabilities are categorized in their entirety based on the lowest level of input that is significant to the fair value measurement.

- (1) Our Level 2 measurements consist of over-the-counter options and swaps which are valued using a market-based approach in which observable market prices are adjusted for criteria specific to each instrument, such as the strike price, notional amount or basis differences, municipal and corporate bonds which are valued based on the most recent available quoted market prices and money market funds which are valued at cost.
- (2) This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of March 31, 2013, we had \$12.0 million of cash held in margin accounts to collateralize certain financial instruments. Of this amount, \$8.3 million was used to offset current risk management liabilities under master netting arrangements and the remaining \$3.7 million is classified as current risk management assets.
- (3) This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of September 30, 2012 we had \$23.7 million of cash held in margin accounts to collateralize certain financial instruments. Of this amount, \$5.9 million was used to offset current risk management liabilities under master netting arrangements and the remaining \$17.8 million is classified as current risk management assets.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Available-for-sale securities are comprised of the following:

	Amortized Cost	Gross Unrealized Gain (In tho		Gross Unrealized Loss ousands)		Fair Value	
As of March 31, 2013:							
Domestic equity mutual funds	\$ 17,998	\$	6,656	\$		\$ 24,654	
Foreign equity mutual funds	5,168		1,270			6,438

Foreign equity mutual funds	5,568		682			6,250	
Bonds	22,358		196		(2)	22,552	
Money market funds	1,634					1,634	
	\$ 55,339	\$	9,061	\$	(2)	\$ 64,398	

At March 31, 2013 and September 30, 2012, our available-for-sale securities included \$42.9 million and \$41.8 million related to assets held in separate rabbi trusts for our supplemental executive benefit plans. At March 31, 2013, we maintained investments in bonds that have contractual maturity dates ranging from May 2013 through June 2017. During the six months ended March 31, 2013, we recognized a gain of \$2.7 million on the sale of certain assets in the rabbi trusts.

These securities are reported at market value with unrealized gains and losses shown as a component of accumulated other comprehensive income (loss). We regularly evaluate the performance of these investments on a fund by fund basis for impairment, taking into consideration the fund s purpose, volatility and current returns. If a determination is made that a decline in fair value is other than temporary, the related fund is written down to its estimated fair value and the other-than-temporary impairment is recognized in the income statement.

Other Fair Value Measures

Our debt is recorded at carrying value. The fair value of our debt is determined using third party market value quotations, which are considered Level 1 fair value measurements for debt instruments with a recent, observable trade or Level 2 fair value measurements for debt instruments where fair value is determined using the most recent available quoted market price. The following table presents the carrying value and fair value of our debt as of March 31, 2013:

	March 31,
	2013
	(In thousands)
Carrying Amount	\$ 2,460,000
Fair Value	\$ 2,876,673

6. Discontinued Operations

On April 1, 2013, we completed the sale of substantially all of our natural gas distribution assets and certain related nonregulated assets located in Georgia to Liberty Energy (Georgia) Corp., an affiliate of Algonquin Power & Utilities Corp. for a cash price of approximately \$155 million,

subject to post-closing adjustments. The

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

sale was previously announced on August 8, 2012. In connection with the sale, we expect to recognize a net of tax gain of approximately \$6 million, subject to post-closing adjustments.

As required under generally accepted accounting principles, the operating results of our Georgia operations have been aggregated and reported on the condensed consolidated statements of income as income from discontinued operations, net of income tax. For the three and six months ended March 31, 2013, net income for discontinued operations includes the operating results of our Georgia operations. For the three and six months ended March 31, 2012, net income from discontinued operations includes the operating results of our Georgia operations and the operating results of our Missouri, Illinois and Iowa operations that were sold on August 1, 2012. Expenses related to general corporate overhead and interest expense allocated to their operations are not included in discontinued operations.

The tables below set forth selected financial and operational information related to net assets and operating results related to discontinued operations. Additionally, assets and liabilities related to our Georgia operations are classified as held for sale in other current assets and liabilities in our condensed consolidated balance sheets at March 31, 2013 and September 30, 2012. Prior period revenues and expenses associated with these assets have been reclassified into discontinued operations. This reclassification had no impact on previously reported net income.

The following table presents statement of income data related to discontinued operations.

		Three Months Ended March 31		Six Months Ended March 31		
	2013	2012 (In tho	2013 usands)	2012		
Operating revenues	\$ 21,678	\$ 44,315	\$ 37,962	\$ 84,945

7. Debt

The nature and terms of our debt instruments and credit facilities are described in detail in Note 7 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. Except as noted below, there were no material changes in the terms of our debt instruments during the six months ended March 31, 2013.

Long-term debt

Long-term debt at March 31, 2013 and September 30, 2012 consisted of the following:

	March 31, 2013 (In th	September 30, 2012 ousands)
Unsecured 4.95% Senior Notes, due October 2014	\$ 500,000	\$ 500,000
Unsecured 6.35% Senior Notes, due 2017	250,000	250,000
Unsecured 8.50% Senior Notes, due 2019	450,000	450,000
Unsecured 5.95% Senior Notes, due 2034	200,000	200,000
Unsecured 5.50% Senior Notes, due 2041	400,000	400,000

Current maturities 131

\$ 2,455,514 \$ 1,956,305

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our \$250 million Unsecured 5.125% Senior Notes were originally scheduled to mature in January 2013. On August 28, 2012 we redeemed these notes with proceeds received through the issuance of commercial paper. On September 27, 2012, we entered into a \$260 million short-term financing facility that was scheduled to mature on February 1, 2013 to repay the commercial paper borrowings utilized to redeem the Unsecured 5.125% Senior Notes. The short-term facility was repaid with the proceeds received through the issuance of 30-year unsecured senior notes on January 11, 2013, as discussed below.

We issued \$500 million Unsecured 4.15% Senior Notes on January 11, 2013. The effective interest rate of these notes is 4.64 percent, after giving effect to offering costs and the settlement of the associated Treasury locks discussed in Note 3. Of the net proceeds of approximately \$494 million, \$260 million was used to repay our short-term financing facility. The remaining \$234 million of net proceeds was used to partially repay our commercial paper borrowings and for general corporate purposes.

Short-term debt

Our short-term debt is utilized to fund ongoing working capital needs, such as our seasonal requirements for gas supply, general corporate liquidity and capital expenditures. Our short-term borrowing requirements are affected by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply our customers needs could significantly affect our borrowing requirements. Our short-term borrowings typically reach their highest levels in the winter months.

We currently finance our short-term borrowing requirements through a combination of a \$750 million commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders. On December 7, 2012, we amended the terms of our former \$750 million unsecured credit facility to increase the borrowing capacity to \$950 million, with an accordion feature, which, if utilized, would increase the borrowing capacity to \$1.2 billion. The amendment also permits us to obtain same-day funding on base rate loans. There were no other material changes to the credit facility. These facilities provide approximately \$1.0 billion of working capital funding. At March 31, 2013 and September 30, 2012, a total of \$233.0 million and \$310.9 million was outstanding under our commercial paper program. We also use intercompany credit facilities to supplement the funding provided by these third-party committed credit facilities.

Regulated Operations

We fund our regulated operations as needed, primarily through our commercial paper program and three committed revolving credit facilities with third-party lenders that provide approximately \$989 million of working capital funding, including a five-year \$950 million unsecured facility, a \$25 million unsecured facility and a \$14 million unsecured revolving credit facility, which is used primarily to issue letters of credit. The \$25 million facility was renewed on April 1, 2013. Due to outstanding letters of credit, the total amount available to us under our \$14 million revolving credit facility was \$8.2 million at March 31, 2013.

In addition to these third-party facilities, our regulated operations have a \$500 million intercompany revolving credit facility with AEH, which bears interest at the lower of (i) the Eurodollar rate under the five-year revolving credit facility or (ii) the lowest rate outstanding under the commercial paper program. Applicable state regulatory commissions have approved our use of this facility through December 31, 2013.

Nonregulated Operations

Prior to December 5, 2012, Atmos Energy Marketing, LLC (AEM), which is wholly-owned by AEH, had a three-year \$200 million committed revolving credit facility, expiring in December 2014, with a syndicate of third-party lenders with an accordion feature that could increase AEM s borrowing capacity to \$500 million. The

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

credit facility was primarily used to issue letters of credit and, on a less frequent basis, to borrow funds for gas purchases and other working capital needs. This facility was collateralized by substantially all of the assets of AEM and was guaranteed by AEH. AEM terminated the committed revolving credit facility on December 5, 2012, primarily in order to reduce external credit expense. AEM incurred no penalties in connection with the termination. This facility was replaced with two \$25 million, 364-day bilateral credit facilities, one of which is a committed facility. These facilities are used primarily to issue letters of credit. Due to outstanding letters of credit, the total amount available to us under these bilateral credit facilities was \$36.9 million at March 31, 2013.

AEH has a \$500 million intercompany demand credit facility with AEC. This facility bears interest at a rate equal to the greater of (i) the one-month LIBOR rate plus 3.00 percent or (ii) the rate for AEM s borrowings under its committed credit facility plus 0.75 percent. Applicable state regulatory commissions have approved our use of this facility through December 31, 2013.

Shelf Registration

On March 28, 2013, we filed a registration statement with the SEC to issue, from time to time, up to \$1.75 billion in common stock and/or debt securities available for issuance, which replaces our registration statement that expired on March 31, 2013.

Debt Covenants

The availability of funds under our regulated credit facilities is subject to conditions specified in the respective credit agreements, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in these agreements. We are required by the financial covenants in each of these facilities to maintain, at the end of each fiscal quarter, a ratio of total debt to total capitalization of no greater than 70 percent. At March 31, 2013, our total-debt-to-total-capitalization ratio, as defined in the agreements, was 53 percent. In addition, both the interest margin and the fee that we pay on unused amounts under each of these facilities are subject to adjustment depending upon our credit ratings.

In addition to these financial covenants, our credit facilities and public indentures contain usual and customary covenants for our business, including covenants substantially limiting liens, substantial asset sales and mergers.

Additionally, our public debt indentures relating to our senior notes and debentures, as well as our revolving credit agreements, each contain a default provision that is triggered if outstanding indebtedness arising out of any other credit agreements in amounts ranging from in excess of \$15 million to in excess of \$100 million becomes due by acceleration or is not paid at maturity.

We were in compliance with all of our debt covenants as of March 31, 2013. If we were unable to comply with our debt covenants, we would likely be required to repay our outstanding balances on demand, provide additional collateral or take other corrective actions.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

8. Earnings Per Share

Since we have non-vested share-based payments with a nonforfeitable right to dividends or dividend equivalents (referred to as participating securities), we are required to use the two-class method of computing earnings per share. The Company s non-vested restricted stock units, for which vesting is predicated solely on the passage of time granted under our 1998 Long-Term Incentive Plan, are considered to be participating securities. The calculation of earnings per share using the two-class method excludes income attributable to these participating securities from the numerator and excludes the dilutive impact of those shares from the denominator. Basic and diluted earnings per share for the three and six months ended March 31, 2013 and 2012 are calculated as follows:

	Three Months Ended March 31			Six Months Ende March 31

There were no out-of-the-money stock options excluded from the computation of diluted earnings per share for the three and six months ended March 31, 2013 and 2012 as their exercise price was less than the average market price of the common stock during those periods.

Share Repurchase Program

We did not repurchase any shares during the six months ended March 31, 2013 as part of our 2011 share repurchase program. For the six months ended March 31, 2012, we repurchased and retired 387,991 shares for an aggregate value of \$12.5 million as part of the program.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. Interim Pension and Other Postretirement Benefit Plan Information

The components of our net periodic pension cost for our pension and other postretirement benefit plans for the three and six months ended March 31, 2013 and 2012 are presented in the following table. Most of these costs are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our gas distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

	Three Months Ended March 31				
	Pension 1	Benefits	Other I	Benefits	
	2013	2012	2013	2012	
		(In thous	sands)		
Components of net periodic pension cost:					
Service cost	\$ 5,203	\$ 4,298	\$ 4,700	\$ 4,088	
Interest cost	6,023	6,678	3,241	3,466	
Expected return on assets	(5,738)	(5,369)	(997)	(652)	
Amortization of transition asset			270	378	
Amortization of prior service cost	(36)	(36)	(363)	(363)	
Amortization of actuarial loss	5,562	4,143	1,049	662	
Net periodic pension cost	\$ 11,014	\$ 9,714	\$ 7,900	\$ 7,579	

	Six Months Ended March 31				
	Pension	Benefits	Other I	Benefits	
	2013	2012	2012 2013		
		(In thou	sands)		
Components of net periodic pension cost:					
Service cost	\$ 10,405	\$ 8,596	\$ 9,400	\$ 8,176	
Interest cost	12,048	13,355	6,482	6,931	
Expected return on assets	(11,477)	(10,737)	(1,994)	(1,304)	
Amortization of transition asset			540	756	
Amortization of prior service cost	(71)	(71)	(725)	(725)	
Amortization of actuarial loss	11,123	8,285	2,098	1,324	
Net periodic pension cost	\$ 22,028	\$ 19,428	\$ 15,801	\$ 15,158	

The assumptions used to develop our net periodic pension cost for the three and six months ended March 31, 2013 and 2012 are as follows:

	Pension F	Pension Benefits		enefits
	2013	2012	2013	2012
Discount rate	4.04%	5.05%	4.04%	5.05%
Rate of compensation increase	3.50%	3.50%	N/A	N/A
Expected return on plan assets	7.75%	7.75%	4.70%	4.70%

The discount rate used to compute the present value of a plan s liabilities generally is based on rates of high-grade corporate bonds with maturities similar to the average period over which the benefits will be paid. Generally, our funding policy has been to contribute annually an amount in accordance with the requirements of the

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Employee Retirement Income Security Act of 1974. In accordance with the Pension Protection Act of 2006 (PPA), we determined the funded status of our plans as of January 1, 2013. During the first six months of fiscal 2013, we contributed \$13.4 million to our defined benefit plans and we anticipate contributing approximately \$23 million during the remainder of the fiscal year.

We contributed \$13.2 million to our other post-retirement benefit plans during the six months ended March 31, 2013. We expect to contribute a total of approximately \$10 million to \$15 million to these plans during the remainder of the fiscal year.

10. Commitments and Contingencies

Litigation and Environmental Matters

With respect to the specific litigation and environmental-related matters or claims that were disclosed in Note 13 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012, except as noted below, there were no material changes in the status of such litigation and environmental-related matters or claims during the six months ended March 31, 2013.

Since September 2009, Atmos Energy and two subsidiaries of AEH, Atmos Energy Marketing, LLC (AEM) and Atmos Gathering Company, LLC (AGC) (collectively, the Atmos Entities), have been involved in a lawsuit filed in the Circuit Court of Edmonson County, Kentucky related to our Park City Gathering Project. The dispute which gave rise to the litigation involves the amount of royalties due from a third party producer to landowners (who own the mineral rights) for natural gas produced from the landowners properties. The third party producer was operating pursuant to leases between the landowners and certain investors/working interest owners. The third party producer filed a petition in bankruptcy, which was subsequently dismissed due to the lack of meaningful assets to reorganize or liquidate.

Although certain Atmos Energy companies entered into contracts with the third party producer to gather, treat and ultimately sell natural gas produced from the landowners properties, no Atmos Energy company had a contractual relationship with the landowners or the investors/working interest owners. After the lawsuit was filed, the landowners were successful in terminating for non-payment of royalties the leases related to the production of natural gas from their properties. Subsequent to termination, the investors/working interest owners under such leases filed additional claims against us for the termination of the leases.

During the trial, the landowners and the investors/working interest owners requested an award of compensatory damages plus punitive damages against us. On December 17, 2010, the jury returned a verdict in favor of the landowners and investor/working interest owners and awarded compensatory damages of \$3.8 million and punitive damages of \$27.5 million payable by Atmos Energy and the two AEH subsidiaries.

A hearing was held on February 28, 2011 to hear a number of motions, including a motion to dismiss the jury verdict and a motion for a new trial. The motions to dismiss the jury verdict and for a new trial were denied. However, the total punitive damages award was reduced from \$27.5 million to \$24.7 million. On October 17, 2011, we filed our brief of appellants with the Kentucky Court of Appeals, appealing the verdict of the trial court. The appellees in this case subsequently filed their appellees brief with the Court of Appeals on January 16, 2012, with our reply brief being filed with the Court of Appeals on March 19, 2012. Oral arguments were held in the case on August 27, 2012.

In an opinion handed down on January 25, 2013, the Court of Appeals overturned the \$28.5 million jury verdict returned against the Atmos Entities. In a unanimous decision by a three-judge panel, the Court of Appeals reversed the claims asserted by the landowners and investors/working interest owners. The Court of Appeals concluded that all of such claims that the Atmos Entities appealed should have been dismissed by the trial court as a matter of law. The Court of Appeals let stand the jury verdict on one claim that Atmos Energy and our subsidiaries chose not to appeal, which was a trespass claim. The jury had awarded a total of \$10,000 in

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

compensatory damages to one landowner on that claim. The Court of Appeals vacated all of the other damages awarded by the jury and remanded the case to the trial court for a new trial, solely on the issue of whether punitive damages should be awarded to that landowner and, if so, in what amount.

The investors/working interest owners, on February 25, 2013, and the landowners, on March 19, 2013, each filed with the Supreme Court of Kentucky, separate motions for discretionary review of the opinion of the Court of Appeals. We filed a response to the motion filed by the investors/working owners on March 27, 2013 and are in the process of preparing a response to the landowners motion, which response was filed on April 17, 2013. The decision of the Court of Appeals will not become final until the appellate process is completed. We had previously accrued what we believed to be an adequate amount for the anticipated resolution of this matter and we will continue to maintain this amount in legal reserves until the appellate process in this case has been completed. We continue to believe that the final outcome will not have a material adverse effect on our financial condition, results of operations or cash flows.

In addition, in a related matter, on July 12, 2011, the Atmos Entities filed a lawsuit in the United States District Court, Western District of Kentucky, *Atmos Energy Corporation et al.vs. Resource Energy Technologies, LLC and Robert Thorpe and John F. Charles*, against the third party producer and its affiliates to recover all costs, including attorneys fees, incurred by the Atmos Entities, which are associated with the defense and appeal of the case discussed above as well as for all damages awarded to the plaintiffs in such case against the Atmos Entities. The total amount of damages being claimed in the lawsuit is open-ended since the appellate process and related costs are ongoing. This lawsuit is based upon the indemnification provisions agreed to by the third party producer in favor of Atmos Gathering that are contained in an agreement entered into between Atmos Gathering and the third party producer in May 2009. The defendants filed a motion to dismiss the case on August 25, 2011, with Atmos Energy filing a brief in response to such motion on September 19, 2011. On March 27, 2012 the court denied the motion to dismiss. Since that time, we have continued to be engaged in discovery activities in this case.

We are a party to other litigation and environmental-related matters or claims that have arisen in the ordinary course of our business. While the results of such litigation and response actions to such environmental-related matters or claims cannot be predicted with certainty, we continue to believe the final outcome of such litigation and matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Purchase Commitments

AEH has commitments to purchase physical quantities of natural gas under contracts indexed to the forward NYMEX strip or fixed price contracts. At March 31, 2013, AEH was committed to purchase 95.1 Bcf within one year, 37.6 Bcf within one to three years and 23.4 Bcf after three years under indexed contracts. AEH is committed to purchase 1.3 Bcf within one year and 0.5 Bcf within one to three years under fixed price contracts with prices ranging from \$3.50 to \$6.36 per Mcf. Purchases under these contracts totaled \$327.8 million and \$264.3 million for the three months ended March 31, 2013 and 2012 and \$617.3 million and \$576.4 million for the six months ended March 31, 2013 and 2012.

Our natural gas distribution divisions, except for our Mid-Tex Division, maintain supply contracts with several vendors that generally cover a period of up to one year. Commitments for estimated base gas volumes are established under these contracts on a monthly basis at contractually negotiated prices. Commitments for incremental daily purchases are made as necessary during the month in accordance with the terms of the individual contract.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our Mid-Tex Division maintains long-term supply contracts to ensure a reliable source of gas for our customers in its service area which obligate it to purchase specified volumes at market and fixed prices. The estimated commitments under these contracts as of March 31, 2013 are as follows (in thousands):

2013	\$ 66,443
2014	\$ 66,443 78,398
2015	
2014 2015 2016	
2017	
Thereafter	
	\$ 144,841

Our nonregulated segment maintains long-term contracts related to storage and transportation. The estimated contractual demand fees for contracted storage and transportation under these contracts are detailed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. There were no material changes to the estimated storage and transportation fees for the six months ended March 31, 2013.

Regulatory Matters

In July 2010, the Dodd-Frank Act was enacted, representing an extensive overhaul of the framework for regulation of U.S. financial markets. The Dodd-Frank Act calls for various regulatory agencies, including the SEC and the Commodities Futures Trading Commission (CFTC) to establish rules and regulations for implementation of many of the provisions of the Dodd-Frank Act. The costs of participating in financial markets for hedging certain risks inherent in our business have been increased as a result of the new legislation and related rules and regulations. We also are subject to additional recordkeeping and reporting obligations with regard to certain of our swap transactions. Although the CFTC and SEC have issued a number of required rules and regulations, we expect additional rules and regulations to be adopted, which should provide further clarity regarding the extent of the impact of this legislation on us.

As of March 31, 2013, annual rate filing mechanisms were in progress in Louisiana and the City of Dallas service area in our Mid-Tex Division and infrastructure program filings were in progress for Atmos Pipeline Texas and Georgia. These regulatory proceedings are discussed in further detail below in *Management s Discussion and Analysis Recent Ratemaking Developments*.

11. Concentration of Credit Risk

Information regarding our concentration of credit risk is disclosed in Note 15 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. During the six months ended March 31, 2013, there were no material changes in our concentration of credit risk.

12. Segment Information

As discussed in Note 1 above, we operate the Company through the following three segments:

The natural gas distribution segment, which includes our regulated natural gas distribution and related sales operations,

The regulated transmission and storage segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline Texas Division and

The *nonregulated segment*, which is comprised of our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers in differing regulatory environments. Although our natural gas distribution segment operations are geographically dispersed, they are reported as a single segment as each natural gas distribution division has similar economic characteristics. The accounting policies of the segments are the same as those described in the summary of significant accounting policies found in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. We evaluate performance based on net income or loss of the respective operating units.

Income statements for the three and six month periods ended March 31, 2013 and 2012 by segment are presented in the following tables:

	Natural Gas	Natural Regulated

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of

Atmos Energy Corporation

We have reviewed the condensed consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of March 31, 2013, the related condensed consolidated statements of income and comprehensive income for the three-month and six-month periods ended March 31, 2013 and 2012, and the condensed consolidated statements of cash flows for the six-month periods ended March 31, 2013 and 2012. These financial statements are the responsibility of the Company s management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of September 30, 2012, and the related consolidated statements of income, shareholders—equity, and cash flows for the year then ended, not presented herein, and in our report dated November 12, 2012, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of September 30, 2012, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ ERNST & YOUNG LLP

Dallas, Texas

May 2, 2013

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations INTRODUCTION

The following discussion should be read in conjunction with the condensed consolidated financial statements in this Quarterly Report on Form 10-Q and Management s Discussion and Analysis in our Annual Report on Form 10-K for the year ended September 30, 2012.

Cautionary Statement for the Purposes of the Safe Harbor under the Private Securities Litigation Reform Act of 1995

The statements contained in this Quarterly Report on Form 10-Q may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report are forward-looking statements made in good faith by us and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of our documents or oral presentations, the words anticipate, believe, estimate, expect, forecast, goal, intend, objective, plan, projection, seek, stra are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements relating to our strategy, operations, markets, services, rates, recovery of costs, availability of gas supply and other factors. These risks and uncertainties include the following: our ability to continue to access the credit markets to satisfy our liquidity requirements; the impact of adverse economic conditions on our customers; increased costs of providing pension and postretirement health care benefits and increased funding requirements along with increased costs of health care benefits; market risks beyond our control affecting our risk management activities including market liquidity, commodity price volatility, increasing interest rates and counterparty creditworthiness; regulatory trends and decisions, including the impact of rate proceedings before various state regulatory commissions; possible increased federal, state and local regulation of the safety of our operations; increased federal regulatory oversight and potential penalties; the impact of environmental regulations on our business; the impact of possible future additional regulatory and financial risks associated with global warming and climate change on our business; the concentration of our distribution, pipeline and storage operations in Texas; adverse weather conditions; the effects of inflation and changes in the availability and price of natural gas; the capital-intensive nature of our gas distribution business; increased competition from energy suppliers and alternative forms of energy; the threat of cyber-attacks or acts of cyber-terrorism that could disrupt our business operations and information technology systems; the inherent hazards and risks involved in operating our gas distribution business, natural disasters, terrorist activities or other events and other risks and uncertainties discussed herein, all of which are difficult to predict and many of which are beyond our control. Accordingly, while we believe these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, we undertake no obligation to update or revise any of our forward-looking statements whether as a result of new information, future events or otherwise.

OVERVIEW

Atmos Energy and our subsidiaries are engaged primarily in the regulated natural gas distribution and transportation and storage businesses as well as other nonregulated natural gas businesses. We distribute natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers throughout our six regulated natural gas distribution divisions, which at March 31, 2013 covered service areas located in nine states. In addition, we transport natural gas for others through our regulated distribution and pipeline systems. On April 1, 2013, we completed the divestiture of our natural gas distribution operations in Georgia, representing approximately 64,000 customers.

Through our nonregulated businesses, we provide natural gas management and marketing services to municipalities, other local gas distribution companies and industrial customers primarily in the Midwest and Southeast and natural gas transportation and storage services to certain of our natural gas distribution divisions and to third parties.

As discussed in Note 12, we operate the Company through the following three segments:

the natural gas distribution segment, which includes our regulated natural gas distribution and related sales operations,

the regulated transmission and storage segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline Texas Division and

the nonregulated segment, which includes our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

Our condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States. Preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures of contingent assets and liabilities. We based our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. On an ongoing basis, we evaluate our estimates, including those related to risk management and trading activities, the allowance for doubtful accounts, legal and environmental accruals, insurance accruals, pension and postretirement obligations, deferred income taxes and the valuation of goodwill, indefinite-lived intangible assets and other long-lived assets. Actual results may differ from such estimates.

Our critical accounting policies used in the preparation of our consolidated financial statements are described in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012 and include the following:

Regulation
Unbilled revenue
Financial instruments and hedging activities
Fair value measurements
Impairment assessments
Pencion and other postretirement plans

Contingencies

Our critical accounting policies are reviewed periodically by the Audit Committee. There were no significant changes to these critical accounting policies during the six months ended March 31, 2013.

RESULTS OF OPERATIONS

Atmos Energy Corporation is involved in the distribution, marketing and transportation of natural gas. Accordingly, our results of operations are impacted by the demand for natural gas, particularly during the winter heating season, and the volatility of the natural gas markets. Historically, this generally has resulted in higher operating revenues and net income during the period from October through March of each fiscal year and

lower operating revenues and either lower net income or net losses during the period from April through September of each fiscal year. As a result of the seasonality of the natural gas industry, our second fiscal quarter has historically been our most critical earnings quarter with an average of approximately 56 percent of our consolidated net income having been earned in the second quarter during the three most recently completed fiscal years.

However, we anticipate that rate design changes, implemented upon the completion of our most recent rate cases in our Mid-Tex and West Texas Divisions during the first quarter of fiscal 2013, will change this trend. The rate design approved in these regulatory proceedings includes an increase to the customer base charge and a decrease in the consumption charge applied to customer usage. The effect of this change in rate design allows our

rates to be more closely aligned with the natural gas distribution industry standard rate design. In addition, we anticipate these divisions, which represent approximately 50 percent of the operating income for our natural gas distribution segment, will earn their operating income more ratably over the fiscal year as we are now less dependent on customer consumption. For fiscal 2013, as expected, we experienced a quarter-over-quarter decline in operating income when these rates were implemented. However, we expect this decline to be more than offset by higher operating income during the third and fourth fiscal quarters compared with prior-year periods.

Additionally, the seasonality of our business impacts our working capital differently at various times during the year. Typically, our accounts receivable, accounts payable and short-term debt balances peak by the end of January and then start to decline, as customers begin to pay their winter heating bills. Gas stored underground, particularly in our natural gas distribution segment, typically peaks in November and declines as we utilize storage gas to serve our customers.

We reported net income of \$116.4 million, or \$1.27 per diluted share for the three months ended March 31, 2013 compared with net income of \$109.1 million, or \$1.20 per diluted share in the prior-year quarter. Excluding the impact of unrealized margins, diluted earnings per share decreased \$0.03 compared with the prior-year quarter. During the six months ended March 31, 2013 we earned \$196.9 million or \$2.15 per diluted share, compared with \$177.6 million, or \$1.94 per diluted share in the prior-year period. Excluding the impact of unrealized margins, diluted earnings per share increased \$0.11 compared with the prior-year period. The quarter-over-quarter decrease in net income, excluding unrealized margins, was primarily due to a decrease in natural gas distribution net income resulting primarily from the implementation of the aforementioned rate design changes in our Texas service areas, while the period-over-period increase primarily reflects recent rate increases approved in our regulated transmission and storage segment and improved asset optimization margins in our nonregulated segment, coupled with lower interest expense.

We completed the sale of our Georgia service area on April 1, 2013 to Liberty Energy (Georgia) Corp., an affiliate of Algonquin Power & Utilities Corp. for a cash price of approximately \$155 million. The proposed sale was previously announced on August 8, 2012. In connection with the sale, we expect to recognize a net of tax gain of approximately \$6 million, subject to post-closing adjustments. Accordingly, the results of operations for this service area are shown in discontinued operations for both periods presented. Prior-year results also reflect our Illinois, Iowa and Missouri service areas in discontinued operations. The sale of these three service areas was completed in August 2012. During the six months ended March 31, 2013, discontinued operations generated net income of \$7.2 million, or \$0.08 per diluted share, compared with net income of \$13.2 million, or \$0.14 per diluted share in the prior-year period.

We also took several steps during the six months ended March 31, 2013 to further strengthen our balance sheet and borrowing capability. In December 2012, we amended our \$750 million revolving credit agreement primarily to (i) increase our borrowing capacity to \$950 million while retaining the accordion feature that would allow an increase in borrowing capacity up to \$1.2 billion and (ii) to permit same-day funding on base rate loans. We also terminated Atmos Energy Marketing s \$200 million committed and secured credit facility and replaced this facility with two \$25 million 364-day bilateral facilities, which should result in a decrease in external credit expense incurred in our nonregulated operations. After giving effect to these changes, we have over \$1 billion of working capital funding from four committed revolving credit facilities and one noncommitted revolving credit facility.

On January 11, 2013, we issued \$500 million of 4.15% 30-year unsecured senior notes, which replaced, on a long-term basis, our \$250 million 5.125% 10-year unsecured senior notes we redeemed in August 2012. The net proceeds of approximately \$494 million were used to repay \$260 million outstanding under the short-term financing facility used to redeem our 5.125% senior notes and to partially repay commercial paper borrowings and for general corporate purposes.

Consolidated Results

The following table presents our consolidated financial highlights for the three and six months ended March 31, 2013 and 2012:

	Three Months Ended March 31			Six Months Ended March 31			ided	
		2013		2012		2013		2012

Natural Gas Distribution Segment

The primary factors that impact the results of our natural gas distribution operations are our ability to earn our authorized rates of return, the cost of natural gas, competitive factors in the energy industry and economic conditions in our service areas.

Our ability to earn our authorized rates of return is based primarily on our ability to improve the rate design in our various ratemaking jurisdictions by reducing or eliminating regulatory lag and, ultimately, separating the recovery of our approved margins from customer usage patterns. Improving rate design is a long-term process and is further complicated by the fact that we operate in multiple rate jurisdictions.

Seasonal weather patterns can also affect our natural gas distribution operations. However, the effect of weather that is above or below normal is substantially offset through weather normalization adjustments, known as WNA, which has been approved by state regulatory commissions for approximately 96 percent of our residential and commercial meters in the following states for the following time periods:

Kansas, West Texas	October May
Kentucky, Mississippi, Tennessee, Mid-Tex	November April
Louisiana	December March
Virginia	January December

Our natural gas distribution operations are also affected by the cost of natural gas. The cost of gas is passed through to our customers without markup. Therefore, increases in the cost of gas are offset by a corresponding increase in revenues. Accordingly, we believe gross profit is a better indicator of our financial performance than revenues. However, gross profit in our Texas and Mississippi service areas does include franchise fees and gross receipts taxes, which are calculated as a percentage of revenue (inclusive of gas costs). Therefore, the amount of these taxes included in revenues is influenced by the cost of gas and the level of gas sales volumes. We record the associated tax expense as a component of taxes, other than income. Although changes in these revenue-related taxes arising from changes in gas costs affect gross profit, over time the impact is offset within operating income.

As discussed above, the cost of gas typically does not have a direct impact on our gross profit. However, higher gas costs mean higher bills for our customers, which may adversely impact our accounts receivable collections, resulting in higher bad debt expense and may require us to increase borrowings under our credit facilities resulting in higher interest expense. In addition, higher gas costs, as well as competitive factors in the industry and general economic conditions may cause customers to conserve or, in the case of industrial consumers, to use alternative energy sources. However, gas cost risk has been mitigated in recent years through improvements in rate design that allow us to collect from our customers the gas cost portion of our bad debt expense on approximately 75 percent of our residential and commercial margins.

As discussed above, on April 1, 2013, we completed the sale of substantially all of our natural gas distribution operations in Georgia. Prior-year results also reflect our Illinois, Iowa and Missouri service areas in discontinued operations. The results of these operations have been separately reported in the following tables as discontinued operations and exclude general corporate overhead and interest expense that would normally be allocated to these operations.

During the first six months of fiscal 2013, we completed ten regulatory proceedings, which should result in a \$66.4 million increase in annual operating income. The majority of this rate increase related to our Mid-Tex Division, where rates became effective January 1, 2013. The rate design approved in our Mid-Tex Division and West Texas Division regulatory proceedings includes an increase to the base customer charge and a decrease in the commodity charge applied to customer consumption. The effect of this change in rate design allows the Company s rates to be more closely aligned with utility industry standard rate design. In addition, we anticipate these divisions will earn their operating income more ratably over the fiscal year as we are now less dependent on customer consumption. Therefore, we anticipate operating income earned during the first and second fiscal quarters to be lower than in previous periods while operating income earned during the third and fourth fiscal quarters to be higher than in previous periods. For fiscal 2013, as expected, we experienced a quarter-over-quarter decline in operating income when these rates became effective. However, we expect this decline to be more than offset by higher operating income during the third and fourth fiscal quarters compared with the prior-year periods.

Three Months Ended March 31, 2013 compared with Three Months Ended March 31, 2012

Financial and operational highlights for our natural gas distribution segment for the three months ended March 31, 2013 and 2012 are presented below.

	Three Months Ended March 31 2013 2012 Chang				
	2013	Change vise noted)			
Gross profit	\$ 347,006	\$ 372,328	\$ (25,322)		
Operating expenses	186,567	188,967	(2,400)		
Operating income	160,439	183,361	(22,922)		
Miscellaneous income	2,591	623	1,968		
Interest charges	25,664	28,816	(3,152)		
Income from continuing operations before income taxes	137,366	155,168	(17,802)		
Income tax expense	51,176	60,693	(9,517)		
T	06.100	04.475	(0.205)		
Income from continuing operations	86,190	94,475	(8,285)		
Income from discontinued operations, net of tax	4,085	7,027	(2,942)		
Net income	\$ 90,275	\$ 101,502	\$ (11,227)		
Consolidated natural gas distribution sales volumes from continuing operations MMcf	120,123	101,420	18,703		
Consolidated natural gas distribution transportation volumes from continuing operations MMcf	36,540	36,241	299		
Consolidated natural gas distribution throughput from continuing operations MMcf	156,663	137,661	19,002		
Consolidated natural gas distribution throughput from discontinued operations MMcf	2,674	7,233	(4,559)		
Total consolidated natural gas distribution throughput MMcf	159,337	144,894	14,443		
Consolidated natural gas distribution average transportation revenue per Mcf Consolidated natural gas distribution average cost of gas per Mcf sold	\$ 0.47 \$ 4.67	\$ 0.43 \$ 4.94	\$ 0.04 \$ (0.27)		

The \$22.9 million quarter-over-quarter decrease in natural gas distribution operating income primarily reflects the impact of the rate design changes implemented in the Mid-Tex and West Texas divisions, which was the primary driver of the \$25.3 million decrease in gross profit.

The decreases were partially offset by a \$2.4 million decrease in operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense and taxes, other than income, primarily due to the following:

- \$3.3 million decrease in depreciation expense due to new depreciation rates approved in the most recent Mid-Tex rate case that went into effect in January 2013.
- \$2.4 million gain realized on the sale of certain investments.
- \$0.4 million decrease in taxes, other than income.

These decreases in operating expense were partially offset by a \$3.6 million increase in expenses associated with line locate activities.

Miscellaneous income increased \$2.0 million, primarily due to the completion of a periodic review of our performance based rate (PBR) mechanism in our Tennessee service area and the implementation of a new PBR program in our Mississippi Division.

Interest charges decreased \$3.2 million, primarily from interest deferrals associated with our infrastructure spending activities in Texas.

The following table shows our operating income from continuing operations by natural gas distribution division, in order of total rate base, for the three months ended March 31, 2013 and 2012. The presentation of our natural gas distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

Six Months Ended March 31, 2013 compared with Six Months Ended March 31, 2012

Financial and operational highlights for our natural gas distribution segment for the six months ended March 31, 2013 and 2012 are presented below.

	Six Months Ended March 31				
	2013	2012 ands, unless otherw	Change		
Gross profit	\$ 626,637	\$ 655,923	\$ (29,286)		
Operating expenses	357,114	369,137	(12,023)		
Operating income	269,523	286,786	(17,263)		
Miscellaneous income (expense)	2,460	(1,274)	3,734		
Interest charges	49,227	56,955	(7,728)		
	222 757	220 557	(5.001)		
Income from continuing operations before income taxes	222,756	228,557	(5,801)		
Income tax expense	83,473	89,581	(6,108)		
Income from continuing operations	139,283	138,976	307		
Income from discontinued operations, net of tax	7,202	13,150	(5,948)		
income from discontinued operations, net of tax	7,202	15,150	(5,940)		
Net income	\$ 146,485	\$ 152,126	\$ (5,641)		
Consolidated natural gas distribution sales volumes from continuing operations MMcf	198,876	184,787	14,089		
Consolidated natural gas distribution transportation volumes from continuing operations MMcf	69,429	68,518	911		
Consolidated natural gas distribution throughput from continuing operations MMcf	268,305	253,305	15,000		
Consolidated natural gas distribution throughput from discontinued operations MMcf	4,731	13,337	(8,606)		
Total consolidated natural gas distribution throughput MMcf	273,036	266,642	6,394		
Consolidated natural gas distribution average transportation revenue per Mcf	\$ 0.46	\$ 0.44	\$ 0.02		
Consolidated natural gas distribution average cost of gas per Mcf sold	\$ 4.77	\$ 4.87	\$ (0.10)		

The \$17.3 million period-over-period decrease in natural gas distribution operating income primarily reflects the impact of the rate design changes implemented in the Mid-Tex and West Texas divisions. The impact of these rate design changes decreased gross profit by \$31.1 million. Additionally, gross profit was \$2.6 million lower than the prior-year period due to a decrease in revenue-related taxes in our Mid-Tex and West Texas divisions due to lower revenues on which the tax is calculated.

These decreases were partially offset by a \$12.0 million decrease in operating expenses, primarily due to the following:

- \$5.8 million decrease in legal and other administrative costs.
- \$3.2 million decrease in depreciation expense due to new depreciation rates approved in the most recent Mid-Tex rate case that went into effect in January 2013.
- \$2.4 million gain realized on the sale of certain investments.

Miscellaneous income increased \$3.7 million, primarily due to the aforementioned increases associated with our PBR programs in our Tennessee and Mississippi service areas.

Interest charges decreased \$7.7 million, primarily from interest capitalized related to Rule 8.209 infrastructure spending and the early redemption of the 5.125% \$250 million senior notes in August 2012.

The following table shows our operating income from continuing operations by natural gas distribution division, in order of total rate base, for the six months ended March 31, 2013 and 2012. The presentation of our natural gas distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

Recent Ratemaking Developments

Significant ratemaking developments that occurred during the six months ended March 31, 2013 are discussed below. The amounts described below represent the operating income that was requested or received in each rate filing, which may not necessarily reflect the stated amount referenced in the final order, as certain operating costs may have changed as a result of a commission s or other governmental authority s final ruling.

Annual net operating income increases totaling \$66.4 million resulting from ratemaking activity became effective in the six months ended March 31, 2013 as summarized below:

	Annu	ial Increase
Rate Action	1	to perating Income thousands)
Rate case filings	\$	56,700
Infrastructure programs		4,206
Annual rate filing mechanisms		4,184
Other rate activity		1,322
	\$	66,412

Additionally, the following ratemaking efforts were in progress during the second quarter of fiscal 2013 but had not been completed as of March 31, 2013.

Division	Rate Action	Jurisdiction	Operating Income Requested (In thousands)	
Mid-Tex	DARR	City of Dallas	\$	2,883
Louisiana	Rate Stabilization Clause ⁽¹⁾	TransLa		2,730
Louisiana	Rate Stabilization Clause	LGS		1,570
Kentucky/Mid-States	Infrastructure Replacement(2)	Georgia		1,013

\$ 8,196

- (1) In March 2013, the Company accepted the Staff s recommended adjustments and implemented an increase of \$2.3 million on April 1, 2013.
- On April 1, 2013, we completed the sale of our Georgia operations to Liberty Energy (Georgia) Corp., an affiliate of Algonquin Power & Utilities Corp., who assumed responsibility of the docket on April 1, 2013. Any increase in operating income awarded by the Commission will be included in Liberty Energy s future results of operations.

Rate Case Filings

A rate case is a formal request from Atmos Energy to a regulatory authority to increase rates that are charged to our customers. Rate cases may also be initiated when the regulatory authorities request us to justify our rates. This process is referred to as a show cause action. Adequate rates are intended to provide for recovery of the Company s costs as well as a fair rate of return to our shareholders and ensure that we continue to deliver reliable, reasonably priced natural gas service to our customers. The following table summarizes the rate cases that were completed during the six months ended March 31, 2013.

Division	State	0	se in Annual perating Income thousands)	Effective Date
2013 Rate Case Filings:				
Mid-Tex	Texas	\$	42,601	12/04/2012
Kentucky/Mid-States	Tennessee		7,530	11/08/2012
West Texas	Texas		6,569	10/01/2012
Total 2013 Rate Case Filings		\$	56,700	

Infrastructure Programs

Infrastructure programs such as the Gas Reliability Infrastructure Program (GRIP) allow natural gas distribution companies the opportunity to include in their rate base annually approved capital costs incurred in the prior calendar year. As of March 31, 2013, we had infrastructure programs approved in Texas, Kansas, Colorado, Kentucky, Virginia and Georgia. The following table summarizes our infrastructure program filings with effective dates occurring during the six months ended March 31, 2013.

Division	Period End	No	eremental et Utility Plant vestment chousands)	A Op In	erease in Annual Derating Income Housands)	Effective Date
2013 Infrastructure Programs:						
Colorado-Kansas Kansas	09/2012	\$	5,376	\$	601	01/09/2013
Kentucky/Mid-States Georgia	09/2011		6,519		1,079	10/01/2012
Kentucky/Mid-States Kentucky	09/2013		19,296		2,425	10/01/2012
Kentucky/Mid-States Virginia	09/2013		756		101	10/01/2012
Total 2013 Infrastructure Programs		\$	31,947	\$	4,206	

Annual Rate Filing Mechanisms

As an instrument to reduce regulatory lag, annual rate filing mechanisms allow us to refresh our rates on a periodic basis without filing a formal rate case. However, these filings still involve discovery by the appropriate regulatory authorities prior to the final determination of rates under these mechanisms. As of March 31, 2013 we had annual rate filing mechanisms in our Louisiana, Georgia and Mississippi service areas and in a portion of our Mid-Tex Division. These mechanisms are referred to as the Dallas annual rate review (DARR) in our Mid-Tex

Division, stable rate filings in the Mississippi Division, Georgia rate adjustment mechanism in our Kentucky/Mid-States Division and a rate stabilization clause in the Louisiana Division. We have initiated discussions regarding a new rate review mechanism processes in our West Texas and Mid-Tex Divisions and expect to file under the new mechanism in fiscal 2013. The following annual rate filing mechanism was completed during the six months ended March 31, 2013.

Division	Jurisdiction	Test Year Ended	Additional Annual Operating Income (In thousands)	Effective Date
2013 Filings:				
Kentucky/Mid-States	Georgia	09/30/2013	\$ 743	02/01/2013
Mississippi	Mississippi	06/30/2012	3,441	11/01/2012
Total 2013 Filings			\$ 4,184	

Other Ratemaking Activity

The following table summarizes other ratemaking activity during the six months ended March 31, 2013:

Division	Jurisdiction	Rate Activity	Additional Annual Operating Income (In thousands)	Effective Date
2013 Other Rate Activity:				
Colorado-Kansas	Kansas	Ad Valorem ⁽¹⁾	\$ 1,322	02/01/2013
Total 2013 Other Rate Activity			\$ 1,322	

(1) The Ad Valorem filing relates to a collection of property taxes in excess of the amount included in our Kansas service area s base rates. **Regulated Transmission and Storage Segment**

Our regulated transmission and storage segment consists of the regulated pipeline and storage operations of the Atmos Pipeline Texas Division. The Atmos Pipeline Texas Division transports natural gas to our Mid-Tex Division and third parties and manages five underground storage reservoirs in Texas. We also provide ancillary services customary in the pipeline industry including parking arrangements, lending arrangements and sales of excess gas.

Our regulated transmission and storage segment is impacted by seasonal weather patterns, competitive factors in the energy industry and economic conditions in our Mid-Tex service area. Natural gas prices do not directly impact the results of this segment as revenues are derived from the transportation of natural gas. However, natural gas prices and demand for natural gas could influence the level of drilling activity in the markets that we serve, which may influence the level of throughput we may be able to transport on our pipeline. Further, natural gas price differences between the various hubs that we serve could influence customers to transport gas through our pipeline to capture arbitrage gains.

The results of Atmos Pipeline Texas Division are also significantly impacted by the natural gas requirements of the Mid-Tex Division because it is the primary supplier of natural gas for our Mid-Tex Division.

Finally, as a regulated pipeline, the operations of the Atmos Pipeline Texas Division may be impacted by the timing of when costs and expenses are incurred and when these costs and expenses are recovered through its tariffs.

Three Months Ended March 31, 2013 compared with Three Months Ended March 31, 2012

Financial and operational highlights for our regulated transmission and storage segment for the three months ended March 31, 2013 and 2012 are presented below.

	Three Months Ended March 31

Consolidated pipeline transportation volumes MMcf	105,099	109,626	(4,527)

The \$3.0 million increase in regulated transmission and storage operating income compared to the prior-year quarter was primarily a result of the GRIP filing approved by the RRC during fiscal 2012, which authorized an annual operating income increase of \$14.7 million effective April 2012. This increase was partially offset by a \$0.8 million increase in operating expenses largely attributable to increased pipeline maintenance activities.

At March 31, 2013, a GRIP filing was in progress with the RRC in which \$26.7 million of additional annual operating income was requested.

Six Months Ended March 31, 2013 compared with Six Months Ended March 31, 2012

Financial and operational highlights for our regulated transmission and storage segment for the six months ended March 31, 2013 and 2012 are presented below.

	Six	Six Months Ended March 31			
	2013	2012	Change		
	(In thou	isands, unless other	wise noted)		
Mid-Tex transportation	\$ 83,732	\$ 76,457	\$ 7,275

Consolidated pipeline transportation volumes MMcf	213,842	214,663	(821)

The \$6.7 million increase in regulated transmission and storage operating income compared to the prior-year period was primarily a result of the GRIP filing approved by the RRC during fiscal 2012, which authorized an annual operating income increase of \$14.7 million effective April 2012. This increase was partially offset by a \$1.1 million increase in operating expenses largely attributable to increased pipeline maintenance activities.

Nonregulated Segment

Our nonregulated activities are conducted through Atmos Energy Holdings, Inc. (AEH), which is a wholly-owned subsidiary of Atmos Energy Corporation and operates primarily in the Midwest and Southeast areas of the United States.

AEH s primary business is to deliver gas and provide related services by aggregating and purchasing gas supply, arranging transportation and storage logistics and ultimately delivering gas to customers at competitive prices. These activities are reflected as gas delivery and related services in the table below.

AEH also earns storage and transportation margins from (i) utilizing its proprietary 21-mile pipeline located in New Orleans, Louisiana to aggregate gas supply for our regulated natural gas distribution division in Louisiana, its gas delivery activities and, on a more limited basis, for third parties and (ii) managing proprietary storage in Kentucky and Louisiana to supplement the natural gas needs of our natural gas distribution divisions during peak periods. Most of these margins are generated through demand fees established under contracts with certain of our natural gas distribution divisions that are renewed periodically and subject to regulatory oversight. These activities are reflected as storage and transportation services in the table below.

AEH utilizes customer-owned or contracted storage capacity to serve its customers. In an effort to offset the demand fees paid to contract for storage capacity and to maximize the value of this capacity, AEH sells financial instruments in an effort to earn a gross profit margin through the arbitrage of pricing differences in various locations and by recognizing pricing differences that occur over time. Margins earned from these activities and the related storage demand fees are reported as asset optimization margins. Certain of these arrangements are with regulated affiliates, which have been approved by applicable state regulatory commissions.

Our nonregulated activities are significantly influenced by competitive factors in the industry and general economic conditions. Therefore, the margins earned from these activities are dependent upon our ability to attract and retain customers and to minimize the cost of gas and demand fees paid to contract for storage capacity to offer more competitive pricing to those customers.

Further, natural gas market conditions, most notably the price of natural gas and the level of price volatility affect our nonregulated businesses. Natural gas prices and the level of volatility are influenced by a number of factors including, but not limited to, general economic conditions, the demand for natural gas in different parts of the country, the level of domestic natural gas production and the level of natural gas inventory levels.

Natural gas prices can influence:

The demand for natural gas. Higher prices may cause customers to conserve or use alternative energy sources. Conversely, lower prices could cause customers such as electric power generators to switch from alternative energy sources to natural gas.

Collection of accounts receivable from customers, which could affect the level of bad debt expense recognized by this segment.

The level of borrowings under our credit facilities, which affects the level of interest expense recognized by this segment. Natural gas price volatility can also influence our nonregulated business in the following ways:

Price volatility influences basis differentials, which provide opportunities to profit from identifying the lowest cost alternative among the natural gas supplies, transportation and markets to which we have access.

Price volatility also influences the spreads between the current (spot) prices and forward natural gas prices, which creates opportunities to earn higher arbitrage spreads.

Increased volatility impacts the amounts of unrealized margins recorded in our gross profit and could impact the amount of cash required to collateralize our risk management liabilities.

Although natural gas prices have risen somewhat during the last 12 months, the natural gas marketing industry continues to experience compressed basis differentials and lower spot-to-forward price volatility. Accordingly, while we anticipate continuing to profit on a fiscal year basis from our nonregulated activities, we anticipate this segment will continue to represent less than ten percent of our consolidated results.

Our nonregulated segment manages its exposure to natural gas commodity price risk through a combination of physical storage and financial instruments. Therefore, results for this segment include unrealized gains or losses on its net physical gas position and the related financial instruments used to manage commodity price risk. These margins fluctuate based upon changes in the spreads between the physical and forward natural gas prices. Generally, if the physical/financial spread narrows, we will record unrealized gains or lower unrealized losses. If the physical/financial spread widens, we will generally record unrealized losses or lower unrealized gains. The magnitude of the unrealized gains and losses is also contingent upon the levels of our net physical position at the end of the reporting period.

Three Months Ended March 31, 2013 compared with Three Months Ended March 31, 2012

Financial and operating highlights for our nonregulated segment for the three months ended March 31, 2013 and 2012 are presented below.

	Three Months Ended March 31 2013 2012 Chans

Net physical position (Bcf)	20.8	38.0	(17.2)

⁽¹⁾ Net of storage fees of \$3.2 million and \$4.8 million.

Operating income increased \$27.7 million compared to the prior-year quarter, primarily as a result of a \$13.0 million increase in realized margins and a \$15.5 million increase in unrealized margins. The increase in realized margins primarily reflects increased asset optimization margins due to gains realized on the settlement of financial positions during the current-year quarter. In the prior-year quarter, AEH realized losses on the settlement of financial positions as it rolled positions into the fiscal third and fourth quarters of the prior year. Additionally, AEH experienced a \$1.6 million reduction in storage demand fees during the current-year quarter due to renewing storage contracts at current market rates and replacing certain nonstrategic storage capacity contracts with more favorably structured contracts such as park and loan agreements or multi-turn storage contracts.

Realized margins for gas delivery and related services increased \$1.0 million primarily due to an increase in gas delivery per-unit margins from 12.8 cents per Mcf in the prior-year quarter to 13.9 cents per Mcf, partially offset by a two percent decrease in consolidated sales volumes. The increase in per-unit margins reflects enhanced trading opportunities in the cash markets during the current quarter as a result of colder weather that produced price volatility. The decrease in sales volumes is primarily attributable to a decrease in industrial sales volumes due to increased competition.

Unrealized margins increased \$15.5 million, primarily due to favorable market prices in the current quarter that increased the fair value of our physical storage position.

Six Months Ended March 31, 2013 compared with Six Months Ended March 31, 2012

Financial and operational highlights for our nonregulated segment for the six months ended March 31, 2013 and 2012 are presented below.

	Six Months Ended March 31 2013 2012 Char (In thousands, unless otherwise noted)

Operating expenses	16,705	14,904	1,801
Operating income (loss)	30,061	(3,728)	33,789
Miscellaneous income	1,576	603	973
Interest charges	1,295	1,091	204
Income (loss) before income taxes	30,342	(4,216)	34,558
Income tax expense (benefit)	12,572	(1,674)	14,246
Net income (loss)	\$ 17,770	\$ (2,542)	\$ 20,312
Gross nonregulated delivered gas sales volumes MMcf	208,732	218,118	(9,386)
Consolidated nonregulated delivered gas sales volumes MMcf	182,450	190,714	(8,264)
Net physical position (Bcf)	20.8	38.0	(17.2)

(1) Net of storage fees of \$9.2 million and \$9.5 million.

Operating income increased \$33.8 million compared to the prior-year period primarily as a result of an \$18.7 million increase in realized margins and a \$16.8 million increase in unrealized margins. The increase in realized margins primarily reflects higher asset optimization margins.

In the prior-year period, AEH executed a strategy to take advantage of falling natural gas prices by injecting gas into storage to capture incremental physical to forward spread values that were subsequently realized during the fiscal third and fourth quarters of fiscal 2012. As a result, AEH realized significant losses on the settlement of financial positions in the prior-year period. Additionally, realized asset optimization margins for the prior-year period included a \$1.7 million charge to write down to market certain natural gas inventory that no longer qualified for fair value hedge accounting.

In the current-year period, AEH experienced significantly smaller realized losses from its asset optimization activities due to more favorable financial trading as market prices declined less in the current-year period against the execution strategy compared to the prior-year period.

Realized margins for gas delivery, storage and transportation services and other services were flat compared to the prior-year period. The four percent decrease in consolidated sales volumes primarily represents a decrease in industrial sales volumes due to increased competition. The impact of lower sales volumes was offset by an increase in per-unit margins from 11.6 cents per Mcf to 12.1 cents per Mcf. The increase in per-unit margins reflects enhanced trading opportunities in the cash markets as a result of colder weather in the second fiscal quarter of the current year that produced price volatility.

Operating expenses increased \$1.8 million, primarily due to increased employee and contract labor costs.

Miscellaneous income increased \$1.0 million primarily due to a gain realized from the sale of a peaking power facility and related assets during the fiscal first quarter.

Liquidity and Capital Resources

The liquidity required to fund our working capital, capital expenditures and other cash needs is provided from a variety of sources including internally generated funds and borrowings under our commercial paper program and bank credit facilities. Additionally, we have various uncommitted trade credit lines with our gas suppliers that we utilize to purchase natural gas on a monthly basis. Finally, from time to time, we raise funds from the public debt and equity capital markets to fund our liquidity needs.

We regularly evaluate our funding strategy and profile to ensure that we have sufficient liquidity for our short-term and long-term needs in a cost-effective manner. We also evaluate the levels of committed borrowing capacity that we require. As discussed below, we currently have over \$1 billion of capacity from our short-term facilities.

On January 11, 2013, we issued \$500 million of 4.15% 30-year unsecured senior notes, which, in effect, replaced our \$250 million 5.125% 10-year unsecured senior notes we redeemed in August 2012, on a long-term basis. The net proceeds of approximately \$494 million were used to repay \$260 million outstanding under our short-term financing facility used to redeem our 5.125% senior notes and to partially repay commercial paper borrowings and for general corporate purposes, as discussed in Note 7.

We believe the liquidity provided by our senior notes and committed credit facilities, combined with our operating cash flows, will be sufficient to fund our working capital needs and capital expenditure program for the remainder of fiscal 2013.

Cash Flows

Our internally generated funds may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, prices for our products and services, demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks and other factors.

Cash flows from operating, investing and financing activities for the six months ended March 31, 2013 and 2012 are presented below.

	Six I	Six Months Ended March 31			
	2013	2012	Change		
		(In thousands)			
Total cash provided by (used in)					
Operating activities	\$ 376,341	\$ 360,723	\$ 15,618		
Investing activities	(392,817)	(315,001)	(77,816)		
Financing activities	17,784	(130,101)	147,885		
Change in cash and cash equivalents	1,308	(84,379)	85,687		
Cash and cash equivalents at beginning of period	64,239	131,419	(67,180)		
Cash and cash equivalents at end of period	\$ 65,547	\$ 47,040	\$ 18,507		

Cash flows from operating activities

Period-over-period changes in our operating cash flows are primarily attributable to changes in net income and working capital changes, particularly within our natural gas distribution segment resulting from the price of natural gas and the timing of customer collections, payments for natural gas purchases and deferred gas cost recoveries.

For the six months ended March 31, 2013, we generated operating cash flow of \$376.3 million from operating activities compared with \$360.7 million for the six months ended March 31, 2012. The \$15.6 million increase in operating cash flows primarily reflects a \$17.5 million reduction in pension and postretirement contributions made during the current-year period combined with the timing of customer collections and vendor payments, as well as the effect of a decrease in the amount of cash used to inject gas into storage, primarily in our nonregulated segment.

Cash flows from investing activities

In recent years, a substantial portion of our cash resources has been used to fund growth projects, our ongoing construction program and improvements to information technology systems. Our ongoing construction program enables us to enhance the safety and reliability of the systems used to provide natural gas distribution services to our existing customer base, expand our natural gas distribution services into new markets, enhance the integrity of our pipelines and, more recently, expand our intrastate pipeline network. In executing our current regulatory strategy, we are focusing our capital spending in jurisdictions that permit us to earn an adequate return timely on our investment without compromising the safety or reliability of our system. Currently, our Mid-Tex, Louisiana, Mississippi and West Texas natural gas distribution divisions and our Atmos Pipeline Texas Division have rate tariffs that provide the opportunity to include in their rate base approved capital costs on a periodic basis without being required to file a rate case.

Capital expenditures for fiscal 2013 are currently expected to range from \$770 million to \$790 million. For the six months ended March 31, 2013, capital expenditures were \$389.1 million compared with \$311.1 million for the six months ended March 31, 2012. The \$78.0 million increase in capital expenditures primarily reflects infrastructure spending incurred in our natural gas distribution segment and for the Line W and Line WX expansion projects in our regulated transmission and storage segment.

Cash flows from financing activities

For the six months ended March 31, 2013, our financing activities generated \$17.8 million of cash compared with \$130.1 million of cash used in the prior-year period, primarily due to the following:

\$493.8 million net cash proceeds received from the issuance of \$500 million 4.15% 30-year unsecured senior notes on January 11, 2013.

\$12.5 million increase in cash flows due to the absence this year of prior-year common stock repurchases as part of our share repurchase program.

\$2.2 million increase in cash flows due to lower repayments of long-term debt. In the current year, we repaid \$0.1 million of long-term debt compared to \$2.3 million repaid in the prior year.

These increases were partially offset by the following:

\$293.2 million increase in short-term debt repayments. In the current-year period, \$342.1 million of short-term debt was repaid, compared with \$48.9 million in the prior-year period, primarily due to the repayment of a \$260 million short-term financing facility that was repaid with proceeds received through the issuance of 30-year unsecured senior notes on January 11, 2013.

\$66.6 million payment in the current year related to the settlement of three Treasury Locks associated with the issuance of 30-year unsecured senior notes on January 11, 2013.

The following table summarizes our share issuances for the six months ended March 31, 2013 and 2012.

	-	ths Ended rch 31
	2013	2012
Shares issued:		
1998 Long-Term Incentive Plan	385,020	219,712
Outside Directors Stock-for-Fee Plan	1,125	1,204
Total shares issued	386,145	220,916

The year-over-year increase in the number of shares issued primarily reflects the type of awards that were issued from the 1998 Long-Term Incentive Plan in each period. In the current-year period, employees were issued restricted stock units, for which we issued new shares. In the prior-year period, employees were issued restricted stock awards, which were held in trust and did not require the issuance of new shares. For the six months ended March 31, 2013 and 2012, we cancelled and retired 87,931 and 99,555 shares attributable to federal withholdings on equity awards. For the six months ended March 31, 2012, we repurchased and retired 387,991 shares through our 2011 share repurchase program.

Credit Facilities

Our short-term borrowing requirements are affected by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply to meet our customers needs could significantly affect our borrowing requirements. However, our short-term borrowings reach their highest levels in the winter months.

We finance our short-term borrowing requirements through a combination of a \$750.0 million commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders that provide approximately \$1.0 billion of working capital funding. As of March 31, 2013, the amount available to us under our credit facilities, net of outstanding letters of credit, was \$787.1 million.

Shelf Registration

On March 28, 2013, we filed a registration statement with the United States Securities and Exchange Commission to issue, from time to time, up to \$1.75 billion in common stock and/or debt securities available for issuance, which replaces our registration statement that expired on March 31, 2013.

Credit Ratings

Our credit ratings directly affect our ability to obtain short-term and long-term financing, in addition to the cost of such financing. In determining our credit ratings, the rating agencies consider a number of quantitative factors, including debt to total capitalization, operating cash

flow relative to outstanding debt, operating cash flow coverage of interest and pension liabilities and funding status. In addition, the rating agencies consider

qualitative factors such as consistency of our earnings over time, the quality of our management and business strategy, the risks associated with our regulated and nonregulated businesses and the regulatory structures that govern our rates in the states where we operate.

Our debt is rated by three rating agencies: Standard & Poor s Corporation (S&P), Moody s Investors Service (Moody s) and Fitch Ratings, Ltd. (Fitch). As of March 31, 2013, all three ratings agencies maintained a stable outlook. Our current debt ratings are all considered investment grade and are as follows:

	S&P	Moody s	Fitch
Unsecured senior long-term debt	BBB+	Baa1	A-
Commercial paper	A-2	P-2	F-2

A significant degradation in our operating performance or a significant reduction in our liquidity caused by more limited access to the private and public credit markets as a result of deteriorating global or national financial and credit conditions could trigger a negative change in our ratings outlook or even a reduction in our credit ratings by the three credit rating agencies. This would mean more limited access to the private and public credit markets and an increase in the costs of such borrowings.

A credit rating is not a recommendation to buy, sell or hold securities. The highest investment grade credit rating is AAA for S&P, Aaa for Moody s and AAA for Fitch. The lowest investment grade credit rating is BBB- for S&P, Baa3 for Moody s and BBB- for Fitch. Our credit ratings may be revised or withdrawn at any time by the rating agencies, and each rating should be evaluated independently of any other rating. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be lowered, or withdrawn entirely, by a rating agency if, in its judgment, circumstances so warrant.

Debt Covenants

We were in compliance with all of our debt covenants as of March 31, 2013. Our debt covenants are described in greater detail in Note 7 to the unaudited condensed consolidated financial statements.

Capitalization

The following table presents our capitalization inclusive of short-term debt and the current portion of long-term debt as of March 31, 2013, September 30, 2012 and March 31, 2012:

	March 31, 2	013	September 3	0, 2012	March 31,	2012
		(Ir	n thousands, excep	t percentages)	
Short-term debt ⁽¹⁾	\$ 232,998	4.5%	\$ 570,929	11.7%	\$ 173,996	3.7%
Long-term debt	2,455,514	46.9%	1,956,436	40.0%	2,206,344	46.5%
Shareholders equity	2,543,470	48.6%	2,359,243	48.3%	2,360,712	49.8%
Total	\$ 5,231,982	100.0%	\$ 4,886,608	100.0%	\$ 4,741,052	100.0%

⁽¹⁾ Short-term debt at September 30, 2012 included \$260 million outstanding related to a short-term facility we used to redeem our \$250 million 5.125% Senior notes in August 2012. The balance outstanding under this short-term facility was repaid in January 2013.

Total debt as a percentage of total capitalization, including short-term debt, was 51.4 percent at March 31, 2013, 51.7 percent at September 30, 2012 and 50.2 percent at March 31, 2012. Our ratio of total debt to capitalization is typically greater during the winter heating season as we incur short-term debt to fund natural gas purchases and meet our working capital requirements. We intend to maintain our debt to capitalization ratio in a target range of 50 to 55 percent.

Contractual Obligations and Commercial Commitments

Significant commercial commitments are described in Note 10 to the unaudited condensed consolidated financial statements. There were no significant changes in our contractual obligations and commercial commitments during the six months ended March 31, 2013.

Risk Management Activities

We conduct risk management activities through our natural gas distribution and nonregulated segments. In our natural gas distribution segment, we use a combination of physical storage, fixed physical contracts and fixed financial contracts to reduce our exposure to unusually large winter-period gas price increases.

In our nonregulated segment, we manage our exposure to the risk of natural gas price changes and lock in our gross profit margin through a combination of storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. To the extent our inventory cost and actual sales and actual purchases do not correlate with the changes in the market indices we use in our hedges, we could experience ineffectiveness or the hedges may no longer meet the accounting requirements for hedge accounting, resulting in the financial instruments being treated as mark to market instruments through earnings.

The following table shows the components of the change in fair value of our natural gas distribution segment s financial instruments for the three and six months ended March 31, 2013 and 2012:

		Three Months Ended March 31		ns Ended h 31		
	2013	2012	2013	2012		
		(In thousands)				
Fair value of contracts at beginning of period	\$ (64,197)	\$ (85,829)	\$ (76,260)	\$ (79,277)		
Contracts realized/settled	(306)	(13,807)	2,529	(31,537)		
Fair value of new contracts	683	176	1,013	(377)		
Other changes in value	103,946	51,928	112,844	63,659		
Fair value of contracts at end of period	\$ 40,126	\$ (47,532)	\$ 40,126	\$ (47,532)		

The fair value of our natural gas distribution segment s financial instruments at March 31, 2013 is presented below by time period and fair value source:

	Fair Value of Contracts at March 31, 2013 Maturity in Years				
Source of Fair Value	Less Than 1	1-3	4-5	Greater Than 5	Total Fair Value
			in thousand	ds)	
Prices actively quoted	\$ 3,544	\$ 36,582	\$	\$	\$ 40,126
Prices based on models and other valuation methods					
Total Fair Value	\$ 3,544	\$ 36,582	\$	\$	\$ 40,126

The following table shows the components of the change in fair value of our nonregulated segment s financial instruments for the three and six months ended March 31, 2013 and 2012:

	Three Months Ended March 31		Six Montl Marc	
	2013	2012	2013	2012
		(In tho	usands)

Prices based on models and other valuation methods					
Total Fair Value	\$ (8,267)	\$4,310	\$ (62)	\$	\$ (4,019)

Pension and Postretirement Benefits Obligations

For the six months ended March 31, 2013 and 2012, our total net periodic pension and other benefits costs were \$37.8 million and \$34.6 million. A substantial portion of those costs relating to our natural gas distribution operations are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

Our fiscal 2013 costs were determined using a September 30, 2012 measurement date. As of September 30, 2012, interest and corporate bond rates utilized to determine our discount rates were lower than the interest and corporate bond rates as of September 30, 2011, the measurement date for our fiscal 2012 net periodic cost. Accordingly, we decreased our discount rate used to determine our fiscal 2013 pension and benefit costs to 4.04 percent. The expected return on our pension plan assets remained at 7.75 percent, based on historical experience and the current market projection of the target asset allocation. Accordingly, our fiscal 2013 pension and postretirement medical costs for the six months ended March 31, 2013 were higher than the prior-year period.

The amounts with which we fund our defined benefit plans are determined in accordance with the Pension Protection Act of 2006 (PPA) and are influenced by the funded position of the plans when the funding requirements are determined on January 1 of each year. Based upon the most recent evaluation, we anticipate contributing a total of between \$30 million and \$40 million to our defined benefit plans in fiscal 2013. Further, we will consider whether an additional voluntary contribution is prudent to maintain certain PPA funding thresholds. With respect to our postretirement medical plans, we anticipate contributing a total of between \$25 million and \$30 million to these plans during fiscal 2013.

The projected pension liability, future funding requirements and the amount of pension expense or income recognized for the plans are subject to change, depending upon the actuarial value of plan assets in the plans and the determination of future benefit obligations as of each subsequent actuarial calculation date. These amounts will be determined by actual investment returns, changes in interest rates, values of assets in the plans and changes in the demographic composition of the participants in the plans.

OPERATING STATISTICS AND OTHER INFORMATION

The following tables present certain operating statistics for our natural gas distribution, regulated transmission and storage and nonregulated segments for the three and six month periods ended March 31, 2013 and 2012.

Notes to preceding tables:

RECENT ACCOUNTING DEVELOPMENTS

Recent accounting developments and their impact on our financial position, results of operations and cash flows are described in Note 2 to the unaudited condensed consolidated financial statements.

⁽¹⁾ Statistics are shown on a consolidated basis.

⁽²⁾ Sales volumes and revenues reflect segment operations, including intercompany sales and transportation amounts.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding our quantitative and qualitative disclosures about market risk are disclosed in Item 7A in our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. During the six months ended March 31, 2013, there were no material changes in our quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

Management s Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the Company s disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act). Based on this evaluation, the Company s principal executive officer and principal financial officer have concluded that the Company s disclosure controls and procedures were effective as of March 31, 2013 to provide reasonable assurance that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC s rules and forms, including a reasonable level of assurance that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

We did not make any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the second quarter of the fiscal year ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

During the six months ended March 31, 2013, except as noted in Note 10 to the unaudited condensed consolidated financial statements, there were no material changes in the status of the litigation and other matters that were disclosed in Note 13 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2012. We continue to believe that the final outcome of such litigation and other matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 6. Exhibits

A list of exhibits required by Item 601 of Regulation S-K and filed as part of this report is set forth in the Exhibits Index, which immediately precedes such exhibits.
