**Table of Contents**

Mixed Performance, Outlook Confirmed

**Joe Kaeser, President and Chief Executive Officer of Siemens AG**

The second quarter showed that we still have a lot to do to improve our operating performance. Nevertheless we are on course to reach our targets for the fiscal year.

**Financial Highlights:**

Second-quarter revenue was 2% lower year-over-year. On an organic basis, excluding currency translation and portfolio effects, revenue rose 1%.

Orders declined 13% compared to the prior-year period which included a substantially higher volume from large orders. On an organic basis, orders were 10% lower year-over-year. The book-to-bill ratio was 1.06 for the quarter, and Siemens' order backlog reached a new high at 103 billion.

Total Sectors profit rose 16%, to 1.566 billion, highlighted by a strong profit increase in Infrastructure & Cities, and income from continuing operations climbed 19%.

Net income for the second quarter rose 12% year-over-year, to 1.153 billion, and basic earnings per share (EPS) increased to 1.33.

Free cash flow from continuing operations was 1.390 billion, up slightly from 1.360 billion in the second quarter a year earlier.

**Table of Contents**

Siemens 2

**Orders and Revenue****Record backlog, currency translation headwinds continue**

Second-quarter revenue came in 2% lower year-over-year, and orders declined 13% compared to the prior-year period due mainly to a lower volume from large orders. The euro remained strong against nearly all other major currencies compared to a year earlier, which took four percentage points from order development and revenue growth. On a comparable basis, excluding currency and portfolio effects, revenue rose 1% year-over-year and orders declined 10%. The book-to-bill ratio for Siemens overall was 1.06. The order backlog (defined as the sum of the order backlogs of the Sectors) increased to a new high of 103 billion.

**Lower volume from large orders in Europe/CAME**

Orders declined compared to the second quarter a year ago, when Energy won two large offshore wind-farm orders and Infrastructure & Cities took in two major rolling stock orders, all in the region comprising Europe, the Commonwealth of Independent States, Africa and the Middle East (Europe/CAME). Industry delivered solid order growth year-over-year, and Healthcare orders rose slightly on a comparable basis.

While orders fell in Europe/CAME for Energy and Infrastructure & Cities as mentioned above, these two Sectors led double-digit order growth in Asia, Australia. Orders rose moderately in the Americas despite strong negative currency translation effects. Orders in emerging markets declined 10% to 6.129 billion, representing 33% of total orders for the quarter.

**Stable organic revenue supported by emerging markets**

Infrastructure & Cities and Industry posted revenue growth for the second quarter, and Healthcare revenue rose on a comparable basis. Revenue in Energy in the current period fell due to a combination of soft demand and selective order intake in prior periods.

On a geographic basis, revenue rose 3% in Asia, Australia on double-digit growth in China that included all Sectors. Revenue rose in the Americas on a comparable basis. Europe/CAME posted a decline compared to the prior-year period, as a double-digit drop in Energy more than offset double-digit growth in Infrastructure & Cities. Revenue from emerging markets was nearly unchanged year-over-year, accounting for 5.912 billion, or 34%, of total revenue for the quarter. Organic revenue growth in emerging markets was 7%.

---

**Table of Contents**

Siemens 3

**Income and Profit****Strong increase in Total Sectors profit**

Total Sectors profit for the second quarter rose 16% year-over-year, to 1.566 billion, despite burdens on profit from currency effects, which are expected to continue based on the strength of the euro compared to fiscal 2013. Healthcare made the largest contribution to Total Sectors profit, 531 million, including a positive 66 million effect related to the expected sale of a particle therapy installation. Industry took its second-quarter profit up by nearly one-third year-over-year, to 456 million, despite 75 million in charges at a project in the metals technology business. The strongest increase in profit year-over-year came in Infrastructure & Cities, which delivered a solid operating performance. Profit for the Sector climbed to 325 million, up from 6 million a year earlier when the Sector took 161 million in charges related to high-speed rail projects. Profit in Energy fell to 255 million in the second quarter, due mainly to 310 million in project charges primarily including two power transmission projects in Canada. This was partly offset by a 73 million gain

from the sale of a business. For comparison, profit in Energy in the prior-year period was burdened by 84 million in charges related mainly to grid connections to offshore wind-farms in Germany.

In the current period, Total Sectors profit was supported by productivity improvements resulting from the Siemens 2014 program. In the

second quarter a year earlier, Total Sectors profit was burdened by 106 million in Siemens 2014 charges.

**Higher net income driven by Total Sectors profit**

Income from continuing operations for the second quarter rose 19% year-over-year, to 1.163 billion. The increase was due predominantly to higher Total Sectors profit. In addition, income from continuing operations in the current period was supported by a positive contribution from outside the Sectors. Second-quarter net income increased to 1.153 billion, up from 1.030 billion in the same period a year earlier. Corresponding basic EPS rose to 1.33 compared to 1.20 in the prior-year period. Within these numbers, discontinued operations posted a loss of 10 million compared to income of 49 million in the prior-year period, which included 57 million in income from discontinued

operations related to OSRAM.

**Table of Contents**

Siemens 4

**Cash, Return on Capital Employed (ROCE) (adjusted), Pension Funded Status**

**Second-quarter Free cash flow higher year-over-year**

Free cash flow from continuing operations for the second quarter increased modestly to 1.390 billion compared to 1.360 billion a year earlier, even though the current period included cash outflows of 0.2 billion corresponding to charges to income taken for the Siemens 2014 program. The current quarter included cash inflows totaling 0.5 billion from a decrease in operating net working capital, compared to inflows of 0.4 billion in the prior-year period. In the current period the decrease in operating net working capital was due mainly to Energy, which received significant advance payments.

**Higher income lifts ROCE**

On a continuing basis, ROCE (adjusted) for the second quarter increased to 14.7%, up from 12.7% in the same period a year earlier. This increase was due to higher income from continuing operations.

**Pension plan underfunding increases**

The underfunding of Siemens pension plans as of March 31, 2014 amounted to 8.9 billion, compared to an underfunding of 8.0 billion as of December 31, 2013. A substantial decrease in the discount rate assumption and accrued service and interest costs were only partly offset by a positive actual return on plan assets and employer contributions.

---

**Table of Contents**

Sectors 5

**Energy****Higher charges, lower revenue hold back profit**

Results in **Energy** were impacted by substantial project charges in the transmission business, charges related to wind turbines, and lower revenue due to challenging markets. As a result, second-quarter profit fell 54%, to 255 million. The primary factor in the decline was the Power Transmission Division, which took 310 million in project charges related primarily to two high voltage direct current (HVDC) transmission projects in Canada. Wind Power also posted a loss for the quarter, including charges of 48 million for inspecting and replacing defective main bearings in onshore wind turbines. These burdens more than offset higher profit at Power Generation. The prior-year period was burdened by 24 million in charges for the Siemens 2014 productivity improvement program.

Second-quarter revenue declined 11%, reflecting weak order development at Power Generation and selective order intake at Power Transmission in prior quarters. On a geographic basis, the revenue decline came mainly from the Europe/CAME region.

Orders came in 28% below the prior-year period, when a substantially higher volume from large orders included two offshore wind-farm contracts in the Europe/CAME region. To a lesser extent, order development also reflected Energy's challenging market environment, particularly a decrease in demand for large gas turbines. Negative currency translation effects took four percentage points from both revenue and order development during the quarter. The book-to-bill ratio for Energy was 1.09, and its order backlog was 55 billion at the end of the quarter.

**Positive effects lift profit as revenue and orders fall**

Second-quarter profit at **Power Generation** came in at 592 million, benefiting from a 73 million gain on the sale of a turbo fan business and a 56 million effect from a successful project completion in the turnkey business. Second-quarter revenue was down 12% year-over-year on declines in all reporting regions, reflecting weak order development in prior periods due mainly to challenges in gas turbine markets. Orders were down in the current period as well, dropping 20% from the prior-year level, on decreases in Europe/CAME and the Americas.

---

**Table of Contents**

Sectors 6

**Charges, mix effects lead to loss**

The **Wind Power** Division posted a loss of 50 million in the second quarter, due in part to the 48 million in charges mentioned above. Profit development was held back also by an unfavorable business mix that included an unusually low contribution from the higher-margin offshore business compared to the second quarter a year earlier. This was due to lower capacity utilization combined with production costs that were higher than average during the quarter.

Revenue increased 11% as surges in the Americas and Asia, Australia more than offset a decline in Europe/CAME. Order intake was down 49% due to a substantially lower volume from large orders compared to the second quarter a year earlier. That prior-year period included the two wind-farm orders mentioned above as well as a major service contract, all within Europe/CAME.

**Substantial loss on higher project charges**

**Power Transmission** reported a second-quarter loss of 297 million, compared to a loss of 49 million a year earlier. In the current period, the Division took charges totaling 287 million related to the two HVDC projects in Canada mentioned earlier, resulting from revised estimates for civil engineering and infrastructure provided by suppliers as well as penalties for associated project delays, among other factors. Both periods included charges related mainly to grid connections to offshore wind-farms in Germany, totaling 23 million in the current quarter and 84 million in the prior-year quarter. Results were also held back by a high proportion of projects with low or negligible profit margins. Revenue was down 19% year-over-year on declines in all reporting regions, due mainly to selective order intake in the solutions business in prior quarters. In contrast, orders for the second quarter came in higher year-over-year on order growth in Europe/CAME. Other reporting regions posted order declines. The Division expects continuing challenges in coming quarters.

**Table of Contents**

Sectors 7

**Healthcare**

**Organic revenue rises across all businesses**

**Healthcare** reported second-quarter profit of \$531 million, up 19% year-over-year due mainly to a \$66 million positive effect related to the expected sale of a particle therapy installation. For comparison, profit in the prior-year period was held back by \$13 million in charges for the Sector's Agenda 2013 initiative.

Profit at Diagnostics was \$101 million, up from \$84 million in the prior-year period which included \$8 million in Agenda 2013 charges. Purchase price allocation (PPA) effects related to past acquisitions at Diagnostics were \$41 million in the second quarter. A year earlier, Diagnostics recorded \$42 million in PPA effects.

Reported revenue and orders came in below prior-year levels, on declines in the Americas region for both revenue and orders and in the Asia, Australia region for orders. On a comparable basis, primarily excluding negative currency translation effects in these regions, Healthcare revenue rose 5% on broad-based growth among its businesses, and orders increased 1%. The book-to-bill ratio for the Sector was 0.98, and Healthcare's order backlog was \$7 billion at the end of the second quarter.

The Diagnostics business reported revenue of \$937 million in the second quarter, a 3% decrease from \$963 million in the prior-year period due to lower revenue in the Americas region. On a comparable basis, second-quarter revenue for Diagnostics was up 3% year-over-year.

**Table of Contents**

Sectors 8

**Industry**

**Profit higher, short-cycle**

**businesses continue stabilizing**

Second-quarter profit in **Industry** was 456 million, up from 345 million a year ago. For comparison, the prior-year period included 46 million in charges related to the Siemens 2014 productivity improvement program. In the current period, profit development was held back by a loss at the metals technologies business which took 75 million in charges related to a project in the U.S.

Second-quarter revenue came in 1% above the prior-year level, and orders rose 9% year-over-year including a higher volume from large orders. Continuing stabilization in the Sector's short-cycle business supported overall volume growth. Negative currency translation effects took four percentage points from order growth and three percentage points from revenue growth.

On a geographic basis, revenue rose in Asia, Australia due mainly to restocking in China, and in Europe/CAME. Strong negative currency translation effects resulted in a reported decline in the Americas. Order growth came from Europe/CAME and Asia, Australia, driven mainly by Germany and China, respectively. Orders came in lower in the Americas. The Sector's book-to-bill ratio was 1.08 and its order backlog at the end of the quarter was 10 billion.

---

**Table of Contents**

Sectors 9

**Revenue and product mix support profit growth**

Second-quarter profit for **Industry Automation** rose to 316 million, due in part to higher capacity utilization on increased revenue and a more favorable product mix. PPA effects related to LMS International NV (LMS) were 11 million in both the current and prior-year quarter. For comparison, acquisition-related deferred revenue adjustments and inventory step-ups related to LMS totaled 14 million for the prior-year period. PPA effects related to UGS Corp. were 35 million in the current quarter compared to 38 million in the prior-year quarter.

Second-quarter revenue for Industry Automation rose 3% year-over-year on double-digit growth in Asia-Australia, including the restocking in China mentioned above. Orders increased 8% compared to the prior-year quarter, as double-digit growth in Asia, Australia and in Europe/CAME more than offset a decline in the Americas.

**Profit rises, large****orders support growth**

Profit was 210 million at **Drive Technologies** in the second quarter. The increase year-over-year is due mainly to a low basis of comparison in the prior-year period, when the Division took the majority of the Sector's charges for the Siemens 2014 program mentioned above. The program resulted in an improved cost position for the Division in the current quarter, and a stabilizing market environment supported volume growth.

Second-quarter revenue was up 1%, on growth in Europe/CAME. The other reporting regions reported declines, due to negative currency translation effects. Supported by large orders, Europe/CAME and Asia, Australia posted double-digit growth compared to the prior-year period, and orders came in 11% higher for the Division as a whole.

---

**Table of Contents**

Sectors 10

**Infrastructure & Cities****Profit climbs on improvements in execution, mix and productivity**

**Infrastructure & Cities** delivered another strong year-over-year profit improvement in the second quarter. Profit rose to 325 million, with all Businesses contributing to the increase. For comparison, profit of 6 million in the prior-year period included project charges of 161 million related to high-speed trains in the Transportation & Logistics Business. With improved project execution and higher revenue, this Business generated a profit of 126 million in the current quarter. Sector profit development also included a more favorable business mix and productivity improvements from executing the Siemens 2014 program, particularly at Power Grid Solutions & Products and Building Technologies. Sector profit also benefited from a 30 million net effect due to the release of accruals related to Siemens 2014, primarily at Transportation & Logistics. In contrast, the prior-year period was burdened by 23 million in Siemens 2014 charges.

Revenue for Infrastructure & Cities rose 9% year-over-year. The increase was due to the Transportation & Logistics Business, including execution of large rolling-stock projects and the acquisition of Invensys Rail between the periods under review. In contrast, second-quarter revenue for the Sector's other Businesses declined year-over-year, including negative currency translation effects which were particularly strong at Power Grid Solutions & Products. On a geographic basis, double-digit increases in revenue in Europe/CAME and Asia, Australia were partly offset by a decline in the Americas.

Orders for the Sector came in 11% lower compared to the prior-year period, which included a substantially higher volume from major rail orders in Europe/CAME. The order decline in this region more than offset higher orders in Asia, Australia and the Americas in the second quarter. The Sector's book-to-bill ratio was 1.05 and its order backlog at the end of the quarter was 30 billion.

---

**Table of Contents**

Sectors 11

**Profitable growth on  
strong project execution**

**Transportation & Logistics** contributed 126 million to Sector profit in the second quarter, compared to a loss of 156 million a year earlier when the Business took 161 million in project charges related to high-speed trains. PPA effects related to the acquisition of Invensys Rail, which closed in the third quarter of fiscal 2013, were 13 million.

Second-quarter revenue grew more than a third year-over-year, as Transportation & Logistics continued to execute a number of large rolling-stock orders. Due to a substantially higher volume from major orders in the prior-year period, as noted above, orders in the current quarter came in 20% lower year-over-year. Both revenue and orders benefited from the acquisition of Invensys Rail between the periods under review.

**Improved productivity and business mix lifts profit**

Profit at **Power Grid Solutions & Products** rose to 112 million despite lower revenue year-over-year. The increase was due mainly to a more favorable business mix and productivity improvements from executing the Siemens 2014 program. Second-quarter revenue came in 6% lower year-over-year, due to declines in the Americas and Asia, Australia resulting predominately from strong negative currency translation effects.

Europe/CAME reported a moderate revenue increase. Orders were up 3% compared to the prior-year period, driven by a double-digit increase in Europe/CAME. On a comparable basis, primarily excluding currency translation effects, revenue was up 1% and orders rose 9% year-over-year.

**Profit climbs on higher  
productivity, improved mix**

Profit at **Building Technologies** rose to 91 million compared to 59 million in the same period a year earlier. This increase was driven mainly by productivity improvements from successful implementation of the Siemens 2014 program and a more favorable business mix. Revenue declined 4% year-over-year. Orders came in 8% below the prior-year period which included a large order for an energy efficiency project in the U.S. Both revenue and orders were influenced by negative currency translation effects.

**Table of Contents**

Equity Investments and Financial Services 12

**Equity Investments and Financial Services**

**Sharply higher profit contribution from Equity Investments**

In the second quarter, profit at **Equity Investments** rose to 123 million, up from 29 million a year earlier, when profit was burdened by a loss of 62 million related to Siemens' stake in Nokia Siemens Networks B.V. This stake was sold between the periods under review. Beginning with the second quarter of fiscal 2014, we report results related to our stake in Bosch Siemens Hausgeräte GmbH (BSH) in phase with results of Siemens, rather than with the lag of one quarter. Therefore profit for this quarter includes results related to BSH from both the current and previous quarter.

**Growth strategy continues**

**at Financial Services**

**SFS** made a solid contribution to profit in the second quarter, with 114 million in income before income taxes, a modest increase compared to the prior-year period. SFS continued to execute its growth strategy, with increases in total assets leading to higher interest income and associated expenses. In contrast, results related to the equity business came in below the level of the prior-year period. Despite substantial early terminations of financings and negative currency translation effects, total assets rose to 19.385 billion at the end of the quarter, compared to 18.661 billion at the end of fiscal 2013.

## Table of Contents

Corporate Activities and Outlook 13

### Corporate Activities

#### Corporate items and pensions

**Corporate items and pensions** reported a loss of 249 million in the second quarter compared to a loss of 152 million in the same period a year earlier. Within these figures, the loss at Corporate items was 151 million, compared to a loss of 45 million in the same period a year earlier. Results for the current quarter included expenses resulting from changes in the fair value of warrants issued together with US\$3 billion in bonds in fiscal 2012, and negative effects related to legal and regulatory matters. Centrally carried pension expense totaled 97 million in the second quarter, compared to 106 million in the same period a year earlier.

#### Siemens Real Estate

Income before income taxes at **Siemens Real Estate (SRE)** was 18 million in the second quarter, compared to a loss of 2 million in the same period a year earlier. As in the past, income from SRE continues to be highly dependent on disposals of real estate.

#### Improved results from Eliminations, Corporate Treasury and other reconciling items

Income before income taxes from **Eliminations, Corporate Treasury and other reconciling items** was a positive 3 million in the second quarter compared to a negative 25 million in the same period a year earlier. The primary factor in the improvement was higher income from Corporate Treasury activities due mainly to changes in the fair value of interest rate derivatives not qualifying for hedge accounting.

### Outlook

We expect our markets to remain challenging in fiscal 2014. Our short-cycle businesses are not anticipating a sustainable recovery until late in the fiscal year. We expect orders to exceed revenue, for a book-to-bill ratio above 1.

Assuming that revenue on an organic basis remains level year-over-year, we expect basic earnings per share (Net Income) for fiscal 2014 to grow by at least 15% from 5.08 in fiscal 2013.

This outlook is based on shares outstanding of 843 million as of September 30, 2013. Furthermore, it excludes impacts related to legal and regulatory matters.

Financial Publications are available for download at:

[www.siemens.com/ir](http://www.siemens.com/ir) g Publications & Calendar.

This document includes supplemental financial measures that are or may be non-GAAP financial measures. Orders and order backlog; adjusted or organic growth rates of revenue and orders; book-to-bill ratio; Total Sectors profit; return on equity (after tax), or ROE (after tax); return on capital employed (adjusted), or ROCE (adjusted); Free cash flow, or FCF; adjusted EBITDA; adjusted EBIT; adjusted EBITDA margins, earnings effects from purchase price allocation, or PPA effects; net debt and adjusted industrial net debt are or may be such non-GAAP financial measures. These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens' net assets and financial positions or results of operations as presented in accordance with IFRS in its Consolidated Financial Statements.

Other companies that report or describe similarly titled financial measures may calculate them differently. Definitions of these supplemental financial measures, a discussion of the most directly comparable IFRS financial measures, information regarding the usefulness of Siemens' supplemental financial measures, the limitations associated with these measures and reconciliations to the most comparable IFRS financial measures are available on Siemens' Investor Relations website at [www.siemens.com/nonGAAP](http://www.siemens.com/nonGAAP). For additional information, see supplemental financial measures and the related discussion in Siemens' most recent annual report on Form 20-F, which can be found on our Investor Relations website or via the EDGAR system on the website of the United States Securities and Exchange Commission.

Starting today at 8:45 a.m. CEST, the combined semiannual press and analyst conference with Siemens CEO Joe Kaeser and Siemens CFO Dr. Ralf P. Thomas will be broadcast live on the internet. Journalists can follow the conference and the presentation on the internet at [www.siemens.com/pressconference](http://www.siemens.com/pressconference), analysts at [www.siemens.com/analystcall](http://www.siemens.com/analystcall). A recording of the conference will subsequently be available under both links.

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as expect, look forward to, anticipate, intend, plan, believe, seek, estimate, will, pro, similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of

Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements or anticipated on the basis of historical trends. These factors include in particular, but are not limited to, the matters described in Item 3: Key information Risk factors of our most recent annual report on Form 20-F filed with the SEC, in the chapter C.9.3 Risks of our most recent annual report prepared in accordance with the German Commercial Code, and in the chapter C.7 Risks and opportunities of our most recent interim report.

Further information about risks and uncertainties affecting Siemens is included throughout our most recent annual and interim reports, as well as our most recent

earnings release, which are available on the Siemens website, [www.siemens.com](http://www.siemens.com), and throughout our most recent annual report on Form 20-F and in our other filings with the SEC, which are available on the Siemens website, [www.siemens.com](http://www.siemens.com), and on the SEC's website, [www.sec.gov](http://www.sec.gov). Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results, performance or achievements of Siemens may vary materially from those described in the relevant forward-looking statement as being expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

**Investor Relations**

Munich, May 6, 2014

**Ad-hoc Announcement**

**according to § 15 WpHG (Securities Trading Act)**

**Siemens AG adopts Vision 2020**

The Supervisory Board of Siemens AG today has approved the Siemens Vision 2020 as adopted by the Managing Board on May, 5 2014. In the future, Siemens AG will position itself along electrification, automation and digitalization, where it has identified growth fields in which it sees its maximum long-term potential. The company is orienting its resource allocation toward these growth fields and has announced the first concrete measures in this connection.

Siemens is acquiring the Rolls-Royce Energy aero-derivative gas turbine and compressor business and thereby strengthening its position in the growing oil and gas industry as well as in the field of decentralized power generation. The purchase price is £785 million or about 950 million. In addition, as part of the transaction, Siemens will get exclusive access to future Rolls-Royce aero-turbine technology developments in the 4 to 85 megawatt power output range as well as preferred access to supply and engineering services. For this 25 year duration agreement, Siemens will pay Rolls-Royce an additional £200 million, or about 240 million. The transaction is expected to close before the end of December 2014, subject to regulatory approvals. As part of its realignment, Siemens AG is preparing to publicly list its audiology activities.

As of October 1, 2014, the organization will be streamlined by eliminating the Sector level and bundling business into nine Divisions instead of the current 16. In addition, the healthcare business will be separately managed in the future. This will give Healthcare greater flexibility on the medical engineering market, which is characterized by fundamental changes and paradigm shifts. In addition, the company's support functions - for example, human resources and communications - are to be streamlined and centrally managed in the future. These measures, which are expected to increase productivity by some 1 billion a year, are to be fully effective by the end of fiscal 2016. To optimize cost development sustainably, the company has set a new target for total cost productivity. Starting in fiscal 2015, it is to total three to five percent a year.

Munich, May 6, 2014

**Ad-hoc Announcement****according to § 15 WpHG (Securities Trading Act)****Management Board Changes**

As part of its realignment, Siemens AG has named its future management team. The Supervisory Board of Siemens AG has appointed Lisa Davis who is currently Executive Vice President Strategy, Portfolio and Alternative Energies at Royal Dutch Shell to the Managing Board, effective August 1, 2014. Lisa Davis will be responsible on the Managing Board for the Power and Gas Division, the Wind Power and Renewables Division, the Power Generation Services Division, the Region North America and the Region South America. She will be based in the United States. Michael Süß is resigning from the Managing Board with immediate effect, for personal reasons and by mutual consent. He will continue to be available to Siemens President and CEO in a consultative capacity. Until Lisa Davis assumes her position, the Energy Sector will be headed by Randy Zwirn on an acting basis and represented on the Managing Board by Klaus Helmrich.

A number of further changes in business responsibilities on the Managing Board will take effect on October 1, 2014. Klaus Helmrich and Siegfried Russwurm will exchange their current responsibilities: Siegfried Russwurm will be the company's new Chief Technology Officer and Labor Director. He will also be responsible for the Region Middle East and the Region Russia/C.I.S. Klaus Helmrich will be responsible for the Digital Factory Division, the Process Industries and Drives Division, the Region Europe and the Region Africa. Roland Busch will have responsibility for the Building Technologies Division and the newly formed Mobility and Energy Management Divisions and will remain responsible for the Region Asia/Australia. Ralf P. Thomas will head Corporate Services in addition to serving as CFO.

Munich, May 7, 2014

**Siemens Vision 2020**

**Focus on growth fields along the electrification, automation and digitalization**

**Acquisition of Rolls-Royce gas turbine and compressor business, joint venture for Metals Technologies and public listing of audiology set the course**

**New organization with flatter structures Sector level eliminated**

**Greater employee participation in company success Siemens to make up to 400 million available annually depending on company performance**

**Launch of share buyback of up to 4 billion upcoming**

In the future, Siemens AG will position itself along the electrification, automation and digitalization. Along these value chains Siemens has identified several growth fields in which it sees its greatest long-term potential. The company is orienting its resource allocation toward these growth fields and has announced concrete measures in this direction. The measures include the purchase of the major part of Rolls-Royce's energy business and the contribution of Siemens Metals Technologies into a joint venture. A public listing of the audiology business will also be prepared. In addition, Siemens is making its organization flatter and more customer-oriented. This is Siemens Vision 2020.

Our Vision 2020 addresses our company's long-term perspectives along the modern electrification and automation value chains. By expanding share-based employee participation in our company's success, we're creating a sustainable ownership culture at Siemens," said Siemens President and CEO Joe Kaeser.

The company wants to expand its share plans for employees below the senior management level and increase the number of employee shareholders by at least 50 percent to well over 200,000. For this purpose, Siemens will make up to 400 million available annually depending on company performance. In addition, the launch of the previously announced share buyback program of up to 4 billion is upcoming.

Press release

The future focus on electrification, automation and digitalization is the result of the in-depth and extensive analysis begun in August 2013. Siemens has identified the fields where it will be able to achieve long-term growth and high profitability with its products and its unique technological knowhow.

In electrification and automation, Siemens already holds a clear No. 1 position in many markets. The growth fields in these two areas include the markets for small gas turbines and offshore wind turbines, which are profiting from a growing demand for secure and sustainable power supplies. The process industry, for example, offers attractive opportunities that Siemens can leverage even more intensively with its automation and drives solutions. The market for the production of unconventional oil and gas also offers attractive growth potential for Siemens.

Siemens intends to fully exploit the potential of increasing digitalization not just in manufacturing. Utilizing software and simulations, the Digital Factory makes product development considerably faster and more efficient. Data-driven services, software and IT solutions are of decisive importance as they have a substantial influence on all of Siemens future growth fields.

In order to take full advantage of the market potential in these fields, Siemens is realigning its organizational structures. As of October 1, 2014, the organization will be streamlined by eliminating the Sector level and bundling business into nine Divisions instead of the current 16. In addition, Healthcare will be separately managed in the future. This means that regional organization structures can be tailored to the requirements of the healthcare market and do not have to conform to the company's organizational matrix. This will give Healthcare greater flexibility on the medical technologies market, which is characterized by fundamental changes and paradigm shifts. As part of its realignment, Siemens is also preparing the going public of its audiology business.

Bundling the Divisions and eliminating the Sectors will reduce bureaucracy, cut costs and accelerate decision-making within the company. In addition, the company's support functions – for example, human resources and communications – are to be streamlined and centrally managed in the future. These measures, which are expected to increase productivity by some 1 billion a year, are to be fully effective by the end of fiscal 2016. To optimize cost development sustainably, the company has set a new target for total cost productivity. Starting in fiscal 2015, it is to total three to five percent a year.

As of fiscal 2015, the Divisions will be assigned target profit margin ranges excluding ppa – that is, excluding the acquisition-related amortization of intangibles. These target ranges are oriented on the profit margins of each Division's main competitors.

**Siemens AG** (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the fields of industry, energy and healthcare as well as providing infrastructure solutions, primarily for cities and metropolitan areas. For over 165 years, Siemens has stood for technological excellence, innovation, quality, reliability and internationality. The company is one of the world's largest providers of environmental technologies. Around 43 percent of its total revenue stems from green products and solutions. In fiscal 2013, which ended on September 30, 2013, revenue from continuing operations totaled 75.9 billion and income from continuing operations 4.2 billion. At the end of September 2013, Siemens had around 362,000 employees worldwide on the basis of continuing operations. Further information is available on the Internet at: [www.siemens.com](http://www.siemens.com).

**Siemens AG**

Press release

At the Division level, the future Power and Gas Division will include, among other segments, Siemens portfolio for large gas and steam turbines, compressors and gas turbines for distributed power generation. Revenue in fiscal 2013 was an estimated 14 billion. The Division will be headed by Roland Fischer, currently CEO of the Power Generation Division.

The Wind Power and Renewables Division will serve, among other things, the rapidly growing field of onshore and offshore wind power generation. Revenue was roughly 5 billion. Markus Tacke, currently CEO of Wind Power, has been named CEO of the new Division.

The Power Generation Services Division will comprise the service business for the large installed base of Siemens power generation products and will be headed by Randy Zwirn, who is presently CEO of the Energy Service Division. Its business figures will continue to be included in the reporting of the two Divisions named above.

The Energy Management Division will bundle solutions and products for power transmission and distribution as well as technologies for smart grids. Revenue was around 12 billion. The Division will be in the hands of Ralf Christian and Jan Mrosik, who are currently responsible for the Low and Medium Voltage Division and the Smart Grid Division, respectively. Effective May 7, 2014, Jan Mrosik will, under the present Division structure and in addition to his current responsibilities, succeed Karlheinz Springer as head of the Power Transmission Division.

The Building Technologies Division will offer integrated automation solutions and intelligent technologies for buildings and continue to be headed by Johannes Milde. Revenue was approximately 6 billion in fiscal 2013.

The Mobility Division will comprise the company's train technology and rail automation activities in order to address the growth field of Smart Mobility with intelligent and integrated solutions. Revenue was around 7 billion in fiscal 2013. Division CEO will be Jochen Eickholt, who currently heads the Rail Systems Division.

**Table of Contents**

**Siemens AG**

Press release

The Digital Factory Division intends to shape the future of manufacturing by merging the real and digital worlds in the areas of design, production and service. The Division will bundle specialized solutions and technologies for automation systems, industrial switchgear and industry software (PLM) under one roof. Revenue amounts to about 9 billion. The Division will be headed by Anton Huber, who is presently CEO of the Industry Automation Division.

The Process Industries and Drives Division will build on a solid market position in the growth field of process industries. The Division will offer products, systems, applications and solutions for integrated drive technologies and systems. Here, Siemens expects growth impulses by focusing on booming core industries like oil and gas, food and beverages, chemicals and pharmaceuticals. Revenue for the Division amounts to approximately 11 billion. Division CEO will be Peter Herweck, who currently is responsible for the process industries project at Siemens.

Financial Services (SFS), provider of financial solutions for Siemens and outside companies, will continue to be headed by Roland Chalons-Browne.

Healthcare will remain under the leadership of Hermann Requardt, member of the Managing Board of Siemens AG, who will manage this unit as a separate business within Siemens AG in the future.

The company's Corporate Services Information Technology, Corporate Supply Chain Management, Global Shared Services and Siemens Real Estate will be bundled under the management of Hannes Apitzsch, currently CFO of the Infrastructure & Cities Sector.

**Table of Contents**

Munich, May 6, 2014

**Siemens to acquire the Rolls-Royce Energy gas turbine and compressor business and enter into a long-term technology partnership**

**Siemens completes portfolio with aero-derivative gas turbines for growth in the oil and gas and decentralized power generation sectors**

**Purchase price for the acquired business is £785 million or about 950 million**

**Transaction expected to close before the end of December 2014**

Siemens is acquiring the Rolls-Royce Energy aero-derivative gas turbine and compressor business and thereby strengthening its position in the growing oil and gas industry as well as in the field of decentralized power generation. The purchase price is £785 million or about 950 million. The transaction is expected to close before the end of December 2014, subject to regulatory approvals.

In addition, as part of the transaction, Siemens will get exclusive access to future Rolls-Royce aero-turbine technology developments in the 4 to 85 megawatt power output range as well as preferred access to supply and engineering services. For this 25 year duration agreement, Siemens will pay Rolls-Royce an additional £200 million, or about 240 million.

By acquiring Rolls-Royce's small and medium aero-derivative gas turbines with a power output of up to 66 megawatts (ISO/wet-rating), Siemens will close a technology gap in its extensive gas turbine portfolio.

Originally developed for use in the aviation industry, Rolls-Royce Energy's aero-derivative gas turbines have a compact, weight-optimized construction and are highly efficient. These characteristics make aero-derivative gas turbines an

**Siemens AG**

Press release

attractive power supply option in the oil and gas industry, in particular for the operators of offshore oil platforms where space is limited. Due to their efficiency and fast start-up capabilities, aero-derivative gas turbines are also used for the dependable decentralized power generation in industry – their flexibility helps meet peak electricity demands, provide emergency power reserves and stabilize the power grid.

Rolls-Royce Energy's gas turbine and compressor business is one of the leading providers of aero-derivative gas turbines. In this segment, the acquired business, which has around 2,400 employees, delivered revenue of £871 million (approximately 1.1 billion) and earnings before interest and tax (EBIT) of £72 million (about 88 million) in fiscal 2013. With an installed base of about 2,500 gas turbines, Rolls-Royce Energy's business has the world's second-largest fleet of aero-derivative gas turbines.

**Siemens AG** (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the fields of industry, energy and healthcare as well as providing infrastructure solutions, primarily for cities and metropolitan areas. For over 165 years, Siemens has stood for technological excellence, innovation, quality, reliability and internationality. The company is one of the world's largest providers of environmental technologies. Around 43 percent of its total revenue stems from green products and solutions. In fiscal 2013, which ended on September 30, 2013, revenue from continuing operations totaled 75.9 billion and income from continuing operations 4.2 billion. At the end of September 2013, Siemens had around 362,000 employees worldwide on the basis of continuing operations. Further information is available on the Internet at: [www.siemens.com](http://www.siemens.com).

Press release

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as expect, look forward to, anticipate, intend, plan, believe, seek, estimate, will, pro, similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements or anticipated on the basis of historical trends. These factors include in particular, but are not limited to, the matters described in Item 3: Key information Risk factors of our most recent annual report on Form 20-F filed with the SEC, in the chapter C.9.3 Risks of our most recent annual report prepared in accordance with the German Commercial Code, and in the chapter C.7 Risks and opportunities of our most recent interim report. Further information about risks and uncertainties affecting Siemens is included throughout our most recent annual and interim reports, as well as our most recent earnings release, which are available on the Siemens website, [www.siemens.com](http://www.siemens.com), and throughout our most recent annual report on Form 20-F and in our other filings with the SEC, which are available on the Siemens website, [www.siemens.com](http://www.siemens.com), and on the SEC's website, [www.sec.gov](http://www.sec.gov). Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results, performance or achievements of Siemens may vary materially from those described in the relevant forward-looking statement as being expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated. Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

**Siemens prepares public listing of audiology business**

As part of its realignment, Siemens AG is preparing to publicly list its audiology activities in order to give the business an opportunity to better leverage its potential outside the company. Step by step, Siemens hearing aid activities have succeeded in capturing a strong market position in recent years. Experts predict that by 2020 the market for hearing aids will have grown by an average of four percent per year.

However, the audiology business has a special position within the company. Both its technology and its consumer-oriented market access limit synergy potentials with other Siemens businesses. In addition, anticipated technological developments at Siemens Audiology differ greatly from those of the company and its healthcare activities. This applies particularly to growth fields like implants and the link to consumer electronics.

Siemens Audiology has more than 4,000 employees and a worldwide presence. Key locations are Singapore, Erlangen (Germany), Piscataway (New Jersey / U.S.), Kanagawa (Greater Tokyo / Japan), Crawley (UK) and Saint Denis (Greater Paris / France). As a medium-sized enterprise, the business is the only manufacturer focusing exclusively on the development and production of hearing aids (pure play).

Siemens has been active in the audiology field for more than 100 years. In 1913, the company brought to market the first industrially produced hearing aid, the Esha Phonophor. In the late 1950s, Siemens presented the first behind-the-ear device, in 1966 the first in-the-ear device and in 1997 the first digital hearing system.

In 2004, Siemens was the first producer to introduce hearing aids utilizing radio technology to synchronize operation between the left and right ears. In 2012,

**Siemens and Mitsubishi Heavy Industries form joint venture for metals industry**

**Strong partners with complementing technological competencies found joint venture**

**Existing regional organizations ideally complement one another**

**Structures tailored to global market requirements and the international competitive environment**

Siemens and Mitsubishi Heavy Industries (MHI) want to cooperate in the field of metallurgical industry and are forming a globally operating complete provider for plants, products and services for the iron, steel and aluminum industry. Responding to the challenging market environment and high price pressure, two strong partners are bundling their individual strengths and establishing a powerful and globally well positioned joint venture. An agreement to this effect has just been signed. According to the agreement, MHI will hold a 51-percent and Siemens a 49-percent stake in the joint venture. Subject to approval of the relevant authorities, the joint venture will start operations in January 2015.

Both partners are contributing their metallurgical industry activities to the joint venture. The new joint venture will integrate Mitsubishi-Hitachi Metals Machinery, Inc. (MH) – an MHI consolidated group company with equity participation by Hitachi, Ltd. and IHI Corporation. Siemens and MHI ideally complement one another with regard to their product portfolios, production know-how and geographical spread. The new joint venture with approximately 9,000 employees will focus fully on business with iron, steel and aluminum-producing industry. The company's structures are lean and tailored to global market requirements and the international competitive environment. The bundling of competencies will result in a powerful joint venture that is better able to compensate for market fluctuations.

**Siemens AG**

Press release

The company's headquarters will be located in the United Kingdom. The joint venture includes supply agreements for Siemens' Industry Automation and Drive Technologies Divisions.

Regionally, the steel market has strongly shifted to Asia. Over 50 percent of the world's steel production now takes place in China, with growing competition also through local technology providers. Drawing on the centers of competence of Siemens Metals Technologies in Central Europe and those of MHI in Asia, the new joint venture has a very solid regional set-up.

The portfolios of the two partners ideally complement one another. While the technology strengths of Siemens Metals Technologies lie in particular in iron and steel production, casting, automation, environmental technologies and lifecycle services, MHI's technology competence is primarily focused on hot and cold rolling, processing as well as production expertise. By combining both portfolios, the joint venture can offer its customers the entire value chain in iron, steel and aluminum production, from technologies for processing raw materials to surface finishing at the end of the production process, as well as the related lifecycle service competencies.

The **Metals Technologies Business Unit** (headquartered in Linz, Austria), part of the Siemens Industry Sector, is a worldwide leading lifecycle partner for the metals industry. The Business Unit offers a comprehensive technology, modernization, product and service portfolio and integrated automation and environmental solutions for complete plant lifecycles. Further information is available in the Internet at: [www.siemens.com/metals](http://www.siemens.com/metals)

**Mitsubishi Heavy Industries, Ltd. (MHI)**, headquartered in Tokyo, Japan, is one of the world's leading heavy machinery manufacturers, with consolidated sales of 2,817.8 billion yen in fiscal 2012, the year ended March 31, 2013. MHI's diverse lineup of products and services encompasses shipbuilding, power plants, chemical plants, environmental equipment, steel structures, industrial and general machinery, aircraft, space systems and air-conditioning systems. The steel production machinery divisions of Mitsubishi Heavy Industries and Hitachi were combined in the year 2000 to create Mitsubishi-Hitachi Metals Machinery, Inc. (MH), establishing a worldwide leading company for steel production machinery.
