Notes to the condensed consolidated interim financial statements

Amounts in EUR millions, unless otherwise stated

Aegon N.V., incorporated and domiciled in the Netherlands, is a public limited liability company organized under Dutch law and recorded in the Commercial Register of The Hague under number 27076669 and with its registered address at Aegonplein 50, 2591 TV, The Hague, the Netherlands. Aegon N.V. serves as the holding company for the Aegon Group and has listings of its common shares in Amsterdam and New York.

Aegon N.V. (or the Company) and its consolidated subsidiaries (Aegon or the Group) have life insurance and pensions operations in over twenty-five countries in the Americas, Europe and Asia and are also active in savings and asset management operations, accident and health insurance, general insurance and to a limited extent banking operations. Its headquarters are located in The Hague, the Netherlands. The Group employs over 28,000 people worldwide.

1. Basis of presentation

The condensed consolidated interim financial statements as at, and for the year ended, December 31, 2014, have been prepared in accordance with IAS 34 Interim Financial Reporting, as adopted by the European Union (hereafter IFRS). They do not include all of the information required for a full set of financial statements prepared in accordance with IFRS and should therefore be read together with the 2013 consolidated financial statements of Aegon N.V. as included in Aegon's Annual Report for 2013 and the disclosures provided in note 2.1 and 2.2 of this report which disclose the impact of voluntary changes in accounting policies that were made by Aegon effective January 1, 2014. Aegon's Annual Report for 2013 is available on its website (aegon.com).

The condensed consolidated interim financial statements have been prepared in accordance with the historical cost convention as modified by the revaluation of investment properties and those financial instruments (including derivatives) and financial liabilities that have been measured at fair value. Certain amounts in prior periods have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income, shareholders' equity or earnings per share. The condensed consolidated interim financial statements as at, and for the year ended, December 31, 2014, were approved by the Executive Board on February 18, 2015.

The condensed consolidated interim financial statements are presented in euro (EUR) and all values are rounded to the nearest million unless otherwise stated. The consequence is that the rounded amounts may not add up to the rounded total in all cases.

The published figures in these condensed consolidated interim financial statements are unaudited.

2. Significant accounting policies

All accounting policies and methods of computation applied in the condensed consolidated interim financial statements are the same as those applied in the 2013 consolidated financial statements, except for the newly applied accounting policies as described below and in note 2.1 and 2.2.

Non-current assets held for sale and disposal groups

Disposal groups are classified as held for sale if they are available for immediate sale in their present condition, subject only to the customary sales terms of such assets and disposal groups and their sale is considered highly probable; management must be committed to the sale, which is expected to occur within one year from the date of classification as held for sale.

Table of Contents

Upon classification as held for sale, the carrying amount of the disposal group (or group of assets) is compared to their fair value less cost to sell. If the fair value less cost to sell is lower than the carrying value, this expected loss is recognized through a reduction of the carrying value of any goodwill related to the disposal group or the carrying value of certain other non-current non-financial assets to the extent that the carrying value of those assets exceeds their fair value. Any excess of the expected loss over the reduction of the carrying amount of these relevant assets is not recognized upon classification as held for sale, but is recognized as part of the result on disposal if and when a divestment transaction occurs.

Classification into or out of held for sale does not result in restating comparative amounts in the balance sheet.

New IFRS accounting standards effective

The following standards, interpretations, amendments to standards and interpretations became effective in 2014:

- t IFRS 10 Consolidated Financial Statements – Amendment Investment Entities;
- t IAS 32 Financial Instruments: Presentation – Amendment Offsetting Financial Assets and Financial Liabilities;
- t IAS 36 Impairment of Assets – Recoverable Amounts Disclosures for Non-Financial Assets; and
- t IAS 39 Financial instruments: Recognition and Measurement – Amendment Novation of Derivatives and Continuation of Hedge Accounting;
- t IFRIC 21 – Levies.

None of these new or revised standards and interpretations had a significant effect on the condensed consolidated interim financial statements for the year ended December 31, 2014.

For a complete overview of IFRS standards, published before January 1, 2014, that will be applied in future years, but were not early adopted by the Group, please refer to Aegon's Annual Report for 2013.

Judgments and critical accounting estimates

Preparing the condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions, including the likelihood, timing or amount of future transactions or events, that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from the estimates made.

In preparing the condensed consolidated interim financial statements, significant judgments made by management in applying the Group's accounting policies and the key sources of estimating uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2013, except regarding the actuarial assumption and model updates as described below.

Periodically, Aegon reviews and updates its assumptions based on historical experience and observable market data, including market transactions such as acquisitions and reinsurance transactions. Similarly, the models and systems used for determining our liabilities are reviewed periodically and, if deemed necessary, updated based on emerging best practices and available technology.

In 2014, Aegon updated its actuarial assumptions and certain models in the Americas and the Netherlands. In the Americas Life & Protection business primarily related to mortality assumptions for the older ages. The actuarial assumption changes and model updates in the Americas Individual Savings & Retirement business relates to policyholder behavior on partial withdrawals. Actuarial assumption changes and model updates not included in underlying earnings are mainly caused by adjusting the modeled hedging costs for the GMWB variable annuity book, improving the hedging models for indexed universal life products and updating the discount rate on reserves in the run-off life reinsurance book. Model and assumption updates in the Netherlands affected the valuation of guarantees recorded at fair value.

Table of Contents*Exchange rates*

Assets and liabilities are translated at the closing rates on the balance sheet date. Income, expenses and capital transactions (such as dividends) are translated at average exchange rates or at the prevailing rates on the transaction date, if more appropriate. The following exchange rates are applied for the condensed consolidated interim financial statements:

Closing exchange rates

			USD	GBP
December 31, 2014	1	EUR	1.2101	0.7760
December 31, 2013	1	EUR	1.3780	0.8320
Weighted average exchange rates				

			USD	GBP
The year ended December 31, 2014	1	EUR	1.3288	0.8061
The year ended December 31, 2013	1	EUR	1.3272	0.8464

Table of Contents

2.1 Voluntary changes in accounting policies

Aegon adopted voluntary changes in accounting policies which are applied retrospectively for all periods presented in this document, both in the main schedules and the associated footnotes. Changes to these policies relate to deferred policy acquisition costs, how Aegon accounts for longevity trends in the Netherlands and borrowings. In the paragraphs below, details are provided for these changes in accounting policies.

Deferred policy acquisition costs

Aegon adopted a single group-wide accounting policy for deferred policy acquisition costs as of January 1, 2014. Upon initial adoption of IFRS, entities were permitted to continue existing accounting policies for insurance contracts even though such policies were often non-uniform between countries. Through adoption of a uniform, group-wide accounting policy, Aegon eliminates this lack of uniformity for the deferral of policy acquisition costs thereby providing the users of the financial statements with more meaningful information.

IFRS 4 neither prohibits nor requires the deferral of policy acquisition costs, nor does it prescribe what acquisition costs are deferrable. Thus, in developing the new policy, Aegon considered and sought alignment with the proposed description of deferrable policy acquisition costs within the IFRS Insurance Contracts Phase II exposure draft (Exposure Draft). In the absence of detailed guidance in the Exposure Draft, Aegon also considered the recently adopted guidance in US GAAP (ASU 2010-26 Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts), if not conflicting with IFRS 4 or the Exposure Draft. IFRS currently differs from US GAAP by not limiting the deferral to expenses from successful efforts only and in the detail of how that principle is applied. Under the new accounting policy, deferred policy acquisition costs include costs that are directly attributable to the acquisition or renewal of insurance contracts. The previous accounting policy was based on a broader definition of costs that could be deferred.

Details of the impact of applying this voluntary change to previous periods are provided in the tables presented in note 2.2.

Longevity reserving

As of January 1, 2014, Aegon amended its policy to determine the insurance contract liability of Aegon the Netherlands to account for longevity risk assumed by Aegon. This change will provide more current information about the financial effects of changes in life expectancy of the insured population. It will supply users of the financial statements with more relevant decision making information on the insurance contract liability and will improve transparency on the longevity risks assumed by Aegon.

Mortality tables will be reviewed annually based on the prospective tables taking into account longevity trends. The new methodology will take into account the contractual cash flows related to the longevity risk assumed. Previously the methodology applied by Aegon the Netherlands considered realized mortalities based on retrospective mortality tables.

Details of the impact of applying this voluntary change to previous periods are provided in the tables presented in note 2.2.

2.1.1 Changes in presentation

Borrowings

Commencing the fourth quarter of 2014, the Group changed the presentation of its borrowings. Aegon's borrowings are now further defined separately as capital funding and operational funding. The presentation of borrowings is changed to align with the current methodology for the Group's composition of total capitalization and its calculation of gross financial leverage. As a result, bank overdrafts, commercial paper and short term deposits are reclassified to Other liabilities. Comparative information has been reclassified accordingly. Refer to note 19 Borrowings for more information. This change in presentation did not change net profit, total assets or total liabilities.
