Any representation to the contrary is a criminal offense. Use of Non-GAAP Financial Measures In addition to financial measures presented in accordance with generally accepted accounting principles in the United States of America (GAAP), this presentation contains certain non-GAAP financial measures. These non-GAAP financial measures adjust GAAP financial measures to exclude for goodwill and other intangible assets, purchase accounting accretion and merger and integration costs, and other one-time gains or losses which our management uses when evaluating net interest income, net interest margin and efficiency. In addition, we believe that these non-GAAP financial measures facilitate the making of period-to-period comparisons and provides useful supplemental information that is essential to a proper understanding of the Company's capital strength, adjusted net interest income, adjusted net interest margin and efficiency ratio The specific non-GAAP financial measures used include the ratio of tangible common equity to tangible assets, adjusted net interest income, adjusted net interest margin, the efficiency ratio, and the adjusted pre-tax income. The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for any measure prepared in accordance with GAAP. Investors should note that, because there are no standardized definitions for the calculations as well as the results, our calculations may not be comparable to other similarly-titled measures presented by other companies. Also, there may be limits in the usefulness of these measures to investors. As a result, we encourage readers to consider our consolidated financial statements in their entirety and not to rely on any single financial measure. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in the Appendix to this presentation.
