The percentage shown for each investment category in the Portfolio of Investments is based on net assets applicable to common shares.

The Trust invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at February 28, 2019, 9.7% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution or financial guaranty assurance agency ranged from 1.9% to 5.6% of total investments.

- (1) Security represents the municipal bond held by a trust that issues residual interest bonds.
- (2) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be sold in certain transactions in reliance on an exemption from registration (normally to qualified institutional buyers). At February 28, 2019, the aggregate value of these securities is \$1,686,560 or 1.8% of the Trust's net assets applicable to common shares.

**Abbreviations:**

AGC - Assured Guaranty Corp.

AGM - Assured Guaranty Municipal Corp.

AMBAC - AMBAC Financial Group, Inc.

AMT - Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.

NPFG - National Public Finance Guarantee Corp.

The Trust did not have any open derivative instruments at February 28, 2019.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At February 28, 2019, the hierarchy of inputs used in valuing the Trust's investments, which are carried at value, were as follows:

| <b>Asset Description</b>        | <b>Level 1</b> | <b>Level 2</b>        | <b>Level 3</b> | <b>Total</b>          |
|---------------------------------|----------------|-----------------------|----------------|-----------------------|
| Tax-Exempt Municipal Securities | \$             | \$ 144,259,458        | \$             | \$ 144,259,458        |
| Taxable Municipal Securities    |                | 8,280,395             |                | 8,280,395             |
| Corporate Bonds & Notes         |                | 1,067,102             |                | 1,067,102             |
| <b>Total Investments</b>        | <b>\$</b>      | <b>\$ 153,606,955</b> | <b>\$</b>      | <b>\$ 153,606,955</b> |
