Semiannual Report

Global High Income Fund Inc.

Semiannual Report

April 30, 2013

Global High Income Fund Inc.:
Managed distribution policy key points to note

- The Fund has a managed distribution policy. Effective June 2012, the Fund makes regular monthly distributions at an annualized rate equal to 7% of the Fund's net asset value, as determined as of the last trading day during the first week of a month (usually a Friday, unless the NYSE is closed that day). (From August 2009 through the monthly distribution for May 2012, the annualized rate had been 8%.)
 - To the extent that the Fund's taxable income in any fiscal year exceeds the aggregate amount distributed based on a fixed percentage of its net asset value, the Fund would make an additional distribution in the amount of that excess near the end of the fiscal year. To the extent that the aggregate amount distributed by the Fund (based on a percentage of its net assets) exceeds its current and accumulated earnings and profits, the amount of that excess would constitute a return of capital or net realized capital gains for tax purposes. A return of capital may occur, for example, when some or all of the money that shareholders invested in the Fund is deemed to be paid back to shareholders. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with yield or income.
 - You should not draw any conclusions about the Fund's investment performance from the amount of the monthly distribution or from the terms of the Fund's managed distribution policy.
 - The Fund periodically issues notices and press releases estimating the source characteristics of its monthly distributions. The estimated amounts and sources reported in these materials are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for accounting and tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV (or your financial intermediary should provide you with similar information) for the calendar year that will tell you how to report these distributions for federal income tax purposes.
 - The Fund's Board may change or terminate the managed distribution policy at any time without prior notice to Fund shareholders; any such change or termination may have an adverse effect on the market price for the Fund's shares.
 - Further information regarding the Fund's managed distribution policy is contained in the section captioned "Distribution policy" towards the end of this report.
-

Global High Income Fund Inc.

June 14, 2013

Dear shareholder,

We present you with the semiannual report for Global High Income Fund Inc. (the Fund) for the six months ended April 30, 2013.

Performance

During the six months ended April 30, 2013, the Fund returned 4.87% on a net asset value (NAV) basis, and 5.34% on a market price basis. In comparison, the Fund's benchmark, the Global High Income Fund Index (the Index), returned 4.99%. Over the same period, the median for the Fund's Lipper Emerging Markets Debt Funds peer group returned 4.52% on a NAV basis and 5.38% on a market price basis. (For more performance information, including a description of the Index, please refer to Performance at a glance on page 4.)

The Fund did not use structural leverage during the reporting period. This means the Fund did not have preferred stock outstanding or borrow from banks for investment purposes, as some of its peers may have done. Leverage magnifies returns on both the upside and on the downside, and creates a wider range of returns within the Fund's peer group.

The Fund traded at a discount to its NAV during the reporting period. On the last trading day of the preceding fiscal year, October 31, 2012, the Fund traded at a discount of 5.3%. At the close of the current fiscal period, April 30, 2013, the Fund traded at a discount of 5.0%. As of the same dates, the Lipper peer group medians reported discounts of 5.1% and 3.4%, respectively.

Global High Income Fund Inc.

Investment goals:

Primarily, high level of current income; secondarily, capital appreciation

Portfolio management:

Portfolio management team, including Uwe Schillhorn
UBS Global Asset Management (Americas) Inc.

Commencement:

October 8, 1993

NYSE symbol:

GHI

Distribution payments:

Monthly

A fund trades at a premium when the market price at which its shares trade is more than its NAV per share. Alternatively, a fund trades at a discount when the market price at which its shares trade is less than its NAV per share. The market price is the price the market is willing to pay for shares of a fund at a given time, and may be influenced by a range of factors, including supply and demand and market conditions. NAV per share is determined by dividing the value of the Fund's securities, cash and other assets, less all liabilities, by the total number of common shares outstanding.

An interview with Portfolio Manager Uwe Schillhorn

Q. How did emerging markets debt perform over the reporting period?

A. While the emerging markets debt asset class experienced periods of volatility during the reporting period, it ultimately generated positive results. The asset class rallied during the first two months of the period, driven by an improving economic backdrop in the US and indications that China's economy was stabilizing. Investor sentiment was also lifted by further monetary policy accommodation by the Federal Reserve Board (Fed) and European Central Bank (ECB). After a strong start, the asset class weakened over much of the next three months. This turnaround was triggered by a number of factors, including signs of moderating global growth, fears of contagion from Europe, rising US Treasury yields and falling commodity prices. However, the reporting period ended on a positive note, as investor risk appetite returned and US Treasury yields declined.

1

Global High Income Fund Inc.

During the six months ended April 30, 2013, US dollar-denominated emerging markets debt, as measured by the JP Morgan Emerging Markets Bond Index Global (EMBI Global), posted a return of 2.97%. Local market investments (emerging markets debt denominated in the currency of the issuer) returned 7.02%, as measured by the JP Morgan Government Bond Index-Emerging Markets Global Diversified (GBI-EM Global Diversified). A portion of local markets' relative outperformance was driven by weaker performance of US dollar-denominated debt due to increasing industry yields and strong investor demand for local debt, as investors looked to generate incremental yield.

Q. The Fund modestly underperformed its benchmark on a NAV basis during the reporting period. What factors negatively impacted its performance?

A. The following strategies detracted from performance during the reporting period.

- **An overweight to Argentina US dollar-denominated debt was negative.** While our overweight to Argentina was beneficial toward the end of the reporting period, overall it detracted from performance. During the fourth quarter of 2012, a US court ruled that Argentina could not discriminate between its creditors, in connection with a longstanding dispute between holdouts from Argentina's 2001 sovereign default. Against this backdrop, Standard & Poor's cut the country's credit rating from B, to B-, Moody's lowered the country's rating from B2, to B3, and Fitch placed the country's B rating on Rating Watch Negative. Investor sentiment for Argentina's debt remained weak, as appeals in the court case have yet to be resolved.
- **Our exposure to the South Korean won was not rewarded.** The Korean won performed poorly during the reporting period, as investor sentiment was weak given heightened political risks with North Korea. In addition, the won was negatively impacted by the depreciation of the Japanese yen, as it was believed that this would negatively impact South Korean exports.

Q. What factors positively impacted the Fund's performance during the period?

A. The following strategies were positive contributors to performance during the reporting period.

- **An overweight to local currencies was beneficial.** Although the overall sentiment for local currencies was not overly optimistic, our currency selection was rewarded, including our exposures to the Sri Lankan rupee, Brazilian real and Nigerian naira.
- **Overweights to local bonds in several countries aided results.** The Fund was rewarded for having an overweight position to long duration local bonds issued by Brazil, as their yields moved lower and their prices rose. An overweight to local bonds from Belarus contributed to performance, as demand was generally solid given their attractive yields.
- **The Fund's exposure to Indian local bonds was beneficial for performance.** The Indian government lowered rates - one of the few such emerging market central banks to do so during the reporting period - as it looked to boost its weak economy. The potential remains for additional rate reductions, given continued economic headwinds and relatively benign inflation.

Q. Were there any significant adjustments to the Fund's positioning during the reporting period?

A. Several adjustments were made to the portfolio during the reporting period. We reduced the Fund's allocation to US dollar-denominated debt by paring our exposure to Argentina, even though the Fund maintains an overweight position. Conversely, we added to the Fund's allocation to Venezuelan US dollar-denominated debt, as we found it to be attractively valued. From a currency perspective, we reduced our exposure to the Taiwan dollar and South Korean won. Elsewhere, we actively participated in the new issuance market, as it has become more active in recent weeks.

Global High Income Fund Inc.

Q. What derivative instruments did the Fund utilize over the reporting period and what impact did they have on performance?

- A. Currency forwards and currency options to manage the Fund's overall currency exposure were among the most commonly utilized instruments. (A currency forward is an agreement between two parties to exchange a certain amount in currencies at a certain rate at a future date.) During this period, the usage of these derivatives was rewarded and added to performance.

The Fund also used credit default swaps (a type of credit derivative) and structured notes to adjust the Fund's exposure to the debt of certain emerging markets countries, such as Argentina. Whereas credit default swaps were generally used to adjust the Fund's US dollar-denominated debt exposure, structured notes were employed almost exclusively to gain access to various local markets. The Fund's overall management of its US dollar-denominated assets, including derivatives, modestly contributed to performance.

Q. What is your outlook for the emerging markets debt asset class?

- A. Since the end of the reporting period, investor risk aversion increased and volatility in emerging markets has become more elevated. The trigger for the bond sell-off was hints from the Fed that it might start tapering its quantitative easing program as early as the summer of 2013. While the overall message from the Fed was presumably a positive one in noting the continued improvement in US economic growth projections, global markets did not respond kindly to the notion that the end of the extreme monetary policy accommodation might arrive sooner than previously anticipated. Many emerging market countries are experiencing growth well above the levels of major developed markets, although emerging market countries are not immune to global developments. Growth rates in emerging markets should be lower than were expected at the end of 2012, based on lower exports into developed markets. However, advantages in terms of growth and relatively low fiscal deficits are favorable for debt dynamics in emerging markets on a longer-term horizon. While volatility may stay elevated in the near term due to market uncertainty and investor risk aversion, we continue to have a positive long-term outlook for emerging markets investments. Solid fundamental data, stable reserves, a stronger fiscal situation and lower indebtedness are signs of such strengths, especially for sovereigns, quasi-sovereigns and in currencies.

We thank you for your continued support and welcome any comments or questions you may have. For additional information regarding your fund, please contact your financial advisor, or visit us at www.ubs.com/globalam-us.

Sincerely,

Past performance does not predict future performance. The return and value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. The Fund's net asset value (NAV) returns assume, for illustration only, that dividends and other distributions, if any, were reinvested at the NAV on the payable dates. The Fund's market price returns assume that all dividends and other distributions, if any, were reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Returns for the period of less than one year have not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and other distributions, if any, or on the sale of Fund shares.

¹The Global High Income Fund Index is an unmanaged index compiled by UBS Global Asset Management (Americas) Inc. constructed as follows: from the Fund's inception until 12/31/93: 100% J.P. Morgan Emerging Markets Bond Index (EMBI); from 01/01/94 to 11/05/06: 100% J.P. Morgan Emerging Markets Bond Index Global (EMBI Global); from 11/06/06 to 03/31/08: 70% J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) and 30% J.P. Morgan Government Bond Index-Emerging Markets Diversified (GBI-EM Diversified); from 04/01/08 to 05/31/08: 50% J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) and 50% J.P. Morgan Government Bond Index-Emerging Markets Diversified (GBI-EM Diversified); from 06/01/08 to Present: 50% J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) and 50% J.P. Morgan Government Bond Index-Emerging Markets Global Diversified (GBI-EM Global Diversified). Investors should note that indices do not reflect the deduction of fees and expenses.

²The J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) is an unmanaged index which is designed to track total returns for US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans and Eurobonds. Investors should note that indices do not reflect the deduction of fees and expenses.

Lipper peer group data calculated by Lipper Inc.; used with permission. The Lipper median is the return of the fund that places in the middle of the peer group. Lipper classifies the Fund in its Emerging Market Debt Funds category, which includes both leveraged and non-leveraged closed-end funds that seek either current income or total return by investing primarily in emerging market debt securities.

Performance information reflects the deduction of the Fund's fees and expenses, as indicated in the Statement of operations included in its shareholder reports, such as investment advisory and administration fees, custody fees, exchange listing fees, etc. It does not reflect any transaction charges that a shareholder may incur when (s)he buys or sells shares (e.g., a shareholder's brokerage commissions).

Further information regarding the Fund, including a discussion of principal objectives, principal investment strategies and principal risks, may be found in the fund overview located at <http://www.ubs.com/closedendfundsinfo>. Portfolio of investments April 30, 2013

(unaudited)

Portfolio footnotes

* Non-income producing security.

¹ Security exempt from registration pursuant to Regulation S under the Securities Act of 1933. Regulation S applies to securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States. At April 30, 2013, the value of these securities amounted to \$60,855,864 or 20.70% of net assets.

² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2013, the value of these securities amounted to \$49,371,461 or 16.79% of net assets.

³ Variable or floating rate security The interest rate shown is the current rate as of April 30, 2013 and changes periodically.

⁴ Security is illiquid. At April 30, 2013, the value of this security and other illiquid derivative instruments amounted to \$2,462,184 or 0.84% of net assets.

⁵ Security pays, when required, a floating rate that is determined annually based on the Argentina GDP.

⁶ Debt security whose principal and/or interest payments are adjusted for inflation, unlike debt securities that make fixed principal and interest payments. The interest rate paid by the securities is fixed, while the principal value rises or falls based on changes in an index. Thus, if inflation occurs, the principal and interest payments on the securities are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the securities' principal amounts will not drop below their face amounts at maturity. In exchange for the inflation protection, the securities generally pay lower interest rates than typical government securities from the issuer's country. Only if inflation occurs will securities offer a higher real yield than a conventional security of the same maturity.

⁷ Rate shown reflects annualized yield at April 30, 2013 on zero coupon bond.

⁸ Step bond Coupon rate increases in increments to maturity. Rate disclosed is as of April 30, 2013. Maturity date disclosed is the ultimate maturity date.

⁹ The table below details the Fund's investment in a fund advised by the same advisor as the Fund. The advisor does not earn a management fee from the affiliated UBS Relationship Fund.

| Security description | Value 10/31/12 | Purchases | Sales | Value 04/30/13 | Income earned from affiliate for the six months ended 04/30/13 |
|---|-------------------|---|---|-------------------|---|
| | | during the six months ended 04/30/13 | during the six months ended 04/30/13 | | |
| UBS Cash Management Prime Relationship Fund | \$11,067,701 | \$38,580,343 | \$48,902,605 | \$745,439 | \$5,888 |

¹⁰ Payments made or received are based on the notional amount.

¹¹ If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the underlying securities comprising the referenced index.

¹² Payments from/to the counterparty will be received/made upon the occurrence of bankruptcy and/or restructuring event with respect to the referenced index/obligation.

¹³ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

¹⁴ Credit spreads, represented in absolute terms, utilized in determining the market value as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default or other credit event occurring for the credit derivative. The credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity.

| Supplemental data: | | | | | | |
| Net assets, end of period (000 s) | \$294,045 | \$290,367 | \$280,799 | \$305,683 | \$278,635 | \$212,049 |
| Portfolio turnover rate | 25% | 52% | 71% | 84% | 104% | 83% |

¹ Calculated using the average shares method.

² The actual sources of the Fund's fiscal year 2013 dividends/distributions may be net investment income, net realized capital gains, return of capital or a combination of the foregoing and may be subject to retroactive recharacterization at the end of the Fund's fiscal year based on tax regulations. Shareholders will be informed of the tax characteristics of dividends/distributions after the close of the 2013 fiscal year.

³ Total net asset value return is calculated assuming a \$10,000 purchase of common stock at the current net asset value on the first day of each period reported and a sale at the current net asset value on the last day of each period reported, and assuming reinvestment of dividends and other distributions at the net asset value on the payable dates. Total net asset value return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or a sale of Fund shares. Total return based on net asset value is hypothetical as investors cannot purchase or sell Fund shares at the net asset value but only at market prices. Total net asset value return for the period of less than one year has not been annualized.

⁴ Total market price return is calculated assuming a \$10,000 purchase of common stock at the current market price on the first day of each period reported and a sale at the current market price on the last day of each period reported, and assuming reinvestment of dividends and other distributions at prices obtained under the Fund's Dividend Reinvestment Plan. Total market price return does not reflect brokerage commissions or the deduction of taxes that a shareholder would pay on Fund dividends/distributions or a sale of Fund shares. Total market price return for the period of less than one year has not been annualized.

⁵ Annualized.

Global High Income Fund Inc.

Notes to financial statements (unaudited)

Organization and significant accounting policies

Global High Income Fund Inc. (the "Fund") was incorporated in Maryland on February 23, 1993 and is registered with the US Securities and Exchange Commission ("SEC") as a closed-end, non-diversified management investment company. The Fund's primary investment objective is to achieve a high level of current income. As a secondary objective the Fund seeks capital appreciation, to the extent consistent with its primary objective.

In the normal course of business, the Fund enters into contracts that contain a variety of representations that provide general indemnification for certain liabilities. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") is the exclusive reference of authoritative US generally accepted accounting principles ("US GAAP") recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal laws are also sources of authoritative US GAAP for SEC registrants. The Fund's financial statements are prepared in accordance with US GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates. The following is a summary of significant accounting policies:

Valuation of investments

The Fund calculates its net asset value based on the current market value, where available, for its portfolio of securities. The Fund normally obtains market values for its securities and other instruments from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, official market closing prices, current market quotations or valuations from computerized evaluation systems that derive values based on comparable securities or instruments. An evaluation system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities or instruments. Securities and other instruments also may be valued based on appraisals derived from information concerning the security or instrument or similar securities or instruments received from recognized dealers in those holdings. Securities and instruments traded in the over-the counter ("OTC") market and listed on The NASDAQ Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities and instruments which are listed on US and foreign stock exchanges normally are valued at the market closing price, the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities or instruments are traded on more than one exchange, the securities and instruments are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. ("UBS Global AM" or the "Advisor"), the investment advisor of the Fund. UBS Global AM is an indirect wholly owned asset management subsidiary of UBS AG, an internationally diversified organization with headquarters in Zurich and Basel, Switzerland and operations in many areas of the financial services industry. If a market value is not readily available from an independent pricing source for a particular security or instrument, that security or instrument is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the "Board"). Various factors may be reviewed in order to make a good faith determination of a security's or instrument's fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of the securities or instruments; and the evaluation of forces which influence the market in which the securities or instruments are purchased and sold. Foreign currency exchange rates are generally determined as of the close of the New York Stock Exchange ("NYSE").

Global High Income Fund Inc.

Notes to financial statements (unaudited)

Certain securities or instruments in which the Fund invests are traded in markets that close before 4:00 p.m., Eastern time. Normally, developments that occur between the close of the foreign markets and 4:00 p.m., Eastern time, will not be reflected in the Fund's net asset value. However, if the Fund determines that such developments are so significant that they will materially affect the value of the Fund's securities or instruments, the Fund may adjust the previous closing prices to reflect what is believed to be the fair value of these securities or instruments as of 4:00 p.m., Eastern time.

The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company. Pursuant to the Fund's use of the practical expedient within ASC Topic 820, investments in non-registered investment companies are also valued at the daily net asset value. All investments quoted in foreign currencies are valued daily in US dollars on the basis of the foreign currency exchange rates prevailing at the time such valuation is determined by the Fund's custodian and accounting agent.

Futures contracts are generally valued at the settlement price established each day on the exchange on which they are traded. Forward foreign currency contracts are valued daily using forward exchange rates quoted by independent pricing services.

Swaps are marked-to-market daily based upon values from third party vendors or quotations from market makers to the extent available, and the change in value, if any, is recorded as an unrealized gain or loss on the Statement of assets and liabilities. In the event that market quotations are not readily available or deemed unreliable, the swap is valued at fair value as determined in good faith by or under the direction of the Board (or a committee designated by it).

The Board has delegated to the UBS Global Asset Management Global Valuation Committee (GVC) the responsibility for making fair value determinations with respect to the Fund's portfolio holdings. The GVC is comprised of representatives of management, including members of the investment team.

The GVC provides reports to the Board at each quarterly meeting regarding any securities or instruments that have been fair valued, valued pursuant to standing instructions approved by the GVC, or where non-vendor pricing sources had been used to make fair value determinations when sufficient information exists during the prior quarter. Fair valuation determinations are subject to review at least monthly by the GVC during scheduled meetings. Pricing decisions, processes, and controls over fair value determinations are subject to internal and external reviews, including annual internal compliance reviews and periodic internal audit reviews.

The types of securities or instruments for which such fair value pricing may be necessary include, but are not limited to: foreign securities and instruments under some circumstances, as discussed below, securities of an issuer that has entered into a restructuring; securities or instruments whose trading has been halted or suspended; fixed income securities that are in default and for which there is no current market value quotation; and securities or instruments that are restricted as to transfer or resale. The need to fair value the Fund's portfolio securities and other instruments may also result from low trading volume in foreign markets or thinly traded domestic securities or instruments, and when a security is subject to a trading limit or collar on the exchange or market on which it is primarily traded reaches the limit up or limit down price and no trading has taken place at that price. Various factors may be reviewed in order to make a good faith determination of a security's or instrument's fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of securities or instruments; and the evaluation of forces which influence the market in which the securities or instruments are purchased and sold. Valuing securities and other instruments

Global High Income Fund Inc.

Notes to financial statements (unaudited)

at fair value involves greater reliance on judgment than valuing securities and other instruments that have readily available market quotations. Fair value determinations can also involve reliance on quantitative models employed by a fair value pricing service.

US GAAP requires disclosure regarding the various inputs that are used in determining the value of the Fund's investments. These inputs are summarized into the three broad levels listed below:

Level 1 Unadjusted quoted prices in active markets for identical investments.

Level 2 Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risk.

Level 3 Unobservable inputs inclusive of the Fund's own assumptions in determining the fair value of investments.

A fair value hierarchy has been included near the end of the Fund's Portfolio of investments.

In January 2013, Accounting Standards Update 2013-01 (ASU 2013-01), Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities, replaced Accounting Standards Update 2011-11 (ASU 2011-11), Disclosures about Offsetting Assets and Liabilities. ASU 2013-01 is effective for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. ASU 2011-11 was intended to enhance disclosure requirements on the offsetting of financial assets and liabilities. ASU 2013-01 limits the scope of the new balance sheet offsetting disclosures to derivatives, repurchase agreements, and securities lending transactions to the extent that they are (1) offset in the financial statements or (2) subject to an enforceable master netting arrangement or similar agreement. Management is currently evaluating the application of ASU 2013-01 and its impact, if any, on the Fund's financial statements.

The provisions of ASC Topic 815 Derivatives and Hedging (ASC Topic 815) require qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk related contingent features in derivative agreements. Since investment companies value their derivatives at fair value and recognize changes in fair value through the Statement of operations, they do not qualify for hedge accounting under ASC Topic 815. Accordingly, even though the Fund's investments in derivatives may represent economic hedges, they are considered to be non-hedge transactions for purposes of disclosure under ASC Topic 815. ASC Topic 815 requires that (1) objectives for using derivative instruments be disclosed in terms of underlying risk and accounting designation, (2) the fair values of derivative instruments and their gains and losses be disclosed in a tabular format, and (3) information be disclosed about credit-risk contingent features of derivatives contracts. Details of this disclosure can be found below as well as in the Portfolio of investments. Swap agreements, forward foreign currency contracts, swaptions and options written entered into by the Fund may contain credit-risk related contingent features that could be triggered subject to certain circumstances. Such circumstances include agreed upon net asset value thresholds. If triggered, the derivative counterparty could request additional cash margin and/or terminate the derivative contract. The aggregate fair value of the derivative contracts that are in a net liability position that contain these triggers can be found in the Portfolio of investments. The aggregate fair value of assets that are already posted as collateral as of April 30, 2013 is reflected in the Statement of assets and liabilities. If the applicable credit-risk related contingent features were triggered as of April 30, 2013, the Fund would be required to post additional collateral or may be required to terminate the contracts and settle any amounts outstanding. The volume of derivatives that is presented in the Portfolio of investments of the Fund is consistent with the derivative activity during the period ended April 30, 2013. The Fund may be a seller of protection through credit default swap agreements which are by nature credit-risk contingent (the terms of these agreements can be found within the Portfolio of investments, with further discussion in the Notes to financial statements).

Global High Income Fund Inc.

Notes to financial statements (unaudited)

Disclosure of derivatives by underlying risk for the Fund as of and for the period ended April 30, 2013 is as follows:

| | Asset derivatives | | | Total |
|--------------------------------|--------------------|-------------|-----------------------|--------------|
| | Interest rate risk | Credit risk | Foreign exchange risk | |
| Forward contracts ¹ | \$ | \$ | \$ 2,014,120 | \$ 2,014,120 |
| Futures contracts ² | | 178,414 | | 178,414 |
| Options purchased ¹ | | | 732,081 | 732,081 |
| Swap agreements ¹ | 461,317 | 86,115 | 760,177 | 1,307,609 |
| Total value | \$ 639,731 | \$ 86,115 | \$ 3,506,378 | \$ 4,232,224 |

¹ Statement of assets and liabilities location: Options purchased are shown within investments in securities of unaffiliated issuers, at value, unrealized appreciation on forward foreign currency contracts and outstanding swap agreements, at value.

² Includes cumulative appreciation of futures contracts as reported in the futures contracts table in the Portfolio of investments, but only the unpaid variation margin, if any, is reported within the Statement of assets and liabilities within Due from broker.

| | Liability derivatives | | | Total |
|--------------------------------|-----------------------|----------------|-----------------------|----------------|
| | Interest rate risk | Credit risk | Foreign exchange risk | |

| Options written | | | 175,051 | 175,051 |
| Swap agreements | 228,361 | 737,349 | 71,621 | 1,037,331 |
| Total change in net unrealized appreciation/depreciation | \$ 183,748 | \$ 737,349 | \$ 185,389 | \$ 1,109,486 |

¹ Statement of operations location: Net realized gain (loss) on futures contracts, options written, swap agreements and forward foreign currency contracts.

² Statement of operations location: Change in net unrealized appreciation/depreciation on futures contracts, options written, swap agreements and forward foreign currency contracts.

³ Realized and unrealized gain (loss) is included in net realized gain (loss) from investments and change in net unrealized appreciation/depreciation on investments.

Restricted securities

The Fund may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult. Restricted securities are identified, if any, in the Portfolio of investments and information regarding them, is included in the Fund's Portfolio footnotes.

Investment transactions and investment income

Investment transactions are recorded on the trade date. Realized gains and losses from investment and foreign exchange transactions are calculated using the identified cost method. Interest income is recorded on an accrual basis. Discounts are accreted and premiums are amortized as adjustments to interest income and the identified cost of investments.

Foreign currency translation

The Fund uses the foreign currency exchange rates determined as of the close of regular trading on the NYSE. For purposes of calculating the US dollar equivalent value of a non-US dollar denominated obligation, foreign currency amounts are translated into US dollars on the following basis: (1) market value of investment securities and other assets and liabilities at the exchange rates prevailing at the end of the Fund's fiscal period; and (2) purchases and sales of investment securities and income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

Although the net assets and the market value of the Fund's portfolio are presented at the foreign exchange rates at the end of the Fund's fiscal period, the Fund does not generally isolate the effect of fluctuations in foreign exchange rates from the effect of the changes in market prices of securities. However, the Fund does isolate the effect of

Global High Income Fund Inc.

Notes to financial statements (unaudited)

fluctuations in foreign exchange rates when determining the gain or loss upon the sale or maturity of foreign currency-denominated securities pursuant to US federal income tax regulations. Certain foreign exchange gains and losses included in realized and unrealized gains and losses are included in, or are a reduction of, ordinary income in accordance with US federal income tax regulations.

Forward foreign currency contracts

The Fund may enter into forward foreign currency exchange contracts (forward contracts) in connection with planned purchases or sales of securities or to hedge the US dollar value of portfolio securities denominated in a particular currency. The Fund may also use forward contracts in an attempt to enhance income or gains.

The Fund has no specific limitation on the percentage of assets which may be committed to such contracts. The Fund may enter into forward contracts or maintain a net exposure to forward contracts only if (1) the consummation of the contracts would not obligate the Fund to deliver an amount of foreign currency in excess of the value of the position being hedged by such contracts or (2) the Fund identifies cash or liquid securities in an amount not less than the value of its assets committed to the consummation of the forward contracts and not covered as provided in (1) above, as marked-to-market daily.

Risks may arise upon entering into forward contracts from the potential inability of counterparties to meet the terms of their forward contracts and from unanticipated movements in the value of foreign currencies relative to the US dollar.

Fluctuations in the value of forward contracts are recorded for book purposes as unrealized gains or losses by the Fund. Realized gains and losses include net gains and losses recognized by the Fund on contracts which have been sold or matured.

Futures contracts

The Fund may use financial futures contracts for hedging purposes and to adjust exposure to US and foreign fixed income markets in connection with a reallocation of the Fund's assets or to manage the average duration of the Fund. The Fund may also use futures contracts in an attempt to enhance income or gains. However, imperfect correlations between futures contracts and the related securities or markets, or market disruptions, do not normally permit full control of these risks at all times. Using financial futures contracts involves various market risks, including interest rate risk. Risks of entering into futures contracts include the possibility that there may be an illiquid market or that a change in the value of the contract may not correlate with changes in the value of the underlying securities. To the extent that market prices move in an unexpected direction, there is a risk that the Fund will not achieve the anticipated benefits of the futures contract or may realize a loss.

Upon entering into a financial futures contract, the Fund is required to deliver to a broker an amount of cash and/or liquid securities equal to a certain percentage of the contract amount. This amount is known as the initial margin. Subsequent payments, known as variation margin, are made or received by the Fund each day, depending on the daily fluctuations in the value of the underlying financial futures contracts. Such variation margin is recorded as part of Due to or Due from broker for financial statement purposes on a daily basis as an unrealized gain or loss on futures until the financial futures contract is closed or expires, at which time the net gain or loss is reclassified to realized gain or loss on futures.

Swap agreements

The Fund may engage in swap agreements, including but not limited to interest rate, currency, total return, and credit default swap agreements. The Fund expects to enter into these transactions to preserve a return or spread on a particular investment or to hedge a portion of the portfolio's duration, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, to gain exposure to certain markets in the most economical way possible or in an attempt to enhance income or gains.

Global High Income Fund Inc.

Notes to financial statements (unaudited)

The Fund may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect itself from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, the Fund may enter into interest rate cap and floor transactions which involve an agreement between two parties in which one party agrees to make payments to the other when a designated market interest rate goes above (in the case of a cap) or below (in the case of a floor) a designated level on pre-determined dates or during a specified period. Interest rate swap agreements are subject to general market risk, liquidity risk, counterparty risk and interest rate risk.

The Fund may enter into currency swap agreements with another party to receive or pay amounts based on changes in currency exchange rates in order to protect itself from or take advantage of exchange rate fluctuations. The Fund utilizes currency swaps to earn income and enhance returns as well as to manage the risk profile of the Fund. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified currency exchange rate(s) for a specified amount. Currency swap agreements are subject to general market risk, liquidity risk, counterparty risk, foreign exchange risk and interest rate risk.

Credit default swap agreements involve commitments to make or receive payments in the event of a default or other credit event of a referenced security. As a buyer, the Fund would make periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event does occur, the Fund typically would receive full notional value for a reference obligation that may have little or no value. As a seller, the Fund would receive periodic payments from the counterparty, and the Fund would make payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will retain the periodic stream of payments it received over the term of the contract. However, if a credit event occurs, the Fund will pay full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

Credit default swap agreements on sovereign issues of an emerging market country involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in delivery of a security with a value other than had been anticipated (such as a party's right to choose the deliverable obligation with the lowest value following a credit event). The Fund may use credit default swaps on corporate issues or sovereign issues of an emerging market country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

The maximum potential amount of future payments (undiscounted) that the Fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of April 30, 2013 for which the Fund is the seller of protection are disclosed under the section "Credit default swaps on sovereign issues - sell protection" in the Notes to portfolio of investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into, if any, by the Fund for the same referenced entity or entities.

Global High Income Fund Inc.

Notes to financial statements (unaudited)

The use of swap agreements involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If UBS Global AM is incorrect in its forecast of market values, interest rates and other applicable factors, the investment performance of the Fund will be less favorable than it would have been if this investment technique was never used. Swap agreements do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap agreement defaults and fails to consummate the transaction, the Fund's risk of loss will consist of the net amount of interest or other payments that the Fund is contractually entitled to receive. Therefore, the Fund would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

The Fund accrues for interim payments on swap agreements on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap agreements on the Statement of assets and liabilities. Once interim payments are settled in cash, the net amount is recorded as realized gain/loss on swap agreements, in addition to realized gain/loss recorded upon the termination of swap agreements on the Statement of operations. Fluctuations in the value of swap agreements are recorded for financial statement purposes as unrealized appreciation or depreciation on swap agreements.

Structured notes

The Fund may invest in structured notes whose values are based on the price movements of a referenced security or index. The value of these structured notes will rise and fall in response to changes in the referenced security or index. On the maturity date of each structured note, the Fund will receive a payment from a counterparty based on the value of the referenced security or index (notional amount multiplied by the price of the referenced security or index) and record a realized gain or loss.

Structured notes may present a greater degree of market risk than many types of securities and may be more volatile and less liquid than less complex securities. Structured notes are also subject to the risk that the issuer of the structured notes may fail to perform its contractual obligations.

Option writing

The Fund may write (sell) put and call options on foreign or US securities, indices, foreign currencies and interest rate swaps (commonly referred to as swaptions), in order to gain exposure to or protect against changes in the markets. When the Fund writes a call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of assets and liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. If an option which the Fund has written either expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security or derivative instrument, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund recognizes a realized gain or loss (long-term or short-term, depending on the holding period of the underlying security) from the sale of the underlying security or derivative instrument and the proceeds from the sale are increased by the premium originally received. If a put option which the Fund has written is exercised, the amount of the premium originally received reduces the cost of the security or derivative instrument which the Fund purchases upon exercise of the option.

In writing an option, the Fund bears the market risk of an unfavorable change in the price of the derivative instrument, security, index or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a derivative instrument, security or currency at a price different from current market value.

Global High Income Fund Inc.

Notes to financial statements (unaudited)

Purchased options

The Fund may purchase put and call options on foreign or US securities, indices, foreign currencies and interest rate swaps (commonly referred to as swaptions), as well as exchange listed call options on particular market segment indices to achieve temporary exposure to a specific security, currency, industry or geographic region. Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Fund pays a premium which is included in the Statement of assets and liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying futures, security or currency transaction to determine the realized gain or loss.

Dividends and distributions

Dividends and distributions to shareholders are recorded on the ex-distribution date. The amount of dividends from net investment income and distributions from net realized capital gains and/or return of capital are determined in accordance with income tax regulations, which may differ from US GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification.

Concentration of risk

Investing in securities of foreign issuers and currency transactions may involve certain considerations and risks not typically associated with investments in US securities. These risks include revaluation of currencies, adverse fluctuations in foreign currency values and possible adverse political, social and economic developments, including those particular to a specific industry, country or region, which could cause the securities and their markets to be less liquid and prices more volatile than those of comparable US companies and US government securities. These risks are greater with respect to securities of issuers located in emerging market countries in which the Fund invests. The ability of the issuers of debt securities held by the Fund to meet their obligations may be affected by economic and political developments particular to a specific industry, country, state or region.

Investment advisor and administrator and other transactions with related entities

The Fund's Board has approved an investment advisory and administration contract (Advisory Contract) with UBS Global AM. In accordance with the Advisory Contract, the Fund pays UBS Global AM an investment advisory and administration fee, which is accrued weekly and paid monthly, at the annual rate of 1.25% of the Fund's average weekly net assets. Since August 1, 2005, UBS Global AM has contractually agreed to waive compensation otherwise payable to it to reduce the fee it receives under the Advisory Contract so that it is paid at the annual rate of 1.25% of the Fund's average weekly net assets on assets up to \$200 million, and at the annual rate of 1.00% of the Fund's average weekly net assets on assets above \$200 million. This fee reduction breakpoint continues indefinitely unless the Board agrees to any change. Additionally, effective August 1, 2012, through July 31, 2013, UBS Global AM has agreed voluntarily to waive compensation otherwise payable to it to reduce the fee it receives under the Advisory Contract so that it is paid at the following annual rates:

| Average weekly net assets | Advisory fee |
|---------------------------|--------------|
| Up to \$200 million | 1.10% |
| Above \$200 million | 1.00% |

At April 30, 2013, the Fund owed UBS Global AM \$255,970 which is composed of \$299,390 of investment advisory and administration fees less fees waived of \$43,420. For the six months ended April 30, 2013, UBS Global AM waived \$263,366 of investment advisory and administration fees from the Fund.

Global High Income Fund Inc.

Notes to financial statements (unaudited)

Additional information regarding compensation to affiliate of a board member

Professor Meyer Feldberg serves as a senior advisor to Morgan Stanley, a financial services firm with which the Fund may conduct transactions, resulting in him being an interested director of the Fund. The Fund has been informed that Professor Feldberg's role at Morgan Stanley does not involve matters directly affecting any UBS funds. Fund transactions are executed through Morgan Stanley based on that firm's ability to provide best execution of the transactions. During the six months ended April 30, 2013, the Fund purchased and sold certain securities (e.g., fixed income securities) in principal trades with Morgan Stanley having an aggregate value of \$1,139,718. Morgan Stanley received compensation in connection with these trades, which may have been in the form of a mark-up or mark-down of the price of the securities, a fee from the issuer for maintaining a commercial paper program, or some other form of compensation. Although the precise amount of this compensation is not generally known by UBS Global AM, UBS Global AM believes that under normal circumstances it represents a small portion of the total value of the transactions.

Securities lending

The Fund may lend securities up to 33 % of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents or US government securities in an amount at least equal to 102% of the market value of the securities loaned with respect to domestic securities and 105% of the market value of the securities loaned with respect to foreign securities, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly.

The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents or US government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The Fund did not lend any securities during the six months ended April 30, 2013.

Capital stock

There are 100,000,000 shares of \$0.001 par value common stock authorized and 21,591,836 shares outstanding at April 30, 2013. For the six months ended April 30, 2013 and for the year ended October 31, 2012, there were no transactions involving common stock.

Purchases and sales of securities

For the six months ended April 30, 2013, aggregate purchases and sales of portfolio securities, excluding short-term securities, were \$76,205,935 and \$69,268,692, respectively.

Federal tax status

It is the Fund's policy to comply with all requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. In addition, by distributing during each calendar year substantially all of its net investment income, net realized capital gains and certain other amounts, if any, the Fund intends not to be subject to a federal excise tax. Accordingly, no federal income tax provision was required.

The tax character of distributions paid during the year ended October 31, 2012 was as follows:

| Distributions paid from: | 2012 |
|-----------------------------|---------------|
| Ordinary income | \$ 15,338,633 |
| Net long-term capital gains | 6,013,534 |
| Total distributions paid | \$ 21,352,167 |

Global High Income Fund Inc.

Notes to financial statements (unaudited)

The tax character of distributions paid and components of accumulated earnings (deficit) on a tax basis for the current fiscal year will be determined after the Fund's fiscal year ending October 31, 2013.

Under the Regulated Investment Company Modernization Act of 2010 (the Act), net capital losses recognized by the Fund after December 31, 2010 may be carried forward indefinitely, and retain their character as short term and/or long term losses. The Act requires that post-enactment net capital losses be used before pre-enactment net capital losses.

At October 31, 2012 the Fund had no pre-enactment capital loss carryforwards for federal income tax purposes available to offset future capital gains.

As of and during the period ended April 30, 2013, the Fund did not have any liabilities for any uncertain tax positions. The Fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of operations. During the period, the Fund did not incur any interest or penalties.

Each of the tax years in the four year period ended October 31, 2012 remains subject to examination by the Internal Revenue Service and state taxing authorities.

Global High Income Fund Inc.

General information (unaudited)

The Fund

Global High Income Fund Inc. (the Fund) is a non-diversified, closed-end management investment company whose shares trade on the New York Stock Exchange (NYSE). The Fund's primary investment objective is to achieve a high level of current income. As a secondary objective, the Fund seeks capital appreciation, to the extent consistent with its primary objective. There can be no assurance that the Fund's investment objective will be achieved. The Fund's investment advisor and administrator is UBS Global Asset Management (Americas) Inc. (UBS Global AM).

Shareholder information

The Fund's NYSE trading symbol is GHI. Net asset value and market price information as well as other information about the Fund is updated each business day on UBS's web site at the following internet address:
<http://globalam-us.ubs.com/corpweb/closedendedfunds.do>.

Shareholder meeting information

An annual meeting of shareholders of the Fund was held on February 21, 2013. At the meeting, the two nominees as Class III directors, namely Richard R. Burt and Meyer Feldberg, were elected to serve as board members for three year terms and until their successors are duly elected and qualified or until they retire, resign or are earlier removed. The shares were voted as indicated below:

| To vote for or withhold authority in the election of: | Shares voted for | Shares withhold authority |
|---|------------------|---------------------------|
| Richard R. Burt | 18,963,223 | 956,241 |
| Meyer Feldberg | 18,893,806 | 1,025,657 |

The following persons' terms of office as directors also continued after the annual meeting given that they are in other director classes: Richard Q. Armstrong, Alan S. Bernikow, Bernard H. Garil, Barry M. Mandinach and Heather R. Higgins. The Fund is not aware of any broker non-votes. (Broker non-votes are shares held in street name for which the broker indicates that instructions have not been received from the beneficial owners or other persons entitled to vote and for which the broker does not have discretionary voting authority.)

Quarterly Form N-Q portfolio schedule

The Fund will file its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-202-551-8090. Additionally, you may obtain copies of Form N-Q from the Fund upon request by calling 1 888-793 8637.

Proxy voting policies, procedures and record

You may obtain a description of the Fund's (1) proxy voting policies (2) proxy voting procedures, and (3) information regarding how the Fund voted any proxies related to portfolio securities during the most recent 12-month period ended June 30 for which an SEC filing has been made, without charge, upon request by contacting the Fund directly at 1-888-793 8637, online on UBS's Web site: http://www.ubs.com/us/en/asset_management/individual_investors/closed_end_funds.html or on the EDGAR Database on the SEC's Web site (<http://www.sec.gov>).

Dividend reinvestment plan

The Fund's Board has established a Dividend Reinvestment Plan (the Plan) under which all shareholders whose shares are registered in their own names, or in the name of UBS Financial Services Inc. or its nominee, will have all dividends and other distributions on their shares of common stock automatically reinvested in additional shares,

Global High Income Fund Inc.
General information (unaudited)

unless such shareholders elect to receive cash. Shareholders who elect to hold their shares in the name of another broker or nominee should contact such broker or nominee to determine whether, or how, they may participate in the Plan.

The ability of such shareholders to participate in the Plan may change if their shares are transferred into the name of another broker or nominee.

A shareholder may elect not to participate in the Plan or may terminate participation in the Plan at any time without penalty, and shareholders who have previously terminated participation in the Plan may rejoin it at any time. Changes in elections must be made in writing to the Fund's transfer agent and should include the shareholder's name and address as they appear on that share certificate or in the transfer agent's records.

An election to terminate participation in the Plan, until such election is changed, will be deemed an election by a shareholder to take all subsequent distributions in cash. An election will be effective only for distributions declared and having a record date at least ten days after the date on which the election is received.

Additional shares of common stock acquired under the Plan will be purchased in the open market, on the NYSE or otherwise, at prices that may be higher or lower than the net asset value per share at the time of the purchase. Investors should consider whether continued participation in the dividend reinvestment plan is appropriate for them when the Fund's market price exceeds its net asset value; a portion of a dividend/distribution may represent a return of capital, which would be reinvested in the Fund at a premium to net asset value. The number of shares of common stock purchased with each dividend/distribution will be equal to the result obtained by dividing the amount of the dividend/distribution payable to a particular shareholder by the average price per share (including applicable brokerage commissions) that the transfer agent was able to obtain in the open market. The Fund will not issue any new shares in connection with the Plan. There currently is no charge to participants for reinvesting dividends or other distributions. The transfer agent's fees for handling the reinvestment of distributions are paid by the Fund. However, each participant pays a pro rata share of brokerage commissions incurred with respect to the transfer agent's open market purchases of common stock in connection with the reinvestment of distributions. The automatic reinvestment of dividends and other distributions in shares of common stock does not relieve participants of any income tax that may be payable on such distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan with respect to any dividend or other distribution if notice of the change is sent to Plan participants at least 30 days before the record date for such distribution. The Plan also may be amended or terminated by the transfer agent by at least 30 days written notice to all Plan participants. Additional information regarding the Plan may be obtained from, and all correspondence concerning the Plan should be directed to, the transfer agent at BNY Mellon Shareowner Services, P.O. Box 358035, Pittsburgh, PA 15252-8035. For further information regarding the Plan, you may also contact the transfer agent directly at 1-866-352 5528.

Distribution policy

The Fund's Board adopted a managed distribution policy in December 1999, which was revised (1) effective June 2005, (2) effective August 2009 and (3) effective June 2012. Pursuant to the policy as in effect from December 1999 through early May 2005, the Fund made regular monthly distributions at an annualized rate equal to 11% of the Fund's net asset value, as determined as of the last trading day during the first week of that month (usually a Friday unless the NYSE is closed that Friday). The Board approved reducing the annualized rate for distribution pursuant to the policy from 11% to 9% effective beginning with the June 2005 monthly distribution. The Board approved a further reduction in the annualized rate for distributions pursuant to the policy from 9% to 8% in July 2009, effective beginning with the August 2009 monthly distribution. The Board approved a subsequent reduction

Global High Income Fund Inc.

General information (unaudited)

in the annualized rate for distributions pursuant to the policy from 8% to 7% in May 2012, effective beginning with the June 2012 monthly distribution. Prior to December 20, 1999, the Fund's distributions varied based on the Fund's net investment income and realized capital gains or losses.

Monthly distributions based on a fixed percentage of the Fund's net asset value may require the Fund to make multiple distributions of long term capital gains during a single fiscal year. The Fund has received exemptive relief from the Securities and Exchange Commission that enables it to do so. The Fund's Board receives recommendations from UBS Global AM, the Fund's investment advisor, periodically and no less frequently than annually will reassess the annualized percentage of net assets at which the Fund's monthly distributions will be made.

Item 2. Code of Ethics.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 3. Audit Committee Financial Expert.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 4. Principal Accountant Fees and Services.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 5. Audit Committee of Listed Registrants.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 6. Investments.

(a) Included as part of the report to shareholders filed under Item 1 of this form.

(b) Not applicable.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

There were no purchases made by or on behalf of the Registrant or any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended, of shares of the Registrant's equity securities that are registered by the Registrant pursuant to Section 12 of the Exchange Act made in the period covered by this report.

Item 10. Submission of Matters to a Vote of Security Holders.

The registrant's Board has established a Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee will consider nominees recommended by shareholders if a vacancy occurs among those board members who are not interested persons as defined in Section 2(a)(19) of the Investment Company Act of 1940, as amended. In order to recommend a nominee, a shareholder should send a letter to the chairperson of the Nominating and Corporate Governance Committee, Richard R. Burt, care of the Secretary of the registrant at UBS Global Asset Management, UBS Building, One North Wacker Drive, Chicago, IL 60606, and indicate on the envelope Nominating and Corporate Governance Committee. The shareholder's letter should state the nominee's name and should include the nominee's resume or curriculum vitae, and must be accompanied by a written consent of the individual to stand for election if nominated for the Board and to serve if elected by shareholders.

Item 11. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
- (b) The registrant's principal executive officer and principal financial officer are aware of no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

- (a) (1) Code of Ethics Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.
 - (a) (2) Certifications of principal executive officer and principal financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 are attached hereto as Exhibit EX-99.CERT.
 - (a) (3) Written solicitation to purchase securities under Rule 23c-1 under the Investment Company Act of 1940 sent or given during the period covered by the report by or on behalf of the registrant to 10 or more persons The registrant has not engaged in such a solicitation during the period covered by this report.
 - (b) Certifications of principal executive officer and principal financial officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 are attached hereto as Exhibit EX-99.906CERT.
-

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
