TTP and TPZ distribution policies

Tortoise Pipeline & Energy Fund, Inc. (TTP) and Tortoise Power and Energy Infrastructure Fund, Inc. (TPZ) are relying on exemptive relief permitting them to make long-term capital gain distributions throughout the year. Each of TTP and TPZ, with approval of its Board of Directors (the Board), has adopted a distribution policy (the Policy) with the purpose of distributing over the course of each year, through periodic distributions as nearly equal as practicable and any required special distributions, an amount closely approximating the total taxable income of TTP and TPZ during such year and, if so determined by the Board, all or a portion of the return of capital paid by portfolio companies to TTP and TPZ during such year. In accordance with its Policy, TTP distributes a fixed amount per common share, currently \$0.45, each quarter to its common shareholders and TPZ distributes a fixed amount per common share, currently \$0.1375, each month to its common shareholders. These amounts are subject to change from time to time at the discretion of the Board. Although the level of distributions is independent of TTP s and TPZ s performance, TTP and TPZ expect such distributions to correlate with its performance over time. Each quarterly and monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions in light of TTP s and TPZ s performance for the entire calendar year and to enable TTP and TPZ to comply with the distribution requirements imposed by the Internal Revenue Code. The Board may amend, suspend or terminate the Policy without prior notice to shareholders if it deems such action to be in the best interests of TTP. TPZ and their respective shareholders. For example, the Board might take such action if the Policy had the effect of shrinking TTP s or TPZ s assets to a level that was determined to be detrimental to TTP or TPZ shareholders. The suspension or termination of the Policy could have the effect of creating a trading discount (if TTP s or TPZ s stock is trading at or above net asset value), widening an existing trading discount, or decreasing an existing premium. You should not draw any conclusions about TTP s or TPZ s investment performance from the amount of the distribution or from the terms of TTP s or TPZ s distribution policy. TTP estimates that it has distributed more than its income and net realized capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in TTP is paid back to you. A return of capital distribution does not necessarily reflect TTP s investment performance and should not be confused with yield or income. The amounts and sources of distributions reported are only estimates and are not being provided for tax reporting purposes. The actual

amounts and sources of the amounts for tax reporting purposes will depend upon TTP s and TPZ s investment experience during the remainder of their fiscal year and may be subject to changes based on tax regulations. TTP and TPZ will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Tortoise Capital Advisors

Second quarter 2015 report to closed-end fund stockholders

Dear fellow stockholders,

The broad energy sector seemed to find more balance during the second fiscal quarter ending May 31, 2015. The S&P Select Sector Energy[®] Index was essentially flat for the three- and six-month periods, returning -0.1% and -0.4%, respectively. Oil prices moved higher during the quarter, appearing to stabilize in May.

The second fiscal quarter started on an upbeat note for the broader market, with better-than-expected first quarter earnings reports and economic data showing strength in new home construction, improving employment and marginal economic growth. Though it ended essentially flat with equities performing slightly better than fixed-income securities, as the S&P 500[®] Index posted a 0.6% return and the Barclays U.S. Aggregate Bond Index, posted a -0.1% return.

Upstream

Upstream oil and gas producers, as represented by the Tortoise North American Oil & Gas Producers IndexSM, returned -4.2% for the fiscal year-to-date, compared to -0.3% for the second fiscal quarter, reflecting what appears to be an improving environment in this segment of the energy value chain. Crude oil prices were less volatile in the second fiscal quarter than the first, opening the fiscal quarter at \$49.76 per barrel, dropping to a quarter low of \$43.46 on March 17, peaking at \$60.93 on May 6, then closing the quarter at \$60.30. With the Organization of Petroleum Exporting Countries (OPEC) expected to continue to produce at least its 30 million barrels per day (MMbbl/d) quota in order to maintain market share a plan the organization confirmed at its June 5 meeting in Vienna U.S. oil producers have reined in spending, reduced headcounts and idled rigs. However, production continues to benefit from improved efficiencies, and current U.S. production is at its highest level since the early 1970s, averaging 9.6 MMbbl/d in May.¹ It is expected that production generally will decline during the second half of 2015 and into 2016 before resuming growth.

Natural gas rigs also declined during the fiscal quarter.² Nonetheless, production and inventories remain robust, which we think should keep prices at relatively low levels throughout the remainder of 2015. Increasingly efficient drilling likely will support growing production despite low natural gas prices. The bulk of growth is expected to come from the Marcellus, as uncompleted wells are finished and new infrastructure comes online to deliver gas to markets in the Northeast and the Gulf Coast. U.S. natural gas net imports decreased 9% in 2014, continuing an eight-year downward trajectory, with net natural gas imports (imports minus exports) reaching the lowest level since 1987.¹

For the week ending May 29, storage levels surpassed the five-year (2010-2014) level. The week s injection of 132 billion cubic feet was the largest net injection in more than a decade.¹ Natural gas prices opened the fiscal quarter at \$2.75 per million thermal units (MMBtu) and peaked at \$3.27 MMBtu on March 5 as colder weather ravaged |much of the nation, particularly the East Coast. Prices hit their low for the period at \$2.48 on April 27 and then closed the fiscal quarter at \$2.64 per MMBtu.

Midstream

Following a somewhat challenging first fiscal quarter, master limited partnerships (MLPs), as represented by the Tortoise MLP Index[®] posted a -0.3% return for the second fiscal quarter and -4.8% for fiscal year-to-date through May 31, 2015. Midstream MLPs dramatically outperformed upstream MLPs for the fiscal year to date, as investors continued to demonstrate their preference for midstream MLPs, which generally have less direct commodity price risk than their upstream counterparts.

Broader pipeline companies fared better than MLPs (which includes companies across the energy value chain) during the second fiscal quarter, as evidenced by the 1.1% return posted by the Tortoise North American Pipeline IndexSM. Even as rig counts have come down dramatically, North American production has continued to be strong, underscoring the sustained need for greater pipeline takeaway capacity. Investment within the segment remains strong, with new midstream projects placed in service during the second quarter and additional projects scheduled to commence later in 2015 and into 2016. Our projection for capital investment in MLP, pipeline and related organic growth projects from 2015 through 2017 remains strong at approximately \$160 billion.

Downstream

Low oil prices have benefited refineries, reducing their costs and increasing demand for refined products, such as gasoline and diesel fuel. Meanwhile, continued strong natural gas production is supporting the rapid expansion of petrochemical companies that use natural gas as a

feedstock to make many household products. Over the last three years the Environmental Protection Agency and state agencies have issued draft or final permits to build or expand more than 100 oil, gas or chemical facilities along the Gulf Coast, with a dozen more applications pending.³ Inexpensive, abundant natural gas also is driving new construction of fertilizer plants in various sections of the country.

(unaudited)

2

Capital markets

Capital markets remained supportive during the period, continuing to demonstrate their confidence in companies across the energy value chain. Total E&P capital raised was nearly \$21 billion, with nearly \$9 billion of that in equity. Capital markets also remained supportive for MLPs, which raised approximately \$7 billion in equity and more than \$11 billion in debt. Other pipeline companies added approximately \$1.5 billion each in both debt and equity offerings. Power companies in the downstream segment raised more than \$17 billion total capital for the fiscal quarter.

There were three MLP initial public offerings (IPOs) (including a supplier of wood pellets used for power generation; one of the largest owners of oil and gas mineral interests in the U.S.; and an owner of natural gas pipelines) and one C-corporation pipeline IPO during the second fiscal quarter, together totaling approximately \$2.4 billion. Merger and acquisition activity was also healthy during the second fiscal quarter, although less robust than in the first fiscal quarter, with MLP and pipeline transactions totaling approximately \$25 billion.

Concluding thoughts

Despite some current headwinds, we continue to believe the North American energy sector presents long-term investment opportunities. It appears that oil prices have somewhat stabilized as compared to the volatility experienced earlier in the year, and we believe the second half of 2015 will bring a more balanced supply/demand equation, supporting higher crude oil prices over time.

Sincerely,

The Managing Directors at Tortoise Capital Advisors, L.L.C.

The Tortoise North American Oil & Gas Producers IndexSM is a float-adjusted, capitalization weighted index of North American energy companies engaged primarily in the production of crude oil, condensate, natural gas or natural gas liquids (NGLs). The S&P 500[®] index is an unmanaged market-value-weighted index of stocks, which is widely regarded as the standard for measuring large-cap U.S. stock market performance. The Tortoise North American Pipeline IndexSM is a float-adjusted, capitalization-weighted index of energy pipeline companies domiciled in the United States and Canada.

The Tortoise MLP Index[®] is a float-adjusted, capitalization-weighted index of energy master limited partnerships (MLPs). The Tortoise Midstream MLP Index[®], a sub-index of the Tortoise MLP Index[®], is comprised of all constituents included in the following sub sectors: Crude Oil Pipelines, Gathering & Processing, Natural Gas Pipelines and Refined Products Pipelines. The Tortoise Upstream IndexSM is comprised of all constituents included in the Tortoise MLP Index s Coal and Oil & Gas Productions sub sector indices.

The indices are the exclusive property of Tortoise Index Solutions, LLC, which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) (S&P Dow Jones Indices) to calculate and maintain the Tortoise MLP IndexTortoise North American Pipeline IndexSM and Tortoise North American Oil and Gas Producers IndexSM. Tortoise Energy Independence Fund, Inc. (NDP)

Fund description

NDP is a closed-end fund that invests primarily in equity securities of upstream North American energy companies that engage in the exploration and production of crude oil, condensate, natural gas and natural gas liquids that generally have a significant presence in North American oil and gas fields, including shale reservoirs. NDP seeks a high level of total return with an emphasis on current distributions paid to stockholders.

Fund performance review

The fund s market-based and NAV-based total returns for the second fiscal quarter ending May 31, 2015 were -6.3% and -0.1%, respectively (including the reinvestment of distributions), compared to the Tortoise North American Oil and Gas Producers IndexSM, which returned -0.3%. Though negative, the fund s performance reflects a relatively improved market backdrop as oil prices appeared to have somewhat stabilized. The discount of the fund s stock price relative to its NAV widened during the quarter, ending at -9.9%.

2nd fiscal quarter performance highlights

Market-based total return	(6.3)%
NAV-based total return	(0.1)%
Premium (discount) to NAV (as of 5/31/2015)	(9.9)%
Distributions paid per share	\$0.4375
Distribution rate (as of 5/31/2015)	9.0%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%

Key asset performance drivers

A number of factors influenced the fund s asset performance during the second fiscal quarter.

The fund s strategic focus on crude oil and natural gas producers in premier basins, particularly the Marcellus for natural gas and the Permian for crude oil, contributed positively to the fund s absolute and relative performance. An overweight exposure to the Mid-Continent region also helped in both absolute and relative terms.

Natural gas producers contributed more in absolute terms due to continued development in the Marcellus, although the fund s larger exposure to liquids producers boosted relative performance, as gas prices moved lower and oil rebounded slightly during the quarter.

The fund s holdings in midstream transporters of oil and gas had little effect on performance during the fiscal quarter, with the exception of refined product pipeline companies. Those refined pipeline companies with exposure to crude oil assets detracted the most due to market concern that slowing production may result in fewer pipeline projects.

The fund s covered call strategy continued to generate current income. In higher-volatility environments, we typically extend the out-of-the-money percentage while seeking to generate the same monthly income. The notional amount of the fund s covered calls averaged approximately 65% of total assets, and their out-of-the-money percentage at the time written averaged approximately 9.2% during the quarter.

Index returns are pre-expenses and taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost.

4

Leverage update

The fund s leverage utilization increased slightly during 2nd quarter 2015. The fund utilizes all floating rate leverage that had an interest rate of 0.98% at May 31, 2015. Leverage represented 16.3% of total assets at quarter-end, slightly above the long-term target level of 15% of total assets. The interest rate on the fund s leverage will vary in the future along with changing floating rates.

Distributable cash flow and distributions

Distributable cash flow (DCF) is income from investments less expenses. Income from investments includes the amount we receive as cash or paid-in-kind distributions from common stock, master limited partnerships (MLPs) or affiliates of MLPs in which we invest and dividend payments on short-term investments we own. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments increased approximately 1.4% as compared to 1st quarter 2015. This was primarily due to an increase in net premiums on options written, offset by the impact of various portfolio trading and merger activity. Operating expenses, consisting primarily of fund advisory fees, increased slightly during the quarter due to increased asset-based fees. Total leverage costs rose slightly during the quarter, primarily due to increased leverage utilization. As a result of the changes in income and expenses, DCF increased by approximately 0.7% as compared to 1st quarter 2015.

We maintained our quarterly distribution of \$0.4375 per share during 2nd quarter 2015. We may designate a portion of our quarterly distributions as capital gains and we may also distribute additional capital gains in the last calendar quarter of the year if necessary to meet minimum annual distribution requirements and to avoid being subject to excise taxes.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows:

(1) U.S. generally accepted accounting principles (GAAP) recognizes that a significant portion of the cash distributions received from our investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (2) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (3) net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during our fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses).

Net Investment Loss on the Statement of Operations is adjusted as follows to reconcile to DCF for 2015 fiscal year-to-date and 2nd quarter 2015 (in thousands):

		2015 YTD	2nd	Qtr 2015
Net investment loss	\$	(860)	\$	(552)
Adjustments to reconcile to DCF:				
Net premiums on options written Distributions characterized as	_	10,573		5,354
return of capital		2,094		1,121
Dividends paid in stock		515		259
	\$	12,322	\$	6,182

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding our critical accounting policies, results of operations, leverage and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on our distributions, please visit our Web site at www.tortoiseadvisors.com.

(4) Annualized for periods less than one full year.

(5) Computed by averaging month-end values within each period.

(6) Leverage consists of outstanding borrowings under the revolving credit facility.

(7) Computed by averaging daily net assets within each period.

6

Tortoise Energy Infrastructure Corp. (TYG)

Fund description

TYG is a closed-end fund that invests primarily in equity securities of master limited partnerships (MLPs) and their affiliates that transport, gather, process or store natural gas, natural gas liquids (NGLs), crude oil and refined petroleum products. TYG seeks a high level of total return with an emphasis on current distributions paid to stockholders.

Fund performance review

The fund s market-based and NAV-based total returns for the second fiscal quarter ending May 31, 2015 were -2.5% and -1.9%, respectively (including the reinvestment of distributions), compared to the Tortoise MLP Index®, which returned -0.3%. Though negative, the fund s performance reflects a relatively improved market backdrop as oil prices appeared to have somewhat stabilized. Nonetheless, concern about rising interest rates and low oil prices continued to be headwinds for midstream MLPs. The discount of the fund s stock price relative to its NAV widened during the quarter, ending at -7.1%.

2nd fiscal quarter performance highlights

Market-based total return	(2.5)%
NAV-based total return	(1.9)%
Premium (discount) to NAV (as of 5/31/2015)	(7.1)%
Distributions paid per share	\$0.645
Distribution rate (as of 5/31/2015)	6.1%
Quarter-over-quarter distribution increase	0.8%
Year-over-year distribution increase	11.2%

Key asset performance drivers

A number of factors influenced the fund s asset performance during the second fiscal quarter.

Crude oil pipeline MLPs detracted the most from absolute performance during the fiscal quarter. Although crude oil pipeline MLPs were less negatively affected by falling oil prices earlier in the year than other segments of the energy value chain, they have also been slower to rebound due to market concern in the short term that slowing production may result in fewer pipeline projects. The fund s overweight stake resulted in relative underperformance in this arena.

Refined product pipeline MLPs hurt absolute and relative performance. The names that retreated the most were those with exposure to crude oil pipeline assets, along with previously strong performers that pulled back during the fiscal quarter.

Natural gas pipeline MLPs restrained absolute and relative performance, despite the continuing need for additional pipeline infrastructure.

Gathering and processing MLPs helped in absolute terms. The top contributor in this group was Williams Partners, L.P., which became an acquisition candidate by Williams Companies in a deal valued at approximately \$14 billion, news that was well received by the market. In June, Williams Companies announced a broader strategic review, putting the pending transaction in doubt, which tempered performance for Williams Partners, L.P. However, the fund s stake in companies with NGL exposure hurt relative performance as NGL prices remained low.

The fund s performance was once again helped by its midstream focus, which steered it away from upstream MLPs that continued to struggle in a low commodity price environment.

Index returns are pre-expenses and taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost.

(unaudited)

Tortoise Energy Infrastructure Corp. (TYG) (continued)

Leverage update

The fund increased leverage utilization by \$13.8 million during the 2nd quarter 2015, with proceeds primarily used to fund additional portfolio investments. During the quarter, \$110 million of debt with a fixed rate of 6.11% matured and was refinanced with a blend of fixed and floating rate debt at a lower all-in interest rate and certain interest rate swap contracts were terminated. Leverage represented 24.4% of total assets at May 31, 2015, slightly below the long-term target level of 25% of total assets. At quarter-end, including the impact of interest rate swaps, approximately 72% of the leverage cost was fixed, the weighted-average maturity was 5.9 years and the weighted-average annual rate on our leverage was 3.24%. These rates will vary in the future as a result of changing floating rates, utilization of our credit facilities and as our leverage and swaps mature or are redeemed.

Distributable cash flow and distributions

Distributable cash flow (DCF) is distributions received from investments, less expenses. The total distributions received from our investments include the amount received by us as cash distributions from investments, paid-in-kind distributions, and dividend and interest payments. The total expenses include current or anticipated operating expenses, leverage costs and current income taxes. Current income taxes include taxes paid on our net investment income, in addition to foreign taxes, if any. Taxes incurred from realized gains on the sale of investments, expected tax benefits and deferred taxes are not included in DCF.

Distributions received from investments decreased approximately 0.9% as compared to 1st quarter 2015 due to increased distribution rates on our investments that was more than offset by the impact of various portfolio trading and merger activity. Operating expenses, consisting primarily of fund advisory fees, increased slightly during the quarter due to more days in the period, even though asset levels declined. Overall leverage costs decreased during the quarter as the impact of refinancing activity more than offset the impact of the increase in total leverage outstanding.

As a result of the changes in income and expenses, DCF decreased approximately 1.3% as compared to 1st quarter 2015. We paid a quarterly distribution of \$0.645 per share, which represents an increase of 0.8% over the prior quarter and an increase of 11.2% over the 2nd quarter 2014 distribution. A majority of the increased distribution rate over the prior year is due to the fund mergers that took place in 3rd quarter 2014 and served to reduce overall expenses in the combined entity.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between distributions received from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: the Statement of Operations, in conformity with U.S. generally accepted accounting principles (GAAP), recognizes distribution income from MLPs and common stock on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; GAAP recognizes that a significant portion of the cash distributions received from MLPs and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; and distributions received from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or MLP units), whereas such amounts are not included as income for GAAP purposes, and includes distributions related to direct investments when the purchase price is reduced in lieu of receiving cash distributions. The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense, realized and unrealized gains (losses) on interest rate swap settlements, distributions to preferred stockholders, other recurring leverage expenses, as well as taxes paid on net investment income. Non-recurring expenses related to the mergers are excluded from DCF. For 3rd quarter 2014, our DCF includes DCF from TYY and TYN for the portion of the quarter prior to the mergers (June 1, 2014 through June 22, 2014).

Net Investment Loss, before Income Taxes on the Statement of Operations is adjusted as follows to reconcile to DCF for 2015 fiscal year-to-date and 2nd quarter 2015 (in thousands):

Net investment loss, before	2015 YTD	2nd Qtr 2015
income taxes	\$(20,449)	\$ (7,600)
Adjustments to reconcile to DCF:		_
Distributions characterized as		

return of capital	86,192	40,312
Amortization of debt issuance costs	449	224
Interest rate swap expenses	(275)	(185)
DCF	\$ 65,917	\$ 32,751

Income taxes

During 2nd quarter 2015, the fund s deferred tax liability decreased by \$35 million to \$912 million, primarily as a result of the decline in value of its investment portfolio. The fund had net realized gains of \$101 million during the quarter. To the extent that the fund has taxable income, it will owe federal and state income taxes. Tax payments can be funded from investment earnings, fund assets, or borrowings.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding our critical accounting policies, results of operations, leverage, taxes and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on our distributions and results, please visit our Web site at www.tortoiseadvisors.com.

- (10) Computed by averaging daily net assets within each period.

Tortoise MLP Fund, Inc. (NTG)

Fund Description

NTG is a closed-end fund that focuses primarily on midstream energy infrastructure master limited partnerships (MLPs) that engage in the business of transporting, gathering and processing and storing natural gas and natural gas liquids (NGLs). NTG seeks to provide stockholders with a high level of total return with an emphasis on current distributions.

Fund performance review

The fund s market-based and NAV-based total returns for the second fiscal quarter ending May 31, 2015 were -5.6% and -1.4%, respectively (including the reinvestment of distributions), compared to the Tortoise MLP IndexSM, which returned -0.3%. Although oil prices appear to have somewhat stabilized, natural gas prices moved lower during the quarter, restraining the fund s performance given its larger allocation to natural gas pipeline MLPs. The discount of the fund s stock price relative to its NAV widened during the quarter, ending at -10.1%.

2nd fiscal quarter performance highlights

Market-based total return	(5.6)%
NAV-based total return	(1.4)%
Premium (discount) to NAV (as of 5/31/2015)	(10.1)%
Distributions paid per share	\$0.4225
Distribution rate (as of 5/31/2015)	7.0%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.3%

Key asset performance drivers

A number of factors influenced the fund s asset performance during the second fiscal quarter.

The fund s focus on natural gas pipeline MLPs hurt performance, as they were the greatest detractors from both absolute and relative results, despite the continuing need for additional pipeline infrastructure.

Crude oil pipeline MLPs also detracted from absolute performance during the fiscal quarter. Although crude oil pipeline MLPs were less negatively affected by falling oil prices earlier in the year than other segments of the energy value chain, they also have been slower to rebound due to market concern in the short term that slowing production may result in fewer pipeline projects. The fund s underweight exposure helped relative performance.

Refined product pipeline MLPs detracted from absolute and relative performance. The names that retreated the most were those with crude oil pipeline assets, along with previously strong performers that pulled back during the fiscal quarter.

Gathering and processing MLPs helped in absolute terms. The top contributor in this group (and among the fund s largest holdings) was Williams Partners, L.P., which became an acquisition candidate by Williams Companies in a deal valued at approximately \$14 billion, news that was well received by the market. In June, Williams Companies announced a broader strategic review, putting the pending transaction in doubt, which tempered performance for Williams Partners, L.P. However, the fund s stake in companies with NGL exposure hurt relative performance.

The fund s performance was once again helped by its midstream focus, which steered it away from upstream MLPs that continued to struggle in a low commodity price environment.

Note: Effective June 25, 2015, NTG will modify its non-fundamental investment policy that reduces the minimum amount it invests in equity securities of natural gas infrastructure MLPs from at least 70% of its total assets to at least 50%. This change is intended to provide more flexibility, broaden the portfolio s diversification and total return potential. NTG will continue to seek to provide stockholders with an efficient vehicle to invest in a portfolio consisting primarily of energy infrastructure MLPs and their affiliates. Under normal circumstances, NTG will continue to invest at least 80% of total assets in equity securities of MLPs in the energy infrastructure sector.

Index returns are pre-expenses and taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost.

10

Leverage update

The fund increased leverage utilization during 2nd quarter 2015 by \$6.8 million, with proceeds primarily used to fund additional portfolio investments. Leverage represented 24.5% of total assets at May 31, 2015, slightly below the long-term target level of 25% of total assets. Approximately 65% of the leverage cost was fixed, the weighted-average maturity was 3.0 years and the weighted-average annual rate on our leverage was 3.13%. These rates will vary in the future as a result of changing floating rates, utilization of our credit facility and as our leverage matures or is redeemed.

Distributable cash flow and distributions

Distributable cash flow (DCF) is distributions received from investments, less expenses. The total distributions received from our investments include the amount we receive as cash distributions from MLPs, paid-in-kind distributions, and dividend and interest payments. The total expenses include current or anticipated operating expenses, leverage costs and current income taxes. Current income taxes include taxes paid on our net investment income in addition to foreign taxes, if any. Taxes incurred from realized gains on the sale of investments, expected tax benefits and deferred taxes are not included in DCF.

Distributions received from investments decreased approximately 3.3% as compared to 1st quarter 2015 due to increased distribution rates on our investments that was more than offset by the impact of various portfolio trading and merger activity. Operating expenses, consisting primarily of fund advisory fees, increased slightly during the quarter due to more days in the period, even though asset levels declined. Leverage costs rose slightly along with a small increase in average leverage outstanding as compared to the 1st quarter 2015.

As a result of the changes in income and expenses, DCF decreased approximately 5.2% as compared to 1st quarter 2015. We paid a quarterly distribution of \$0.4225 per share, which was equal to the distribution paid in the prior quarter and an increase of 0.3% over the 2nd quarter 2014 distribution.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between distributions received from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: the Statement of Operations, in conformity with U.S. generally accepted accounting principles (GAAP), recognizes distribution income from MLPs and common stock on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; GAAP recognizes that a significant portion of the cash distributions received from MLPs are characterized as a return of capital and therefore excluded from

investment income, whereas the DCF calculation includes the return of capital; and distributions received from investments in the DCF calculation include the value of dividends paid-in-kind (additional stock or MLP units), whereas such amounts are not included as income for GAAP purposes, and includes distributions related to direct investments when the purchase price is reduced in lieu of receiving cash distributions. The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense, distributions to preferred stockholders, other recurring leverage expenses, as well as taxes paid on net investment income.

Net Investment Income (Loss), before Income Taxes on the Statement of Operations is adjusted as follows to reconcile to DCF for 2015 fiscal year-to-date and 2nd quarter 2015 (in thousands):

	2015 YTD	2nd Qtr 2015
Net investment income (loss),		
before income taxes	\$ (7,286)	\$ 1,413
Adjustments to reconcile to DCF:		
Distributions characterized as		
return of capital	46,036	17,442
Amortization of debt issuance costs	190	96
DCF	\$ 38,940	\$ 18,951

Income taxes

During 2nd quarter 2015, the fund s deferred tax liability decreased by \$13 million to \$304 million, primarily as a result of the decline in value of its investment portfolio. The fund had net realized gains of \$41 million during the quarter. As of November 30, 2014, the fund had net operating losses of \$166 million for federal income tax purposes. To the extent that the fund has taxable income in the future that is not offset by net operating losses, it will owe federal and state income taxes. Tax payments can be funded from investment earnings, fund assets, or borrowings.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding our critical accounting policies, results of operations, leverage, taxes and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on our distributions and results, please visit our Web site at www.tortoiseadvisors.com.

Tortoise Pipeline & Energy Fund, Inc. (TTP)

Fund description

TTP is a closed-end fund that invests primarily in equity securities of pipeline companies that transport natural gas, natural gas liquids (NGLs), crude oil and refined products and, to a lesser extent, in other energy infrastructure companies. TTP seeks a high level of total return with an emphasis on current distributions paid to stockholders.

Fund performance review

The fund s market-based and NAV-based total returns for the second fiscal quarter ending May 31, 2015 were -3.7% and 0.5%, respectively (including the reinvestment of distributions), compared to the Tortoise North American Pipeline IndexSM, which returned 1.1%. This performance reflects a relatively improved market backdrop as oil prices appeared to have somewhat stabilized, although concerns about rising interest rates and the low price of oil continued to be headwinds for the fund during the period. The discount of the fund s stock price relative to its NAV widened during the quarter, ending at -13.8%.

2nd fiscal quarter performance highlights

Market-based total return	(3.7)%
NAV-based total return	0.5%
Premium (discount) to NAV (as of 5/31/2015)	(13.8)%
Distributions paid per share	\$0.45
Distribution rate (as of 5/31/2015)	6.5%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	10.4%

Please refer to the inside front cover of this report for important information about the fund s distribution policy.

Key asset performance drivers

A number of factors influenced the fund s asset performance during the second fiscal quarter.

Crude oil pipeline holdings detracted from both absolute and relative performance during the fiscal quarter. Although crude oil pipeline companies were less negatively affected by falling oil prices earlier in the year than other segments of the energy value chain, they also have been slower to rebound due to market concern in the short term that slowing production may result in fewer pipeline projects.

Refined product pipeline holdings also detracted from absolute and relative performance. The names that detracted the most were those that had exposure to crude oil pipeline assets, along with previously strong performers that pulled back during the fiscal quarter.

Exposure to natural gas pipeline companies added the most to absolute performance and also helped relative results due to the continuing need for additional pipeline takeaway capacity, particularly out of the Northeast, where needs are most critical.

Gathering and processing companies helped in absolute terms. The top contributor in this group was Williams Companies, which announced its intended acquisition of Williams Partners, L.P. in a deal valued at approximately \$14 billion, which was well received by the market. In June, Williams Companies announced a broader strategic review, putting the pending transaction in doubt, further boosting performance for Williams Companies. However, the fund s overweight stake in companies with NGL exposure hurt relative performance as NGL prices remained low.

The fund s covered call strategy, which focuses on independent energy companies that are key pipeline transporters, enabled the fund to generate current income. In higher volatility environments, we typically extend the out-of-the-money and try to generate the same monthly income. The notional amount of the fund s covered calls averaged approximately 10% of total assets, and their out-of-the-money percentage at the time written averaged approximately 8.2% during the quarter.

Index returns are pre-expenses and taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost.

(unaudited)

Tortoise Pipeline & Energy Fund, Inc. (TTP) (continued)

Leverage update

The fund decreased overall leverage utilization during 2nd quarter 2015 by \$0.9 million. Leverage represented 21.5% of total assets at May 31, 2015, below the long-term target level of 25% of total assets. Approximately 49% of the leverage cost was fixed, the weighted-average maturity was 3.6 years and the weighted-average annual rate on our leverage was 2.68%. These rates will vary in the future as a result of changing floating rates, utilization of our credit facility and as our leverage matures or is redeemed.

Distributable cash flow and distributions

Distributable cash flow (DCF) is income from investments less expenses. Income from investments includes the amount we receive as cash or paid-in-kind distributions from common stock, master limited partnerships (MLPs), affiliates of MLPs, and pipeline and other energy companies in which we invest, and dividend payments on short-term investments we own. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments decreased approximately 2.1% as compared to 1st quarter 2015, primarily due to lower net premiums on options written which was slightly offset by higher distribution rates on investments. Operating expenses, consisting primarily of fund advisory fees, increased during the quarter due to a reduction in the advisory fee waiver that took place during the prior quarter and increased asset-based fees. Leverage costs increased slightly during the quarter due to more days in the period, although refinancing activity that took place during the prior quarter lowered the fund s weighted-average leverage cost. As a result of the changes in income and expenses, DCF declined by approximately 4.5% as compared to 1st quarter 2015. In addition, the fund had net realized gains on investments of \$1.7 million during 2nd quarter 2015.

We paid a quarterly distribution of \$0.45 per share, which was equal to the regular distribution paid in the prior quarter and represents an increase of 10.4% over the prior year. We expect that the payment of increased quarterly distributions will cover the majority of our required annual distributions of net investment company taxable income and net realized gains for income and excise tax purposes, although an additional payment may be made in the last calendar quarter of the year to cover any remaining required minimum distribution amounts and to avoid being subject to excise taxes. The fund s distribution policy is described on the inside front cover of this report.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) the Statement of Operations, in conformity with U.S. generally accepted accounting principles (GAAP), recognizes distributions and dividend income from MLPs and common stock on their ex-dates, whereas the DCF calculation may reflect distributions and dividend income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during our fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses).

Net Investment Income on the Statement of Operations is adjusted as follows to reconcile to DCF for 2015 fiscal year-to-date and 2nd quarter 2015 (in thousands):

Net investment income	2015 YTD \$ 1,385	2nd Qtr 2015 \$ 730
Adjustments to reconcile to DCF:		
Net premiums on options written	2,638	1,242
Distributions characterized as		
return of capital	2,619	1,263
Dividends paid in stock	632	318
Amortization of debt issuance costs	40	20

DCF	\$ 7,314	\$ 3,573

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding our critical accounting policies, results of operations, leverage and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on our distributions, please visit our Web site at www.tortoiseadvisors.com.

TTP Key Financial Data (supplemental unaudited information) (dollar amounts in thousands unless otherwise indicated)

The information presented below regarding Distributable Cash Flow and Selected Financial Information is supplemental non-GAAP financial information, which we believe is meaningful to understanding our operating performance. The Distributable Cash Flow Ratios include the functional equivalent of EBITDA for non-investment companies, and we believe they are an important supplemental measure of performance and promote comparisons from period-to-period. This information is supplemental, is not inclusive of required financial disclosures (e.g. Total Expense Ratio), and should be read in conjunction with our full financial statements.

(1)Q1 is the period from December through February. Q2 is the period from March through May. Q3 is the period from June through August. Q4 is the period from September through November.

(2) Leverage costs include interest expense, distributions to preferred stockholders and other recurring leverage expenses.

(3) Net investment income (loss) on the Statement of Operations is adjusted as follows to reconcile to Distributable Cash Flow (DCF): increased by net premiums on options written, the return of capital on distributions, the value of paid-in-kind distributions, and amortization of debt issuance costs.

(4) Annualized for periods less than one full year.

(5)Q1 2015 includes a \$0.15 per share distribution paid to meet the required distribution amount for 2014, in addition to the regular quarterly distribution of \$0.45 per share.

(6) Computed by averaging month-end values within each period.(7) Leverage consists of senior notes, preferred stock and outstanding borrowings under the revolving credit facility.

(8) Computed by averaging daily net assets within each period.

Tortoise Power and Energy Infrastructure Fund, Inc. (TPZ)

Fund description

TPZ is a closed-end fund that seeks to invest in fixed-income and dividend-paying equity securities of power and energy infrastructure companies that provide stable and defensive characteristics throughout economic cycles. TPZ seeks to provide a high level of current income to stockholders, with a secondary objective of capital appreciation.

Fund performance review

The fund s market-based and NAV-based total returns for the second fiscal quarter ending May 31, 2015 were 3.1% and 1.8%, respectively (including the reinvestment of distributions), compared to the performance of the TPZ Benchmark Composite*, which returned -0.7%. Although some headwinds remain, this positive performance reflects a relatively improved market backdrop as oil prices appeared to have stabilized during the quarter and the fund s fixed income and power company holdings also helped performance during a volatile market. The discount of the fund s stock price relative to its NAV narrowed during the quarter, ending at -8.3%.

2nd fiscal quarter performance highlights

Market-based total return	3.1%
NAV-based total return	1.8%
Premium (discount) to NAV (as of 5/31/2015)	(8.3)%
Monthly distributions paid per share	\$0.1375
Distribution rate (as of 5/31/2015)	6.2%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	10.0%

Please refer to the inside front cover of the report for important information about the fund s distribution policy.

*The TPZ Benchmark Composite includes the BofA Merrill Lynch US Energy Index (CIEN), the BofA Merrill Lynch U.S. Electricity Index (CUEL) and the Tortoise MLP Index® (TMLP). It is comprised of a blend of 70% fixed income and 30% equity securities issued by companies in the power and energy infrastructure sectors.

Key asset performance drivers

A number of factors influenced the fund s asset performance during the second fiscal quarter.

The fund s equity holdings performed better than its fixed income holdings due to concerns about rising interest rates.

Power companies, particularly YieldCos (utility and power companies with a high yield and visible growth component) added the most to performance during the guarter due to increased demand for renewable power sources, particularly in wind and solar.

Natural gas pipeline companies continued to benefit from the need for additional pipeline takeaway capacity, particularly out of the Northeast, where needs are the most critical.

Gathering and processing companies helped in absolute terms. The biggest factor driving performance for holdings in this group was the market s assumption that Williams Companies intended acquisition of Williams Partners L.P. should result in the debt being rated as investment grade. In June, Williams Companies announced a broader strategic review, putting the pending transaction in doubt, further boosting performance for Williams Companies.

Crude oil pipeline MLPs detracted from absolute performance during the quarter. Although pipeline companies were less negatively affected by falling oil prices earlier in the year than other segments of the energy value chain, they have also been slower to rebound due to market concern in the short term that slowing production may result in fewer pipeline projects.

Index returns are pre-expenses and taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost.

16

Leverage update

The fund increased leverage utilization during 2nd quarter 2015 by \$0.8 million. Leverage represented 19.8% of total assets at May 31, 2015, slightly below the long-term target level of 20% of total assets. Including the impact of interest rate swaps, about 52% of the leverage cost was fixed, the weighted-average maturity was 2.0 years and the weighted-average annual rate on our leverage was 1.71%. These rates will vary in the future as a result of changing floating rates and as our swaps mature or are redeemed.

Distributable cash flow and distributions

Distributable cash flow (DCF) is income from investments less expenses. Income from investments includes the accrued interest from corporate bonds, cash distributions and paid-in-kind distributions from master limited partnerships (MLPs) and other equity investments and dividends earned from short-term investments. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments decreased 1.2% as compared to 1st quarter 2015 due to increased distribution rates on our investments which was more than offset by the impact of various portfolio trading activity during the quarter. Operating expenses, consisting primarily of fund advisory fees, increased during the quarter due primarily due to higher asset-based fees. Total leverage costs increased as a result of increased leverage utilization during the quarter. As a result of the changes in income and expenses, DCF decreased approximately 3.6% as compared to 1st quarter 2015. In addition, the fund had net realized gains on investments of \$4.5 million during 2nd quarter 2015.

We paid monthly distributions of \$0.1375 per share during 2nd quarter 2015, an increase of 10.0% over the monthly distributions paid in the prior quarter. Our Board of Directors has declared monthly distributions of \$0.1375 per share to be paid during 3rd quarter 2015. We expect that the payment of increased monthly distributions will cover the majority of our required annual distributions of net investment company taxable income and net realized gains for income and excise tax purposes, although an additional payment may be made in the last calendar quarter of the year to cover any remaining required minimum distribution amounts and to avoid being subject to excise taxes. The fund s distribution policy is described on the inside front cover of this report.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) U.S. generally accepted accounting principles (GAAP), recognizes distribution income from MLPs and common stock on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) amortization of premium or discount for all securities is calculated using the yield to worst methodology for GAAP purposes while yield to call is used in calculating amortization for long-dated hybrid securities in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense and realized and unrealized gains (losses) on interest rate swap settlements as leverage costs.

Net Investment Income on the Statement of Operations is adjusted as follows to reconcile to DCF for 2015 fiscal year-to-date and 2nd quarter 2015 (in thousands):

	2015 YTD	2nd Qtr 2015
Net investment income	\$3,444	\$1,905
Adjustments to reconcile to DCF:		
Dividends paid in stock	502	223
Distributions characterized as		
return of capital	980	291
Interest rate swap expenses	(188)	(94)
Change in amortization methodology	116	58
DCF	\$4,854	\$2,383

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding our critical accounting policies, results of operations, leverage and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on our distributions, please visit our Web site at www.tortoiseadvisors.com.

Total Net Assets Applicable to		
Common Stockholders 100.0%)		\$313,684,807

(1) Calculated as a percentage of net assets applicable to common stockholders.

(2) All or a portion of the security is segregated as collateral for the margin borrowing facility. See Note 10 to the financial statements for further disclosure.

(3) All or a portion of the security represents cover for outstanding call option contracts written.

(4) Non-income producing security.

(5) Security distributions are paid-in-kind.

(6) Restricted securities have been fair valued in accordance with procedures approved by the Board of Directors and have a total fair value of \$902,847, which represents 0.3% of net assets. See Note 6 to the financial statements for further disclosure.

(7) Rate indicated is the current yield as of May 31, 2015.

See accompanying Notes to Financial Statements.

(1) Calculated as a percentage of net assets applicable to common stockholders.

(2) Restricted securities have been valued in accordance with fair value procedures, as more fully described in Note 2 to the financial statements and have a total fair value of \$40,376,459, which represents 19.9% of net assets. See Note 6 to the financial statements for further disclosure.
(3) All or a portion of the security is segregated as collateral for the margin borrowing facility. See Note 10 to the financial statements for further disclosure.

(4) Security distributions are paid-in-kind.

(5) A portion of the security is segregated as collateral for the unrealized depreciation of interest rate swap contracts of \$376,027.

(6) Rate indicated is the current yield as of May 31, 2015.

(7) See Note 11 to the financial statements for further disclosure.

	through May 31, 2015 (unaudited)	Year Ended November 30, 2014	Year Ended November 30, 2013	through November 30, 2012
Ratio of net investment income (loss) to average net assets before fee waiver ⁽⁸⁾	(0.66)%	(0.61)%	(0.13)%	0.38 %
Ratio of net investment income (loss) to average net assets				
after fee waiver ⁽⁸⁾ Portfolio turnover rate ⁽⁶⁾	(0.53)% 8.35 %	(0.44)% 43.21 %	0.04 % 45.56 %	0.54 % 15.68 %
Credit facility borrowings, end of period (000 s)	\$ 61,400	\$ 56,200	\$ 56,300	\$ 49,000
Asset coverage, per \$1,000 of principal amount of credit facility borrowings ⁽⁹⁾ Asset coverage ratio of credit facility borrowings ⁽⁹⁾	\$ 6,109 611 %	\$ 6,880 688 %	\$ 7,829 783 %	\$ 7,728 773 %

(1) Commencement of operations.

(2) Information presented relates to a share of common stock outstanding for the entire period.

(3) The per common share data for the years ended November 30, 2014 and 2013 and the period from July 31, 2012 through November 30, 2012 do not reflect the change in estimate of investment income and return of capital, for the respective year. See Note 2C to the financial statements for further disclosure.

(4) Less than \$0.01 for the year ended November 30, 2014.

(5) Represents the dilution per common share from underwriting and other offering costs for the period from July 31, 2012 through November 30, 2012.

(6) Not annualized for periods less than one full year.

(7) Total investment return is calculated assuming a purchase of common stock at the beginning of the period (or initial public offering price) and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to NDP s dividend reinvestment plan.

(8) Annualized for periods less than one full year.

(9) Represents value of total assets less all liabilities and indebtedness not represented by credit facility borrowings at the end of the period divided by credit facility borrowings outstanding at the end of the period.

See accompanying Notes to Financial Statements.

(1) Information presented relates to a share of common stock outstanding for the entire period.

(2) The per common share data for the years ended November 30, 2014, 2013, 2012, 2011 and 2010 do not reflect the change in estimate of investment income and return of capital, for the respective year. See Note 2C to the financial statements for further disclosure.

- (3) Represents the premium on the shelf offerings of \$0.02 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2014. Represents the premium on the shelf offerings of \$0.06 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2013. Represents the premium on the shelf offerings of \$0.08 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2012. Represents the premium on the shelf offerings of \$0.08 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2012. Represents the premium on the shelf offerings of \$0.09 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2011. Represents the premium on the shelf offerings of \$0.25 per share, less the underwriting and offering costs of \$0.14 per share for the year ended November 30, 2010.
 (4) Not annualized for periods less than one full year.
- (4) Not annualized for periods less than one full year.
- (5) Total investment return is calculated assuming a purchase of common stock at the beginning of the period and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to TYG s dividend reinvestment plan.
- (6) Annualized for periods less than one full year.
- (7) Less than 0.01% for the years ended November 30, 2014 and 2013.
- (8) The expense ratios and net investment loss ratios do not reflect the effect of distributions to auction preferred stockholders.
- (9) For the period from December 1, 2014 through May 31, 2015, TYG accrued \$8,792,958 for current income tax expense and \$84,853,593 for net deferred income tax benefit. For the year ended November 30, 2014, TYG accrued \$52,981,532 for current income tax expense and \$90,477,388 for net deferred income tax expense. For the year ended November 30, 2013, TYG accrued \$23,290,478 for net current income tax expense and \$140,745,675 for net deferred income tax expense. For the year ended November 30, 2012, TYG accrued \$16,189,126 for current income tax expense and \$66,613,182 for net deferred income tax expense. For the year ended November 30, 2011, TYG accrued \$8,950,455 for current income tax expense and \$33,248,897 for net deferred income tax expense. For the year ended November 30, 2011, TYG accrued \$8,950,455 for current income tax expense and \$33,248,897 for net deferred income tax expense. For the year ended November 30, 2010, TYG accrued \$984,330 for current income tax expense and \$139,019,876 for net deferred income tax expense.
- (10) Represents value of total assets less all liabilities and indebtedness not represented by senior notes, credit facility borrowings and preferred stock at the end of the period divided by senior notes and credit facility borrowings outstanding at the end of the period.
- (11) Represents value of total assets less all liabilities and indebtedness not represented by senior notes, credit facility borrowings and preferred stock at the end of the period divided by senior notes, credit facility borrowings and preferred stock outstanding at the end of the period.

(1) Commencement of operations.

(2) Information presented relates to a share of common stock outstanding for the entire period.

(3) The per common share data for the years ended November 30, 2014, 2013, 2012 and 2011 and the period from July 30, 2010 through November 30, 2010 do not reflect the change in estimate of investment income and return of capital. See Note 2C to the financial statements for further disclosure.

(4) Represents the dilution per common share from underwriting and other offering costs for the period from July 30, 2010 through November 30, 2010.

(5) Represents the premiums on the shelf offerings of less than \$0.01 per share, less the underwriter discount and offering costs of less than \$0.01 per share for the years ended November 30, 2013 and 2012. Amount is less than \$0.01 for the years ended November 30, 2013 and 2012.

(6) Not annualized for periods less than one full year.

(7) Total investment return is calculated assuming a purchase of common stock at the beginning of the period (or initial public offering price) and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). This calculation also assumes reinvestment of distributions at actual prices pursuant to NTG s dividend reinvestment plan.

(8) Annualized for periods less than one full year.

(9) For the period from December 1, 2014 through May 31, 2015, NTG accrued \$53,905,849 for net deferred income tax benefit. For the year ended November 30, 2014, NTG accrued \$581,000 for current income tax expense and \$98,329,597 for net deferred income tax expense. For the year ended November 30, 2013, NTG accrued \$141,332,523 for net deferred income tax expense. For the year ended November 30, 2013, NTG accrued \$141,332,523 for net deferred income tax expense. For the year ended November 30, 2013, NTG accrued \$141,332,523 for net deferred income tax expense. For the year ended November 30, 2011, NTG accrued \$20,589 for current income tax expense. For the year ended November 30, 2011, NTG accrued \$20,589 for current income tax benefit and \$35,466,770 for net deferred income tax expense. For the period from July 30, 2010 to November 30, 2010, NTG accrued \$50,000 for current income tax expense and \$38,533,993 for net deferred income tax expense.

(10) Represents value of total assets less all liabilities and indebtedness not represented by senior notes, credit facility borrowings and preferred stock at the end of the period divided by senior notes and credit facility borrowings outstanding at the end of the period.

(11) Represents value of total assets less all liabilities and indebtedness not represented by senior notes, credit facility borrowings and preferred stock at the end of the period divided by senior notes, credit facility borrowings and preferred stock outstanding at the end of the period.
