- o This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration statement number of the earlier effective registration statement for the same offering is .

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum Offering Price Per Unit	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee
Common Stock, \$.001 par value per share(2)(3)				
Preferred Stock, \$.001 par value per share(2)				
Subscription Rights(2)				
Debt Securities(4)				
Warrants(5)				
Units(6)				
Total	\$5,000,000,000		\$5,000,000,000(7)	\$663,110(1)(8)

(1) Estimated solely for the purpose of calculating the registration fee. Pursuant to Rule 457(o) of the rules and regulations under the Securities Act of 1933 (the "Securities Act"), which permits the registration fee to be calculated on the basis of the maximum offering price of all the securities listed, the table does not specify by each class information as to the amount to be registered, proposed maximum offering price per unit or proposed maximum aggregate offering price. Pursuant to Rule 415(a)(6) under the Securities Act, this registration statement covers a total of \$1,299,773,066 of unsold securities that had previously been registered under the registrant's registration statement on Form N-2, initially filed with the Securities and Exchange Commission (the "SEC") on August 26, 2012 (No. 333-183530) (the "Prior Registration Statement") and that are being carried forward to this registration statement. The Prior Registration Statement initially registered securities for a maximum aggregate offering price of \$3,000,000,000 and of that amount the registrant has previously sold securities for an aggregate offering price of \$1,700,226,934,

(Cover continued on next page)

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Table of Contents

leaving a balance of unsold securities with an aggregate offering price of \$1,299,773,066. In connection with the registration of securities on the Prior Registration Statement, the registrant paid a registration fee of \$158,399 covering such unsold securities and which registration fee is being carried forward to this registration statement and will continue to be applied to such unsold securities pursuant to Rule 415(a)(6). Pursuant to Rule 415(a)(6), the offering of the unsold securities registered under the Prior Registration Statement will be deemed terminated as of the date of effectiveness of this registration statement. If the registrant sells any of such unsold securities pursuant to the Prior Registration Statement after the date of the initial filing, and prior to the date of effectiveness, of this registration statement, the registrant will file a pre-effective amendment to this registration statement which will reduce the number of such unsold securities included on this registration statement.

- (2) Subject to Note 7 below, there is being registered hereunder an indeterminate principal amount of common stock or preferred stock, or subscription rights to purchase any one or more securities being registered hereunder as may be sold, from time to time separately or as units in combination with other securities registered hereunder.
- (3) Includes such indeterminate number of shares of common stock as may, from time to time, be issued upon conversion or exchange of other securities registered hereunder, to the extent any such securities are, by their terms, convertible or exchangeable for common stock.
- (4) Subject to Note 7 below, there is being registered hereunder an indeterminate principal amount of debt securities as may be sold, from time to time. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$5,000,000,000.
- (5) Subject to Note 7 below, there is being registered hereunder an indeterminate principal amount of warrants as may be sold, from time to time, representing rights to purchase common stock, preferred stock or debt securities.
- (6) Subject to Note 7 below, there is being registered hereunder an indeterminate number of units. Each unit may consist of a combination of any one or more securities being registered hereunder and may also include securities being issued by third parties, including the U.S. Treasury.
- (7) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$5,000,000,000.
- (8) \$467,960 was previously paid and an additional \$36,751 was paid in connection with this filing.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THE REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(A) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATES AS THE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(A), MAY DETERMINE.

\$5,000,000,000

PROSPECT CAPITAL CORPORATION

**Common Stock
Preferred Stock
Debt Securities
Subscription Rights
Warrants
Units**

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$5,000,000,000 of our common stock, preferred stock, debt securities, subscription rights to purchase our securities, warrants representing rights to purchase our securities or separately tradeable units combining two or more of our securities, collectively, the Securities, to provide us with additional capital. Securities may be offered at prices and on terms to be disclosed in one or more supplements to this prospectus. You should read this prospectus and the applicable prospectus supplement carefully before you invest in our Securities.

We may offer shares of common stock, subscription rights, units, warrants, options or rights to acquire shares of common stock, at a discount to net asset value per share in certain circumstances. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. At our 2012 annual meeting, held on December 7, 2012, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, our stockholders approved our ability to sell or otherwise issue shares of our common stock at any level of discount from net asset value per share for a twelve month period expiring on the anniversary of the date of stockholder approval. We are currently seeking stockholder approval at our 2013 annual meeting, to be held on December 6, 2013, to continue for an additional year our ability to issue shares of common stock below net asset value, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering.

Our Securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to the offering will identify any agents, underwriters or dealers involved in the sale of our Securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents, underwriters or dealers, or the basis upon which such amount may be calculated. See "Plan of Distribution." We may not sell any of our Securities through agents, underwriters or dealers without delivery of the prospectus and a prospectus supplement describing the method and terms of the offering of such Securities. Our common stock is traded on The NASDAQ Global Select Market under the symbol "PSEC." As of October 10, 2013, the last reported sales price for our common stock was \$11.07.

Prospect Capital Corporation, or the Company, is a company that lends to and invests in middle market privately-held companies. Prospect Capital Corporation, a Maryland corporation, has been organized as a closed-end investment company since April 13, 2004 and has filed an election to be treated as a business development company under the Investment Company Act of 1940, as amended, or the 1940 Act, and is a non-diversified investment company within the meaning of the 1940 Act.

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Prospect Capital Management LLC, our investment adviser, manages our investments and Prospect Administration LLC, our administrator, provides the administrative services necessary for us to operate.

Investing in our Securities involves a heightened risk of total loss of investment. Before buying any Securities, you should read the discussion of the material risks of investing in our Securities in "Risk Factors" beginning on page 12 of this prospectus.

This prospectus contains important information about us that you should know before investing in our Securities. Please read it before making an investment decision and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission, or the SEC. You may make inquiries or obtain this information free of charge by writing to Prospect Capital Corporation at 10 East 40th Street, 44th Floor, New York, NY 10016, or by calling 212-448-0702. ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC, using the "shelf" registration process. Under the shelf registration process, we may offer, from time to time on a delayed basis, up to \$5,000,000,000 of our common stock, preferred stock, debt securities, subscription rights to purchase shares of our securities, warrants representing rights to purchase our securities or separately tradeable units combining two or more of our securities, on the terms to be determined at the time of the offering. The Securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the Securities that we may offer. Each time we use this prospectus to offer Securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement together with any exhibits and the additional information described under the heading "Available Information" and the section under the heading "Risk Factors" before you make an investment decision.

Table of Contents

PROSPECTUS SUMMARY

The following summary contains basic information about this offering. It does not contain all the information that may be important to an investor. For a more complete understanding of this offering, we encourage you to read this entire document and the documents to which we have referred.

Information contained or incorporated by reference in this prospectus may contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, which are statements about the future that may be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "plans," "anticipate," "estimate" or "continue" or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended, or the Securities Act. The matters described in "Risk Factors" and certain other factors noted throughout this prospectus and in any exhibits to the registration statement of which this prospectus is a part, constitute cautionary statements identifying important factors with respect to any such forward-looking statements, including certain risks and uncertainties, that could cause actual results to differ materially from those in such forward-looking statements. The Company reminds all investors that no forward-looking statement can be relied upon as an accurate or even mostly accurate forecast because humans cannot forecast the future.

The terms "we," "us," "our," "Prospect," and "Company" refer to Prospect Capital Corporation; "Prospect Capital Management" or the "Investment Adviser" refers to Prospect Capital Management LLC, our investment adviser; and "Prospect Administration" or the "Administrator" refers to Prospect Administration LLC, our administrator.

The Company

We are a financial services company that lends to and invests in middle market privately-held companies. In this prospectus, we use the term "middle-market" to refer to companies typically with annual revenues between \$50 million and \$2 billion.

From our inception to the fiscal year ended June 30, 2007, we invested primarily in industries related to the industrial/energy economy, which consists of companies in the discovery, production, transportation, storage and use of energy resources as well as companies that sell products and services to, or acquire products and services from, these companies. Since then, we have widened our strategy to focus on other sectors of the economy and continue to broaden our portfolio holdings.

We have been organized as a closed-end investment company since April 13, 2004 and have filed an election to be treated as a business development company under the 1940 Act. We are a non-diversified company within the meaning of the 1940 Act. Our headquarters are located at 10 East 40th Street, 44th Floor, New York, NY 10016, and our telephone number is (212) 448-0702.

The Investment Adviser

Prospect Capital Management, an affiliate of the Company, manages our investment activities. Prospect Capital Management is an investment adviser that has been registered under the Investment Advisers Act of 1940, or the Advisers Act, since March 31, 2004. Under an investment advisory and management agreement between us and Prospect Capital Management, or the Investment Advisory Agreement, we have agreed to pay Prospect Capital Management investment advisory fees, which will consist of an annual base management fee based on our gross assets, which we define as total assets without deduction for any liabilities (and, accordingly, includes the value of assets acquired with proceeds from borrowings), as well as a two-part incentive fee based on our performance.

Table of Contents

Our Investment Objective and Policies

Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We focus on making investments in private companies. We are a non-diversified company within the meaning of the 1940 Act.

We invest primarily in first and second lien senior loans and mezzanine debt. First and second lien senior loans generally are senior debt instruments that rank ahead of subordinated debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Mezzanine debt and our investments in CLOs are subordinated to senior loans and are generally unsecured. Our investments have generally ranged between \$5 million and \$250 million each, although the investment size may be more or less than this range. Our investment sizes are expected to grow as our capital base expands.

We also acquire controlling interests in companies in conjunction with making secured debt investments in such companies. These may be in several industries, including industrial, service, real estate and financial businesses.

We seek to maximize returns and minimize risk for our investors by applying rigorous analysis to make and monitor our investments. While the structure of our investments varies, we can invest in senior secured debt, senior unsecured debt, subordinated secured debt, subordinated unsecured debt, mezzanine debt, convertible debt, convertible preferred equity, preferred equity, common equity, warrants and other instruments, many of which generate current yield. While our primary focus is to seek current income through investment in the debt and/or dividend-paying equity securities of eligible privately-held, thinly-traded or distressed companies and long-term capital appreciation by acquiring accompanying warrants, options or other equity securities of such companies, we may invest up to 30% of the portfolio in opportunistic investments in order to seek enhanced returns for stockholders. Such investments may include investments in the debt and equity instruments of broadly-traded public companies. We expect that these public companies generally will have debt securities that are non-investment grade. Such investments may also include purchases (either in the primary or secondary markets) of the equity and junior debt tranches of a type of such pools known as CLOs. Structurally, CLOs are entities that are formed to hold a portfolio of senior secured loans ("Senior Secured Loans") made to companies whose debt is rated below investment grade or, in limited circumstances, unrated. The Senior Secured Loans within a CLO are limited to Senior Secured Loans which meet specified credit and diversity criteria and are subject to concentration limitations in order to create an investment portfolio that is diverse by Senior Secured Loan, borrower, and industry, with limitations on non-U.S. borrowers. CLOs are typically highly levered up to approximately 10 times, and therefore the junior debt and equity tranches that we will invest in are subject to a higher risk of total loss. Our potential investment in CLOs is limited by the 1940 Act to 30% of our portfolio. Within this 30% basket, we have and may make additional investments in debt and equity securities of financial companies and companies located outside of the United States.

The Offering

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$5,000,000,000 of our Securities, which we expect to use initially to maintain balance sheet liquidity, involving repayment of debt under our credit facility, investment in high quality short-term debt instruments or a combination thereof, and thereafter to make long-term investments in accordance with our investment objectives.

Our Securities may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to a particular offering will disclose the terms of that offering, including the name or names of any agents, underwriters or dealers involved in the sale of our Securities by us, the purchase price, and any fee,

Table of Contents

commission or discount arrangement between us and our agents, underwriters or dealers, or the basis upon which such amount may be calculated. See "Plan of Distribution." We may not sell any of our Securities through agents, underwriters or dealers without delivery of a prospectus supplement describing the method and terms of the offering of our Securities.

We may sell our common stock, subscription rights, units, warrants, options or rights to acquire our common stock, at a price below the current net asset value of our common stock upon approval of our directors, including a majority of our independent directors, in certain circumstances. Our stockholders approved our ability to issue warrants, options or rights to acquire our common stock at our 2008 annual meeting of stockholders for an unlimited time period and in accordance with the 1940 Act which provides that the conversion or exercise price of such warrants, options or rights may be less than net asset value per share at the date such securities are issued or at the date such securities are converted into or exercised for shares of our common stock. At our 2012 annual meeting, held on December 7, 2012, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, our stockholders approved our ability to sell or otherwise issue shares of our common stock at any level of discount from net asset value per share for a twelve month period expiring on the anniversary of the date of the stockholder approval. We are currently seeking stockholder approval at our 2013 annual meeting, to be held on December 6, 2013, to continue for an additional year our ability to issue shares of common stock below net asset value, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering. See "Sales of Common Stock Below Net Asset Value" in this prospectus and in the prospectus supplement, if applicable. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. We have no current intention of engaging in a rights offering, although we reserve the right to do so in the future.

Set forth below is additional information regarding the offering of our Securities:

Use of proceeds

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from selling Securities pursuant to this prospectus initially to maintain balance sheet liquidity, involving repayment of debt under our credit facility, if any, investments in high quality short-term debt instruments or a combination thereof, and thereafter to make long-term investments in accordance with our investment objective. Interest on borrowings under the credit facility is one-month LIBOR plus 275 basis points, with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the credit facility equal to either 50 basis points if at least half of the credit facility is drawn or 100 basis points otherwise. See "Use of Proceeds."

Table of Contents

Distributions

In June 2010, our Board of Directors approved a change in dividend policy from quarterly distributions to monthly distributions. Since that time, we have paid monthly distributions to the holders of our common stock and generally intend to continue to do so. The amount of the monthly distributions is determined by our Board of Directors and is based on our estimate of our investment company taxable income and net short-term capital gains. Certain amounts of the monthly distributions may from time to time be paid out of our capital rather than from earnings for the month as a result of our deliberate planning or accounting reclassifications. Distributions in excess of our current and accumulated earnings and profits constitute a return of capital and will reduce the stockholder's adjusted tax basis in such stockholder's common stock. A return of capital (1) is a return of the original amount invested, (2) does not constitute earnings or profits and (3) while such returns are initially tax free, they will have the effect of reducing the basis such that when a stockholder sells its shares, it may be subject to additional tax even if the shares are sold for less than the original purchase price. After the adjusted basis is reduced to zero, these distributions will constitute capital gains to such stockholders. Certain additional amounts may be deemed as distributed to stockholders for income tax purposes. Other types of Securities will likely pay distributions in accordance with their terms. See "Price Range of Common Stock," "Distributions" and "Material U.S. Federal Income Tax Considerations."

Taxation

We have qualified and elected to be treated for U.S. federal income tax purposes as a regulated investment company, or a RIC, under Subchapter M of the Internal Revenue Code of 1986, or the Code. As a RIC, we generally do not have to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To maintain our qualification as a RIC and obtain RIC tax treatment, we must satisfy certain source-of-income and asset diversification requirements and distribute annually at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. See "Distributions" and "Material U.S. Federal Income Tax Considerations."

Dividend reinvestment plan

We have a dividend reinvestment plan for our stockholders. This is an "opt out" dividend reinvestment plan. As a result, when we declare a dividend, the dividends are automatically reinvested in additional shares of our common stock, unless a stockholder specifically "opts out" of the dividend reinvestment plan so as to receive cash dividends. Stockholders who receive distributions in the form of stock are subject to the same U.S. federal, state and local tax consequences as stockholders who elect to receive their distributions in cash. See "Dividend Reinvestment Plan."

**The NASDAQ Global Select Market
Symbol**

PSEC

Table of Contents

Anti-takeover provisions

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain provisions that may have the effect of discouraging a third party from making an acquisition proposal for us. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price of our common stock. See "Description Of Our Capital Stock."

Management arrangements

Prospect Capital Management serves as our investment adviser. Prospect Administration serves as our administrator. For a description of Prospect Capital Management, Prospect Administration and our contractual arrangements with these companies, see "Business Management Services Investment Advisory Agreement," and "Business Management Services Administration Agreement."

Risk factors

Investment in our Securities involves certain risks relating to our structure and investment objective that should be considered by prospective purchasers of our Securities. In addition, as a business development company, our portfolio primarily includes securities issued by privately-held companies. These investments generally involve a high degree of business and financial risk, and are less liquid than public securities. We are required to mark the carrying value of our investments to fair value on a quarterly basis, and economic events, market conditions and events affecting individual portfolio companies can result in quarter-to-quarter mark-downs and mark-ups of the value of individual investments that collectively can materially affect our net asset value, or NAV. Also, our determinations of fair value of privately-held securities may differ materially from the values that would exist if there was a ready market for these investments. A large number of entities compete for the same kind of investment opportunities as we do. Moreover, our business requires a substantial amount of capital to operate and to grow and we seek additional capital from external sources. In addition, the failure to qualify as a RIC eligible for pass-through tax treatment under the Code on income distributed to stockholders could have a materially adverse effect on the total return, if any, obtainable from an investment in our Securities. See "Risk Factors" and the other information included in this prospectus for a discussion of factors you should carefully consider before deciding to invest in our Securities.

Table of Contents**Plan of distribution**

We may offer, from time to time, up to \$5,000,000,000 of our common stock, preferred stock, debt securities, subscription rights to purchase shares of our securities, warrants representing rights to purchase our securities or separately tradeable units combining two or more of our securities on the terms to be determined at the time of the offering. Securities may be offered at prices and on terms described in one or more supplements to this prospectus directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our Securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated. We may not sell Securities pursuant to this prospectus without delivering a prospectus supplement describing the method and terms of the offering of such Securities. For more information, see "Plan of Distribution."

Fees and Expenses

The following tables are intended to assist you in understanding the costs and expenses that an investor in this offering will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. In these tables, we assume that we have borrowed \$2.3 billion. We do not intend to issue preferred stock during the year. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by "you" or "us" or that "we" will pay fees or expenses, the Company will pay such fees and expenses out of our net assets and, consequently, you will indirectly bear such fees or expenses as an investor in the Company. However, you will not be required to deliver any money or otherwise bear personal liability or responsibility for such fees or expenses.

Stockholder transaction expenses:

Sales load (as a percentage of offering price)(1)	3.00%
Offering expenses borne by the Company (as a percentage of offering price)(2)	0.20%
Dividend reinvestment plan expenses(3)	None
Total stockholder transaction expenses (as a percentage of offering price)(4)	3.20%
Annual expenses (as a percentage of net assets attributable to common stock)(4):	
Management fees(5)	3.88%
Incentive fees payable under Investment Advisory Agreement (20% of realized capital gains and 20% of pre-incentive fee net investment income)(6)	3.06%
Total advisory fees	6.94%
Total interest expense(7)	4.32%
Acquired Fund Fees and Expenses(8)	0.02%
Other expenses(9)	1.21%
Total annual expenses(6)(9)	12.49%

Table of Contents

Example

The following table demonstrates the projected dollar amount of cumulative expenses we would pay out of net assets and that you would indirectly bear over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have borrowed \$2.3 billion, that our annual operating expenses would remain at the levels set forth in the table above and that we would pay the costs shown in the table above.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 123.32	\$ 293.98	\$ 449.85	\$ 782.94

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The income incentive fee under our Investment Advisory Agreement with Prospect Capital Management is unlikely to be material assuming a 5% annual return and is not included in the example. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our distributions to our common stockholders and our expenses would likely be higher. In addition, while the example assumes reinvestment of all dividends and other distributions at NAV, participants in our dividend reinvestment plan will receive a number of shares of our common stock determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See "Dividend Reinvestment Plan" for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses. Actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

- (1) In the event that the Securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the estimated applicable sales load.
- (2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the estimated offering expenses borne by us as a percentage of the offering price.
- (3) The expenses of the dividend reinvestment plan are included in "other expenses."
- (4) The related prospectus supplement will disclose the offering price and the total stockholder transaction expenses as a percentage of the offering price.
- (5) Our base management fee is 2% of our gross assets (which include any amount borrowed, i.e., total assets without deduction for any liabilities, including any borrowed amounts for non-investment purposes, for which purpose we have not and have no intention of borrowing). Although we have no intent to borrow the entire amount available under our line of credit, assuming that we borrowed \$2.3 billion, the 2% management fee of gross assets equals approximately 3.88% of net assets. Based on our borrowings as of October 10, 2013 of \$1.6 billion, the 2% management fee of gross assets equals approximately 3.44% of net assets. See "Business Management Services Investment Advisory Agreement" and footnote 6 below.
- (6) Based on the incentive fee paid during our fiscal year ended June 30, 2013, all of which consisted of an income incentive fee. The capital gain incentive fee is paid without regard to pre-incentive

Table of Contents

fee income. For a more detailed discussion of the calculation of the two-part incentive fee, see "Management Services Investment Advisory Agreement" in this prospectus.

- (7) On December 21, 2010, the Company issued \$150.0 million in aggregate principal amount of 6.25% Convertible Senior Notes due 2015, which we refer to as the 2015 Notes. See "Business General" and "Risk Factors Risks Related to our Business" in the accompanying prospectus for more detail on the 2015 Notes. On February 18, 2011, the Company issued \$172.5 million in aggregate principal amount of 5.5% Convertible Senior Notes due 2016, which we refer to as the 2016 Notes. Between January 30, 2012 and February 2, 2012, we repurchased \$5.0 million of our 2016 Notes at a price of 97.5% of par, including commissions. The transactions resulted in us recognizing \$10,000 of loss in the quarter ended March 31, 2012. See "Business General" and "Risk Factors Risks Related to our Business" in the accompanying prospectus for more detail on the 2016 Notes. On April 16, 2012, the Company issued \$130.0 million in aggregate principal amount of 5.375% Convertible Senior Notes due 2017, which we refer to as the 2017 Notes. On August 14, 2012, the Company issued \$200.0 million aggregate principal amount of 5.75% Convertible Senior Notes due 2018, which we refer to as the 2018 Notes. On December 21, 2012, the Company issued \$200.0 million aggregate principal amount of 5.875% Convertible Senior Notes due 2019, which we refer to as the 2019 Notes. The 2015 Notes, 2016 Notes, 2017 Notes, 2018 Notes and 2019 Notes are referred to collectively as the Senior Convertible Notes. On May 1, 2012 the Company issued \$100.0 million in aggregate principal amount of 6.95% Senior Notes due 2022, which we refer to as the 2022 Notes. On March 15, 2013 the Company issued \$250.0 million in aggregate principal amount of 5.875% Senior Notes due 2023, which we refer to as the 2023 Notes. As of October 10, 2013, the Company has issued \$0.5 billion in aggregate principal amount of our Prospect Capital InterNotes®. The Senior Convertible Notes, the 2022 Notes, the 2023 Notes and the Prospect Capital InterNotes® are referred to collectively as the Notes.
- (8) The Company's stockholders indirectly bear the expenses of underlying investment companies in which the Company invests. This amount includes the fees and expenses of investment companies in which the Company is invested in as of June 30, 2013. When applicable, fees and expenses are based on historic fees and expenses for the investment companies and for those investment companies with little or no operating history, fees and expenses are based on expected fees and expenses stated in the investment companies' prospectus or other similar communication without giving effect to any performance. Future fees and expenses for certain investment companies may be substantially higher or lower because certain fees and expenses are based on the performance of the investment companies, which may fluctuate over time. The amount of the Company's average net assets used in calculating this percentage was based on net assets of approximately \$2.7 billion as of June 30, 2013.
- (9) "Other expenses" are based on estimated amounts for the current fiscal year. The amount shown above represents annualized expenses during our three months ended June 30, 2013 representing all of our estimated recurring operating expenses (except fees and expenses reported in other items of this table) that are deducted from our operating income and reflected as expenses in our Statement of Operations. The estimate of our overhead expenses, including payments under an administration agreement with Prospect Administration, or the Administration Agreement, based on our projected allocable portion of overhead and other expenses incurred by Prospect Administration in performing its obligations under the Administration Agreement. "Other expenses" does not include non-recurring expenses. See "Business Management Services Administration Agreement."

Table of Contents**SELECTED CONDENSED FINANCIAL DATA**

You should read the condensed consolidated financial information below with the Consolidated Financial Statements and notes thereto included in this prospectus. Financial information below for the years ended June 30, 2013, 2012, 2011, 2010 and 2009 has been derived from the financial statements that were audited by our independent registered public accounting firm. Certain reclassifications have been made to the prior period financial information to conform to the current period presentation. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" starting on page 44 for more information.

Per share data is based on average weighted shares for the period.

Table of Contents

- (2) Includes \$207,126 of acquired portfolio investments from Patriot Capital Funding, Inc.
- (3) Total return based on market value is based on the change in market price per share between the opening and ending market prices per share in each period and assumes that dividends are reinvested in accordance with our dividend reinvestment plan. Total return based on net asset value is based upon the change in net asset value per share between the opening and ending net asset values per share in each period and assumes that dividends are reinvested in accordance with our dividend reinvestment plan.
- (4) Excludes equity investments and non-performing loans.

Table of Contents

RISK FACTORS

Investing in our Securities involves a high degree of risk. You should carefully consider the risks described below, together with all of the other information included in this prospectus, before you decide whether to make an investment in our Securities. The risks set forth below are not the only risks we face. If any of the adverse events or conditions described below occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our NAV, and the trading price of our common stock could decline, or the value of our preferred stock, debt securities, and warrants, if any are outstanding, may decline, and you may lose all or part of your investment.

Risks Relating to Our Business

Capital markets could experience a period of disruption and instability. Such market conditions have historically and could again have a material and adverse effect on debt and equity capital markets in the United States and abroad, which had, and may in the future have, a negative impact on our business and operations.

The global capital markets have historically experienced an extended period of instability as evidenced by the periodic disruptions in liquidity in the debt capital markets, significant write-offs in the financial services sector, the re-pricing of credit risk in the broadly syndicated credit market and the failure of certain major financial institutions. Despite actions of the U.S. federal government and foreign governments during such period, these events contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. While recent market conditions have improved, there can be no assurance that adverse market conditions will not repeat themselves or worsen in the future. If these adverse and volatile market conditions repeat themselves or worsen in the future, we and other companies in the financial services sector may have to access, if available, alternative markets for debt and equity capital in order to grow. Equity capital may be difficult to raise because, subject to some limited exceptions, as a BDC, we are generally not able to issue additional shares of our common stock at a price less than net asset value without first obtaining approval for such issuance from our stockholders and our independent directors. At our annual meeting of stockholders held on December 7, 2012, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, our stockholders approved our ability to sell or otherwise issue shares of our common stock at a price below its then current net asset value per share for a twelve month period expiring on the anniversary of the date of stockholder approval. It should be noted that, theoretically, we may offer up to 25% of our then outstanding common stock each day. In addition, our ability to incur indebtedness (including by issuing preferred stock) is limited by applicable regulations such that our asset coverage, as calculated in accordance with the Investment Company Act, must equal at least 200% immediately after each time we incur indebtedness. The debt capital that will be available to us in the future, if at all, may be at a higher cost and on less favorable terms and conditions than what we currently experience. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

Moreover, the re-appearance of market conditions similar to those experienced from 2007 through 2009 for any substantial length of time could make it difficult to extend the maturity of or refinance our existing indebtedness under similar terms and any failure to do so could have a material adverse effect on our business.

Given the extreme volatility and dislocation that the capital markets have historically experienced, many BDCs have faced, and may in the future face, a challenging environment in which to raise or access capital. In addition, significant changes in the capital markets, including the extreme volatility

Table of Contents

and disruption over the past several years, has had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. While most of our investments are not publicly traded, applicable accounting standards require us to assume as part of our valuation process that our investments are sold in a principal market to market participants (even if we plan on holding an investment through its maturity). As a result, volatility in the capital markets can adversely affect our investment valuations. Further, the illiquidity of our investments may make it difficult for us to sell such investments to access capital if required. As a result, we could realize significantly less than the value at which we have recorded our investments if we were required to sell them for liquidity purposes. An inability to raise or access capital could have a material adverse impact on our business, financial condition or results of operations.

The current financial market situation, as well as various social and political tensions in the United States and around the world, particularly in the Middle East, may continue to contribute to increased market volatility, may have long-term effects on the United States and worldwide financial markets, and may cause further economic uncertainties or deterioration in the United States and worldwide. Since 2010, several European Union ("EU") countries, including Greece, Ireland, Italy, Spain, and Portugal have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. We do not know how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on the United States economy and securities markets or on our investments. We monitor developments and seeks to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that it will be successful in doing so; and we may not timely anticipate or manage existing, new or additional risks, contingencies or developments, including regulatory developments in the current or future market environment.

We may suffer credit losses.

Investment in small and middle-market companies is highly speculative and involves a high degree of risk of credit loss. These risks are likely to increase during volatile economic periods, such as the U.S. and many other economies have recently been experiencing. See "Risks Related to Our Investments."

Our financial condition and results of operations will depend on our ability to manage our future growth effectively.

Prospect Capital Management has been registered as an investment adviser since March 31, 2004, and we have been organized as a closed-end investment company since April 13, 2004. Our ability to achieve our investment objective depends on our ability to grow, which depends, in turn, on the Investment Adviser's ability to continue to identify, analyze, invest in and monitor companies that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of the Investment Adviser's structuring of investments, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. As we continue to grow, Prospect Capital Management will need to continue to hire, train, supervise and manage new employees. Failure to manage our future growth effectively could have a materially adverse effect on our business, financial condition and results of operations.

We are dependent upon Prospect Capital Management's key management personnel for our future success.

We depend on the diligence, skill and network of business contacts of the senior management of the Investment Adviser. We also depend, to a significant extent, on the Investment Adviser's access to the investment professionals and the information and deal flow generated by these investment

Table of Contents

professionals in the course of their investment and portfolio management activities. The senior management team of the Investment Adviser evaluates, negotiates, structures, closes, monitors and services our investments. Our success depends to a significant extent on the continued service of the senior management team, particularly John F. Barry III and M. Grier Eliasek. The departure of any of the senior management team could have a materially adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that Prospect Capital Management will remain the Investment Adviser or that we will continue to have access to its investment professionals or its information and deal flow.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make in middle-market companies. We compete with other BDCs, public and private funds, commercial and investment banks, commercial financing companies, insurance companies, hedge funds, and, to the extent they provide an alternative form of financing, private equity funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. Some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the Investment Company Act imposes on us as a BDC and that the Code imposes on us as a RIC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to pursue attractive investment opportunities from time to time.

We do not seek to compete primarily based on the interest rates we offer and we believe that some of our competitors may make loans with interest rates that are comparable to or lower than the rates we offer. Rather, we compete with our competitors based on our existing investment platform, seasoned investment professionals, experience and focus on middle-market companies, disciplined investment philosophy, extensive industry focus and flexible transaction structuring.

We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss. As a result of operating in such a competitive environment, we may make investments that are on less favorable terms than what we may have originally anticipated, which may impact our return on these investments.

We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Borrowings and other types of financing, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. Our lenders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or any preferred stockholders. If the value of our assets increases, then leveraging would cause the net asset value to increase more sharply than it would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. Leverage is generally considered a speculative investment technique.

Table of Contents

Changes in interest rates may affect our cost of capital and net investment income.

A portion of the debt investments we make bears interest at fixed rates and other debt investments bear interest at variable rates with floors and the value of these investments could be negatively affected by increases in market interest rates. In addition, as the interest rate on our revolving credit facility is at a variable rate based on an index, an increase in interest rates would make it more expensive to use debt to finance our investments. As a result, an increase in market interest rates could both reduce the value of our portfolio investments and increase our cost of capital, which could reduce our net investment income or net increase in net assets resulting from operations.

We need to raise additional capital to grow because we must distribute most of our income.

We need additional capital to fund growth in our investments. A reduction in the availability of new capital could limit our ability to grow. We must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, to our stockholders to maintain our status as a regulated investment company, or RIC, for U.S. federal income tax purposes. As a result, such earnings are not available to fund investment originations. We have sought additional capital by borrowing from financial institutions and may issue debt securities or additional equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, we could be limited in our ability to grow, which may have an adverse effect on the value of our common stock. In addition, as a business development company, we generally may not borrow money or issue debt securities or issue preferred stock unless immediately thereafter our ratio of total assets to total borrowings and other senior securities is at least 200%. This may restrict our ability to obtain additional leverage in certain circumstances.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest or dividend rates payable on the debt or equity securities we hold, the default rate on debt securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets, and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Our most recent NAV was calculated on June 30, 2013 and our NAV when calculated effective September 30, 2013 and thereafter may be higher or lower.

Our most recently estimated NAV per share is \$10.75 on an as adjusted basis solely to give effect to our issuance of common stock since June 30, 2013 in connection with our dividend reinvestment plan, shares issued in connection with investment transactions, and our issuance of 26,733,617 shares of common stock during the period from July 1, 2013 to October 10, 2013 (including shares with settlement dates through October 16, 2013) under our at-the-market program (the "ATM Program"), \$0.03 higher than the \$10.72 determined by us as of June 30, 2013. NAV per share as of September 30, 2013 may be higher or lower than \$10.75 based on potential changes in valuations, issuances of securities, dividends paid and earnings for the quarter then ended. Our Board of Directors has not yet determined the fair value of portfolio investments at any date subsequent to June 30, 2013. Our Board of Directors determines the fair value of our portfolio investments on a quarterly basis in connection with the preparation of quarterly financial statements and based on input from independent valuation firms, the Investment Adviser, the Administrator and the Audit Committee of our Board of Directors.

Table of Contents

The Investment Adviser's liability is limited under the Investment Advisory Agreement, and we are required to indemnify the Investment Adviser against certain liabilities, which may lead the Investment Adviser to act in a riskier manner on our behalf than it would when acting for its own account.

The Investment Adviser has not assumed any responsibility to us other than to render the services described in the Investment Advisory Agreement, and it will not be responsible for any action of our Board of Directors in declining to follow the Investment Adviser's advice or recommendations. Pursuant to the Investment Advisory Agreement, the Investment Adviser and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it will not be liable to us for their acts under the Investment Advisory Agreement, absent willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties. We have agreed to indemnify, defend and protect the Investment Adviser and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it with respect to all damages, liabilities, costs and expenses resulting from acts of the Investment Adviser not arising out of willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties under the Investment Advisory Agreement. These protections may lead the Investment Adviser to act in a riskier manner when acting on our behalf than it would when acting for its own account.

Potential conflicts of interest could impact our investment returns.

Our executive officers and directors, and the executive officers of the Investment Adviser, may serve as officers, directors or principals of entities that operate in the same or related lines of business as we do or of investment funds managed by our affiliates. Accordingly, they may have obligations to investors in those entities, the fulfillment of which might not be in our best interests or those of our stockholders. Nevertheless, it is possible that new investment opportunities that meet our investment objective may come to the attention of one of these entities in connection with another investment advisory client or program, and, if so, such opportunity might not be offered, or otherwise made available, to us. However, as an investment adviser, Prospect Capital Management has a fiduciary obligation to act in the best interests of its clients, including us. To that end, if Prospect Capital Management or its affiliates manage any additional investment vehicles or client accounts in the future, Prospect Capital Management will endeavor to allocate investment opportunities in a fair and equitable manner over time so as not to discriminate unfairly against any client. If Prospect Capital Management chooses to establish another investment fund in the future, when the investment professionals of Prospect Capital Management identify an investment, they will have to choose which investment fund should make the investment.

In the course of our investing activities, under the Investment Advisory Agreement we pay base management and incentive fees to Prospect Capital Management, and reimburse Prospect Capital Management for certain expenses it incurs. As a result of the Investment Advisory Agreement, there may be times when the senior management team of Prospect Capital Management has interests that differ from those of our stockholders, giving rise to a conflict.

The Investment Adviser receives a quarterly income incentive fee based, in part, on our pre-incentive fee net investment income, if any, for the immediately preceding calendar quarter. This income incentive fee is subject to a fixed quarterly hurdle rate before providing an income incentive fee return to Prospect Capital Management. This fixed hurdle rate was determined when then current interest rates were relatively low on a historical basis. Thus, if interest rates rise, it would become easier for our investment income to exceed the hurdle rate and, as a result, more likely that Prospect Capital Management will receive an income incentive fee than if interest rates on our investments remained constant or decreased. Subject to the receipt of any requisite stockholder approval under the 1940 Act, our Board of Directors may adjust the hurdle rate by amending the Investment Advisory Agreement.

Table of Contents

The income incentive fee payable by us is computed and paid on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan that has a deferred interest feature, it is possible that interest accrued under such loan that has previously been included in the calculation of the income incentive fee will become uncollectible. If this happens, Prospect Capital Management is not required to reimburse us for any such income incentive fee payments. If we do not have sufficient liquid assets to pay this incentive fee or distributions to stockholders on such accrued income, we may be required to liquidate assets in order to do so. This fee structure could give rise to a conflict of interest for Prospect Capital Management to the extent that it may encourage Prospect Capital Management to favor debt financings that provide for deferred interest, rather than current cash payments of interest.

We have entered into a royalty-free license agreement with Prospect Capital Management. Under this agreement, Prospect Capital Management agrees to grant us a non-exclusive license to use the name "Prospect Capital." Under the license agreement, we have the right to use the "Prospect Capital" name for so long as Prospect Capital Management or one of its affiliates remains our investment adviser. In addition, we rent office space from Prospect Administration, an affiliate of Prospect Capital Management, and pay Prospect Administration our allocable portion of overhead and other expenses incurred by Prospect Administration in performing its obligations as Administrator under the Administration Agreement, including rent and our allocable portion of the costs of our chief financial officer and chief compliance officer and their respective staffs. This may create conflicts of interest that our Board of Directors monitors.

Our incentive fee could induce Prospect Capital Management to make speculative investments.

The incentive fee payable by us to Prospect Capital Management may create an incentive for the Investment Adviser to make investments on our behalf that are more speculative or involve more risk than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable is determined (calculated as a percentage of the return on invested capital) may encourage the Investment Adviser to use leverage to increase the return on our investments. Increased use of leverage and this increased risk of replacement of that leverage at maturity would increase the likelihood of default, which would disfavor holders of our common stock. Similarly, because the Investment Adviser will receive an incentive fee based, in part, upon net capital gains realized on our investments, the Investment Adviser may invest more than would otherwise be appropriate in companies whose securities are likely to yield capital gains, as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The incentive fee payable by us to Prospect Capital Management could create an incentive for the Investment Adviser to invest on our behalf in instruments, such as zero coupon bonds, that have a deferred interest feature. Under these investments, we would accrue interest income over the life of the investment but would not receive payments in cash on the investment until the end of the term. Our net investment income used to calculate the income incentive fee, however, includes accrued interest. For example, accrued interest, if any, on our investments in zero coupon bonds will be included in the calculation of our incentive fee, even though we will not receive any cash interest payments in respect of payment on the bond until its maturity date. Thus, a portion of this incentive fee would be based on income that we may not have yet received in cash in the event of default may never receive.

We may be obligated to pay our Investment Adviser incentive compensation even if we incur a loss.

The Investment Adviser is entitled to incentive compensation for each fiscal quarter based, in part, on our pre-incentive fee net investment income if any, for the immediately preceding calendar quarter above a performance threshold for that quarter. Accordingly, since the performance threshold is based

Table of Contents

on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses or depreciation that we may incur in the fiscal quarter, even if such capital losses or depreciation result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay the Investment Adviser incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

The Investment Adviser and Administrator have the right to resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our business, financial condition and results of operations.

The Investment Adviser and Administrator have the right, under the Investment Advisory Agreement and Administration Agreement, respectively, to resign at any time upon not less than 60 days' written notice, whether we have found a replacement or not. If the Investment Adviser or Administrator resigns, we may not be able to find a replacement or hire internal management or administration with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our business, financial condition and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities or our internal administration activities, as applicable, is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by the Investment Adviser and its affiliates or the Administrator and its affiliates. Even if we are able to retain comparable management or administration, whether internal or external, the integration of such management or administration and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our business, financial condition and results of operations.

Changes in the laws or regulations governing our business or the businesses of our portfolio companies and any failure by us or our portfolio companies to comply with these laws or regulations, could negatively affect the profitability of our operations or of our portfolio companies.

We are subject to changing rules and regulations of federal and state governments, as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and The NASDAQ Global Select Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations. In particular, changes in the laws or regulations or the interpretations of the laws and regulations that govern BDCs, RICs or non-depository commercial lenders could significantly affect our operations and our cost of doing business. We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, financial condition and results of operations.

Table of Contents

Foreign and domestic political risk may adversely affect our business.

We are exposed to political risk to the extent that Prospect Capital Management, on its behalf and subject to its investment guidelines, transacts in securities in the U.S. and foreign markets. The governments in any of these jurisdictions could impose restrictions, regulations or other measures, which may have a material adverse impact on our strategy.

Risks Relating to Our Operation as a Business Development Company

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than "qualifying assets" unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could be found to be in violation of the 1940 Act provisions applicable to BDCs, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. Because most of our investments will be in private companies, and therefore will be relatively illiquid, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

If we fail to qualify as a RIC, we will have to pay corporate-level taxes on our income, and our income available for distribution would be reduced.

To maintain our qualification for U.S. federal income tax purposes as a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code, and obtain RIC tax treatment, we must meet certain source of income, asset diversification and annual distribution requirements.

The source of income requirement is satisfied if we derive at least 90% of our annual gross income from interest, dividends, payments with respect to certain securities loans, gains from the sale or other disposition of securities or options thereon or foreign currencies, or other income derived with respect to our business of investing in such securities or currencies, and net income from interests in "qualified publicly traded partnerships," as defined in the Code.

The annual distribution requirement for a RIC is satisfied if we distribute at least 90% of our ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. Because we use debt financing, we are subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants that could, under certain circumstances, restrict us from making distributions necessary to qualify for RIC tax treatment. If we are unable to obtain cash from other sources, we may fail to qualify for RIC tax treatment and, thus, may be subject to corporate-level income tax on all of our taxable income.

To maintain our qualification as a RIC, we must also meet certain asset diversification requirements at the end of each quarter of our taxable year. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses.

If we fail to qualify as a RIC for any reason or become subject to corporate income tax, the resulting corporate taxes would substantially reduce our net assets, the amount of income available for

Table of Contents

distribution, and the actual amount of our distributions. Such a failure would have a materially adverse effect on us and our stockholders. For additional information regarding asset coverage ratio and RIC requirements, see "Material U.S. Federal Income Tax Considerations" and "Business Regulation as a Business Development Company".

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For U.S. federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount or payment-in-kind interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Such amounts could be significant relative to our overall investment activities. We also may be required to include in taxable income certain other amounts that we do not receive in cash. While we focus primarily on investments that will generate a current cash return, our investment portfolio currently includes, and we may continue to invest in, securities that do not pay some or all of their return in periodic current cash distributions.

The income incentive fee payable by us is computed and paid on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the income incentive fee will become uncollectible.

Since in some cases we may recognize taxable income before or without receiving cash representing such income, we may have difficulty distributing at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, as required to maintain RIC tax treatment. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements. If we are not able to obtain cash from other sources, we may fail to qualify for RIC treatment and thus become subject to corporate-level income tax. See "Material U.S. Federal Income Tax Considerations" and "Business Regulation as a Business Development Company".

Regulations governing our operation as a business development company affect our ability to raise, and the way in which we raise, additional capital.

We have incurred indebtedness under our revolving credit facility and through the issuance of the Notes and, in the future, may issue preferred stock or debt securities and/or borrow additional money from banks or other financial institutions, which we refer to collectively as "senior securities," up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted, as a BDC, to incur indebtedness or issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test, which would prohibit us from paying dividends in cash or other property and could prohibit us from qualifying as a RIC. If we cannot satisfy this test, we may be required to sell a portion of our investments or sell additional shares of common stock at a time when such sales may be disadvantageous in order to repay a portion of our indebtedness or otherwise increase our net assets. In addition, issuance of additional common stock could dilute the percentage ownership of our current stockholders in us.

As a BDC regulated under provisions of the 1940 Act, we are not generally able to issue and sell our common stock at a price below the current net asset value per share without stockholder approval. If our common stock trades at a discount to net asset value, this restriction could adversely affect our ability to raise capital. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the current net asset value of our common stock in certain

Table of Contents

circumstances, including if (i)(1) the holders of a majority of our shares (or, if less, at least 67% of a quorum consisting of a majority of our shares) and a similar majority of the holders of our shares who are not affiliated persons of us approve the sale of our common stock at a price that is less than the current net asset value, and (2) a majority of our Directors who have no financial interest in the transaction and a majority of our independent Directors (a) determine that such sale is in our and our stockholders' best interests and (b) in consultation with any underwriter or underwriters of the offering, make a good faith determination as of a time either immediately prior to the first solicitation by us or on our behalf of firm commitments to purchase such shares, or immediately prior to the issuance of such shares, that the price at which such shares are to be sold is not less than a price which closely approximates the market value of such shares, less any distributing commission or discount or if (ii) a majority of the number of the beneficial holders of our common stock entitled to vote at our annual meeting, without regard to whether a majority of such shares are voted in favor of the proposal, approve the sale of our common stock at a price that is less than the current net asset value per share.

To generate cash for funding new investments, we pledged a substantial portion of our portfolio investments under our revolving credit facility. These assets are not available to secure other sources of funding or for securitization. Our ability to obtain additional secured or unsecured financing on attractive terms in the future is uncertain.

Alternatively, we may securitize our future loans to generate cash for funding new investments. See "Securitization of our assets subjects us to various risks."

Securitization of our assets subjects us to various risks.

We may securitize assets to generate cash for funding new investments. We refer to the term securitize to describe a form of leverage under which a company such as us (sometimes referred to as an "originator" or "sponsor") transfers income producing assets to a single-purpose, bankruptcy-remote subsidiary (also referred to as a "special purpose entity" or SPE), which is established solely for the purpose of holding such assets and entering into a structured finance transaction. The SPE then issues notes secured by such assets. The special purpose entity may issue the notes in the capital markets either publicly or privately to a variety of investors, including banks, non-bank financial institutions and other investors. There may be a single class of notes or multiple classes of notes, the most senior of which carries less credit risk and the most junior of which may carry substantially the same credit risk as the equity of the SPE.

An important aspect of most debt securitization transactions is that the sale and/or contribution of assets into the SPE be considered a true sale and/or contribution for accounting purposes and that a reviewing court would not consolidate the SPE with the operations of the originator in the event of the originator's bankruptcy based on equitable principles. Viewed as a whole, a debt securitization seeks to lower risk to the note purchasers by isolating the assets collateralizing the securitization in an SPE that is not subject to the credit and bankruptcy risks of the originator. As a result of this perceived reduction of risk, debt securitization transactions frequently achieve lower overall leverage costs for originators as compared to traditional secured lending transactions.

In accordance with the above description, to securitize loans, we may create a wholly owned subsidiary and contribute a pool of our assets to such subsidiary. The SPE may be funded with, among other things, whole loans and such loans may or may not be rated. The SPE would then sell its notes to purchasers who we would expect to be willing to accept a lower interest rate and the absence of any recourse against us to invest in a pool of income producing assets to which none of our creditors would have access. We would retain all or a portion of the equity in the SPE. An inability to successfully securitize portions of our portfolio or otherwise leverage our portfolio through secured and unsecured borrowings could limit our ability to grow our business and fully execute our business strategy, and could decrease our earnings. However, the successful securitization of portions of our portfolio exposes

Table of Contents

us to a risk of loss for the equity we retain in the SPE and might expose us to greater risk on our remaining portfolio because the assets we retain may tend to be those that are riskier and more likely to generate losses. A successful securitization may also impose financial and operating covenants that restrict our business activities and may include limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code. The 1940 Act may also impose restrictions on the structure of any securitizations.

Interests we hold in the SPE, if any, will be subordinated to the other interests issued by the SPE. As such, we will only receive cash distributions on such interests if the SPE has made all cash interest and other required payments on all other interests it has issued. In addition, our subordinated interests will likely be unsecured and rank behind all of the secured creditors, known or unknown, of the SPE, including the holders of the senior interests it has issued. Consequently, to the extent that the value of the SPEs portfolio of assets has been reduced as a result of conditions in the credit markets, or as a result of defaults, the value of the subordinated interests we retain would be reduced. Securitization imposes on us the same risks as borrowing except that our risk in a securitization is limited to the amount of subordinated interests we retain, whereas in a borrowing or debt issuance by us directly we would be at risk for the entire amount of the borrowing or debt issuance.

If the SPE is not consolidated with us, our only interest will be the value of our retained subordinated interest and the income allocated to us, which may be more or less than the cash we receive from the SPE, and none of the SPEs liabilities will be reflected as our liabilities. If the assets of the SPE are not consolidated with our assets and liabilities, then our interest in the SPE may be deemed not to be a qualifying asset for purposes of determining whether 70% of our assets are qualifying assets and the leverage incurred by such SPE may or may not be treated as borrowings by us for purposes of the requirement that we not issue senior securities in an amount in excess of our net assets.

We may also engage in transactions utilizing SPEs and securitization techniques where the assets sold or contributed to the SPE remain on our balance sheet for accounting purposes. If, for example, we sell the assets to the SPE with recourse or provide a guarantee or other credit support to the SPE, its assets will remain on our balance sheet. Consolidation would also generally result if we, in consultation with the SEC, determine that consolidation would result in a more accurate reflection of our assets, liabilities and results of operations. In these structures, the risks will be essentially the same as in other securitization transactions but the assets will remain our assets for purposes of the limitations described above on investing in assets that are not qualifying assets and the leverage incurred by the SPE will be treated as borrowings incurred by us for purposes of our limitation on the issuance of senior securities.

The Investment Adviser may have conflicts of interest with respect to potential securitizations in as much as securitizations that are not consolidated may reduce our assets for purposes of determining its investment advisory fee although in some circumstances the Investment Adviser may be paid certain fees for managing the assets of the SPE so as to reduce or eliminate any potential bias against securitizations.

Our ability to invest in public companies may be limited in certain circumstances.

As a BDC, we must not acquire any assets other than "qualifying assets" specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Subject to certain exceptions for follow-on investments and distressed companies, an investment in an issuer that has outstanding securities listed on a national securities exchange may be treated as qualifying assets only if such issuer has a market capitalization that is less than \$250 million at the time of such investment.

Table of Contents

Risks Relating to Our Investments

We may not realize gains or income from our investments.

We seek to generate both current income and capital appreciation. However, the securities we invest in may not appreciate and, in fact, may decline in value, and the issuers of debt securities we invest in may default on interest and/or principal payments. Accordingly, we may not be able to realize gains from our investments, and any gains that we do realize may not be sufficient to offset any losses we experience. See "Business Our Investment Objective and Policies".

Most of our portfolio investments are recorded at fair value as determined in good faith under the direction of our Board of Directors and, as a result, there is uncertainty as to the value of our portfolio investments.

A large percentage of our portfolio investments consist of securities of privately held companies. Hence, market quotations are generally not readily available for determining the fair values of such investments. The determination of fair value, and thus the amount of unrealized losses we may incur in any year, is to a degree subjective, and the Investment Adviser has a conflict of interest in making the determination. We value these securities quarterly at fair value as determined in good faith by our Board of Directors based on input from the Investment Adviser, our Administrator, a third party independent valuation firm and our Audit Committee. Our Board of Directors utilizes the services of an independent valuation firm to aid it in determining the fair value of any securities. The types of factors that may be considered in determining the fair values of our investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to publicly traded companies, discounted cash flow, current market interest rates and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, the valuations may fluctuate significantly over short periods of time due to changes in current market conditions. The determinations of fair value by our Board of Directors may differ materially from the values that would have been used if an active market and market quotations existed for these investments. Our net asset value could be adversely affected if the determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

In addition, decreases in the market values or fair values of our investments are recorded as unrealized depreciation. Unprecedented declines in prices and liquidity in the corporate debt markets experienced during the recent financial crises resulted in significant net unrealized depreciation in our portfolio in the past. The effect of all of these factors on our portfolio reduced our NAV by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may continue to suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations. We have no policy regarding holding a minimum level of liquid assets. As such, a high percentage of our portfolio generally is not liquid at any given point in time. See "The lack of liquidity may adversely affect our business."

Price declines and illiquidity in the corporate debt markets have adversely affected, and may in the future adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by or under the direction of our Board of Directors. As part of the valuation process, the types of factors that we may take into account in determining the fair value of our investments include, as relevant and among other factors: available current market data, including relevant and applicable market trading and transaction comparables,

Table of Contents

applicable market yields and multiples, security covenants, call protection provisions, information rights, the nature and realizable value of any collateral, the portfolio company's ability to make payments, its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons of financial ratios of peer companies that are public, merger and acquisition comparables, our principal market (as the reporting entity) and enterprise values. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation. The effect of all of these factors on our portfolio can reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

Our investments in prospective portfolio companies may be risky and we could lose all or part of our investment.

Some of our portfolio companies have relatively short or no operating histories. These companies are and will be subject to all of the business risk and uncertainties associated with any new business enterprise, including the risk that these companies may not reach their investment objective and the value of our investment in them may decline substantially or fall to zero.

In addition, investment in the middle market companies that we are targeting involves a number of other significant risks, including:

these companies may have limited financial resources and may be unable to meet their obligations under their securities that we hold, which may be accompanied by a deterioration in the value of their securities or of any collateral with respect to any securities and a reduction in the likelihood of our realizing on any guarantees we may have obtained in connection with our investment;

they may have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;

because many of these companies are privately held companies, public information is generally not available about these companies. As a result, we will depend on the ability of the Investment Adviser to obtain adequate information to evaluate these companies in making investment decisions. If the Investment Adviser is unable to uncover all material information about these companies, it may not make a fully informed investment decision, and we may lose money on our investments;

they are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a materially adverse impact on our portfolio company and, in turn, on us;

they may have less predictable operating results, may from time to time be parties to litigation, may be engaged in changing businesses with products subject to a risk of obsolescence and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position;

they may have difficulty accessing the capital markets to meet future capital needs;

changes in laws and regulations, as well as their interpretations, may adversely affect their business, financial structure or prospects; and

increased taxes, regulatory expense or the costs of changes to the way they conduct business due to the effects of climate change may adversely affect their business, financial structure or prospects.

Table of Contents

In addition, our executive officers, directors and the Investment Adviser could, in the ordinary course of business, be named as defendants in litigation arising from proposed investments or from our investments in the portfolio companies.

The lack of liquidity in our investments may adversely affect our business.

We make investments in private companies. A portion of these investments may be subject to legal and other restrictions on resale, transfer, pledge or other disposition or will otherwise be less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we face other restrictions on our ability to liquidate an investment in a business entity to the extent that we or the Investment Adviser has or could be deemed to have material non-public information regarding such business entity.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans or meet other obligations during these periods. Therefore, our non-performing assets are likely to increase, and the value of our portfolio is likely to decrease, during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize a portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company. In addition, if one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt or preferred equity, depending on the facts and circumstances, including the extent to which we actually provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt or equity holding and subordinate all or a portion of our claim to those of other creditors.

Investments in equity securities, many of which are illiquid with no readily available market, involve a substantial degree of risk.

We may purchase common and other equity securities. Although common stock has historically generated higher average total returns than fixed income securities over the long-term, common stock also has experienced significantly more volatility in those returns and in recent years has significantly under performed relative to fixed income securities. The equity securities we acquire may fail to appreciate and may decline in value or become worthless and our ability to recover our investment will depend on our portfolio company's success. Investments in equity securities involve a number of significant risks, including:

any equity investment we make in a portfolio company could be subject to further dilution as a result of the issuance of additional equity interests and to serious risks as a junior security that will be subordinate to all indebtedness (including trade creditors) or senior securities in the

Table of Contents

event that the issuer is unable to meet its obligations or becomes subject to a bankruptcy process;

to the extent that the portfolio company requires additional capital and is unable to obtain it, we may not recover our investment; and

in some cases, equity securities in which we invest will not pay current dividends, and our ability to realize a return on our investment, as well as to recover our investment, will be dependent on the success of the portfolio company. Even if the portfolio company is successful, our ability to realize the value of our investment may be dependent on the occurrence of a liquidity event, such as a public offering or the sale of the portfolio company. It is likely to take a significant amount of time before a liquidity event occurs or we can otherwise sell our investment. In addition, the equity securities we receive or invest in may be subject to restrictions on resale during periods in which it could be advantageous to sell them.

There are special risks associated with investing in preferred securities, including:

preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If we own a preferred security that is deferring its distributions, we may be required to report income for tax purposes before we receive such distributions;

preferred securities are subordinated to debt in terms of priority to income and liquidation payments, and therefore will be subject to greater credit risk than debt;

preferred securities may be substantially less liquid than many other securities, such as common stock or U.S. government securities; and

generally, preferred security holders have no voting rights with respect to the issuing company, subject to limited exceptions.

Additionally, when we invest in first lien senior secured loans (including unitranche loans), second lien senior secured loans or mezzanine debt, we may acquire warrants or other equity securities as well. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

We may invest, to the extent permitted by law, in the equity securities of investment funds that are operating pursuant to certain exceptions to the Investment Company Act and in advisers to similar investment funds and, to the extent we so invest, will bear our ratable share of any such company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to Prospect Capital Management with respect to the assets invested in the securities and instruments of such companies. With respect to each of these investments, each of our common stockholders will bear his or her share of the management and incentive fee of Prospect Capital Management as well as indirectly bearing the management and performance fees and other expenses of any such investment funds or advisers.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

If one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt, depending on the facts and circumstances, a bankruptcy court might recharacterize our debt holding as an equity investment and subordinate all or a portion of our claim to that of other creditors. In addition, lenders can be subject to lender liability claims for actions taken

Table of Contents

by them where they become too involved in the borrower's business or exercise control over the borrower. For example, we could become subject to a lender's liability claim, if, among other things, we actually render significant managerial assistance.

Our portfolio companies may incur debt or issue equity securities that rank equally with, or senior to, our investments in such companies.

Our portfolio companies may have, or may be permitted to incur, other debt, or issue other equity securities, that rank equally with, or senior to, our investments. By their terms, such instruments may provide that the holders are entitled to receive payment of dividends, interest or principal on or before the dates on which we are entitled to receive payments in respect of our investments. These debt instruments would usually prohibit the portfolio companies from paying interest on or repaying our investments in the event and during the continuance of a default under such debt. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of securities ranking senior to our investment in that portfolio company typically are entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such holders, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of securities ranking equally with our investments, we would have to share on an equal basis any distributions with other security holders in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

The rights we may have with respect to the collateral securing any junior priority loans we make to our portfolio companies may also be limited pursuant to the terms of one or more intercreditor agreements (including agreements governing "first out" and "last out" structures) that we enter into with the holders of senior debt. Under such an intercreditor agreement, at any time that senior obligations are outstanding, we may forfeit certain rights with respect to the collateral to the holders of the senior obligations. These rights may include the right to commence enforcement proceedings against the collateral, the right to control the conduct of such enforcement proceedings, the right to approve amendments to collateral documents, the right to release liens on the collateral and the right to waive past defaults under collateral documents. We may not have the ability to control or direct such actions, even if as a result our rights as junior lenders are adversely affected.

When we are a debt or minority equity investor in a portfolio company, we are often not in a position to exert influence on the entity, and other equity holders and management of the company may make decisions that could decrease the value of our portfolio holdings.

When we make debt or minority equity investments, we are subject to the risk that a portfolio company may make business decisions with which we disagree and the other equity holders and management of such company may take risks or otherwise act in ways that do not serve our interests. As a result, a portfolio company may make decisions that could decrease the value of our investment.

Our portfolio companies may be highly leveraged.

Some of our portfolio companies may be highly leveraged, which may have adverse consequences to these companies and to us as an investor. These companies may be subject to restrictive financial and operating covenants and the leverage may impair these companies' ability to finance their future operations and capital needs. As a result, these companies' flexibility to respond to changing business and economic conditions and to take advantage of business opportunities may be limited. Further, a leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used.

Table of Contents

Our portfolio contains a limited number of portfolio companies, which subjects us to a greater risk of significant loss if any of these companies defaults on its obligations under any of its debt securities.

A consequence of the limited number of investments in our portfolio is that the aggregate returns we realize may be significantly adversely affected if one or more of our significant portfolio company investments perform poorly or if we need to write down the value of any one significant investment. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our portfolio could contain relatively few portfolio companies.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as "follow-on" investments, in order to: (1) increase or maintain in whole or in part our equity ownership percentage; (2) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing or (3) attempt to preserve or enhance the value of our investment.

We may elect not to make follow-on investments, may be constrained in our ability to employ available funds, or otherwise may lack sufficient funds to make those investments. We have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our tax status.

We may be unable to invest the net proceeds raised from offerings and repayments from investments on acceptable terms, which would harm our financial condition and operating results.

Until we identify new investment opportunities, we intend to either invest the net proceeds of future offerings and repayments from investments in interest-bearing deposits or other short-term instruments or use the net proceeds from such offerings to reduce then-outstanding obligations under our credit facility. We cannot assure you that we will be able to find enough appropriate investments that meet our investment criteria or that any investment we complete using the proceeds from an offering will produce a sufficient return.

We may have limited access to information about privately held companies in which we invest.

We invest primarily in privately-held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of the Investment Adviser's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. These companies and their financial information are not subject to the Sarbanes-Oxley Act of 2002 and other rules that govern public companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investment.

Table of Contents

We may not be able to fully realize the value of the collateral securing our debt investments.

Although a substantial amount of our debt investments are protected by holding security interests in the assets of the portfolio companies, we may not be able to fully realize the value of the collateral securing our investments due to one or more of the following factors:

our debt investments may be in the form of mezzanine loans, therefore our liens on the collateral, if any, are subordinated to those of the senior secured debt of the portfolio companies, if any. As a result, we may not be able to control remedies with respect to the collateral;

the collateral may not be valuable enough to satisfy all of the obligations under our secured loan, particularly after giving effect to the repayment of secured debt of the portfolio company that ranks senior to our loan;

bankruptcy laws may limit our ability to realize value from the collateral and may delay the realization process;

our rights in the collateral may be adversely affected by the failure to perfect security interests in the collateral;

the need to obtain regulatory and contractual consents could impair or impede how effectively the collateral would be liquidated and could affect the value received; and

some or all of the collateral may be illiquid and may have no readily ascertainable market value. The liquidity and value of the collateral could be impaired as a result of changing economic conditions, competition, and other factors, including the availability of suitable buyers.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates potential investments in securities of foreign companies, including those located in emerging market countries. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. Such risks are more pronounced in emerging market countries.

Although currently all of our investments are, and we expect that most of our investments will be, U.S. dollar-denominated, investments that are denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments.

We may expose ourselves to risks if we engage in hedging transactions.

We may employ hedging techniques to minimize certain investment risks, such as fluctuations in interest and currency exchange rates, but we can offer no assurance that such strategies will be effective. If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the

Table of Contents

values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio positions should increase. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Furthermore, our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the CFTC.

The success of our hedging transactions depends on our ability to correctly predict movements, currencies and interest rates. Therefore, while we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. The degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies. The Company has no current intention of engaging in any of the hedging transaction described above, although it reserves the right to do so in the future.

Our Board of Directors may change our operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse to us and could impair the value of our stockholders' investment.

Our Board of Directors has the authority to modify or waive our current operating policies and our strategies without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, financial condition, and value of our common stock. However, the effects might be adverse, which could negatively impact our ability to pay dividends and cause stockholders to lose all or part of their investment.

Our investments in CLOs may be riskier and less transparent to us and our stockholders than direct investments in the underlying companies.

We invest in CLOs. Generally, there may be less information available to us regarding the underlying debt investments held by CLOs than if we had invested directly in the debt of the underlying companies. As a result, our stockholders will not know the details of the underlying securities of the CLOs in which we will invest. Our CLO investments are subject to the risk of leverage associated with the debt issued by such CLOs and the repayment priority of senior debt holders in such CLOs. Our investments in portfolio companies may be risky, and we could lose all or part of our investment.

CLOs typically will have no significant assets other than their underlying Senior Secured Loans; payments on CLO investments are and will be payable solely from the cashflows from such Senior Secured Loans.

CLOs typically will have no significant assets other than their underlying Senior Secured Loans. Accordingly, payments on CLO investments are and will be payable solely from the cashflows from such Senior Secured Loans, net of all management fees and other expenses. Payments to us as a holder of CLO junior securities are and will be made only after payments due on the senior secured notes, and, where appropriate, the junior secured notes, have been made in full. This means that relatively small numbers of defaults of Senior Secured Loans may adversely impact our returns.

Table of Contents

Our CLO investments are exposed to leveraged credit risk.

Generally, we are in a subordinated position with respect to realized losses on the Senior Secured Loans underlying our investments in CLOs. The leveraged nature of CLOs, in particular, magnifies the adverse impact of Senior Secured Loan defaults. CLO investments represent a leveraged investment with respect to the underlying Senior Secured Loans. Therefore, changes in the market value of the CLO investments could be greater than the change in the market value of the underlying Senior Secured Loans, which are subject to credit, liquidity and interest rate risk.

There is the potential for interruption and deferral of cashflow from CLO investments.

If certain minimum collateral value ratios and/or interest coverage ratios are not met by a CLO, primarily due to Senior Secured Loan defaults, then cashflow that otherwise would have been available to pay distributions to us on our CLO investments may instead be used to redeem any senior notes or to purchase additional Senior Secured Loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full. This could result in an elimination, reduction or deferral in the distribution and/or principal paid to the holders of the CLO investments, which would adversely impact our returns.

Investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our CLO investment strategy involves investments in foreign CLOs. Investing in foreign entities may expose us to additional risks not typically associated with investing in U.S. issuers. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. Further, we, and the CLOs in which we invest, may have difficulty enforcing creditor's rights in foreign jurisdictions. In addition, the underlying companies of the CLOs in which we invest may be foreign, which may create greater exposure for us to foreign economic developments.

The payment of underlying portfolio manager fees and other charges on CLO investments could adversely impact our returns.

We may invest in CLO investments where the underlying portfolio securities may be subject to management, administration and incentive or performance fees, in addition to those payable by us. Payment of such additional fees could adversely impact the returns we achieve.

The inability of a CLO collateral manager to reinvest the proceeds of the prepayment of Senior Secured Loans may adversely affect us.

There can be no assurance that for any CLO investment, in the event that any of the Senior Secured Loans of a CLO underlying such investment are prepaid, the CLO collateral manager will be able to reinvest such proceeds in new Senior Secured Loans with equivalent investment returns. If the CLO collateral manager cannot reinvest in new Senior Secured Loans with equivalent investment returns, the interest proceeds available to pay interest on the rated liabilities and investments may be adversely affected.

Table of Contents

Our CLO investments are subject to prepayments and calls, increasing re-investment risk.

Our CLO investments and/or the underlying senior secured loans may be prepaid more quickly than expected, which could have an adverse impact on our value. Prepayment rates are influenced by changes in interest rates and a variety of economic, geographic and other factors beyond our control, and consequently cannot be predicted with certainty. In addition, for a CLO collateral manager there is often a strong incentive to refinance well performing portfolios once the senior tranches amortize. The yield to maturity of the investments will depend on the amount and timing of payments of principal on the loans and the price paid for the investments. Such yield may be adversely affected by a higher or lower than anticipated rate of prepayments of the debt.

Furthermore, our CLO investments generally do not contain optional call provisions, other than a call at the option of the holders of the equity tranches for the senior notes and the junior secured notes to be paid in full after the expiration of an initial period in the deal (referred to as the "non-call period").

The exercise of the call option is by the relevant percentage (usually a majority) of the holders of the equity tranches and, therefore, where we do not hold the relevant percentage we will not be able to control the timing of the exercise of the call option. The equity tranches also generally have a call at any time based on certain tax event triggers. In any event, the call can only be exercised by the holders of equity tranches if they can demonstrate (in accordance with the detailed provisions in the transaction) that the senior notes and junior secured notes will be paid in full if the call is exercised.

Early prepayments and/or the exercise of a call option other than at our request may also give rise to increased re-investment risk with respect to certain investments, as we may realize excess cash earlier than expected. If we are unable to reinvest such cash in a new investment with an expected rate of return at least equal to that of the investment repaid, this may reduce our net income and, consequently, could have an adverse impact on our ability to pay dividends.

We have limited control of the administration and amendment of Senior Secured Loans owned by the CLOs in which we invest.

We may not be able to directly enforce any rights and remedies in the event of a default of a Senior Secured Loan held by a CLO vehicle. In addition, the terms and conditions of the Senior Secured Loans underlying our CLO investments may be amended, modified or waived only by the agreement of the underlying lenders. Generally, any such agreement must include a majority or a super majority (measured by outstanding loans or commitments) or, in certain circumstances, a unanimous vote of the lenders. Consequently, the terms and conditions of the payment obligations arising from Senior Secured Loans could be modified, amended or waived in a manner contrary to our preferences.

We have limited control of the administration and amendment of any CLO in which we invest.

The terms and conditions of target securities may be amended, modified or waived only by the agreement of the underlying security holders. Generally, any such agreement must include a majority or a super majority (measured by outstanding amounts) or, in certain circumstances, a unanimous vote of the security holders. Consequently, the terms and conditions of the payment obligation arising from the CLOs in which we invest be modified, amended or waived in a manner contrary to our preferences.

Senior Secured Loans of CLOs may be sold and replaced resulting in a loss to us.

The Senior Secured Loans underlying our CLO investments may be sold and replacement collateral purchased within the parameters set out in the relevant CLO indenture between the CLO and the CLO trustee and those parameters may typically only be amended, modified or waived by the agreement of a majority of the holders of the senior notes and/or the junior secured notes and/or the

Table of Contents

equity tranche once the CLO has been established. If these transactions result in a net loss, the magnitude of the loss from the perspective of the equity tranche would be increased by the leveraged nature of the investment.

Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in a CLO vehicle defaults on its payment obligations or fails to perform as we expect.

We expect that a majority of our portfolio will consist of equity and junior debt investments in CLOs, which involve a number of significant risks. CLOs are typically highly levered up to approximately 10 times, and therefore the junior debt and equity tranches that we will invest in are subject to a higher risk of total loss. In particular, investors in CLOs indirectly bear risks of the underlying debt investments held by such CLOs. We will generally have the right to receive payments only from the CLOs, and will generally not have direct rights against the underlying borrowers or the entities that sponsored the CLOs. Although it is difficult to predict whether the prices of indices and securities underlying CLOs will rise or fall, these prices, and therefore, the prices of the CLOs, will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally.

The investments we make in CLOs are thinly traded or have only a limited trading market. CLO investments are typically privately offered and sold, in the primary and secondary markets. As a result, investments in CLOs may be characterized as illiquid securities. In addition to the general risks associated with investing in debt securities, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from the underlying Senior Secured Loans will not be adequate to make interest or other payments; (ii) the quality of the underlying Senior Secured Loans may decline in value or default; and (iii) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the CLO or unexpected investment results. Further, our investments in equity and junior debt tranches of CLOs are subordinate to the senior debt tranches thereof.

Investments in structured vehicles, including equity and junior debt instruments issued by CLOs, involve risks, including credit risk and market risk. Changes in interest rates and credit quality may cause significant price fluctuations. Additionally, changes in the underlying Senior Secured Loans held by a CLO may cause payments on the instruments we hold to be reduced, either temporarily or permanently. Structured investments, particularly the subordinated interests in which we invest, are less liquid than many other types of securities and may be more volatile than the Senior Secured Loans underlying the CLOs in which we invest.

Non-investment grade debt involves a greater risk of default and higher price volatility than investment grade debt.

The Senior Secured Loans underlying our CLO investments typically are rated non-investment grade and, in limited circumstances, are unrated. Non-investment grade securities are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default and higher price volatility than investment grade debt.

We will have no influence on management of underlying investments managed by non-affiliated third party CLO collateral managers.

We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. Similarly, we are not responsible for and have no influence over the day-to-day management, administration or any other aspect of the issuers of the individual securities.

Table of Contents

As a result, the values of the portfolios underlying our CLO investments could decrease as a result of decisions made by third party CLO collateral managers.

Risks Relating To Our Securities

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities. Our debt securities are rated by Standard & Poors.

Senior securities, including debt, expose us to additional risks, including the typical risks associated with leverage and could adversely affect our business, financial condition and results of operations.

We currently use our revolving credit facility to leverage our portfolio and we expect in the future to borrow from and issue senior debt securities to banks and other lenders and may securitize certain of our portfolio investments. We also have the Senior Notes outstanding, which are a form of leverage and are senior in payment rights to our common stock.

With certain limited exceptions, as a business development company, or a BDC, we are only allowed to borrow amounts or otherwise issue senior securities such that our asset coverage, as defined in the 1940 Act, is at least 200% after such borrowing or other issuance. The amount of leverage that we employ will depend on the Investment Adviser's and our Board of Directors' assessment of market conditions and other factors at the time of any proposed borrowing. There is no assurance that a leveraging strategy will be successful. Leverage involves risks and special considerations for stockholders, any of which could adversely affect our business, financial condition and results of operations, including the following:

A likelihood of greater volatility in the net asset value and market price of our common stock;

Diminished operating flexibility as a result of asset coverage or investment portfolio composition requirements required by lenders or investors that are more stringent than those imposed by the 1940 Act;

The possibility that investments will have to be liquidated at less than full value or at inopportune times to comply with debt covenants or to pay interest or dividends on the leverage;

Increased operating expenses due to the cost of leverage, including issuance and servicing costs;

Convertible or exchangeable securities, such as the Senior Convertible Notes outstanding or those issued in the future may have rights, preferences and privileges more favorable than those of our common stock;

Subordination to lenders' superior claims on our assets as a result of which lenders will be able to receive proceeds available in the case of our liquidation before any proceeds will be distributed to our stockholders;

Making it more difficult for us to meet our payment and other obligations under the Notes and our other outstanding debt;

The occurrence of an event of default if we fail to comply with the financial and/or other restrictive covenants contained in our debt agreements, including the credit agreement and each indenture governing the Notes, which event of default could result in all or some of our debt becoming immediately due and payable;

Table of Contents

Reduced availability of our cash flow to fund investments, acquisitions and other general corporate purposes, and limiting our ability to obtain additional financing for these purposes;

The risk of increased sensitivity to interest rate increases on our indebtedness with variable interest rates, including borrowings under our amended senior credit facility; and

Reduced flexibility in planning for, or reacting to, and increasing our vulnerability to, changes in our business, the industry in which we operate and the general economy.

For example, the amount we may borrow under our revolving credit facility is determined, in part, by the fair value of our investments. If the fair value of our investments declines, we may be forced to sell investments at a loss to maintain compliance with our borrowing limits. Other debt facilities we may enter into in the future may contain similar provisions. Any such forced sales would reduce our net asset value and also make it difficult for the net asset value to recover. The Investment Adviser and our Board of Directors in their best judgment nevertheless may determine to use leverage if they expect that the benefits to our stockholders of maintaining the leveraged position will outweigh the risks.

In addition, our ability to meet our payment and other obligations of the Notes and our credit facility depends on our ability to generate significant cash flow in the future. This, to some extent, is subject to general economic, financial, competitive, legislative and regulatory factors as well as other factors that are beyond our control. We cannot assure you that our business will generate cash flow from operations, or that future borrowings will be available to us under our existing credit facility or otherwise, in an amount sufficient to enable us to meet our payment obligations under the Notes and our other debt and to fund other liquidity needs. If we are not able to generate sufficient cash flow to service our debt obligations, we may need to refinance or restructure our debt, including the Notes, sell assets, reduce or delay capital investments, or seek to raise additional capital. If we are unable to implement one or more of these alternatives, we may not be able to meet our payment obligations under the Notes and our other debt.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of interest expense. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below. The calculation assumes (i) \$4.4 billion in total assets, (ii) an average cost of funds of 5.63%, (iii) \$1.7 billion in debt outstanding and (iv) \$2.7 billion of shareholders' equity.

Assumed Return on Our Portfolio (net of expenses)	(10)%	(5)%	0%	5%	10%
Corresponding Return to Stockholder	(19.8)%	(11.7)%	(3.5)%	4.6%	12.7%

The assumed portfolio return is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance. Actual returns may be greater or less than those appearing in the table.

The Senior Convertible Notes, the 2022 Notes and the 2023 Notes present other risks to holders of our common stock, including the possibility that such Notes could discourage an acquisition of the Company by a third party and accounting uncertainty.

Certain provisions of the Senior Convertible Notes, the 2022 Notes and the 2023 Notes could make it more difficult or more expensive for a third party to acquire us. Upon the occurrence of certain transactions constituting a fundamental change, holders of the Senior Convertible Notes, the 2022 Notes and the 2023 Notes will have the right, at their option, to require us to repurchase all of their Senior Convertible Notes, the 2022 Notes and the 2023 Notes or any portion of the principal amount of such Senior Convertible Notes, the 2022 Notes and the 2023 Notes in integral multiples of \$1,000, in the case of the Senior Convertible Notes and the 2023 Notes, and \$25, in the case of the

Table of Contents

2022 Notes. We may also be required to increase the conversion rate or provide for conversion into the acquirer's capital stock in the event of certain fundamental changes with respect to the Senior Convertible Notes. These provisions could discourage an acquisition of us by a third party.

The accounting for convertible debt securities is subject to frequent scrutiny by the accounting regulatory bodies and is subject to change. We cannot predict if or when any such change could be made and any such change could have an adverse impact on our reported or future financial results. Any such impacts could adversely affect the market price of our common stock.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

Holders of any preferred stock we might issue would have the right to elect members of the board of directors and class voting rights on certain matters.

Holders of any preferred stock we might issue, voting separately as a single class, would have the right to elect two members of the board of directors at all times and in the event dividends become two full years in arrears would have the right to elect a majority of the directors until such arrearage is completely eliminated. In addition, preferred stockholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion to open-end status, and accordingly can veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies or the terms of our credit facilities, might impair our ability to maintain our qualification as a RIC for federal income tax purposes. While we would intend to redeem our preferred stock to the extent necessary to enable us to distribute our income as required to maintain our qualification as a RIC, there can be no assurance that such actions could be effected in time to meet the tax requirements.

In addition to regulatory restrictions that restrict our ability to raise capital, our credit facility contains various covenants which, if not complied with, could accelerate repayment under the facility, thereby materially and adversely affecting our liquidity, financial condition and results of operations.

The agreement governing our credit facility requires us to comply with certain financial and operational covenants. These covenants include:

restrictions on the level of indebtedness that we are permitted to incur in relation to the value of our assets;

restrictions on our ability to incur liens; and

maintenance of a minimum level of stockholders' equity.

As of June 30, 2013, we were in compliance with these covenants. However, our continued compliance with these covenants depends on many factors, some of which are beyond our control. Accordingly, there are no assurances that we will continue to comply with the covenants in our credit facility. Failure to comply with these covenants would result in a default under this facility which, if we were unable to obtain a waiver from the lenders thereunder, could result in an acceleration of

Table of Contents

repayments under the facility and thereby have a material adverse impact on our business, financial condition and results of operations.

Failure to extend our existing credit facility, the revolving period of which is currently scheduled to expire on March 27, 2015, could have a material adverse effect on our results of operations and financial position and our ability to pay expenses and make distributions.

The revolving period for our credit facility with a syndicate of lenders is currently scheduled to terminate on March 27, 2015, with an additional two year amortization period (with distributions allowed) after the completion of the revolving period. During such two year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the two year amortization period, the remaining balance will become due if required by the lenders. If the credit facility is not renewed or extended by the participant banks by March 27, 2015, we will not be able to make further borrowings under the facility after such date and the outstanding principal balance on that date will be due and payable on March 27, 2017. At June 30, 2013 we had \$124.0 million of outstanding borrowings under our credit facility. Interest on borrowings under the credit facility is one-month LIBOR plus 275 basis points with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the credit facility equal to either 50 basis points if at least half of the credit facility is drawn or 100 basis points otherwise. The credit facility requires us to pledge assets as collateral in order to borrow under the credit facility. If we are unable to extend our facility or find a new source of borrowing on acceptable terms, we will be required to pay down the amounts outstanding under the facility during the two-year term-out period through one or more of the following: (1) principal collections on our securities pledged under the facility, (2) at our option, interest collections on our securities pledged under the facility and cash collections on our securities not pledged under the facility, or (3) possible liquidation of some or all of our loans and other assets, any of which could have a material adverse effect on our results of operations and financial position and may force us to decrease or stop paying certain expenses and making distributions until the facility is repaid. In addition, our stock price could decline significantly, we would be restricted in our ability to acquire new investments and, in connection with our year-end audit, our independent registered accounting firm could raise an issue as to our ability to continue as a going concern.

Failure to refinance our existing Senior Notes, could have a material adverse effect on our results of operations and financial position.

Our Senior Notes mature at various dates from December 15, 2015 to June 15, 2043. If we are unable to refinance our Senior Notes or find a new source of borrowing on acceptable terms, we will be required to pay down the amounts outstanding at maturity under the facility during the two-year term-out period through one or more of the following: (1) borrowing additional funds under our then current credit facility, (2) issuance of additional common stock or (3) possible liquidation of some or all of our loans and other assets, any of which could have a material adverse effect on our results of operations and financial position. In addition, our stock price could decline significantly; we would be restricted in our ability to acquire new investments and, in connection with our year-end audit, our independent registered accounting firm could raise an issue as to our ability to continue as a going concern.

The trading market or market value of our publicly issued debt securities may fluctuate.

Our publicly issued debt securities may or may not have an established trading market. We cannot assure our noteholders that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely

Table of Contents

affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical to these debt securities;

the ratings assigned by national statistical ratings agencies;

the general economic environment;

the supply of debt securities trading in the secondary market, if any;

the redemption or repayment features, if any, of these debt securities;

the level, direction and volatility of market interest rates generally; and

market rates of interest higher or lower than rates borne by the debt securities.

Our noteholders should also be aware that there may be a limited number of buyers when they decide to sell their debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect our noteholders return on any debt securities that we may issue.

If our noteholders' debt securities are redeemable at our option, we may choose to redeem their debt securities at times when prevailing interest rates are lower than the interest rate paid on their debt securities. In addition, if our noteholders' debt securities are subject to mandatory redemption, we may be required to redeem their debt securities also at times when prevailing interest rates are lower than the interest rate paid on their debt securities. In this circumstance, our noteholders may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as their debt securities being redeemed.

Our shares of common stock have traded at a discount from net asset value and may do so again in the future, which could limit our ability to raise additional equity capital.

Shares of closed-end investment companies frequently trade at a market price that is less than the net asset value that is attributable to those shares. This characteristic of closed-end investment companies is separate and distinct from the risk that our net asset value per share may decline. It is not possible to predict whether any shares of our common stock will trade at, above, or below net asset value. In the recent past, including during much of 2009, the stocks of BDCs as an industry, including at times shares of our common stock, traded below net asset value and at near historic lows as a result of concerns over liquidity, leverage restrictions and distribution requirements. When our common stock is trading below its net asset value per share, we will generally not be able to issue additional shares of our common stock at its market price without first obtaining approval for such issuance from our stockholders and our independent directors. At our 2012 annual meeting of stockholders held on December 7, 2012, our stockholders approved our ability, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, to sell shares of our common stock at any level of discount from net asset value per share during the 12 month period following December 7, 2012. It should be noted that, theoretically, we may offer up to 25% of our then outstanding common stock each day.

Table of Contents

There is a risk that investors in our common stock may not receive dividends or that our dividends may not grow over time and investors in our debt securities may not receive all of the interest income to which they are entitled.

We intend to make distributions on a monthly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. If we declare a dividend and if more stockholders opt to receive cash distributions rather than participate in our dividend reinvestment plan, we may be forced to sell some of our investments in order to make cash dividend payments.

In addition, due to the asset coverage test applicable to us as a BDC, we may be limited in our ability to make distributions. Further, if we invest a greater amount of assets in equity securities that do not pay current dividends, it could reduce the amount available for distribution.

The above-referenced restrictions on distributions may also inhibit our ability to make required interest payments to holders of our debt, which may cause a default under the terms of our debt agreements. Such a default could materially increase our cost of raising capital, as well as cause us to incur penalties under the terms of our debt agreements.

Investing in our securities may involve a high degree of risk and is highly speculative.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and volatility or loss of principal. Our investments in portfolio companies may be speculative and aggressive, and therefore, an investment in our shares may not be suitable for someone with low risk tolerance.

Our stockholders will experience dilution in their ownership percentage if they opt out of our dividend reinvestment plan.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are automatically reinvested in shares of our common stock. As a result, our stockholders that opt out of our dividend reinvestment plan will experience dilution in their ownership percentage of our common stock over time.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

Sales of substantial amounts of our common stock, or the availability of such common stock for sale (including as a result of the conversion of our Senior Convertible Notes into common stock), could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

If we sell shares of our common stock or securities to subscribe for or are convertible into shares of our common stock at a discount to our net asset value per share, stockholders who do not participate in such sale will experience immediate dilution in an amount that may be material.

At our 2012 annual meeting of stockholders held on December 7, 2012, our stockholders approved our ability, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, to sell shares of our common stock at any level of discount from net asset value per share during the 12 month period following December 7, 2012. It should be noted that, theoretically, we may offer up to 25% of our then

Table of Contents

outstanding common stock each day. The issuance or sale by us of shares of our common stock or securities to subscribe for or are convertible into shares of our common stock at a discount to net asset value poses a risk of dilution to our stockholders. In particular, stockholders who do not purchase additional shares of common stock at or below the discounted price in proportion to their current ownership will experience an immediate decrease in net asset value per share (as well as in the aggregate net asset value of their shares of common stock if they do not participate at all). These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we experience in our assets, potential earning power and voting interests from such issuance or sale. In addition, such sales may adversely affect the price at which our common stock trades. We have sold shares of our common stock at prices below net asset value per share in the past and may do so to the future. We have not sold any shares of our common stock at prices below net asset value per share since July 18, 2011.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our independent directors. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities is our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security or other property from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits "joint" transactions with an affiliate, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors. Subject to certain limited exceptions, we are prohibited from buying or selling any security or other property from or to the Investment Adviser and its affiliates and persons with whom we are in a control relationship, or entering into joint transactions with any such person, absent the prior approval of the SEC.

We and Priority Senior Secured Income Fund, Inc., Pathway Energy Infrastructure Fund, Inc., Prospect Capital Funding LLC, Prospect Capital Management LLC, Priority Senior Secured Income Management, LLC and Pathway Energy Infrastructure Management, LLC have submitted an exemptive application to the SEC to permit us to participate in negotiated co-investments with other funds managed by Prospect Capital Management LLC, Priority Senior Secured Income Management, LLC or Pathway Energy Infrastructure Management, LLC or affiliated advisers in a manner consistent with our investment objective, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to the conditions therein. However, there is no assurance that we will obtain such exemptive relief.

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for our securities may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

significant volatility in the market price and trading volume of securities of business development companies or other companies in the energy industry, which are not necessarily related to the operating performance of these companies;

price and volume fluctuations in the overall stock market from time to time;

changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;

loss of RIC qualification;

changes in earnings or variations in operating results;

Table of Contents

changes in the value of our portfolio of investments;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

departure of one or more of Prospect Capital Management's key personnel;

operating performance of companies comparable to us;

short-selling pressure with respect to shares of our common stock or BDCs generally;

future sales of our securities convertible into or exchangeable or exercisable for our common stock or the conversion of such securities, including the Convertible Unsecured Notes;

uncertainty surrounding the strength of the U.S. economic recovery;

concerns regarding European sovereign debt;

changes in prevailing interest rates;

litigation matters;

general economic trends and other external factors; and

loss of a major funding source.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has, from time to time, been brought against that company.

If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

There is a risk that you may not receive distributions or that our distributions may not grow over time.

We have made and intend to continue to make distributions on a monthly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results or maintain a tax status that will allow or require any specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a business development company, we may be limited in our ability to make distributions.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

Our charter and bylaws and the Maryland General Corporation Law contain provisions that may have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for our stockholders or otherwise be in their best interest. These provisions may prevent stockholders from being able to sell shares of our common stock at a premium over the current of prevailing

market prices.

Our charter provides for the classification of our Board of Directors into three classes of directors, serving staggered three-year terms, which may render a change of control or removal of our incumbent management more difficult. Furthermore, any and all vacancies on our Board of Directors will be filled generally only by the affirmative vote of a majority of the remaining directors in office, even if the remaining directors do not constitute a quorum, and any director elected to fill a vacancy will serve for the remainder of the full term until a successor is elected and qualifies.

Table of Contents

Our Board of Directors is authorized to create and issue new series of shares, to classify or reclassify any unissued shares of stock into one or more classes or series, including preferred stock and, without stockholder approval, to amend our charter to increase or decrease the number of shares of common stock that we have authority to issue, which could have the effect of diluting a stockholder's ownership interest. Prior to the issuance of shares of common stock of each class or series, including any reclassified series, our Board of Directors is required by our governing documents to set the preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series of shares of stock.

Our charter and bylaws also provide that our Board of Directors has the exclusive power to adopt, alter or repeal any provision of our bylaws, and to make new bylaws. The Maryland General Corporation Law also contains certain provisions that may limit the ability of a third party to acquire control of us, such as:

The Maryland Business Combination Act, which, subject to certain limitations, prohibits certain business combinations between us and an "interested stockholder" (defined generally as any person who beneficially owns 10% or more of the voting power of the common stock or an affiliate thereof) for five years after the most recent date on which the stockholder becomes an interested stockholder and, thereafter, imposes special minimum price provisions and special stockholder voting requirements on these combinations; and

The Maryland Control Share Acquisition Act, which provides that "control shares" of a Maryland corporation (defined as shares of common stock which, when aggregated with other shares of common stock controlled by the stockholder, entitles the stockholder to exercise one of three increasing ranges of voting power in electing directors, as described more fully below) acquired in a "control share acquisition" (defined as the direct or indirect acquisition of ownership or control of "control shares") have no voting rights except to the extent approved by stockholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding all interested shares of common stock.

The provisions of the Maryland Business Combination Act will not apply, however, if our Board of Directors adopts a resolution that any business combination between us and any other person will be exempt from the provisions of the Maryland Business Combination Act. Our Board of Directors has adopted a resolution that any business combination between us and any other person is exempted from the provisions of the Business Combination Act, provided that the business combination is first approved by the Board of Directors, including a majority of the directors who are not interested persons as defined in the 1940 Act. There can be no assurance that this resolution will not be altered or repealed in whole or in part at any time. If the resolution is altered or repealed, the provisions of the Maryland Business Combination Act may discourage others from trying to acquire control of us.

As permitted by Maryland law, our bylaws contain a provision exempting from the Maryland Control Share Acquisition Act any and all acquisitions by any person of our common stock. Although our bylaws include such a provision, such a provision may also be amended or eliminated by our Board of Directors at any time in the future, provided that we will notify the Division of Investment Management at the SEC prior to amending or eliminating this provision. However, as noted above, the SEC has recently taken the position that the Maryland Control Share Acquisition Act is inconsistent with the 1940 Act and may not be invoked by a BDC. It is the view of the staff of the SEC that opting into the Maryland Control Share Acquisition Act would be acting in a manner inconsistent with section 18(i) of the 1940 Act.

Table of Contents

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering. In addition, if the subscription price is less than our net asset value per share, then you will experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than the net asset value per share of our common stock, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of a rights offering or what proportion of the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

We may in the future choose to pay dividends in our own stock, in which case our stockholders may be required to pay tax in excess of the cash they receive.

We may distribute taxable dividends that are payable in part in our stock. The IRS has issued private letter rulings on cash/stock dividends paid by RICs and real estate investment trusts if certain requirements are satisfied, and we have received such a ruling permitting us to declare such taxable cash/stock dividends, up to 80% in stock, with respect to our taxable years ending August 31, 2012 and August 31, 2013. Taxable stockholders receiving such dividends would be required to include the full amount of the dividend as ordinary income (or as long-term capital gain to the extent such distribution is properly designated as a capital gain dividend) to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. Stockholder (as defined in "Material U.S. Federal Income Tax Considerations") may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. Stockholder sells the stock it receives as a dividend in order to pay this tax, it may be subject to transaction fees (e.g. broker fees or transfer agent fees) and the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of its stock at the time of the sale. Furthermore, with respect to Non-U.S. Stockholders (as defined in "Material U.S. Federal Income Tax Considerations"), we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock. It is unclear whether and to what extent we will be able to pay dividends in cash and our stock.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(All figures in this section are in thousands except share, per share and other data)

The following discussion should be read in conjunction with our consolidated financial statements and related notes and other financial information appearing elsewhere in this prospectus or incorporated by reference into this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under "Risk Factors" and "Forward-Looking Statements" appearing elsewhere herein.

Note on Forward Looking Statements

Some of the statements in this section of the prospectus constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained herein involve risks and uncertainties, including statements as to:

our future operating results;

our business prospects and the prospects of our portfolio companies;

the impact of investments that we expect to make;

our contractual arrangements and relationships with third parties;

the dependence of our future success on the general economy and its impact on the industries in which we invest;

the ability of our portfolio companies to achieve their objectives;

our expected financings and investments;

the adequacy of our cash resources and working capital; and

the timing of cash flows, if any, from the operations of our portfolio companies.

We generally use words such as "anticipates," "believes," "expects," "intends" and similar expressions to identify forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in "Risk Factors" and elsewhere in this prospectus. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act.

We have based the forward-looking statements included in herein on information available to us on the date of this document, and we assume no obligation to update any such forward-looking statements. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the SEC, including any annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Overview

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

We are a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company that has filed an election to be treated as a business development company under the Investment Company Act of 1940, or the 1940 Act. We invest primarily in senior and subordinated debt and equity of companies in need of capital for

Table of Contents

acquisitions, divestitures, growth, development and recapitalization. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have seven origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real estate investments, and (7) investments in syndicated debt. We continue to evaluate other origination strategies in the ordinary course of business with no specific tops-down allocation to any single origination strategy.

Lending in Private Equity Sponsored Transactions We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or mezzanine loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. This strategy has represented approximately 50%-60% of our business.

Lending Directly to Companies We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. This strategy generally has comprised approximately 10%-15% of our business.

Control Investments in Corporate Operating Companies This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

Control Investments in Financial Companies This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, subprime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 10%-15% of our business.

Investments in Structured Credit We make investments in CLOs, generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of broadly syndicated loans and do not have direct exposure to real estate, mortgages, sub-prime debt, or consumer based debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has represented 10%-20% of the portfolio.

Real Estate Investments We make investments in real estate through our wholly-owned tax-efficient real estate investment trust ("REIT"), American Property Holding Corp. ("APHC"). Our real estate investments are in various classes of fully developed and occupied real estate properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. We partner with established property managers with experience in managing the property type to manage such properties after acquisition. This is a more recent investment strategy that has represented less than 5% of our business.

Table of Contents

Investments in Syndicated Debt On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has represented approximately 5%-10% of the portfolio.

We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component. First and second lien senior loans generally are senior debt instruments that rank ahead of subordinated debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Mezzanine debt and our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B depending on the tranche.

We seek to be a long-term investor with our portfolio companies. The aggregate value of our portfolio investments was \$4,172,852 and \$2,094,221 as of June 30, 2013 and June 30, 2012, respectively. During the year ended June 30, 2013, our net cost of investments increased by \$2,156,465, or 102.7%, as a result of 68 new investments, 25 follow-on investments and several revolver advances of \$3,043,531, accrued of payment-in-kind interest of \$10,947, structuring fees of \$52,699 and amortization of discounts and premiums of \$11,016, while we received full repayment on 23 investments, sold ten investments, impaired one investment, and received several partial prepayments, amortization payments and a revolver repayment, totaling \$931,534.

Compared to the end of last fiscal year (ended June 30, 2012), net assets increased by \$1,144,520, or 75.7% during the year ended June 30, 2013, from \$1,511,974 to \$2,656,494. This increase resulted from the issuance of new shares of our common stock (less offering costs) in the amount of \$1,179,084, dividend reinvestments of \$16,087, and \$220,856 from operations. These increases, in turn, were offset by \$271,507 in dividend distributions to our stockholders. The \$220,856 increase in net assets resulting from operations is net of the following: net investment income of \$324,924, net realized loss on investments of \$26,234, and a decrease in net assets due to changes in net unrealized depreciation of investments of \$77,834.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reported period. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ, and these differences could be material.

Fourth Quarter Highlights

Investment Transactions

On April 1, 2013, we refinanced our existing \$18,635 of subordinated loans to Ajax Rolled Ring & Machine, Inc. ("Ajax"), increasing the size of our debt investment to \$38,537. Concurrent with the refinancing, we received repayment of the \$18,635 subordinated loans that were previously outstanding. The subordinated unsecured term loan bears interest in cash at the greater of 11.5% or Libor plus 8.5% and interest payment in kind of 6.0% and has a final maturity of March 30, 2018.

On April 15, 2013, assets previously held by H&M were assigned to Wolf in exchange for a \$66,000 term loan secured by the assets. Our cost basis in this loan of \$44,632 was determined in accordance with ASC 310-40, *Troubled Debt Restructurings by Creditors*, and is equal to the fair value of

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Table of Contents

assets at the time of transfer and we recorded a realized loss of \$19,647 in connection with the foreclosure on the assets. On May 17, 2013, Wolf sold certain of the assets that had been previously held by H&M that were located in Martin County to Hibernia for \$66,000. Proceeds from the sale were primarily used to repay the loan and NPI receivable due to us and we recognized as a realized gain of \$11,826 partially offsetting the previously recorded loss. We received \$3,960 of structuring and advisory fees from Wolf during the year ended June 30, 2013 related to the sale and \$991 under the NPI agreement which was recognized as other income during the fiscal year ended June 30, 2013.

On April 17, 2013, we made an investment of \$43,650 to purchase 97% of the subordinated notes in Mountain View CLO 2013-I Ltd. ("Mountain View").

On April 22, 2013, we provided \$34,375 of senior secured financing, of which \$31,875 was funded at closing, to support the acquisition of Pegasus Business Intelligence, LP ("Pegasus"), the world's largest processor of commissions paid by hotels to travel agencies for room booking services. The \$15,938 Term Loan A note bears interest in cash at the greater of 6.75% or Libor plus 5.5% and has a final maturity of April 18, 2018. The \$15,938 Term Loan B note bears interest in cash at the greater of 13.75% or Libor plus 12.5% and has a final maturity of April 18, 2018. The \$2,500 senior secured revolver, which was unfunded at closing, bears interest in cash at the greater of 9.0% or Libor plus 7.75% and has a final maturity of April 18, 2014.

On April 25, 2013, we made an investment of \$26,000 to purchase 50.9% of the subordinated notes in Brookside Mill CLO Ltd. ("Brookside").

On April 30, 2013, we made a \$21,247 follow-on investment in APH, to acquire Lofton Place Apartments and Vista at Palma Sola, multi-family residential properties located in Florida. We invested \$3,247 of equity and \$18,000 of debt in APH. The senior secured note bears interest in cash at the greater of 6.0% or Libor plus 4.0% and interest payment in kind of 5.50% and has a final maturity of October 24, 2020.

On April 30, 2013, we sold our investment in Fischbein, LLC ("Fischbein") for net proceeds of \$3,168, recognizing a realized gain of \$2,293 on the sale. In addition, there is \$310 being held in escrow which will be recognized as additional gain if and when received.

On May 8, 2013, we made a \$6,119 follow-on investment in APH, to acquire Arlington Park, a multi-family residential property located in Marietta, Georgia. We invested \$2,119 of equity and \$4,000 of debt in APH. The senior secured note bears interest in cash at the greater of 6.0% or Libor plus 4.0% and interest payment in kind of 5.50% and has a final maturity of October 24, 2020.

On May 9, 2013, we provided a \$55,000 senior secured credit facility to support the recapitalization of Sandow Media, LLC ("Sandow"), a provider of multimedia content and services to businesses and consumers focused on the areas of design and luxury. The senior secured first lien loan bears interest in cash at the greater of 10.5% or Libor plus 8.5% and interest payment in kind of 1.5% and has a final maturity of May 8, 2018.

On May 10, 2013, we provided \$150,000 of secured second lien financing to support the recapitalization of Arctic Glacier, Inc. ("Arctic Glacier"), a leading producer, marketer, and distributor of high-quality packaged ice to consumers in the United States and Canada. After the financing, we received repayment of \$86,982 of subordinated unsecured term loan previously outstanding. The senior secured second lien loan bears interest in cash at the greater of 11.25% or Libor plus 10.0% and has a final maturity of November 10, 2019.

On May 14, 2013, we provided \$4,000 of senior secured financing to SourceHOV, LLC ("SourceHOV"), a leading provider of business and knowledge process outsourcing. The second lien term loan bears interest in cash at the greater of 8.75% or Libor plus 7.5% and has a final maturity of

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Table of Contents

April 30, 2019. On June 13, 2013, we sold our \$4,000 investment in SourceHOV and realized a gain of \$40 on this investment.

On May 16, 2013, Out Rage, LLC ("Out Rage") repaid the \$11,836 loan receivable to us.

On May 23, 2013, Snacks Holding Corporation ("Snacks Holding") repaid the \$15,366 loan receivable to us.

On May 31, 2013, we made a follow-on secured second lien debt investment of \$7,190 in Injured Workers Pharmacy LLC ("IWP"), a specialty pharmacy services company. The secured second lien loan bears interest in cash at the greater of 11.5% or Libor plus 7.0% and interest payment in kind of 1.0% and has a final maturity of May 31, 2019.

On June 3, 2013, Nobel Learning Communities, Inc. ("Nobel") repaid the \$15,262 loan receivable to us.

On June 4, 2013, Springs Window Fashions, LLC ("Springs") repaid the \$35,000 loan receivable to us.

On June 11, 2013, we provided \$115,000 of senior secured financing to CI Holdings ("Transplace"), a third-party logistics company that services many of the largest shippers in the world. The senior secured first lien loan bears interest in cash at the greater of 10.0% or Libor plus 5.0% and has a final maturity of June 11, 2019.

On June 11, 2013, we provided \$7,000 of secured second lien financing to Armor Holding II LLC ("AST"), a leading North American third-party provider of share registry and associated value added services to shareholders on behalf of listed public companies. The second lien loan bears interest in cash at the greater of 9.25% or Libor plus 8.0% and has a final maturity of December 26, 2020.

On June 12, 2013, we made a \$23,250 follow-on investment in R-V Industries, Inc. ("R-V"). The senior subordinated note bears interest in cash at the greater of 10.0% or Libor plus 9.0% and has a final maturity of June 12, 2018.

On June 14, 2013, we sold our \$10,000 investment in Transaction Networks Services, Inc. ("TNS") and realized a gain of \$117 on this investment.

On June 18, 2013, we served as sole agent and provider of \$70,000 senior secured financing, of which \$65,643 was funded at closing, to support the recapitalization of Traeger Pellet Grills LLC ("Traeger"), a leading designer, marketer, and distributor of wood pellet grills, flavored wood pellets, and grill accessories. The \$30,000 Term Loan A note bears interest in cash at the greater of 6.5% or Libor plus 4.5% and has a final maturity of June 18, 2018. The \$30,000 Term Loan B note bears interest in cash at the greater of 11.5% or Libor plus 9.5% and has a final maturity of June 18, 2018. The \$10,000 senior secured revolver, of which \$5,643 was drawn at closing, bears interest in cash at the greater of 9.0% or Libor plus 7.0% and has a final maturity of June 18, 2014.

On June 24, 2013, we made a \$76,533 follow-on investment in APH, to acquire Arium Resort (f/k/a The Resort at Pembroke Pines), a prominent multi-family residential community located in Pembroke Pines, Florida. We invested \$13,533 of equity and \$63,000 of debt in APH. The senior secured note bears interest in cash at the greater of 6.0% or Libor plus 4.0% and interest payment in kind of 5.50% and has a final maturity of October 24, 2020.

On June 25, 2013, we made an investment of \$26,500 to purchase 84.13% of the subordinated notes in LCM XIV CLO Ltd. ("LCM XIV").

On June 27, 2013, we provided \$11,000 of secured second lien financing to Blue Coat Systems, Inc. ("Blue Coat"), a leading provider of web security and wide area network (WAN) optimization

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Table of Contents

solutions. The second lien note bears interest in cash at the greater of 9.5% or Libor plus 8.5% and has a final maturity of June 28, 2020.

On June 27, 2013, we made a follow-on secured debt investment of \$87,500 to support the recapitalization of Progrexion Holdings, Inc. ("Progrexion"). After the financing, we now hold \$241,033 of senior secured debt of Progrexion. The senior secured first lien note bears interest in cash at the greater of 10.5% or Libor plus 8.5% and has a final maturity of September 14, 2017.

On June 28, 2013, Sandow repaid \$30,100 of the \$55,000 loan receivable to us. After the repayment, we now hold \$24,900 of senior secured debt of Sandow.

On June 28, 2013, we made a \$1,000 follow-on investment in Ajax. The subordinated unsecured term loan bears interest in cash at the greater of 11.5% or Libor plus 8.5% and interest payment in kind of 6.0% and has a final maturity of March 30, 2018.

On June 28, 2013, we made an \$18,000 secured debt follow-on investment in New Star Metals, Inc. ("New Star"), a provider of specialized processing services to the steel industry. The senior subordinated term loan bears interest in cash at 11.5% and interest payment in kind of 1.0% and has a final maturity of February 2, 2018.

In June 2013, we determined that the impairment of Manx was other-than-temporary and recorded a realized loss of \$9,397 for the amount that the amortized cost exceeded the fair market value.

Equity Issuance

During the period from April 1, 2013 to May 31, 2013, we sold 8,836,237 shares of our common stock at an average price of \$10.92 per share, and raised \$96,476 of gross proceeds, under the ATM Program. Net proceeds were \$95,474 after commissions to the broker-dealer on shares sold and offering costs. No additional shares were sold from June 1, 2013 to June 30, 2013.

On April 18, 2013, May 23, 2013 and June 20, 2013, we issued 138,087, 117,497 and 117,107 shares of our common stock in connection with the dividend reinvestment plan, respectively.

Dividend

On May 6, 2013, we announced the declaration of monthly dividends in the following amounts and with the following dates:

\$0.110125 per share for May 2013 to holders of record on May 31, 2013 with a payment date of June 20, 2013;

\$0.110150 per share for June 2013 to holders of record on June 28, 2013 with a payment date of July 18, 2013;

\$0.110175 per share for July 2013 to holders of record on July 31, 2013 with a payment date of August 22, 2013; and

\$0.110200 per share for August 2013 to holders of record on August 30, 2013 with a payment date of September 19, 2013.

On June 17, 2013, we announced the declaration of monthly dividends in the following amounts and with the following dates:

\$0.110225 per share for September 2013 to holders of record on September 30, 2013 with a payment date of October 24, 2013;

\$0.110250 per share for October 2013 to holders of record on October 31, 2013 with a payment date of November 21, 2013;

Table of Contents

\$0.110275 per share for November 2013 to holders of record on November 29, 2013 with a payment date of December 19, 2013; and

\$0.110300 per share for December 2013 to holders of record on December 31, 2013 with a payment date of January 23, 2014.

Debt Issuance

During the quarter ended June 30, 2013, we issued \$164,376 in aggregate principal amount of our Prospect Capital InterNotes® for net proceeds of approximately \$159,983, as follows:

Date of Issuance	Principal Amount	Interest Rate Range	Weighted Average Interest Rate	Maturity Date
April 4, 2013 - April 25, 2013	\$ 29,528	4.50% - 5.00%	4.96%	April 15, 2020

	\$ 164,376			

Investment Holdings

As of June 30, 2013, we continue to pursue our diversified investment strategy. At June 30, 2013, approximately \$4,172,852 or 157.1% of our net assets are invested in 124 long-term portfolio investments and CLOs and 5.4% of our net assets are invested in money market funds.

During the year ended June 30, 2013, we originated \$3,103,217 of new investments. Our origination efforts are focused primarily on secured lending, to reduce the risk in the portfolio, investing primarily in first lien loans, and subordinated notes in CLOs, though we also continue to close select junior debt and equity investments. In addition to targeting investments senior in corporate capital structures with our new originations, we have also increased our origination business mix of third party private equity sponsor owned companies, which tend to have more third party equity capital supporting our debt investments than non-sponsor transactions. Our annualized current yield was 13.9% and 13.6% as of June 30, 2012 and June 30, 2013, respectively, across all performing interest bearing investments. The decrease in our current yield is primarily due to recent originations being at lower yields than the existing portfolio. Monetization of equity positions that we hold and loans on non-accrual status are not included in this yield calculation. In many of our portfolio companies we hold equity positions, ranging from minority interests to majority stakes, which we expect over time to contribute to our investment returns. Some of these equity positions include features such as contractual minimum internal rates of returns, preferred distributions, flip structures and other features expected to generate additional investment returns, as well as contractual protections and preferences over junior equity, in addition to the yield and security offered by our cash flow and collateral debt protections.

We classify our investments by level of control. As defined in the 1940 Act, control investments are those where there is the ability or power to exercise a controlling influence over the management or

Edgar Filing: PROSPECT CAPITAL CORP - Form N-2/A

Table of Contents

policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of more than 25% of the voting securities of an investee company. Affiliated investments and affiliated companies are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of the investee company.

As of June 30, 2013, we own controlling interests in AIRMALL USA, Inc. ("AIRMALL"), Ajax, APH, AWCNC, LLC, Borga, Inc., CCPI Holdings, Inc. ("CCPI"), Credit Central Holdings of Delaware, LLC ("Credit Central"), Energy Solutions Holdings, Inc. (f/k/a Gas Solutions Holdings, Inc.) ("Energy Solutions"), First Tower Holdings of Delaware, LLC ("First Tower Delaware"), Manx Energy, Inc. ("Manx"), Nationwide Acceptance Holdings, LLC ("Nationwide"), NMMB Holdings, Inc. ("NMMB"), R-V Industries, Inc. ("R-V"), The Healing Staff, Inc. ("THS"), Valley Electric Holdings I, Inc. ("Valley Electric") and Wolf Energy Holdings, Inc. ("Wolf"). We also own an affiliated interest in BNN Holdings Corp. (f/k/a Biotronic NeuroNetwork) ("Biotronic"), Boxercraft Incorporated ("Boxercraft") and Smart, LLC.

The following is a summary of our investment portfolio by level of control at June 30, 2013 and June 30, 2012, respectively:

Level of Control	June 30, 2013				June 30, 2012
