Global High Income Fund Inc.
Semiannual Report
April 30, 2008

Global High Income Fund Inc.

June 16, 2008

Dear shareholder,

We present you with the semiannual report for Global High Income Fund Inc. (the "Fund") for the six months ended April 30, 2008.

Performance

Over the six months ended April 30, 2008, the Fund returned 1.95% on a net asset value basis and 18.03% on a market price basis. Over the same period, the median returns for the Fund's peer group, the Lipper Emerging Markets Debt Funds, were 0.12% and 5.09% on a net asset value and market price basis, respectively.

In our last report to you, we described the Fund's benchmark as the JP Morgan Emerging Markets Bond Index Global. The benchmark is used as a reference when discussing performance results.

Since that time, the Fund decided to update its benchmark to better reflect anticipated portfolio management strategies, particularly increased investment in "local" markets, in which debt is denominated in local currency rather than in US dollars. To that end, the JPMorgan Emerging Markets Bond Index Global, a broad-based, emerging markets debt index, was combined with the JPMorgan Government Bond Index Emerging Markets Global Diversified, a "local" emerging markets debt benchmark that tracks local currency government bonds issued in emerging markets. The current custom benchmark is comprised of 50% of each index, and became effective as of June 1, 2008.

Over the six-month period, the JPMorgan Emerging Markets Bond Index Global returned 1.90%. (For more on the Fund's performance, please refer to "Performance at a glance" on page 6.)

The Fund did not use leverage during the period. That is, the Fund did not have preferred stock outstanding or borrow from banks for investment purposes as some of its peers may have. Leverage magnifies returns on

both the upside and on the downside, and creates a wider range of returns within the Fund's peer group.

While the Fund traded at a discount to its net asset value ("NAV") per share at the beginning of the reporting period, it traded at a significant premium to its net asset value by the end of the reporting period. We believe this was largely due to the fact that investors considered the emerging markets debt asset class—which was more stable in comparison to other non-US Treasury sectors—to be attractive during the reporting period. A fund trades at a premium when the market price at which its shares trade is more than its NAV, and at a discount when the market price at which its shares trade is less than its NAV. The market price is the price the market is willing to pay for shares of a fund at a given time, and may be influenced by a range of factors, including supply and demand and market conditions. NAV per share is determined by dividing the value of the Fund's securities, cash and other assets, less all liabilities, by the total number of common shares outstanding.

An interview with Portfolio Manager Uwe Schillhorn

Q. How did emerging markets debt perform over the period?

A. Compared to other non-US Treasury sectors of the fixed income market, the emerging markets debt asset class performed relatively well during the six-month reporting period. While emerging markets debt spreads—the difference between the yield paid on US Treasury bonds and emerging markets debt—widened overall, they widened less than those of other sectors of the market, such as corporate bonds and mortgage-backed securities.

Emerging markets debt spreads peaked in early March 2008. This was triggered by a flight to quality as investors were drawn to US Treasury bonds, which they considered a "safe haven" amid the severe credit crunch and massive write-downs by financial institutions and investment banks. Emerging markets debt spreads then narrowed in mid-March and in April as the Federal Reserve Board (the "Fed") added massive amounts of liquidity into the financial system and helped to orchestrate the purchase of Bear Stearns by JPMorgan.

Despite periods of volatility and weakening economic growth in the US, the underlying fundamentals in emerging markets countries held up fairly well during the reporting period. In general, fiscal reforms, high commodity prices and stronger economic growth in emerging markets countries supported their debt prices.

Global High Income Fund Inc.

Q. Did any themes emerge at the regional level?

- A. We conducted comprehensive research and pursued a variety of strategies as we sought to generate a high level of current income and capital appreciation for the Fund. We sought to meet the Fund's goals by strategically allocating its portfolio among various countries, securities and currencies. By maintaining a diversified portfolio, we attempted to keep the Fund from being overly dependent upon any one area to generate positive returns.

During the reporting period, our holdings in oil-rich countries such as Russia and Venezuela contributed to the Fund's performance. In particular, these oil exporters benefited from record high prices, given continued strong global demand. Our overweight exposure to Pakistan, however, delivered mixed results. Initially, this position detracted from performance as violence increased in the country in late 2007. However, Pakistan's debt prices then rallied in January and February 2008, in the period leading up to that country's elections, which had a positive impact on performance.

Elsewhere, the Fund's overweight position in Argentina detracted from performance during the six-month reporting period. Ongoing farmers' protests, continued political unrest and economic difficulties collectively weighed on Argentina's debt prices.

Q. How did you manage the Fund's duration during the reporting period?

- A. We maintained a defensive interest rate duration position throughout the reporting period, keeping the Fund's interest rate duration slightly shorter than that of its benchmark. Over the course of the reporting period, this stance detracted from performance slightly. (Duration measures a fund's sensitivity to interest rate changes, and is related to the maturity of the bonds comprising the portfolio.)

Q. What other portfolio positioning strategies did you use during the reporting period?

- A. We had an overweight to local currency investments during the first half of the reporting period, as we sought to capture relatively high local yields and take advantage of currencies that we considered to be undervalued. This strategy enhanced the Fund's performance when local currency investments outperformed their US dollar-dominated counterparts. An example of a strong performer was Turkey, as its debt offered high yields, and the country's inflation picture was relatively benign.

Global High Income Fund Inc.

During the second half of the reporting period, we sought to reduce our exposure to local markets, due to concerns about rising inflation and the possibility of refinancing risk. To do this, we reduced the Fund's non-US currency positions, and sold longer-duration bonds in favor of bonds with shorter duration, which helped performance.

Q. What is your outlook for emerging markets debt?

A. In our opinion, the fundamentals in many emerging markets countries remain favorable, and we do not expect to see a large amount of either spread widening or tightening in the near term. While we expect that we could see an increase in volatility in the asset class, we believe this is more likely to be caused by another bout of investor risk aversion than deteriorating fundamentals within emerging markets countries.

Looking ahead, we plan to continue to pursue our disciplined investment approach and seek out attractively valued securities. Although we reduced the Fund's holdings in local market investments during the reporting period, going forward, we expect to find local markets to be more attractive than their US dollar-denominated counterparts.

Global High Income Fund Inc.

We thank you for your continued support and welcome any comments or questions you may have. For additional information regarding the Fund, please contact your Financial Advisor, or visit us at www.ubs.com/globalam-us.

Sincerely,

Kai R. Sotorp

Past performance does not predict future performance. The return and value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. The Fund's net asset value ("NAV") returns assume, for illustration only, that dividends and other distributions, if any, were reinvested at the NAV on the payable dates. The Fund's market price returns assume that all dividends and other distributions, if any, were reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Returns for the period of less than one year have not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and other distributions, if any, or the sale of Fund shares.

⁽¹⁾ Global High Income Fund Index is an unmanaged index compiled by the advisor, constructed as follows: from the Fund's inception until 12/31/93: 100% JPMorgan Emerging Markets Bond Index (EMBI); from 1/1/94 - 11/5/06: 100% JPMorgan Emerging Markets Bond Index Global (EMBI Global); from 11/6/06 to 3/31/08: 70% JPMorgan Emerging Markets Bond Index Global (EMBI Global) and 30% JPMorgan Government Bond Index-Emerging Markets Diversified (GBI-EM Diversified); from 4/1/08 to 5/31/08: 50% JPMorgan Emerging Markets Bond Index Global (EMBI Global) and 50% JPMorgan Government Bond Index-Emerging Markets Diversified (GBI-EM Diversified); from 6/1/08 to Present: 50% JPMorgan Emerging Markets Bond Index Global (EMBI Global) and 50% JPMorgan Government Bond Index-Emerging Markets Global Diversified (GBI-EM Global Diversified).

⁽²⁾ JPMorgan Emerging Markets Bond Index Global (EMBI Global) is an unmanaged index which tracks total returns for US-dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds.

Lipper peer group data calculated by Lipper Inc.; used with permission. The Lipper median is the return of the fund that places in the middle of the peer group.

Notes to portfolio of investments

* Non-income producing security.

(1) Step bond□Coupon rate increases in increments to maturity. Rate disclosed is as of April 30, 2008. Maturity date disclosed is the ultimate maturity date.

(2) Security linked to closed end fund. The rate shown is the annualized yield at April 30, 2008.

(3)

Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-CSRS

Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid, unless otherwise noted, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2008, the value of these securities amounted to \$14,643,980 or 4.80% of net assets.

(4) Floating rate security□The interest rate shown is the current rate as of April 30, 2008.

(5) Security is illiquid. At April 30, 2008, the value of these securities amounted to \$17,693,669 or 5.80% of net assets.

(6) Bond interest is in default.

(7) Zero coupon bond. The rate shown is the effective yield at April 30, 2008.

Global High Income Fund Inc.

Portfolio of investments—April 30, 2008 (unaudited)

(8) Security represents an equity claim linked to Argentina's gross domestic product.

(9) The rate shown is the effective yield at the date of purchase.

(10) The rate shown reflects the yield at April 30, 2008.

(11) The table below details the Fund's investment in a security issued by a fund that is advised by the same advisor as the Fund. The advisor does not earn a management fee from UBS Supplementary Trust.

Security description	Value 10/31/07	Purchases during the six months ended 04/30/08	Sales during the six months ended 04/30/08	Value 04/30/08	Income earned from affiliate for the six months ended 04/30/08
UBS Supplementary Trust—U.S. Cash Management Prime Fund	\$8,810,452	\$106,215,081	(\$98,512,819)	\$16,512,714	\$341,936

(12) Security, or portion thereof, was delivered to cover margin requirements for futures contracts.

DISC Discount bond

EXIT Bond A long-term bond with a low interest rate, often issued by a less developed country, that gives the buyer the right of exemption from taking part in any subsequent rescheduling.

Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-CSRS

* Calculated using the average shares method.

(1) Total net asset value return is calculated assuming a \$10,000 purchase of common stock at the current net asset value on the first day of each period reported and a sale at the current net asset value on the last day of each period reported, and assuming reinvestment of dividends and other distributions at the net asset value on the payable dates. Total net asset value return does not reflect brokerage commissions or the deduction of taxes that a shareholder would pay on Fund dividends/distributions or a sale of Fund shares.

(2) Total market price return is calculated assuming a purchase of \$10,000 of common stock at the current market price on the first day of each period reported and a sale at the current market price on the last day of each period reported, and assuming reinvestment of dividends and other distributions at prices obtained under the Fund's Dividend Reinvestment Plan. Total market price return does not reflect brokerage commissions or the deduction of taxes that a shareholder would pay on Fund dividends/distributions or a sale of Fund shares.

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

Organization and significant accounting policies

Global High Income Fund Inc. (the "Fund") was incorporated in Maryland on February 23, 1993 and is registered with the Securities and Exchange Commission as a closed-end, non-diversified management investment company. The Fund's primary investment objective is to achieve a high level of current income. As a secondary objective the Fund seeks capital appreciation, to the extent consistent with its primary objective.

In the normal course of business the Fund enters into contracts that contain a variety of representations that provide general indemnification for certain liabilities. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

The preparation of financial statements in accordance with US generally accepted accounting principles requires Fund management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies:

Valuation of investments—The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized "matrix" systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter ("OTC") market and listed on The NASDAQ Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. (UBS Global AM), the investment advisor of the Fund. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the Board). Foreign currency exchange rates are generally determined as of the close of the New York Stock Exchange (NYSE). Occasionally, events affecting the value of foreign investments occur between the time at which they are determined and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value. If events materially affecting the value of such securities occur during such time periods, the securities will be valued at their fair value as determined in good faith by or under the direction of the Board. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. All investments quoted in foreign currencies will be valued daily in US dollars on the basis of the foreign currency exchange rates prevailing at the time such valuation is determined by the Fund's custodian.

In September 2006, the Financial Accounting Standards Board (FASB) issued *Statement of Financial Accounting Standards No. 157, Fair Value Measurements* (FAS 157). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. As of April 30, 2008, the Fund does not believe the adoption of FAS 157 will impact the amounts reported in the financial statements, however, additional disclosures will be required about the inputs used to develop the measurements of fair value and the effect of certain measurements reported in the Statement of operations for a fiscal period.

In March 2008, the FASB issued *Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities* (FAS 161). This standard requires enhanced disclosures about the Fund's derivative and hedging activities. FAS 161 is effective for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. Management is currently

Global High Income Fund Inc.

Notes to financial statements April 30, 2008 (unaudited)

evaluating the impact the adoption of FAS 161 will have on the Fund's financial statement disclosures.

Investment transactions and investment income—Investment transactions are recorded on the trade date. Realized gains and losses from investment and foreign exchange transactions are calculated using the identified cost method. Interest income is recorded on an accrual basis. Discounts are accreted and premiums are amortized as adjustments to interest income and the identified cost of investments.

Foreign currency translation—The Fund uses the foreign currency exchange rates determined as of the close of regular trading on the NYSE. For purposes of calculating the US dollar equivalent value of a non-US dollar denominated obligation, foreign currency amounts are translated into US dollars on the following basis: (1) market value of investment securities and other assets and liabilities at the exchange rates prevailing at the end of the Fund's fiscal period; and (2) purchases and sales of investment securities and income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

Although the net assets and the market value of the Fund's portfolio are presented at the foreign exchange rates at the end of the Fund's fiscal period, the Fund does not generally isolate the effect of fluctuations in foreign exchange rates from the effect of the changes in market prices of securities. However, the Fund does isolate the effect of fluctuations in foreign exchange rates when determining the gain or loss upon the sale or maturity of foreign currency-denominated securities pursuant to US federal income tax regulations. Certain foreign exchange gains and losses included in realized and unrealized gains and losses are included in or are a reduction of ordinary income in accordance with US federal income tax regulations.

Forward foreign currency contracts—The Fund may enter into forward foreign currency exchange contracts (forward contracts) in connection with planned purchases or sales of securities or to hedge the US dollar value of portfolio securities denominated in a particular currency. The Fund may also use forward contracts in an attempt to enhance income.

The Fund has no specific limitation on the percentage of assets which may be committed to such contracts. The Fund may enter into forward contracts or maintain a net exposure to forward contracts only if (1) the consummation of the contracts would not obligate the Fund to deliver an

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

amount of foreign currency in excess of the value of the position being hedged by such contracts or (2) the Fund identifies cash or liquid securities in an amount not less than the value of its assets committed to the consummation of the forward contracts and not covered as provided in (1) above, as marked-to-market daily.

Risks may arise upon entering into forward contracts from the potential inability of counterparties to meet the terms of their forward contracts and from unanticipated movements in the value of foreign currencies relative to the US dollar.

Fluctuations in the value of forward contracts are recorded for book purposes as unrealized gains or losses by the Fund. Realized gains and losses include net gains and losses recognized by the Fund on contracts which have been sold or matured.

Futures contracts—The Fund may use financial futures contracts for hedging purposes and to adjust exposure to US and foreign fixed income markets in connection with a reallocation of the Fund's assets or to manage the average duration of the Fund. However, imperfect correlations between futures contracts and the related securities or markets, or market disruptions, do not normally permit full control of these risks at all times. Using financial futures contracts involves various market risks. The maximum amount at risk from the purchase of a futures contract is the contract value.

Upon entering into a financial futures contract, the Fund is required to deliver to a broker an amount of cash and/or liquid securities equal to a certain percentage of the contract amount. This amount is known as the "initial margin". Subsequent payments, known as "variation margin", are made or received by the Fund each day, depending on the daily fluctuations in the value of the underlying financial futures contracts. Such variation margin is recorded for financial statement purposes on a daily basis as an unrealized gain or loss on futures until the financial futures contract is closed or expires, at which time the net gain or loss is reclassified to realized gain or loss on futures.

The Statement of operations reflects net realized and net unrealized gains and losses on these contracts.

Swap agreements—The Fund may engage in swap agreements, including but not limited to interest rate, currency, total return, and credit

Global High Income Fund Inc.

Notes to financial statements□April 30, 2008 (unaudited)

default swap agreements. The Fund expects to enter into these transactions to preserve a return or spread on a particular investment or portion of the portfolio□s duration, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in the most economical way possible.

The Fund may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect itself from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Credit default swap agreements involve commitments to make or receive payments in the event of a default or a credit event of a referenced security. As a buyer, the Fund would make periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event does occur, the Fund typically would receive full notional value for a reference obligation that may have little or no value. As a seller, the Fund would receive periodic payments from the counterparty, and the Fund would make payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will gain the periodic stream of payments it received over the term of the contract. However, if a credit event occurs, the Fund will pay full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

Total return swap agreements involve commitments to pay or receive interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation.

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

The use of swaps involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If UBS Global AM is incorrect in its forecast of market values, interest rates and other applicable factors, the investment performance of the Fund will be less favorable than it would have been if this investment technique was never used. Swaps do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap defaults and fails to consummate the transaction, the Fund's risk of loss will consist of the net amount of interest or other payments that the Fund is contractually entitled to receive. Therefore, the Fund would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

The Fund accrues for interim payments on swap agreements on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap agreements on the Statements of assets and liabilities. Once interim payments are settled in cash, the net amount is recorded as realized gain/loss on swap agreements, in addition to realized gain/loss recorded upon the termination of swap agreements on the Statements of operations. Fluctuations in the value of swap agreements are recorded for financial statement purposes as unrealized appreciation or depreciation of swap agreements.

At April 30, 2008, the Fund had outstanding interest rate swap contracts with the following terms:

Counterparty	Notional amount	Termination dates	Payments made by the Fund	Payments received by the Fund	Value

Purchased options □ The Fund may purchase put and call options on foreign or US securities and indices as well as exchange-listed call options on particular market segment indices to achieve temporary exposure to a specific security, industry or geographic region. Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument. The Fund pays a premium which is included in the Statement of assets and liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying futures, security or currency transaction to determine the realized gain or loss.

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

Dividends and distributions—Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends from net investment income and distributions from net realized capital gains and/or return of capital is determined in accordance with US federal income tax regulations, which may differ from US generally accepted accounting principles. These “book/tax” differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification.

Concentration of risk

Investing in securities of foreign issuers and currency transactions may involve certain considerations and risks not typically associated with investments in the United States. These risks include revaluation of currencies, adverse fluctuations in foreign currency values and possible adverse political, social and economic developments, including those particular to a specific industry, country or region, which could cause the securities and their markets to be less liquid and prices more volatile than those of comparable US companies and US government securities. These risks are greater with respect to securities of issuers located in emerging market countries in which the Fund invests. The ability of the issuers of debt securities held by the Fund to meet their obligations may be affected by economic and political developments particular to a specific industry, country, state or region.

Investment advisor and administrator and other transactions with related entities

The Fund’s Board has approved an investment advisory and administration contract (“Advisory Contract”) with UBS Global AM. In accordance with the Advisory Contract, the Fund pays UBS Global AM an investment advisory and administration fee, which is accrued weekly and paid monthly, at the annual rate of 1.25% of the Fund’s average weekly net assets. UBS Global AM has agreed to waive compensation otherwise payable to it to reduce the fee it receives under the Advisory Contract so that it is paid at the following rates:

Average weekly net assets	Advisory fee
Up to \$200 million	1.25%
Above \$200 million	1.00%

Global High Income Fund Inc.

Notes to financial statements□April 30, 2008 (unaudited)

The waiver will continue indefinitely unless the Board agrees to any change. At April 30, 2008, the Fund owed UBS Global AM \$244,315 which is composed of \$312,902 of investment advisory and administration fees less fees waived of \$68,587. For the six months ended April 30, 2008, UBS Global AM waived \$140,070 of investment advisory and administration fees from the Fund.

Additional information regarding compensation to affiliate of a board member

Effective March 1, 2005, Professor Meyer Feldberg accepted the position of senior advisor to Morgan Stanley, resulting in him becoming an interested director of the Fund. The Fund has been informed that Professor Feldberg's role at Morgan Stanley does not involve matters directly affecting any UBS funds. Fund transactions are executed through Morgan Stanley based on that firm's ability to provide best execution of the transactions. During the six months ended April 30, 2008, the Fund purchased and sold certain securities (e.g., fixed income securities) in principal trades with Morgan Stanley having an aggregate value of \$432,600. Morgan Stanley received compensation in connection with these trades, which may have been in the form of a "mark-up" or "mark-down" of the price of the securities, a fee from the issuer for maintaining a commercial paper program, or some other form of compensation. Although the precise amount of this compensation is not generally known by UBS Global AM, UBS Global AM believes that under normal circumstances it represents a small portion of the total value of the transactions.

Securities lending

The Fund may lend securities up to 33¹/₃% of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents or US government securities in an amount at least equal to the market value of the securities loaned, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly. The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents or US government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. UBS Financial Services Inc. and other affiliated broker-dealers have been approved as borrowers

Global High Income Fund Inc.

Notes to financial statements—April 30, 2008 (unaudited)

under the Fund's securities lending program. UBS Securities LLC is the lending agent. For the period ended April 30, 2008, UBS Securities LLC did not earn any compensation as the Fund's lending agent. At April 30, 2008, the Fund did not have any securities on loan; and the Fund did not owe UBS Securities LLC compensation as the Fund's lending agent.

Capital stock

There are 100,000,000 shares of \$0.001 par value common stock authorized and 21,591,836 shares outstanding at April 30, 2008. For the six months ended April 30, 2008 and for the year ended October 31, 2007, there were no transactions involving common stock.

Purchases and sales of securities

For the six months ended April 30, 2008, aggregate purchases and sales of portfolio securities, excluding short-term securities, were \$81,604,689 and \$105,937,578, respectively.

Federal tax status

It is the Fund's policy to comply with all requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. In addition, by distributing during each calendar year substantially all of its net investment income, net realized capital gains and certain other amounts, if any, the Fund intends not to be subject to a federal excise tax. Accordingly, no federal income tax provision was required.

The tax character of distributions paid during the fiscal year ended October 31, 2007 was as follows:

Distributions paid from:	2007
Ordinary income	\$17,710,302
Net long-term capital gains	11,479,701
	\$29,190,003

The tax character of distributions paid and components of accumulated earnings (deficit) on a tax basis for the current fiscal year will be calculated after the Fund's fiscal year ending October 31, 2008.

Global High Income Fund Inc.

Notes to financial statements□April 30, 2008 (unaudited)

For federal income tax purposes, which was substantially the same as book purposes, the tax cost of investments and the components of net unrealized appreciation of investments at April 30, 2008 were as follows:

Tax cost of investments	\$271,951,741
-------------------------	---------------

Gross unrealized appreciation	16,408,718
-------------------------------	------------

Gross unrealized depreciation	(8,702,645)
-------------------------------	-------------

Net unrealized appreciation	\$7,706,073
-----------------------------	-------------

The Fund adopted the provisions of Financial Accounting Standards Board Interpretation No. 48 (□FIN 48□), Accounting for Uncertainty in Income Taxes. The implementation of FIN 48 resulted in no material liabilities for unrecognized tax benefits and no material changes to the beginning net asset value of the Fund.

As of and during the six months ended April 30, 2008, the Fund did not have any liabilities for any unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of operations. During the period, the Fund did not incur any interest or penalties.

Each of the tax years in the three year period ended October 31, 2007 remains subject to examination by the Internal Revenue Service and the state taxing authorities. The adoption of FIN 48 had no impact on the operations of the Fund for the six months ended April 30, 2008.

Global High Income Fund Inc.

Tax information (unaudited)

Dividends received by tax-exempt recipients (e.g., IRAs and Keoghs) need not be reported as taxable income. Some retirement trusts (e.g., corporate, Keogh and 403(b)(7) plans) may need this information for their annual reporting. Since the Fund's fiscal year is not the calendar year, another notification will be sent in respect of calendar year 2008. The second notification, which will reflect the amount to be used by calendar year taxpayers on their federal income tax returns, will be made in conjunction with Form 1099 DIV and will be mailed in January 2009. Shareholders are advised to consult their own tax advisors with respect to the tax consequences of their investment in the Fund.

The foreign taxes paid represent taxes incurred by the Fund on income received by the Fund from foreign sources. Foreign taxes paid may be included in taxable income with an offsetting deduction from gross income or may be taken as a credit for taxes paid to foreign governments. You should consult your tax advisor regarding the appropriate treatment of foreign taxes paid.

Global High Income Fund Inc.

General information (unaudited)

The Fund

Global High Income Fund Inc. (the "Fund") is a non-diversified, closed-end management investment company whose shares trade on the New York Stock Exchange ("NYSE"). The Fund's primary investment objective is to achieve a high level of current income. As a secondary objective, the Fund seeks capital appreciation, to the extent consistent with its primary objective. There can be no assurance that the Fund's investment objective will be achieved. The Fund's investment advisor and administrator is UBS Global Asset Management (Americas) Inc. ("UBS Global AM"), an indirect wholly owned asset management subsidiary of UBS AG.

Shareholder information

The Fund's NYSE trading symbol is "GHI." Comparative net asset value and market price information about the Fund is published weekly in various publications.

Shareholder meeting information

An annual meeting of shareholders of the Fund was held on February 21, 2008. At the meeting, Richard Q. Armstrong, Alan S. Bernikow, Richard R. Burt, Meyer Feldberg, Bernard H. Garil and Heather R. Higgins were elected to serve as board members until the next annual meeting of shareholders, or until their successors are duly elected and qualified or until they retire, resign or are earlier removed. The shares were voted as indicated below:

To vote for or withhold authority in the election of:	Shares voted for	Shares withhold authority
Richard Q. Armstrong	18,864,840.637	252,383.856
Alan S. Bernikow	18,860,609.788	256,614.705
Richard R. Burt	18,867,626.788	249,597.705
Meyer Feldberg	18,863,868.788	253,355.705
Bernard H. Garil	18,861,809.788	255,414.705
Heather R. Higgins	18,857,708.019	259,444.474

The Fund is not aware of any broker non-votes. (Broker non-votes are shares held in street name for which the broker indicates that instructions have not been received from the beneficial owners or other persons entitled to vote and for which the broker does not have discretionary voting authority.)

Global High Income Fund Inc.

General information (unaudited)

Quarterly Form N-Q portfolio schedule

The Fund will file its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC 0330. Additionally, you may obtain copies of Forms N-Q from the Fund upon request by calling 1-800-647 1568.

Proxy voting policies, procedures and record

You may obtain a description of the Fund's (1) proxy voting policies, (2) proxy voting procedures and (3) information regarding how the Fund voted any proxies related to portfolio securities during the most recent 12-month period ended June 30 for which an SEC filing has been made, without charge, upon request by contacting the Fund directly at 1-800-647 1568, online on the Fund's Web site: www.ubs.com/ubsglobalam-proxy, or on the EDGAR Database on the SEC's Web site (<http://www.sec.gov>).

Dividend reinvestment plan

The Fund's Board has established a Dividend Reinvestment Plan (the Plan) under which all shareholders whose shares are registered in their own names, or in the name of UBS Financial Services Inc. or its nominee, will have all dividends and other distributions on their shares of common stock automatically reinvested in additional shares, unless such shareholders elect to receive cash. Shareholders who elect to hold their shares in the name of another broker or nominee should contact such broker or nominee to determine whether, or how, they may participate in the Plan. The ability of such shareholders to participate in the Plan may change if their shares are transferred into the name of another broker or nominee.

A shareholder may elect not to participate in the Plan or may terminate participation in the Plan at any time without penalty, and shareholders who have previously terminated participation in the Plan may rejoin it at any time. Changes in elections must be made in writing to the Fund's transfer agent and should include the shareholder's name and address as they appear on that share certificate or in the transfer agent's records.

Global High Income Fund Inc.

General information (unaudited)

An election to terminate participation in the Plan, until such election is changed, will be deemed an election by a shareholder to take all subsequent distributions in cash. An election will be effective only for distributions declared and having a record date at least ten days after the date on which the election is received.

Additional shares of common stock acquired under the Plan will be purchased in the open market, on the NYSE or otherwise, at prices that may be higher or lower than the net asset value per share at the time of the purchase. Investors should consider whether continued participation in the dividend reinvestment plan is appropriate for them when the Fund's market price exceeds its net asset value; a portion of a dividend/distribution may represent a return of capital, which would be reinvested in the Fund at a premium to net asset value. The number of shares of common stock purchased with each dividend/distribution will be equal to the result obtained by dividing the amount of the dividend/distribution payable to a particular shareholder by the average price per share (including applicable brokerage commissions) that the transfer agent was able to obtain in the open market. The Fund will not issue any new shares in connection with the Plan. There currently is no charge to participants for reinvesting dividends or other distributions. The transfer agent's fees for handling the reinvestment of distributions are paid by the Fund. However, each participant pays a pro rata share of brokerage commissions incurred with respect to the transfer agent's open market purchases of common stock in connection with the reinvestment of distributions. The automatic reinvestment of dividends and other distributions in shares of common stock does not relieve participants of any income tax that may be payable on such distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan with respect to any dividend or other distribution if notice of the change is sent to Plan participants at least 30 days before the record date for such distribution. The Plan also may be amended or terminated by the transfer agent by at least 30 days' written notice to all Plan participants. Additional information regarding the Plan may be obtained from, and all correspondence concerning the Plan should be directed to, the transfer agent at PFPC Inc., P.O. Box 43027, Providence, Rhode Island 02940-3027. For further information regarding the Plan, you may also contact the transfer agent directly at 1-800-331 1710.

Global High Income Fund Inc.

General information (unaudited)

Distribution policy

The Fund's Board adopted a managed distribution policy in December 1999. Pursuant to the policy as in effect from December 1999 through early May 2005, the Fund made regular monthly distributions at an annualized rate equal to 11% of the Fund's net asset value, as determined as of the last trading day during the first week of that month (usually a Friday unless the NYSE is closed that Friday). The Board approved reducing the annualized rate for distribution pursuant to the policy from 11% to 9% effective beginning with the June 2005 monthly distribution. Prior to December 20, 1999, the Fund's distributions varied based on the Fund's net investment income and realized capital gains or losses. The Fund's Board may change or terminate the managed distribution policy at any time; any such change or termination may have an adverse effect on the market price for the Fund's shares.

To the extent that the Fund's taxable income in any fiscal year exceeds the aggregate amount distributed based on a fixed percentage of its net asset value, the Fund would make an additional distribution in the amount of that excess near the end of the fiscal year. To the extent that the aggregate amount distributed by the Fund (based on a percentage of its net assets) exceeds its current and accumulated earnings and profits, the amount of that excess would constitute a return of capital or net realized capital gains for tax purposes.

Monthly distributions based on a fixed percentage of the Fund's net asset value may require the Fund to make multiple distributions of long-term capital gains during a single fiscal year. The Fund has received exemptive relief from the Securities and Exchange Commission that enables it to do so. The Fund's Board will reassess the annualized percentage of net assets at which the Fund's monthly distributions will be made no less frequently than annually.

Item 2. Code of Ethics.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 3. Audit Committee Financial Expert.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 4. Principal Accountant Fees and Services.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 5. Audit Committee of Listed Registrants.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 6. Schedule of Investments.

Included as part of the report to shareholders filed under Item 1 of this form.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

There were no purchases made by or on behalf of the Registrant or any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended, of shares of the Registrant's equity securities made in the period covered by this report.

Item 10. Submission of Matters to a Vote of Security Holders.

The registrant's Board has established a Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee will consider nominees recommended by shareholders if a vacancy occurs among those board members who are not interested persons as defined in Section 2(a)(19) of the Investment Company Act of 1940, as amended. In order to recommend a nominee, a shareholder should send a letter to the chairperson of the Nominating and Corporate Governance Committee, Richard R. Burt, care of the Secretary of the registrant at UBS Global Asset Management, 51 West 52nd Street, New York, New York 10019-6114,

and indicate on the envelope Nominating and Corporate Governance Committee. The shareholder's letter should state the nominee's name and should include the nominee's resume or curriculum vitae, and must be accompanied by a written consent of the individual to stand for election if nominated for the Board and to serve if elected by shareholders.

Item 11. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
- (b) The registrant's principal executive officer and principal financial officer are aware of no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

- (a) (1) Code of Ethics Form N-CSR disclosure requirement not applicable to this filing of a semi-annual report.
- (a) (2) Certifications of principal executive officer and principal financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 is attached hereto as Exhibit EX-99.CERT.
