

BANK OF MONTREAL /CAN/

Form 424B2

July 03, 2017

Registration Statement No. 333-217200

Filed Pursuant to Rule 424(b)(2)

Amended and Restated Pricing Supplement dated June 28, 2017 to the Pricing Supplement dated June 23, 2017

(To the Prospectus dated April 27, 2017 and

the Prospectus Supplement dated April 27, 2017)

\$3,573,000

Senior Medium-Term Notes, Series D

Notes Linked to a Fixed Basket of 17 Common Equity Securities,

due January 7, 2019

The notes are linked to an equally-weighted basket of 17 common equity securities (each, a “Reference Share” and together, the “Basket”) of entities that are not affiliated with us (each, a “Reference Share Issuer”). The Reference Shares were selected in May 2017 by Raymond James & Associates, Inc. (“Raymond James”).

You may lose all or a portion of the principal amount of your notes at maturity.

The Reference Shares are: Apple Inc. (“AAPL”); Beacon Roofing Supply, Inc. (“BECN”); Big Lots, Inc. (“BIG”); Bioverativ Inc. (“BIVV”); BofI Holding, Inc. (“BOFI”); Comcast Corporation (“CMCSA”); Cisco Systems, Inc. (“CSCO”); CSRA Inc. (“CSRA”); E*TRADE Financial Corporation (“ETFC”); HCA Healthcare, Inc. (“HCA”); Lannett Company, Inc. (“LCI”); Republic Services, Inc. (“RSG”); SYNEX Corporation (“SNX”); SVB Financial Group (“SIVB”); SkyWest, Inc. (“SKYW”); Tempur Sealy International, Inc. (“TPX”); and UnitedHealth Group Incorporated (“UNH”).

The notes do not pay any interest.

On the maturity date, the amount that we will pay to you for each \$1,000 in principal amount of the notes (the “Redemption Amount”) will depend upon the performance of the Basket and the dividends paid on the Reference Shares over the term of the notes. As described in more detail below, the Redemption Amount will be less than the price to the public set forth below if the “Basket Level Percentage” (as defined below) is not at least approximately 102.72%. We describe in more detail below how the payment at maturity will be determined.

Any payment at maturity on the notes is subject to our credit risk.

The notes will not be listed on any securities exchange or quotation system.

The CUSIP number of the notes is 06367TXM7.

Our subsidiary, BMO Capital Markets Corp. (“BMOCM”), is the agent for this offering. See “Supplemental Plan of Distribution—Conflicts of Interest” below.

Investing in the notes involves risks, including those described in the “Additional Risk Factors” section beginning on page PS-6 of this pricing supplement and the “Risk Factors” sections beginning on page S-1 of the prospectus supplement, and on page 8 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these notes or passed upon the accuracy of this pricing supplement, the prospectus supplement or the prospectus. Any representation to the contrary is a criminal offense.

The notes will be our unsecured obligations and will not be savings accounts or deposits that are insured by the United States Federal Deposit Insurance Corporation, the Deposit Insurance Fund, the Canada Deposit Insurance Corporation or any other governmental agency or instrumentality or other entity.

On June 23, 2017 (“the pricing date”), the estimated initial value of the notes was \$969.30 per \$1,000 in principal amount. As discussed in more detail in this pricing supplement, the actual value of the notes at any time will reflect many factors and cannot be predicted with accuracy.

	<u>Price to Public</u>	<u>Agent’s Commission⁽¹⁾</u>	<u>Proceeds to Us</u>
Per \$1,000 of the Notes	US\$1,000.00	US\$15.00	US\$985.00
Total	US\$3,573,000	US\$53,595	US\$3,519,405

⁽¹⁾\$15.00 per \$1,000 in principal amount per note will be received by Raymond James for its services acting as an agent in connection with the distribution of the notes. Please see “Supplemental Plan of Distribution (Conflicts of

Interest)” in this pricing supplement.
BMO Capital Markets

KEY TERMS OF THE NOTES

This section summarizes the terms of the notes, and should be read together with the additional information in this pricing supplement, including the information set forth below under the captions “Additional Risk Factors” and “Description of the Notes.”

Pricing Date of
the
Notes:

June 23, 2017

Issue Date of
the Notes:

June 30, 2017

Issue Price of
the Notes:

\$1,000 per \$1,000 in principal amount of the notes.

Interest
Payments:

None.

Reference
Shares:

The 17 Reference Shares set forth on the cover page of this pricing supplement.

The Reference Shares are securities selected by the Equity Research Department of Raymond James that may stand to benefit from the Trump administration tax plan announced in April 2017, as discussed in the section below, “Reference Share Selection.” However, no assurance can be given that these securities will perform well over the term of the notes.

Redemption
Amount:

The amount that you will receive at maturity for each \$1,000 in principal amount of the notes will depend upon the performance of the Basket and the dividends paid on the Reference Shares. The Redemption Amount will equal the product of (a) \$1,000, (b) the Basket Level Percentage, and (c) the Participation Rate.

As discussed in more detail below, the Basket Level Percentage must exceed approximately 102.72% in order for you to receive a Redemption Amount per \$1,000 in principal amount of the notes that exceeds the principal amount. In addition, the Redemption Amount could be substantially less than the principal amount of the notes.

Reference
Share
Weighting:

For each Reference Share, 5.8824%.

Initial Basket
Level:

The initial level of the Basket shall be deemed to be \$1,000.

Initial
Composition of
the Basket:

The Basket shall initially be deemed to consist of a number of each Reference Share calculated as follows:

- Each Reference Share shall initially constitute 1/17 of the Basket, with an aggregate value of \$58.824 (\$1,000 divided by 17).

- Accordingly, initially, the number of shares of each Reference Share in the Basket was calculated by dividing \$58.824 by the Initial Share Price, rounded to four decimal places.
- The number of shares of each Reference Share initially included in the Basket was determined on the final Averaging Date, and is set forth in the table below.

For example, if the Initial Share Price of a Reference Share is \$25.00, the Basket will initially be deemed to include 2.3530 shares of that Reference Share (\$58.824 divided by \$25.)

As to any Reference Share, each cash dividend declared on such Reference Share shall be deemed to be reinvested by the Basket in additional shares of that Reference Share. The number of additional shares to be added to the Basket will be determined based on the product of (a) the number of such Reference Shares in the Basket as of the applicable ex-dividend date multiplied by (b) the applicable Dividend Amount. The result will be divided by the closing price of the relevant Reference Share as of the applicable ex dividend date.

Addition of
Shares to
the Basket:

For example, if there are three shares of a Reference Share in the Basket, and the relevant issuer declares a dividend of \$1 per share, and the closing price of the Reference Share on the ex dividend date is equal to \$10, then the number of shares to be added to the Basket will be 0.30. The Basket will then be deemed to have 3.3 of those shares.

Accordingly, the number of shares of each Reference Share included in the Basket will increase over the term of the notes if the relevant issuer pays dividends to holders of the Reference Share.

PS-2

Final Basket Level: The Final Basket Level will equal the sum, for each Reference Share, of the number of shares of that Reference Share in the Basket as of the final valuation date multiplied by its Final Share Price.

Participation Rate: 97.35%. Because the Participation Rate is less than 100%, the Basket Level Percentage must exceed approximately 102.72% in order for you to receive a Redemption Amount per \$1,000 in principal amount of the notes that exceeds the principal amount of the notes.

The Basket Level Percentage will equal:

Basket Level Percentage: $\frac{\text{Final Basket Level}}{\text{Initial Basket Level}}$

The Basket Level Percentage will be expressed as a percentage.

Average Intra-day Price: With respect to a Reference Share and any averaging date, the arithmetic mean of the prices at which we or any of our affiliates (which may include the calculation agent) acquires, establishes, reestablishes, substitutes, maintains, unwinds or disposes of, as the case may be, of any transactions or assets relating to that Reference Share as we deem necessary to hedge our obligations with respect to the notes.

Initial Share Price: The arithmetic mean of the Average Intra-day Prices on each averaging date. The Initial Share Price for each of the Reference Shares, and the number of each Reference Share included in the basket, are as follows:

Reference Share	Ticker	Initial Share Price	Number of Shares Initially in the Basket
Apple Inc.	AAPL	146.0427	0.402783
Beacon Roofing Supply, Inc.	BECN	48.9627	1.201395
Big Lots, Inc.	BIG	47.5825	1.236243
Bioverativ Inc.	BIVV	61.2018	0.961141
Bofi Holding, Inc.	BOFI	23.4678	2.506563
Comcast Corporation	CMCSA	39.4693	1.490362
Cisco Systems, Inc.	CSCO	32.1531	1.829482
CSRA Inc.	CSRA	31.7929	1.85021
E*TRADE Financial Corporation	ETFC	36.7138	1.602218
HCA Healthcare, Inc.	HCA	86.4673	0.680298
Lannett Company, Inc.	LCI	20.4182	2.880936
Republic Services, Inc.	RSG	64.0239	0.918775
SVB Financial Group	SIVB	173.659	0.33873
SkyWest, Inc.	SKYW	36.1101	1.629005
SYNNEX Corporation	SNX	126.2002	0.466113
Tempur Sealy International, Inc.	TPX	50.9076	1.155496
UnitedHealth Group Incorporated	UNH	185.1401	0.317724

Final Share Price: For one Reference Share, the arithmetic mean of the closing prices on each valuation date.

Averaging
Dates: June 23, 2017, June 26, 2017 and June 27, 2017.

Valuation
Dates: The valuation dates will occur on three trading days occurring shortly before the maturity date. The scheduled valuation dates are: December 28, 2018, December 31, 2018 and January 2, 2019.

Maturity
Date: January 7, 2019

Dividend
Amount: An amount in U.S. dollars equal to 100% of the gross cash distributions (including ordinary and extraordinary dividends) per Reference Share declared by the applicable Reference Share Issuer where the date that the applicable Reference Share has commenced trading ex-dividend on its primary U.S. securities exchange as to each relevant distribution occurs from the second averaging date to the final valuation date, determined as described in more detail below.

PS-3

Calculation Agent: BMO Capital Markets Corp. (“BMOCM”)

CUSIP: 06367TXM7

Distribution: The notes are not intended for purchase by any investor that is not a United States person, as that term is defined for U.S. federal income tax purposes, and no dealer may make offers of the notes to any such investor.

Each valuation date for any Reference Share, as well as the maturity date, are subject to postponement in the event of a Market Disruption Event with respect to an applicable Reference Share, as described in the section “Description of the Notes – Market Disruption Events” in this pricing supplement.

PS-4

HYPOTHETICAL PAYMENTS ON THE NOTES AT MATURITY

The following hypothetical examples are provided for illustration purposes only and are hypothetical; they do not purport to be representative of every possible scenario concerning increases or decreases in the value of the Basket and the related effect on the Redemption Amount. The following hypothetical examples illustrate the payment you would receive on the maturity date if you purchased \$1,000 in principal amount of the notes. Numbers appearing in the examples below have been rounded for ease of analysis. The examples below assume a Participation Rate of 97.35%.

Basket Level Redemption Amount per \$1,000 in Percentage	Principal Amount	Percentage Gain (or Loss) per \$1,000 in Principal Amount
140.00%	\$1,362.90	36.29%
130.00%	\$1,265.55	26.56%
120.00%	\$1,168.20	16.82%
110.00%	\$1,070.85	7.08%
102.72% ⁽¹⁾	\$1,000.00	0.00%
100.00% ⁽²⁾	\$973.50	-2.65%
90.00%	\$876.15	-12.39%
80.00%	\$778.80	-22.12%
70.00%	\$681.45	-31.86%
60.00%	\$584.10	-41.59%

⁽¹⁾ For you to receive a Redemption Amount greater than the principal amount the notes, the Basket Level Percentage must be greater than approximately 102.72% due to the effect of the Participation Rate being only 97.35%.

⁽²⁾ If the Basket Level Percentage is not at least approximately 102.72%, you will lose some or all of the principal amount of the notes.

Please see the sections below, “Additional Risk Factors—General Risks Relating to the Notes—Your investment may result in a loss” and “—The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes.”

ADDITIONAL TERMS OF THE NOTES

You should read this pricing supplement together with the prospectus supplement dated April 27, 2017 and the prospectus dated April 27, 2017. This pricing supplement, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours or the agent. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” in this pricing supplement, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Prospectus supplement dated April 27, 2017:

<http://www.sec.gov/Archives/edgar/data/927971/000119312517142764/d381374d424b5.htm>

Prospectus dated April 27, 2017:

<http://www.sec.gov/Archives/edgar/data/927971/000119312517142728/d254784d424b2.htm>

Our Central Index Key, or CIK, on the SEC website is 927971. As used in this pricing supplement, “we,” “us” or “our” refers to Bank of Montreal.

PS-6

ADDITIONAL RISK FACTORS

An investment in the notes involves risks. This section describes significant risks relating to the terms of the notes. The notes are a riskier investment than ordinary debt securities. In addition, the notes are not equivalent to investing directly in the Reference Shares. Before investing in the notes, you should read the following information about these risks, together with the other information contained in or incorporated by reference in the prospectus supplement and prospectus.

General Risks Relating to the Notes

Your investment in the notes may result in a loss. The notes do not guarantee any return of principal. The amount payable on the notes at maturity will depend on the performance of the Reference Shares and the dividends declared on the Reference Shares, and may be less, and possibly significantly less, than your initial investment. If the prices of the Reference Shares decrease and the applicable Dividend Amounts are not sufficient to offset that decrease, the payment at maturity may be less than the principal amount. In addition, because the Participation Rate is only 97.35%, the Basket Level Percentage must exceed approximately 102.72% in order for you to receive a Redemption Amount that exceeds the principal amount. You may lose all or a substantial portion of the amount that you invested to purchase the notes. You may incur a loss, even if the Basket Level Percentage is positive (but less than approximately 102.72%). Please also see “—The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes.”

The notes do not pay interest and your return may be lower than the return on a conventional debt security of comparable maturity. There will be no periodic interest payments on the notes as there would be on a conventional fixed-rate or floating-rate debt security having the same maturity. The yield that you will receive on your notes, which could be negative, may be less than the yield you could earn if you purchased a standard senior debt security of Bank of Montreal with the same maturity date. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

Owning the notes is not the same as owning the Reference Shares or a security directly linked to the performance of the Reference Shares. The return on your notes will not reflect the return you would realize if you actually owned the Reference Shares or a security directly linked to the performance of the Reference Shares and held that investment for a similar period. Your notes may trade quite differently from the Reference Shares. Changes in the prices and dividend yields of the Reference Shares may not result in comparable changes in the market value of your notes. Even if the prices and dividend yields of the Reference Shares increase during the term of the notes, the market value of the notes prior to maturity may not increase to the same extent. It is also possible for the market value of the notes to decrease while the prices and dividend yields of the Reference Shares increase.

Our initial estimated value for the notes is lower than the price to public. Our initial estimated value for the notes is only an estimate, and is based on a number of factors. The price to public of the notes exceeds our initial estimated value, because, among other things, costs associated with offering, structuring and hedging the notes are included in the price to public, but are not included in the estimated value. These costs include the agent’s commission, and the profits that we and our affiliates expect to realize for assuming the risks in hedging our obligations under the notes and the estimated cost of hedging these obligations.

Our initial estimated value does not represent any future value of the notes, and may also differ from the estimated value of any other party. Our initial estimated value of the notes as of the pricing date was derived using our internal pricing models. This value is based on market conditions, interest rates, and other relevant factors. Different pricing models and assumptions could provide values for the notes that are greater than or less than our initial estimated value. In addition, market conditions and other relevant factors after the pricing date are expected to change, possibly rapidly, and our assumptions may prove to be incorrect. After the pricing date, the value of the notes could change

dramatically due to changes in market conditions, our creditworthiness, and the other factors set forth in this pricing supplement. These changes are likely to impact the price, if any, at which we or BMOCM would be willing to purchase the notes from you in any secondary market transactions. Our initial estimated value does not represent a minimum price at which we or our affiliates would be willing to buy your notes in any secondary market at any time.

The terms of the notes were not determined by reference to the credit spreads for our conventional fixed-rate debt. To determine the terms of the notes, we used an internal funding rate that represents a discount from the credit spreads for our conventional fixed-rate debt. As a result, the terms of the notes are less favorable to you than if we had used a higher funding rate.

Certain costs are likely to adversely affect the value of the notes. Absent any changes in market conditions, any secondary market prices of the notes will likely be lower than the price to public. This is because any secondary market prices will likely take into account our then-current market credit spreads, and because any secondary market prices are likely to exclude all or a portion of the agent's commission and the hedging profits and estimated hedging costs that are included in the price to public of the notes and that may be reflected on your account statements. In addition, any such price is also likely to reflect a discount to account for costs associated with establishing or unwinding any related hedge transaction, such as dealer discounts, mark-ups and other transaction costs. As a result, the price, if any, at which BMOCM or any other party may be willing to purchase the notes from you in secondary market transactions, if at all, will likely be lower than the price to public. Any sale that you make prior to the maturity date could result in a substantial loss to you.

PS-7

Any increase in the price of one or more Reference Shares may be offset by decreases in the price of one or more other Reference Shares. The price of one or more of the Reference Shares may increase while the price of one or more of the other Reference Shares decreases. Therefore, in determining the value of the Basket at any time, increases in the price of one Reference Share may be moderated, or wholly offset, by decreases in the price of one or more other Reference Shares.

The notes may not have an active trading market. Your notes will not be listed on any securities exchange, and there may be little or no secondary market for your notes. Even if a secondary market for your notes develops, it may not provide significant liquidity. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your notes in any secondary market could be substantial. If you sell your notes before maturity, you may suffer substantial losses.

The notes will not reflect the full performance of the Reference Shares, which may negatively impact your return on the notes. Because the calculation of the Redemption Amount includes a Participation Rate of less than 100%, the return, if any, on the notes will not reflect the full performance of the Reference Shares. Therefore, the yield to maturity based on the methodology for calculating the Redemption Amount will be less than the yield that would be produced if the Reference Shares were purchased and held for a similar period. The Basket Level Percentage must be at least approximately 102.72% for the Redemption Amount to exceed the principal amount.

The market value of your notes may be influenced by many unpredictable factors. The following factors, many of which are beyond our control, may influence the market value of your notes:

- the market prices of the Reference Shares;

- the dividend yields of the Reference Shares;

- economic, financial, political, military, regulatory, legal and other events that affect the securities markets generally and the U.S. markets in particular, and which may affect the values of the Reference Shares; and

- interest rates in the market.

These factors may influence the market value of your notes if you sell your notes before maturity. Our creditworthiness, as represented by our credit ratings or as otherwise perceived in the market will also affect the market value of your notes. If you sell your notes prior to maturity, you may receive less than your initial investment.

Payments on the notes are subject to our credit risk, and changes in our credit ratings may adversely affect the market value of the notes. The notes are our senior unsecured debt securities. The payment due on the maturity date is dependent upon our ability to repay our obligations at that time. This will be the case even if the values and dividend yields of the Reference Shares increase as of the valuation dates. No assurance can be given as to what our financial condition will be at any time during the term of the notes.

The Initial Share Price for each Reference Share was based on the Average Intra-day Prices for that Reference Share on each averaging date, which may adversely affect the return on the notes. The Initial Share Price of each Reference Share was based on the Average Intra-day Prices of that Reference Share on each averaging date. The Average Intra-day Price for a Reference Share on any averaging date is the arithmetic mean of the prices at which we, or one or more of our affiliates execute transactions with respect to such Reference Share on each averaging date in order to hedge our obligations under the notes.

As a result, the hedging activities relating to each Reference Share by us or any of our affiliates may have affected the calculation agent's determination of the Initial Share Price for each Reference Share; therefore, these hedging activities may adversely affect the payment at maturity, if any.

The Final Share Price of each Reference Share is based on the arithmetic average of its closing prices on each valuation date and may be less than the closing prices of such Reference Share prior to such dates or on any valuation date individually. The Final Share Price of each Reference Share will be calculated based on the closing prices of that Reference Share on each of the valuation dates specified above. The prices prior to those dates will not be used to determine the Redemption Amount. Therefore, no matter how high the prices of the relevant Reference Shares may be during the term of the notes, only the closing prices of the Reference Shares on each of the valuation dates will be used to calculate the applicable Final Share Prices and the Redemption Amount payable to you at maturity. In addition, because each Final Share Price is based on the arithmetic average of the closing prices of the relevant Reference Share on each valuation date, the Final Share Price calculated in this manner may be lower than the price of the relevant Reference Share on any single valuation date. Accordingly, the averaging feature may decrease the Final Share Price and therefore your return on the notes.

PS-8

Correlation among the Reference Shares may affect the value of your notes. The Reference Shares may not represent a diversified portfolio of securities. To the extent that the Reference Shares move in the same direction (i.e., are highly correlated), you will lose some or all of the benefits that would ordinarily attend a diversified portfolio of securities. The Reference Shares may be concentrated in a limited number of industries. An investment in the notes might increase your exposure to fluctuations in any of the sectors represented by the Basket.

We will not hold shares of any Reference Share for your benefit. The Basket is solely a hypothetical calculation of the value of the Reference Shares. The indenture and the terms governing your notes do not contain any restriction on our ability or the ability of any of our affiliates to sell, pledge or otherwise convey all or any portion of Reference Shares that we or they may acquire. Neither we nor our affiliates will pledge or otherwise hold any assets for your benefit, including any Reference Shares. Consequently, in the event of our bankruptcy, insolvency or liquidation, any of those assets that we own will be subject to the claims of our creditors generally and will not be available for your benefit specifically.

You must rely on your own evaluation of the merits of an investment linked to the Reference Shares. In the ordinary course of their business, BMOCM, Raymond James and our respective affiliates may have expressed views on expected movements in any Reference Share, and may do so in the future. These views or reports may be communicated to our clients, Raymond James' clients, and clients of our respective affiliates. However, these views are subject to change from time to time. Moreover, other professionals who transact business in markets relating to any Reference Share may at any time have significantly different views from those of our respective affiliates. For these reasons, you are encouraged to derive information concerning the Reference Shares from multiple sources, and you should not rely solely on views expressed by us or our respective affiliates.

Our trading and other transactions relating to the Reference Shares, futures, options or other derivative products may adversely affect the market value of the notes. As described below under "Use of Proceeds and Hedging," we or our affiliates may hedge our obligations under the notes by purchasing or selling the Reference Shares, futures or options relating to the Reference Shares, or other derivative instruments with returns linked or related to changes in the performance of the Reference Shares. We may adjust these hedges by, among other things, purchasing or selling those assets at any time. Although they are not expected to do so, any of these hedging activities may adversely affect the prices of the Reference Shares, and therefore, the market value of the notes, and the amount payable at maturity. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities, even though the market value of the notes decreases.

We, Raymond James, or one or more of our respective affiliates may also engage in trading relating to the Reference Shares on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for our customers, including block trades. Any of these activities could adversely affect the prices of the Reference Shares and, therefore, the market value of the notes. We, Raymond James, or one or more of our respective affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the Reference Shares. By introducing competing products into the marketplace in this manner, we or one or more of our affiliates could adversely affect the market value of the notes.

Our business activities and the business activities of our affiliates may create conflicts of interest. As noted above, we, Raymond James, or one or more of our respective affiliates expect to engage in trading activities related to the Reference Shares that are not for the account of holders of the notes or on their behalf. These trading activities may present a conflict between the holders' interests in the notes and the interests we and our affiliates will have in their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for their customers and in accounts under their management. These trading activities, if they influence the prices of the Reference Shares, could be adverse to the interests of the holders of the notes. We, Raymond James, or one or more of our respective affiliates may, at present or in the future, engage in business with the issuers of the Reference Shares,

including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These activities may present a conflict between our or one or more of our affiliates' obligations and your interests as a holder of the notes. Moreover, we, Raymond James and our respective affiliates have published, and in the future expect to publish, research reports with respect to most or even all of the Reference Shares. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the notes. Even if our affiliates or Raymond James provides research that expresses a negative opinion about one or more of the Reference Shares, or if market conditions change, the composition of the Basket will not change during the term of the notes (except under the limited circumstances described below). Any of these activities by us or one or more of our affiliates may affect the prices of the Reference Shares and, therefore, the market value of the notes.

As calculation agent, BMOCM will have the authority to make determinations that could affect the value of your notes and your payment at maturity. As calculation agent for your notes, BMOCM will have discretion in making various determinations that affect your notes, including determining the Initial Share Prices, the Final Share Prices, the Dividend Amounts, the number of Reference Shares in the Basket at any time, the Basket Level Percentage, the Redemption Amount and whether any market disruption event has occurred. The calculation agent also has discretion in making certain adjustments relating to mergers and certain other corporate transactions that a Reference Share Issuer may undertake. The exercise of this discretion by BMOCM could adversely affect the value of your notes and may present BMOCM, which is our wholly owned subsidiary, with a conflict of interest.

PS-9

The historical performance of the Reference Shares should not be taken as an indication of their future performance. The Final Share Prices of the Reference Shares will determine the Redemption Amount. The historical performance of the Reference Shares does not necessarily give an indication of their future performance. As a result, it is impossible to predict whether the prices of the Reference Shares will rise or fall during the term of the notes. The prices of the Reference Shares will be influenced by complex and interrelated political, economic, financial and other factors.

Holders of the Reference Shares are only entitled to receive those dividends as each issuer's board of directors may declare out of funds legally available. Although dividends and distributions on the Reference Shares have historically been declared by the applicable board of directors, they are not required to do so and may reduce or eliminate those dividends in the future. The Dividend Amount of one or more of the Reference Shares during the term of the notes may be zero.

Significant aspects of the tax treatment of the notes are uncertain. The tax treatment of the notes is uncertain. We do not plan to request a ruling from the Internal Revenue Service or from any Canadian authorities regarding the tax treatment of the notes, and the Internal Revenue Service or a court may not agree with the tax treatment described in this pricing supplement.

The Internal Revenue Service has issued a notice indicating that it and the Treasury Department are actively considering whether, among other issues, a holder should be required to accrue interest over the term of an instrument such as the notes even though that holder will not receive any payments with respect to the notes until maturity and whether all or part of the gain a holder may recognize upon sale or maturity of an instrument such as the notes could be treated as ordinary income. The outcome of this process is uncertain and could apply on a retroactive basis.

Please read carefully the section entitled "Supplemental Tax Considerations" in this pricing supplement, the section "United States Federal Income Taxation" in the accompanying prospectus and the section entitled "Certain Income Tax Consequences" in the accompanying prospectus supplement. You should consult your tax advisor about your own tax situation.

Insurance companies and employee benefit plans should carefully review the legal issues of an investment in the notes. Any insurance company or fiduciary of a pension plan or other employee benefit plan that is subject to the prohibited transaction rules of the Employee Retirement Income Security Act of 1974, as amended, which we call "ERISA," or the Internal Revenue Code of 1986, as amended (the "Code"), including an IRA or Keogh plan (or a governmental plan to which similar prohibitions apply), and that is considering purchasing the notes with the assets of the insurance company or the assets of such plan, should consult with its counsel regarding whether the purchase or holding of the notes could become a "prohibited transaction" under ERISA, the Code or any substantially similar prohibition in light of the representations a purchaser or holder in any of the above categories is deemed to make by purchasing and holding the notes. These issues are discussed in more detail in the section "Employee Retirement Income Security Act" below.

Risks Relating to the Reference Shares

The inclusion of the Reference Shares in the Basket does not guarantee a positive return on the notes. There can be no assurance that any Reference Share, or that the Basket in its entirety, will increase in value. The performance of the Reference Shares may be less favorable than the performance of the equities markets generally, less favorable than the performance of other companies that are not included in the Basket, and less favorable than the performance of specific sectors of the equity markets, or other securities in which you may choose to invest. As of the date of this pricing supplement, the Equity Research Department at Raymond James believes that the stock prices of the Reference Shares have the potential to increase during the term of the notes. However, there can be no assurance that they will in fact do so. Although Raymond James has expressed a positive view as to the Reference Shares prior to the date of this pricing supplement, those views may change significantly during the term of the notes. In addition, any

positive views of Raymond James' research division are separate and apart from the offering of these notes, and does not constitute investment advice. Our offer of the notes does not constitute our recommendation or the recommendation of Raymond James, or our respective affiliates to invest in the notes or in the Reference Shares.

Timing for tax reform measures, if any, is uncertain. While legislative and regulatory changes may be more likely in the 115th Congress of the United States because the legislative and executive branches are controlled by the same political party and significant reform of the Code has been described publicly as a priority, there can be no assurance that any tax reform will be adopted in the United States in the near future or even prior to the maturity of the notes. Further, no assurance can be given as to the policies, legislation or tax regulations that will be pursued by the U.S. legislative and executive branches in the future, and when they may become effective. You should not base your investment decision on any assumptions regarding the likelihood of tax changes being adopted or the timing of those changes.

PS-10

Content of tax reform measures, if any, is uncertain. While the legislative and executive branches have each set forth tax reform proposals, there are no definitive details available regarding the types of changes that may be ultimately brought about by tax reform, if any. Further, tax reform measures ultimately enacted or otherwise promulgated, if any, may vary from the legislative and executive branch tax reform proposals that are currently publicly available. For example, while the administration's proposals set forth a target corporate tax rate and the possibility of repatriating cash held outside of the U.S. on a one-time basis at a favorable rate, any actual changes that are enacted may or may not have these provisions. As a result, you should not place undue emphasis on assumptions based on such proposals regarding tax reform in making your investment decision regarding the notes.

You must rely on your own evaluation of the benefits of tax reform to the Reference Share Issuers. There can be no assurance of the content and timing of tax reform measures over the term of the notes, so the benefits of tax reform measures to the Reference Share Issuers is uncertain. Tax reform measures that are adopted, if any, may be at variance from those anticipated by Raymond James in selecting the Reference Shares. For these reasons, you are encouraged to derive information concerning current tax reform discussions and proposals and the impact any tax reform measures that might be brought about by such discussions and proposals on the Reference Share Issuers.

You will not have any shareholder rights and will have no right to receive any Reference Shares at maturity. Investing in the notes will not make you a holder of any of the Reference Shares. Neither you nor any other holder or owner of the notes will have any voting rights, any right to receive dividends or other distributions (except to the extent that the Dividend Amounts are reflected in the Redemption Amount through the addition of shares to the Basket) or any other rights with respect to any of these securities.

Changes that affect a Reference Share may affect the market value of the notes and the amount you will receive at maturity. Changes affecting a Reference Share or a Reference Share Issuer, such as reorganizations or mergers, will be reflected in the price of that Reference Share and therefore could affect the amount payable on your notes at maturity and the market value of the notes prior to maturity. If these events occur, the calculation agent may, for example, adjust the composition of the Basket. See "Description of the Notes—Anti-dilution Adjustments."

No Reference Share Issuer will have any role or responsibilities with respect to the notes. None of the issuers of the Reference Shares will have authorized or approved the notes, or will be involved in this offering. No such company will have any financial or legal obligation with respect to the notes or the amounts to be paid to you, including any obligation to take our needs or your needs into consideration for any reason, including taking any corporate actions that might affect the value of the Reference Shares or the notes. No such company will receive any of the proceeds from any offering of the notes. No Reference Share Issuer or any other company will be responsible for, or participate in, the determination or calculation of the Redemption Amount.

The notes are subject to risks associated with Basket Components that have a limited trading history. The common stocks of Bioverativ Inc. and CSRA Inc. have been publicly traded for a limited period of time. Accordingly, there is only a limited trading history available for these Basket Components, upon which you can evaluate their prior performance.

We do not control any Reference Share Issuer and we are not responsible for any disclosure made by any other company. Neither we nor any of our affiliates have the ability to control the actions of any Reference Share Issuer, nor do we assume any responsibility for the adequacy or accuracy of any publicly available information about any of these companies, unless (and only to the extent that) our securities or the securities of our affiliates are represented by that Reference Share. We are not responsible for any other issuer's public disclosure of information on itself or any Reference Share, whether contained in U.S. Securities and Exchange Commission (the "SEC") filings or otherwise. We will not perform any due diligence procedures with respect to the applicable Reference Share Issuers. You should make your own investigation into the Reference Share Issuers.

Industry consolidation and other corporate events may alter the composition of the Basket. If a Reference Share Issuer is acquired in a stock-for-stock transaction, the stock of the acquiring company will assume that Reference Share's place in the Basket, including if the stock of the acquiring company is already in the Basket. Consequently, any consolidation among issuers of the Reference Shares will result in an increased weighting in the Basket for the surviving company. The effects on the Basket and the Initial Share Prices of the Reference Shares of consolidation transactions and other reorganization events with respect to the Reference Shares are described in "Description of the Notes—Anti-dilution Adjustments."

You will have limited anti-dilution protection with respect to the Reference Shares. The calculation agent will make adjustments to the Basket for stock splits, reverse stock splits, stock dividends and other events that affect the applicable issuer's capital structure, but only in the situations we describe in "Description of the Notes—Anti-dilution Adjustments" below. The calculation agent will not be required to make an adjustment for every corporate event that may affect a Reference Share. For example, the calculation agent will not make any adjustments for events such as an offering by a Reference Share Issuer of equity securities or a tender or exchange offer for less than all outstanding shares of that issuer by a third party. Those events or other actions by the applicable issuer or a third party may nevertheless adversely affect the price of the Reference Share, and adversely affect the value of your notes.

PS-11

DESCRIPTION OF THE NOTES

This pricing supplement, and the accompanying prospectus dated April 27, 2017 relating to the notes, should be read together. Because the notes are part of a series of our senior debt securities called Senior Medium-Term Notes, Series D, this pricing supplement and the accompanying prospectus should also be read together with the accompanying prospectus supplement, dated April 27, 2017. Terms used but not defined in this pricing supplement have the meanings given to them in the accompanying prospectus or accompanying prospectus supplement, unless the context requires otherwise.

The notes will be issued in book-entry form through The Depository Trust Company. Owners of beneficial interests in the notes should read the section entitled “Description of the Notes We May Offer—Legal Ownership” in the accompanying prospectus supplement and “Description of Debt Securities We May Offer—Legal Ownership and Book-Entry Issuance” in the accompanying prospectus.

The notes are part of a series of senior debt securities entitled “Senior Medium-Term Notes, Series D” that we may issue from time to time under the senior indenture, dated January 25, 2010, between Bank of Montreal and Wells Fargo Bank, National Association, as trustee. Terms that apply generally to our medium term notes are described in “Description of the Notes We May Offer” in the accompanying prospectus supplement. The terms described in this pricing supplement, supplement those described in the accompanying prospectus and the accompanying prospectus supplement, and, if the terms described here are inconsistent with those described in those documents, the terms described in this pricing supplement are controlling.

We will not pay periodic interest payments on the notes.

Composition of the Basket

The Basket is composed of the 17 Reference Shares, which are the securities selected by Raymond James. The identity of the Reference Shares will not change over the term of the notes, except in limited circumstances relating to corporate events that may affect the Reference Shares, as described below.

Each Reference Share was assigned a weighting (each, a “Reference Share Weighting”) of 5.8824%, so that each Reference Share represented an equal portion of the value of the Basket on the first averaging date.

Payment at Maturity

The amount that you will receive at maturity for each \$1,000 in principal amount of the notes (the “Redemption Amount”) will depend upon the performance of the Basket and the dividends paid on the Reference Shares. The Redemption Amount will equal:

$(\$1,000 \times \text{the Basket Level Percentage} \times \text{the Participation Rate})$

The Basket Level Percentage will equal:

Final Basket Level

Initial Basket Level

The Basket Level Percentage will be expressed as a percentage.

The Basket shall initially be deemed to consist of a number of each Reference Share calculated as follows:

Each Reference Share shall initially constitute 1/17 of the Basket, with an aggregate value of \$58.824 (\$1,000 divided by 17).

Accordingly, initially, the number of shares of each Reference Share in the Basket was calculated by dividing \$58.824 by the Initial Share Price, rounded to four decimal places.

The number of shares of each Reference Share initially included in the Basket was determined on the final Averaging Date, and is set forth above.

Initial Share Price. For each Reference Share, the “Initial Share Price” was determined over the three averaging dates set forth above. For each Reference Share, the Initial Share Price is equal to the arithmetic mean of the Average Intra-day Prices on each averaging date.

Average Intra-Day Price. With respect to each Reference Share and any averaging date, the arithmetic mean of the prices at which we or any of our affiliates (which may include the calculation agent) acquires, establishes, reestablishes, substitutes, maintains, unwinds or disposes of, as the case may be, of any transactions or assets relating to that Reference Share as we deem necessary to hedge our obligations with respect to the notes.

Final Share Price. For each Reference Share, the arithmetic mean of the closing prices on each valuation date.

PS-12

Dividend Amount. An amount in U.S. dollars equal to 100% of the gross cash distributions (including ordinary and extraordinary dividends) per Reference Share declared by the applicable Reference Share Issuer where the date that the applicable Reference Share has commenced trading ex-dividend on its primary U.S. securities exchange as to each relevant distribution occurs from (and including) the second averaging date to (and including) the final valuation date, as determined by the calculation agent, and subject to the following limitations:

· with respect to any distribution where the date that the applicable Reference Share commenced trading ex-dividend on the second averaging date, only 1/3 of the applicable distribution shall be included;

· with respect to any distribution where the date that the applicable Reference Share commenced trading ex-dividend on the third averaging date, only 2/3 of the applicable distribution shall be included;

· with respect
