## 2005 Second Quarter Results

**Santiago, Chile, August 08, 2005 Banco de Chile (NYSE: BCH)**, a Chilean full service financial institution, market leader in a wide variety of credit and non credit products and services across all segments of the Chilean financial market, today announced results for the second quarter ended June 30, 2005.

## FINANCIAL HIGHLIGHTS

- Net income for 2Q05 reached Ch\$ 52,258 million, above the previous record of Ch\$45,687 million for 2Q04.
- The Bank again obtained a strong ROAE of 35.3% during 2Q05 which almost double the system's average of 18.1%, while its 2.20% unconsolidated ROAA also exceeded the 1.32% recorded by the system.
- The Bank's unconsolidated loan portfolio, net of interbank loans, increased by 4.0% during 2Q05, exceeding the 1.8% growth posted by the financial system.

## Second Quarter 2005 Highlights

### The Bank

- **Strong second quarter results.** Banco de Chile posted a record quarter net income during 2Q05 reaching a ROAE of 35.3%. This figure largely exceeds the system's average of 18.1% and confirms the Bank's position as the leader in the Chilean financial system in terms of profitability.
- **Market share increase.** As of June 30, 2005, the Bank's loan portfolio, net of interbank loans, totaled Ch\$7,490,823 million, reflecting an annual and quarterly growth of 12.3% and 3.9%, respectively. The Bank reached a market share of 18.1% as of June 30, 2005, an increase of approximately 40 basis points from the 17.7% posted as of March 31, 2005.
- **Banco de Chile successfully completed the offering of 2.5% of its shares in the local market.** As a conclusion of the share repurchase program, the Bank completed the offering of 2.5% of its previously bought shares, (equivalent to 1.7 billion shares) worth US\$104.7 million at a price of Ch\$34.5 per share, at the Santiago Stock Exchange on August 2, 2005. The shares were sold to more than 3,000 investors. Retail investors bought 73.5% of the package while institutional investors purchased the remaining 26.5%. The process was highly successful within the framework of a deep, transparent and competitive market. Investors confidence was reflected by the considerable demand at a price of Ch\$34.5 per share which resulted in purchase orders in excess of US\$1.9 billion. In addition, it is important to note that this offering was the first of its kind to consider a segmentation of purchase orders by amount and type of investors. The proceeds will be used as working capital to finance the Bank's expected growth in the retail and small business segments.
- **Banco de Chile's recognition and awards.** Once again, the Bank was recognized for its outstanding performance on different tenets. This time, brand leadership, commitment to social responsibility, contribution to human resources development and the strengths shown in a growing industry such as leasing, were the evaluated aspects. As a result, *Global Finance* again named Banco de Chile as the Best Bank in Chile within their annual survey of Best Emerging Market Banks. The Bank also entered the Marketing Hall of Fame as the winner of the 2005 Great Brand in the Classic Category, initiative undertaken by the New York American Marketing Association. The Alta Group, specialized in equipment leasing and finance, has placed Banco de Chile's leasing business among the five largest and most prominent equipment leasing companies in Latin America. In addition, Banchile Stock Brokerage subsidiary was distinguished by the Chilean Construction Chamber for its contribution to Human Resources Development, within a group of 1,200 companies, for its commitment to its employees.
- **Banco de Chile increased the variety of investment alternatives.** In order to continue expanding its product offering during favorable economic conditions, Banchile Administrator of Funds recently launched a real estate investment fund called Fondo de Inversión Banchile Inmobiliario I that is aimed at clients who want to invest in the real estate sector through access to a diversified portfolio of properties. In addition, the subsidiary also launched Dollar 30, a new mutual fund denominated in US dollars which complements existing medium/long-term savings options.

- **Neos Plan Achievements.** During the first half of 2005, the Bank concluded, as scheduled, the implementation of an Enterprise Resource Planning (ERP) system in its Human Resources modules, initiated the roll-out, in its branches, of the second phase of the Customer Relationship Management (CRM) system, including customer service platforms for the individual banking segment and, implemented the CRM at its call center.

In the second half of 2005 various new Neos Plan components will be implemented such as the corporate loans unit and credit limits management within the core system, a new master client base, the loans approval tracking unit and the asset selling and post-selling unit which will be implemented within the third CRM stage.

**Financial System Highlights**

- **The system's loan portfolio**, net of interbank loans, as of June 30, 2005 totaled US\$69,555 million, increasing by 12.0% on an annual basis. The twelve-month loan growth was mainly driven by commercial, consumer and residential mortgage loans. On a quarter to quarter basis a slowdown on total loans growth was observed from 4.8% in 1Q05 to 1.8% in 2Q05, mainly as a result of lower growth in commercial and foreign trade loans. Past due loans continue to decline and consequently, the past due to total loans ratio dropped to 1.10% in 2Q05 from 1.49% in 2Q04.
- **During 2Q05 net income for the financial system remained strong**, amounting to Ch\$204,715 million. This figure was similar to the net income for the previous quarter though it showed an important 26.4% increase relative to 2Q04. The increase was mainly a result of both higher operating revenues and lower provisions for loan losses, which more than offset the raise in operating expenses. As a result, the 2Q05 net income implied a system's ROAE of 18.1%, up from the 15.2% in 2Q04 or 17.2% in 1Q05.

## Banco de Chile 2005 Second-Quarter Consolidated Results

**NET INCOME**

The Bank's total net income for 2Q05 reached a record amount of Ch\$ 52,258 million, representing an increase of 14.4% compared to Ch\$45,687 million reported in 2Q04. This increase was mainly driven by the continued growth in operating revenues, mostly fueled by the expansion of business volumes, and by improved asset quality, which more than offset the expansion in operating expenses.

The Bank's profitability, as measured by annualized return on average assets (**ROAA**) and annualized return on average shareholders' equity (**ROAE**), was 2.00% and 35.3%, respectively, in 2Q05, up from comparable figures of 1.84% and 29.5% registered in 2Q04.

The Bank's subsidiaries contributed by 12.0% in both quarters with an overall result of Ch\$6,296 million in 2Q05 compared to Ch\$5,484 million in 2Q04. The 14.8% increase in the subsidiaries' net income during the current quarter was principally driven by the Stock Brokerage's outstanding results accounting for larger operating income due to higher trading volumes and higher gains from investment securities. To a lesser extent, higher income coming from Socofin, the collections subsidiary, also contributed to higher overall results in 2Q05.

**Bank, Subsidiaries and Foreign Branches' Net Income**

(in millions of Chilean pesos)	2Q04	1Q05	2Q05	% Change 2Q05 / 2Q04
--------------------------------	------	------	------	-------------------------

Bank	39,802	34,308	<b>46,789</b>	17.6%
Foreign Branches	401	433	<b>(827)</b>	-
Stock Brokerage	2,005	3,545	<b>3,404</b>	69.8%
Gral Adm. of Funds	2,185	1,786	<b>2,114</b>	(3.2)%
Insurance Brokerage	208	216	<b>94</b>	(54.8)%
Financial Advisory	450	209	<b>9</b>	(98.0)%
Factoring	507	1,200	<b>296</b>	(41.6)%
Securitization	27	(11)	<b>23</b>	(14.8)%
Promarket	16	24	<b>16</b>	0.0%
Socofin	86	(157)	<b>291</b>	238.4%
Trade Services	-	21	<b>49</b>	-
<b>Total Net Income</b>	<b>45,687</b>	<b>41,574</b>	<b>52,258</b>	<b>14.4%</b>

The Financial Advisory, the Insurance Brokerage and the Factoring subsidiaries posted weaker results during 2Q05 compared to the same period last year. The lower results of the Factoring company in 2Q05 compared to 2Q04 were mainly explained by the negative impact of an increase in the inflation rate as most of its assets, denominated in nominal Chilean pesos, were financed by interest bearing liabilities denominated in UF. On the contrary, the negative inflation rate for 1Q05 implied significant earnings during the period. The slight decrease in net income accounted by the General Administrator of Funds and by the Insurance Brokerage subsidiaries during 2Q05 relative to 2Q04, principally reflected a change in the service agreement for the usage of distribution channels between the Bank and these companies, which implied higher revenue for the Bank and higher fee expenses for the mentioned subsidiaries (without impacting at the consolidated bottom line). In addition, higher indemnities expenses recorded by the Insurance Brokerage Subsidiary during 2Q05, also explained its lower result relative to the previous quarter.

Net income for the 2Q05 increased by 25.7% compared to the previous quarter as a consequence of a 22.1% growth in operating revenues, 20.7% decrease in provisions for loan losses and 13.5% raise in recovery of loans previously charged-off, effects that absorbed the impact of higher operating expenses.

Net income for foreign branches was negative during 2Q05 mainly as a consequence of extraordinary expenses incurred by the New York branch during the quarter in connection with efforts undertaken to comply with the Consent Order agreed with the OCC.

**NET FINANCIAL INCOME**

Net financial income increased by 3.4% to Ch\$97,571 million in 2Q05 up from the Ch\$94,351 million posted in 2Q04, as a result of a 4.8% expansion in average interest earning assets which more than offset the slight decline of 5 basis points in net financial margin<sup>1</sup>.

<b>Net Financial Income</b>				
(in millions of Chilean pesos)	<b>2Q04</b>	<b>1Q05</b>	<b>2Q05</b>	<b>% Change 2Q05 / 2Q04</b>
Interest revenue	167,208	115,989	<b>190,688</b>	14.0%
Interest expense	(66,004)	(31,246)	<b>(93,682)</b>	41.9%
Foreign Exchange transactions, net	(6,853)	(5,665)	<b>565</b>	-
<b>Net Financial Income</b>	<b>94,351</b>	<b>79,078</b>	<b>97,571</b>	<b>3.4%</b>
Avg. Int. earning assets	8,848,898	8,836,619	<b>9,275,495</b>	4.8%
<b>Net Financial Margin<sup>1</sup></b>	<b>4.3%</b>	<b>3.6%</b>	<b>4.2%</b>	-

The increase in average interest earning assets was principally driven by the 11.5% annual increase in total loans boosted by strong GDP growth and improved unemployment levels. Loan demand remained strong principally in commercial, consumer, contingent and residential mortgage loans, thus offsetting the decrease in average investments.

The slight decrease in net financial margin from 4.26% in 2Q04 to 4.21% in 2Q05 was principally attributable to a negative repricing effect resulting from the successive increases in the short-term interest rates during the current quarter, as the Bank's liabilities reprice faster than its assets. During the 2Q05, the short term interest rate was raised by 50 basis points while in 2Q04 this rate was maintained stable. In addition, net financial margin was also impacted by a slight decrease in lending spreads, as a consequence of increased competition.

The negative factors affecting 2Q05 net financial margin were partially offset by a higher inflation rate, measured by the variation of the UF in 1.2% during 2Q04, compared to 1.7% in 2Q05. Thus, during the last quarter, the Bank earned higher interest income on the portion of UF denominated interest earning assets financed by nominal interest bearing liabilities and by non-interest bearing liabilities. To a lesser extent, the better funding mix reflected in the decline of the ratio of interest bearing liabilities to interest earning assets from 71.8% in 2Q04 to 71.5% in 2Q05 also moderated the aforementioned effects.

The 23.4% increase in the 2Q05 net financial income compared to the previous quarter, was mainly explained by both, a 63 basis points increase in the net financial margin as the inflation rate, measured by the variation of the UF, showed a negative figure of (0.7)% in 1Q05, compared to the positive 1.7% in 2Q05, and, by a 5.0% growth in average interest earning assets between both quarters.

## **NET INCOME FROM SERVICES**

Total net income from services exhibited a robust rise of 14.4% in 2Q05 over the same period of 2004, reaching Ch\$33,751 million, which in turn represented approximately 25% of the Bank's consolidated operating revenues. Fee revenue growth was mainly related to the diverse business lines consisting of traditional and non-traditional banking activities as a result of the expansion of our customer base, increases in transaction volumes, and the strengthening of the products usage. In terms of non-traditional banking, stock brokerage-related fee income was up 67% as traded volumes increased by 58% during the last twelve months ending June 2005. Higher income revenue also resulted from the growth of mutual fund and insurance business lines which consequently implied an increase of 24% and 77%, respectively, in fee income. In addition, the continued and sustained growth in the segment of individual banking has permitted the Bank to record higher income from services mainly coming from traditional products such as credit cards, credit lines and ATMs, as the number of valid credit cards and of retail checking accounts increased by 17,450 and 21,714, respectively, and as a consequence of the expansion of 206 ATMs between the 2Q05 and 2Q04. The corporate segment also contributed to increased fees as collection and payment services fee income rose by 21% in the

last twelve-month period. Finally, higher

---

<sup>1</sup> Net financial income divided by average interest earning assets.

---

income from forward contracts and from goods received in lieu of payment jointly with lower cobranding expenses accounted for in this item also enhanced the income from the services line.

The 8.8% increase in income from fees and other services during 2Q05 compared to the previous quarter was principally attributable to higher income from forward contracts and from the mutual fund business. To a lesser extent, lower cobranding expenses and higher fees related to collection services (Socofin), credit cards and insurance brokerage services also contributed to the mentioned increase. Fees coming from the stock brokerage subsidiary remained strong; however, the slight decline registered in 2Q05 relative to the previous quarter was mainly explained by extraordinary income generated in 1Q05 due to one specific deal.

<b>Net Income from Services, by Company</b>				
(in millions of Chilean pesos)	<b>2Q04</b>	<b>1Q05</b>	<b>2Q05</b>	<b>% Change 2Q05 / 2Q04</b>

<b>Total Net Income from Services</b>	<b>29,512</b>	<b>31,029</b>	<b>33,751</b>	<b>14.4%</b>

## NET GAINS ON SALES OF FINANCIAL INSTRUMENTS

Gains on sales of financial instruments for the second quarter of 2005 increased to Ch\$4,674 million from Ch\$1,110 million in 2Q04 and Ch\$1,309 million in 1Q05 mainly as a consequence of higher earnings obtained from investment securities maintained by the stock brokerage subsidiary and, to a lesser extent, to higher mark to market income obtained by the Bank, as long term interest rates have been decreasing since the end of 2004.

## PROVISIONS

Provisions amounted to Ch\$10,903 million in 2Q05, down from the Ch\$19,151 million in 2Q04 and from the Ch\$13,742 million registered in the prior quarter of this year. The decline in provisions mainly reflects the improved asset quality of the overall loan portfolio in a context of better economic conditions. In particular, the decrease in

provisions during the 2Q05 was mainly related to the recovery of certain bad loans mainly related to the construction, real state and retail sectors. As a consequence, the Bank's provisions to average loans declined to 0.58% in 2Q05 from 1.13% in 2Q04, or 0.76% in 1Q05.

<b>Allowances and Provisions</b>

**OTHER INCOME AND EXPENSES**

Total Other Income and Expenses increased to Ch\$8,008 million in 2Q05 from Ch\$6,418 million in 2Q04 or Ch\$6,732 million in the previous quarter, mainly as a consequence of higher recoveries of loans previously charged-off and, to a lesser extent, higher non-operating income coming from the sale of assets received in lieu of payments during 2Q05.

**OPERATING EXPENSES**

Total operating expenses reached Ch\$68,804 million during the second quarter of 2005, an increase of 20.6% compared to 2Q04, mainly as a consequence of non-recurring expenses principally related to indemnities payments and advisories recorded in the New York branch during 2Q05.

Higher indemnity expenses responded mainly to the adjustments made by our management to the Bank's organizational structure in line with the process of the incorporation of a new business model supported by the Neos project. As part of this process, the Bank is reformulating its commercial structure and transforming its full-service branches in business centers, in order to reinforce the service to small and medium size companies in this distribution channel. In addition, during 2Q05 the Bank incurred in higher expenses related to advertising and promotional campaigns, in order to increase its client base and strengthen the usage of its traditional products, as well as in higher performance variable compensations mainly related to the increased business volumes in some subsidiaries.

Concerning the efficiency ratio, it stands at 50.6% in 2Q05 compared to 45.6% in 2Q04 and 55.8% in 1Q05.

<b>Operating Expenses</b>

\* Operating expenses/Operating revenues

### LOSS FROM PRICE- LEVEL RESTATEMENT

Loss from price-level restatement amounted to Ch\$5,955 million in 2Q05 compared to Ch\$4,627 million during 2Q04, mainly as a consequence of higher inflation rate used for adjustment purposes from 1.3% in 2Q04 to 1.8% in 2Q05.

### INCOME TAXES

The Bank's income taxes totaled Ch\$6,084 million in 2Q05 compared to Ch\$4,889 million in 2Q04, representing effective income tax rates of 10.4% and 9.7%, respectively, lower than Chile's 17% statutory corporate tax rate as, by law, the Bank is allowed to deduct the dividend payments to SAOS from its taxable income base.

### LOAN PORTFOLIO

## Edgar Filing: BANK OF CHILE - Form 6-K

As of June 30, 2005, the Bank's loan portfolio, net of interbank loans, totaled Ch\$7,490,823 million, a 12.3% twelve-month growth and a 3.9% quarterly expansion (15.6% in annual terms). These figures reflect the Bank's efforts to strengthen its loan market position, which has resulted in a market share increase to 18.1% in 2Q05 from 17.7% in 1Q05, exceeding the 2Q04 level of 18.0% .

Key drivers of loan portfolio expansion, in terms of volume, continued to be related to commercial loans, residential mortgage loans financed by the Bank's general borrowings, consumer and contingent loans. However, the evolution of factoring and lease contracts have been also outstanding, growing by 74.7% and 25.6%, respectively, during the last twelve-months. Regarding foreign trade loans, they have also shown a significant

---

recovery during the last two quarters, despite the appreciation of the Chilean peso against the US dollar which impacted adversely the growth of loans denominated in foreign currency.

In terms of segments, the annual loan growth has been boosted mainly by the individual banking (15.8%) and large corporations (13.3%), influenced by the strong economic growth which has positively impacted the loan demand.

Although the financial system remains highly competitive, the Bank is working on improving service quality and further penetrating its customer base through the launching of new products fastening deeper relationships. Accordingly, during 2Q05 the Bank launched the new CrediChile credit card oriented to the low income individual segment and launched new promotions of product kits, which foster the cross-selling of the Bank's and subsidiaries-related products.

<sup>1</sup> Mortgage loans financed by mortgage bonds.

<sup>2</sup> Includes mortgage loans financed by the Bank's general borrowings and factoring contracts.

## 2005 Second Quarter Results

<b>Past Due Loans</b>					
(in millions of Chilean pesos)	<b>Jun-04</b>	<b>Mar-05</b>	<b>Jun-05</b>	<b>% Change 12 - months</b>	<b>% Change 2Q05 / 1Q05</b>
Commercial loans	81,020	71,201	<b>65,937</b>	(18.6)%	(7.4)%
Consumer loans	3,600	3,520	<b>3,144</b>	(12.7)%	(10.7)%
Residential mortgage loans	14,125	14,146	<b>12,928</b>	(8.5)%	(8.6)%
<b>Total Past Due Loans</b>	<b>98,745</b>	<b>88,867</b>	<b>82,009</b>	<b>(16.9)%</b>	<b>(7.7)%</b>

Past due loans fell by 16.9% and 7.7% in annual and quarterly terms, respectively, amounting to Ch\$82,009 million as of June 30, 2005. The improved economic environment coupled with management effort devoted to maintain a healthy loan portfolio has allowed a positive evolution of the past due to loans ratio, which dropped to 1.09% in 2Q05 from 1.47% in 2Q04 and 1.23% in 1Q05. Even though past due loans continued to reflect the Bank's conservative charge-off policy, its lower level also reflects the Bank's enhanced collection procedures. In particular, the quarterly decrease in past due loans was mainly explained by the payment of a retail corporate loan denominated in foreign currency and the charge-off of a corporate loan related to the forestry sector. In terms of the coverage ratio, it stands at 170% compared to 167% in 2Q04 and 171% in the previous quarter. It is worth mentioning that both past due and coverage ratios reached by the Bank as of June 2005, in unconsolidated terms, were close to the average system's figures of 1.1% and 165.2%, respectively.

## FUNDING

Total liabilities increased by 3.4% during 2Q05 as a consequence of a 5.1% expansion in non interest bearing liabilities and a 2.5% increase in interest bearing liabilities.

The increase in interest bearing liabilities during 2Q05 relative to the previous quarter was mainly driven by a bond placement of UF5,000,000, as part of an issuance of a 5 year term bond denominated in UF with an annual interest rate of 2.93%, and by a significant increase in borrowings from domestic financial institution, which in turn more than offset the decrease in repurchase agreements. In addition, interest bearing liabilities were also fueled by the growth of time deposits denominated in local currency, partly as a result of the rise in short term interest rates, and of foreign borrowings as a consequence of the syndicated credit agreement signed by the Bank in April 2005 for an amount of US\$200 million, in order to finance its foreign trade loans booked in Chile and expand the New York Branch working capital.

On the other hand, mortgage finance bonds decreased by 8.1%, in line with the 6.9% contraction in mortgage loans financed by these liabilities.

Non interest bearing liabilities increased during 2Q05 principally due to the expansion of contingent liabilities (accounted as other liabilities), which responded to the increase in contingent loans and, to a lesser extent, the 7.0% growth in bankers drafts. As current accounts balances are concerned, even though they decreased by 3.7% during the quarter, in terms of average balances, they increased by 1.6% .

## INVESTMENT PORTFOLIO

As of June 2005, the Bank's investment portfolio totaled Ch\$1,418,602 million, a decrease of 16.9% compared to March 2005 mainly explained by short-term Central Bank securities maintained in order to comply with technical reserve requirements<sup>2</sup>. In terms of composition, in a context of expected increase in interest rates, the Bank continued reducing the duration of its investment portfolio.

At June 30, 2005, the investment portfolio was principally comprised of:

<sup>2</sup> Technical reserve applies to demand deposits, checking accounts, or obligations payable on sight, other deposits unconditionally payable immediately or within a term of less than 30 days and time deposits payable within 10 days prior to maturity, to the extent their aggregate amount exceeds 2.5 times the amount of a bank's capital and reserves.

## SHAREHOLDERS' EQUITY

As of June 30, 2005, the Bank's Shareholder Equity totaled Ch\$619,600 million (US\$1,070 million), a 0.7% increase compared to 2Q04 mainly due to a 10.0% increase in net income during the last twelve-months. This increase was partially offset by a drop in the adjustment for conversion differences as a consequence of the 9.1% annual decline in the exchange rate.

At the end of June 2005, on a consolidated basis, Total Capital to Risk-Adjusted Assets (BIS ratio) was 11.3%, and Basic Capital to Total Assets was 5.0%, both well above the minimum requirements of 10% and 3%, respectively, applicable to Banco de Chile.

<b>Shareholders' Equity</b>

### Other Data

Inflation Rate	1.33%	0.22%	1.59%	1.58%	2.43%	1.81%
Exchange rate (Ch\$)	636.59	586.45	578.92	636.59	559.83	578.92
Employees	9,187	9,377	9,542	9,187	9,365	9,542

### Notes

(1) These figures were expressed in constant Chilean pesos as of June 30, 2005.

(2) These figures were calculated considering the nominal net income, the shares outstanding and the exchange rates existing at the end of each period.

(3) The ratios were calculated as an average of daily balances.

(4) Annualized data.

**FORWARD-LOOKING INFORMATION**

The information contained herein incorporates by reference statements which constitute forward-looking statements, in that they include statements regarding the intent, belief or current expectations of our directors and officers with respect to our future operating performance. Such statements include any forecasts, projections and descriptions of anticipated cost savings or other synergies. You should be aware that any such forward-looking statements are not guarantees of future performance and may involve risks and uncertainties, and that actual results may differ from those set forth in the forward-looking statements as a result of various factors (including, without limitations, the actions of competitors, future global economic conditions, market conditions, foreign exchange rates, and operating and financial risks related to managing growth and integrating acquired businesses), many of which are beyond our control. The occurrence of any such factors not currently expected by us would significantly alter the results set forth in these statements.

Factors that could cause actual results to differ materially and adversely include, but are not limited to:

- changes in general economic, business or political or other conditions in Chile or changes in general economic or business conditions in Latin America;
- changes in capital markets in general that may affect policies or attitudes toward lending to Chile or Chilean companies;
- unexpected developments in certain existing litigation;
- increased costs;
- unanticipated increases in financing and other costs or the inability to obtain additional debt or equity financing on attractive terms; and

You should not place undue reliance on such statements, which speak only as of the date that they were made. Our independent public accountants have not examined or compiled the forward-looking statements and, accordingly, do not provide any assurance with respect to such statements. These cautionary statements should be considered in connection with any written or oral forward-looking statements that we may issue in the future. We do not undertake any obligation to release publicly any revisions to such forward-looking statements after completion of this offering to reflect later events or circumstances or to reflect the occurrence of unanticipated events.
