AMÉRICA MÓVIL'S FIRST QUARTER OF 2013

FINANCIAL AND OPERATING REPORT

Mexico City, April 18, 2013 - América Móvil, S.A.B. de C.V. (“América Móvil”) [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today its financial and operating results for the first quarter of 2013.

- América Móvil finished March with 328.2 million accesses, 7.4% more than in the first quarter of last year. This figure comprises 262.9 million wireless subscribers, 30.3 million landlines, 17.8 million broadband accesses and 17.2 million PayTV clients. Our wireless subscriber base rose 6.9% year-on-year and fixed RGUs were up 9.5%.
- On the wireless front, Brazil added 1.1 million clients and Mexico 854 thousand. Tracfone in the US gained 839 thousand, twice as many as last year's. Colombia reported disconnections of 2.7 million as a result of changes in our reporting policy. In Central America, we obtained 429 thousand new clients and Chile, Ecuador and Peru added more than 200 thousand each.
- We added 1.1 million RGUs in the first quarter, including 753 thousand PayTV subscriptions and 568 thousand broadband accesses. Outside Mexico, 56% of our fixed net additions were triple-play bundles.
- Our first quarter revenues totaled 193.0 billion pesos. They were slightly higher than those of the prior year in Mexican peso terms, and 6.1% greater at constant exchange rates, with service revenues growing 4.6% led by mobile data and by PayTV, whose revenues expanded 25.6% and 20.6% respectively
- EBITDA totaled 63.8 billion pesos and was down 6.8% in peso terms while our operating profit came in at 38.7 billion pesos and declined 10.1% in peso terms from the year before. At constant exchange rates, EBITDA improved from the prior quarter declining 1.4% year-on-year, less than the 3.7% rate of the preceding quarter.
- Our net profit for the quarter totaled 26.9 billion pesos, up nearly 80% from the precedent one although down from the year-earlier quarter, partly on account of the lower operating profits and also due to the even larger foreign exchange gains that we had then. Our net profit was equivalent to 36 peso cents per share and 56 dollar cents per ADR.
After capital outlays of 36.5 billion pesos including capital expenditures of 20.4 billion pesos and share buy-backs of 16.0 billion pesos in the quarter, net debt was down 8.2 billion pesos from December 2012 to 364.0 billion pesos at the end of March partly as a result of the stronger peso. Net debt was equivalent to 1.42 times EBITDA (LTM).

Relevant Events

In February, we announced our intention to support KPN's recapitalization program by virtue of which the company will raise equity in the amount of 3 billion euros via a rights issue and will place hybrid bonds in the amount of 2 billion euros. These transactions will result in the equivalent of 4 billion euros in new equity credit from the perspective of the credit rating agencies. We will subscribe our pro rata share of the new shares to be issued.

We entered into a relationship agreement with KPN under which, among other things, AMX will be permitted to evaluate and monitor the use of the proceeds arising from the capital raise. Under the agreement AMX and KPN will be sharing their expertise on operational and financial matters, with AMX nominating two directors to KPN's Supervisory Board.

On February 25th we issued the second tranche of our Global Peso Program, placing bonds in the amount of 7.5 billion Mexican pesos. The notes mature in 2022 and carry a coupon of 6.45%. The yield to investors of this second issue was 5.76%. The outstanding amount of 2022 Global peso bonds rose to 22.5 billion pesos, making it one of the most liquid non-governmental securities in local currency markets.

On March 21st, we announced that the International Olympic Committee awarded us the right to broadcast the XXII Olympic Winter Games in Sochi, Russia in 2014 and the Games of the XXXI Olympiad in Rio de Janeiro, Brazil in 2016. AMX has acquired exclusive broadcasting rights on all media platforms across Latin America except for Brazil.

Total Accesses

We ended March with 328.2 million access lines, 7.4% more than a year before. This figure includes 262.9 million wireless subscribers, 30.3 million landlines, 17.8 million broadband accesses and 17.2 million PayTV units. Our wireless subscriber base increased 6.9% year-on-year while fixed-RGUs were up 9.5%, with fixed-line accesses in South America climbing 18.3% year-on-year.

Wireless Subscribers

We added 1.4 million wireless subscribers in the first quarter after disconnections of 2.7 million in Colombia as a result of changes in our reporting policy. Brazil added 1.1 million clients and Mexico 854 thousand. Net subscriber gains in the US—839 thousand—more than doubled those of last year. In Central America, we obtained 429 thousand new clients and Chile, Ecuador and Peru added more than 200 thousand each.

Postpaid net additions for the period were 1.1 million, 12.7% more than in the year-earlier quarter. Brazil gained 347 thousand postpaid clients, exceeding by 78.3% those obtained in 2012. Mexico registered 223 thousand new postpaid clients which accounts for more than a fourth of its total net adds. All our operations in Central and South America registered greater net adds than those of the same quarter of the prior year, except for Colombia and Chile.

Wireless Subscribers as of March 2013

3

Fixed Revenue Generating Units

We added 1.1 million RGUs in the first quarter, including 753 thousand PayTV subscriptions and 568 thousand broadband accesses. Outside Mexico, we connected 304 thousand fixed-voice lines. Nonetheless, single-line accesses are being displaced by triple-play bundles, with the former coming down by the equivalent of 43% of the net adds of RGUs and the latter accounting for 76% of those net adds. Excluding Mexico where we can not yet offer PayTV services, triple-play bundles represented 56% of net adds, double-play packages 30% and single-play 13%.

In Brazil—our largest fixed-line operation—we ended March with 29.7 million RGUs, 18.7% more than a year before. PayTV and broadband were the main drivers of growth reflecting increases of 24.1% and 22.7%, respectively. Mexico had 22.3 million RGUs, Central America and the Caribbean had 6.2 million and Colombia 4.3 million. In relative terms, Ecuador and the Argentinean Block are showing the fastest growth rates of around 35%, followed by Peru with 20.8%.

América Móvil Consolidated Results

The global economy continued to face strong headwinds in the first quarter of the year, with expected economic growth for 2013 worsening even further in Europe and China. In Latin America, several countries saw their economies weaken more in the face of softer commodity prices.

In spite of the above, access growth remained relatively strong. In relative terms, and before considering subscriber disconnections in Colombia arising from a change in our commercial policy, net new access lines exceeded by 8.3% those obtained in the first quarter of 2012.

Our first quarter revenues totaled 193.0 billion pesos. They were slightly higher than those of the prior year in Mexican peso terms. As has been the case in prior quarters, the peso continued to gain ground vis-a-vis the U.S. dollar and other Latam currencies, with the result that when translated into pesos, the rate of growth of the revenues of our international operations falls below their rate of growth in local currency terms.

On average, the peso appreciated 2.8% vs. the dollar, 16.2% vs. the real, 18.8% vs. the Argentinean peso and 2.3% vs. the Colombian peso compared to the year-earlier quarter.

Correcting for this, our revenues increased by 6.1% year-on-year (at constant exchange rates), with service revenues growing 4.6% led by mobile data and by PayTV, whose revenues expanded 25.6% and 19.8% respectively. Fixed-data revenues accelerated to 6.6% after a one-off decline in Mexico in the prior quarter, while fixed-line voice recovered somewhat declining at a lower pace, -5.9%, than it had the prior quarter, -7.2%. The growth of the fixed-line platform was led by the offerings of triple-play packages: 56% of net RGU adds—excluding Mexico, where we cannot yet provide PayTV services—were sold under such bundles.

From a regional perspective, service-revenue growth remained flat in Mexico relative to the first quarter of the previous year, -1.6%, decelerated in South America—together with the local economies—to 5.0% and accelerated in the U.S. where it rose to 32.3%.

As regards EBITDA, it totaled 63.8 billion pesos and was down 6.8% in peso terms while our operating profit came in at 38.7 billion pesos and was down 10.1% in peso terms from the year before. At constant exchange rates, EBITDA improved from the prior quarter declining 1.4% year-on-year, less than the 3.7% rate of the preceding quarter.

We posted a 1.4 billion peso comprehensive financial income, with foreign exchange gains of 17.4 billion pesos more than offsetting our net interest payments and other financial expenses. The foreign exchange gains arose mostly from the appreciation of the peso vs. the dollar, and of the dollar vs. the euro.

Total Assets	948,969	984,604	-3.6%	Total Liabilities and Equity	948,969	984,604	-3.6%		

** Includes current portion of Long Term Debt

Our net profit for the quarter totaled 26.9 billion pesos, up nearly 80% from the precedent one although down from the year-earlier quarter, partly on account of the lower operating profits and partly on account of the even larger foreign exchange gains that we had then. Our net profit represented 36 peso cents per share and 56 dollar cents per ADR.

Net debt totaled 364.0 billion pesos at the end of March, it was equivalent to 1.42 times EBITDA (LTM)—and gross debt to 1.57 times EBITDA—. It was down 8.2 billion pesos even after capital expenditures of 20.4 billion pesos and share buy-backs of 16.0 billion pesos in the quarter.

The major investments we are undertaking to deploy fast networks—4G, fiber-optics, etc.—will provide us with an unparalleled capacity to provide data services throughout the region in the coming years. We will be well positioned to take advantage of what we expect will be a rapid uptake of smartphones and tablets by both postpaid clients and the mass market as prices of the devices continue to decline.

Mexico

We ended March with 71.2 million subscribers, 6.7% more than a year before, with our postpaid base expanding twice as fast. Fixed-line accesses declined 1.6% as the expansion of broadband acceses, 6.4%, did not fully compensate for the 6.0% reduction in fixed telephony lines. We continue to show a positive balance from MNP.

Our subscriber market share of the postpaid wireless market stood at 54% at the end of 2012; we estimate that our market share of revenues was smaller. In the prepaid segment, our subscriber market share stood at 72.8%. This figure reflects the fact that Telcel is the only operator serving around 85,000 communities in Mexico, out of a total of approximately 185,000. The presence of Telcel in those communities does not arise from any mandatory obligations contained in its concession title. Rather, it was determined by the business model adopted by Telcel that sought to distinguish itself from its competitors by having the best coverage. Telcel's competitors did not face—and do not do so now—any limitations, regulatory or otherwise, to their investing in those regions. Telcel's coverage was all built in the nearly twenty years that have elapsed since it was privatized and was not part of the legacy business of Telmex.

In the case of Telmex, its market share of fixed lines stood at 75.3% at the end of 2011. It was lower than the 77.4% average of the 33 countries tracked by Merrill Lynch, all of them middle and high-income countries except for India and China (see Merrill Lynch's *Global Wireline Matrix*, August 10, 2012). In fact, in only 12 out of the 33 countries mentioned above was the incumbent's market share lower than in Mexico.

Telmex has a presence in 23,462 communities. Providing the service in approximately 22 thousand of them is uneconomical and as such those communities, where there are 1.3 million landlines, have not attracted any competitors. Serving the remaining 1,461 communities is profitable por Telmex. Nonetheless, in 807 of them—where there are 3.9 million landlines—Telmex has no competitors because other operators have chosen not to be there, even if they can be profitable. So it is that Telmex only faces competition in 654 communities, the ones with higher density that happen to be the more profitable ones to serve. They have 9.0 million landlines. Competition is intense in those areas particularly in the A segment, where Telmex' market share is slightly less than 50%. As Telmex moves down the income ladder to serve lower income clients there tends to be less competition, leading to a higher market share in the lower-income segments.

Our Mexican revenues were flat year-on-year at 66.3 billion pesos, with mobile revenues rising 2.5% to 42.3 billion pesos and fixed-line revenues falling 1.6%, their smallest decline in several quarters, to 25.9 billion pesos. The transfer of Telmex to its clients, beginning in 2012, of the full benefit of the reduction in mobile termination rates showed up in all the annual comparisons that took place throughout 2012. It has been almost fully absorbed and is not expected to continue to have as much of an impact on the annual comparisons.

On the mobile side, voice revenues continued their decline but seemed to be firming up towards the end of the quarter. Part of the reduction in voice revenues was associated with the Easter vacations having taken place in the quarter. MOUs rose 10.2% to 275 minutes per month while prices per minute of voice came down 21.0% to 36 peso cents, or slightly less than 3 dollar cents, ranking the lowest, along the U.S., of the OECD countries as published in the Merrill Lynch's *Global Wireless Matrix* using the exact same methodology.

EBITDA came in at 30.3 billion pesos and was down 2.7% from the year-earlier quarter as the EBITDA margin fell to 45.8%, a reduction of 1.3 percentage points from the year before.

** The annual comparison is affected by the change in churn policy effective as of December 2011.

We have expanded our 4G-LTE footprint to 10 cities at the end of March.

Argentina, Paraguay and Uruguay

At the end of March, our operations in Argentina, Paraguay and Uruguay had 21.4 million wireless subscribers, 1.8% more than a year before, with our postpaid subscriber base rising 6.1% in the period. We added 134 thousand clients in the quarter, of which more than half were postpaid. Net additions of contract clients were nearly three times greater

than those obtained in the same quarter of 2012. We also had 452 thousand RGUs, 34.8% more than a year before.

First quarter revenues, nearly four billion Argentinean pesos, were up 14.3% year-on-year. Wireless service revenue growth was 11.6% driven by data revenues that rose 34.9% over the prior year. Greater adoption of smartphones and attractive commercial plans helped accelerate the pace of growth of data revenues, which has been instrumental in bringing about a 9.4% increase in ARPU. Fixed-line revenues were up 26.3% over the year, supported mainly by broadband growth and corporate data services that expanded 30.5% year-on-year, but also by the growth of PayTV revenues in Paraguay.

EBITDA of 1.3 billion Argentinean pesos rose 3.2% year-on-year and was equivalent to 33.6% of revenues. The strong growth of postpaid clients had a bearing on the EBITDA margin.

We continue to show a positive balance from Mobile Number Portability in Argentina.

Brazil

Our Brazilian operations ended the quarter with 29.7 million fixed-line access and 66.3 million wireless subscribers. They were up 18.7% and 7.7% respectively, with PayTV clients growing 24.1% and fixed-broadband accesses 22.7%. Triple-play packages drove the expansion of the fixed-line platform, explaining 58% of the net RGU additions in the quarter. On the mobile platform postpaid net adds rose 78% from the year before to 347 thousand subs.

Edgar Filing: AMERICA MOVIL SAB DE CV/ - Form 6-K

First quarter revenues were up 3.0% year-on-year to 7.9 billion reais, with fixed line revenues of 5.1 billion reais growing 6.4% and mobile revenues of 3.1 billion reais declining 3.3%. Fixed-line revenues, which account for 64% of our Brazilian revenues, now exceed by 24% those of Mexico.

PayTV revenues rose 21.4% followed by mobile data revenues with 13.9% and fixed data revenues that accelerated to 7.2%. Voice revenues were off in both the mobile and fixed-line platforms. The average price per minute of voice plummeted 27.3% vs. the year-earlier quarter, to 9 real cents.

EBITDA was down 3.1% from the prior year to 1.9 billion reais, as the margin declined to 24.6%. Approximately half of the margin decline was explained by subscriber acquisition costs, partly on account of faster postpaid growth.

We have expanded our 4G-LTE coverage to 18 cities at the end of March.

Colombia

We are reporting disconnections of 2.7 million wireless subscribers in the quarter as we changed our policy to keep as active subs only those clients that are effectively consuming. At the end of March, and after phasing in the new policy, we had 27.7 million clients. On the fixed-line platform we had 4.3 million RGUs, 16.0% more than a year before. Our market share of the fixed voice segment stood at 14.1% whereas that of the fixed-broadband market reached 28.8%. Both market shares have increased more than three percentage points in the last twelve months on the back of our strong investments in the sector.

Total revenues for the quarter were 2.6 trillion Colombian pesos, 7.0% higher than in the precedent year. Wireless service revenues increased 3.9% over the year to 1.8 trillion Colombian pesos buoyed by data that rose 34.2%. Voice revenues declined 3.9% as a result of the 50% reduction in the mobile termination rate that Claro charges other operators that became effective on January 30th. In spite of the latter, ARPU was up 3.7% as compared to the same period of 2012. Fixed line revenues expanded 16.2%, they represent almost 20% of the total.

Our EBITDA, 1.1 trillion Colombian pesos, was down 3.7% on account of increased subscriber acquisition costs linked to the growth of our postpaid base, specially smartphones in data plans.

More than 68 thousand subscribers have ported their lines to Claro in the first quarter. We are favored by consumers as i) we have the best coverage in Colombia, with presence in 99% of the municipalities in the country; ii) we have consistently been the early adopter of new technologies, allowing our clients to navigate with the highest data-transmission speeds; iii) we offer competitive prices which on average have fallen by more than 40% in the last five years and are today amongst the lowest in Latin America.

Chile

We added 200 thousand new subscribers in the quarter, finishing March with 6.4 million wireless subscribers. Net additions were 67.4% greater than those obtained in the first quarter of 2012. RGUs totaled 1.1 million; they were up 7.6% year-on-year, with broadband being the main driver.

Total revenues of 184.9 billion Chilean pesos were up 11.5% year-on-year. Wireless data revenues soared 45.6% helping bring about a 6.9% increase in mobile service revenues. Voice revenues declined slightly as traffic was unable to compensate for the 14.6% reduction in the average price per minute. Fixed line revenues increased 2.4% over the year and accounted for 28% of the total.

EBITDA came down to 6.8 billion Chilean pesos. The margin came in at 3.7% contracting by 4 percentage points in the year. The reduction was linked to an increase in overall subscriber acquisition costs and to a lesser extent, to an increase of interconnection costs.

In the first quarter, we gained 28.6 thousand clients from Mobile Number Portability.

Ecuador

Our wireless subscriber base topped 12 million, up 7.7% compared with the prior year. Our postpaid subscriber base grew at a much faster pace: 22.5%. Net additions for the quarter were 249 thousand, 172.7% more than a year before; 34.0% of those were contracts. Our fixed-RGUs reached 261 thousand by the end of March, up 37.9% year-on-year.

Total revenues for the quarter, 412 million dollars, were 7.9% higher than the precedent year. Wireless service revenues increased 6.1% in an annual fashion driven by data that grew 37.3%. The growth rate of data services continues to accelerate, thus revenues derived from value added services now represent 35.8% of wireless service revenues. Wireline revenues increased 31.7% over the year to 13 million dollars.

We generated EBITDA of 194 million dollars in the quarter, 6.1% more than in 2012. The margin for the period stood at 47.2%; slightly lower than in the prior year, in spite of the accelerated growth pace, specially of our postpaid segment which is increasingly moving towards smartphones and tablets with data plans.

We remain the preferred operator in the Ecuadorian market reflected in the results of Mobile Number Portability.

Peru

We added 256 thousand new clients in the quarter; postpaid net additions accounted for 76.1% of the total and they were 38.5% higher than the same period of 2012. We ended March with 13.1 million wireless subscribers, 13.1% above last year's, while our postpaid subscriber base rose 41.8%. We also had 894 thousand RGUs, 20.8% more than a year before.

We obtained revenues of 1.1 billion soles; a year-over-year increase of 12.7%. Wireless service revenues expanded 13.3% on the back of data growth which was 30.6%. Additionally, around 95% of our postpaid gross additions are acquiring plans that include data. Fixed line revenues grew 17.6% annually to 138 million soles.

First quarter EBITDA was 480 million soles, 14.1% above 2012 with an EBITDA margin of 42.1%. Albeit the accelerated growth pace of our postpaid base, we managed to increase the margin by 500 basis points.

We have gained from Mobile Number Portability nearly 18 thousand new subscribers in the first three months of 2013.

Central America and the Caribbean

Our combined operations in Central America and the Caribbean ended the quarter with 21.6 million wireless subscribers, 13.3% more than in the prior year. Our postpaid base rose 18.3% and net additions of the contract segment were 5.3% higher than a year before at 90 thousand. As regards, our fixed-line division, added 148 thousand RGUs to finish the quarter with 6.2 million, 6.1% more than in 2012. Broadband is the fastest growing division increasing 11.9% on an annual basis.

Total revenues were virtually identical to those of the same period of the precedent year. Wireless service revenues were 3.7% higher than a year before; data revenues were up 26.6%, offsetting the decline of voice revenues caused by a reduction of the average price per minute of voice of 12.8%. On the other hand, fixed-line revenues were down 3.5% relative to last year, as the increase in pay TV and broadband revenues were not enough to offset the decline in fixed voice revenues.

The quarter's EBITDA increased 15.6% year-on-year to 327 million dollars. The margin for the period was 34.3%; it climbed 4.6 percentage points in twelve months.

United States

After adding 839 thousand new clients in the first quarter—127.1% more than in the prior year—we finished March with 23.2 million clients, up 15.4% year on year.

Revenue growth remained strong at 39.8% year-on-year, resulting in first quarter revenues totaling 1.5 billion. Our bucket plans StraightTalk and Telcel America continued to gain share of Tracfone's commercial plans and helped drive

a 15.8% increase in ARPUs, with MOUs soaring to 526 minutes per month.

First quarter EBITDA was 68 million dollars, equivalent to 4.5% of revenues. The decline in the EBITDA margin was mostly related to the fast pace of subscriber growth and its impact on subscriber acquisition costs.

Glossary of Terms

ARPU – Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.

ARPM- Average Revenue per Minute. The ratio of service revenues to airtime traffic.

Capex – Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.

Churn – Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.

EBIT – Earnings Before Interest and Taxes, also known as Operating Profit.

EBIT margin – The ratio of EBIT to total operating revenue.

EBITDA – Earnings Before Interest, Taxes, Depreciation, and Amortization.

EBITDA margin – The ratio of EBITDA to total operating revenue.

EDGE – Enhanced Data rates for GSM Evolution. A technology that gives GSM the capacity to handle data services for the third generation mobile telephony.

EPS (Mexican pesos) – Earnings per share. Total earnings in Mexican pesos divided by total shares.

Earnings per ADR (US\$) – Total earnings in U.S. dollars divided by total ADRs equivalent.

Equity subscribers – Subscribers weighted by the economic interest held in each company.

GSM – Global System for Mobile communications. It is the world's leading and fastest growing mobile standard.

GPRS – General Packet Radio Service. Enables GSM networks to offer higher capacity, Internet-based-content and packet-based data services. It is a second generation technology.

Gross additions – Total number of subscribers acquired during the period.

Licensed pops – Licensed population. Population covered by the licenses that each of the companies manage.

Market share – A company's subscriber base divided by the total number of subscribers in that country.

MOU – Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

Net subscriber additions – The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.

Net debt – Total short and long term debt minus cash and marketable securities.

Net debt / EBITDA – The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.

Prepaid – Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.

Postpaid – Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.

Push-to-talk – Enables compatible mobile phones to function like two-way radios.

SMS – Short Message Service.

SAC – Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.

Wireless penetration – The ratio of total wireless subscribers in any given country divided by the total population in that country.
