Form 6-K
May 18, 2015

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 6-K

Report of Foreign Private Issuer
Pursuant to Rule 13a-16 or 15d-16 of the
Securities Exchange Act of 1934

For the month of May, 2015

Commission File Number 1-15106

PETRÓLEO BRASILEIRO S.A. - PETROBRAS

(Exact name of registrant as specified in its charter)

Brazilian Petroleum Corporation - PETROBRAS

(Translation of Registrant's name into English)

**Avenida República do Chile, 65
20031-912 - Rio de Janeiro, RJ
Federative Republic of Brazil**
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

FIRST QUARTER OF 2015

RESULTS

Rio de Janeiro – May 15, 2015 - (A free translation of the original in Portuguese).

Petrobras announces today its consolidated results for the 1Q-2015 reviewed by independent auditors, stated in millions of *Reais*, prepared in accordance with International Financial Reporting Standards - IFRS issued by the International Accounting Standards Board - IASB.

Consolidated net income attributable to the shareholders of Petrobras and Adjusted EBITDA in the 1Q-2015 were R\$ 5,330 million and R\$ 21,518 million, respectively.

Key events

Jan-Mar

5,330	5,393	(1)	Consolidated net income (loss) attributable to the shareholders of Petrobras	(26,600)	120
-------	-------	-----	---	----------	-----

2,803	2,531	11	Total domestic and international crude oil and natural gas production (Mbb/d)	2,799	—
-------	-------	----	--	-------	---

21,518	14,349	50	Adjusted EBITDA	20,057	7
--------	--------	----	------------------------	--------	---

The Company reported net income of R\$ 5,330 million in the 1Q-2015, mainly due to the following events compared to the 4Q-2014:

- Diesel (5%) and gasoline (3%) price increases on November 7, 2014;
- Lower cost of sales due to decreased crude oil and oil product import costs and volumes;
- Lower export revenues, affected by a decrease in international crude oil prices (average Brent prices decreased by 29% in the 1Q-2015 compared to the 4Q-2014);
- Decreased domestic oil product sales (10%) due to the seasonal consumption and lower economic activity;
- R\$ 5,621 million net finance expense in the 1Q-2015;
- The Company reached a monthly average crude oil production record level of 672 thousand barrels per day in the pre-salt layer in the first quarter of 2015 (on April 11, 2015 the Company reached a crude oil production record level of 800 thousand barrels per day at the pre-salt layer); and
- Production start-up of P-61 platform in Papa-Terra field in the Campos Basin and of the early production system in Búzios field (Santos Basin), as well as the production start-up of Hadrian South field in ultra-deep waters of the Gulf of Mexico.

In the 1Q-2015, a 20.8% depreciation of the Real against the U.S. dollar affected our consolidated statement of income, shareholders' equity and indicators. However, this effect did not materially impact our net cash flows, as set forth below:

Consolidated statement of income (revenues, costs, operating expenses and finance expense) 1,426 decrease

Cash and cash equivalents held abroad

9,788 increase

Debt denominated in foreign currency

55,110 increase

Cash flow hedge accounting (shareholders' equity)	18,137 decrease
--	-----------------

Net debt/Adjusted EBITDA ratio

0.64X increase

Leverage

4.5pp increase

Appendix	Page 24

Comments from the CEO

Mr. Aldemir Bendine

Dear Shareholders and Investors,

During the first quarter of 2015 we reached an operating income of R\$ 13.3 billion and an adjusted EBITDA of R\$ 21.5 billion, an increase of 76% and 50%, respectively, when compared to the first quarter of 2014. This result is mainly explained by the higher oil production, higher fuel sales margins in Brazil and lower production taxes and imports. Our net income decreased 1% relative to the first quarter of 2014, mainly as a result of the exchange rate devaluation in the period.

We are working to maintain our financial and economic performances at high levels. In previous opportunities, I have mentioned that our goal is to develop a profitable Company, with excellence in Corporate Governance, and that is able to efficiently utilize its assets to generate the highest value to shareholders and investors. With that in mind, we are preparing a new business plan that will outline our vision for the future of Petrobras.

An important element of this plan is the deleveraging of the Company. We intend to accomplish it gradually, respecting the existing contracts and establishing a balance with the production growth.

Finally, I would like to once again congratulate the Company's employees, the ones responsible for another "OTC Distinguished Achievement Award for Companies, Organizations, and Institutions", the most important international offshore industry award. Such recognition proves that Petrobras has the necessary expertise, technology and resources for the construction of a company that aims at creating maximum value in its operations.

Aldemir Bendine, CEO.

-
- ¹ Basic and diluted earnings (losses) per share calculated based on the weighted average number of shares.
- ² Operating margin calculated based on net income (loss) before finance income (expense), share of earnings in equity-accounted investments, profit sharing and income taxes.
- ³ EBITDA + share of earnings in equity-accounted investments and impairment.
- ⁴ Average between the exports prices and the internal transfer prices from Exploration & Production to Refining, Transportation and Marketing.

FINANCIAL AND OPERATING HIGHLIGHTS

RESULTS OF OPERATIONS

1Q-2015 compared to the 4Q-2014:

Gross Profit

Gross profit increased 2% (R\$ 395 million), mainly due to:

Ø Sales revenues of R\$ 74,353 million, 13% lower as a result of:

- Decreased domestic oil product demand (10%), mainly diesel (10%) and gasoline (11%), reflecting the seasonal period and the lower economic activity; and
- Lower average export prices of crude oil and oil products, and decreased average realization prices of naphtha, jet fuel and fuel oil that are adjusted to reflect the decreased international prices (29% Brent decrease), partially offset by the depreciation of the real against the U.S. dollar (13%).

These effects were partially offset by the price adjustments on November 7, 2014 of diesel (5%) and gasoline (3%) that fully impacted the 1Q-2015.

Ø Costs of sales of R\$ 51,943 million, 18% lower when compared to the 4Q-2014, due to lower domestic oil product sales volumes, as well as to a decrease in crude oil and oil product import costs and production taxes, resulting from a decrease in international prices (29%), partially offset by the depreciation of the real against the U.S. dollar (13%), besides the lower share of oil product imports on sales mix.

Net income before finance income (expense), share of earnings in equity-accounted investments, profit sharing and income taxes

Net income before finance income (expense), share of earnings in equity-accounted investments, profit sharing and income taxes of R\$ 13,335 million, resulted from:

- Lower sale expenses resulting from the reversal of an allowance for impairment of trade receivables from companies in the isolated electricity system (R\$ 1,295 million), considering the complementary guarantee by pledged credits from the Energetic Development Account for a more part of debt confession agreement between the Company and the Eletrobras System on December 31, 2014;
- Decreased geologic and geophysical expenses and lower write-off of dry and/or subcommercial wells (R\$ 510 million); and
- Higher gross profit.

Net finance expense

Net finance expense of R\$ 5,621 million was R\$ 3,807 million higher than in the 4Q-2014, resulting from:

- Exchange variation losses due to a 20.8% depreciation of the Real against the U.S. dollar (compared to a 8.4% depreciation in the 4Q-2014) on net liability exposure in U.S. dollar, with the effects of the cash flow hedge as set forth on item 5 of Appendix;
- Lower gains on commodity derivative financial instruments;
- Higher interest expenses generated by the decrease in capitalized borrowing costs resulting from a decrease in the balance of assets under construction; and
- Monetary restatement of debt confession agreements of trade receivables from the electricity sector in the 4Q-2014.

These effects were partially offset by a foreign exchange variation gain attributable to a higher 11.6% appreciation of the U.S. Dollar against the Euro (compared to a 3.8% appreciation in the 4Q-2014) on net liabilities in Euro.

Net income attributable to the shareholders of Petrobras

Net income attributable to the shareholders of Petrobras was R\$ 5,330 million that reflects the lack of non-recurrent material items. In the 4Q-2014, the impairment charges of assets generated the loss of R\$ 26,600 million.

FINANCIAL AND OPERATING HIGHLIGHTS

RESULTS OF OPERATIONS

1Q-2015 compared to the 1Q-2014:

Gross Profit

Gross profit increased by 17% (R\$ 3,247 million) in the 1Q-2015 compared to the 1Q-2014, mainly due to:

Ø Sales revenues of R\$ 74,353 million, 9% lower, when compared to the 1Q-2014, resulting from:

- Lower export prices and a decrease in the price of oil products sold in the Brazilian market that were adjusted to reflect a decrease in international crude oil and oil product prices (Brent prices decreased by 50%). These effects were partially offset by the depreciation of the Real against the U.S. dollar (21%), along with higher diesel and gasoline prices following a price increase on November 7, 2014; and
- Decreased domestic oil product demand (6%), mainly of naphtha (30%), diesel (4%) and gasoline (5%), due to a decrease in economic activity.

These effects were partially offset by a higher crude oil export volume (44%).

Ø Cost of sales of R\$ 51,943 million in the 1Q-2015, 17% lower when compared to the 1Q-2014, due to:

- Lower import costs and production taxes attributable to a decrease in international crude oil prices (50%), partially offset by the impact of the depreciation of the Real against the U.S. dollar (21%); and
- Decreased domestic oil product sales volumes, lower share of crude oil imports on feedstock processing and a lower share of oil product imports in the sales mix.

Net income before finance income (expense), share of earnings in equity-accounted investments, profit sharing and income taxes

Net income before finance income (expense), share of earnings in equity-accounted investments, profit sharing and income taxes reached R\$ 13,335 million in the 1Q-2015, and was higher in R\$ 5,758 million compared to the 1Q-2014, due to higher gross profit, to the impact, in the 1Q-2014, of the Company's Voluntary Separation Incentive Plan - PIDV (R\$ 2,396 million) and to a gain resulting from the reversal of an allowance for impairment of trade receivables from companies in the isolated electricity system (R\$ 1,295 million).

Net finance expense

Net finance expense of R\$ 5,621 million, R\$ 5,447 million higher when compared to the 1Q-2014, resulting from:

- Exchange variation loss due to the higher 20.8% depreciation of the Real against the U.S. dollar (compared to the 3.4% foreign currency appreciation in the 1Q-2014) on net liability exposure in U.S. dollar, already considering the effects of the cash flow hedge, as set forth on item 5 of Appendix; and
- Higher interest expenses due to an increase in our net debt and a decrease in capitalized borrowing costs resulting from a decrease in the balance of assets under construction.

These effects were partially offset by an exchange rate variation gain due to the appreciation of the U.S. dollar against the Euro (appreciation of 11.6% in the 1Q-2015 compared to a flat exchange rate during 1Q-2014).

Net income attributable to the shareholders of Petrobras

Net income attributable to the shareholders of Petrobras reached R\$ 5,330 million in the 1Q-2015, remaining relatively flat compared to the 1Q-2014. The higher net finance expense and income taxes were offset by higher gross profit and lower operating expenses.

FINANCIAL AND OPERATING HIGHLIGHTS

NET INCOME BY BUSINESS SEGMENT

Petrobras is an integrated energy company and most of the crude oil and natural gas production from the Exploration & Production segment is transferred to other business segments of the Company. Our results by business segment include transactions carried out with third parties, transactions between companies of Petrobras's Group and transfers between Petrobras's business segments that are calculated using internal transfer prices defined through methodologies based on market parameters.

EXPLORATION & PRODUCTION

Jan-Mar

Net Income

2,672 18

3,148 10,654 (70)

(1Q-2015 x 4Q-2014): The higher net income was due to lower operating expenses, mainly to the fact that the 4Q-2014 was impacted by impairment charges and provision for decommissioning costs, partially offset by decreased crude oil sales/transfer prices, reflecting the net effect of the reduction of international crude oil prices (29%) and the depreciation of the real against the U.S. dollar (13%).

The spread between the average domestic oil price (sale/transfer) and the average Brent price increased from U.S.\$ 9.78/bbl in the 4Q-2014 to U.S.\$ 10.57/bbl in the 1Q-2015.

(1Q-2015 x 1Q-2014): The lower net income was mainly due to lower crude oil sales/transfer prices, reflecting the net effect of the reduction of international crude oil prices (50%) and the depreciation of the real against the U.S. dollar (21%), partially offset by an increase in crude oil and NGL production in Brazil (12%), lower write-offs of dry and subcommercial wells and by the negative impact of the Company's Voluntary Separation Incentive Plan (PIDV) in the 1Q-2014.

The spread between the average domestic oil price (sale/transfer) and the average Brent price increased from US\$10.20/bbl in the 1Q-2014 to U.S.\$ 10.57/bbl in the 1Q-2015.

Jan-Mar

Exploration & Production - Brazil (Mbb/d)
(*)

2,150	–	Crude oil and NGLs	2,149	1,922	12
-------	---	--------------------	-------	-------	----

453	3	Natural gas ⁵	467	400	17
-----	---	--------------------------	-----	-----	----

2,603	–	Total	2,616	2,322	13
--------------	---	--------------	--------------	--------------	----

(1Q-2015 x 4Q-2014): Crude oil and NGL production remained relatively flat compared to the 4Q-2014. The increased production from the ramp-up of FPSOs Cidade de Mangaratiba (Iracema Sul) and Cidade de Ilhabela (Sapinhoá) was offset by the termination of the production of Marlim FPSO MLS in January 2015 (termination of the agreement) and by the preventive maintenance stoppage of P-58 platform (Parque das Baleias).

(1Q-2015 x 1Q-2014): Crude oil and NGL production increased by 12% as a result of the start-up of P-62 platform (Roncador), Cidade de Mangaratiba (Iracema Sul area) and Cidade de Ilhabela (Sapinhoá) FPSOs, along with the ramp-up of P-55 (Roncador), P-58 (Parque das Baleias) and P-63 (Papa-Terra) production systems, as well as Cidade de Paraty (Lula NE) and Cidade de São Paulo (Sapinhoá) FPSOs. The natural decline of certain fields partially offset these effects.

Natural gas production increased by 3% due to the ramp-up of FPSOs Cidade de Mangaratiba (Iracema Sul) and Cidade de Ilhabela (Sapinhoá).

The 17% increase in natural gas production is attributable to the production start-up of Cidade de Mangaratiba (Iracema Sul area) and Cidade de Ilhabela (Sapinhoá) FPSOs and to the higher productivity of P-58 (Parque das Baleias) and Mexilhão platforms and of Cidade de Paraty (Lula NE), Cidade de São Paulo (Sapinhoá), Cidade de Santos (Uruguá-Tambaú) and Cidade de Angra dos Reis (Lula) FPSOs. This increase was partially offset by the natural decline of certain fields.

* Not reviewed by independent auditor.

⁵ Does not include LNG. Includes gas reinjection.

FINANCIAL AND OPERATING HIGHLIGHTS

Lifting Cost - Brazil (*)

U.S.\$/barrel:

14.21	(7)	Excluding production taxes	13.27	14.15	(6)
-------	-----	----------------------------	-------	-------	-----

25.72	(22)	Including production taxes	20.05	33.00	(39)
-------	------	----------------------------	-------	-------	------

R\$/barrel:

36.12	6	Excluding production taxes	38.13	33.14	15
-------	---	----------------------------	-------	-------	----

66.41	(12)	Including production taxes	58.73	76.86	(24)
-------	------	----------------------------	-------	-------	------

Lifting Cost - Excluding production taxes – U.S./barrel

(1Q-2015 x 4Q-2014): Lifting cost excluding production taxes in U.S./barrel decreased by 7%. Excluding the impact of foreign exchange variation, it increased 1% due to higher well intervention expenses.

(1Q-2015 x 1Q-2014): Lifting cost excluding production taxes in U.S./barrel decreased by 6%. Excluding the impact of foreign exchange variation, it increased by 6% due to higher well intervention expenses and higher engineering and subsea maintenance costs in the Campos Basin, besides the start-up of the FPSO Cidade de Ilhabela (Sapinhoá), which have higher costs per unit produced during the start-up period.

Lifting Cost - Including production taxes – U.S./barrel

(1Q-2015 x 4Q-2014): The 22% decrease in lifting cost including production taxes is attributable to a decrease in the average reference price for domestic crude oil in U.S. dollars (33%), which is used to calculate production taxes in Brazil, resulting from lower international crude oil prices.

(1Q-2015 x 1Q-2014): The 39% decrease in lifting cost including production taxes is attributable to lower average reference price for domestic crude oil in U.S. dollars (a 54% decrease), which is used as parameter to calculate production taxes in Brazil, as a result of lower international crude oil prices.

* Not reviewed by independent auditor.

FINANCIAL AND OPERATING HIGHLIGHTS

REFINING, TRANSPORTATION AND MARKETING

Jan-Mar

Net Income

(21,333) 129

6,181 (4,808) 229

(1Q-2015 x 4Q-2014): The net income of the 1Q-2015 was due to lower crude oil acquisition/transfer costs and to the decreased oil product imports for resale, reflecting the net effect of the decreased international commodity prices (29%), the depreciation of the real against the U.S. dollar (13%) and the price adjustments of diesel (5%) and gasoline (3%) occurred on November 7, 2014. The net loss of the 4Q-2014 was generated by impairment charges of refining and petrochemical assets.

(1Q-2015 x 1Q-2014): The net income was due to a decrease in crude oil acquisition/transfer costs resulting from lower international prices (a 50% decrease), to the depreciation of the real against the U.S. dollar (21%), to the lower share of crude oil imports on feedstock processed and of oil product imports on our sales mix, and also to diesel (5%) and gasoline (3%) price increases occurred on November 7, 2014.

----	---	--	----	----	---

(1Q-2015 x 4Q-2014): Daily feedstock processed decreased 10% due to the scheduled stoppage of RLAM, partially offset by the start-up of RNEST.

(1Q-2015 x 1Q-2014): Daily feedstock processed was 7% lower, due to the scheduled stoppage of RLAM distillation unit, partially offset by the operational return of REPLAN compared to the scheduled stoppage occurred in the 1Q-2014.

Jan-Mar

Refining Cost - Brazil (*)

2.71	5	Refining cost (U.S.\$/barrel)	2.84	2.75	3
------	---	-------------------------------	------	------	---

6.90	18	Refining cost (R\$/barrel)	8.16	6.48	26
------	----	----------------------------	------	------	----

(1Q-2015 x 4Q-2014): Refining cost, in US\$/barrel, increased by 5%. Refining cost, in R\$/barrel, increased by 18% due to lower feedstock processed.

(1Q-2015 x 1Q-2014): Refining cost, in US\$/barrel, increased by 3%. Refining cost, in R\$/barrel, increased by 26%, mainly attributable to higher employee compensation costs arising from the 2014 Collective Bargaining Agreement and to lower feedstock processed.

* Not reviewed by independent auditor.

⁷ Reference feedstock or Installed capacity of primary processing considers the maximum sustainable feedstock processing reached at the distillation units at the end of each period, respecting the project limits of equipment and the safety, environment and product quality requirements. It is lower than the authorized capacity set by ANP (including temporary authorizations) and by environmental protection agencies.

⁸ Refining plants utilization factor is the relation between the feedstock processed (excluding NGL) and the reference feedstock.

⁹ Feedstock processed (excluding NGL) – Brazil is the volume of crude oil processed in the Company's refineries and is factored into the calculation of the Refining Plants Utilization Factor.

¹⁰ Feedstock processed – Brazil includes crude oil and NGL processing.

FINANCIAL AND OPERATING HIGHLIGHTS

GAS & POWER

Jan-Mar

Net Income

357	285	1,376	515	167
-----	-----	-------	-----	-----

(1Q-2015 x 4Q-2014): The higher net income was mainly due to a reversal of an allowance for impairment of trade receivables from electricity companies, besides lower LNG import costs, partially offset by the effect of a decrease in electricity average margins due to a reduction of electricity spot prices (47%).

(1Q-2015 x 1Q-2014): The higher income was mainly due to a reversal of an allowance for impairment of trade receivables from electricity companies, an increase in average natural gas sales margins (due to lower LNG import costs and to the higher domestic natural gas supply), partially offset by the effect of a decrease in electricity average margins due to a reduction of electricity spot prices (41%) and the gain on disposal of 100% of our interest in Brasil PCH S.A. (R\$ 646 million), recognized only in 2014.

Jan-Mar

Physical and Financial Indicators (*)

1,128	(19)	Electricity sales (Free contracting market - ACL) - average MW	911	1,252	(27)
-------	------	--	-----	-------	------

2,671	22	Electricity sales (Regulated contracting market - ACR) - average MW	3,263	1,891	73
-------	----	---	-------	-------	----

4,941	3	Generation of electricity - average MW	5,110	4,117	24
-------	---	--	-------	-------	----

724	(47)	Electricity price in the spot market -	387	651	(41)
		Differences settlement price (PLD) - R\$/MWh ¹¹			

190	(41)	Imports of LNG (Mbbbl/d)	113	119	(5)
-----	------	--------------------------	-----	-----	-----

201	3	Imports of natural gas (Mbb/d)	208	204	2
-----	---	--------------------------------	-----	-----	---

(1Q-2015 x 4Q-2014): Electricity sales volumes were 19% lower on the Free Contracting Environment – ACL mainly resulting from the shift of the sale of a portion of our available capacity towards the Brazilian electricity regulated market (Ambiente de Contratação Regulada – ACR).

The 3% increase on electricity generation was due to higher thermoelectric availability in the period.

The 47% decrease on electricity prices in the spot market resulted from changes on ANEEL methodology as from December 27, 2014 that established a decreased amount for the calculation of the maximum limit of differences settlement price.

The 41% decrease on LNG imports was due to higher domestic natural gas supply to meet higher production.

The 3% increase in natural gas imports from Bolivia is due to a higher thermoelectric demand.

(1Q-2015 x 1Q-2014): Electricity sales volumes were 27% lower resulting from the shift of the sale of a portion of our available capacity (1,049 average MW) towards the Brazilian electricity regulated market (Ambiente de Contratação Regulada – ACR).

Electricity generation was 24% higher due to increased government thermoelectric dispatch and to higher installed capacity of the Petrobras Thermoelectric Complex (leasing agreement of UTE Cuiabá and the termination of the cycle of UTE Baixada Fluminense).

The 41% decrease on electricity prices in the spot market resulted from the decreased of the maximum differences settlement price authorized by ANEEL as from December 27, 2014.

The 5% decrease on LNG imports was due to higher domestic natural gas supply to meet higher production.

Natural gas imports from Bolivia was 2% higher to meet a higher thermoelectric demand in Brazil.

* Not reviewed by independent auditor.

¹¹ Weekly weighed prices per output level (light, medium and heavy), number of hours and submarket capacity.

FINANCIAL AND OPERATING HIGHLIGHTS

BIOFUEL

Jan-Mar

Net Income

(67) 27

(49) (75) 35

(1Q-2015 x 4Q-2014): Net losses were lower, due to a decrease in the share of losses from ethanol and biodiesel investees and by improved biodiesel margin operations.

(1Q-2015 x 1Q-2014): Biofuel losses were lower in 1Q-2015, when compared to 1Q-2014, due to a decrease in the share of losses from biodiesel investees and to improved biodiesel margin operations.

DISTRIBUTION

Jan-Mar

Net Income

432 28

555 484 15

(1Q-2015 x 4Q-2014): The higher net income was due to higher average sale fuel margins generated by increased prices, partially offset by lower sales volumes (8.6%).

(1Q-2015 x 1Q-2014): The higher net income was due to higher average fuel trading margins, to higher sales volumes (1%) and to the negative impact of the Company's Voluntary Separation Incentive Plan (PIDV) in 2014.

Jan-Mar

Market Share (*)¹²

36.9% —

36.7% 37.0% —

(1Q-2015 x 4Q-2014): The Company's market share was lower mainly due to the 10% decrease of diesel and fuel oil markets, in which BR Distribuidora has a significant share. BR Distribuidora increased its market share in diesel volumes and maintained its share in fuel oil sales, however, the change in the sales mix led to an overall decrease in its market share.

(1Q-2015 x 1Q-2014): The Company's market share was lower mainly due to the 2% decrease in the total volume sold in the diesel market, in which BR Distribuidora has a significant share. BR Distribuidora increased its market share in diesel volumes, however, the change in the sales mix led to an overall decrease in its market share.

* Not reviewed by independent auditor.

¹² Beginning in 2015, our market share excludes sales made to wholesalers. Market share for prior periods was revised pursuant to the changes made by the Brazilian National Petroleum, Natural Gas and Biofuels Agency (ANP) and by the Brazilian Wholesalers and Fuel Traders Syndicate (Sindicom). Prior periods are presented based on the new methodology.

FINANCIAL AND OPERATING HIGHLIGHTS

INTERNATIONAL

As an outcome of the creation of the position of Chief Governance, Risk and Compliance Officer, which replaced the position of Chief International Officer, the Company has recently approved the organizational structure adjustments in other business areas to allocate the international activities to other business segments. Considering the necessary steps to integrate the management of those activities, the Company is still presenting the results of international activities separately.

Jan-Mar

Net Income

(4,131) 102

103

753

(86)

(1Q-2015 x 4Q-2014): The net income of the 1Q-2015 was due to the gain on the disposal of fields in Austral Basin in Argentina. The net loss of the 4Q-2014 was affected by impairment charges recognized on E&P activities in the United States and Bolivia and on Japanese refining, besides the inventory write-downs to net realizable value (market value) in December 2014, mainly in the United States and Japan, attributable to a decrease in international crude oil and oil product prices, partially offset by a gain on the disposal of the Company's interest in Petrobras Energia Peru S/A.

(1Q-2015 x 1Q-2014): Net income was lower in the 1Q-2015 when compared to the 1Q-2014 due to a decrease in international crude oil prices and the lower share of earnings in African investees attributable to a decrease in international crude oil and oil product prices. Crude oil sales volumes were also lower, resulting from the disposal of onshore operations in Colombia and in Peru in 2014. The Company also recognized tax credits in the Netherlands in the 1Q-2014. These effects were partially offset by gains on the disposal of fields in the Austral Basin in Argentina in the 1Q-2015.

Jan-Mar

**Exploration & Production-International
(Mbb/d)¹³ (*)**

Consolidated international production

75	(8)	Crude oil and NGLs	69	87	(21)

90 (3) Natural gas 87 91 (4)

165	(5)	Total consolidated international production	156	178	(12)
-----	-----	---	-----	-----	------

31	–	Non-consolidated international production	31	31	–
----	---	---	----	----	---

196	(5)	Total international production	187	209	(11)
------------	-----	---------------------------------------	------------	------------	------

(1Q-2015 x 4Q-2014): Crude oil and NGL production decreased by 8% due to the disposal of onshore assets in Peru concluded in November 2014, despite higher production generated by the start-up of Saint Malo fields in December 2014 and Lucius in January 2015 in the United States.

Natural gas production decreased by 3% mainly due to the disposal of onshore assets in Peru.

(1Q-2015 x 1Q-2014): Consolidated crude oil and NGL production decreased by 21%, due to the disposal of onshore areas in Peru in November 2014 and in Colombia in April 2014. These effects were partially offset by an increase in production due to the start-up of Saint Malo field in December 2014 and Lucius in January 2015 in the United States.

Natural gas production decreased by 4%, mainly in Peru, due to the disposal of onshore assets.

* Not reviewed by independent auditor.

¹³ Some of the countries that comprise the international production are operating under the production-sharing model, with the production taxes charged in crude oil barrels.

FINANCIAL AND OPERATING HIGHLIGHTS

Jan-Mar

Lifting Cost - International (U.S.\$/barrel)
(*)

10.40	(15)		8.86	7.85	13
-------	------	--	------	------	----

(1Q-2015 x 4Q-2014): Lifting cost decreased by 15%, mainly due to lower maintenance expenses in Argentina and to the cleaning costs incurred in the 4Q-2014 of production lines in the Cottonwood field in the United States.

(1Q-2015 x 1Q-2014): International lifting cost was 13% higher, mainly in Argentina, resulting from higher operation and maintenance service charges, offset by the termination of disposal of assets in Peru and Colombia in 2014, which had higher operational costs.

Jan-Mar

**Refining Operations - International
(Mbb/d) (*)**

149	(15)	Total feedstock processed ¹⁴	127	165	(23)
-----	------	---	-----	-----	------

157	(1)	Output of oil products	155	175	(11)
-----	-----	------------------------	-----	-----	------

230 – Reference feedstock ¹⁵ 230 230 –

64	(10)	Refining plants utilization factor (%) ¹⁶	54	70	(16)
----	------	--	----	----	------

(1Q-2015 x 4Q-2014): Feedstock processed was 15% lower due to a decrease in the output of oil products and in the capacity utilization generated by the scheduled stoppage on the distillation unit in the United States in March 2015. This effect was partially offset in Japan, mainly attributable to the lower feedstock processed in the 4Q-2014 as a result of higher fuel oil inventory available in the period.

(1Q-2015 x 1Q-2014): Our total international feedstock processed was 23% lower due to a decrease in oil product production and lower capacity utilization, mainly in the United States, due to a scheduled stoppage in the distillation unit during March 2015.

Jan-Mar

**Refining Cost - International
(U.S.\$/barrel) (*)**

5.25	(26)		3.90	3.66	7
------	------	--	------	------	---

(1Q-2015 x 4Q-2014): Refining cost per unit decreased by 26% mainly due to maintenances at the catalytic cracking unit in the United States refinery in the 4Q-2014.

(1Q-2015 x 1Q-2014): International refining cost per unit was 7% higher, mainly in Argentina, due to higher employee compensation costs and in Japan that had lower feedstock processed due to lower fuel oil demand.

* Not reviewed by independent auditor.

¹⁴ Total feedstock processed is the crude oil processed abroad at the atmospheric distillation plants, plus the intermediate products acquired from third parties and used as feedstock in other refining units.

¹⁵ Reference feedstock is the maximum sustainable crude oil feedstock reached at distillation plants.

¹⁶ Refining Plants Utilization Factor is the relation between the crude oil processed at the distillation plant and the reference feedstock.

4,010	(8)	Total	3,708	3,824	(3)
--------------	-----	--------------	--------------	--------------	-----

(1Q-2015 x 4Q-2014): Our domestic sales volumes decreased by 9% when compared to the 4Q-2014, primarily due to:

- Diesel (a 10% decrease) – due to seasonal demand, considering the lower economic activity in the beginning of the year;
- Gasoline (a 11% decrease) – higher demand in the 4Q-2014 due to higher salaries as a result of Christmas bonuses;
- Naphtha (a 18% decrease) – due to lower demand by domestic customers, mainly Braskem; and
- Natural gas (a 2% decrease) – due to decreased demand on the non-thermoelectric sector.

(1Q-2015 x 1Q-2014): Our domestic sales volumes decreased by 4%, primarily due to:

- Diesel (a 4% decrease) – lower consumption by infrastructure construction projects in Brazil and a higher percentage of mandatory biodiesel content requirement in diesel (diesel/biodiesel mix). These effects were partially offset by an increase in the Brazilian diesel-moved light vehicle fleet (vans, pick-ups and SUVs) and higher thermoelectric consumption by thermoelectric plants that complement the Brazilian Integrated Electricity System;
- Gasoline (a 5% decrease) – an increase in the anhydrous ethanol content requirement for Type C gasoline (from 25% to 27%), a decrease in the automotive gasoline-moved fleet and higher share of gasoline sales of other players;
- Naphtha (a 30% decrease) – due to lower demand by domestic customers, mainly Braskem; and
- Natural gas (a 5% increase) – due to a higher demand on the electricity sector.

the end of period

68,946

Adjusted cash and cash equivalents 68,182 78,478
at the end of period ¹⁸

As of March 31, 2015, the balance of cash and cash equivalents decreased by 22% when compared to the balance as of December 31, 2014 and the balance of adjusted cash and cash equivalents¹⁸ decreased by 1%. Our principal uses of funds in the 1Q-2015 were for capital expenditures and repayment of long-term financing. We met these requirements with cash provided by operating activities of R\$ 16,427 million and with the decrease in our balance of adjusted cash and cash equivalents. The balance of adjusted cash and cash equivalents was positively impacted in 2015 by the effect of the foreign exchange rate variation over financial investments abroad.

Net cash provided by operating activities increased by 74% in 1Q-2015 when compared to 1Q-2014 mainly due to a higher gross profit and a decrease in the level of inventories and trade receivables.

Capital expenditures and investments were 13% lower in the 1Q-2015, mainly due to a decrease in capital expenditures in our Refining, Transportation and Marketing (RTM) segment. We also repaid long-term financings in the 1Q-2015, mainly because of our inability to access new sources in the capital markets.

Due to the limitations on funding sources, complications due to contractor insolvency and the lack of availability of qualified suppliers, mainly as a result of the Lava Jato investigation, the Company has recently decided to postpone certain projects for an extended period of time.

The Company intends to use different funding sources (banking markets, export credit agency - ECAs and capital markets) in 2015 to obtain the necessary funding to repay debt and fund its capital expenditures. In addition, the Company's divestment program (of US\$ 13.7 billion) will contribute to its funding needs.

¹⁷ For more details, see the Consolidated Statement of Cash Flows Data on page 20.

¹⁸ Our adjusted cash and cash equivalents include government bonds and time deposits from highly rated financial institutions abroad with maturities of more than 3 months from the date of acquisition, considering the expected realization of those financial investments in the short-term. This measure is not defined under the International Financial Reporting Standards – IFRS and should not be considered in isolation or as a substitute for cash and cash equivalents computed in accordance with IFRS. It may not be comparable to adjusted cash and cash equivalents of other companies, however management believes that it is an appropriate supplemental measure that helps investors assess our liquidity and supports leverage management.

---------------	---	------------------------	---------------	---------------	----

24	5	Adjusted EBITDA margin (%)	29	18	11
		26			

Our adjusted EBITDA (according to CVM Instruction 527 of October 4, 2012) is the net income before net finance income (expense), income taxes, depreciation, depletion and amortization, share of earnings in equity-accounted investments and impairment, which provides an additional information about our ability to pay debt, carry out investments and cover our working capital needs. Adjusted EBITDA is not an IFRS measure and may not be comparable with the same measure as reported by other companies.

2. Effect of weighted average cost flow on the cost of sales (R\$ million)

Products remain in inventory for an average of 60 days and, therefore, the changes on international crude oil and oil products prices and the effect of the exchange rate variation on imports and on production taxes do not fully impact the costs of sales for the period, fully impacting only the following period. The estimated effects on the cost of sales are set out in the table below:

Effect of the average cost on the cost of sales *

(1,951) (656)

* In the 1Q-2015, the effect of the average cost on the cost of sales was not favorable (but less unfavorable when compared to the 4Q-2014), due to the realization of unit costs of inventories acquired in periods of higher international prices, already considering the depreciation of the real against the U.S. dollar.

() The amount in parenthesis demonstrates the negative effect on the cost of sales.

²⁶ Adjusted EBITDA margin equals Adjusted EBITDA divided by sales revenues.

APPENDIX

3. Consolidated Taxes and Contributions

The economic contribution of Petrobras, measured by taxes and contributions, was R\$ 24,420 million.

Jan-Mar

**Economic Contribution -
Brazil**

12,934	(4)	Domestic Value-Added Tax (ICMS)	12,455	11,172	11

12,223	100	Total	24,420	19,118	28
---------------	-----	--------------	---------------	---------------	----

4. Production Taxes

Jan-Mar

Brazil

3,385	(25)	Royalties	2,529	4,125	(39)
-------	------	-----------	-------	-------	------

3,080	(43)	Special participation charges	1,764	4,034	(56)
-------	------	-------------------------------	-------	-------	------

40	8	Rental of areas	43	41	5
----	---	-----------------	----	----	---

6,505	(33)	Subtotal - Brazil	4,336	8,200	(47)
-------	------	-------------------	-------	-------	------

257	(15)	International	218	282	(23)
-----	------	---------------	-----	-----	------

6,762	(33)	Total	4,554	8,482	(46)
--------------	------	--------------	--------------	--------------	------

(1Q-2015 x 4Q-2014): Production taxes in Brazil decreased 33% mainly due to the 24% decrease in the reference price for domestic oil in Reais that reached an average of R\$/bbl 126.33 (US\$/bbl 43.96) in the 1Q-2015 compared to R\$/bbl 165.40 (US\$/bbl 65.30) in the 4Q-2014, impacted by the variation of international crude oil prices, besides the effect of deductible expenses of great fields that pays special participation charges.

(1Q-2015 x 1Q-2014): The 47% decrease of production taxes in Reais in Brazil was mainly due to the 44% decrease in the reference price for domestic oil, that reached an average of R\$/bbl 126.33 (US\$/bbl 43.96) in Jan-Mar/2015 compared to R\$/bbl 226.84 (US\$/bbl 95.98) in Jan-Mar/2014.

(592)	(360)	Net Inflation indexation and foreign exchange variation	(2,664)	632	(522)
-------	-------	--	---------	-----	-------

APPENDIX

6. Assets and Liabilities subject to Exchange Variation

The Company has assets and liabilities subject to foreign exchange rate variation, for which the main exposure is to the Real relative to the U.S. dollar and the U.S. dollar relative to the Euro. Beginning in mid-May 2013, the Company extended the use of the hedge accounting practice to hedge highly probable future exports.

The Company designates hedging relationships to account for the effects of the existing natural hedge between a portion of its long-term debt obligations (denominated in U.S. dollars) and its U.S. dollar denominated exports and to properly recognize that hedge in its financial statements. Approximately 70% of the total net debt exposed to changes in foreign exchange rate was designated as hedging instruments to hedge a seven-year period of highly probable future exports.

Through the extension of the hedge accounting practice, foreign exchange gains or losses from debt denominated in U.S. dollars will only affect the Company's statement of income when the future exports affect its statement of income. Until our future exports are realized, such foreign exchange variations will be recognized in our shareholders' equity.

The balances of assets and liabilities in foreign currency of controlling companies outside of Brazil are not included on the exposure below when transacted in a currency equivalent to their respective functional currencies. On March 31, 2015, the Company had a net liability position regarding foreign exchange exposure. Therefore, the appreciation of the Real relative to other currencies results in a foreign exchange variation income, while the depreciation of the Real results in a foreign exchange variation expense.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
